This Article is brought to you for free and open access by the University Archives at LSU Scholarly Repository. It has been accepted for inclusion in LSU General Catalog by an authorized administrator of LSU Scholarly Repository. For more information, please contact ir@lsu.edu.

Courses: General Information

The following are important notes concerning courses:

- General education courses are designated within the course description in **bold**.
- Class minima are specified in PS-37, *Minimum Class Size*:

<< Below 4000	15
<< Between 4000-4999	10
<< 5000 and above	5

- Academic credit provides the basis for measuring the amount of engaged learning time expected of a typical student enrolled not only in traditional classroom settings but also laboratories, studios, internships, and other experiential learning, distance, and correspondence education. A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:
 - Not less than one hour (50 minutes) of lecture/classroom or direct faculty instruction and a minimum of two hours out-of-class student work for approximately 15 weeks for one semester or the equivalent amount of work over a different amount of time; or
 - At least an equivalent amount of work as required (and outlines in the bullet point above) for other academic activities including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

The above described definitions do not dictate particular amounts of classroom time versus out-of-class student work. In determining the amount of work the learning outcomes of the proposed course will entail, the program may take into consideration alternative delivery methods, measurements of student work, academic calendars, disciplines, degree levels, and other similar considerations.

- When a course consists entirely or partly of laboratory, that fact is stated in the description. *When not otherwise specified, the course consists entirely of lectures.*
- The number of credit hours that a course carries per semester is listed in parentheses following the course title. If the number listed is variable, i.e. (2-4), *the amount of credit that the student is to receive must be stated at the time of registration.*
- Indication of variable credit does not mean that a course may be repeated for credit. If a course can be repeated for credit, that information is included in the course description.
- Listing of a course does not necessarily mean that it will be offered every year. Some courses are only offered in the summer such as field courses. They are indicated in the catalog by *Su*. Students may contact the departments to determine when courses will be offered.
- The phrases *also offered as...*, *see...*, or *same as...*, which appear in some course descriptions, refer to honors courses or to cross-listed courses that are available through more than one department. In each of these instances, only one of the courses may be taken for credit.

LSU Course Numbering System

An explanation of the first digit of the four-digit course numbering system follows. The meaning of the second, third, and fourth digits varies by department. See "Year Classification of Students" in the "Regulations" section of this catalog for an explanation of the criteria for classification as a freshman, sophomore, etc.

1000-1999 • For undergraduate students, primarily freshmen; *for undergraduate credit only*. Ordinarily open to all students; in some instances upper-division students may not take these courses for degree credit.

2000-2999 • For undergraduate students, sophomore level or above; *for undergraduate credit only*.

3000-3999 • For advanced undergraduate students, junior- and senior-level; *for undergraduate credit only*. These courses constitute the advanced portion of an undergraduate program leading to the bachelor's degree. A student with fewer than 60 hours of credit may enroll in 3000 level courses if they meet the enrollment requirements of the college whose departments offer the courses.

4000-4999 • For advanced undergraduate students (who have completed a minimum of 60 semester hours) and students in graduate and professional schools and colleges; *for undergraduate or graduate credit*.

Undergraduates with 30 or more semester hours who are making timely progress toward a degree may be admitted to 4000 level courses. Such students must have a 3.50 GPA or higher, the appropriate prerequisites, consent of the instructor, and permission of the dean of the student's undergraduate college.

Graduate credit for LSU Seniors. A senior at LSU who needs fewer than 15 semester hours to complete requirements for the bachelor's degree, who has maintained a GPA of at least a 3.00 during the preceding year at LSU, and who has a cumulative GPA of at least 2.75 may be permitted to register for graduate credit in courses numbered 4000-4999, provided the student registers for all the remaining courses required for graduation and for no more than 15 semester hours total. This privilege applies only during the final semester of the student's undergraduate work and is extended only upon recommendation of the chair of the department in which the student plans to enroll as a graduate student, the dean of the student's college, and approval of the dean of The Graduate School. The requested signatures of approval should be submitted on a form designed specifically for this program. This form must be submitted to The Graduate School by the last day to add classes in the semester in which graduate credit is desired. A student must complete all undergraduate degree credit courses in order to retain the privilege of obtaining graduate credit for the remaining courses.

5000-5999 • For students in *post-baccalaureate professional programs (architecture, law, and veterinary medicine)*. A student in The Graduate School may take these courses for credit with approval of the student's major department.

6000-6999 • Exclusively *for teachers* at the elementary, secondary, and junior college levels.

7000-7999 • For students in The Graduate School; *for graduate credit only except as follows*. Undergraduates with 75 or more semester hours who are making timely progress toward a degree may be admitted to 7000 level courses. Such students must have a 3.50 or higher GPA, the appropriate prerequisites, consent of the instructor, and permission of the dean of the student's undergraduate college. Credit so earned will apply only toward undergraduate degree requirements, except for students enrolled in an accelerated master's degree program.

8000-8999 • Research courses exclusively for graduate students, primarily for students working toward the master's degree; *for graduate credit only*. The number 8000 designates thesis research.

9000-9999 • Research courses exclusively for graduate students, primarily for advanced graduate students working toward the doctoral degree; *for graduate credit only*. The number 9000 designates dissertation research.

Louisiana Common Course Numbering System

To help students transfer from one institution to another, Louisiana public post-secondary institutions have adopted a single numbering system for many of their courses. The Louisiana Common Course Numbering System (LCCN) is a standard set of four-character abbreviations for academic disciplines and four-digit course numbers. The first digit of the number represents the academic level of the course (1 for freshman, 2 for sophomore, 3 for junior, and 4 for senior). For courses with Louisiana Common Course Numbers, the numbers appear in brackets in the course descriptions. For additional information about the LCCN, please access [here](#).

Students should consult the "Undergraduate Admissions" section of this catalog for information regarding the acceptance of credit from other collegiate institutions.

Academic Calendar, 2014-2015

Fall Semester 2014

AUGUST	14-15	Thu-Fri	International Student Orientation
	15	Fri	<i>Final date for submitting to the Graduate School General Examination Results for the doctorate to be awarded at fall commencement, 4:30 p.m. deadline (minimum period of three months is required between completion of the General Exam and completion of the Final Defense)</i>
	18-21	Mon-Thu	Freshman and Transfer Orientation
	20	Wed	<i>New Graduate Student Orientation</i>
	22	Fri	<i>Final date to apply to the Graduate School for the fall semester, 12:00 midnight deadline</i>
	25	Mon	Classes begin, 7:30 a.m.

SEPTEMBER	1	Mon	Labor Day holiday begins, 7:30 a.m.
	2	Tue	Classes resume, 7:30 a.m.
	3	Wed	Final date for dropping courses without receiving a grade of "W", 4:30 p.m. deadline
	4	Thu	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	4	Thu	<i>Final date for "Degree Only" registration (all degree requirements, including document submission and approval by the Graduate School must be met), 4:30 p.m. deadline</i>
	5	Fri	<i>Final date for submitting to the Graduate School (or updating) "Applications for Degree" to be awarded at fall commencement, 4:30 p.m. deadline</i>
	5	Fri	<i>Final date for submitting to the Graduate School "Requests for Final Exams" (comprehensive exam, thesis/dissertation defense) for degrees to be awarded at fall commencement, 4:30 p.m. deadline</i>

OCTOBER	2	Thu	Fall holiday begins, 7:30 a.m.
	6	Mon	Classes resume, 7:30 a.m.
	13-18	Mon-Sat	Mid-semester examination period

	14	Tue	Final date for receipt of Graduate School application for admission for spring semester without paying \$25 late fee, 12:00 midnight deadline
	14	Tue	Final date for international applicants residing outside the U.S. to apply to the Graduate School for the spring semester, 12:00 midnight deadline
	19	Sun	Course scheduling for spring semester, spring intersession, and summer term begins, 5:00 p.m.
	21	Tue	Mid-semester grades due, 9:00 a.m. deadline

NOVEMBER

	7	Fri	Final date for resigning from the university, 4:30 p.m. deadline
	7	Fri	Final date for dropping courses, 4:30 p.m. deadline
	7	Fri	Final date to request rescheduling a final examination when three examinations are scheduled in 24 hours
	17	Mon	Final date for submitting to the Graduate School committee examination reports and approved theses and dissertations, 4:30 p.m. deadline
	21	Fri	Final date for submitting required Graduate School edits to theses and dissertations, 12:00 noon deadline
	26	Wed	Thanksgiving holiday begins, 12:30 p.m.

DECEMBER

	1	Mon	Classes resume, 7:30 a.m.
	3	Wed	Concentrated Study Period begins—no meetings, social activities, athletic events, or other extracurricular activities requiring student participation will be scheduled; no major examinations will be given in academic courses other than labs
	6	Sat	Classes end, 10:00 p.m.
	7	Sun	Concentrated Study Period ends
	8-13	Mon-Sat	Final examinations
	16	Tue	Final grades due (degree candidate), 9:00 a.m. deadline
	17	Wed	Final grades due (non-degree candidate), 9:00 a.m. deadline
	19	Fri	Commencement Day

42 MWF Classes; 28 TTh Classes

Wintersession 2014

DECEMBER	15	Mon	Classes begin, 7:30 a.m.
	15	Mon	Final date for dropping courses without receiving a grade of "W," 4:30 p.m. deadline
	16	Tue	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	23	Tue	Final date for resigning from the university, 4:30 p.m. deadline
	23	Tue	Final date for dropping courses, 4:30 p.m. deadline
	24	Wed	Winter holiday begins, 7:30 a.m.

JANUARY	2	Fri	Classes resume, 7:30 a.m.
	5	Mon	Classes end, 10:00 p.m.
	6	Tue	Final examinations
	8	Thu	Final grades due, 9:00 a.m. deadline
	<i>11 Classes</i>		

Spring Semester 2015

JANUARY	7	Wed	International Student Orientation
	8, 9, 12	Thu, Fri, Mon	Freshman and Transfer Orientation
	9	<i>Fri</i>	<i>Final date to apply online to the Graduate School for the spring semester, 12:00 midnight deadline</i>
	13	<i>Tue</i>	<i>Final date for submitting to the Graduate School General Examination results for the doctorate to be awarded at spring commencement, 4:30 p.m. deadline (minimum period of three months is required between completion of the General Exam and completion of the Final Defense)</i>
	14	Wed	Classes begin, 7:30 a.m.

	19	Mon	Martin Luther King Day holiday begins, 7:30 a.m.
	20	Tue	Classes resume, 7:30 a.m.
	23	Fri	Final date for dropping courses without receiving a grade of "W", 4:30 p.m. deadline
	26	Mon	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	26	Mon	<i>Final date for "Degree Only" registration (all degree requirements, including document submission and approval by the Graduate School must be met), 4:30 p.m. deadline</i>
	28	Wed	<i>Final date for submitting (or updating) to the Graduate School "Applications for Degree" to be awarded at spring commencement, 4:30 p.m. deadline</i>
	28	Wed	<i>Final date for submitting to the Graduate School "Requests for Final Exams" (comprehensive exam, thesis/dissertation defense) for degrees to be awarded at spring commencement, 4:30 p.m. deadline</i>

FEBRUARY	15	Sun	Mardi Gras holiday begins
	18	Wed	Classes resume, 12:30 p.m.

MARCH	2-7	Mon-Sat	Mid-semester examination period
	10	Tue	Mid-semester grades due, 9:00 a.m.
	22	Sun	Course scheduling for fall semester, summer intersession, and wintersession begins, 5:00 p.m.
	27	Fri	Final date to request rescheduling a final examination when three examinations are scheduled in 24 hours
	27	Fri	Final date for dropping courses, 4:30 p.m. deadline
	27	Fri	Final date for resigning from the university, 4:30 p.m. deadline

APRIL	3	Fri	Spring Break begins, 7:30 a.m.
	13	Mon	Classes resume, 7:30 a.m.
	13	Mon	<i>Final date for submitting to the Graduate School General Examination Results for the doctorate to be awarded at summer commencement, 4:30 p.m. deadline (minimum period of three months is required between completion of the General Exam and completion of</i>

			<i>the Final Defense)</i>
13	Mon		<i>Final date for submitting to the Graduate School committee examination reports and approved theses and dissertations, 4:30 p.m. deadline</i>
14	Tue		<i>Final date for international applicants residing outside the U.S. to apply to the Graduate School for the summer term, 12:00 midnight deadline</i>
16	Thu		<i>Final date for submitting to the Graduate School edits to theses and dissertations, 12:00 noon deadline</i>
29	Wed		Concentrated Study Period begins—no meetings, social activities, athletic events, or other extracurricular activities requiring student participation will be scheduled; no major examinations will be given in academic courses other than labs

MAY	2	Sat	Classes end, 10:00 p.m.
	3	Sun	Concentrated Study Period ends
	4-9	Mon-Sat	Final examinations
	12	Tue	Final grades due (degree candidate), 9:00 a.m. deadline
	13	Wed	Final grades due (non-degree candidate), 9:00 a.m. deadline
	15-16	Thu and Fri	Commencement

Spring Intersession 2015

MAY	19	Tue	Classes begin, 7:30 a.m.
	19	Tue	Final date for dropping courses without receiving a grade of "W," 4:30 p.m. deadline
	20	Wed	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	23	Sat	Classes CANCELLED
	28	Thu	Final date for resigning from the university, 4:30 p.m. deadline
	28	Thu	Final date for dropping courses, 4:30 p.m. deadline

JUNE	1	Mon	Classes end, 10:00 p.m.
	2	Tue	Final examinations
	4	Thu	Final grades due, 9:00 a.m. deadline
<i>11 Classes</i>			

Summer Term 2015

Session A

MAY	14	Thu	<i>Final date for receipt of Graduate School application for admission for summer term without paying \$25 late fee, 12:00 midnight deadline</i>
	29	Fri	International Student Orientation

JUNE	2-4	Tue-Thu	Freshman and Transfer Orientation
	5	Fri	<i>Final date to apply online to the Graduate School for the summer term, 12:00 midnight deadline</i>
	8	Mon	Classes begin, 7:30 a.m.
	10	Wed	Final date for dropping courses without receiving a grade of "W," 4:30 p.m. deadline
	11	Thu	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	11	Thu	<i>Final date for "Degree Only" registration (all degree requirements, including document submission and approval by the Graduate School must be met), 4:30 p.m. deadline</i>
	12	Fri	<i>Final date for submitting (or updating) to the Graduate School "Applications for Degree" to be awarded at summer commencement, 4:30 p.m. deadline</i>
	12	Fri	<i>Final date for submitting to the Graduate School "Requests for Final Exams" (comprehensive exam, theses/dissertation defense) for degrees to be awarded at summer commencement, 4:30 p.m. deadline</i>
29	Mon	Mid-term examination period begins	

JULY	1	Wed	Mid-term examination period ends
	3	Fri	Independence Day holiday begins, 7:30 a.m.

	6	Mon	Classes resume, 7:30 a.m.
	7	Tue	Mid-term grades due, 9:00 a.m.
	13	Mon	<i>Final date for submitting to the Graduate School committee examination reports and approved theses and dissertations, 4:30 p.m. deadline</i>
	14	Tue	Final date for resigning from the university, 4:30 p.m. deadline
	14	Tue	Final date for dropping courses, 4:30 p.m. deadline
	17	Fri	<i>Final date for submitting required Graduate School edits to theses and dissertations, 12:00 noon deadline</i>
	27	Mon	Classes end, 10:00 p.m.
	28	Tue	Concentrated Study Day
	29	Wed	Final examinations begin
	30	Thu	Final examinations end

AUGUST	4	Tue	Final grades due (degree candidate), 9:00 a.m. deadline
	5	Wed	Final grades due (non-degree candidate), 9:00 a.m. deadline
	7	Fri	Commencement, 9:00 a.m.
	<i>35 Classes</i>		

Session B

(See Session A for Graduate School deadlines)

MAY	29	Fri	International Student Orientation
------------	----	-----	-----------------------------------

JUNE	2-4	Tue-Thu	Freshman and Transfer Orientation
	8	Mon	Classes begin, 7:30 a.m.
	10	Wed	Final date for dropping courses without receiving a grade of "W," 4:30 p.m. deadline
	11	Thu	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline

	30	Tue	Final date for resigning from the university, 4:30 p.m. deadline
	30	Tue	Final date for dropping courses, 4:30 p.m. deadline

	6	Mon	Classes resume, 7:30 a.m.
	10	Fri	Classes end, 10:00 p.m.
	11	Sat	Final examinations
	15	Wed	Final grades due, 9:00 a.m. deadline

AUGUST	7	Fri	Commencement, 9:00 a.m.
<i>24 Classes</i>			

Summer Intersession 2015

AUGUST	3	Mon	Classes begin, 7:30 a.m.
	3	Mon	Final date for dropping courses without receiving a grade of "W," 4:30 p.m. deadline
	4	Tue	Final date for adding courses for credit and making section changes, 4:30 p.m. deadline
	11	Tue	Final date for resigning from the university, 4:30 p.m. deadline
	11	Tue	Final date for dropping courses, 4:30 p.m. deadline
	14	Fri	Classes end, 10:00 p.m.
	15	Sat	Final examinations
	19	Wed	Final grades due, 9:00 a.m. deadline
<i>11 Classes</i>			

The University

As the flagship institution of the state, the vision of Louisiana State University is to be a leading research-extensive university, challenging undergraduate and graduate students to achieve the highest levels of intellectual and personal development. Designated as a land-, sea-, and space-grant institution, the mission of Louisiana State University is the generation, preservation, dissemination, and application of knowledge and cultivation of the arts. In implementing its mission, LSU is committed to:

- *offer a broad array of undergraduate degree programs and extensive graduate research opportunities designed to attract and educate highly qualified undergraduate and graduate students;*
- *employ faculty who are excellent teacher-scholars, nationally competitive in research and creative activities, and who contribute to a world-class knowledge base that is transferable to educational, professional, cultural, and economic enterprises; and*
- *use its extensive resources to solve economic, environmental, and social challenges.*

(Mission Statement approved December 2006; reaffirmed October 2012)

Historical Perspective

Louisiana State University and Agricultural & Mechanical College originated in grants of land made by the U.S. government beginning in 1806. In 1853, the Louisiana General Assembly established the *Louisiana State Seminary of Learning and Military Academy* near Pineville, Louisiana. The institution opened January 2, 1860, with General William Tecumseh Sherman as superintendent. Because of the Civil War, the school closed June 30, 1861, and reopened on April 1, 1862, with Col. William Linfield as acting superintendent. He was succeeded in 1863 by Professor William A. Seay. Because of the invasion of the Red River Valley by the Federal Army, the institution was closed again on April 23, 1863.

The Seminary reopened October 2, 1865, with Col. David F. Boyd as superintendent. The Seminary was destroyed by fire on October 15, 1869, and reopened on November 1, 1869, in Baton Rouge, where it has remained. In 1870, the name of the institution was changed to *Louisiana State University*.

The Louisiana State Agricultural & Mechanical College, established by an Act of the Legislature in 1874, opened in New Orleans on June 1, 1874, where it remained until it merged with Louisiana State University on January 2, 1877. The two state institutions began their first joint session on October 5, 1877, under the name of *Louisiana State University and Agricultural & Mechanical College*.

The first Baton Rouge home of the newly named institution took up residence at what was the Institute for the Deaf, Dumb, and Blind. In 1886, the institution moved to the federal garrison grounds (now the site of the State Capitol). Construction of the campus at its present site started in 1922, and the move, which began in 1925, was not completed until 1932. Formal dedication of the present campus took place on April 30, 1926.

LSU's chief academic divisions were founded as follows: **Law School**, 1906; the **College of Agriculture**, 1908; Arts & Sciences (renamed the **College of Humanities & Social Sciences** in 2010), Education, (renamed the **College of Human Sciences and Education** in 2012), 1909, **Engineering**, 1908; the **Graduate School**, 1909; **Continuing Education**, 1924; the College of Business Administration (renamed the E. J. Ourso College of Business Administration in 1996; renamed the **E. J. Ourso College of Business** in 2005), 1928; the Center for Wetland Resources (renamed the Center for Coastal Energy and Environmental Resources in 1991; renamed the **School of the Coast and Environment** in 2001), 1970; the College of Chemistry & Physics (renamed the College of Basic Sciences in 1982; renamed the **College of Science** in 2010), and the School of Music (renamed the **College of Music & Dramatic Arts** in 1998), 1931; Junior Division (incorporated into **University College** in 1999), 1933, **University College** (incorporated into General College in 1974 and reinstated in 1999), 1951; the School of Environmental Design (renamed the College of Design in 1979; renamed the **College of Art & Design** in 2001), 1965; the **School of Veterinary Medicine**, 1968; and the Graduate Division of Education (merged with the Graduate School in 1982), 1970. In 1977, the **Hebert Law Center** (formerly the Law School) was made an autonomous unit of the LSU System.

In 1978, LSU was named a sea-grant college—the 13th university in the nation to be so designated, and the highest classification in the program. In 2005, LSU was designated as a space-grant college.

LSU Today

Today LSU holds a prominent position in American higher education and is committed to meeting the challenge of pursuing intellectual development for its students, expanding the bounds of knowledge through research, and creating economic opportunities for Louisiana. LSU is in a state of dynamic transformation—changing and evolving to meet the needs of its students, faculty, and the people of Louisiana. Enriched by Louisiana's natural and cultural distinctiveness, the community of learning at Louisiana's national flagship university prepares students to meet the environmental, social, economic, scientific, creative, and educational challenges that confront us locally and globally in the 21st century. LSU Flagship 2020: *Transforming Lives* underscores the university's commitment to excellence at every level and focuses on the goals of learning, discovery, diversity, and engagement.

LSU is designated as a land-, sea-, and space-grant institution. It also holds the Carnegie Foundation's designation as a Research University, reflective of LSU's very high research activity.

LSU's instructional programs include 193 undergraduate and graduate/professional degrees.

The university attracts about 13 percent of the state's total enrollment in higher education, and LSU students come from many ethnic and religious backgrounds. The student body consists of nearly 30,000 students from 50 states and more than 100 foreign countries. Although the average age of undergraduates is 21, many older students also pursue degrees at LSU. The student body is 51 percent women and 49 percent men.

Since its first commencement in 1869, LSU has awarded more than 245,000 degrees. The university produces about 25 percent of Louisiana's baccalaureate graduates, approximately 24 percent of the master's graduates, and about 55 percent of the doctoral graduates. In 2012-13, LSU awarded 6,093 degrees.

The university is a member of the American Council on Education, an organization of accredited post-secondary educational institutions founded in 1918; the Association of Public and Land-Grant Colleges, founded in 1962 to represent the major public universities and land-grant institutions; and the American Association of State Colleges and Universities, a select group of leading public institutions of higher education.

The LSU System is composed of nine institutions on eight campuses in five cities. The System was established by an act of the Louisiana Legislature on February 6, 1965 and includes LSU A&M; LSU Agricultural Center; the LSU Paul M. Hebert Law Center; LSU Health Sciences Center New Orleans; LSU Health Sciences Center Shreveport; LSU Eunice; LSU Alexandria; LSU Shreveport; Pennington Biomedical Research Center; and LSU Health Care Services Division.

The governing body of the LSU System is the Board of Supervisors, composed of 15 members appointed by the governor to staggered, six-year terms and one student member elected to a one-year term by fellow LSU System student government leaders. Chief administrative officers of the LSU System are the *President, Vice President for Academic Affairs, Vice President for Agriculture, Vice President for Communications and External Affairs, Vice President for Health Affairs and Medical Education, Assistant Vice President and University Architect, Assistant Vice President for Budget, Finance, and Comptroller.*

The LSU Agricultural Center, including the Louisiana Agricultural Experiment Station and the Louisiana Cooperative Extension Service and International Programs, has more than 200 faculty members who hold joint appointments with LSU. The Experiment Station has research programs in Baton Rouge and at branch stations throughout Louisiana. The Extension Service disseminates results of research throughout the state through specialists, county agents, and home economists in every parish.

The Paul M. Hebert Law Center, originally established in 1906, became an autonomous unit of the LSU System in 1977. In 1979, it was renamed in honor of Paul M. Hebert, who served as dean from 1937 to 1977.

All references in this catalog to "Louisiana State University," "LSU," or "the university," are to be understood as meaning the

institution in Baton Rouge (whose full name is Louisiana State University and Agricultural & Mechanical College). Any reference to the LSU System or to any other institution(s) within the system will be clearly indicated.

Mission

As the flagship institution of the state, the vision of Louisiana State University is to be a leading research-extensive university, challenging undergraduate and graduate students to achieve the highest levels of intellectual and personal development. Designated as a land-, sea-, and space-grant institution, the mission of Louisiana State University is the generation, preservation, dissemination, and application of knowledge and cultivation of the arts.

In implementing its mission, LSU is committed to:

- offer a broad array of undergraduate degree programs and extensive graduate research opportunities designed to attract and educate highly qualified undergraduate and graduate students;
- employ faculty who are excellent teacher-scholars, nationally competitive in research and creative activities, and who contribute to a world-class knowledge base that is transferable to educational, professional, cultural, and economic enterprises; and
- use its extensive resources to solve economic, environmental, and social challenges.

(Mission Statement approved December 2006; reaffirmed October 2012)

Teaching

The university has nearly 1,400 full-time and part-time faculty members. *The Boyd Professorship*—named in honor of two early university presidents, David and Thomas Boyd—is the highest professorial rank awarded. The *William A. Read Professorship of English Literature* and the *Nicholson Professorship of Mathematics* are comparable to the Boyd Professorship.

Other awards for outstanding achievement are *Endowed Chairs*, *Endowed Professorships*, *LSU Foundation Professorships*, *Alumni Professorships*, *Distinguished Faculty Fellowships*, and the annual *Distinguished Research Master Award*. Recognized authorities in various fields are appointed as consulting professors or visiting lecturers.

The university is committed to the principle that excellence in teaching depends upon qualified and conscientious instructors. LSU boasts a nationally and internationally recruited faculty—approximately 89 percent of whom have terminal degrees. Many faculty members are international authorities in their fields and bring esteem and recognition to the university. The recipients of such coveted awards as the Guggenheim and Fulbright fellowships, LSU professors represent an enviable array of knowledge.

Research

LSU is one of a small number of universities nationwide designated as a land-, sea-, and space-grant institution. The university's success in the leveraging of state funds to obtain federal dollars places it among the best in the nation and represents a good investment of taxpayer's money.

The *University Libraries* comprise the largest library in the state. The university has been issued 306 cumulative patents and received more than \$17,000,000 in licensing revenues.

In addition to more than 40 institutes, centers for advanced study, and other specialized units headquartered at LSU, various state and federal governmental units maintain offices and laboratories on campus. At any given time, more than 1,200 sponsored research projects are in progress. Additionally, faculty and staff members and graduate students pursue numerous research projects that are not sponsored by outside agencies. External research funding at LSU reached \$142 million in 2012-13. LSU's awarded grants and contracts from federal, state, and private sources provide a significant boost to the Louisiana economy. Other

research projects and instructional programs are undertaken through the LSU Agricultural Center, the Louisiana Agricultural Experiment Station, and Pennington Biomedical Center.

Public Service

Government, education, business, and industry in Louisiana benefit daily from the outreach services provided by LSU. New technology is transferred from university laboratories to the community, providing a vital boost to the economy and helping to find answers to some of Louisiana's most pressing environmental issues.

Several LSU divisions provide public services to the community and state.

- *LSU Active Schools Initiative*, coordinated by the Physical and Emotional Literacy Lab in the College of Human Sciences and Education, is a professional development program to create school champions of physical activity. This initiative and accompanying research is currently funded by the Robert Wood Johnson Foundation Active Learning Research (ALR) program and the National Association of Sport and Physical Education (NASPE). The professional development program provides champions with the knowledge, skills, and confidence to implement comprehensive school physical activity programs.
- The *Baton Rouge Area Violence Elimination (BRAVE) Project* is a multi-disciplinary initiative led by the College of Human Sciences and Education's Office of Social Service Research and Development (OSSRD). BRAVE is a partnership in conjunction with the East Baton Rouge Mayor's Office, District Attorney's Office, law enforcement agencies, and other community partners in an effort to reduce crime in Baton Rouge's 70805 zip code area. OSSRD leads the BRAVE research team by conducting trainings, interviews, and related research. In addition, LSU faculty from sociology, geography and anthropology, human resource education and workforce development, and mass communication analyze crime data and assist in community awareness initiatives.
- The *LSU Cartographic Information Center (CIC)*, ranked among the largest academic map libraries in the U.S., holds a vast collection of maps, aerial photographs, globes, journals, monographs, slides, and atlases. The center serves patrons from the LSU community, businesses, state and federal agencies, and the general public.
- The *J. Bennett Johnston Sr. Center for Advanced Microstructures & Devices (CAMD)* is a high-tech research center that serves the public by providing an infrastructure for economic diversity within the state in the area of microfabrication; testing services for local area gas, oil, and chemical industries; a focus for material science research and development at LSU and within the state; and scientific outreach to students in elementary school through graduate school.
- The *LSU Center for Internal Auditing (LSUCIA)* is an internationally recognized program that provides students with nationwide internships and career opportunities. The LSUCIA also provides executive training for professionals.
- The *LSU Coastal Roots Program* is a coastal habitat restoration project in south Louisiana led by the College of Human Sciences and Education in partnership with the College of Agriculture and the Louisiana Sea Grant College Program. This program engages second through twelfth graders in the growing of native plant seedlings and grass plugs that they then plant in coastal habitat restoration sites across South Louisiana.
- The *LSU Coastal Sustainability Studio (CSS)* provides a laboratory to develop new designs that reduce risks to social, economic, and natural resources, with a focus on adaptation through more sustainable regional and land-use planning. The CSS is a collaborative effort between the College of Art & Design, the College of Engineering, and the School of the Coast & Environment.
- *Continuing Education (CE)* provides valuable learning opportunities by extending LSU's resources beyond the campus through credit and non-credit courses, certificate programs, and conferences. CE programs serve professionals, business owners, distance learners, and students from pre-kindergarten through retirement age.
- The *Curriculum Theory Project* is housed in the School of Education. The project supports trans-disciplinary research at the local, state, regional, national, and international levels concerning curricular issues within a broad social and cultural framework.
- The *Disaster Science and Management (DSM) Program* in the College of Humanities & Social Sciences partners with both governmental and nonprofit organizations in Louisiana to provide disaster planning services free-of-charge and internships to students and citizens interested in getting hands-on experience with disaster science and management.

- The *Division of Economic Development (DED)* is affiliated with the Department of Economics in the LSU E.J. Ourso College of Business and annually produces the *Louisiana Economic Outlook*, or *LEO*, which analyzes the state's economy and that of major metropolitan areas to forecast the state's employment for the next two years.
- *Student Life & Enrollment* provides developmental opportunities in citizenship and social responsibility through service, volunteerism, and learning programs.
- The *Earth Scan Laboratory* is a satellite receiving station and image processing facility for environmental data from six unique earth observing sensor systems. The laboratory specializes in real-time access to satellite imagery and measurements of the atmosphere, oceans, and coastal areas within the Gulf of Mexico, Caribbean Sea, W. Atlantic, and E. Tropical Pacific Ocean. Satellite measurements are obtained directly from satellite transmissions many times each day. The mission of the laboratory is to support education, research, and state emergency response. During hurricane season, the laboratory supplies hurricane images every few minutes to the Governor's Office of Homeland Security and Emergency Response. ESL's comprehensive web page, www.esl.lsu.edu, provides daily imagery and animations of oceanic and atmospheric circulations both in real-time and as historic archives.
- *LSU EnvironMentors* is a national college access initiative supported by the National Council for Science and the Environment. The LSU Chapter has partnered with the College of Human Sciences and Education's LSYOU program and Louisiana Sea Grant. The Chapter's mission is to prepare high school students from underrepresented backgrounds for college degree programs in environmental and related science fields by matching them with mentors from the School of the Coast & Environment to participate in hands-on science education.
- *Executive Education*, part of the LSU Stephenson Entrepreneurship Institute, has prepared individuals and organizations to meet the challenges of a rapidly changing workplace for more than 50 years. Highly relevant courses are designed to provide an immediate impact and help business owners make best course of action decisions.
- The *LSU FACES Laboratory* is a public service, research, and educational facility designated to assist law enforcement agencies in the positive identification of human remains, profile analysis, and trauma analysis. Since 1981, this laboratory unit of the Department of Geography & Anthropology, the only one of its kind in the state and region, has offered complete methods of identification through forensic anthropological autopsy and computer-generated techniques. As of 2006, the facility has also housed the Louisiana Repository for Unidentified and Missing Persons Information Program, which is creating a database for all unidentified and missing people in Louisiana.
- The *Fitness Testing of Louisiana School Children Program* in the College of Human Sciences and Education's School of Kinesiology is part of a five-university partnership facilitating fitness testing in Louisiana schools. This program provides professional development to teachers through support and guidance on best-practice interventions to increase physical activity and improve fitness and health of students across Louisiana.
- The primary goal of the *French Education Project* is to improve the teaching of French and francophone cultures with special emphasis on Louisiana's francophone heritage. Among its offerings to K-12 teachers of French and science is the Virtual Museum, a collaborative effort between the College of Human Sciences and Education and the LSU Museum of Natural Science, which provides statewide access to LSU's immense collection of natural science specimens and rich academic expertise. The *French Education Project* carries its mission through three main goals: teacher education, material development, and research. Its resource center offers books (children's literature, foreign language methods and theory, linguistics, grammar, history, civilization, and culture), CDs and DVDs, and pedagogical material and activities created by teachers.
- The *Highway Safety Research Group (HSRG)*, a branch of the Department of Information Systems & Decision Sciences in the LSU E.J. Ourso College of Business, collects, maintains, analyzes, and distributes crash data to support public policy decisions in Louisiana. Programmers from HSRG developed LACRASH, a software program that has revolutionized the way traffic accidents are reported.
- The College of Humanities & Social Sciences Secondary Education concentrations (the *Geaux Teach—Humanities Program*) in history, English, Spanish, and French have been designed to provide students with the skills and experiences necessary to become successful educators in grades 6-12. This program, a collaborative with the College of Human Sciences and Education, pairs education and content courses with carefully selected field experiences in diverse settings under the professional mentorship of secondary teachers.
- The *HopKins Black Box Theatre* in the Department of Communication Studies functions as the department's performance studies area classroom and research laboratory, in addition to offering a full season of public performances each year.

- The *Human Resource-Industrial/Organizational (HRIO) Consultancy* is an applied research office housed in the College of Human Sciences and Education's School of Human Resource Education and Workforce Development (SHREWD). The HRIO Consultancy works with public and private sector organizations in Louisiana and the Southern Region to improve organizational performance and employee well-being.
- The *LSU Hurricane Center* is a multidisciplinary center addressing hurricanes and other hazards and their impacts on the natural, built, and human environments. Center faculty work closely with resource managers and emergency preparedness decision-makers, transferring the latest information and technology in areas such as storm prediction, preparedness, response, recovery, and mitigation.
- The *Interdepartmental Program in Natural Science* provides postbaccalaureate students with advanced content knowledge and the skills and experiences necessary to become successful educators in a variety of science and mathematics fields. This program pairs education and content courses with carefully selected field experiences.
- *LSU Public Administration Institute (PAI)* is housed in the LSU E.J. Ourso College of Business and provides outstanding educational opportunities for those already in the public, private, or non-profit sectors who wish to advance their careers.
- Providing assistance to inventors, the *LSU Libraries' Patent and Trademark Resource Center* maintains the entire back file of U.S. utility and design patents on DVD, paper, and microfilm. Librarians provide assistance in searching USPTO patent and trademark databases to the general public, as well as the LSU community.
- The *LSU Libraries Special Collections* microfilms for posterity the newspapers of record in Louisiana's 64 parishes that are no commercially filmed, preserving an important historical record of happenings in those parishes. For example, microfilm produced by the Libraries was digitized and used following Hurricane Katrina by St. Bernard Parish government to restore its records, which were destroyed in the storm.
- The *LSU Stephenson Entrepreneurship Institute* utilizes various programs, seminars, and other means to address the challenges of entrepreneurship and to positively impact students, the regional economy, Louisiana, and the nation.
- The College of Human Sciences and Education's *LASPACE/NASA Michoud Education Fellow Program* provides K-12 educators an opportunity to explore the way science content and inquiry skills, mathematics, and communication skills are used by scientists, engineers, and skilled workers at the NASA Michoud Assembly Facility in New Orleans.
- *Les Voyageurs* is an organization of students serving as representatives for the College of Agriculture and the university. Its focus is recruitment and retention of students and advocacy of agriculture. Students participate in both on and off campus recruitment events and conventions, promote all fields of study, and play an active role in the Agriculture Residential College, serving as mentors for first-year students.
- The *Louisiana Business & Technology Center (LBTC)* operates an award-winning business incubator at LSU's Innovation Park that is home to more than 20 start-up businesses and the Student Incubator. The LBTC operates the Louisiana Technology Transfer Office for the state of Louisiana that, through its offices at LSU and NASA/SSC, provides technical assistance to Louisiana companies through NASA and other federal laboratories. Graduate and undergraduate students work on projects through the LBTC.
- The *Office of Community Design & Development* in the College of Art & Design, provides architectural, landscape, and interior design services, as well as community planning, technical assistance, and educational outreach to local communities, housing authorities, and community development corporations.
- The *Louisiana Cooperative Extension Service*, a division of the LSU Agricultural Center, is a statewide program that maintains agricultural agents and specialists in each of Louisiana's 64 parishes.
- The *Louisiana Council of the AdvanceED/Southern Association of Colleges and Schools (SACS) for P-12 schools* partners closely with the College of Human Sciences and Education, where it is housed. AdvanceED/SACS is committed to assisting Louisiana public and nonpublic elementary, middle, and secondary schools and school systems in efforts to achieve accreditation and ensure quality instruction for students.
- The *Louisiana Geological Survey* performs geological investigations that benefit the state of Louisiana by encouraging the economic development of the natural (energy, mineral, water, and environmental) resources of the state, protecting the state and its citizens from natural, geological, and environmental hazards, and ensuring the transfer of geological information.
- The *Louisiana Small Business Development Center at LSU (LSDBC at LSU)* is housed in the LSU Stephenson Entrepreneurship Institute, part of the E.J. Ourso College of Business, and facilitates the formation and growth of small businesses through individual consulting services, entrepreneurial training programs, and business information resources to develop and diversify the Louisiana economy.

- The *Louisiana State Personnel Development Grant* is a long-standing College of Human Sciences and Education program for K-12 education designed to improve outcomes for students with disabilities through awarding statewide personnel development grants to school districts.
- *The LSU Writing Project*, was established in 1985 and is located in the College of Human Sciences and Education's School of Education. It is an intensive professional development program designed to improve the teaching of writing and increase the use of writing for teachers at all grade levels and in all subject areas with an ultimate goal of helping students become accomplished writers and learners. Through a dynamic and generative approach of "teachers teaching teachers," the LSU Writing Project provides outreach to a ten parish network in the southern part of Louisiana. This is one of nearly 200 sites in the United States that comprise the National Writing Project so participants are able to join a large network of educators who actively promote writing in schools and districts.
- *Louisiana State Youth Opportunities Unlimited (LSYOU)* is a College of Human Sciences and Education program that assists Louisiana adolescents at high risk of dropping out of school. The program provides a long-term, case-managed relationship and data driven intervention into the lives of high-need students to enable them to successfully overcome obstacles, graduate from high school, and enter postsecondary education.
- The *Louisiana Veterinary Medical Diagnostic Laboratory* provides a comprehensive animal disease diagnostic service to the agricultural and general communities.
- *Parkinson's Research Program* acknowledges the major benefits of physical activity for individuals with Parkinson's disease and emphasizes the necessity of staying active for individuals from this population. The School of Kinesiology faculty in the College of Human Sciences and Education offer safe exercise protocols that can be performed by individuals with Parkinson's at various stages of the disease and study ways to achieve more effective training techniques, which can help this population maintain or increase their level of function.
- *Playground KIDZ* is a partnership between the LSU College of Human Sciences and Education's School of Kinesiology and Baton Rouge Recreation and Park Commission. LSU students plan and implement free after-school programs in three BREC parks located in low income neighborhoods. Children participate in homework help and structured physical activity.
- *Psychological Services Center* offers assessment and treatment to adults and children for a variety of psychological and behavioral difficulties.
- The *Public Policy Research Laboratory* combines the talents and disciplinary perspectives of mass communication scholars and political scientists. The lab offers an innovative approach to original public opinion research on behalf of policy makers, state and local government agencies, nonprofit organizations, media outlets, and academicians. It is a partnership of the Manship School of Mass Communication's Reilly Center for Media & Public Affairs and the College of Humanities & Social Sciences.
- The *Real Estate Research Institute* within the Department of Finance in the LSU E.J. Ourso College of Business was established to encourage, support, and conduct research in real estate. Established in 1985, it is partially funded by the Louisiana Real Estate Commission.
- The *Reilly Center for Media & Public Affairs* provides symposia, forums and research on the relationships between the media and social, economic and political issues.
- The *Relation Station Matchbox Interaction Lab* in the Department of Communication Studies is used to videotape individuals and small groups of up to five performing experiential activities such as mock job interviews.
- The *Safe Routes to School* program is funded by the Louisiana Department of Transportation and Development. The School of Kinesiology faculty in the College of Human Sciences and Education encourages cycling and walking safety along with facilitating improvements to bicycle paths in the Old South Baton Rouge community for students attending Polk Elementary and Buchanan Elementary public schools. In addition, the University Lab School is an active participant in this program.
- The *LSU School of Social Work* provides approximately 96,000 hours of service to the State of Louisiana annually through student placements in over 300 agencies and organizations. In addition, the school is involved in ongoing projects that target areas such as addiction treatment, gerontology, poverty, school social work, and other social justice issues.
- The *School of Veterinary Medicine, Veterinary Teaching Hospital & Clinics* offers tertiary, secondary, and primary care services for animals of the pet-owning public and animal industries of Louisiana and surrounding states. Specialty services in large and small animal internal medicine and surgery, cardiology, dermatology, avian and exotic animal medicine, radiation and medical oncology, ophthalmology, radiology, pathology, and theriogenology are available.

- The *Office of Sea Grant Development* communicates the results of marine and coastal research through practical assistance, educational programs, and various media products. Public service efforts are conducted through the Sea Grant Legal Program, Marine Extension Services, Advisory Services in Marine Recreation and Tourism, and the Communications Office.
- The College of Science *Secondary Education concentrations (Geaux Teach Program)* in biological sciences, chemistry, mathematics, and physics have been designed to provide students with the skills and experiences necessary to become successful educators. This program, a collaborative with the College of Human Sciences and Education, pairs education and content courses with carefully selected field experiences in diverse settings under the professional mentorship of secondary teachers.
- The *Office of Social Service Research & Development (OSSRD)* is located within the College of Human Sciences and Education. OSSRD fosters healthy social systems by facilitating the development, implementation and evaluation of social programs, conducting intervention research, and providing consultation and expertise to the university, community, policy makers, and partners.
- *Speech-Language Hearing Clinic* offers diagnostic evaluation and management services for those with communication disabilities.
- The *LSU Stephenson Disaster Management Institute* was established to help save the lives of people and animals by continuously improving disaster response management through research and education.
- The College of Human Sciences and Education's *School of Library & Information Sciences* holds an annual Storytelling Festival in July. Graduate students present traditional folktales from many different cultures and ethnic groups in the U.S. and from around the world. This event is free and open to the public.
- The *Tai Chi Exercise Program* in the College of Human Sciences and Education's School of Kinesiology is designed to assist a portion of older adults with and without known neurological deficits that have difficulty performing activities of daily living. These adults cannot always participate in regular exercise training regimes or feel uncomfortable in those offered in fitness centers. This program offers a safe way for these individuals to exercise, which also may help limit the functional degeneration that occurs with normal aging and/or neurological disorders as with Parkinson's disease and Peripheral Neuropathy.
- The *Truancy Assessment and Service Center (TASC) Program* is a state-funded initiative that is designed to combat truancy programs among high risk K-5 public school children. TASC works with children and their families to identify and address underlying causes of truancy and provide support and interventions to deter problems from becoming more entrenched. TASC is administered, managed, and evaluated by the School of Social Work's Office of Social Service Research & Development. In partnership with the LA Commission on Law Enforcement, school systems, district attorneys, sheriffs, and other community stakeholders. There are currently 12 TASC sites that serve 19 parishes around the state.

The university also offers numerous cultural and entertainment events, including lectures, musical performances, and plays, to the community each year. In the College of Music & Dramatic Arts, the *Department of Theatre* and *Swine Palace* present 15-20 theatrical productions, each of which runs over extended periods of time. The *School of Music* presents more than 300 recitals and concerts each year. These include fully staged operas; choral, band, jazz, and orchestral concerts; and faculty and student recitals. The *LSU Performing Arts Academy*, run by the College of Music & Dramatic Arts, offers private and group lessons in the areas of music, theatre, and dance for all ages. In addition, LSU's museums—including the *Museum of Art*, the *Museum of Natural Science*, and the unique *Rural Life Museum and Windrush Gardens*—are open to all citizens.

The Campus

The university is located on more than 2,000 acres in the southern part of the city, bordered on the west by the Mississippi River. The university's more than 250 principal buildings are grouped on a 650-acre plateau that constitutes the main part of the campus.

Original campus architecture was based on the Renaissance domestic style of northern Italy (tan stucco walls, red tile roofs), with buildings that house most of the classrooms and administrative offices grouped around a double quadrangle and connected by colonnaded passageways. Architects of more recent campus structures have succeeded in blending contemporary design with the older style of architecture.

The city of Baton Rouge—capital of the state of Louisiana, an inland port, and a major petrochemical center—has a metropolitan area population of around 766,000. According to history, the city's name is derived from a tall cypress tree that once stood at the

present site of Louisiana's Old State Capitol marking the boundary between the hunting grounds of the Houma and the Bayou Goula Indians. The early French explorers called the tree *le baton rouge* (the red stick).

Geographically, Baton Rouge is the center of South Louisiana's cultural and recreational attractions with New Orleans about 80 miles to the southeast. Less than an hour's drive north lie the gently rolling hills of the antebellum country of the Feliciana parishes. The fabled French-Louisiana country of bayous, marshes, and lakes—about an hour's drive from the campus—offers opportunities for fishing, hunting, and other recreation.

Organizational Structure

LSU System and LSU are undergoing organizational change. The LSU Board of Supervisors combined the position of LSU System President and LSU Chancellor into one position titled *president*. The LSU President is the chief executive officer of the university. Due to the structural changes, the titles of principal university officers may change; and the leaders of the following administrative divisions of the university report to the president: Office of Academic Affairs, Office of Research & Economic Development, Office of Finance & Administrative Services, Office of Student Life & Enrollment, Office of Strategic Initiatives, Athletics Department, Office of Communications & University Relations, Office of Institutional Advancement, and Office of External Affairs.

Office of the President

The *president* is the chief executive officer of the university and is empowered by the Board of Supervisors to promote and supervise the functions of the university. The president is delegated sufficient authority to execute the functions necessary to operate the university.

Office of Academic Affairs

The *executive vice chancellor and provost* serves as both the chief academic officer and as the chief operating officer of the university. The executive vice chancellor and provost acts as chief administrative officer in the absence of the president and represents the president in both internal and external matters.

As chief academic officer, the executive vice chancellor and provost is responsible for the academic programs of the university. The administrative center for exercise of this responsibility is the Office of Academic Affairs.

The Council of Academic Deans, which serves in an advisory capacity to the executive vice chancellor and provost, meets monthly to review, deliberate, and make recommendations concerning academic matters. To provide support and faculty and staff input, several other councils and committees that engage in university-wide planning and budgetary matters report to the executive vice chancellor and provost.

The executive vice chancellor and provost works in tandem with the vice chancellor for finance and administrative services and chief financial officer to prepare and monitor the operating budget for the university. The executive vice chancellor and provost also leads, with and for the president, programmatic, budgetary, and facility planning for the university; exercises responsibility for space allocation; oversees faculty development programs and human resources issues; and superintends the university's efforts in assessment, with responsibility for developing policies and programs to ensure that the university is fully accountable in all aspects of its operations.

Office of Communications & University Relations

The Office of Communications & University Relations is a full-service communications organization that proactively fashions, manages, and delivers consistent messages promoting LSU and its National Flagship Agenda to key internal and external audiences; protects and manages the internationally known LSU brand; promotes and supports fund-raising efforts for the university; and helps LSU achieve international prominence for its research, teaching, and service. The office provides a full array of resources to all units of the university and helps focus LSU entities on a consistent course of action that promotes

university goals among students, faculty, staff, parents, lawmakers, donors, the media, and business leaders across Louisiana and the nation.

Communications & University Relations supplies communications, design services, marketing, media relations, radio/television/photography services, and Web and social media services to LSU and its component colleges, departments, and units.

Office of External Affairs

The Office of External Affairs oversees the unified voice of the university to all community and government leaders at the local, state, and national levels.

Finance & Administrative Services

The *vice chancellor for finance and administrative services and chief financial officer* is responsible for a variety of business functions and institutional support services, including accounting, purchasing, cash management and disbursement, budgeting, facilities, risk management, human resources, personnel, police, safety, parking, traffic, transportation, auxiliary services, and trademark licensing.

Office of Institutional Advancement

The Office of Institutional Advancement is responsible for building long-term relationships between LSU and its various constituencies in order to stimulate greater understanding and financial support.

The primary function of the office is to assist in the cultivation of major donors to the university as well as coordination of the fundraising efforts of the three foundations that serve LSU—the LSU Foundation, Tiger Athletic Foundation, and the LSU Alumni Association. The office also manages university policies in regard to fundraising and acts as the liaison to all fundraising entities for the president and provost.

Office of Research & Economic Development

The *vice chancellor for research and economic development* is responsible for the overall research and economic development efforts of the university. The Office of Research & Economic Development (ORED) focuses on maximizing the university's impact on the intellectual, economic and social development of Louisiana, the nation, and the world.

ORED's mission includes creating a rich environment that promotes advanced research, creative scholarship, and economic development. The office coordinates the research efforts of more than 1,200 faculty and approximately 1,200 sponsored research projects. The faculty-driven Council on Research assists ORED with its mission.

The economic development focus of the office includes developing corporate partnerships, encouraging entrepreneurial activities, and driving Louisiana's economy through spearheading intellectual property development and commercialization efforts; developing of corporate partnerships; and encouraging entrepreneurial activities.

ORED also coordinates the non-formula component of the budget and acts as liaison to the legislature in this area; in addition, it coordinates the LSU congressional/federal agenda, keeping our congressional delegation abreast of research issues at the university.

Office of Strategic Initiatives

The Office of Strategic Initiatives (OSI) focuses on particular components of the university's overall strategic plan with an intense effort to pursue strategic initiatives that will produce:

- systemic improvements in the mentoring of faculty, students, and staff, with an emphasis on achieving excellence at all levels;
- coordinated efforts to enhance the receipt of external student awards (e.g., Rhodes, Marshall, and Goldwater Fellows);
- coordinated efforts to enhance the receipt of external faculty awards (e.g., Fulbright and Guggenheim Fellows);
- coordinated efforts to establish LSU as a leading provider of graduate degrees to underrepresented groups in a variety of disciplines;
- coordinated efforts to enhance and improve the number of students from underrepresented groups who pursue and complete undergraduate degrees at LSU in the science, mathematics, engineering, and technology areas;
- coordinated efforts with the Office of Academic Affairs to recruit outstanding faculty to the university, with special emphasis on faculty from underrepresented groups;
- direct partnership initiatives (e.g., LAMP and joint faculty appointments) with other Louisiana institutions;
- coordinated efforts to generate external awards, including funds and training grants, to support all of these efforts.

Achievement of the goals of this unit requires a close alliance with other units throughout the university. Such units include, but are not limited to, the Office of Academic Affairs; the Honors College; the Graduate School; the Colleges of Human Sciences and Education, Engineering, Humanities & Social Sciences, and Science; and the Center for Scientific, Technological, Engineering, & Mathematical Literacy. Collaborating units are represented on OSI's Advisory Board, which provides advice to the Vice Chancellor for Strategic Initiatives on both policy and programmatic issues.

Office of the Vice Chancellor and Director of Athletics

The *vice chancellor and director of athletics* manages a broad spectrum of intercollegiate sports programs for men and women. LSU is a charter member (1932) of the Southeastern Conference. LSU meets teams from other major universities in NCAA Division 1A competition in football, basketball (Men's & Women's), baseball, indoor and outdoor track and field (M&W), cross country (M&W), golf (M&W), tennis (M&W), swimming (M&W), women's gymnastics, women's volleyball, women's soccer, and women's softball.

LSU athletic teams have won 46 national championships and 123 Southeastern Conference championships since the beginning of the intercollegiate athletics program in 1893.

Student Life & Enrollment

The *vice chancellor for student life & enrollment* focuses on recruiting, admitting, retaining, and engaging students for success at LSU and into alumni life. Through programs, services and quality-of-life facilities, the division's professionals enhance learning by fostering critical thinking and ethical responsibility to create a university experience that transforms lives.

Departments in the division include Campus Life, Career Services, Center for Academic Success, Office of the Dean of Students, Disability Services, Enrollment Management, Financial Aid & Scholarships, First Year Experience, Greek Life, Orientation, Parent & Family Programs, Residential Life, Student Advocacy & Accountability, Undergraduate Admissions, and University Recreation. Visit us at www.lsu.edu/studentlife.

The *Office of Enrollment Management* strives to provide excellent customer service in its efforts to actively recruit prospective students who have demonstrated academic and extracurricular excellence from a wide range of geographic and demographic backgrounds.

This office is considered the "front door to LSU." The office staff welcomes students to the university through campus visits and tours, informative promotional mailings, various recruitment events, and counselor outreach programs. Campus tours are conducted every week day at 10:00 a.m. and 1:00 p.m., except university holidays. Office hours for undergraduate admissions and student aid are 8:00 a.m. to 4:30 p.m., Monday through Friday. Admissions is responsible for processing freshman, transfer, re-entry, international, early admissions/dual enrollment/concurrent, athletic, and visiting student applications. The office is committed to making fair and timely decisions by evaluating prospective student's likelihood of success at LSU based on established educational requirements and admission policies.

Prospective students are encouraged to go to www.lsu.edu for the most up-to-date information regarding admissions to LSU. There, they will be able to apply online, pay online, check their application status, communicate through e-mail, and learn about requirements as well as important deadlines.

Financial Aid administers federally funded financial aid programs and university, state, and privately funded scholarships to assist students in meeting their educational costs. The federal programs include Pell Grants, Supplemental Educational Opportunity Grants (SEOG), Work Study, Perkins Loans, Stafford Subsidized and Unsubsidized Loans, Parent Loan for Undergraduate Student (PLUS), Graduate PLUS Loan for graduate and professional students. All programs are subject to regulations authorized by the U.S. Department of Education, as well as university policies, which are consistent with these federal regulations.

Scholarships are in the form of cash awards, full tuition and nonresident fee exemption, room and board scholarships, and employment opportunities to students who meet certain academic qualifications. Detailed information is available on the Web.

Office of the University Registrar

OFFICE 112 Thomas Boyd Hall
TELEPHONE 225-578-1686
FAX 225-578-5991
WEBSITE www.lsu.edu/registrar

The *Office of the University Registrar* is responsible for maintaining timely and accurate records of academic progress and accomplishments of LSU's students while ensuring the privacy, integrity, and security of those records.

The office strives to provide excellent customer service to students, faculty members, administrators, alumni, and the public in the areas of record keeping, course scheduling, course registration, information management, and data analysis. The Office of the University Registrar uses its central university position to add value to the information that it manages by participating in activities to recruit, retain, and graduate the most academically talented and diverse students possible.

LSU Continuing Education serves thousands of participants each year through credit and non-credit outreach programs that support, promote, and enhance LSU's Flagship Agenda. Founded in 1924 to serve nontraditional students, Continuing Education provides flexible programs, using face-to-face and distance delivery methods. To address the diverse needs of lifelong learners, four distinct types of programs are offered: College Credit, Professional Development, Pre-College, and Personal Enrichment. Last year, through Continuing Education programs, LSU reached students of all ages in every Louisiana parish, every state in the nation, and 34 countries.

For more information about LSU Continuing Education programs, please see "Continuing Education."

Equal Employment Opportunity

LSU provides equal opportunity for all qualified persons in admission to, participation in, or employment in the programs and activities which the university operates without regard to race, creed, color, marital status, sexual orientation, gender identity, gender expression, religion, sex, national origin, age, mental or physical disability, or veteran's status, as well as to implement a procedure to address complaints for those who believe they have been subjected to discrimination and/or harassment in violation of this policy.

Anyone having questions or complaints regarding equal opportunity at LSU should contact the Office of Human Resource Management, 110 Thomas Boyd Hall, Baton Rouge, Louisiana 70803; telephone 225-578-8200.

Finances

LSU receives most of its funds from legislative appropriations. To view the current operating budget, please visit the Office of Budget & Planning website at <http://www.bgtplan.lsu.edu/budget.htm>.

Academic Programs

The State of Louisiana Board of Regents, in its *Master Plan for Higher Education*, designated LSU as Louisiana's single "comprehensive university."

LSU is also the "flagship university" of the state of Louisiana.

LSU students have the opportunity to experience a rich diversity of courses, curricula, students, faculty, and settings that stimulate and challenge individual growth. As the state's comprehensive university, LSU offers numerous choices for intellectual development, career options, and cultural exposure. The undergraduate classroom is enhanced through LSU's research status, ensuring that students are aware of the most recent discoveries and are taught innovative modes of inquiry.

Bachelor's degrees are offered in 69 major fields, certificates of education specialist are offered in 2 major fields, master's degrees are offered in 74 major fields, and doctoral degrees are offered in 50 major fields. There is also a graduate certificate in materials science and engineering.

The university has no more important mission than to provide its students with outstanding learning opportunities. LSU offers undergraduate programs of study that are both rigorous and exciting. These programs attract bright, energetic students who wish to prepare for the career challenges of the 21st century.

Undergraduate Degrees

Academic programs and services at LSU provide students with the opportunity to obtain a strong general education, explore a variety of fields and majors, and have direct contact with faculty in their major field. Freshmen are admitted to the University College where they either declare a major or examine educational and career alternatives while completing the general education requirements. To complete degree requirements, students must meet the admission requirements of a senior college.

Students select from degree programs offered by ten senior colleges and schools.

College of Agriculture

Bachelor of Science

College of Art & Design

Bachelor of Architecture

Bachelor of Fine Arts

Bachelor of Interior Design

Bachelor of Landscape Architecture

E. J. Ourso College of Business

Bachelor of Science

School of the Coast & Environment

Bachelor of Science in Coastal Environmental Science

College of Human Sciences and Education

Bachelor of Science

College of Engineering

Graduate Degrees

Graduate degrees that the university is currently authorized by the Board of Regents to offer are listed below. Please see “The Graduate School” for additional information.

Master of Applied Statistics
Master of Architecture
Master of Arts in Teaching
Master of Arts
Master of Arts in Liberal Arts
Master of Business Administration
Master of Education
Master of Fine Arts
Master of Landscape Architecture
Master of Library & Information Science
Master of Mass Communication
Master of Music
Master of Natural Sciences
Master of Public Administration
Master of Science
Master of Science in Biological & Agricultural Engineering
Master of Science in Chemical Engineering
Master of Science in Civil Engineering

Master of Science in Electrical Engineering
Master of Science in Engineering Science
Master of Science in Industrial Engineering
Master of Science in Mechanical Engineering
Master of Science in Petroleum Engineering
Master of Science in Systems Science
Master of Social Work
Certificate of Education Specialist
Graduate Certificate in Materials Science and Engineering
Doctor of Musical Arts
Doctor of Philosophy
Doctor of Veterinary Medicine

Course Offerings

Instruction is provided through a wide variety of on- and off-campus courses. The academic year is divided into fall and spring semesters and a summer term consisting of one or more sessions. Most classes are taught between 7:30 a.m. and 10 p.m., Monday through Friday.

The *fall semester* starts in mid-August and ends in mid-December; the *spring semester* lasts from January to May. The *summer sessions* are generally held from early June to early August. There are three intersession terms: between the fall semester and the spring semester, the spring semester and the summer term, and the summer term and the fall semester. During the three-week intensive *intersessions*, students attend classes for approximately three hours each day. Many students take advantage of the summer term and intersessions to expedite graduation, to take courses unavailable during the fall or spring, or to lighten their academic load for the following semester.

Some courses are taught through independent learning, online, or in off-campus locations through Continuing Education. These offerings provide maximum flexibility for students, particularly adult students and those who work during the day. Also available are educational opportunities through ROTC, the “Artist and Lecture Series,” the Career Services Center, LSU-Baton Rouge Community College Cross-Enrollment Program, and LSU-Southern University cooperative programs.

Special Programs

Continuing Education offers instruction to traditional and non-traditional students by extending the educational services of LSU through a wide range of outreach efforts. Programs include on- and off-campus credit and noncredit courses and certificate programs; distance learning programs; programs for professional advancement, conferences, seminars; precollege programs, intensive English and lifelong learning programs, and other specialized instructional programs. For more information, see “Continuing Education” in this catalog.

The **Cox Communications Academic Center for Student-Athletes (CCACSA)** is comprised of an academic affairs team, a student affairs team, and an information technology team. Collectively, the purpose is to provide an all-inclusive student-centered support structure for all student-athletes from matriculation through graduation and life beyond.

Artist and Lecture Series and Lectureships

LSU sponsors artist and lecture series and lectureships to foster intellectual inquiry, stimulate dialog, and cultivate unique experiences with outstanding performance in a variety of fields. Among these programs are:

- Aesculapian Lecture Series in Veterinary Medicine
- Senator John Breaux Annual Symposium in Media and Public Affairs
- Chancellor’s Distinguished Lectureship Series
- Max Z. Conrad Lecture Series

- LSU Curriculum Theory Project Distinguished Lecture Series
- Deep South Conference in Communication Sciences & Disorders
- Delta Mouth Literary Festival
- Design Week Visiting Critic, Robert Reich School of Landscape Architecture
- School of Library and Information Science SLIS/LAA Diversity Interest Group Mentoring Program
- J. Norman Efferson Lectureship Series
- Festival of Contemporary Music
- Walter Lynwood Fleming Lectures in Southern History
- LSU Flores MBA Program Distinguished Speaker Series
- Frank J. Germano Lecture Series in Civil Engineering
- Max Goodrich Distinguished Speaker Series in Physics and Astronomy
- Giles Wilkeson Gray Lecture Series in Communication Studies
- Alfred C. Glassell Jr. Lecture Series
- Holt B. Harrison/Harrison Paint Co./Elmira H. Harrison Lectureship
- History Graduate Student Association Annual Conference
- Walter Hitesman Lecture Series in Mass Communication
- Hubert H. Humphrey Lectureship in Public Affairs
- J. W. Kistler Conference
- W. A. Lawrence Lecture
- School of Library & Information Science Beta Phi Mu Lecture Series
- Louisiana Environmental Lecture Series of the Coast and Environment
- LSU School of Art Artist in Residence
- Paula G. Manship College of Art & Design Lecture Series
- Paula G. Manship School of Music Guest Artist Series
- Marathon Speaker Series in Geology
- Modern History Colloquium
- Grover E. Murray Lecture Series in Geology
- E. J. Ourso College of Business/LSU Flores MBA Alumni Association Louisiana Looking Up
- Pasquale Porcelli Distinguished Lecture Series in Mathematics
- Patrick Lecture Series in Nutrition, Food Science, and Wetland Science
- The performance studies area in the Department of Communication Studies presents performances of literature, performance art, and experimental productions designed by students, faculty, and guest artists throughout the academic year.
- Evelyn Pruitt Geography Lecture Series
- William A. Pryor Lecture Series
- Readers & Writers Literary Forum
- Janice R. Sachse Visiting Artist Series
- School of Architecture Lecture Series
- Stephenson Entrepreneurship Institute's Distinguished Entrepreneurship Speaker Series
- The Underpass/Small Bar Reading Series
- Visiting Poets Series
- Edward Douglass White Lectures on Citizenship
- L. J. Wilbert Memorial Lectures in Geology
- School of Music—Throughout each year, the School of Music presents a comprehensive series of concerts involving faculty and student performers; orchestras; wind ensembles; jazz groups; gospel choirs; choral ensembles; chamber music; and opera.
- LSU Theatre and Swine Palace present six major productions each year featuring students, faculty, and professional artists as well as a Lab Season of student-directed workshop productions and the annual LSU Dance Concert.

Board of Regents' Academic Policy

The university conforms to Board of Regents' requirements to ensure consistency of official documentation with the Regents' *Inventory of Degree and Certificate Programs*. The following standardized terms are used in LSU catalogs, diplomas, commencement programs, transcripts, and other official documents.

Degree ▪ The title of the award conferred on students by a college, university, or professional school upon completion of a unified program of study (i.e., Bachelor of Arts, BA; Bachelor of Science, BS; Master of Science, MS; Master of Fine Arts, MFA; Master of Landscape Architecture, MLA; Doctor of Philosophy, PhD, etc.).

Degree Program ▪ A grouping of campus-approved courses and requirements (i.e., minimum GPA, comprehensive examinations, English and mathematics proficiency) that, when satisfactorily completed by a student, will entitle him or her to a degree from a public institution of higher education.

Degree Designation ▪ A degree designation for each authorized program at public institutions of higher education is listed in the Board of Regents' *Inventory of Degree and Certificate Programs*. Some professional programs require the name of the general subject area as part of the degree designation (i.e., Bachelor of Architecture, BArch; Master of Social Work, MSW; Juris Doctorate, JD, etc.).

Degree Subject Area ▪ The primary discipline that constitutes the focus of a degree program. (For example, a Bachelor of Arts in history. In some cases, the degree subject area is part of the degree title, as in Bachelor of Architecture, Master of Landscape Architecture.) When a student satisfactorily completes a degree program, he/she will be entitled to a degree in the appropriate subject area (i.e., biology, history, English, etc.)

Degree Title ▪ The complete label of a degree program, consisting of the degree designation and the degree subject area (i.e., Bachelor of Arts in history; Bachelor of Science in chemistry).

Curriculum ▪ A description of the required and elective courses for a degree program.

Major ▪ That part of a degree program that consists of a specified group of courses in a particular discipline or field. The name of the major is usually consistent with the degree subject area. A major usually consists of 25 percent or more of the total hours required in an undergraduate curriculum. Establishment of a major requires prior approval by the Board of Regents.

Minor ▪ That part of a degree program that consists of a specified group of courses in a particular discipline or field. The minor usually consists of 15 percent or more of the total hours required in an undergraduate curriculum. Minors do not require prior approval by the Board of Regents.

Concentration ▪ An alternative track of courses within a major, accounting for at least 30 percent of the *major requirements*. Establishment of a concentration does not require prior approval by the Board of Regents. Transcripts list degree titles, majors, minors, and concentrations. Diplomas list only the appropriate degree designations.

Undergraduate degrees that the university is currently authorized by the Board of Regents to offer are presented in this table by college. Minors within degree programs are listed in this table. Please consult the appropriate senior college section for more information.

Student Life

The university is committed to the concept of student growth and development through active participation in the university's living-learning environment. Students will maintain and develop their physical and mental health, sense of self-worth, ability to work with and lead others, understanding of citizenship obligations, concern for the campus environment, ability to think critically and ethically, and a sense of belonging to the university and global communities. To foster development of these qualities, a comprehensive range of programs and services has been designed for students to encourage full participation in the life of the university; to promote intellectual development, leadership, and civic responsibility; and to contribute to personal growth.

TELEPHONE 225-578-5160
FAX 225-578-9311
WEBSITE www.lsu.edu/campuslife
E-MAIL campuslife@lsu.edu

The mission of Campus Life is to enhance student learning through innovative initiatives focused on involvement, leadership, and service that enrich the LSU experience. Campus Life supports these innovative initiatives through leadership development, activities, student organizations, and volunteerism.

Activities - With a professional programming staff to advise its members, the Student Activities Board seeks to educate and entertain the campus while developing the newest generation of student leaders on campus. Whether it is homecoming festivities, musical performances, hot topics, popular culture, or exposure to cultural events and different cultures, students can always find something to do on campus.

Service - With its campus and community service programs and networking opportunities, Volunteer LSU is the heart of student volunteer efforts. The student leaders of Volunteer LSU coordinate major campus service traditions, like Community Bound each fall. New service initiatives each semester are focused on areas such as youth programs, disaster relief and emergency preparedness, Baton Rouge restoration and beautification, civic and social awareness, and health and wellness outreach.

Campus Involvement and Student Organizations - With more than 400 registered student organizations, there is a place for every LSU student to be involved at LSU. This area provides the oversight, support, and training for student organizations. For the most up-to-date list of student organizations, visit www.lsu.edu/campuslife.

Leadership Development - Leadership development is an integral part of a student's success at LSU. In Campus Life, staff and students implement campus-wide leadership development programs to enhance the academic experiences of the student body. This area includes hosting leadership development programs, coordinating leadership conferences, and providing specific training for individuals who wish to become campus leaders.

Through these experiences, Campus Life intends to assist students to become well-rounded individuals, both inside and outside of the classroom.

Career Services

OFFICE	B-4 Coates Hall (Student Services);	1502 Patrick F. Taylor Hall (Employment Services)
TELEPHONE	225-578-1548 (Student Services);	225-578-2162 (Employment Services)
FAX	225-578-8927 (Student Services)	225-578-3076 (Employment Services)
WEBSITE	careercenter.lsu.edu	
E-MAIL	career@lsu.edu	

The mission of Career Services is to assist students and alumni in choosing careers, obtaining career-related work experiences while in school, developing job search skills, and securing employment or admission to graduate or professional school.

Undergraduates are encouraged to follow their Recommended Paths throughout their college years to fully prepare themselves to develop the skills, experience, and confidence to transition successfully from college to career. Students are also encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Graduate students are likewise encouraged to clarify their career objectives and develop their professional skills outside the classroom by following the Career Plan for Graduate Students.

Career Decision-Making provides assistance in self-assessment for the purpose of planning a career. Services include choosing the right major and career; career testing and interpretation; specialized programming for first-year students; and the Career Information Center.

Experiential Education combines academic study with on-the-job, career-related work experience. Cooperative education programs, internships, summer jobs, part-time jobs, and volunteer opportunities are all offered to assist students in this area.

Job Search teaches lifelong skills in finding employment. Services available include individual appointments, addressing résumés, cover letters, networking, interview, job search strategies, and assistance with the graduate school application process.

Employment Services connects students and alumni with employers. Careers2Geaux, the On-Campus Interviewing Program, résumé referrals, Tiger Network, and other recruiting events are all available for the benefit of students and alumni.

Center for Academic Success

OFFICE B31 Coates Hall
TELEPHONE 225-578-2872
FAX 225-578-2696
WEBSITE www.cas.lsu.edu
E-MAIL cas@lsu.edu

The Center for Academic Success (CAS), internationally recognized as an Outstanding Learning Center, is the central learning center at LSU for students interested in learning efficiency and effectiveness. Because academic support is not just for students who are "in trouble," the CAS offers resources that help all students maximize their experience at LSU, from first year through graduate and professional school. The CAS faculty and staff take a cognitive science-based approach to assisting students with creative and personalized strategies to ensure their academic success.

Free resources available to LSU students include:

- A nationally recognized website (www.cas.lsu.edu) with information on effective learning strategies that provides tools and information to help students discover and understand how they learn, how to get organized, how to ace their tests, and how to reduce their stress to help them increase their academic performance. Additional online resources include online learning style self-tests and learning strategies workshops (www.lsu.edu/learn).
- One-on-one consultations and on-campus workshops on learning strategies are also available.
- Collaborative study groups (Supplemental Instruction) and tutoring (on-campus and online) are offered to students for historically challenging subjects such as mathematics, biology, chemistry, and physics as well as other select subjects. Current schedules are posted at www.cas.lsu.edu.

E-MAIL lsucup@lsu.edu

The Community University Partnership (CUP) builds relationships between campus and community groups, activists, schools and interfaith networks. Through its efforts, CUP promotes civic engagement, increases cultural competency, challenges historic sentiment, and develops new strategies to accommodate the changing demographics of our community.

Office of the Dean of Students

OFFICE 333 LSU Student Union
TELEPHONE 225-578-9442
FAX 225-578-5637
WEBSITE www.lsu.edu/deanofstudents

The *Office of the Dean of Students* (ODOS) transforms lives by facilitating opportunities and experiences to discover, engage, and learn in a diverse, inclusive, and just community while promoting social responsibility. Departments within ODOS are Campus Life, Disability Services, Greek Life, Student Advocacy and Accountability. ODOS also advises and provides financial administrative support for Student Government.

ODOS engages the LSU community in a premier learning experience to achieve the highest standards of personal integrity and civic engagement for leadership in a global society. In addition to facilitating student development and responsibility, staff members also serve as advocates for student interests. Our vision is to engage the LSU community in a premier learning experience to achieve the highest standards of personal integrity and civic engagement for leadership in a global society. LSU's Commitment to Community serves as a guiding document to assist the entire LSU campus in having pride in our institution and respecting the people who faithfully commit to the principles within the commitment to community.

Student Government is the officially registered student organization that represents student interests, promotes student involvement in decision-making, and promotes the general welfare of the LSU student body.

Disability Services

OFFICE 115 Johnston Hall

Disability Services assists students in identifying and developing accommodations and services to help overcome barriers to the achievement of personal and academic goals. Services are provided for students with temporary or permanent disabilities. Accommodations and services are based on the individual student's disability-based need. Students must provide current documentation of their disabilities. Students should contact the office early so that necessary accommodations can be arranged.

First Year Experience

OFFICE 128 Johnston Hall
TELEPHONE 225-578-1188
FAX 225-578-4820
WEBSITE www.fye.lsu.edu
E-MAIL fye@lsu.edu

The First Year Experience (FYE) facilitates the creation of a culture which is student centered and provides a guide to academic success at LSU. The initiatives inform students of the university's academic expectations and provide resources to facilitate an enriching educational experience. FYE strategically connects students to resources available for success. Offerings include a comprehensive orientation program, academic support, campus involvement, community engagement, and experiential learning. A student's engagement with each of these areas positively impacts retention and graduation.

Orientation - New student orientation is the university's welcome program for all incoming students. Students have the opportunity to learn more about LSU, take advanced standing exams, and schedule classes. Orientation programs set the tone for success during the first year as well as the future.

STRIPES - A four-day retreat designed to prepare first-year students for the transition to LSU, STRIPES includes sections on college readiness, history and traditions, campus involvement, relationship building, and student resources.

Bengal Bound - Bengal Bound is the university's official welcome week. The programs and activities are designed to ease the transition and allow students to feel settled before the first day of classes. The Bengal Bound website provides valuable information on the many campus resources available.

LSU Ambassadors - The LSU Ambassadors are a distinctive organization of student leaders selected to support the university's orientation and recruitment programs, encourage pride and spirit in the LSU community, and provide diligent service to the LSU campus. Ambassadors are available to assist their fellow students throughout their time spent under LSU's oaks and arches – from orientation to graduation.

Parent & Family Programs – Parent & Family Programs coordinates the family orientation programs that coincide with new student orientation and offers ongoing outreach and education to foster a stronger connection between families of current students and the university community.

LSU Family Association – The LSU Family Association serves the parents and families of current students through special events, newsletters, and opportunities to partner with the university in enhancing students' educational experiences. There is a one-time membership fee.

Veteran & Military Services – From the application process to graduation, Veteran & Military Services (VMS) supports the success of veterans, military, and their families at LSU. The office provides both direct and liaison services for the educational and administrative needs of veterans, service members, dependents, and survivors.

Greek Life

Greek Life transforms lives by supporting and facilitating opportunities and experiences within the Greek community to discover, engage, and learn while fostering an environment for peer accountability based on fraternal values.

Greek Life strives to develop a community that enables individuals to achieve the highest standards of personal integrity and civic engagement for leadership in a global society.

Greek Life provides support for individuals and organizations that comprise the fraternal community at LSU. Greek Life staff members develop, implement, and coordinate programs and services that address member education, personal development, academic success, philanthropic activities, leadership development, and social activities. For a current list of fraternity and sorority chapters, please visit www.lsu.edu/greeks. Specific questions or inquiries can be addressed to greeks@lsu.edu.

Multicultural Affairs

OFFICE 335 LSU Student Union Building
TELEPHONE 225-578-4339
FAX 225-578-7135
WEBSITE www.lsu.edu/oma

The *Office of Multicultural Affairs* (OMA) seeks to create an environment at LSU that embraces individual difference, sustains inclusion, and cultivates a campus atmosphere that is free from bias. OMA strives to facilitate the academic excellence, personal growth, and social experiences of all students with specific commitments to students of color and other traditionally underrepresented groups. OMA provides a variety of programs and services that reflects the cultural diversity LSU has to offer.

Parking & Transportation Services

OFFICE Public Safety Building
TELEPHONE 225-578-5000
FAX 225-578-5588
WEBSITE www.lsu.edu/parking
E-MAIL parking@lsu.edu

LSU is committed to providing ample on-campus parking and transportation for all students, employees, and visitors. To legally park a vehicle on campus, faculty, staff, and students must register and obtain a permit from *Parking & Transportation Services*. Parking & Transportation Services also provides Campus Transit which is a safe and convenient method of on-campus transportation for students to move around campus after hours. Parking & Transportation Services also partners to provide campus-wide bus service. The LSU Tiger Trails Transit System provides a safe, convenient, and free bus service for LSU students, faculty, staff, and visitors, both on and off campus.

For additional information, call 225-578-5000.

LSU Police Department

OFFICE Public Safety Building
TELEPHONE 225-578-3231
FAX 225-578-3421
WEBSITE www.lsu.edu/police

The university is dedicated to preserving a peaceful and safe environment for the entire university community. Students, faculty, staff, and visitors are urged to be aware of and alert to the possible existence of criminal activity on campus and to report all crimes or suspicious activity to the LSU Police Department.

The *LSU Police Department* is staffed 24 hours a day. Police officers assigned to patrol areas throughout the campus will respond promptly to any call and have the capacity to request municipal fire, EMS, or additional police support, as necessary. The department has 70 full-time officers and each has completed formal police training that exceeds state standards and is certified by the Police Officers Standards and Training Council. The department provides a full range of law enforcement services, including criminal investigations, emergency services, and crime prevention services, for a campus population larger than most cities in the

state. Administrative responsibility for safety, security, and police service rests with the Vice Chancellor for Finance and Administrative Services through the Chief of Police.

The University Right to Know/Campus Security Act report is available on the Internet at www.lsu.edu/police. The web page includes crime statistics, crime alerts, and security policies and procedures. A copy of the report may also be accessed at the LSU Police Department.

Residential Life

OFFICE	99 Grace King Hall
TELEPHONE	225-578-8663
FAX	225-578-5576
WEBSITE	www.lsu.edu/housing
E-MAIL	reslife@lsu.edu

To make on-campus living an enriching experience, LSU students and staff have designed a residential life program to promote learning and personal growth. Residence halls and apartments provide a natural and convenient social setting for students. Residents are seldom more than a 10-minute walk from the library, classes, or campus activities.

One of the greatest advantages in living in residence halls is that the staff is available to assist students with concerns and questions. Studies show that on-campus residents maintain higher grade point averages, retention, and graduation rates than do off-campus students. The housing staff also provides informative programs related to safety, wellness, community service, and a variety of other topics. Many of these programs are led by faculty members.

Prospective students must first be admitted to the university before applying for on-campus housing. The Department of Residential Life begins accepting housing applications on October 1 preceding the academic year they are applying for (e.g. students applying for housing for fall 2014 may submit their application beginning October 1, 2013 after being admitted).

If a student has not been admitted to the university first and submits a housing application/contract, Residential Life will return these items, including the deposit. A student may resubmit these items once he or she is admitted to the university. The application date for priority consideration is not established until the student has been admitted and has submitted an application for housing with the deposit. The housing application may be completed online, mailed, or delivered in person to Grace King Hall.

In response to increased demand for on-campus housing, Residential Life has built new residence halls and renovated existing residence halls, adding or replacing nearly 2,300 beds to the housing inventory over the past five years, with the goal to provide housing to all who want to live on campus. It is recommended to apply early since housing priority is assigned by the date of the housing application. There is no on-campus residency requirement and on-campus housing is not guaranteed.

All residential communities participate in the recently implemented Faculty-in-Residence Program, where an LSU faculty member and his or her family live on campus. These faculty members interact with residents by participating in programs in the halls, apartments, and common area sections of their living quarters. Students have the opportunity to socialize with faculty members in a less threatening environment. There is a faculty-in-residence on both the east and west side of campus.

Choices in Residential Living

LSU has 20 residence halls with architectural styles ranging from northern Italian Renaissance, typical of the older campus, to modern buildings. There are many traditional residence halls (non-residential college) that are open to all students of all majors. The activities and programs within the traditional halls are based on the same living-learning principles as the residential

colleges. Many major improvements have been made to LSU's traditional residence halls over the past ten years, and all of our residential buildings are well-maintained by the Residential Life maintenance staff.

For single, upper-class students there are 184 apartments in a complex called the *East Campus Apartments* (ECA) and 168 apartments in a complex called the *West Campus Apartments* (WCA). For married students, single parents, students 21 years or older, and post-doctoral students and research associates, there are 578 apartments in the *Nicholson and Edward Gay Apartments*.

Most residence halls have ground-floor reception areas and study rooms on each level. Entry to all halls is controlled by a security system that utilizes residents' LSU ID cards. Coin and card access laundry facilities are available. In all halls, students can go online to monitor the status of their laundry as well as the availability of machines. Several halls are accessible for students with disabilities. East and West Campus Apartments rent by the individual room, are fully furnished, and have modern appliances including a stove, refrigerator, microwave, dishwasher, garbage disposal, and clothes washer and dryer. Nicholson and Edward Gay Apartments rent by the whole apartment and are unfurnished except for stoves and refrigerators.

All the residence halls, ECA, WCA, and Edward Gay Apartments have wired Ethernet data connections and basic cable TV connections included in the rent. Additionally, wireless Internet connectivity is provided in student rooms and common areas (lobbies, courtyards, study areas, kitchens, etc.) in all residence halls, ECA, and WCA. There are computer labs with printers in 15 of the residence halls and WCA as well as 40 email workstations. Students can order local phone service online on their myLSU accounts and a monthly fee will be added to their student accounts. Local phone service is not provided in the Nicholson Apartments but is in the Edward Gay Apartments.

The vast majority of residence halls have two-student rooms, although there are a limited number of three- and four-student rooms which are significantly larger. If space is available, students may request a private room. Living arrangements have been established with individual preferences for social and educational development in mind.

Residential Colleges

Residential colleges are structured to create a stimulating living-learning environment through student interaction with faculty and other freshmen beyond the boundaries of the more traditional classroom setting. Students participating in the residential colleges reside in the same facility and must enroll in two special sections of general academic courses per semester taken with other residential college students. Some of these classes may be offered in classrooms in the residence halls. This environment creates a close-knit academic community similar to the small college experience. With greater academic emphasis and faculty involvement, the residential college atmosphere encourages studying, provides access to exceptional academic and social support, and makes it easy to establish new friendships. For more information regarding course requirements, visit the Residential Life website at www.lsu.edu/housing or www.lsu.edu/residentialcollege.

Career Discovery Residential College (CDRC) – Incoming freshmen of all majors are eligible for this themed-based residential college. Career Discovery is new for fall 2014, and its goal is to help guide first-year students in the discovery process of selecting their major and career. Programs in this community are geared toward self-discovery, career exploration, and exploring various majors within LSU and their related careers. CDRC collaborates with LSU Career Services, the Center for Academic Success, and the University College Center for Freshman Year to offer programs and services to its residents. There is a laptop requirement and students must take ENGL 1001 for CDRC. Career Discovery is housed in the beautiful and spacious Broussard Hall.

Herget Residential College - Students participating in Herget Residential College take several core freshman courses together creating a "mini-campus" atmosphere in the halls. This program for non-honors students is designed to integrate learning with community living and provide students with greater opportunities to interact with faculty and specially selected upper-class students. Herget's focus is to help students successfully transition to college life, help them find their niche, and make new friends. Herget Residential College is housed in Herget Hall, overlooking Campus Lake.

The Honors House is for Honors College students in all majors and classifications and is housed in the newly renovated East and West Laville Halls. High-achieving, creative, and motivated students help create a dynamic living-learning environment. Students in the Honors House live with a diverse peer group, participate in social, academic, and service activities, and interact with faculty within East and West Laville Halls. This academically focused environment allows for involvement and leadership through participation in Hall Government and Honors College student organizations.

Agriculture Residential College - Incoming freshmen in good standing who have declared a major within the LSU *College of Agriculture* will have the opportunity to live in the Agriculture Residential College. This residential college will support students as they advance through LSU's agriculture program with a focus in Agriculture Leadership. Faculty involvement and research opportunities will strengthen each student's connection with the Agriculture College, the land-grant mission dating back to 1862, and the interdisciplinary educational experience that reflects the latest in science and technology. The Agriculture Residential College is housed in the suite bathroom side of the recently renovated and expanded Blake Hall, overlooking Campus Lake.

Business Residential College - Students in the *Business Residential College* have unique educational and professional development opportunities to acclimate to a business culture. This residential college is open to first-year students who have declared a major in LSU's E.J. Ourso College of Business. The Business Residential College is housed in Residential College One–West Hall, a state-of-the-art residence hall that opened in spring 2008.

Engineering Residential College- Incoming freshmen who have declared a major in engineering, computer science, or construction management and have an ACT Math score of 23 or higher will have the opportunity to live in the Engineering Residential College (ERC). This residential college supports students as they advance through LSU's quality engineering program. Faculty involvement and research opportunities will strengthen each student's connection with the College of Engineering. The Engineering Residential College is housed in Residential College One – North Hall, our newest, state-of-the-art residence hall which opened in fall 2012. Apply early; the ERC typically fills early in the process and has a waiting list.

Global Connections Residential College- Open to first-year, non-honors students with a declared major in the *College of Humanities & Social Sciences*. The Global Connections Residential College (GCRC) is one of LSU's premier living-learning programs, focused on international engagement and global interconnections. Students share a common curiosity about other peoples, places, perceptions, and perspectives. They come together in a residential community devoted to exploring Louisiana's rich international and cultural heritage, expanding understanding of global events and issues, and fostering opportunities for study and service abroad. GCRC is housed in Residential College One – South Hall, a state-of-the-art residence hall that opened in spring 2008.

Mass Communication Residential College - The Mass Communication Residential College is specifically designed to offer an educational and social community for the next generation of journalism, public relations, digital advertising, and political communication professionals. The program will be open to first-year students and any undergraduate international exchange students who are enrolled in the Manship School of Mass Communication. It is housed in Residential College One – South Hall, a state-of-the-art residence hall that opened in spring 2008.

Science Residential College - Incoming freshmen who have declared a major in any science field (including biochemistry, biological sciences, microbiology, chemistry, geology, physics, and mathematics) and have minimum ACT scores of Math: 23 and Composition: 23, or SAT scores of Quantitative: 540 and Verbal & Quantitative: 1040 are eligible to live in the Science Residential College (SRC) in the historic Evangeline Hall. This living-learning approach to the first-year experience will help empower the next generation of science professionals for success. SRC residents are encouraged to participate in one of the science summer workshops offered in each area of study.

Themed Housing

Themed Housing is similar to a residential college, but on a smaller scale. Participants live within a traditional hall, take one class with their cohorts in the program, and participate in activities together. There is one themed housing option for first-year students – the Leadership & Service Living-Learning Community – in a portion of Acadian Hall and one themed housing option for second-year students – Sophomore Gold – in one building in East Campus Apartments.

More details about LSU's themed housing options are available online at lsu.edu/housing.

Housing Applications for Residence Halls, East, and West Campus Apartments

The Department of Residential Life begins accepting housing applications on October 1 prior to your fall semester enrollment. For example, students applying for housing for fall 2014 may submit an application in October 2013. Students may not apply for housing prior to being admitted to the university. An application for admission must be approved by the Office of Enrollment

Management before an application for housing can be submitted. If you are a new student, to increase your chances of receiving an on-campus assignment and the residence hall of your choice, we recommend that you apply for housing as early as possible. This will enhance your chances of getting your preferred community. While on-campus housing is not guaranteed, our goal is to provide housing to all who want to live on campus. There is no on-campus residency requirement.

The East and West Campus Apartments are available to full-time, upper-class (second-year or higher) students only. Applying to the Department of Residential Life is a three-step online process:

1. Apply for admission (or be a current student).
2. Upon admission, fill out the online housing application at www.lsu.edu/housing.
3. Use a credit card to pay the \$100 refundable deposit, \$50 non-refundable application fee, and \$5 non-refundable credit card processing fee (\$155 total).

To get your housing assignment online, you must:

1. Go to www.lsu.edu and click "Login to myLSU" at the top left of the page.
2. Click "Student Services" on the left-side menu, and then select "Student Housing." This will take you to the Residential Life housing application.
3. Click "View Application Status" to see your assignment for the fall semester.

Cancellation of an application/assignment must be submitted in writing to the Department of Residential Life either by emailing reslife@lsu.edu or by mail. If the cancellation is received by **June 1** for the fall semester, **December 1** for the spring semester, or **May 1** for the summer term, a processing fee will be deducted from the deposit, and the remainder will be refunded. If the cancellation is received after **June 1** for fall, **December 1** for spring, or **May 1** for summer, or if the assignment is not claimed during registration, the entire deposit will be forfeited unless all requirements for evaluation of an application for admission have been met and admission has been denied.

The university reserves all rights in connection with assignment of rooms, inspection of rooms, termination, and occupancy of rooms. Reservations are not transferable. If the room is not occupied by 11:59 p.m. on the first day of class, the reservation is forfeited unless notification stating the time of late arrival has been received. Other terms of residence hall occupancy are provided in the housing contract. Room reservations in fraternity or sorority houses are limited to eligible members of those organizations and are made directly with the organization.

Rates for Residence Halls and East and West Campus Apartments

LSU provides housing for approximately 6,000 students in air-conditioned residence halls and apartments. Published rates are per semester, per student. For a list of current rates, see the Residential Life website at www.lsu.edu/housing. A student living in a room that is not filled to normal capacity will be expected to pay an additional rental charge or to move to another room with a roommate at the same rental charge in the same residence hall. If rooms are available for single occupancy, the charge for single occupancy of a two-student room is 1.5 times the semester rate for full occupancy. Semester rental rates are subject to change at the beginning of a regular semester or summer term.

Residence hall rent is due by the deadline established on the advanced fee bill. Additional information concerning residence hall accommodations may be obtained from the Department of Residential Life, 99 Grace King Hall, 225-578-8663 or on the website at www.lsu.edu/housing.

Nicholson and Edward Gay Apartments

The university has 382 one-, two- and three-bedroom apartments that are available for families and for single, upper-class, full-time graduate students aged 21 or older, post-doctoral students, and research associates.

Additional information is available from the Department of Residential Life, 225-334-5198 or www.lsu.edu/housing.

Refund of Residence Hall and Apartment Rent

Students contract for space in a residence hall or East and West Campus Apartments on an academic-year basis. The contract is effective on the date it is submitted online or counter-signed by the student. Refund of room rent will be made according to the guidelines below. For further details, contact the Department of Residential Life, 99 Grace King Hall, 225-578-8663.

- A student who moves from one room to another in a residence hall or from one residence hall to another will be refunded or charged the difference, if any, between the unused prorated portions of rent for the two spaces.
- A student who moves out of a residence hall and resigns from the university will be responsible for 25 percent of the rent for the remainder of the contract for the space the student was occupying.
- A student who moves out of a residence hall without resigning from the university will be responsible for 75 percent of the rent for the remainder of the contract for the least expensive space.
- A student who moves out of a residence hall into a fraternity or sorority house before the close of business on the last day of the regular fall registration period will be refunded all of the unused portion of rent for the space he or she was occupying. If such a move is made after the last day of regular registration (the last day of fall registration, if on an "Academic-Year Rental Terms" agreement), the student will receive a refund as noted in the paragraph above.
- A student who is required to move out of a residence hall as a result of disciplinary action will be responsible for 75 percent of the rent for the remainder of the contract for the least expensive space.

Student Advocacy & Accountability

OFFICE 340 LSU Student Union

TELEPHONE 225-578-4307

FAX 225-578-5637

WEBSITE www.saa.lsu.edu

Student Advocacy & Accountability (SAA) engages students on issues of community membership, responsible decision-making, critical thinking, and informed citizenship. SAA promotes cognitive, personal, and academic development through educational outreach, intervention, identification of resources, and the accountability process with an end goal of achieving positive change.

The office addresses all academic and non-academic violations of the LSU Code of Student conduct, found at www.saa.lsu.edu as well as promotes the Commitment to Community (also available at www.saa.lsu.edu). The Code of Student Conduct applies to both individual students and all student organizations on and off campus.

Through our advocacy efforts, SAA provides support resources and services in times of crisis through coordination of the C.A.R.E. (Communicate, Assess, Refer, Educate) approach, including the interdepartmental C.A.R.E. team. SAA strongly recommends that each student be acquainted with the Codes of Student Conduct and aspire to make choices consistent with the Commitment to Community.

Student Health Center

OFFICE Student Health Center Building

TELEPHONE 225-578-6271

FAX 225-578-5655

WEBSITE www.lsu.edu/shc

The *Student Health Center* provides quality health care to LSU students. The center is fully accredited by the Accreditation Association for Ambulatory Health Care (AAHC). The center provides collaborative care in the out-patient clinic, which includes medical, mental health, and wellness and health promotion services. All visits and inquiries are confidential. The student health fee, paid by full-time students during registration, entitles students to use many of the services of the Student Health

Center at no additional charge. There are additional charges for laboratory tests, diagnostic imaging, prescriptions, and medical procedures.

The *Student Health Center Medical Clinic* has primary care clinicians and gynecologists, who are supported by registered nurses. In addition, part-time specialty services are offered in orthopedics, dermatology, ear/nose/throat, and ophthalmology. A dental screening clinic is available; however, dental procedures are not performed on the premises.

Mental Health Service provides crisis intervention and individual and group therapy. These services are provided by mental health clinicians experienced in treating emotional problems and stresses experienced by university students.

The *Office of Health Promotion* provides education and outreach to the campus community. Individual consultations are available on a variety of issues, including nutrition and weight management; stress and time management; sexual and reproductive health; alcohol and other drug abuse; smoking cessation; sexual assault and interpersonal violence; and many others. Educational programs for student organizations and residence halls, as well as guest lectures for undergraduate and graduate classes, are available upon request throughout the year. A departmental-sponsored peer education organization offers service learning and leadership development experiences.

Student Media

OFFICE	B-39 Hodges Hall
TELEPHONE	225-578-1697
FAX	225-578-1698
WEBSITE	www.lsu.edu/studentmedia

The *Office of Student Media* oversees operation of KLSU-FM, "The Gumbo" year book, *Legacy* magazine, *The Daily Reveille*, TIGER-TV, and an advertising and marketing division. These media outlets provide news and entertainment to students, faculty, and staff and training for students interested in journalism and publishing. All Student Media properties have received numerous regional and national awards.

The Daily Reveille, the university's student-edited newspaper and website, is published Monday through Friday during the fall and spring semesters and Tuesdays and Thursdays during the summer term. "The Gumbo" is distributed during the fall semester. Students also edit and publish the LSU student magazine, *Legacy*, which is distributed on campus four times annually. *KLSU-FM* is a 5,000-watt educational FM station operated by students 18 hours a day, seven days a week. Tiger TV produces both news and entertainment programming for the LSU Campus Cable System.

Auxiliary Services

OFFICE	310 LSU Student Union
TELEPHONE	225-578-5208
FAX	225-578-4329
WEBSITE	www.lsu.edu/uas
E-MAIL	uas@lsu.edu

Auxiliary Services manages student service-related contracts including the LSU Student Union, Barnes & Noble at LSU; LSU Tiger Card Office and TigerCASH program; LSU Dining; LSU Catering; LSU Vending; LSU Laundry; ATMs; the Barbershop; RICOH Mail & Printing Services at LSU; Copier Management; Kaplan testing services; the LSU Child Care Center; and LSU partnerships with Cox, Verizon, and Campus Federal Credit Union.

Please refer to our website, www.lsu.edu/uas, for more information.

LSU Student Union

The *LSU Student Union*, located in the heart of campus, serves as LSU's community center by providing facilities, services, and programs for students, faculty, staff, alumni, and friends of the university. The union is supported by student fees and by a variety of retail and service enterprises located in the building.

The building is the site for a wide range of programs and events designed to appeal to all segments of the university community. These programs include lectures, performing arts, visual arts, films, concerts, comedians, and a large number of noncredit leisure classes. Information on programs, student committees, and student leadership opportunities in the union are available in Room 310 and in the Campus Life Office, Room 358.

The union provides a variety of facilities, services, and conveniences to meet the needs of the campus community. *LSU Dining* offers the Tiger Lair food court, with Chick-fil-A, Panda Express, and other popular brands; the Magnolia Room restaurant, Einstein Bros. Bagels, and a McDonald's restaurant. *LSU Catering* offers a full line of catered services for banquets and luncheons.

Banking machines (ATMs) are located on the first floor. The university's ID card operation and the TigerCASH debit card services are located in the *Tiger Card Office*. *Campus Federal Credit Union* offers student accounts and has a branch located on the first floor of the union. Also located on the first floor are the *Barbershop*, *Cox Communications*, walk-up e-mail terminals, Kaplan testing services, billiards, and the *Live Oak Lounge*, which provides a view of the Memorial Oak Grove. *RICOH Mail & Printing Services at LSU*, located on the ground floor of the union, offers mailbox rental and package receipt services to students, faculty, and staff.

On the second floor, patrons will find the *Art Gallery*, which offers a variety of local and national exhibits year round. The *Information Center* serves as a hub for campus and community information. The *Union Theater* is host to the School of Music concerts, Broadway shows, dance performances, and many other performing arts events throughout the year. The *Box Office* sells tickets for Shaver Theatre and Union Theater events and School of Music Recital Hall and Band Hall. The front lounge of the theatre overlooks the LSU Parade Ground with a beautiful view of oak trees beneath the union's skylights.

Auxiliary Services administrative offices are on the third floor where student job opportunities for positions in the union are available. Students will also find the *Student Technology Learning Center* with a computer lab and Internet connections. The *Event Management Office* processes more than 6,000 reservation requests annually for union facilities and campus grounds.

For information on hours of operation and updates on events and services, visit the union website at www.lsu.edu/union.

Barnes & Noble at LSU

OFFICE 2 Union Square

TELEPHONE 225-578-5137

WEBSITE www.lsubookcenter.com

Barnes & Noble at LSU boasts the largest selections of LSU clothing & gifts, a tech store, meeting space, and café to serve the campus community. The new superstore provides greater space for merchandising and customer seating within the dramatic store design. The store offers an expanded café for nearly one hundred people and an extensive menu to include more fresh food items. The store's textbook reservation process now includes online ordering and three service counters where reservations can be accessed and fulfilled without waiting. The store is conveniently attached to the new parking garage with space for over 700 vehicles. Located at the heart of campus, the garage offers convenient hourly and permitted parking to faculty, staff, students, and visitors to the university. It offers greater convenience for those wishing to visit Barnes & Noble at LSU, The Club at LSU Union Square, the LSU Student Union, and many other facilities located in the center of campus. Learn more about the garage at lsu.edu/garage.

Seating 75 people and providing full audio visual facilities, the store's event room is a venue for meetings, tours, and other campus events with an LSU presentation at no rental cost to campus organizations.

Tiger Card Office

OFFICE 109 LSU Student Union

TELEPHONE 225-578-4300

FAX 225-578-4585

WEBSITE www.lsu.edu/tigercard

E-MAIL tigercard@lsu.edu

The *Tiger Card Office* provides the official LSU identification card, the pre-paid debit system TigerCASH, and voter registration services. New students are issued their first ID card at no cost. The ID card is the property of the university and must be retained for each subsequent term of enrollment. The card should be carried at all times and must be presented upon request of any university official. The card is non-transferable.

TigerCASH, a pre-paid debit system, provides a fast, safe, and convenient way to make purchases at various locations on and off campus. TigerCASH is accepted at all dining facilities as well as several merchants off campus. TigerCASH is the only way to copy and print documents on campus. It is accepted at vending machines and all laundry facilities. If your card is lost or stolen, a call to the Tiger Card Office will stop access to your account until you replace your card. With TigerCASH, there is no minimum deposit or semester fee and accounts roll over from semester to semester until the student graduates or resigns. As long as you have a positive balance in your TigerCASH account, you will enjoy convenient purchasing power both on and off campus. TigerCASH deposits may be made through the following options:

- Added as an additional service to the fee bill before completing registration
- Online at our website 24/7
- At our TigerCASH kiosk located in the Student Union and VTS machines located in Middleton library, Patrick F. Taylor Hall, and the Law Center library
- In the Tiger Card Office

Visit the Tiger Card Office website for a detailed listing of locations that accept TigerCASH at www.lsu.edu/tigercard.

More information is available at the Tiger Card Office, 109 LSU Student Union, or by calling 225-578-4300. By using TigerCASH, you are accepting the Terms of Agreement.

The Club at LSU Union Square

LOCATION Highland Road

TELEPHONE 225-578-2356

FAX 225-578-2244

The Club at LSU Union Square is a fine dining destination, adding an upscale element to the LSU campus and bringing evening activity to life not just for LSU but also for the Baton Rouge community.

Students can enjoy a casual lunch each weekday from 11:00 a.m. to 1:30 p.m. and dinner on Thursdays, Fridays, and Saturdays from 5:00 p.m. to 9:00 p.m. Private dining rooms may be reserved during regular club hours for groups of up to 45 guests. The Club is also available for special events outside of regular business hours. The Club at LSU Union Square accepts cash, Paw Points, TigerCASH, American Express, VISA, and MasterCard.

E-MAIL ricoh@lsu.edu

RICOH Mail & Printing Services at LSU is the university's commercial mail receiving agency. Mail service is provided to students and faculty members who are LSU box holders or who receive mail through university departments. Operating hours are Monday through Friday, 7:30 a.m. to 5:00 p.m.; Saturday, 10:00 a.m. to 2:00 p.m.

The university does not provide mail service to residence halls. Delivery service to the university-owned apartment complexes on Nicholson Drive and West Roosevelt Street is provided by the Main Post Office, 750 Florida Blvd., Baton Rouge, Louisiana 70802.

Packages intended for LSU box holders sent via FedEx and/or UPS should be addressed to the box holder's name and include the following:

Recipient's Name
LSU Box Number
110 LSU Union Square
Baton Rouge, LA 70803

LSU Child Care Center

OFFICE 4001 Gourrier Avenue
TELEPHONE 225-578-7882
FAX 225-578-7562
WEBSITE www.lsu.edu/childcare

The *LSU Child Care Center* has been accredited by the National Association for the Education of Young Children (NAEYC) and offers a high quality child care program to students, staff, and faculty. The center exceeds state and national standards that guide developmentally appropriate programs for young children.

Priority for eligibility is given according to the following guidelines:

- Children of full-time students, staff, and faculty of LSU
- Siblings of currently enrolled students
- Children of those individuals with secondary affiliations to LSU (i.e., part-time students, part-time staff, and adjunct faculty, LSU alumni, grandchildren of LSU students, staff, or faculty, individuals working for the LSU system)
- Children of the community, families who have no affiliation to LSU

Facility

The LSU Child Care Center is a 15,500 square foot one-story facility with separate spaces for 175 full-time children from different age groups ranging from six weeks old to five years old. The center includes 15 classrooms (based on Louis Torelli's pod design), parent and teacher resource center, multi-purpose room, kitchen, porches off of each classroom for play during rainy

weather, and three fenced playground areas (75 square feet per child) with toys and play equipment for infants, toddlers, and preschoolers.

Services

The philosophy of LSU Child Care Center is one of freedom to learn, grow, and make choices through both structured and unstructured activities. All activities are intentionally planned to help children grow and develop physically, socially, emotionally, and cognitively. The learning atmosphere is one of acceptance, mutual respect, pleasure, fairness, consistency, clear limits and expectations, and encouragement. The predictable, organized environment, with caring adults, clear expectations, and appropriate consequences is designed to support the whole child. Teachers are flexible and allow the children freedom to learn at their own pace.

Families are an integral part of the LSU Child Care Center program. Support, encouragement, and assistance are provided to ensure personal and professional success for parents. Communication with the child's family is established to share day-to-day happenings and gain new insights about the family's beliefs and concerns regarding the child's well-being.

Infant/Toddler Program

A complete developmental program for infant/toddlers provides caring and individualized human interaction through activities that promote language, movement, and self-awareness. Daily lesson plans are based on each individual child's needs.

Preschool Program

The preschool program provides learning activities through play, the child's natural path to learning. Daily lesson plans respond to the child's individual needs and provide activities to enhance a child's development in the four developmental domains: cognitive, socio-emotional, physical, and language. The center uses the standards and goals defined by the Louisiana Department of Education as measures for developmental and academic success.

University Recreation

OFFICE 102 Student Recreation Complex

TELEPHONE 225-578-8601

FAX 225-578-8489

WEBSITE www.lsu.edu/urec

E-MAIL urec@lsu.edu

The *Department of University Recreation* provides a variety of recreational activities to meet the diverse needs and interests of the university community. A multifaceted recreational program is offered that includes aquatics, informal recreation, fitness and wellness programs, intramural sports, adventure recreation, sport clubs, and special event activities.

University Recreation includes the following facilities:

- The *Student Recreation Complex (SRC)* is a 121,000 square foot facility located at the corner of South Campus Drive and Minnie Fisk Drive, that houses courts for racquetball, basketball, volleyball, and badminton, an indoor track, a climbing gym, equipment/bike rental, an inclusive weight/cardio/fitness room, and an indoor pool.
- The *University Recreation Fields at River Road*, which is located on the corner of Gourrier Lane and River Road, features eight multipurpose fields and four softball fields. All UREC sport club programs take place in this location.

- The *Adventure Course* is located across the street from the Student Recreation Center Complex on South Campus Drive and includes a high and low ropes course with a zip line and climbing tower.

University Recreation features programming and services in the following areas:

- The *fitness and wellness program* includes group exercise classes, personal training, and specialty courses. Group X classes provide cardiovascular, resistance training, and flexibility activities in a fun and motivating group setting. Many class formats are offered throughout each semester and range from beginning to advanced levels. All classes are led by certified group exercise instructors. The personal training program provides nationally certified personal trainers who will help individuals reshape their physique, increase strength, or lose weight with a customized program. Sessions are available for individual or pairs personal training and include fitness testing and evaluation. Specialty courses provide opportunities for individuals interested in learning new skills and participating in activities that will provide a lifetime of enjoyment. Taught by qualified instructors, classes are non-credit and include activities such as dance, fitness, and American Red Cross classes.
- The *sport program* includes intramural sports and club sports. Intramural sports offers team sports and individual events for men's, women's, co-rec, faculty/staff, and open divisions throughout the year. Some of these activities are flag football, basketball, softball, volleyball, racquetball, tennis, and dodgeball. Sport clubs provide opportunities for competitive, recreational, and social interaction through on- and off-campus competition. Some of the active clubs include rugby, soccer, equestrian, ultimate frisbee, lacrosse, hockey, rowing, tennis, and powerlifting.
- The *adventure education program* provides an opportunity for the university community to develop an understanding and appreciation for the outdoors. The program features a 24-foot portable climbing wall and an indoor climbing gym. Climbers of all levels will have the opportunity to hone their skills, as well as learn the basics of rock climbing. The program also features a challenge course, which provides facilitation of team building and leadership activities. Comprised of a low and high course, participants utilize their physical and emotional strengths to reach individual and group goals. Outdoor equipment rentals are also offered, including bikes, canoes, kayaks, tents, sleeping bags, and more. Students also have the opportunity to travel and experience outdoor adventure education through the trips program.
- Each year, UREC hosts a variety of *special events* which are designed to serve particular recreational interests and needs. Programs vary in structure and include organized events such as the Ghost Chase 3K Fun Run and homecoming tournaments.

For additional information, visit www.lsu.edu/urec or contact the Department of University Recreation at 578-8601 or urec@lsu.edu.

The Women's Center promotes the advancement of women's issues and gender equity through its services, advocacy efforts, and educational programs. Through its programmatic efforts, the center strives to connect women from all walks of life, to foster personal development, and to empower women in leadership.

Other Campus Support Functions

Athletic Department

OFFICE Athletic Administration Building

TELEPHONE 225-578-7997

FAX 225-578-2430

WEBSITE www.lsusports.net

Athletic facilities include *Tiger Stadium*, with a seating capacity of close to 100,000; four lighted full football practice fields; an indoor football practice facility; a lighted metric track; *Bernie Moore Stadium*, with a state-of-the-art Mondo surface and seating accommodations for 5,680; *Alex Box Stadium*, with seating for 10,200; and six lighted tennis courts with an elevated grandstand.

The *LSU Natatorium* provides an eight-lane Olympic-size indoor pool and diving well. The *Pete Maravich Assembly Center*, a multipurpose facility, seats 13,472 and is the home court for the men's and women's basketball teams, women's gymnastics, and women's volleyball as well as a practice facility for the men's and women's basketball teams. The recently renovated *Carl Maddox Field House* provides a 220-meter track facility; a gymnastics practice room; and a large, unobstructed, air-conditioned playing area for basketball, volleyball, indoor tennis, badminton, and other activities. It is available as a competitive indoor track facility and serves as a practice area for track. It is also used for teaching, organized recreational activity, and leisure-time activity for the university community.

Tiger Park, home to the LSU softball team, seats over 1,300 fans in the grandstand an additional 1,200 on the outfield berm, and the LSU Soccer Complex accommodates more than 1,500 fans.

LSU has hosted the NCAA Track and Field Championships four times, most recently in May 2002. The NCAA baseball regional tournament has been played 21 times and the Super Regional has been played seven times at Alex Box Stadium. In addition, the basketball NCAA Mideast Regionals, first/second rounds, and SEC tournaments have been played in the Maravich Assembly Center. LSU has also hosted numerous women's basketball NCAA tournaments, Gymnastic NCAA regional tournaments, men's and women's tennis NCAA regional tournaments, softball NCAA regional tournaments, and soccer NCAA regional tournaments.

Undergraduate Admissions

DAVID KURPIUS <i>Associate Vice Chancellor for Enrollment Management</i>	CHRISTINE DAY <i>Associate Director</i>
MANDY HOFFMAN <i>Associate Director</i>	GUADALUPE LAMADRID <i>Associate Director</i>
AMY PREJEAN <i>Associate Director</i>	
OFFICE OF ENROLLMENT MANAGEMENT: UNDERGRADUATE ADMISSIONS OFFICE: 1146 Pleasant Hall TELEPHONE: 225-578-1175 FAX: 225-578-4433 E-MAIL: admission@lsu.edu WEBSITE: www.lsu.edu	

LSU welcomes applications from all interested students without regard to race, creed, color, religion, sex, national origin, age, mental or physical disability, marital status, sexual orientation, or veteran's status. The university is committed to making fair and timely decisions on applications submitted.

The Office of Enrollment Management actively encourages the referral of prospective freshman and transfer students from alumni, LSU faculty and staff, high school counselors, and community contacts. The office makes available special contact forms for these referrals that provide record of personal contact with prospects.

Applications will be considered by evaluating prospective students' likelihood of success at LSU.

The university operates on a two-semester plan with an additional multi-session summer term and three multi-week intersessions that take place between the spring, summer, and fall semesters. Qualified applicants—except in the School of Social Work, the MBA program, and the College of Veterinary Medicine—may initiate their studies at the beginning of any semester or term.

For detailed information concerning admission to graduate and professional schools, see "The Graduate School" in this catalog.

Applying for Admission

Application information is routinely sent to students who have their scores on the SAT or ACT test sent to the university. LSU's code is 6373 for the SAT and 1590 for the ACT. The application for admission is found at www.lsu.edu.

All applicants are encouraged to apply well before the deadline dates and send transcripts of all college work attempted, if any, as soon as possible. An official transcript from the graduating high school listing coursework from grades 9-12 is required at the time of application and again after high school graduation. Louisiana high schools submit electronic transcripts to the State Department of Education, which LSU can access upon receiving a student's application for admission and again when final grades are issued. In the event that additional information is needed in order to process a student's application, the Office of Undergraduate Admissions reserves the right to request additional transcripts from students who have attended multiple schools.

A nonrefundable *application fee* of \$40 must accompany the application for admission or re-entry. This fee can be submitted using the online payment options or via check or U.S. money order drawn on a U.S. bank and showing the name of the applicant for whom payment is made. The university is not responsible for cash sent by mail. This service fee is used to help cover the cost of processing applications. It is neither refunded if admission is denied, nor is it applied against other costs when a student

subsequently enrolls. All former LSU students who have not been enrolled for one or more semesters must submit an application for re-entry.

The application for admission also serves as the application for all freshman scholarship programs and for the Honors College. The **priority deadline** for full consideration for LSU scholarships and for admission to the Honors College is **November 15**. All required information including an official high school transcript, official standardized test scores including at least one with essay (for Honors College admission) must be submitted by that date to ensure full consideration. Scholarship offers are made from December through March. For additional information on the Honors College application process, contact the college at 225-578-8831 or at honors@lsu.edu.

Arrangements for admission, financial aid, and housing are made separately through the Offices of Undergraduate Admissions & Financial Aid and Scholarships and the Office of Residential Life, respectively. Students applying for on-campus housing must first be accepted to LSU. Once students have been accepted, they may apply online for on-campus housing at www.lsu.edu/housing. *Filing an application for admission does not entitle an applicant to university housing or financial aid; nor is the filing of a housing application, the assignment to a room, or the award of financial aid a commitment of admission to the university.* For further information, see "Student Life" and "Financial Aid and Scholarships" in this catalog.

Application deadlines:

- **April 15** for fall semester.
- **December 1** for the spring semester (October 1 for persons requiring an I-20).
- **April 15** for the summer term.
- **July 1** for all applicants (final date to submit all credentials).

Applications submitted after the published deadline are considered on an appeal basis only and must be accompanied by a \$55 nonrefundable fee (\$40 application fee and \$15 late fee). Approval of these appeals is not guaranteed.

Enrollment Deposit

LSU requires all admitted, first-time freshman students to indicate their intent to enroll by paying a \$250 deposit. Students intending to enroll for summer or fall semesters must pay the deposit no later than May 1.

Immunization Policy

All students enrolling for the first time at LSU or after an absence of one semester or more must furnish proof of immunization for (or immunity to) measles, meningitis, mumps, rubella, tetanus, diphtheria, and tuberculosis screening *prior to enrollment at the university*. The required proof should be submitted to LSU Student Health Center, Baton Rouge, Louisiana 70803.

Certification of Selective Service Compliance

All persons who are required to register for the federal draft under the federal Military Selective Service Act shall be required to certify on their application for admission that they have registered with the Selective Service. Questions regarding compliance should be directed to the Office of Enrollment Management: Undergraduate Admissions, Pleasant Hall, Baton Rouge, Louisiana 70803.

Residency

Eligibility for classification as a Louisiana resident is determined by the Office of Enrollment Management: Undergraduate Admissions in accordance with LSU System regulations and is based on evidence provided on the application for admission and related documents. Regulations relate primarily to location of the home and place of employment. A resident student is defined as one who has abandoned all prior domiciles and has been domiciled in the state of Louisiana continuously for non-educational

purposes for at least one full year (365 days) immediately preceding the first day of classes of the term for which classification as a resident is sought.

An individual's physical presence within this state for one year must be associated with substantial evidence that such presence was with the intent to maintain a Louisiana domicile. Physical presence within the state solely for educational purposes without substantial evidence of the intent to remain in Louisiana will not be sufficient for classification as a resident, regardless of the length of time within the state.

Factors considered in establishing residency, although not necessarily conclusive, include financial independence from parents residing in another state or country, reliance on Louisiana resources for financial support, continuous presence in Louisiana during periods when not enrolled as a student, commitments indicating an intent to stay in Louisiana permanently, paying Louisiana income taxes as a resident during the past tax year, and the absence of these indicia in other states during any period for which domicile in Louisiana is asserted.

Special provisions have been made for adults moving to Louisiana for employment purposes, military personnel stationed in Louisiana, veterans, and international students with immigrant visas. An international student on a student visa is classified as a nonresident.

Resident classification and all fees are audited and adjusted, if necessary, after each registration. Appropriate credits or charges are then made to the student's account. For additional information concerning the establishment of residency, contact the Office of Enrollment Management: Undergraduate Admissions. Continuing students must contact the Office of the University Registrar for establishment of residency.

Educational Requirements and Admission Policy

Admission Standards

Anyone who wishes to be considered for undergraduate admission to LSU is encouraged to apply.

Admission is based on a review of the high school record and official standardized test scores. The minimum requirements for assured admission are 3.0 Core GPA* on the 19 units of college-preparatory high school courses** as outlined in the LSU Core and a 1030 SAT (Critical Reading and Math)/22 Composite ACT †. Students must be eligible to enroll in university-level English and mathematics courses, as evidenced by a minimum SAT Critical Reading Score of 450 (ACT English subscore of 18) and a minimum SAT Math score of 460 (ACT Math subscore of 19). Preference for admission to LSU will be given to those students whose credentials indicate the greatest promise of academic success and the greatest potential for contributing to the diverse missions of the university.

Applications will be reviewed against the following basic criteria:

Units**	Academic Score GPA*	SAT or ACT †
19	3.00	1030 or 22

**The GPA is calculated solely on the 19 core units for admission to LSU.*

***High school units required for admission are listed in the table below.*

†An applicant's standardized test scores will be verified in cases where there is an increase of six or more points on the ACT or an increase of 220 or more points on the SAT.

Students who do not meet the admissions standards outlined above should submit supporting documentation and a letter outlining their qualifications for admission with their initial application. The Admissions Committee will review qualifications and application packages to determine whether additional predictors of success exist as a basis for admission. Other factors, such as choice of degree program, rank in class, scores on required tests (SAT or ACT), credit in advanced placement and honors courses, pattern and quality of courses, grade trends, educational objectives, extracurricular activities, and school

recommendations will be considered in the admission process. In addition, special talents, significant life and career experience, or membership in groups underrepresented in the student body will be evaluated and weighed before decisions to offer admission are made.

Other Considerations

Applicants who meet the educational requirements listed in this catalog will be considered for admission. Admission will be denied if requirements listed in this catalog are not met. Admission is not automatically granted when these requirements are met; it may be denied if other factors, in the judgment of university officials, merit denial. Issues such as limited enrollment in certain curricula, timeliness of application, unavailability of certain programs, and other relevant factors may be considered. Furthermore, the university may deny admission, readmission, or continued enrollment to persons whose behavior is disruptive, dangerous, or abusive.

Students may appeal admission decisions to the Faculty Undergraduate Admissions Committee. The purpose of the Admissions Committee review is to evaluate the qualifications of each applicant to determine whether equivalent predictors of success exist and whether to admit the student on this basis.

Table of High School Units Required for Admission to LSU

High School Courses (No. of Units)
English (4) English I (1) English III (1) English II (1) English IV (1)
Math (4) Algebra I/Algebra I-Part 2 (1) Algebra II (1) Geometry (1) Advanced Math-Functions & Statistics, Advanced Math-Trigonometry, Advanced Math I or II, Pre-Calculus, Calculus, Probability & Statistics, or Discrete Math (1)
Natural Sciences (4) Biology (1) Chemistry (1) Physics (recommended), Integrated Science, Aerospace Science, Anatomy & Physiology, Earth Science, Environmental Science, Physical Science, Physics II, Physics of Technology I, Biology II, Chemistry II, or Physics of Technology II (2) <i>*LSU will accept two units of Agriscience for one unit of Natural Science</i>
Social Sciences (4) U.S. History (1) World History, World Geography, Western Civilization, AP European History (1) Civics or AP Government (1) or Civics (1/2) + Free Enterprise (1/2) World History, World Geography, Western Civilization, AP European History, Civics (2 nd sem., 1/2 unit), Law Studies,

Psychology, Sociology, African American Studies, or Religious Studies (1)

Foreign Language (2)

Two units in a single language

Fine Arts (1)

Fine arts survey or any 2 units from the following: performance course in Music, Dance, or Theatre or Studio Art or Visual Art
--

(1)

Direct Admission into Senior College

Three senior colleges at LSU currently have provisions for applicant screening and admission before beginning study at LSU: Agriculture, Art & Design, and Music & Dramatic Arts. Refer to sections dedicated to the individual college for detailed information on the process for admission to the college or degree program.

Student-Athletes

A freshman who is awarded an athletic grant-in-aid may be admitted if he/she meets the standards found in Bylaw 14.3.1 of the National Collegiate Athletic Association (NCAA). A student-athlete at LSU will be subject to a number of special academic requirements, which are specified in the rules of the Southeastern Conference (SEC) and the NCAA. Student-athletes may also be considered for admission at any time prior to the start of the next academic term.

Home Schooled, GED, Unaccredited or Unapproved High Schools

Individuals applying for admission to LSU after completing home-schooling, receiving GEDs, or graduating from unaccredited or unapproved high schools will be evaluated on the basis of qualifications outlined above.

Early Admission and Dual Enrollment

The *Early Admission Program* permits high school students who have not completed all requirements for a high school diploma to apply for admission to LSU as regular students, provided they fulfill these minimum requirements: 15 units of high school credit, including three units of English; an overall academic average of 3.00 ("B"); and a composite score of 28 ACT/1250 SAT. A limited number of students are selected from those who meet these requirements. Among the considerations in selection are maturity, rank in class, grades, recommendation of the high school principal and others, and additional evidence of scholarly achievement.

The university has a *Dual Enrollment Program* especially designed for high school students who demonstrate the maturity and scholastic ability to be successful in college work. Participation in this program permits exceptional high school seniors to enroll in one or more courses at LSU when space, faculty, and other facilities are available. Students must have a GPA of 3.00 ("B"), a composite score of 27 ACT/1210 SAT, and be recommended by the high school principal or counselor for enrollment in a specific course or courses.

Students applying for dual enrollment study must have completed the most advanced courses offered by their school in the academic areas in which they wish to enroll, or must be considered qualified for the college course by the principal or counselor. Continued dual enrollment requires renewed approval each semester.

Dual enrollment students are eligible for honors activities and are encouraged to visit the Honors College office. The University College Center for Freshman Year staff are available for advice or information, whether or not the student intends to enroll at LSU as a degree-seeking student.

Campus Tours

Campus tours are offered at 10 a.m. and 1 p.m., Monday-Friday, excluding university holidays, in the Memorial Tower. Tour sessions begin with an overview of the campus, descriptions of programs of study, admission requirements, and information about student aid and scholarships. Special Saturday tours are conducted in the fall and spring semesters. To make a tour reservation, prospective students, parents, or groups are encouraged to contact the Tours Office at 225-578-6908.

Freshman Orientation and Registration

Freshman applicants who intend to enroll in the fall must apply by April 15, have SAT or ACT scores on file, and participate in a freshman orientation and registration program. This program includes testing for placement or advanced standing and the opportunity to meet with an advisor to select courses for the coming semester. Program announcements are sent to high schools and to newly admitted students. The deadline for registration in all orientation programs is May 1.

Admission to a Senior College

Refer to sections dedicated to the individual colleges or schools for details on requirements for admission to a senior college and/or to a degree program.

Transfer Students

Students with previous college or university work from regionally accredited institutions may be considered for admission if they have an overall 2.50 GPA or better on all college work attempted, including a college-level course in English and in mathematics (above remedial). Transfer applicants who have earned fewer than 30 hours of college-level work (above remedial) must also meet the requirements for freshman admission.

LSU computes the GPA on all courses taken, including repeated courses, courses with incomplete grades, and those with any other grades, except "W," "WA," "WB," "WC," "WD," "WF," "unsatisfactory," and "no credit." Each computed grade becomes an "A," "B," "C," "D," or "F." The symbols "+" or "-" are disregarded. Grade point averages will be computed using the lower grade given by institutions that issue upper/lower grades ("AB," "BC," etc.). Grades of "pass," "credit," and "satisfactory" will be treated alike and will be counted as earned hours, but not in the computation of the GPA. "Fail" will count as hours attempted, but not as hours earned, and will be used to compute the GPA, including any remedial course work. This policy is followed, regardless of the practices of the sending institution, including other LSU System campuses.

All students will be considered for admission based on an evaluation of their likelihood of success at LSU. LSU will consider college GPA, pattern and quality of courses taken, grade trends, educational objectives, special talents, significant life and career experiences, membership in groups under represented in the student body, or special circumstances.

A prospective transfer student should submit an admission application and a complete official transcript from each college or university attended, whether or not credit was earned or is desired. Students enrolled in college at the time applications are submitted should have transcripts sent when they apply for admission, to be followed by supplementary records at the close of the semester.

Provisional admission, pending receipt of supplementary records, may be granted when it is impossible to obtain final records prior to scheduled registration dates. This admission will be canceled if the required records are not received by the Office of Enrollment Management within 30 days of the first day of classes or if it is determined, upon receipt and review of final records, that the applicant is not qualified for admission.

A transfer student who is awarded an athletic grant-in-aid may be admitted if he/she meets the standards found in Bylaw 14.5 of the National Collegiate Athletic Association (NCAA). A student athlete at LSU will be subject to a number of special academic requirements specified in the rules of the Southeastern Conference (SEC) and the NCAA.

Transfer Student Orientation and Registration

Transfer students are required to participate in the Transfer Student Orientation program. This program provides information about student services and resources at LSU and the credit evaluation process. Students meet with an advisor, obtain an ID card and a myLSU account, and schedule classes. Announcements regarding the program are sent to applicants.

Re-entering Students

Re-entering students who have not enrolled in the university for one or more regular semesters must apply for readmission. Students who have attempted 29 or fewer semester hours at other accredited colleges or universities since last attending LSU must meet the senior college scholastic requirements for re-entry; or may be placed on scholastic probation or warning upon re-entry. Students who have attempted 30 or more semester hours at other accredited colleges or universities since last attending LSU must have a GPA of at least 2.50 on all college work attempted including a college-level course in English and in mathematics above the remedial level. Students must submit an application and a complete official transcript from each college or university attended since leaving LSU, regardless of whether credit was earned, desired, or transferable.

Re-entry students who do not meet the stated criteria can appeal to be re-admitted if they do not meet the admissions requirements outright or if there are extenuating circumstances that impacted their academic performance.

Acceptance of Credit from Other Collegiate Institutions

The Office of Enrollment Management evaluates credit from other institutions after the student's complete application and all official transcripts from each college and university attended have been received. Credit earned in colleges and universities accredited by regional accrediting associations is generally accepted; however, courses taken at the lower (1000-2000) level cannot be given upper (3000-4000) level credit. *Credit allowed by the Office of Enrollment Management for transfer is, in all cases, subject to review by the student's senior college with regard to its applicability toward a particular degree.*

For schools not regionally accredited, the university is guided in its decision regarding acceptance of credit by recommendations of selected institutions in the states in which the schools are located. Applicants who are admitted are given an opportunity, usually through advanced-standing examinations, to validate some or all of the credit. Each student's record from a non-accredited college will be considered on the basis of individual merit.

Students who are placed on probation or made ineligible to continue at the institution where they were previously enrolled, based on grades earned in course work recorded on transcripts received after registration, will have the appropriate academic action applied immediately.

Questions relating to the evaluation of credit should be referred to the Office of Enrollment Management: Undergraduate Admissions. Questions relating to the acceptance of credit toward a degree program and the length of time required for completion of degree requirements should be referred to the appropriate senior college or school. For further information, see "Undergraduate Degree Requirements and Regulations."

Additionally, the Tiger Transfer Tables on the LSU Transfer website are an online resource where previously evaluated coursework from many institutions are listed. This resource contains both in-state and out-of-state listings of course evaluations.

International Applicants

International admission requirements are applied to all students who have international secondary or post-secondary educational credentials, regardless of country of citizenship, immigrant status, or visa status. All students who have *only* U.S. secondary and

post-secondary educational credentials must meet U.S. admission requirements as detailed in previous sections. Applications from students with both U.S. and international educational credentials may be reviewed according to either or both U.S. and international requirements.

Any transcript or documentation issued in a language other than English must be sent with an official English translation. The Office of Undergraduate Admissions within the Office of Enrollment Management is solely responsible for evaluating and determining the equivalencies of international credentials and grading scales.

English Proficiency Requirement

An applicant whose native language is not English and/or who has been educated outside of the U.S. in a country or province where English is not the only official language must demonstrate proof of English proficiency by submitting either a TOEFL, IELTS, or PTE score.

On the TOEFL (Test of English as a Foreign Language), the following minimum scores are required for automatic admission:

- 550 (paper-based exam)
- 79 (Internet-based exam)

Information regarding TOEFL may be obtained by visiting the official website at www.toefl.org.

On the IELTS (International English Language Testing Service), the following minimum score is required for automatic admission:

- 6.5

Information about IELTS may be found at www.ielts.org.

On the PTE (Pearson's Test of English), the following minimum score is required for automatic admission:

- 59

Information about the PTE may be found at www.pearsonpte.com.

Official TOEFL/IELTS/PTE scores are those reported directly to LSU by the respective testing service at the request of the student.

Applicants may be exempt from the TOEFL/IELTS/PTE requirement if they have completed one of the following:

- a U.S. high school diploma earned, having attended all four years of high school in the U.S.;
- a bachelor's degree earned from an accredited U.S. institution;
- a score of 480 on the English/Critical Reading section of the SAT; or 20 on the English Section of the ACT;
- U.S. transfer requirements (minimum 2.50 overall GPA on 30 or more semester hours above remedial level, including a college-level course in English and in mathematics, or two consecutive English courses, from a regionally accredited U.S. college or university)

Official transcripts or scores are required showing completion of one of the above before a student can be exempted from the TOEFL/IELTS/PTE requirement. The Office of Enrollment Management: Undergraduate Admissions reserves the right to require a satisfactory TOEFL/IELTS/PTE score from any applicant. All international students who are admitted (except for transfer students who have submitted a satisfactory TOEFL/IELTS/PTE score and have received transfer credit from an accredited U.S. institution for the equivalent of LSU's English ENGL 1001 and ENGL 2000 or ENGL 1004 and ENGL 1005 with a grade of "C" or better in each) will be required to take an English placement test prior to registration.

First-Time Students

International students who have never attended a post-secondary education institution will apply as freshmen (first-year students), and must have the equivalent of a U.S. high school diploma with an academic average equivalent to "B" (3.0 or better on the U.S.

4-point grading system). The "academic average" is determined by averaging the grades of secondary school academic courses, excluding nonacademic courses such as physical education, vocational/technical courses, religion, art, music, etc.

Students must submit complete official records for the secondary level of education and are strongly encouraged to submit ACT or SAT scores. Students who have taken advanced-level exams, international baccalaureate higher level exams, or other types of secondary education beyond the 12th year of schooling should submit the official certificates or transcripts and course syllabi for possible advanced placement university credit.

International Transfer Students

From International Institutions

International students who have attended any post-secondary level college, university, or institution must apply as transfer students. LSU requires the equivalent of a 3.0 ("B" average on the U.S. 4-point grading system) for all transferable credit from accredited international institutions. Applicants with less than the equivalent of 30 semester hours of transferable credit (approximately one year of full-time study) must also qualify for freshman admission.

Students must submit official transcripts from each post-secondary institution attended, listing courses taken and grades earned. Also required are the official course descriptions or syllabi to be evaluated for possible credit toward an LSU degree. Transfer credit is not given for English as a second language, non-English native language courses, or vocational/technical courses. For LSU to award transfer credit, the institution must be accredited/recognized by the Ministry of Education or equivalent government agency in that country, and be suitable for university-level credit.

From U.S. Institutions

International students who have attended a regionally accredited U.S. college or university must meet U.S. transfer requirements: an overall GPA of at least 2.50 and 30 semester hours of transferable credit, including college-level courses in both English and mathematics. Refer to the section on "Transfer Students." If less than 30 hours are earned, freshman requirements must also be met.

From Both International & U.S. Institutions

If credit is earned from both international and U.S. post-secondary accredited institutions, a 3.0 GPA is required from international institutions, and a 2.5 GPA is required on all U.S. college work. Refer to the sections above. Students who have less than a 3.0 GPA from international institutions may be admitted if: (1) they meet the requirements for transfer from a U.S. accredited college or university (30 semester hours of credit above remedial, 2.50 GPA, math and English courses), *and* (2) have an overall GPA of 2.50 or higher when the U.S. GPA is combined with the international GPA. In this case, courses passed with the equivalent of "C" or higher will be considered for transfer credit from accredited post-secondary international institutions.

Application Procedure

Application deadlines for international students are **April 15** for summer or fall semesters and **October 1** for the spring semester. However, all required documents should be sent at least 120 days before the semester starts to allow for processing time, especially if an I-20 immigration form is needed for the student visa application. Processing time may be extensive for some applications.

The application form should be completed online at www.lsu.edu. The \$40 application fee can be submitted online by credit card, or mailed to the office by check or money order drawn on a U.S. bank. The following materials must be sent to the Office of Enrollment Management: Undergraduate Admissions, Pleasant Hall, Louisiana State University, Baton Rouge, LA 70803:

- complete, official academic records;

- official TOEFL/IELTS/PTE scores; and
- evidence of financial support.

"Official transcript" is defined as an official record prepared by the issuing institution and sealed in the institution's official envelope.

Expenses

International applicants are required to offer proof of the availability of sufficient funds to meet all costs while studying at the university. Total expenses, excluding travel to and from Baton Rouge, for the calendar year (12 months) for undergraduate students who are not residents of Louisiana can be found at www.lsu.edu/iso (prospective students). International students residing in Louisiana cannot be considered Louisiana residents unless they are permanent residents of the U.S., among other criteria.

All fees and costs are subject to change.

Other Enrollment Opportunities

Distance Program

Admission to college-level distance program courses at LSU does not constitute admission to a degree program at the university. However, students may enroll for distance program courses prior to being admitted to the university.

Credit earned in distance program courses may be submitted for evaluation toward an undergraduate degree at LSU or may be transferred to another institution. Students not enrolled at LSU who plan to apply distance program credit toward an LSU degree should submit an official "Application for Admission" form (available from the Office of Enrollment Management: Undergraduate Admissions). In addition to the application form, students should submit official transcripts of all previous academic work.

Admission to distance program courses will be granted to enrolled LSU undergraduate students upon approval of their college deans, which must be indicated on the distance program application form. Students who have been dropped from the university for scholastic, disciplinary, or attendance reasons may be admitted to distance program courses on a noncredit basis only.

A distance program course grade will be posted to the transcript when the course is completed. If a student takes the examination by the last day of the final examination period of a semester/summer term, the grade will be posted to that semester/term. The grade will be used to determine academic action at the conclusion of that semester or summer term. If the examination is taken after that date, the distance program grade will be posted to the next regular semester or summer term. Distance program grades will not be posted to intersession.

Students who become ineligible while a distance program course is in progress may complete the course for degree credit. During their period of ineligibility to enroll, students may register on a noncredit basis for distance program courses.

No more than one-fourth of the number of hours required for the bachelor's degree may be taken through Continuing Education by distance program courses. Specific information regarding acceptance of distance program courses toward fulfillment of degree requirements is provided in college and school sections of this catalog. Before scheduling distance program courses, LSU students must obtain approval from their academic deans.

Visiting Students

Students enrolled in another accredited college or university who are eligible to continue in that institution in the next regular term and who are not on scholastic warning or probation (who are in academic and institutional good-standing) may be admitted as visiting students for one semester or summer term only. These students must submit official transcripts of all college work previously taken. This statement must include the total number of semester or quarter hours of credit previously earned.

Students admitted on a visiting student basis who wish to be considered for regular admission must complete a new application for admission and must supply official transcripts of all college work previously taken. These students will be evaluated on the admission standards in place for transfer students at the time of their application for regular admission. Some senior colleges have admissions criteria exceeding those for general admission to the university. Prospective students should consult individual senior colleges for information on additional requirements for specific degree programs. Visiting students who gain admission to the university as regularly admitted students are subject to the requirements of the catalog in effect at the time of their admission as regular students.

International students are not eligible for this program except for the summer term and, in addition, are required to submit a TOEFL/IELTS/PTE score that meets admission requirements.

LSU/Baton Rouge Community College Bears to Tigers Programs

The Bears to Tigers Programs are collaborative agreements between BRCC and LSU to provide opportunities for the seamless transfer of BRCC students to LSU upon completion of any one of the following: Tiger Bridge Programs, Bears 2 Tigers Transfer Program, the Louisiana Transfer Degree Program, or Articulated Departmental Agreements. Please refer to www.lsu.edu for more information.

LSU/Baton Rouge Community College Cross-Enrollment Program

LSU and Baton Rouge Community College (BRCC) students may take courses at the other institution through a cross-enrollment program between the two institutions. This program enables students to take courses not available at the institution where they matriculate. Both full-time and part-time students are eligible to participate. Unless special course fees are assessed, full-time students pay no additional fees. Part-time students pay tuition and fees based on the total number of hours for which they are registered and any special course fees.

Participants are allowed the same library privileges granted to the student body at the home institution. Students participating in the cross-enrollment program have access to the library at the other institution.

Before enrolling, a student must obtain written approval from the dean of his/her college. Courses taken at BRCC that are approved for college work at LSU are recorded as transfer credit. Interested students can obtain information from the Office of the University Registrar at LSU, the Registrar's Office at Baton Rouge Community College, and the offices of academic deans at either institution. Students should consult the *Registration Schedule of Classes* for additional details.

Louisiana Transfer Degree

The Louisiana Transfer Associate Degree Program was developed in 2009 to ensure that students completing the 60-hour AALT (Associate of Arts) or ASLT (Associate of Science) can transfer from any state community college to any of the state's four-year universities without losing credit. Graduates with the Louisiana Transfer Associate Degree must still meet any program or college-specific admission or degree requirements for admission to LSU. For additional information, please visit our website at <http://latransferdegree.org/>

Academic Common Market

Louisiana participates with 13 other southern states in the Academic Common Market, an interstate agreement for sharing uncommon programs. Residents of these states who are accepted for admission into selected out-of-state programs can enroll on an in-state tuition basis.

To enroll as Academic Common Market students, applicants must be accepted for admission into a program to which their state has made arrangements to send its students and obtain certification of residency from the Common Market Coordinator in their home state. Applications for admission should be made directly to the institution offering the program. Additional information

about the Academic Common Market and programs available at in-state tuition rates for residents of Louisiana can be obtained from the Office of the University Registrar.

Academic Bankruptcy

Under specified conditions, undergraduate students who have interrupted their college careers for a period of at least five consecutive calendar years may, at the time of application for admission to the university, declare academic bankruptcy. (See "Regulations" in this catalog.)

Credit and Placement Program

Departmental Advanced-Standing Exam

All new freshman students entering LSU may take departmental advanced-standing examinations. Appropriate course placement and academic credit earned are determined by the students' scores. These examinations are administered at no additional charge to participants in the Spring Invitational Program, Freshman Orientation, or Special International Student Testing programs, provided the students complete the tests by the final date to add courses for credit during their first term of enrollment at LSU.

Credit earned through placement tests and advanced-standing examinations taken while students are not enrolled in the university (all LSU System campuses) will be awarded in the next semester for which they are enrolled for resident credit, provided they register at LSU within two years.

SAT—Scholastic Assessment Test and ACT (formerly the American College Test)

- SAT and/or ACT scores are used in granting advanced-standing credit in freshman English and mathematics placement. LSU does not award credit for SAT subject tests

SAT/ACT Scores

Only scores sent directly to the university from the SAT or ACT Testing Centers are considered official. It is essential that we have your Scholastic Aptitude Test (SAT) or American College Test (ACT) on file to enroll you in the proper freshman English and math classes. LSU will use the best math and English ACT scores to award credit, and the best composite score for admission purposes. For all English placement, if you have taken either of these tests more than once, we strongly recommend that you have all of the scores sent to LSU since we will use the best English ACT score and the best composite score to award credit, and your best scores may be on more than one test.

If you indicated that you wanted your scores sent to LSU when you took the SAT or ACT exam, then your official scores are on file at LSU. If you did not have the testing center send your scores directly to LSU, request that your official scores be sent immediately. To request your scores be sent:

	SAT	ACT
Telephone:	609-771-7600	319-337-1313
LSU Code:	6373	1590
Website:	collegeboard.com	act.org

Math Placement

- The quantitative score on the SAT (QSAT) or the math ACT (MACT) is used for placement into MATH 1021 College Algebra (3), MATH 1022 Plane Trigonometry (3), MATH 1023 College Algebra and Trigonometry (5), MATH 1029 Introduction to Contemporary Mathematics (3), MATH 1100 The Nature of Mathematics (3), and MATH 1431 Calculus with Business and Economic Applications (3). These scores can also grant credit for MATH 1021. See the MACT/QSAT placement and credit chart below for details.

Placement into MATH 1021, 1022, 1023, 1029, 1100, and 1431 by MACT or QSAT Scores			
MACT Score	QSAT Score	Course Credited	Placement
25 or higher	570 or higher	MATH 1021*	MATH 1022, MATH 1029, MATH 1100, or MATH 1431
23-24	540-569		MATH 1021, MATH 1023, MATH 1029, or MATH 1100
20-22	480-539		MATH 1021, MATH 1029, or MATH 1100
19	455-479		Off-campus intermediate algebra or MATH 1029 or MATH 1100
*The MACT or QSAT score must be no more than 24 months old on the student's first day of classes at LSU in order for the student to receive credit in MATH 1021 based on the MACT or QSAT score. Credit in MATH 1021 is a prerequisite for registration in MATH 1022 and MATH 1431.			

- Students can improve upon their placement into MATH 1021, MATH 1022, MATH 1023, MATH 1029, MATH 1100, or MATH 1431 indicated by the above MACT/QSAT score, by taking the LSU Math Credit Exam for MATH 1021 College Algebra (3) or MATH 1022 Plane Trigonometry (3). See the table below for details.

A student's appropriate scores on the LSU Department of Mathematics' algebra and trigonometry placement/credit tests can result in placement in a higher-level math course than the MACT or QSAT placement but cannot result in placement lower than the MACT or QSAT placement. Low scores on the LSU Math Placement Tests cannot nullify any credits that a student has earned from other exams.

- ALEKS (Assessment and Learning in Knowledge Spaces) Calculus Readiness Exam and Learning Module for entry into MATH 1550/MATH 1551*

An appropriate score on the ALEKS Calculus Readiness Exam and its associated "learning module," is the one and only prerequisite to MATH 1550 Analytic Geometry and Calculus I (5) and MATH 1551 HONORS: Analytic Geometry and Calculus I (5).

For an ALEKS score to qualify for admitting a student into MATH 1550 or MATH 1551, the ALEKS exam must have been taken through the website of the LSU Department of Mathematics; www.math.lsu.edu.

A student's final ALEKS score must be no more than six months old on the first day of classes in MATH 1550 or MATH 1551. See www.math.lsu.edu for exact dates of achieving an acceptable ALEKS score for each semester as well as appropriate scores for each of these courses.

Students whose majors require MATH 1550 are advised to take it early in their undergraduate careers. Entering students planning on a fall enrollment may complete ALEKS as early as March (in time for freshman or transfer orientation) but not prior to completing (or almost completing) their prerequisite courses on geometry, algebra, and trigonometry.

Credit for (as opposed to placement into) MATH 1550 may be earned via the AP, CLEP, or IB programs (described

below), via the LSU MATH 1550 Credit Exam or via transfer credit from another college. No ALEKS score is required for such credit.

- The AP program can grant credit in MATH 1431, MATH 1550, or MATH 1552 Analytic Geometry and Calculus II (4).

Scores on the CLEP exams can grant credit in MATH 1021, MATH 1022, and MATH 1550.

The IB program can grant credit in MATH 1021, MATH 1431, and MATH 1550.

- Retroactive Credit for MATH 1021 and MATH 1022

A student receiving a grade of "C" or better in MATH 1431, MATH 1550, or MATH 1551 will receive retroactive credit for MATH 1021.

A student receiving a grade of "C" or better in MATH 1552, MATH 1553, or MATH 1554 will receive retroactive credit in MATH 1022.

- MATH 1023

MATH 1023 is recommended only for students who plan to take MATH 1550 or MATH 1551, MATH 1023 is a five-hour course, and this course alone does not fulfill the six-hour General Education Analytical Reasoning requirement. A student may not earn credit in both MATH 1021 and MATH 1023, or in MATH 1022 and MATH 1023, since the MATH 1023 course duplicates the content in both MATH 1021 and MATH 1022.

- MATH 1029 and MATH 1100

MATH 1029 and MATH 1100 are intended primarily for liberal arts and some social sciences majors.

- MATH 1431

MATH 1431 does not require knowledge of trigonometry. By contrast, MATH 1550 and MATH 1551 do.

- MACT score below 20

Students who have a score of 18 or lower on the MACT are generally not admitted to LSU. Students with a score of 19 may be admitted to LSU but are generally not placed into MATH 1021. Instead, they may take the remedial course, MATH 0092 (preparation for College Mathematics II). MATH 0092 is no longer offered at LSU. Students needing remedial algebra must either take MATH 0092 at Baton Rouge Community College, Southern University, or LSU's Independent and Distance Learning (IDL). Alternatively, they may sign a Math Waiver (obtained from UCFY) to take MATH 1021 regardless of the warning that success therein is unlikely. A student with an MACT of 19 can be successful in MATH 1021 but only if the student has a very strong work ethic and invests considerably more than the minimum required time in the 1021 Math Lab.

Placement into and Credit for MATH 1021, 1022, 1029, 1100, and 1431 by LSU Algebra & Trigonometry Test Scores

Algebra	Trigonometry	Courses Credited	Placement
---------	--------------	------------------	-----------

16	13	MATH 1021 and MATH 1022	MATH 1431, MATH 1100, or MATH 1029
16	0	MATH 1021	MATH 1431, MATH 1022, MATH 1100, or MATH 1029
13	0		MATH 1023, MATH 1021, MATH 1100, or MATH 1029
6	0		MATH 1021, MATH 1100, or MATH 1029
~	0		Off-campus Intermediate Algebra or MATH 1029 or MATH 1100

English Placement

Your SAT or ACT score will determine your initial placement in either ENGL 1001 or ENGL 2000 or will grant you an exemption from the first-year writing requirement. If you have taken either of these tests more than once, we strongly recommend that you have all of the scores sent to LSU since we will use the best English ACT score and the best composite score to award credit, and your best scores may be on more than one test

The chart below illustrates initial English placement.

English Placement by ACT or SAT Scores				
ACT English Score	ACT English Score + Composite*	SAT Critical Reading Score	Course Credited	Placement
32 or higher	65 minimum (or 5 on the part of the CEEB exam)	720 or higher	ENGL 1001, ENGL 2000	Exempt from English Composition
26 or higher	53 minimum	590-719	ENGL 1001	ENGL 2000 to be taken sophomore year
18 or higher	38 minimum	450-589		ENGL 1001

* For example, if you have an English ACT score of 20 and a composite ACT score of 21, you will be placed in ENGL 1001

AP, CLEP, and IB Programs

AP—*The Advanced-Placement Program of the College Board* • About one-fourth of American secondary schools currently participate in the Advanced-Placement Program of the College Board. Each May, AP examinations are administered (by the College Board) to students who have participated in the program. Advanced-Placement credit will be granted in appropriate subjects to freshmen who earn a grade of 3, 4, or 5 on Advanced-Placement subject examinations, as specified in the chart provided. Departmental recommendations are subject to change. Contact the Office of Enrollment Management: Undergraduate Admissions for current recommendations.

For information about general program data and policies, contact either Advanced-Placement Program, The College Board, 45 Columbia Ave., New York, NY 10023-6917; or the Office of Enrollment Management: Undergraduate Admissions, 1146 Pleasant Hall, LSU, Baton Rouge, Louisiana 70803.

Students who earn AP Exam scores of 3 or above are generally considered to be qualified to receive college credit and/or placement into advanced courses due to the fact that their AP Exam scores are equivalent to a college course score of "middle C" or above. The awarding of credit and placement is determined by each department. The AP Exams are administered by the College Board.

[Click here to view the College Board Advanced-Placement Program for Entering Freshman.](#)

CLEP—Subject Examinations of the *College Level Examination Program* • Policies governing minimum required scores and the acceptance of credit are established by the appropriate academic departments. LSU allows credit on CLEP subject examinations in 20 areas. (Credit is not allowed for CLEP general examinations.) Departmental course credit recommendations for satisfactory scores on CLEP subject examinations are included in the table provided. Department recommendations are subject to change. Contact the Office of Enrollment Management: Undergraduate Admissions for current recommendations and information on general program data and policies.

The College-Level Examination Program® (CLEP) gives students the opportunity to receive college credit by earning qualifying scores in the subjects listed below. CLEP Exams are administered by the College Board.

[Click here to view the CLEP Examinations.](#)

IB—*International Baccalaureate* • A number of American and secondary schools abroad participate in the International Baccalaureate Diploma Program. This is a comprehensive two-year curriculum leading to examinations and a possible IB diploma if the requirements of the full program are satisfied.

Students are encouraged to submit their IB diploma record or examination results with their application to the university for evaluation. Advanced placement credit may be granted in appropriate subjects to freshmen who earn a grade of 4 or better on the IB higher level examinations. Credit is not allowed for IB subsidiary level examinations. Policies governing minimum required scores and the acceptance of credit of IB examinations are established by the National Council on the Evaluation of Foreign Credentials and by the appropriate academic departments. Current departmental recommendations may be obtained by contacting the Office of Enrollment Management: Undergraduate Admissions.

The International Baccalaureate® (IB) Diploma Programme is a challenging two-year curriculum, which leads to the awarding of college credit as listed below:

Financial Aid and Scholarships

AMY MARIX <i>Associate Director</i>	JESSICA ALFORD <i>Assistant Director</i>
SAADIA RIDGLE <i>Manager</i>	AIMEE THIBODEAUX <i>Assistant Director</i>
OFFICE OF ENROLLMENT MANAGEMENT: FINANCIAL AID AND SCHOLARSHIPS OFFICE: 1146 Pleasant Hall TELEPHONE: 225-578-3103 FAX: 225-578-6300 E-MAIL: financialaid@lsu.edu scholarships@lsu.edu WEBSITE: www.lsu.edu	

LSU awards scholarships in the form of cash awards, full tuition and nonresident fee exemptions, room and board, and employment opportunities to students who meet certain academic qualifications.

The scholarships listed for entering freshmen are awarded mainly on the basis of standardized test scores (ACT/SAT) and high school record.

In addition to the scholarship programs, the Office of Financial Aid and Scholarships administers a number of federally funded and state funded financial aid programs. The total amount of funding disbursed annually through these programs is approximately \$200 million.

LSU Scholarships Available to Entering Freshmen

Most awards listed below are valid for one year of undergraduate study. Each may be renewed annually as long as the recipient meets academic requirements. The maximum term of the award is four years or until the recipient receives an undergraduate degree, whichever occurs first.

Louisiana residents selected for the scholarships listed below will likely qualify for tuition assistance and cash stipends through the state's TOPS program. See the section titled "Louisiana's Tuition Opportunity Program for Students, (TOPS)."

Application Procedure

The LSU "Application for Undergraduate Admissions" is an automatic application for entering freshmen scholarships. The online application must be postmarked along with an official high school transcript, standardized test scores, and all other required information to the Office of Enrollment Management, Pleasant Hall, LSU, Baton Rouge, Louisiana 70803-2802. The priority date for full consideration for LSU's scholarship programs is **November 15**.

Notification of scholarship recipients normally begins in December. Students are considered based on a six-semester transcript once they have been admitted to the university. To be guaranteed consideration, standardized test scores must be received by **November 15**.

Entering Freshman Nonresident Scholarship Programs

University Scholarship Programs

Stamps Leadership Scholars

Criteria: Stamps Leadership Scholars will be chosen from the pool of students admitted from the LSU Honors College. Top candidates will be invited to compete for the Stamps Leadership Scholarships. To view LSU Honors College admission requirements, visit www.honors.lsu.edu.

Award: The Penelope W. and E. Roe Stamps IV Leadership Scholars Award program is the top scholarship opportunity available at LSU. Scholarship recipients will receive full cost of attendance for four years, as well as a potential \$14,000 for enrichment experiences.

Stamps Leadership Scholars will be directed to resources that will help cultivate each scholar's intellectual distinction, initiative, and commitment to service, leadership, global knowledge, and career exploration. For more information on the Stamps Family Charitable Foundation, visit www.stampsfoundation.org.

Chancellor's Alumni Scholars

Criteria: The top 10 entering freshmen (including both residents and nonresidents) will be awarded this scholarship. To be considered, a student must have a minimum ACT of 33 or critical reading and math SAT of 1440 with a computed, six-semester high school GPA of at least a 3.0. To be considered for this award, a student must have an official ACT or SAT writing score on file with LSU and meet the November 15 priority consideration deadline.

Award: Nonresident students receive \$2,000 per year, tuition exemption, nonresident fee exemption, on-campus room and board scholarship, a one-time \$2,000 study abroad stipend and the opportunity to earn up to an additional \$1,550 per year by participating in the Chancellor's Future Leaders in Research Program.

The Chancellor's Future Leaders in Research Program offers a unique opportunity for students to conduct research early in their college career. Students are partnered with a faculty member in the field of their choice to work side-by-side in a research setting learning what a career in their chosen field may be like. As a member of the research team, students receive guidance and support to expand their knowledge and skill. Students participating in this program can work up to 20 hours per week to earn up to \$1,550 per year. The student is paid an hourly wage and paychecks are sent bi-weekly.

LSU Alumni Association's Global Leaders

Criteria: The top 50 entering freshmen (including both residents and nonresidents not selected as Chancellor's Alumni Scholars) based on ACT/SAT scores and a computed, six-semester high school GPA of at least a 3.0. To be considered for this award, a student must have an official ACT or SAT writing score on file with LSU and meet the November 15 priority consideration deadline.

Award: A one-time \$2,000 study abroad stipend and the opportunity to earn up to an additional \$1,550 per year by participating in the Chancellor's Future Leaders in Research Program. This award is in addition to the cash scholarship awarded to the student through the Flagship Scholars Award, LSU Academic Scholars Award, or the Tiger Excellence Scholars Award.

The Chancellor's Future Leaders in Research Program offers a unique opportunity for students to conduct research early in their college career. Students are partnered with a faculty member in the field of their choice to work side-by-side in a research setting learning what a career in their chosen field may be like. As a member of the research team, students receive guidance and support to expand their knowledge and skill. Students participating in this program can work up to 20 hours per week to earn up to \$1,550 per year. The student is paid an hourly wage and paychecks are sent bi-weekly.

LSU Distinguished Freshman Award

Criteria: College-sponsored National Merit Finalist who indicates LSU as their first-choice institution

Award: \$750 to \$2,000 per year based on financial need and the opportunity to earn up to \$1,550 per year by participating in the Chancellor's Future Leaders in Research Program. This scholarship is in addition to the student's merit scholarship offer through Chancellor's Alumni Scholars, LSU Alumni Association's Global Leaders, Flagship Scholars Award, LSU Academic Scholars Award, or the Tiger Excellence Scholars Award.

The Chancellor's Future Leaders in Research Program offers a unique opportunity for students to conduct research early in their college career. Students are partnered with a faculty member in the field of their choice to work side-by-side in a research setting learning what a career in their chosen field may be like. As a member of the research team, students receive guidance and support to expand their knowledge and skill. Students participating in this program can work up to 20 hours per week to earn up to \$1,550 per year. The student is paid an hourly wage and paychecks are sent bi-weekly.

Flagship Scholars Award

Criteria: ACT score of 33 to 36 or a critical reading and math SAT score of 1440 to 1600 AND a 3.0 cumulative computed, six semester high school GPA (not selected as a Chancellor's Alumni Scholar)

Award: \$20,500 per year plus the opportunity to earn up to an additional \$1550 by participating in the Chancellor's Student Aide Program

The Chancellor's Student Aide Program provides an opportunity for students to work in one of our many departments. Students participating in this program can work up to 20 hours per week to earn up to \$1550 per year. The student is paid an hourly wage and paychecks are sent bi-weekly.

LSU Academic Scholars Award

Criteria: ACT score of 30 to 32 or a critical reading and math SAT score of 1330 to 1430 AND a 3.0 cumulative computed, six semester high school GPA

Award: \$15,500 per year plus the opportunity to earn up to an additional \$1,550 by participating in the Chancellor's Student Aide Program

The Chancellor's Student Aide Program provides an opportunity for students to work in one of our many departments. Students participating in this program can work up to 20 hours per week to earn up to \$1,550 per year. The student is paid an hourly wage and paychecks are sent bi-weekly.

Tiger Excellence Scholars Award

Criteria: ACT score of 28 to 29 or a critical reading and math SAT score of 1250 to 1320 AND a 3.0 cumulative computed, six semester high school GPA

Award: \$7,600 per year

Scholarships for Louisiana Students

The Pelican Promise Award

LSU is committed to institutional access and affordability for students of all socioeconomic levels. The Pelican Promise Award program is designed to attract and support Louisiana students who are economically disadvantaged and academically qualified.

To qualify, students must be eligible for admission to the university, must be eligible for a Federal Pell Grant, and must have a family income equal to or lesser than 150 percent of the poverty level.

Eligibility for the Pelican Promise will be determined once the student has completed the Free Application for Federal Student Aid (FAFSA) and applied for all federal, state, and LSU resources. Please note that a FAFSA must be completed each year to renew eligibility for the Pelican Promise Award. This award exempts students from the payment of tuition and the registration fee.

Entering Freshman Resident Scholarship Programs

University Scholarship Programs

Stamps Leadership Scholars

Criteria: Stamps Leadership Scholars will be chosen from the pool of students admitted from the LSU Honors College. Top candidates will be invited to compete for the Stamps Leadership Scholarships. To view LSU Honors College admission requirements, visit www.honors.lsu.edu.

Award: The Penelope W. and E. Roe Stamps IV Leadership Scholars Award program is the top scholarship opportunity available at LSU. Scholarship recipients will receive full cost of attendance for four years, as well as a potential \$14,000 for enrichment experiences.

Stamps Leadership Scholars will be directed to resources that will help cultivate each scholar's intellectual distinction, initiative, and commitment to service, leadership, global knowledge, and career exploration. Criteria: ACT score of 28 to 29 or a critical reading and math SAT score of 1250 to 1320 AND a 3.0 cumulative computed, six semester high school GPA

Award: \$1,500 per year

TOPS – Louisiana's Tuition Opportunity Program for Students

Louisiana residents meeting certain eligibility requirements will qualify for tuition assistance and, in some cases, cash stipends through this state-funded program. TOPS has three components: (1) the *Opportunity Award* provides tuition assistance for four years; (2) the *Performance Award* provides tuition assistance and a \$400 per year cash stipend for four years; and (3) the *Honors Award* provides tuition assistance and a cash stipend of \$800 per year for four years. Each of these components has certain ACT score and GPA requirements; in addition, all TOPS awards require 17.5 units of specified high school course work.

To apply for TOPS awards, the Free Application for Federal Student Aid (FAFSA), which corresponds to the year in which the student plans to enroll, must be submitted by the deadline published in the FAFSA.

More detailed information on these programs may be obtained from the Louisiana Office of Student Financial Assistance, Scholarship Division, P. O. Box 91202, Baton Rouge, Louisiana 70821-9202 or by visiting their website at www.osfa.state.la.us.

Other LSU Scholarships and Awards

There are two types of scholarships listed below—those restricted to students according to their major or college and those that are open to all students regardless of their major or college. Most scholarships are restricted to full-time students.

All other applications, when required, may be obtained from the department or college listed in the description of the scholarship.

The description of each scholarship follows the same format: title; number given, and annual amount of each, e.g., "(2:\$300)" means that two scholarships are awarded per year at \$300 each; any criteria or restrictions; and the group that determines which students will receive the scholarship. The following abbreviations are used in the scholarship descriptions:

FR	freshman
SO	sophomore
JR	junior
SR	senior
UG	undergraduate
GR	graduate student
LA	Louisiana
yr	year
GPA	grade point average
FA&S Cmte	Financial Aid & Scholarships Committee
EBR	East Baton Rouge Parish

Scholarships and Awards Restricted to a Particular Field of Study

Students interested in applying for the following scholarships and awards should check with the individual colleges for up-to-date information concerning amounts and requirements. *Those scholarships and awards marked with one asterisk (*) are funded through the LSU Foundation. Those marked with two asterisks (**) are sponsored by the LSU Alumni Association.*

Chevron Engineering Post-Doctoral and Graduate Student Fellowship Fund (varies:varies) FT; GR; doctoral and post-doctoral fellowships in Engineering awarded to students with substantiated research interest in the oil and gas industry; second preference to students from under- represented groups, inc. African Americans, Hispanic Americans, and women.

College of Engineering Endowed Alumni Fellowship (varies:varies) FT; GR in engr.; American citizen; 3.50 GPA; one yr. award; financial need; awarded by Col. of Engr.

Stanley M. & Hilma R. Cothren Graduate Fellowship in Engineering Excellence (varies:varies) FT; PhD; US citizen; 3.5 GPA; civil & environmental engr.

Vincent Forte Graduate Fellowship (1:\$2000) GR in engr.

Mark and Carolyn Campbell Guidry Doctoral Fellowship (1:\$22,500) FT; GR; doctoral student admitted to or enrolled in ECE.

George A. Daniels Graduate Fellowship in Engineering FT GR in Dept. of Chem. Engr.

IBM Grad Fellowship Scholar (1-2: varies) FT; GR; eligibility requires BS degree in engineering or equivalent, enrolled in graduate program in the College of Engineering or in the MBA Program in the College of Business Administration; minorities and/or women will be given preference.

ECE Doctoral Student Support Fund FT Doctoral student in Dept. of Elect. or Comp. Engr.; 3.00 GPA.

Flagship Fellowship Fund FT GR in engineering graduate program; 3.50 GPA.

IGERT Fellowship (varies:\$12,500) GR in engr.

George A. Khoury, Jr. Graduate Fellowship in Engineering Excellence (1:\$30,000) FT; GR; doctoral student admitted to or enrolled in PETE.

James Lewis Electrical Engineering Fellowship (varies:varies) GR in elect. engr.

James R. Lewis Grad Study Fund in EE (varies:varies) FT; GR; for master's or doctoral student, ECE major, 3.0 GPA.

Marathon Engineering Diversity Graduate Fellowships (2:\$35,000) FT; GR; doctoral candidates seeking degrees in ChE, ME, EE, CE, or PETE. Consideration will be given to all academic and nonacademic strengths and achievements, as well as the ways a contender may contribute to a diverse educational environment.

Marathon Engineering Diversity Ph.D. Fellowship (varies:varies) FT; Ph.D. track GR in engr.; preference given to under-represented students; U.S. citizen; academic excellence; awarded by CoE Diversity Programs.

Nextgenc3 Graduate Fellowship FT GR in Mech. Engr. program; 3.00 GPA.

Jayanti and Suresh Rai Fellowship (varies:varies) FT; GR in elec, or comp. engr.; preference to females of East Indian origin in elec. or comp. engr.

Charles E. Severance Endowed Fellowship Full-time GR in biol. and agr. engr; US citizen; financial need and 4-H exp. preferred; awarded by Dept. of Biol & Agr. Engr.

Jimmy Stone Graduate Fellowship in Engineering Excellence (1:\$30,000) FT; GR; doctoral student in PETE, 3.0 GPA, U.S. citizen or permanent resident.

Freshman Scholarships

ExxonMobil Diversity in Engineering Scholarship (varies:varies) FT; UG in engr.; 3.00 GPA; academic ability; top 25 percent of high school class; 26 ACT; awarded by Col. of Engr.

Boykin and Mable Pegues Scholarship (40:\$500) FR in engr.; awarded by Col. of Engr.

Donald J. Waguespack Scholarship in Engineering (varies;varies) Full-time FR in engr.; 3.0 GPA; ACT score equal to or greater than that of the prior year's entering freshman average; financial need considered; priority to Terrebonne High School students or Atlanta, Georgia residents; awarded by Col. of Engr.

Other Scholarships

3-2 Program Scholarship FT UG JR; enrolled in Mech. Engr.; 3.50 GPA.

AADE Lafayette Chapter Scholarship FT UG; enrolled in Pet. Engr. or the Col. of Engr. taking PETE courses; expressed interest in Drilling Engineering; 2.5 GPA; financial need considered; selected by the Chair of the Dept. of Pet. Engr or by designee and approved by Dean of Col. of Engr.

Henry Gee Abbott Scholarship FT; enrolled in Col. of Engr.; 2.0 GPA; selected by Dean of Col. of Engr.

Yalcin B. Acar Memorial Scholarship (1:varies) UG in civil engr.; 3.00 GPA; awarded by Dept. of Civil & Envr. Engr.

Ned Adler Memorial Full-time 75 credit hours earned; 2.5 GPA; declared mech. engr. major; financial need considered; awarded by Dept. of Mechanical Engineering.

W. R. Aldrich Scholarship (varies:varies) UG in engr.; graduate of LA high school; need and academic achievement; awarded by Col. of Engr.

Amerada Hess Foundation (varies: \$1,250) Full-time JR in pet. engr.; awarded by Dept. of Pet. Engr.

American Association of Drilling Engineers Scholarship (varies:varies) Full-time UG I pet. engr.; interest in drilling engineering; 2.50 GPA; financial need; U.S. citizen; 24 credit hrs. earned; awarded by Dept. of Pet. Engr.

American Petroleum Institute (API) - Houston Chapter Scholarship FT UG; enrolled in Col. of Engr. majoring in Pet. Engr.; academic merit and financial need considered; selected by the Chair of the Dept. of Pet. Engr or by designee and approved by Dean of Col. of Engr.

Henry and Nordine Arnaud Scholarship in Petroleum Engineering (varies:varies) Full-time UG in pet. engr.; JR or SR with 2.70 GPA; financial need; employed part-time for 10 hrs. minimum; resident of one of the following parishes: Acadia; Avoyelles; Calcasieu, Cameron, Evangeline, Jefferson Davis, Iberia, Lafayette, Lafourche, St. Landry, St. Martin, St. Mary, Terrebonne or Vermillion.

Associated General Contractors of Louisiana, Inc. (varies: \$500/yr.) SO in const. mgt.; selection based on need and association with construction industry; awarded by Dept. of Const. Mgt.

ASSCT Undergraduate Sugar Processing Scholarship (varies:varies) Full-time UG; 2.75 GPA; BAE, ChE, ECE, ME, pref. sugar cane producing parishes: Acadia, Allen, Ascension, Assumption, Avoyelles, Calcasieu, Cameron, East Baton Rouge, Evangeline, Iberia, Iberville, Jefferson Davis, Lafayette, Lafourche, Pointe Coupee, St. Charles, Rapides, St. James, St. John, St. Landry, St. Martin, St. Mary, Terrebonne, Vermillion or West Baton Rouge; awarded by Col. of Engr.

Atlas Power Scholarship (varies:varies) Full-time UG in engr.; 2.80 GPA; awarded by Col. of Engr.

Gail Robinson Wilbur Baker Full-time sophomore female; 3.0 GPA; U.S. citizen; campus involvement considered; awarded by Col. of Engr.

Baker Hughes Endowed Scholarship Full-time UG in engr.; 3.0 GPA; financial need considered; preference to dependents or employees of Baker Hughes or affiliated companies.

BASF Corporation Engineering Scholarship (1:\$1,200) UG in engr.; 3.00 GPA; awarded by Col. of Engr.

- **Harold T. Barr Memorial Scholarship** UG in biol. engr.; 3.0 GPA and financial need; awarded by Dept. of Biol. & Agr. Engr.

Zaki A. Bassiouni Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; financial need; academic merit; awarded by Dept. of Pet. Engr.

Richard L. Bengston Endowed Scholarship in Biological Engineering Full-time UG in biol. Engr.; overall GPA 3.0; financial need, and a US citizen; awarded by Dept. of Biol. & Agr. Engr.

Ram N. Bhatia Scholarship in Chemical Engineering Full-time UG in chem. engr.; overall GPA 3.0; special consideration to citizens of India; awarded by Dept. of Chem. Engr.

Baton Rouge Water Company Scholarship in Civil & Environmental Engineering FT JR, SR; enrolled in Col. of Engr. with focus in water works; selected by Chair of Dept. of Civil Engr.; 3.25 GPA.

Board of Regents (varies:varies) FT; GR in engr.; 3.50 GPA

Bourgeois and Associates, Inc. Scholarship (1:\$1,200) FT; UG; incoming freshman preferred (freshman-through-senior eligible) pursuing occupational health & safety IAT curriculum, Louisiana resident, 2.75 GPA upon high school graduation, and 21 ACT composite score. Preference given to students from LaFourche, Assumption, Terrebonne and St. Mary parishes.

Adam T. Bourgoyne Construction Management Scholarship Excellence Fund (varies:varies) FT; UG; junior or senior CM major, 3.0 GPA or better and be in top 10 in his/her class year, recipient must have demonstrated high ethics.

Ted Bourgoyne Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; academic merit; financial need; awarded by Dept. of Pet. Engr.

- **BP America Inc. Endowed Scholarship (varies:varies)** Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

BP Scholarship for Energy in Engineering FT SO, JR, SR; enrolled in Col. of Engr.; 3.0 GPA; selected by Dean of Col. of Engr.

BP Scholarship for Energy in Engineering #2 FT SO, JR, SR; enrolled in Col. of Engr.; 3.0 GPA; selected by Dean of Col. of Engr; preference for minority students.

***BP America Scholarship (varies:varies)** Full-time UG in chem. engr.; awarded by Dept. of Chem. Engr.

BP Minority Petroleum Engineering Scholarship Fund (varies:varies) FT; UG; U.S. citizen/perm. res., sophomore year, enrolled in ChE, ME, or PETE. First preference shall be given to minority students. At least 3.0 GPA for all college-level work, be active in extra-curricular organizations (school and/or community) with leadership roles, and not receive other similar corporate financial aid tied to summer employment. Financial need may be a consideration.

John B. Brock, III Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

Leo Broering Memorial Scholarship in Chemical Engineering Full-time UG in chem. engr.; overall GPA 3.2; financial need considered; special consideration to interns at Shell's Geismar, LA plant; awarded by the Dept. of Chem. Engr.

William Brookshire Scholarship in Engineering (varies:varies) Full-time SO/JR/SR or GR students working on a non-thesis masters degree in engr., students with 30+ hrs. combined work and course work preferred, US citizen and financial need may be considered; awarded by Col. of Engr.

Les and Dot Broussard Scholarship FT UG; enrolled in Dept. of Elect. Engr.; selected by Chair of Dept. of Elect. & Comp. Engr.; financial need considered.

William H. and Barbara A. Brown Scholarship in Biological and Agricultural Engineering Full-time UG or half-time GS; 3.0 GPA on all college work; demonstrated excellence in engineering design or research; special consideration shall be given to a student who has participated in an engr. internship program; awarded by the Dept. of Biol. & Agr. Engr.

Robert G. Bryan Scholarship (varies:varies) UG in pet. engr.; awarded by Dept. of Pet. Engr.

Davis S. and Martha L. Bunnell Scholarship in Engineering FT UG; majoring in Chem. or Mech. Engr.; 3.0 GPA; financial need considered.

Joseph W. Carmena, Sr. Memorial Scholarship Full-time UG in civil or envr. engr.; 3.2 GPA; financial need considered; preference given to a student from a rural area in LA; awarded by CEE dept.

Charles M. Carraway and Joanne M. Carraway Scholarship Full-time UG in pet. engr.; 3.0 GPA; financial need considered.

Celanese Chemicals Chemical Engineering Scholarship Fund (varies: \$500) FT; UG; ChE sophomore or junior, 3.0 GPA, U.S. citizen or full-time resident, member of one or more professional associations, and has interest in considering Celanese Chemicals as an employer upon graduation.

Alden J. and Barbara S. Chauvin Scholarship Full-time UG in elec. and comp. engr.; 3.0 GPA; financial need considered; must have been born in Louisiana or have at least one parent born in LA; preference given to student expressing interest in "alternative energy solution" career; awarded by ECE dept.

Chemical Engineering Scholarship Fund (varies:varies) FT; UG; JR or SR, 3.0 GPA, U.S. citizen or perm. resident.

***Chevron Texaco Company Scholarships in Chemical Engineering (varies:varies)** UG in chem. engr.; awarded by Dept. of Chem. Engr.

Chevron Texaco Scholarship Fund in Mechanical Engineering (varies:varies) FT; UG; ME major (junior or senior), GPA 3.0 or better, preference given to students whose enrollment and leadership promote diversity should also be considered.

Chevron Texaco Scholarship in Electrical Engineering Full-time UG in elec. engr.; 3.0 GPA; preference to upperclassmen who promote leadership and diversity.

Chevron Computer Science Scholarships (6:\$1,000) UG major in computer sci.; U.S. citizen or permanent resident; awarded by Col. of Engr.

***Chevron Texaco Company Scholarships in Petroleum Engineering (varies:varies)** UG in pet. engr.; U.S. citizen or permanent immigration visa; awarded by Dept. of Pet. Engr.

Chevron Texaco Scholarship in Civil Engineering (varies:\$1000) FT; UG in civ. engr.; 3.00 GPA; must exhibit leadership

CITGO Petroleum Corporation Scholarship FT UG in Chem. Engr.; awarded in JR or SR year.

CITGO Scholarship FT UG; enrolled in Mech. Engr.; academic merit and financial need considered; selected by Chair of Dept. of Mech. Engr.

Civil Engineering Scholarship Fund FT UG; enrolled in Dept. of Civil & Envr. Engr.; 3.0 GPA; selected by Dean of Col. of Engr.

Class of Late 1970s Alumni Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

***Jesse Coates Award (1:varies)** UG in chem. engr. who shows most outstanding leadership.

COE Alumni Scholarship (varies:varies) UG in engr.; awarded by the Col. of Engr.

***Conoco Phillips Undergraduate Scholarship in Chemical Engineering (varies:varies)** Full-time UG in chem. engr.; awarded by Dept. of Chem. Engr.

Conoco Phillips Scholarship FT UG; majoring in Petr. Engr.; awarded by Chair of Petr. Engr.

Construction Industry Advancement Fund of Lafayette and Vicinity Scholarship (2:\$500) FT; UG; CM major, SO/JR/SR, resident of Acadia, Evangeline, Iberia, Lafayette, St. Landry, St. Martin, St. Mary or Vermilion parish. Selection based on scholarship, need, and association with the construction industry.

Construction Management Alumni Chapter Scholarship (2:\$1000) Full-time JR/SR in construction management; 2.5 GPA; work experience in construction industry preferred; awarded by CM dept.

Construction Management Miscellaneous Donors Scholarship (varies:\$500) FT; UG in constr. man.; 3.00 GPA.

Stanley M. and Hilma R. Cothren Scholarship Full-time UG in civil or envr. engr.; 3.2 GPA; financial need may be considered; awarded by CEE dept.

Eugene R. Cox Scholarship in Chemical Engineering (varies:varies) Full-time SO/JR/SR in chem. engr.; 3.0 GPA; preference given to students from Calcasieu or Cameron Parish; financial need may be considered; awarded by Dept. of Chem. Engr.

Bill Crawford Memorial Scholarship FT UG; enrolled in Dept. of Civil & Envr. Engr.; awarded by Chair of Civil & Envr. Engr.

B. C. Craft Memorial Foundation Scholarship (varies:varies) UG in pet. engr.; awarded by Dept. of Pet. Engr.

Craft & Hawkins Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

John deMarsche Memorial Scholarship in Construction Management (varies:varies) Full-time JR/SR in construction management; 2.75 GPA; interest in international work in construction industry preferred; awarded by CM dept.

Devon Energy Corporation Petroleum Engineering Scholarship Full-time UG with declared major in petr. engr.; 3.0 GPA; must be a citizen or permanent resident of U. S.; awarded by Dept. of Pet. Engr.

William H. and Tanya B. Ditto Scholarship (varies:varies) UG in elec. engr.; 3.00 GPA; awarded by Dept. of Elec. Engr.

Gene and Sylvia Duke Family Endowed Scholarship Full-time UG in civil, industrial, mechanical or petroleum engineering; preference to high school graduates from Istrouma Senior High School (Baton Rouge), Belaire Senior High School (Baton Rouge), or Denham Springs Senior High School (Denham Springs); natives of Baton Rouge, or those who have a family heritage in Baton Rouge; awarded by Col. of Engr.

O. Dewitt Duncan Scholarship (varies:varies) Full-time UG in chem. engr. with 2.50 GPA; awarded by the Dept. of Chem. Engr.

Floyd S. Edmiston, Jr. Scholarship (varies:varies) Full-time UG in chem. engr.; 3.00 GPA; financial need; awarded by Dept. of Chem. Engr.

Earl and Maryanne Evans Engineering Scholarship (1:varies) FT; female UG in engr.; LA resident; financial need; awarded by CoE Diversity Programs.

ECE General Scholarship FT student in Elect. or Comp. Engr.; 3.0 GPA.

Environmental Technical Sales, Inc. (ETEC) Scholarship FT JR, SR in Dept. of Civil & Envr. Engr.; awarded by Chair of Dept. of Civil & Envr. Engr.; financial need considered.

Evacuation & Transportation Scholarship FT UG in Dept. of Civil & Envr. Engr.; 3.0 GPA; or FT PT GR with 3.5 GPA.

Exxon Mobil Scholarship FT in Col. of Engr.; 3.0 GPA; awarded by Dean of Col. of Engr.

Exxon Mobil Diversity in Engineering Scholarship (varies:varies) FT; UG in eng; 3.00 GPA; academic ability; top 25 percent of high school clas; 26 ACT; awarded by Col of Engr.

Falcon Family Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

***Ashton and Brent Fenet Scholarship (varies:varies)** Full-time UG; asphalt technology in civil engr.; awarded by Dept. of Civil & Envr. Engr.

Robert G. Flory Scholarship Fund (varies:varies) Full-time SO/JR/SR in elec. engr.; 3.00 GPA; U.S. citizen; LA resident of Acadia, Lafayette, or Vermillion Parish; awarded by Dept. of Elec. Engr.

William Flores Jr. Family Scholarship (varies:varies) Full-time UG in pet. engr.; 2.5 GPA; financial need may be considered; awarded by Dept. of Pet. Engr.

GDL Foundation Scholarship FT UG in Petr. Engr.; academic merit and financial need considered; awarded by Chair of Dept. of Petr. Engr.

Don Ray George Scholarship (varies:varies) Full-time UG/GR in pet. engr.; awarded by Dept. of Pet. Engr.

Gerard Family Undergraduate Scholarship in Chemical Engineering (varies:\$4,000) UG in chem. engr.; LA resident; awarded by Dept. of Chem. Engr.

Karl German Memorial Scholarship (varies:varies) Full-time UG in mech. engr.; enrolled in Col. of Engr.; 2.95 GPA; awarded by Dept. of Mech. Engr.

Frank J. Germano Memorial Scholarship (varies:\$1,000) SO/JR/SR in civil engr.; financial need; awarded by Dept. of Civil & Envr. Engr.

Henry Gilbert Scholarship (varies:varies) UG/GR in pet. engr.; preferably from New York area; awarded by Dept. of Pet. Engr.

Michael G. Glassell Memorial Scholarship Fund (3:\$1,000) UG in civil engr.; awarded by Dept. of Civil & Envr. Engr., Interfraternity Athletic Council president, and ΣAE president.

Clara and Frank Groves, Sr. Scholarship (1:\$1,200) UG in chem. engr., awarded by Dept. of Chem. Engr.

Halliburton Scholarship SO JR ENGR majors supporting the energy industry; minorities and first generation considered; 3.0 GPA.

R. L. Hartman Scholarship (1:varies) JR in chem. engr., 3.00 GPA; financial need; native Louisianian; awarded by Dept. of Chem. Engr.

Murray F. Hawkins, Jr. & William R. Holden Achievement Scholarship (varies:varies) Full-time UG in pet. engr.; 3.00 GPA; awarded by Dept. of Pet. Engr. **Murphy J. Hebert Family Scholarship** in Petroleum Engineering Full-time UG in petroleum engineering; 3.0 GPA; financial need may be considered; first preference given to Louisiana citizens and U.S. citizens; second preference given to U.S. citizens who have a LSU alumnus parent or grandparent; third consideration to a student in mechanical engineering with interest in petroleum industry; awarded by PETE dept.

Hess Foundation (varies:varies) Full-time JR in pet. engr.; demonstrated outstanding scholastic achievement; awarded by Dept. of Pet. Engr.

Bill Hise Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

Bill Holden/NACME Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; 2.50 GPA; preference for minorities; Louisiana residents; NACME participants; awarded by Dept. of Pet. Engr.

Thomas Hopkins Scholarship FT UG in Col. of Engr.; 2.5 GPA.

Paul M. Horton Memorial Undergraduate Scholarship (varies:varies) UG in chem. engr.; 3.50 GPA; financial need; awarded by Dept. of Chem. Engr.

Houston-LSU Alumni Scholarship (varies:varies) Full-time UG in Col. of Engr. with ACT of 27; Houston area residents given precedence; awarded by the Col. of Engr.

Paul N. Howell Endowed Scholarship (varies:varies) Full-time UG in chem. engr.; 3.00 GPA; financial need; awarded by Dept. of Chem. Engr.

Industrial Engineering General Scholarship FT UG in Constr. Mgt.; 3.0 GPA; financial need considered; awarded by Dean of Col. of Engr.

Industrial Engineering Sustaining Scholarship (varies: varies) UG in ind. engr.; awarded by Dept. of Ind. & Manf. Systems Engr.

Industrial Technology Club Scholarship (1:\$1,000) FT; UG; junior or senior CM or Industrial Technology major. Financial need considered.

Willow Johnston Memorial Scholarship 2nd year or greater FT female UG in Col. of Engr.; 3.0 GPA; financial need considered.

Montez Juneau Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; 2.50 GPA; awarded by Dept. of Pet. Engr.

Kaiser Aluminum Scholarship (varies:varies) Full-time; preference for minorities; awarded by Col. of Engr.

David Kamolsiri Memorial Scholarship Full-time UG in pet. engr.; 3.0 GPA; financial need considered; awarded by Dept. of Pet. Engr.

Ray Kazmann Memorial Scholarship Fund (varies:varies) FT; UG; CEE major, 2.7 GPA, need may be a consideration.

Oscar K. Kimbler Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by the Dept. of Pet. Engr.

Joseph A. Kleinpeter Endowed Scholarship (varies:varies) Full-time UG in chem. engr.; 3.00 GPA; financial need; selected by Dean; awarded by the Col. of Engr.

H. Markham Krause, Sr. Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

Tracy W. Krohn—Family Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; financial need; academic merit; awarded by Dept. of Pet Engr.

Alden J. "Doc" Laborde Scholarship FT in Dept. of Petr. Engr.; awarded by Chair of Dept. of Petr. Engr.

Erin Krielow Lahr Memorial Scholarship (varies:varies) FT; UG; JR or SR, CEE major, 3.0 GPA, priority to female students, financial need may be a consideration.

***Adrian Virginia Lazarus Memorial Award Fund (1:\$1,500)** UG in computer sci.; 3.00 GPA; awarded by Col. of Engr.

Albert Pierre Levy Scholarship (1:varies) UG in mech. engr.; financial need; LA resident; awarded by Dept. of Mech. Engr.

LASpace Fellowship (2:varies) FT or PT; GR in mech. engr.

Amy & James Lilly Scholarship FT UG JR SR in Dept. of Elect. & Comp. Engr.; financial need considered.

Louisiana Asphalt Pavement Association Full-time SO, JR, SR in civil engr. or const. mgmt.; Hot Asphalt Technology course required; awarded by Dept. of Civil Engr.

***Louisiana Engineering Societies Auxiliary (Baton Rouge Chapter) Award (2:\$1,000)** UG in engineering; based on need and academic promise; awarded by Col. of Engr.

- *** Louisiana Engineering Society Auxiliary (New Orleans Chapter)—Samuel McCain Young Scholarship (1:\$1,000)** UG in civil engr. from N. O. area; awarded by Col. of Engr.

***Louisiana Engineering Society, Baton Rouge Chapter Scholarship (1:\$500)** UG in engr.; need and academic promise; awarded jointly by Col. of Engr. and LES-BR.

Gene Perdue Lowe Scholarship in Chemical Engineering (varies:varies) Full-time JR in chem. engr.; 2.0 GPA; U.S. citizen; awarded by Dept. of Chem. Engr.

Marathon Ashland Petroleum LLC Scholarship SO JR or SR in Mech. Engr.; 3.5 GPA; students from River Parishes (St. John, St. James, and St. Charles)

Marathon Engineering Diversity Undergraduate Scholarship (varies:\$5000) FT; SO/JR/SR; in engr.; 3.0 GPA & academic excellence; awarded by CoE Diversity Programs.

Marathon Mechanical Engineering Undergraduate Scholarship Fund (varies: \$1,250) FT; UG; ME major (sophomore, junior, or senior), GPA 3.5 or better, preference given to students from St. John, St. James and St. Charles parishes, when possible.

Marathon Oil Foundation Minority Scholarship (varies:\$1250) FT or PT; SO/JR/SR; in chem. or mech. engr.

Marathon Oil Undergraduate Minority Engineering Program Scholarship Fund (5:varies) FT; UG; UG seeking degrees in ChE, ME, EE, CE, or PETE. Consideration will be given to all academic and nonacademic strengths and achievements, as well as the ways a contender may contribute to a diverse educational environment. Preference given to first-generation college students and/or those who demonstrate financial need.

***Marathon Scholarship in Chemical Engineering (varies:varies)** UG in chem. engr.; awarded by Dept. of Chem. Engr.

- *** Marathon Oil Company Scholarship in Petroleum Engineering (varies:varies)** UG in pet. engr.; awarded by Dept. of Pet. Engr.
- **Mansel M. Mayeux Honorary Scholarship** UG in biol. engr.; 2.5 GPA, financial need and US citizen; awarded by Dept. of Biol. & Agr. Engr.

***Andrea Kay Martin Memorial Scholarship (1:varies)** JR or SR major in computer sci.; awarded by Col. of Engr.

Martin Foundation Scholarship FT UG in Forestry, Mech. Engr. or Indust. Engr.; 3.0 GPA; ACT score 23; for dependents of Roy O. Martin Lumber Company

Shirley Mayhall Memorial Scholarship (varies:varies) UG in chem. engr.; financial need; academic ability; awarded by Dept. of Chem. Engr.

***McDermott Corporation Scholarship (3:\$1,000)** JR/SR in civil engr.; awarded by Dept. of Civil & Envr. Engr.

William McFatter Scholarship (varies:varies) Full-time UG in chem. engr.; awarded by the Dept. of Chem. Engr.

Mechanical Engineering Award (varies:\$500) FT; UG in good standing; U.S. citizen.

ME Alumni Scholarship FT UG in Petr. Engr.; academic merit and financial need considered; awarded by Chair of Dept. of Petr. Engr.

Walter Middleton, Jr. Endowed Scholarship (varies:varies) Full-time UG; preference to ChE major; financial need; awarded by Dept. of Chem. Engr.

***Charles E. Milner Scholarship (varies:varies)** Full-time UG; asphalt technology in civil engr.; awarded by Dept. of Civil & Envr. Engr.

Minority Engineering General Scholarship—REHAMS (varies:varies) FT; UG in engr.

Newfield Exploration (1: \$2,500) UG in pet. engr.; 3.2 GPA; awarded by Dept. of Pet. Engr.

A. W. Nolan, Jr. Endowed Scholarship Full-time UG in civil engineering; 2.0 GPA; awarded by Department of Civil Engineering.

Noland Scholarship (2:\$1,000) UG in civil engr.; 2.00 GPA; awarded by Dept. of Civil & Envr. Engr.

Northrop Grumman Diversity Scholarship (1:\$2000) FT; SO/JR/SR; in elec. & comp. engr., mech. Engr., constr. Mgt., or ind. Engr.; 3.0 GPA; academic excellence; awarded by CoE Diversity Programs.

Nortrax/LAPA Scholarship (varies: \$2,000) Full-time SO/JR in civil engr.; Hot Mix Asphalt Technology course required; awarded by Dept. of Civil Engr.

James A. Nugent, Jr. Scholarship FT UG in Dept. Civil & Envr. Engr.; awarded by Chair of Dept. of Civil & Envr. Engr.

ONR/HBEC Future Engineering Faculty Award (1:varies) FT; GR in engr.; 3.50 GPA

- **Richard O'Shields Scholarship (varies:\$1,000)** UG in engr.; 3.00 GPA; awarded by Dept. of Pet. Engr.

Clint Ourso and Jennifer Romine Scholarship Full-time JR, SR in elec. or comp. engr.; overall GPA 3.4-3.7; awarded by Dept. of Elec. and Com. Engr.

Boykin and Mable Pegues Scholarship (80:\$1,000) UG in chem. engr., civil engr., elec. engr., ind. engr., mech. engr., and pet. engr.; awarded by Col. of Engr.

Petroleum Engineering General Scholarship—Newfield Exploration Company (2:\$1250) FT; UG in pet. engr.

Petroleum Engineering Miscellaneous—API Houston Chapter (varies:\$750) FT; UG in pet. engr.; 2.00 GPA; academic ability and potential for success.

Petroleum Engineering Miscellaneous—SPE Dallas section (varies: \$1000) Ft; UG or GR in petr. engr.; 2.00 GPA; academic merit and potential for success

Petroleum Engineering Miscellaneous—RPSEA (varies:\$2500) FT; UG or GR in petr. engr.; 2.00 GPA; academic merit and potential for success

Pile Driving Contractors Association Gulf Coast Chapter Scholarship FT UG in Dept. of Constr. Mgt.; financial need considered; awarded by Dean of Col. of Engr.

Wiley D. Poole Memorial Scholarship Full-time SO, JR, SR majoring in biol. engr.; 3.0 GPA and financial need; awarded by Dept. of Biol. & Agr. Engr.

Alan M. Raymond (varies:varies) Full-time UG in chem. engr.; awarded by Dept. of Chem. Engr.

Raytheon Scholarship (1:\$1,000) JR in engr.; awarded by Col. of Engr.

Research Partnership to Secure Energy for America (varies: \$2500) Full-time UG in pet. engr.; awarded by Dept. of Pet. Engr.

Joe and Kim Reid Scholarship FT JR or higher UG in Petr. Engr.; 3.0 GPA; financial need considered; awarded by Chair of Dept. of Petr. Engr.

***George Reymond Scholarship (varies:varies)** UG in elec. engr.; 2.50 GPA; awarded by Dept. of Elec. Engr.

Return to Learn Scholarship in Petroleum Engineering Full-time UG; part-time employment in upstream oil required; awarded by Dept. of Pet. Engr.

Routh Family Scholarship (varies:varies) JR or SR in chem. engr., elec. engr., or pet. engr.; awarded by Col. of Engr.

Schlumberger Foundation, Inc. Scholarship (varies:varies) JR/SR in pet. engr.; awarded by Col. of Engr. and Dept. of Pet. Engr.

Hermann Schluter Family Scholarship (1:\$1,000) SO or above in engr.; 3.00 GPA; awarded by Col. of Engr.

Scholarship Fund for Minority Engineering Program Students in Chemical Engineering (varies:varies) FT; UG; ChE major; preference to minority students.

Scott-Windham Scholarship UG in biol. and agr. engr; 2.5 GPA; financial need considered; awarded by Dept. of Biol. & Agr. Engr.

***John J. Seip Memorial Scholarship Award (1:varies)** GR in Audubon Sugar Institute, studying sugar technology; awarded by Dept. of Chem. Engr.

John E. Seip Scholarship (varies:varies) UG in chem. engr.; awarded by the Dept. of Chem. Engr.

The Shaw Group Diversity Scholarship (2:\$2500) FT; SO/JR/SR in engr. Prefer civil & mech. Engr.; 2.5 GPA; financial need, leadership & community service; awarded by CoE Diversity Programs.

Shell Incentive Fund Scholarship FT; awarded by immediate senior admin. officer of dept.

Shell Scholarship FT in Col. of Engr.; awarded by immediate senior admin. officer of dept.

Andrew J. Shoup, Jr. Endowed Scholarship (varies:varies) Full-time UG in pet. engr.; financial need; academic merit; awarded by Dept. of Pet. Engr.

Dr. Steven Seiden Endowed Scholarship in Computer Science (1:\$500) UG majoring in computer sciences; minimum 3.0 GPA

Society of Petroleum Engineers, Delta Section, Scholar-ship (varies:varies) UG in pet. engr.; awarded by Soc. of Pet. Engrs.

Society of Petroleum Engineers, Evangeline Section, Scholarship (varies:varies) UG in pet. engr.; awarded by Soc. of Pet. Engrs.

Society of Petroleum Engineers, South Louisiana Section Scholarship (varies:varies) UG in pet. engr.; awarded by Soc. of Pet. Engrs.

Southeastern Asphalt User/Producer Group Scholarship (varies:\$3000) FT; UG in civ. engr.

South Louisiana Section Endowment Scholarship (varies:varies) Full-time UG in pet. engr.; preference given to Terrebonne, Lafourche, St. Mary or Assumption parish residents; awarded by Dept. of Pet. Engr.

Stokes & Spiehler—J.R. Spiehler Scholarship (varies:varies) Full-time UG in pet. engr.; financial need; academic merit; awarded by Dept. of Pet. Engr.

Carl Streva Engineering Scholarship (varies:varies) Full-time UG ; 2.00 GPA; St. Mary, St. Martin or Iberia Parish resident; awarded by Col. of Engr.

Robert S. Stricklin Scholarship (varies:varies) Full-time UG in engr.; 2.50 GPA; financial need; awarded by Col. of Engr.

James Sturgis Scholarship (varies:varies) UG in mech. engr.; U.S. citizen; awarded by Dept. of Mech. Engr.

TAF Engineering Award (varies:varies) FT or PT; UG in engr.

Patrick F. Taylor Scholarship (varies:\$1500) FT; UG in engr.; 2.75 GPA; U.S. citizen with financial need and academic excellence; awarded by CoE Diversity Programs.

College of Science

***Arthur R. Choppin Scholarship (varies)** SO/JR/SR in Col. of Sci.; awarded by Col. of Sci.

***American Legion and American Legion Auxiliary A.R. Choppin Scholarship Fund (varies)** UG enrolled or planning to enroll in Col. of Sci.; LA resident; former citizen of LA Boys' or Girls' State; awarded by Col. of Sci.

***Charles R. Egedy, Jr. Science Residential College Scholarship (varies)** FR in the Sci. Res. College with outstanding academic credentials; awarded by Col. of Sci.

***Copolymer Foundation Endowed Scholarship (varies)** UG in the Col. of Sci; full-time; 3.0 GPA; awarded by Col. of Sci.

***Elizabeth L. Schweigerdt, M.D. Memorial Student Award (varies)** UG in Col. of Sci; full-time JR or SR; 3.5 GPA; preference given to female students who plan to attend medical school; awarded by Col. of Sci

***Ernie Hill Memorial Scholarship (varies)** UG in the College of Science in good academic standing; full-time; awarded by Col. of Sci.

Johnny Dardenne, Sr. Texas Tiger Tournament Scholarship (varies) UG major in Col. of Sci.; academic ability; awarded by Col. of Sci.

Ron and Mary Neal Science Honors Scholarship (varies) College of Science major, enrolled in Honors College; awarded by Col. of Sci.

Scott and Susan Brodie Science Honors Scholarship (varies) College of Science major, enrolled in Honors College; awarded by Col. of Sci.

Tiger Athletic Foundation Scholarship (varies) UG in Col. of Sci.; academic ability; awarded by Col. of Sci.

***Brandon J. Latiolais Memorial Scholarship (varies)** SR premedical student in the Dept of Biol. Sci.; at least 3.5 GPA; awarded by Col. of Sci.

***Charles S. McCleskey Memorial Scholarship (varies)** Awards to three JR students in microbiology, at least one of whom is a minority; award to one outstanding graduating SR in microbiology; awarded by Dept. of Biol. Sci.

***Ernie Hill Scholarship in Science (varies)** UG majoring in chem or biol. sci.; awarded for academic excellence; U.S. resident; awarded by Col. of Sci.

Marie Standifer Undergraduate Award in Biological Sciences (varies) UG major in biol.; full-time; 3.5 GPA; preference given to students involved in research in the area of plant science or related field; awarded by Dept. of Biol. Sci.

***Virginia R. Williams Memorial Scholarship (varies)** Outstanding female UG in biochem. or chem. or male UG in biochem.; minimum 3.0 GPA; awarded by Col. of Sci

William A. Pryor Scholarship in Biological Sciences (varies) UG majoring in biochem.; awarded for academic excellence; awarded by Col. of Sci.

Dr. James E. Coleman Chemistry Scholarship (varies) Chemistry major with gpa \geq 3.0; awarded by Col. of Sci.

Hach Foundation Chemistry Teacher Award (varies) Chemistry major, concentration in secondary teaching, GPA 3.0; awarded by Dept. of Chem.

I. H. Gottlieb Memorial Scholarship (varies) UG in chem.; LA resident; awarded by Dept. of Chem.

Marathon Petroleum Company Chemistry Scholarship (varies) JR or SR chem major; academic ability; awarded by Dept. of Chem.

Patrick F. Taylor Scholarship in Chemistry (varies) UG chem major; academic ability and financial need; awarded by Patrick F. Taylor Foundation on recommendation. Awarded by the Dept. of Chem.

Peter Burland Endowed Scholarship (varies) SO, JR, SR majoring in chemistry or mathematics; minimum 3.0 GPA; nominated by Col. of Sci.; awarded by Alumni Assoc.

William A. Pryor Scholarship for Student Affiliates of the American Chemical Society (varies) UG majoring in Chemistry; member of the Student Affiliate of the American Chemical Society; awarded for academic excellence; awarded by Col. of Sci.

***W. W. Tison Memorial Scholarship (varies)** UG majoring or planning to major in chem.; awarded by Dept. of Chem.

***Adam Sturlese Memorial Scholarship Fund (varies)** JR or SR major in geol.; academic ability; awarded by Dept. of Geol. & Geophysics.

Ben Stanley Geology Field Camp Scholarship (varies) UG student attending the LSU Geology Field Camp; full-time; academic achievement; financial need; awarded by the Dept. of Geol. & Geophysics

***Billy and Ann Harrison Field Camp Scholarship (varies)** UG geology major for use at summer camp; awarded by Dept. of Geol. & Geophysics.

BP Masters Scholarship in Geology (varies) MS student major in geol.; full time; 3.25 GPA; awarded by Dept. of Geol. & Geophysics

BP Doctoral Scholarship in Geology (varies) PhD major in geol; full time; 3.5 GPA; awarded by Dept. of Geol. & Geophysics

***Candace L. Hays and Ronnie D. Johnson Scholarship (varies)** UG or GR major in geol.; full-time; female; minority; academic ability; awarded by Dept. of Geol. & Geophysics.

Charles L. Jones Scholarship in Geology & Geophysics (varies) UG geology major; academic ability and financial need; awarded by Patrick F. Taylor Foundation on recommendation.

ChevronTexaco Field Camp Scholarship Fund (varies) UG or GR major in geol; academic ability; U.S. citizen; some for field camp; awarded by Dept. of Geol. & Geophysics.

***Dr. & Mrs. H.V. Howe Memorial Scholarship (varies)** GR major in geol.; academic ability; awarded by Dept. of Geol. & Geophysics.

Dr. A. E. "Sandy" Sandberg Scholarship (varies) UG major in geol.; academic ability; awarded by the Dept. of Geol. & Geophysics.

Dr. Joe Hazel Memorial Student Award (varies) UG geology major; awarded by Dept. of Geol. & Geophysics.

GAEMP Minority Scholarship (varies) full-time UG student participating in the GAEMP program; 2.5 GPA; awarded by the Dept. of Geol. and Geophysics.

***George N. May Memorial Scholarship (varies)** FR major in geol; academic ability; financial need; awarded by Dept of Geol. & Geophysics.

***H. V. Andersen Endowed Fund (varies)** UG major in geology; academic ability; awarded by Dept. of Geol. & Geophysics.

Halliburton Field Camp Scholars Scholarship Fund (varies) UG geol major; for summer field camp; awarded by Dept. of Geol. & Geophysics.

Harriet Cameron Belchic Memorial Fund (varies) UG major in geol.; academic ability; financial need; Geol. Field Camp; preference given to women with 3.0 GPA; awarded by the Dept. of Geol. & Geophysics.

***John O' Keefe Barry Endowed Scholarship (varies)** UG major in geol.; academic ability; awarded by Dept. of Geol. & Geophysics.

***John T. Mestayer Memorial Scholarship (varies)** JR/SR in geol.; financial need and academic record; geol. field camp; awarded by Dept. of Geol. & Geophysics.

***Laurice Sistrunk Scholarship (varies)** UG major in geol. or pet. engr.; academic ability; awarded by Dept. of Geol. & Geophysics.

Leo W. Hough Geology Scholarship Fund (varies) UG full-time, academic ability, financial need, awarded by Dept. of Geol. & Geophysics

***Major J. S. Slack, Jr. Endowment (varies)** UG major in geol. or pet. engr.; LA resident; academic ability; geol. field camp; awarded by Dept. of Geol. & Geophysics.

Marathon GeoDE Undergraduate Scholarship (varies) UG geology major; academic ability, service, diversity; awarded by Dept. of Geol. & Geophysics.

Marathon Oil Company Geology Scholarship (varies) GR major in geol; awarded by Dept. of Geol. & Geophysics.

***Monica Donellan Memorial Fund (varies)** UG major in geol.; financial need; geol. field camp; awarded by Dept. of Geol. & Geophysics.

****Mr. & Mrs. W. D. Millican Scholarship (varies)** FR major in geol.; financial need; 2.50 GPA; may be renewed for four yrs.; nominated by Dept. of Geol. & Geophysics; awarded by LSU Alumni Association.

New Orleans Geological Society Jules and Olga Braunstein Memorial (varies) Geol. major; academic ability; nominated by Dept. of Geol. & Geophysics; awarded by N.O. Geological Society.

New Orleans Geological Society Lee Meltzer Memorial (varies) GR major in geol.; academic ability; nominated by Dept. of Geol. & Geophysics; awarded by N.O. Geological Society.

Patrick F. Taylor Scholarship in Geology and Geophysics (varies) UG geology major; academic ability and financial need; awarded by Patrick F. Taylor Foundation on recommendation. Awarded by the Dept. of Geol. & Geophysics.

Prof W. A. van den Bold LSU Geology Field Camp Scholarship (varies) UG major in geol attending the LSU Geology Field Camp; JR or SR; full-time; academic achievement; financial need; awarded by the Dept. of Geol. & Geophysics

Sid and Peggy Bonner Scholarship (varies) UG major in geology; SO or higher; completed mineralogy course; 3.0 GPA or higher; awarded by Dept. of Geology & Geophysics.

Schlumberger Doctoral Scholarship (varies) PhD major in geol; full time; 3.7 GPA; awarded by Dept. of Geol. & Geophysics.

***Anna and Willie Austin Scholarship (varies)** UG major in math or physics; full-time; 3.0 GPA or higher; financial need; preference given to a female student; awarded by Col. of Sci.

Betti and Robert Giles Senior Mathematics Award (varies) For outstanding scholastic performance by SR students majoring in math; awarded by Dept. of Math.

Dr. Pasquale Porcelli Math Fund (varies) One award for SO students with credit in MATH 1550 and 1552; two awards for JR students with at least 19 hours of mathematics numbered 1550 or above; awarded by Dept. of Math.

Margaret and David Oxley Memorial Fund (varies) Awarded by the Dept. of Math.

***Willie Belle Shockley Scholarship (varies)** UG in Col. of Sci.; full-time major in math or physics; 3.0 GPA; preference given to a female student; financial need; awarded by Col. of Sci.

Dr. R. Greg Hussey Scholarship for Excellence in Physics (varies) UG major in physics; selected by Dept. of Phys. & Astr.

Ganesh Chanmugam Endowed Memorial Fund (varies) PhD graduate whose dissertation has been judged as outstanding among all recent graduates; awarded by Dept. of Phys. & Astr.

Joseph Callaway Memorial Fellowship Fund (varies) GR major in physics or astronomy; academic ability; awarded by Dept. of Phys. & Astr.

***Keen-Morris Fund (varies)** Outstanding SR in phys.; awarded by Dept. of Phys. & Astr.

University College

Scholarships for New Freshmen

***Vincent E. Cangelosi Scholarship (varies)** Entering FR graduated in top 15 percent of high school class with a high school GPA of 3.00 or higher and SAT score of 1100 or above or ACT composite score of 25 or above; student must be enrolled at LSU full-time; non-renewable.

***Jacob R. Bankston Scholarship (varies)** Awarded to UG; physical/systemic disability; financial need may be considered; application from Disability Services; awarded by FA&S Cmte.

***James M. Koenecke Memorial Scholarship (varies)** Awarded to EF; outstanding academic and leadership qualities; minimum 3.25 GPA and 25 ACT; awarded by FA&S Cmte.

***James S. and Paula K. McHugh (varies)** Awarded to GR; minimum 3.0 GPA; US citizen; financial need may be considered; awarded by FA&S Cmte.

***Jeffrey Bouton Memorial Graduate Award (varies)** Awarded to GR; majoring in Forestry, Herpathology, Oceanography, Recreational Therapy, or Veterinary Medicine; awarded by FA&S Cmte.

***Joseph A. Kleinpeter Scholarship for Engineering and Science (1:varies)** Awarded to UG; majoring in engineering or science/mathematics; minimum 3.00 GPA and 23 ACT; preference for graduates of Amite High School , Oak Forest Academy, and residents of Tangipahoa Parish; awarded by FA&S Cmte.

***Judge D. Irvin Couvillion Scholarship (varies)** Awarded to UG; minimum 2.0 GPA; financial need shall be considered; awarded by FA&S Cmte.

Joseph F. Dohrer Memorial Scholarship (1:varies) Awarded to EF; financial need shall be considered; awarded by FA&S Cmte.

Knights of Pythias Memorial Scholarship (1:\$1,000) Awarded to EF; minimum 3.0 GPA; financial need shall be considered; awarded by FA&S Cmte.

***Landon Farris Von Kanel Endowed Scholarship (varies)** Awarded to EF; minimum 2.5 GPA; preference to residents of the Cayman Islands and MS; awarded by FA&S Cmte.

Legislative Act 353 of the 1974 Regular Session (varies) Awarded to UG; dependents of law enforcement officers or fire fighters killed or permanently disabled in the line of duty in Louisiana (who register as full-time students) receive exemptions from tuition, on-campus room and board, and book allowances. Applications available at www.lsu.edu/scholarships.

***Leon Guerin-Al Evans-Al Girior Memorial Scholarship (4:varies)** Awarded to UG; awarded by FA&S Cmte.

***Leslie G. Gruber Scholarship (1:\$1,000)** Awarded to EF; graduate of TN high school; awarded by FA&S Cmte.

***LSU Foundation General Scholarship Fund (varies)** Awarded to UG; minimum 3.0 GPA; awarded by FA&S Cmte.

***LSU Foundation Merit Scholarship (varies)** Awarded to UG; minimum 3.0 GPA; awarded by FA&S Cmte.

***LSU Foundation Strategic Scholarship (varies)** Awarded to UG; minimum 3.0 GPA; targets strategic areas of low enrollment; awarded by FA&S Cmte.

***LSU Foundation Opportunity Scholarship (varies)** Awarded to UG; financial need must be considered; awarded by FA&S Cmte.

LSU Kiwanis Club Scholarship (2:\$750) Awarded to UG; dependent of LSU staff member; minimum 30 hours earned and 2.50 GPA; awarded by FA&S Cmte.

***LSU Staff Senate Scholarship (1:\$500)** Awarded to UG; dependent of LSU current or retired staff member; minimum 24 hours earned and 2.50 GPA; awarded by FA&S Cmte.

***Marilu Remolina Scholarship (1:\$500)** Awarded to UG; foreign born or the child of foreign born parents; international students are not eligible; student must file FAFSA; financial need shall be considered; awarded by FA&S Cmte.

***Martin Foundation Scholarship (varies:\$1,000)** Awarded to UG; minimum 3.0 GPA and 23 ACT; major in forestry, mechanical engineering, or industrial engineering; preference to family of Martin Lumber Co. employees; awarded by FA&S Cmte.

***Mattye F. McGivney Memorial Scholarship (varies: \$1,000)** Awarded to SO, JR, or SR; LA resident; financial need shall be considered; awarded by FA&S Cmte.

***Mike McNeal Memorial Scholarship (1:\$500)** Awarded to EF; graduate of Tara High School; major in Business; minimum 3.3 GPA; awarded by FA&S Cmte.

***Olson Family Endowed Scholarship (varies)** Awarded to UG; minimum 3.0 GPA; LA resident; financial need shall be considered; awarded by FA&S Cmte.

***Pam Kinamore Memorial Scholarship (varies)** Awarded to UG; major in Art & Design; minimum 3.00 GPA; financial need shall be considered; awarded by FA&S Cmte.

***Philip J. Barbier Memorial Scholarship (varies)** Awarded to UG; minimum 3.0 GPA; financial need shall be considered; awarded by FA&S Cmte.

***Roland Kizer Student Body President Scholarship (1:\$500)** Awarded to student body president as of October 1st; awarded by FA&S Cmte.

***Rose Long McFarland Scholarship (varies)** Awarded to JR or SR; major in Science; financial need may be considered; preference to single mothers; awarded by FA&S Cmte.

Police Jury Association of LA Award (1:\$500) Awarded to JR; LA resident; major in pol. sci., government, or education; awarded by Police Jury Association of LA, Inc.

***Sigma Chi Endowed Scholarship (varies)** Awarded to UG; member of LSU Sigma Chi fraternity; minimum 2.5 GPA; demonstrated leadership ability and personal character; awarded by FA&S Cmte.

***Skip Bertman Leadership Scholarship (varies:\$1,000)** Awarded to EF; minimum 2.75 GPA; demonstrated outstanding leadership ability; financial need may be considered; awarded by FA&S Cmte.

***Sports Diva Scholarship (varies)** Awarded to UG; preference to first generation and female students; financial need shall be considered; awarded by FA&S Cmte.

***Susan Wang Redfearn Memorial Award (varies)** Awarded to UG; participate in Campus Crusade for Christ, Chapel on Campus College Ministry, or Navigators; financial need shall be considered; awarded by FA&S Cmte.

Graduate Scholarships and Awards

For additional information on scholarships and awards for students in the Graduate School or professional schools, see the publications issued by those divisions.

School of Library and Information Science

***Jimmy H. Hoover Scholarship (1)** GR major in LIS; academic ability; awarded by SLIS.

Louisiana Library Association Scholarship (1) GR major in LIS; academic ability; awarded by LA Library Association.

***Florinell F. Morton Scholarship (1)** GR major in LIS; academic ability; awarded by SLIS.

***Nettie Puckett Wilson Scholarship (1)** GR major in LIS; academic ability; awarded by SLIS.

***Mary Marguerite Hanchey Memorial Fellowship (1)** GR major in LIS; academic ability; awarded by SLIS.

***Sidone Lawrence Walker Scholarship (1)** GR major in LIS; academic ability; awarded by SLIS.

***Lewis Mack Fellowship (1)** GR major in LIS; academic ability; awarded by SLIS.

Mary Moore Mitchell Scholarship (1) GR major in LIS; academic ability; part-time student; awarded by LA Library Association.

***Richard W. Peck Scholarship (1)** GR major in LIS academic ability; interest in youth services; awarded by SLIS.

***Ollie H. Burns Scholarship (1)** GR major in LIS; academic ability; full-time or part-time student; first preference shall be given to minority student; awarded by SLIS.

Donald D. Foos Scholarship (1) GR major in LIS; academic ability; awarded by SLIS.

***Charles Patterson Scholarship (1)** GR major in LIS; academic ability; full-time or part-time student; pursuing a CLIS degree or other post-master's degree program as the School may offer in the future; awarded by SLIS.

***Friends of the Lafayette Parish Public Library Fellowship (1)** GR major in LIS; academic ability; resident of Lafayette Parish; awarded by SLIS.

***H. W. Wilson Scholarship (1)** GR major in LIS; academic ability; part-time student; awarded by SLIS.

Louisiana Library Association Trustees Section Fellowship (1) GR major in LIS; academic ability; LA resident interested in public libraries; awarded by SLIS.

***John and Hester Slocum Fellowship (1)** GR major in LIS; academic ability; resident of New Orleans area; awarded by SLIS.

Federal Financial Aid Programs

LSU administers all Title IV federal programs which are based on a student's demonstrated financial need. Funds received from the federal programs help students to cover school expenses, including tuition and fees, room and board, books and supplies, and transportation. All such programs are subject to regulations authorized by the United States Department of Education, as well as university policies consistent with these federal regulations and are subject to change.

Detailed information on these programs can be found on the Internet at www.lsu.edu/financialaid.

Eligibility for Financial Aid

All students must meet the following criteria to apply for Title IV federal aid—grants, work study, and loans:

- Be enrolled as a regular student in a degree-granting or certificate program.
- Be a U.S. citizen or eligible noncitizen (permanent resident).
- Be enrolled at least half-time (most programs—regular semesters: undergraduate, six hours; graduate, five hours;
- Not be in default on prior student loans or owe a refund on a federal grant.
- Be making satisfactory academic progress as described in the section, *Satisfactory Academic Progress for Purposes of Financial Aid Eligibility*.

Application for Federal Financial Aid

Students who wish to apply for the programs described in this section should file either the *Free Application for Federal Student Aid (FAFSA)* or the *Renewal Application*. The FAFSA is available online at www.fafsa.gov. It is recommended that the application be filed no later than March 1 for summer or fall enrollment or October 1 for spring enrollment. These applications cover aid awarded for the upcoming academic year (beginning with the summer term) and application must be made each year.

Once the Office of Financial Aid and Scholarships has received your FAFSA, additional documentation will be requested through your myLSU accounts. To receive a loan for the academic year, the deadline to return all required documents is the first business day of May. To receive a semester only loan, the deadline to return all required documents is:

- Summer-only loans—Last business day of July
- Fall-only loans—First business day of December
- Spring-only loans—First business day of May

For consideration for Pell grants only, documents may be accepted later than the stated dates. Check with the Financial Aid Office for deadlines.

Once all documents are processed, an award letter will be sent via the student's myLSU account to allow them to accept or decline their aid. The deadline for a student to accept a loan is:

- Semester-only loans—First day of final exams for that semester
- Academic-year loans (summer/fall/spring or fall/spring loans)—First day of spring semester final exams

Please note that students will not receive an award notice until all verification documents have been properly submitted and processed. Documents submitted after the stated deadlines may not result in an award. Students submitting documents after the stated deadlines may jeopardize their opportunity to receive funding for that academic year.

For additional information on these programs, as well as, information regarding how financial need is determined and an LSU student's cost of attendance, visit www.lsu.edu/financialaid.

Grants

- *Federal Pell Grants*—Undergraduate students working toward their first degree are eligible for consideration. Eligibility is determined by a federal need analysis formula.

- *Federal Supplemental Educational Opportunity Grants*—Undergraduate students working toward their first degree, who show exceptional financial need may qualify. Funds are limited.
- *Leveraging Educational Assistance Partnership (LEAP)*—Undergraduate students working toward first degree, who show financial need may qualify. Student must be a Louisiana resident and have a 3.00 GPA.
- *Academic Competitiveness Grant (ICG)*—At least half-time undergraduate students who completed a "rigorous" high school program of study and are: (1) eligible for a Federal Pell Grant; (2) have earned less than 60 credit hours; and (3) meet several other requirements may qualify for this program.
- *National Science and Mathematics Access to Retain Talent Grant (National SMART Grant)*—At least half-time undergraduate students who have earned between 60 and 119 credit hours who are: (1) eligible for a Federal Pell Grant; (2) majoring in specific math, science, or critical foreign languages; and (3) meet several other requirements may qualify for this program.

Campus-Based Programs

- *Federal Perkins Loans*—Low-interest (5 percent) loans made by LSU and repaid to LSU. Interest is subsidized while the student is in school. Students must show financial need and be enrolled at least half-time. Deferment and cancellation privileges are available under certain circumstances. Funds are limited.
- *Federal Work-Study Program*—Campus jobs provided to full-time students, not on academic probation, who show financial need. Students earn an hourly wage (beginning at minimum wage) and are paid every two weeks. Students who are awarded Federal Work-Study employment have the option of choosing job sites designated as community service agencies. Funds are limited.

William D. Ford Federal Direct Loans

LSU participates in the following Loan Programs:

- *Direct Subsidized Stafford Loans*—Based on financial need, the interest on this loan does not accrue while the student is in school. Payments are deferred until six months after the student ceases being enrolled on at least a half-time basis.
- *Direct Unsubsidized Stafford Loans*—This program enables students to borrow, regardless of need. Interest will accrue on this loan while the student is enrolled, and may be paid or capitalized as agreed by the borrower and the lender.
- *Direct Parent Loan for Undergraduate Students (PLUS)*—This program allows parents of dependent students to borrow per year up to the cost of education, less any other aid. The repayment period begins on the day the loan is disbursed, and the first installment to the DOE is due within 60 days of that date. This loan is not based on need.
- *Direct Graduate PLUS Loans (GRAD PLUS)*—This program is a loan for graduate and professional students that are taken in their own name. This loan will give these students a valuable federal loan alternative to private loans. Just like parent borrowers, these students will be able to borrow under the PLUS program up to the cost of education less other aid received. In addition, these borrowers will have to meet the same credit eligibility requirements that apply to parent borrowers.

Loan disbursements normally occur the week prior to the start of classes. Depending on the award package, loans will be disbursed accordingly: (1) summer, fall, and spring loans will occur in three equal disbursements; (2) fall and spring loans will occur in two equal disbursements; and (3) semester only loans will disburse in one disbursement at the start of the semester. All federal aid funds are applied directly to your student account in the Office of Bursar Operations. If the amount credited to your account is greater than the amount you owe to the university, you will be issued a refund for the credit balance. Allow up to seven business days for the Office of Bursar Operations to process a direct deposit or refund check.

Students borrowing under the William D. Ford Direct Loan Program described above, except Parent PLUS, are required by federal regulation to have an *entrance counseling session* before they receive their first disbursement at LSU. This brief online session explains important information about borrowing student loans and money management during school. When a student borrower graduates, resigns, or otherwise ceases to be enrolled on at least a half-time basis at LSU, he/she is required to attend an *exit counseling session*. The online session explains what the borrower should expect upon entering loan repayment. Entrance counseling can be accomplished at www.studentloans.gov. Exit counseling can be accomplished at www.nslds.ed.gov. For

additional information on a student's rights and responsibilities regarding federal financial aid, refer to www.lsu.edu/financialaid to view *The Guide to Federal Student Aid* published by the U.S. Department of Education.

Loan Cancellation

The deadlines for a student (or parent in the case of a PLUS loan) to cancel one or more of their loans or disbursements of their loan(s), is as follows:

- Academic year loans: 1st business day of May
- Summer only loans: Last business day of July
- Fall only loans: 1st business day of December
- Spring only loans: 1st business day of May

Contact the Office of Financial Aid and Scholarships within the Office of Enrollment Management for information on how to complete this process. Exceptions to the stated deadlines will be made on a case-by-case basis.

Satisfactory Academic Progress for Purposes of Financial Aid Eligibility

Undergraduate Students

In order to receive financial aid, a student must be making "satisfactory academic progress. For the purpose of participating in any of the federal student aid programs, the LSU Office of Enrollment Management has established the following policy for determining satisfactory academic progress for undergraduate students:

- Students must have a 2.0 cumulative GPA at the end of each fall, spring, and summer semester.
- Students must earn at least 75 percent of all hours attempted.
- Students may only receive financial aid for a maximum of 160 attempted credit hours (215 for a five year curricula).
- Students pursuing multiple bachelor's degrees may only receive financial aid for a maximum timeframe of 133 percent of the minimum hours to complete the degree minus the hours completed as general education courses.

If these established criteria are not met at the end of the fall, spring, or summer semesters, students may seek to appeal if mitigating circumstances affected their academic performance. For a student to re-establish eligibility they must either (1) receive an approved appeal or (2) meet the Satisfactory Academic Progress requirements at the end of the next spring semester. The complete Satisfactory Academic Progress policy may be viewed at www.lsu.edu/financialaid.

Graduate/Professional Students

For the purpose of participating in any of the federal student aid programs, the LSU Office of Enrollment Management has established the following policy for determining satisfactory progress for graduate and professional students:

Graduate Students:

- Students must have a 3.0 cumulative GPA at the end of each fall, spring, and summer semester.
- Students must earn at least 75 percent of all hours attempted.
- Students may only receive financial aid for a maximum of 40 attempted credit hours.
- Students pursuing multiple master's degrees will be allowed an additional 133 percent of the published length of the academic program.
- Doctorate students may receive financial aid for a maximum of seven years from the first semester of their program.

Professional Students:

- Students must have a 2.0 cumulative GPA at the end of each fall, spring, and summer semester.
- Students must earn at least 75 percent of all hours attempted.
- Students pursuing DVM degrees may only receive financial aid for a maximum of 236 attempted credit hours.
- JD/CL students may receive financial aid for a maximum of 125 attempted credit hours.

If these established criteria are not met at the end of the fall, spring, or summer semesters, students may seek to appeal if mitigating circumstances affected their academic performance. Students are notified when they are not considered to be making satisfactory academic progress at the end of each semester. For a student to re-establish eligibility they must either (1) receive an approved appeal or (2) meet the Satisfactory Academic Progress requirements at the end of the next spring semester. The complete Satisfactory Academic Progress policy may be viewed at www.lsu.edu/financialaid.

Resignations/Unofficial Withdrawals

Students who receive financial aid funds and then resign or unofficially withdraw (cease attendance) during the first 60 percent of the enrollment period will be required to repay all or part of the aid they received. The amount of aid that must be returned is based on the period of time the student remained enrolled. Detailed information regarding the return of funds and postwithdrawal disbursements, if applicable, is located at www.lsu.edu/financialaid.

Federal aid must be returned within 45 days to the appropriate programs in the following order: Unsubsidized Federal Stafford Loans, Subsidized Federal Stafford Loans, Perkins Loans, PLUS (Parent) Loans, Graduate PLUS Loan, Pell Grants, Academic Competitiveness Grant (ACG), National SMART Grant and SEOG. The amount of aid to be returned will be calculated at the time of resignation. For unofficial withdrawals, the amount will be calculated at the end of the enrollment period. Until this obligation is settled, requests for academic transcripts will not be processed and any further financial aid may be in jeopardy.

Campus Employment

Those students who want to work on campus, but do not qualify on the basis of financial need, may seek regular student employment by contacting various departments on campus. Only full-time students who are not on academic probation are eligible to hold campus jobs. Graduating seniors who are part-time in their final semester may have permission to work in a campus job. The Career Services location in B-4 Coates Hall provides assistance to those who seek part-time, internship, co-op, or volunteer positions on and off campus. Graduate students should inquire about the availability of assistantships in their departmental offices. For additional information, visit careercenter.lsu.edu.

Short-Term LSU Loans

Full-time students, who have completed registration, and have not received a credit balance check, may apply for short-term Hiram Student Loans in the amount of \$300 for undergraduate students and \$500 for graduate/professional students. Students must not be on academic probation to receive these loans. Students must have repaid any prior short-term loans to be eligible. Loans are made starting on the first day of classes and continues for the first two weeks of classes. Students are permitted a maximum of 60 days to repay the loan in full. A 2 percent service charge is assessed on the amount borrowed. This 2 percent service charge is equivalent to an annual interest rate of 12 percent.

Hiram Student Loans are to be repaid at the Office of Bursar Operations, 125 Thomas Boyd Hall, on or before the maturity date shown on the promissory note signed by the student at the time the loan was negotiated. Students who fail to repay Hiram Student Loans by the maturity date may jeopardize their chances of receiving future loans.

Accounts that must be turned over to LSU's attorneys for collection are assessed an additional collection fee. *All international students who are interested in Hiram Loans should contact the International Student Office prior to receiving loans or working in jobs on campus.*

Veteran's Benefits

The Office of the University Registrar, 112 Thomas Boyd Hall, provides counseling and information for veterans attending LSU. Enrollment certifications to the Department of Veterans' Affairs are handled through this office, and all veterans and eligible dependents of deceased or disabled veterans are urged to establish contact with the Department of Veterans' Affairs when they arrive on campus. New students who wish to receive advance pay should notify this office at least 30 days prior to registration. Information is also available at the Department of Veterans' Affairs website: <http://uiswcmweb.prod.lsu.edu/ova/>

Undergraduate Fees and Expenses

The Board of Supervisors may adjust fees and costs for dining plans and housing at any time and without providing advance notice to students. Please check with the Office of Budget & Planning's website, www.bgtplan.lsu.edu, for up-to-date fee information.

Fees and Expenses

Student expenses, other than campus fees and nonresident fees, will vary with the individual. A Baton Rouge area student living with parents or a student living on campus spends about \$2,185 in addition to fees, housing, and a dining plan per school year. A student living off campus can expect to spend at least \$9,079 per academic year for rent, food, clothing, laundry, cleaning, books and school supplies, transportation, entertainment, and incidentals.

Total first-year expenses for Panhellenic sororities, including some one-time fees, average \$2,600; subsequent yearly costs are approximately \$2,000, not living in the house. Meals are additional and are \$650. Living in the house, a member's second year is approximately \$6,542, which includes room and board. Costs for IFC fraternities average \$5,175 for the first year, which includes some one-time fees, dues, social fees, and meals at the house, which are required for most first-year members; subsequent yearly costs are approximately \$1,600 without meals. Living in the house, a member's second year is approximately \$6,400, which includes room and board.

The following is an **approximation** of what a student may expect to spend each semester for fees, housing, and dining plan.

Semester Fees for Undergraduate Students

Please refer to the Office of Budget & Planning website (www.bgtplan.lsu.edu/fees.htm) for the listing of current fees.

Housing Fees

Published on-campus rental rates for residence halls and apartments are per semester, per student. Please refer to the Residential Life website (www.lsu.edu/housing) for a listing of current rates.

LSU Dining

Please refer to the LSU Dining website (www.lsudining.com) for information on meal plans, locations, and pricing.

Application Fee

A *nonrefundable application fee* of \$40 is required upon submission of the online application. Online options for payment include credit card or bank draft. In addition to this fee, a *nonrefundable late application fee* of \$15 is charged to students who file applications after **December 1** for the spring semester, after **April 15** for the summer term, and after **April 15** for the fall semester. Applications submitted after the deadline date will be considered on an appeal basis only. The university is not responsible for cash sent by mail.

Graduation Fees

- Bachelor's degree fee, \$25
- Duplicate diploma fee, \$20 (charged if a diploma is ordered and student does not graduate at that commencement)
- Replacement diploma fee, \$30

Special Fees

Academic Excellence Fee

The Academic Excellence Fee is used to promote academic excellence by enhancing instructional programs.

Operational Fee

During the 2004 Regular Session, the Louisiana Legislature passed House Bill 1062 authorizing the LSU Board of Supervisors to assess an operational fee of up to four percent of the total mandatory tuition and fees. The operational fee is used to cover state mandated costs and enhance instructional programs at the university.

Student Technology Fee

This fee is dedicated to the acquisition, installation, maintenance, and intelligent use of state-of-the-art technology solely for the purpose of supporting and enhancing student life and learning and preparing graduates for the workplaces of the 21st century.

Building Use Fee

During the 2013 Regular Session, the Louisiana Legislature passed House Bill 671, authorizing the LSU Board of Supervisors to assess a building use fee beginning in the fall of 2013. The fee will be used to construct, acquire, repair, maintain, operate, or improve the facilities and physical infrastructure of the university.

Student Health Fee

During registration, all full-time students are assessed the student health fee. This fee, included in the required fees, entitles the student to use of the Student Health Center. Please refer to the Student Health Center website (www.lsu.edu/shc) for a listing of exact fees.

There is no charge to visit primary care and specialty medical clinicians, but charges are assessed for procedures, injections, prescriptions, diagnostic imaging, and laboratory work. Students can also see a mental health clinician, health educator, and registered dietitian at no additional charge.

Part-time students have the option to pay the student health fee. They can elect to pay the fee when they register for classes or at any time during the semester. They start receiving services at the time they pay the fee.

If their student spouse is eligible for services, non-student spouses have the option to pay the student health fee. Payment of the fee entitles them to the same services as full-time students. Ancillary service charges (lab, pharmacy, diagnostic imaging) will be assessed at current student rates.

Non-student spouses who have not paid the student health fee are permitted to purchase prescriptions and over-the-counter items in the pharmacy. No additional fees will be added to the cost of their pharmacy purchases.

Student Recreation Fee

During registration, all full-time students are assessed the student recreation fee. This fee entitles students membership to University Recreation and access to the UREC Student Recreation Complex and UREC Sport & Adventure Complex. Please refer to www.lsu.edu/urec for a listing of the current rates, programs, and services.

Part-time students may elect to purchase a UREC membership at the current student rate. Memberships may be purchased at the Student Recreation Center guest services desk. Student spouse, dependent, and family memberships are also available.

Audit Fees

Fees for auditing courses are in accordance with the "Regular Semester" and "Summer Term" fees. Fees for students enrolling for combined credit and audit work will be assessed in accordance with total hours scheduled.

Registration through Career Services Industrial Cooperative Education or Internship Programs

Students enrolled in the alternating Industrial Cooperative Program or Internship Program pay the tuition and required fees as follows:

Cooperative Education or Internship Only

Students enrolled in cooperative education or internship only during the fall, spring, or summer semester pay the \$50 co-op or intern fee and all full time required fees (excluding the Student Sports Recreation and Student Health Service Fee). Please refer to the Office of Budget & Planning website at www.bgtplan.lsu.edu/fees.htm for the listing of current fees.

Cooperative Education or Internship & Three-Hour Course

Students enrolled in cooperative education or an internship and a three-hour course during the fall, spring, or summer semester pay the tuition for three hours of credit and all full time required fees (excluding the Student Sports Recreation and Student Health Service Fees). Please refer to the Office of Budget & Planning website at www.bgtplan.lsu.edu/fees.htm.

Three-Week Summer Short Courses

See note section at bottom of Summer Student Required Fees Schedule on the Office of Budget & Planning website at www.bgtplan.lsu.edu/fees.htm.

Undergraduate Geology Field Fees

Students enrolled in undergraduate geology field courses must pay the \$150 camp fee, tuition, required fees, and non-resident fee (if applicable) for six hours of credit. With a few exceptions, these fees conform to the summer term fee schedule. Please refer to the Office of Budget & Planning website at www.bgtplan.lsu.edu/fees.htm.

Other Fees

- A small number of curricula and courses require the payment of additional fees. These fees are detailed in the college, school, departmental listings, or in the course descriptions.
- Students registering for *degree only* pay no registration fee. (Such students must register through the Office of the University Registrar no later than the beginning of the semester or summer term when the degree is to be conferred.)
- *Departmental Proficiency and Advanced-Standing Examinations*- \$20 per examination. An additional \$20 processing fee is assessed for each examination administered by the Center for Assessment & Evaluation. These examinations are given free of charge to beginning freshmen who are participants in the Spring Invitational, Freshman Orientation, or Special International Student Testing programs, provided the students complete the testing by the final date to add courses for credit during their first term of enrollment at LSU. All other students must pay the fees specified above.

- Each LSU nonimmigrant student will be charged \$10 per semester to support the programs, operations, and maintenance of the *International Cultural Center*. They will also be charged \$50 per semester for International Students Status Compliance. This service charge will allow the LSU International Services Office to meet federal mandates and continue to provide the best information and professional services to the international population at LSU.

Motor Vehicle Registration Fee

All students (full-time, part-time, night, and auditors) who operate or expect to operate a motor vehicle on campus regularly or occasionally are required to register with the Parking & Transportation Services. A registration fee will be charged for each permit issued. The exact amount of this fee will be published each year in the *Traffic & Parking Regulations* issued by Parking & Transportation Services.

Student Health Insurance Plan

A student health insurance plan is offered to students and their eligible dependents through an insurance company approved by the university. *This coverage is strongly recommended to relieve students of possible financial strain in meeting expenses for medical services that the Student Health Center does not provide.*

The university requires that all nonimmigrant international students on "F" and "J" visas enroll in the LSU Student Insurance Program at the time of registration or provide evidence in advance to International Services (IS) of acceptable insurance coverage. All acceptable insurance plans must meet or exceed the following:

- Policy minimum of \$50,000 per accident or sickness for F-1 and F-2 (issued I-20 forms) or \$100,000 minimum aggregate. Policy minimum of \$50,000 per accident or sickness for J-1 and J-2 visa (issued DS-2019 forms) holders (required by Department of State regulations)
- Maximum deductible amount of \$500 (for multiple party plans: \$500 per person)
- There must also be a maximum deductible for each 12-month period of \$500 per covered person, not to exceed \$1,000 per policy for multiple-party plans
- Policy benefits must meet or exceed those set forth in the LSU endorsed Student Accident & Sickness Insurance plan (including maternity coverage paid as any other health conditions), regardless of gender
- A U.S. representative physically located and operating in the U.S. with a U.S. telephone number/contact who acts on behalf of insurance company/insurance plans: (benefit verification and processing ability)
- Policy must cover routine care visits for colds, flu, etc., and not just/only emergency care
- For J-1 and J-2 visa (issued DS-2019 forms) holders (required by the United States):
 - Underwritten by an insurance corporation having an A.M. best rating of "A-" or above, an Insurance Solvency International Ltd. (ISI) rating of "A-" or above, a Standard & Poor's Claims-Paying Ability rating of "A-" or above, a Weiss Research, Inc. rating of "B+" or above; or
 - Backed by the full faith and credit of the government of the exchange visitor's home country
- Minimum \$7,500 benefit for Repatriation Coverage to home country (pre-existing conditions related deaths must be covered including suicide; coverage must remain in force during entire stay in the U.S.)
- Minimum \$10,000 benefit for Medical Evacuation Coverage to home country (pre-existing conditions related deaths must be covered; coverage must remain in force during entire stay in the U.S.)
- The School of Veterinary Medicine students are required to have the student health insurance coverage through enrollment in the university-sponsored plan or to provide proof of participation in an equal or higher coverage insurance program.

Payment of Fees

Students are notified by e-mail each semester by the Office of Bursar Operations of the date the online fee bill is available on myLSU. All fees and other university charges are due by the date indicated on the online fee bill.

Payment Options

- *Online check/bank draft* • Pay your fee bill with an online check or bank draft via myLSU from the "Fee Bill" application.
- *Credit card* • Pay your fee bill with a MasterCard, Visa, American Express, or Discover credit card via myLSU from the "Fee Bill" application. Note: A 2.5 percent processing fee will be added to credit card payments.
- *Mail* • Print and return the online remittance stub and payment to the LSU Office of Bursar Operations, 125 Thomas Boyd Hall, Baton Rouge, LA 70803.
- *In person* • Pay by cash, check, or money order in 125 Thomas Boyd Hall.
- *Deferred payment plan* • Eligible student can defer 50 percent of the current semester charges. Payment of 50 percent of current semester charges and any prior account balance must be received by the payment due date. Note: A \$15 service charge will be assessed on all deferrals. The deferred payment plan may be selected via myLSU from the "Defer Payment/Payroll Deduct" application.

Late Registration Service Charge

Students who do not pay fees by the deadline must pay a \$75 late registration service charge when subsequently registering.

Fee Exemptions for Individuals Over 65

According to the provisions of Act 525 of the 1975 Louisiana legislature, individuals over 65 years of age may enroll in one or more college-level courses and be exempt from the payment of the university fee. Further information may be obtained from the Office of the University Registrar.

Financial Obligations to the University

A student will be subject to dismissal from the university as a result of failure to pay fees and/or other charges when due or when a check offered by the student in satisfaction of an obligation to the university is not honored by the bank on which it was drawn. Due notice of the delinquency shall be given to the student by the Office of Bursar Operations. There will be a charge of \$25 per returned check.

Refund of Fees

- Refund of the university fee, nonresident fee, student health service fee, academic excellence fee, operational fee, and student technology fee will be made on the basis of the official withdrawal of the student. Refer to chart below for the schedule for refund of fees. ("Days of classes" are days on which regular classes are held.)
- No refunds will be processed for at least six weeks after registration.
- No refunds will be made to anyone who owes the university. Student-initiated resignations will not be completed until all money owed to the university is paid.
- Field service and transportation fees will be refunded on an individual basis upon recommendation of the department concerned.
- Reductions and increases of fees resulting from student schedule changes will be refunded or charged in accordance with the schedule below.
- All full-time students who become part-time students after the last day to receive a refund will continue to be eligible for all student activity privileges.
- Students in good standing at the university, registered in any semester or summer term, who volunteer for military service before the day mid-semester examinations begin, will have the university fee, nonresident fee, student technology fee, and student health service fee refunded. Students in good standing at the university, registered in any semester or summer term, who volunteer for military service after mid-semester examinations begin, will be refunded

50 percent of the university fee, nonresident fee, academic excellence fee, operational fee, student technology fee, and student health service fee. See also "Refund of Residence Hall Rent" in the "Student Life" section of this catalog.

- Students registered in any semester or summer term, who are called to active duty in the armed forces through the last class day of the semester or summer term, will have 100 percent of the university fee, nonresident fee, academic excellence fee, operational fee, student technology fee, and student health service fee refunded. See also "Refund of Residence Hall Rent" in the "Student Life" section of this catalog.
- For information on the refund of other fees (such as housing, meal plans, etc.) refer to the section in this catalog pertaining to those fees.

Title IV program fund recipients resigning from the university without completing at least 60 percent of the enrollment period will be required to return all or part of the aid they received to the appropriate programs in the following order: Unsubsidized Federal Stafford Loans, Subsidized Federal Stafford Loans, Perkins Loans, PLUS (Parent) Loans, Graduate PLUS Loans, Pell Grants, Academic Competitiveness Grant (ACG), National SMART Grant and SEOG. Specific information regarding this refund schedule is available at www.lsu.edu/financialaid.

SCHEDULE FOR REFUND OF FEES				
Semester • Summer Term	100% Refund	90% Refund	50% Refund	No Refund
Fall or Spring Semester	Before class begins	First 6 class days	7 th –24 th class day	After 24 th class day
Regular Semester Eight-Week Sessions	Before class begins	First 3 class days	4 th –12 th class day	After 12 th class day
Summer Session A	Before class begins	First 3 class days	4 th –12 th class day	After 12 th class day
Summer Session B	Before class begins	First 3 class days	4 th –7 th class day	After 7 th class day
Intersessions	Before class begins	First class day	2 nd –4 th class day	After 4 th class day

Undergraduate Degree Requirements

LSU has the responsibility to protect its educational mission and the health and safety of its community and of the property therein, through regulating the use of university facilities and setting standards of scholarship and conduct for its students.

Because of its educational mission, the university also has the responsibility to carry out its disciplinary authority in a manner that contributes to the development and education of the student.

The disciplinary authority of LSU is derived from the provisions of the *Louisiana Revised Statutes*. These statutes established the Board of Supervisors and gave it the power to adopt rules and regulations necessary for the government of the university consistent with its mission and to adopt rules and regulations governing student conduct.

Student Responsibility

Each student is responsible for completing all requirements established for his or her degree by the university, college, and department. It is the student's responsibility to learn these requirements; a student's advisor or counselor will not assume that responsibility.

Any substitution, waiver, or exemption from any established departmental or college requirement or academic standard may be accomplished only with the approval of the dean of the college offering the major. Exceptions to university requirements, including general education requirements, will be authorized only with the recommendation of the dean of the college offering the major and the approval of the Office of Academic Affairs.

Each student must see an academic advisor or coordinator in the academic dean's office offering the major to review and sign a final degree audit report during the semester prior to the semester in which the degree is to be awarded. See the degree requirements sections in the individual college sections in this catalog to determine if degree check out is required earlier than the semester prior to the semester in which the degree is to be awarded.

The Catalog that Determines the Curricular Requirements for an Undergraduate Degree

Degree-seeking students are expected to adhere to the curricular requirements for an undergraduate degree based on the *General Catalog* at the time of entry into the university. This catalog may be used for a maximum of 10 years provided enrollment is not interrupted for two or more consecutive regular semesters. Students whose enrollment is interrupted for two or more consecutive semesters follow the curricular requirements stated in the catalog issue at the time of readmission.

Degree-seeking students who are currently enrolled at the university may opt to follow new curricula requirements that are revised in catalogs issued after their initial enrollment. This decision must be approved by the students' academic deans.

Transfer students may use the *LSU Catalog* in effect at the time of their first entry into any accredited higher education institution provided that the transfer to LSU is made within five years of their first entry to a college or university and provided enrollment has not been interrupted for two or more consecutive regular semesters.

Students enrolled in non-degree programs are expected to adhere to curricular requirements in effect at the time they are admitted to a degree program.

The university will make a reasonable effort to honor the curricular requirement in the chosen issue of the catalog. However, because courses and programs are sometimes changed or discontinued, the university, having sole discretion, shall make the final determination of whether or not curricular requirements are met.

Note: Admission to LSU does not guarantee admission to a student's program of choice; many programs have highly selective admission criteria. Students follow the senior college program admission requirements in their catalog of entry into LSU. However, students transferring from another institution to LSU or from one major to another within the university must meet the

program admission requirements in the catalog in effect at the time of transfer. Students are encouraged to obtain the most up-to-date and accurate information about requirements and changes at www.lsu.edu/catalogs.

Catalog Issue and University Policy Changes

The university has the right to implement academic policy changes regardless of a student's year of catalog issue. For instance, a change in a course attribute such as the prerequisite can be implemented immediately after receiving final university approval. It is the student's responsibility to stay abreast of university policies.

Academic Requirements For Obtaining A Degree

- A grade point average of 2.00 ("A" = 4) on all work taken, except for those courses in which grades of "P", "W", or "I" are recorded, is required for graduation. In order to meet graduation requirements, students must have a 2.00 average on work taken at this university (all LSU System campuses) as well as a 2.00 average on their *entire* college record.
- Candidates for a bachelor's degree must earn at least 25 percent of the total number of hours required for the degree at this university and meet the residence requirements of their college as stipulated in each college's and school's section of this catalog.
- After students have earned one-half of the applied credits required for a bachelor's degree, they may not use additional credits earned in a two-year college outside the LSU System to fulfill degree requirements, unless authorized to do so by the dean of their college or school.
- Students must complete a general education component of 39 semester hours in approved courses in six major areas: English composition, analytical reasoning, arts, humanities, natural sciences, and social sciences. Each student must demonstrate computer literacy in ways deemed appropriate by the faculty of the senior college in which the student is enrolled. "The General Education Component of Undergraduate Education " section of this catalog specifies approved courses and the regulations governing applicable credit.
- Students should review specific curricula for precise degree requirements.
- In addition to these minimum requirements, students must meet all special regulations established by the faculties of their respective colleges and listed in each college's section of this catalog.
- Degrees, both honorary and earned, are conferred only by vote of the Board of Supervisors upon recommendation of the faculty of the university or the faculty of the appropriate college, school, or division of the university (all LSU System campuses).
- Once degrees have been conferred, additional majors, minors, concentrations, etc., may not be appended to the degrees.

Undergraduate Areas Of Concentration

An *area of concentration* is an alternative track of courses within a major, accounting for at *least 30 percent* of the major requirements. Establishment of an area of concentration does not require prior approval by the Board of Regents. Areas of concentration are available within most undergraduate curricula. For additional information, see the curricula listed in the appropriate college section.

With the permission of the dean's office offering the concentration, students may earn multiple areas of concentration within a major. To do so, they must declare a primary area of concentration and fulfill all requirements for each area of concentration. Each declared area of concentration must include a minimum of six hours of course work that is unduplicated in any other area of concentration.

Undergraduate Minors

A *minor* is that part of a degree program consisting of a specified group of courses in a particular discipline or field. Establishment of a minor does not require prior approval of the Board of Regents. The minor usually consists of *15 percent* or

more of the total hours required in an undergraduate curriculum. Minors are established by departmental, school, or college faculties. Once a minor has been established, students are subject to the following rules and procedures:

- When a student wishes to pursue a minor, the student must obtain permission from his/her dean's office.
- The course requirements for the minor, including prerequisites, as published in the *LSU General Catalog*, must be followed. Any substitutions in the minor must be approved by the faculty advisor in the department of the college offering the minor and the student's dean's office.
- A student following a particular catalog for the major field typically follows the minor requirements stated in the same catalog. However, exceptions must be approved by the student's dean's office.
- A student must earn a minimum 2.00 GPA in the minor field, although some faculties may impose higher minimum GPA requirements.
- Courses used to satisfy the minor may not be taken on a pass/fail basis, except with permission from the department and the student's dean's office.
- Degree audits for minors will be verified by the college in which the student is enrolled. The minor should be declared no later than graduation check-out time. All course requirements for the minor must be completed by the time of graduation.

Earning Two Degrees or One Degree with Two Majors

With the dean's approval, a student may enroll in two bachelor's degree programs concurrently, and thereby earn two degrees. A student also has the option to earn one degree with two majors listed on the transcript, provided all requirements are completed as of the same commencement.

A student may earn one degree, with two majors listed on the transcript, by completing the residence and academic requirements for each major and the degree program to which it belongs. The student may earn two degrees by, in addition, earning 30 hours more than required for the degree that requires the fewer number of hours.

If the two programs are in different colleges, then the student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. The student must declare a home college, where registration will be initiated and permanent files maintained, and must maintain contact with the second college to ensure that satisfactory progress is being made toward the requirements of its degree program.

Requirements for a Second Baccalaureate Degree

Graduates who wish to obtain a second baccalaureate degree from this university must meet all academic and residence requirements set by the college(s) concerned and must earn a minimum of 30 semester hours beyond the work counted to meet the degree requirements of the first degree. Students may only earn one bachelor's degree at LSU with the same major field of study.

Graduate Credit and Baccalaureate Degrees

Graduate credit courses cannot be used to satisfy any undergraduate degree requirements, including electives. The only exception to this rule is when a student enrolls in a combined curriculum program in which the faculty has approved graduate credit courses fulfilling undergraduate degree requirements.

Procedural Requirements for Obtaining a Diploma

- *During the semester prior to the one in which graduation is anticipated*, candidates must request that the dean of their college evaluate their academic records for compliance with degree requirements. (Each college establishes its own degree requirements, which are listed in that college's section of this catalog.) At the time of degree application, candidates must indicate how they wish their names to appear on the diploma and in the commencement program.

- *At their last registration*, candidates must pay the graduation fee. Students should consult the current *Registration Schedule of Classes* for the deadline to receive a refund of the graduation fee. Students who previously have paid a graduation fee, but who did not graduate at the expected time, must pay a \$20 duplicate diploma fee.
- All financial indebtedness to the university (all system campuses) must be cleared prior to graduation. Students who received Stafford loans will be notified via U.S. mail to complete an online exit interview.

Degree Audit

Degree audit is an online electronic system that monitors the progress of an undergraduate major toward completion of the degree. A currently enrolled student can view a degree audit report through myLSU. The degree audit report is a valuable tool for academic planning because it lists the courses the student has taken, the degree requirements he or she has fulfilled, and the requirements that remain to be completed. Students may request a degree audit report for their current major or for an alternative major.

Comprehensive Academic Tracking System (CATS)

The **Comprehensive Academic Tracking System (CATS)** is designed to help students reach academic success at LSU and make sure they are progressing toward graduation each semester. Each major has a Recommended Path, designed by the LSU departmental faculty, which is the optimal path for graduation in four years. CATS checks students' progress each semester by tracking them on the critical requirements outlined in their Recommended Path and gives feedback when students are not meeting those requirements.

CATS provides feedback on a student's progress in a major, helping them to find the best academic path to complete their degree. By assessing students' progress toward degree completion, CATS will identify those students who may be struggling. This affords the university the opportunity to provide additional counseling and advisement resources to assist students.

Critical Tracking Requirements

The critical tracking requirements have been identified by departmental advisors for each major. The criteria are specific performance measurements that have been singled out as mandatory for progression in that degree program. These are the requirements that students must meet to maintain minimum academic progress and continue progressing in their chosen major.

Minimum Academic Progress

Students must meet the critical tracking requirements within the Recommended Paths to demonstrate minimal progress toward degree completion. Critical tracking requirements typically include both critical courses and minimum GPA requirements. The critical requirements for a given semester are located at the top of a student's recommended path. Additionally, all critical requirements are listed on the top line of each semester, and appear in bold throughout the Recommended Paths.

Recommended Paths for all catalogs from 2013-14 on will be found within each departmental section of the online catalog. Recommended Paths for all catalogs beginning with the 2006-07 version up to the 2012-13 version can be found at cats.lsu.edu/degreepath. Students are encouraged to use these plans when scheduling courses in their chosen program of study.

All full-time, incoming freshmen will be monitored to determine if they have met the critical tracking requirements for their chosen program, regardless of the number of hours earned through dual enrollment or credit by examination. Transfer students enrolling at the university with fewer than 70 credit hours earned will be tracked beginning with their second semester of enrollment. Students who are undecided about their major must follow the Recommend Path and critical tracking requirements established within one of three general areas of interest: Science and Engineering, Arts and Humanities, or Social Sciences. These students will be advised by the Center for Freshmen Year and are required to select a major before scheduling courses for their third semester.

Assessments of Academic Progress

Two assessments run during the semester to determine if students are making minimal academic progress in their degree programs. As a result of these assessments, students will receive a myLSU e-mail notification if they are not making minimal progress. This e-mail contains a link directing them to their myLSU desktop and the CATS Status Application (located under the Student Services tab). The two assessments that run are as follows:

Mid-Semester Assessment – This assessment occurs prior to course scheduling for the upcoming semester. It is run to determine if students are taking the critical courses required for the current semester. If critical requirements are not being met, a hold is placed on the student's registration, preventing them from scheduling for the upcoming semester without first seeing their advisor.

End of Semester Assessment – This assessment occurs after final grades are submitted. It is run to check for all critical requirements, including grades in courses, a student's GPA, and potentially, admission to a senior college. A hold is placed on the student's registration if critical requirements have not been met. If the student has already scheduled for the next semester, he or she cannot make any changes to their schedule until they see an advisor. Additionally, students not meeting minimum GPA requirements are advised to seek guidance from the Center for Academic Success.

Students Who Do Not Make Minimal Progress for Two Consecutive Semesters

If a student is flagged for not making minimal progress in their major in two consecutive semesters, the student will have a hold placed on their registration, **and the student is required to meet with an academic advisor to select a new major that is better aligned with the student's interests and abilities.**

Resources Available to Help With Selecting a New Major

The Center for Academic Success offers study skills workshops and other sessions geared towards improving overall academic performance. Additionally, the Center for Academic Success directs students to programs that would be a better fit for their academic needs and interests.

Career Services offers workshops and counseling assistance to help students select a new major.

Honors

Chancellor's Honor Roll

The Chancellor's Honor Roll is prepared each semester. Undergraduate students completing at least 15 college-level hours at LSU in the semester, with a semester GPA of 4.00 and no "I" grades for the semester, are included on the roll. Independent and Distance Learning courses will not be used to determine eligibility under the 15-hour requirement.

Dean's List

The Dean's List is compiled each semester and summer term. Undergraduate students completing at least 15 college-level hours at LSU in the semester or summer term, with a semester average of at least 3.50, but less than a 4.00, and no "I" grades for the semester or summer term, are included in the list. Independent and Distance Learning courses will not be used to determine eligibility under the 15-hour requirement.

University Honors

Students awarded the baccalaureate degree with honors must satisfy all requirements imposed by their colleges, schools, or departments. In addition, two GPAs will be computed for each student: (1) on all work completed and (2) on all work completed at LSU (all System campuses). These GPAs will be inclusive of all grades, including those previously excluded through the Grade Exclusion Policy. All grades will be used to determine University Honors. The **lower** of the averages will be used to determine eligibility for Latin honors as follows:

- *summa cum laude* if the GPA is at least 3.90,
- *magna cum laude* if the GPA is at least 3.80,
- *cum laude* if the GPA is at least 3.70.

Students in combined undergraduate, graduate, and professional curricula (medical, veterinary medicine, law, allied health) who earn more than 50 percent of their credits in an undergraduate college at LSU (all system campuses) with a GPA greater than or equal to 3.70 are eligible to receive their degrees with honors. To determine honors, the student's average at LSU (all LSU system campuses) is weighted with the average furnished by the professional school.

University Medal

At each commencement, the University Medal for "Highest Academic Achievement" is awarded to the undergraduate student (or students) graduating with the highest GPA, provided that more than 50 percent of the credits required for the degree has been earned at LSU-BR. Grade point averages will be computed for (1) all work completed and (2) all work completed at LSU-BR, with the **lower** of the two averages determining eligibility for the medal. The grade exclusion GPA will not be used in determining University Medalists. All grades will be used to determine medalists.

Regulations

Enrollment At LSU

Registration

Students must complete registration, including payment of fees as stipulated in the "Undergraduate Fees and Expenses" section of this catalog, to attend class. The Office of the University Registrar will provide evidence of registration to instructors. *Students whose names are not on the official roster may not attend the class until officially registered for that class.*

Approval to register by the student's dean's office is required after the official "final date for adding courses for credit" specified in the "Academic Calendar".

Identification Cards

When first enrolled in the university, students are issued permanent photo identification cards (Tiger Cards) at no cost. The ID card is the property of the university and must be retained for each subsequent term of enrollment.

Lost or stolen ID cards must be reported to the Tiger Card Office, 109 LSU Student Union, as soon as the loss or theft is discovered. Students who do not report lost or stolen cards in a timely manner may be held responsible for any charges incurred on the cards.

Students who alter or intentionally mutilate a university ID card, who use the ID card of another, or who allow others to use their ID cards may be subject to university discipline.

A charge is assessed to replace a lost, stolen, or mutilated ID card, even if the student is re-enrolling after an interruption of study. If a replacement card is issued, the original card is no longer valid.

Addresses

Students are expected to keep the university informed of their current addresses. Students will be held responsible for communication from any university office sent to the most recent address(es) provided. Changes in address may be made by using myLSU, in deans' offices, or in the Office of the University Registrar.

Students may choose to withhold information from the Internet using myLSU and following the procedure listed.

Students' names, e-mail addresses, and telephone numbers are displayed on the myLSU directory. Students may withhold this information by using myLSU and following the procedure provided at that site.

First Class Meeting

Students who fail to attend the first class meeting without prior arrangement with the department may be dropped or required to drop the course to make space available to other students.

Students are responsible for ensuring that they have been dropped from the course; otherwise, they are liable for a grade of "F."

Attendance

Students should observe any special attendance regulations stated by their college, school, division, or the instructor. The instructor may report a student's absences and the student may be placed on attendance probation by his or her dean. A student may be dropped from the college by violating the written terms of such probation.

An absence due to illness or other causes beyond a student's control will be excused when the instructor is convinced that the reason for absence is valid. The university's *Policy Statement 22* discusses approved trips, activities, and other instances of excused absences.

Instructors will excuse any student who is unable to attend or participate in class or an examination on a religious holiday supported by the student's religious beliefs. It is the student's responsibility to anticipate such conflicts and discuss this with the faculty member well in advance.

Adding or Dropping Courses

To avoid schedule changes after the official registration period, students are encouraged to plan each semester's course work in consultation with academic advisors. Any schedule changes should be made as soon as possible after the beginning of classes.

Students may drop courses through the seventh class day without receiving a grade of "W." Students may add courses through the eighth class day. A "W" grade will be entered on a student's record for any course dropped between the seventh class day and the final date for resigning from the university and/or dropping courses. Students should consult the academic calendar maintained by the University Registrar (www.lsu.edu/registrar) to determine deadlines each semester.

Undergraduate "W" Grade Policy

Within the limits of the following table, "W" grades do not affect a student's GPA; however, an excessive number reflects negatively on a student's record and involves substantial cost by way of tuition, books, room and board, and lost opportunities. To graduate in a timely manner, a student should complete at least 15 hours per semester and plan on attending at least one summer term.

Withdrawals cannot exceed the numbers allowed in the following table unless authorized by the dean of the student's college. Withdrawal allowances cannot be carried forward.

Hours Earned	Withdrawals Allowed Since August 2010
0-59	3
60-119	3
> 119	1

Hours Earned does not include advance standing type credits with respect to this policy.

"W" grades earned via the following methods do not count in the number of drops permitted:

- Resignation from the university.
- Courses dropped during the summer term or intersessions.
- Courses offered through the Division of Continuing Education that students drop.

Undergraduate Enrollment in Graduate Courses

Refer to "Course Numbering System" in the section, "Courses: General Information," in the catalog for information on the enrollment for undergraduate credit in 4000- or 7000-level courses.

Superior undergraduates may also register for graduate credit under the section "Accelerated Master's Degree Program". Requirements for the program are specified in "Accelerated Master's Degree Program," found in the section, "The Graduate School," in this catalog.

Registration of LSU Nonacademic Employees

Full time, nonacademic (excluding faculty) employees, who have been employed at least one year, with approval from their department head or supervisor, may register for job-related undergraduate or graduate courses at any LSU System campus for up to six hours per semester and receive full tuition exemption. Only three hours per week of the approved job-related courses may be taken during work time without charge to annual leave. Continued participation in the tuition exemption program will be based on making satisfactory progress, as determined by the employee's supervisor. Satisfactory progress shall generally be interpreted to include completion of the course with a passing grade. (Please note that the provisions of this policy do not apply to specialized self-supported educational programs such as the Executive MBA Program. Employees should consult with the Chief Academic Officer on their campus to determine eligibility.)

Full-time, nonacademic, and other academic (excluding faculty) employees, during the first year of employment and with approval from their supervisors, may register, at their own expense, for a job-related course and be allowed to take the course during work time for no more than one hour per day up to three hours per week.

Cancellation of Registration

Students who drop all of their classes prior to the first day of class will have their registration canceled.

These students will receive a 100 percent refund (less the \$10 nonrefundable registration fee). *They must apply to reenter the university before they can register for a subsequent semester or summer term.*

Resignation from the University

A student may voluntarily resign from the university beginning with the first day of class through the final day for resigning shown in the "Academic Calendar". Resignation is initiated in the office of the student's academic dean. The student must obtain a resignation form and file the form with the Office of the University Registrar within 10 days after it has been endorsed by each administrative office indicated on the form. *Resignation is not complete until the form is submitted to the Office of the University Registrar.*

Students who absent themselves from the university without leave and without official resignation will not be assigned "W" grades and, at the end of the semester, normally will receive grades of "F" in courses for which they are registered.

Students who withdraw from the university without approval, or who are dropped from the university for any reason, may be ineligible for readmission for a semester or longer.

Academic Credit

Year Classification of Students

The number of semester hours of credit earned determines a student's year classification, as follows:

Freshman • fewer than 30 hours

Sophomore • at least 30, but fewer than 60

Junior • at least 60, but fewer than 92

Senior • 92 or more

Exception • A student in a five-year program with at least 60, but fewer than 136 hours, is a junior; with 136 or more, a senior.

See "Course Numbering System" for regulations governing the level of courses students may take, based on their classifications.

Students are also classified as full-time or part-time in accordance with the following provisions.

Full-Time Students

- *Undergraduate*—To graduate in four years, a student should complete at least 15 hours per semester and plan on attending at least one summer term. Undergraduate students who carry 12 or more hours of resident credit in a regular semester or six or more hours in a summer term are considered full-time.
- *Graduate*—Full-time graduate students enroll in the Graduate School for at least nine hours of resident credit in the fall and spring (six hours in the summer term).

The benefits and privileges accorded to full-time students include: use of the Student Health Center; admission to certain athletic events on presentation of a valid university identification card; one subscription to *The Reveille* (newspaper), the *Gumbo* (yearbook), and the *Legacy Magazine*. Only full-time students will be approved for campus employment or may represent LSU in any athletic, dramatic, literary, musical, or other university organization.

Part-Time Students

Undergraduate students are classified as part-time if they schedule or drop to fewer than 12 hours of course work in a semester or fewer than six hours in a summer term. Criteria for part-time status in the Graduate School are available from "The Graduate School" section of this catalog.

Maximum Credit Load for Undergraduates

Each college establishes the number of semester hours of course work required in each year of its curricula. *Registration for more than 19 hours of degree credit in a regular semester requires the approval of the dean of the student's college. Dean's approval is also required for registration for more than 12 hours in the long summer session, more than six hours in the short session, or more than 12 hours in a combination of summer sessions. With dean's approval, students may schedule up to six hours in an intersession.*

Full-time students who are doing unsatisfactory work because of a heavy academic load may be required by their college dean to withdraw from one or more courses, provided such action does not change their full-time status. Such mandatory withdrawals do not count toward the student's number of permitted "W" grades.

Undergraduate Transfer Credit Policies

The extent to which credit earned in other colleges and universities is accepted toward fulfilling degree requirements at LSU (including all campuses of the LSU System) is determined by the dean of the college awarding the degree. **Students may not receive credit for work taken concurrently at another college or university without prior written approval from their academic dean.**

The Statewide Student Transfer Guide and Articulation System Matrices (Board of Regents' E-matrix) indicate transfer equivalences of courses among Louisiana's public colleges and universities and may be accessed through the Board of Regents' web page at www.regents.state.la.us. The matrices are not all-inclusive; there are additional courses that articulate between campuses. Students are advised to contact their dean's office or the Office of Enrollment Management if they are unclear as to whether academic credit at other institutions is transferable.

Only work that is acceptable by the offering institution as baccalaureate degree credit is recognized. Credit earned in two-year technical or terminal degree programs which, when completed, results in an "associate in applied sciences" diploma may be accepted to the extent that the courses parallel baccalaureate degree work here, as determined by the appropriate department and subject to the normally applicable conditions.

After students have earned one-half of the credits required for a degree, they may not use additional credits earned in a two-year college outside the LSU System to fulfill degree requirements, unless authorized to do so by the dean of the LSU college or school. A maximum of one-fourth of the credit required for the degree may be earned through regionally accredited university correspondence study.

General Education Credit • Deans are to determine the applicability of transfer courses to a component of LSU's general education requirements.

If the college does not approve a transfer course for general education credit, the student may petition the Office of Academic Affairs for a decision.

LSU Transcript—Regardless of whether or not transfer credit fulfills degree requirements, all transfer courses accepted by the university are included on the LSU transcript.

Auditors

An *enrolled student* may be admitted to class as an auditor by obtaining written consent from the course instructor and the dean of the college offering the course. After scheduling the course, students must submit the required approvals to their deans' offices to change their enrollment from credit to audit. Other students who desire *only to audit* (and not to schedule any courses for credit) may obtain special enrollment forms from the Office of the University Registrar. Auditors will not receive credit for courses audited, although courses previously audited may later be taken for credit. See "Undergraduate Fees and Expenses" for a listing of fees for auditing courses.

Change in registration from audit to credit or credit to audit requires permission from the instructor of the course and the student's dean. Approval for change from audit to credit must be obtained no later than the final date for adding courses for credit as shown in the "Academic Calendar." A request for a change from credit to audit must be submitted no later than the final date for dropping courses without receiving a grade of "W."

Independent and Distance Learning Program Courses

An Independent and Distance Learning Program course grade will be posted to the transcript when the course is completed. If a student takes the final examination by the last day of the final examination period of a semester/summer term, the grade will be posted to that semester/term. If the final examination is taken after that date, the IDL Program grade will be posted to the next regular semester or summer term. IDL Program grades will not be posted to Intersession. The grade will be used to determine academic action for registered students at the conclusion of that semester or summer term.

Undergraduate Credit for Repeated Courses Policy

A student may not repeat a course in which a grade of "C" or better has been earned unless the catalog description indicates that the course may be repeated for credit or the student's dean approves the repetition for some special reason. If a student registers for a course in violation of the above policy, the student's dean may deny degree credit for the course.

Unless otherwise stated in the course description, credit will be awarded only once for a course that is repeated. When students are permitted to repeat for credit a course previously taken, only the last grade determines acceptability of the course for degree credit. The last grade earned in a repeated course will be the grade applied toward graduation, even if it should be lower than the previous grade. If a student receives a failing grade when repeating a course for which a passing grade had been previously earned, the student will lose the credit previously earned for the course.

All course attempts will be recorded on the LSU transcript.

Undergraduate Grade Exclusion Policy

As of the 2013 fall semester, the university has implemented the Grade Exclusion Policy. Under this policy, students may improve the undergraduate LSU and cumulative GPAs by repeating a maximum of three courses (up to 12 credit hours) in which a grade of "D" or "F" was received and requesting that the repeat grade be the only one that is used in the calculation. Students can exceed the total hours (more than 12 hours) in completing the third course, but students cannot take a third course if they have already excluded 12 hours. The following rules apply to this policy:

- only three such requests are available to students in their undergraduate careers;
- the policy will apply to courses attempted prior to the 2013 fall semester or thereafter, but the subsequent attempt(s) must be made beginning with the 2013 fall semester;
- the repeated grade must be in the same course rubric and number taken at LSU (if a course is cross-listed, the course must be repeated under the same rubric as it was originally attempted);
- the policy will apply to LSU dual enrollment courses;
- the policy can only apply to courses that have been scheduled (for the current or a future term);
- waitlisted courses are not eligible for grade exclusion;
- transfer courses are not eligible for grade exclusion;
- special topics, independent study, and research type courses are not eligible for grade exclusion;
- variable credit courses are not eligible for grade exclusion;
- courses in which incomplete grades have been awarded are not eligible for grade exclusion;
- courses offered through the Division of Continuing Education are not eligible for grade exclusion;
- academic programs may opt to exempt certain courses from this policy. See [here](#) for a list of courses ineligible for grade exclusion;
- students must file a written petition to invoke the policy with the dean of the college in which the student is enrolled by the last day to add courses in the semester or term in which the subsequent attempt is made;
- petitions filed by student athletes must be approved by the both the dean of the college in which the student is enrolled and the Academic Center for Student Athletes;
- once a petition to exclude a grade has been accepted by the dean of the college in which the student is enrolled, it may not be changed;
- withdrawal from a course for which an exclusion has been approved will not result in the original grade being excluded, but will count toward the three courses or 12 credit hour exclusion limit;
- once a grade exclusion is applied to a course, the quality points and credit hours attempted and earned will be removed from only the calculation of the LSU and cumulative GPAs. Past semester GPAs will not be recalculated;
- grade exclusions do not retroactively change the status of the student's semester academic honors (e.g., Dean's List) or result in a refund of tuition or fees;
- grade exclusions do not result in a recalculation of a student's academic standing (e.g., scholastic warning, probation, or drop) at the end of a previous semester or term;
- the exclusion adjusted GPA will not be used in determining both Latin Honors and University Medalists. All grades will be used to determine Latin Honors and University Medalists.
- the excluded grade will be annotated on the transcript with the symbol "E" to denote that the grade was excluded;
- upon communication to the University Registrar by the Dean of Students or designee, the policy may not be used to exclude a grade assigned as a result of academic dishonesty;
- students may invoke the policy multiple times for the same course;
- once a student has earned a degree, the grade exclusion policy cannot be invoked with respect to any course attempted prior to earning the degree.

Many graduate and professional schools re-compute GPAs in the process of considering an applicant for admission to such programs. The re-computation of GPAs may include restoring the cumulative GPA effects of initial attempts at courses repeated under this policy.

Undergraduate "F" Grade Policy

Students who fail a course twice at LSU may not retake the course without approval from the dean of the student's major college. Appeals to enroll in a course after having failed the course twice need to be initiated immediately following the semester or summer term in which the second failing grade was earned, but no later than the first class day of the next semester or summer term enrolled.

Students who receive an "F" in a course must repeat the course *in the LSU System* in order to receive credit and quality points for it. With *prior* concurrence of the chair of the department in which the course is offered and the dean of the college in which the student is enrolled, credit and quality points may be approved in individual cases for courses repeated outside the LSU System.

Undergraduate Examinations

Credit Examinations

LSU System Credit • Students awarded advanced-standing or proficiency credit on other campuses within the LSU System can transfer that credit to LSU if the basis for awarding the credit is comparable to that on this campus. The student is responsible for requesting that the registrar on the other campus send an official transcript to the LSU Office of Enrollment Management showing the credit earned.

Credit from Other Collegiate Institutions • Credit earned through departmental proficiency examinations administered by other accredited colleges/universities and listed on the official transcript is evaluated in accordance with policies applying to resident credit earned at those institutions. Grades earned through credit by examination are not included in the computation of the GPA.

Subject Examinations • Transfer students who have taken subject examinations in the College Level Examination Program (CLEP) or who have participated in the Advanced-Placement Program of the College Board should have their examination scores sent directly to the Office of Enrollment Management for evaluation.

Transfer credit is not awarded for work or travel experience, except as validated through appropriate departmental proficiency examinations at LSU.

Credit by Examination • Credit by examination is limited to 30 semester hours and cannot be used to reduce the minimum residence requirement for graduation. With approval of the appropriate academic dean, credit earned through advanced-placement courses of the College Board will be excluded from the 30-semester-hour credit limit. Credit exams will not be used to meet the 15-hour requirement in determining honors or dean's list eligibility.

Proficiency Examinations • A limited number of proficiency examinations are offered through academic departments. Proficiency tests are considered equivalent to final examinations in college-level courses. Ordinarily, students must obtain permission from their academic deans and from the chairs of the departments offering the courses prior to taking the examinations. Students may apply for these tests at any time after they have been admitted to the university. Tests are administered subject to the conditions specified below.

- The student must have been admitted to the university (includes all LSU System campuses) and must be in good standing.
- To initiate the examination, permission must be obtained from the appropriate dean and the chair of the department offering the course. After authorization is granted, the Office of the University Registrar will issue an Advanced-Standing or Proficiency Exam Grade Report upon payment of the required fees. No instructor may give a proficiency examination until he/she has received the official grade report.
- Students must pay a fee of \$20 for each examination in which credit by proficiency examination is being sought; an additional \$20 processing fee is assessed for each examination administered by the Center for Assessment & Evaluation.
- If a grade of "C" or higher is earned on the examination, a mark of "P" and regular credit in the course are entered on the student's transcript. If a grade lower than "C" is earned, only the fact that the examination has been attempted will be recorded; credit will not be allowed. A student may take a proficiency examination in a particular course only once.

- Course credit will be posted to the semester that corresponds to the date entered in the date field on the Advanced-Standing or Proficiency Exam Grade Report, provided the student is enrolled.
- Students are not permitted to schedule proficiency examinations in courses in which they have earned unsatisfactory grades.
- Credit earned through proficiency examinations will not be used in computing the student's GPA.

Midsemester Examinations

The "Academic Calendar" shows the midsemester examination period. Faculty must report midsemester grades in all undergraduate courses. These grade sheets are available through myLSU.

Final Examinations

Concentrated Study Period

The five-day period during the fall and spring semesters (Wednesday through Sunday) immediately preceding the week of final examinations will be set aside as a concentrated study period. During this time, no extracurricular student activities, such as social and athletic events, will be held on or off campus. Graded required course work (including exams, quizzes, and homework) may count for a total of at most 5 percent of the student's grade in the course. Class projects (excluding exams and quizzes) are exempt from the 5 percent limit. The assumption is that work on such a project will take place throughout the semester. Exams and quizzes shall be defined as a question or set of questions to be given within a designated period of time. Laboratory courses are also exempt from this policy.

Any other exceptions *must receive prior approval from the Office of Academic Affairs*. Students should report any violations of this policy to the Office of Academic Affairs.

Final Examinations

The final examination period will be comprised of six days (Monday through Saturday). Final examinations are required in all courses. When a final examination is inappropriate because of the nature of the course, exceptions to this requirement may be made upon approval of the appropriate department chair and dean/director.

Final examinations *must be given during the published dates for the final examination period*.

A final examination is defined as the last in a series of major tests specified in the course syllabus. It need not be comprehensive. If the course syllabus does not call for a final examination, the last major unit examination is to be considered the final examination and must be given during the final examination period. When a series of major tests is scheduled in addition to the final examination, the last of the major test series may not be given during the concentrated study period. Exams and performances in laboratory-type courses may be given or required during the concentrated study period.

A student who, because of illness or other valid reason, is *absent* from any final examination may take a special examination only with authorization of the dean of the student's college.

Grading Systems

Faculty members must provide the university and the student with an individual evaluation of each student's work. At the beginning of each semester, faculty members must distribute written course syllabi in all courses, graduate and undergraduate, clearly stating the relative weight of the component factors of the final grade. While it is appropriate that the instructor should exercise subjective judgment in determining grades, particularly in "borderline" cases, the judgment should be based solely on academic considerations. *Because class absences are likely to affect a student's mastery of course content, they may be considered among these "academic considerations" in determining the final course grade. Therefore, instructors, at their*

discretion, may also include "unexcused" absences as component of the course grade, as long as attendance policies are spelled out clearly in the course syllabus at the beginning of the semester. Additionally, in 4000-level courses in which instruction of undergraduates for undergraduate credit and graduate students for graduate credit is combined, syllabi should clearly set forth any different expectations of performance by students in the two groups (beyond the expectation of a 2.00 minimum GPA for undergraduates and a 3.00 minimum GPA for graduate students).

Grades must not be utilized as coercive or punitive measures reflective of a student's behavior, attitude, personal philosophy, or other personal characteristics except as those qualities relate directly to the student's level of mastery of the course material.

On request, faculty should provide to students a review of all graded material, including final examinations, that contributed to the course grade and a review of the method by which the grade was determined.

Unreturned examinations and other graded material should be kept on file for at least six months following the end of the academic term. Faculty members who leave the campus during this period should file all course material in their departmental offices.

It is the right and responsibility of *faculty members* to determine and assign the grade for each student enrolled in their courses beyond the final date for withdrawing with a "W," as specified in the "Academic Calendar". The instructor's assignment of a grade is final; the grade may not be changed or altered except through the academic appeal procedure, following appropriate investigation.

In extraordinary circumstances that make it impossible for the instructor to fulfill the responsibility of determining a course grade, the department chair shall assign the grade. In such a case, the department chair may elect to award the grade of "P" (Pass). This "P" grade would be excluded from the normal limits on use of the pass-fail option indicated below. *Re-examination, special examinations, extra-credit projects, or extra laboratory hours cannot be made available to an individual student unless the same options are available to the entire class.*

Undergraduate Grades

- Grades of "A," "B," and "C" are assigned for satisfactory work. A grade of "A" indicates distinguished mastery of the course material; a grade of "B," good mastery; a grade of "C," acceptable mastery. A grade of "D" indicates minimally acceptable achievement for credit; in some colleges a grade of "D" in certain courses does not allow that credit to be applied toward the degree. A grade of "F" is failing. A grade of "P" (pass) denotes satisfactory completion (grade of "C" or better) of advanced-standing or proficiency examinations, pass-fail option courses, and certain other courses. A grade of "NC" (**no credit**) indicates that no credit is earned.
- **Grading scale**—A student's GPA is determined by the ratio of quality points earned to semester hours attempted. Quality points are assigned to letter grades using the following scale: "A"= 4 quality points; "B"= 3 quality points; "C"= 2 quality points; "D"= 1 quality point; "F" grades carry no quality points. Grades of "P," "W," "I," and "NC" are not used in computing the official GPA and, therefore, do not carry quality points. All courses taken for which grades of "A," "B," "C," "D," or "F" are assigned, *including repeated courses*, are considered in calculating GPAs.
- **"W" grades**—A "W" will be entered on a student's record for any approved course dropped within the dates specified in the "Academic Calendar". In extraordinary cases, upon written petition, the dean of the student's college may authorize a resignation and/or a drop from a course after the last date specified.
- **"I" grades**—Work which is of passing quality but which, because of circumstances beyond the student's control, is incomplete, may be marked "I" (incomplete). An "I" grade may be assigned for undergraduates only if the instructor receives appropriate authorization from the dean of the college in which the student is enrolled. If authorization is not received, the instructor is to consider the delinquent work to be of failing quality, and an "I" grade may not be assigned. *It is the responsibility of the student to initiate the request for the academic dean's authorization.* An "I" grade will be converted to "F" unless it is removed during the next regular semester in which the student is in residence in the LSU System *prior* to the deadline for adding courses for credit, as specified in the "Academic Calendar". In extraordinary cases, the dean of the student's college may authorize that the "I" grade become permanent, or that an extension of time for removing the grade be allowed.

In accordance with the LSU Code of Student Conduct, faculty should assign an "I" grade to any assignment referred to Student Advocacy and Accountability for alleged academic misconduct. If a student is found responsible for an

academic violation, the outcome letter, issued by Student Advocacy and Accountability, will contain the final grade determination for the assignment and potentially, the entire course.

- Grades earned in courses offered by the Hebert Law Center, the School of Medicine, the School of Dentistry, and the School of Veterinary Medicine shall not be considered in computation of the GPA of an undergraduate student unless approval is given by the dean or director of the student's college/school to permit the student to use the professional courses as electives or to pursue a combined curriculum.

Computation of the Grade Point Average

For all academic purposes, GPAs shall be specified to three significant figures (two decimal places), with the last figure to reflect rounding from a four-significant-figure average (three decimal places) where possible. If the third figure after the decimal point is equal to or greater than five, upward rounding shall occur. If the third figure after the decimal point is less than five, it shall be dropped, regardless of what the fourth or subsequent figures may be. Thus, 3.9550 becomes 3.96, and 3.9549 becomes 3.95. In calculations to determine relative rank in class, a student's average may be carried to three decimal places. Regardless of the results of rounding, no student shall be deemed to have graduated with a "4.00" average if any grade other than "A" or "Pass" for courses completed appears on the transcript.

Any GPA cited to only one decimal place (as 2.0) shall be construed to mean, mathematically, a figure accurate to two decimal places (as 2.00), regardless of the text.

Pass-Fail Option for Undergraduates

Some courses have been approved to be graded pass-fail for all students enrolled. In courses with regular grading, students may petition for the pass-fail grading option, subject to the guidelines indicated below. In all undergraduate courses with pass-fail grading, the grade of "P" will be given for work of "C" quality or better. The grade of "F" will be given for work below "C" quality.

Students may be registered in several courses regularly graded pass-fail during a given semester and still elect to take an additional course under the pass-fail option program.

Courses passed with a grade of "P" may be offered for degree credit, but the grade will not be considered in computing the GPA. An "F" in a pass-fail course will be treated as any other "F," both with regard to credit earned and to GPA calculation.

Limited use of a pass-fail option is permitted at the discretion of the individual colleges and schools, subject to the following policies.

- The pass-fail option is available only to those students whose GPA in the LSU System is 2.50 or better.
- The pass-fail option is allowed only for unrestricted electives or other courses approved by the student's major department.
- No more than 12 semester hours of degree credit in the pass-fail option program are permitted; pass-fail enrollment may not exceed one course per semester, excluding those courses normally graded pass-fail.
- Enrollment under the pass-fail option program must have the prior approval of the instructor, the chair of the student's major department, and the dean of the college in which the student is enrolled.
- Through the last day to add courses for credit, students may, with appropriate approval, change from pass-fail to graded status and vice versa. No change in the grading option may be made after the last day for adding courses for credit.

For information about the pass-fail option for graduate students, see "The Graduate School".

Pass-Audit Option

The pass-audit option is available only for high school students who participate in a dual enrollment course. This option is not available for any on-campus courses or instruction. Dual enrollment courses can be approved by the respective on-campus department and the dean to be graded pass-audit. In all dual enrollment courses with pass-audit grading, the grade of "P" will be

given for work of "C" quality or better. At the end of the course, the enrollment status of high school students whose work is below "C" quality will automatically be reflected as "AU," or audit. Auditors will not receive credit and courses previously audited may later be taken for credit. Courses passed with a grade of "P" may be counted for degree credit, but the grade will not be considered in computing the student's GPA. Students are permitted to earn a total of no more than 12 semester hours of degree credit in pass-audit dual enrollment courses. For students admitted to a pass-audit dual enrollment course, a change from pass-audit to graded status is not allowed.

Grade Reports

Final and midsemester grades are available through myLSU. Students may request, via myLSU, that the Office of the University Registrar mail them reports of their final grades, provided their financial accounts with the university (all LSU System campuses) are current.

Transcripts

Upon written request and via myLSU, former and currently enrolled students may obtain complete transcripts of their academic records, provided they are current in their financial obligations to the university (all LSU System campuses). Requests must include the signature of the student. Partial transcripts are not issued. Normally, two days of processing are required after the transcript request is received. At the beginning or end of a semester, considerably more time is required. Telephone requests for transcripts cannot be honored.

University Undergraduate Scholastic Requirements

Definitions

GPA • Grade point average is calculated by dividing the total number of quality points earned by the total number of semester hours attempted. For example, a student who has attempted 46 hours and has earned 122 quality points has a GPA of 2.65.

Cumulative GPA • The cumulative GPA is calculated on work attempted at all colleges and universities attended.

LSU System GPA • The LSU System GPA is calculated on all work attempted at LSU and at any other institution in the LSU System.

General

The following university scholastic requirements apply to all students, except those enrolled as "visiting" students. For details regarding the use of Independent and Distance Learning grades to determine scholastic standing, refer to "Undergraduate Admissions" of the catalog. Courses taken at Southern University through the LSU-SU Cooperative Program, and Baton Rouge Community College through the LSU-BRCC Cross-Enrollment Program, are recorded as transfer credit. Credit taken through these co-op programs are calculated in only the cumulative GPA.

A student on University Scholastic Warning, Probation, or Drop will have a notation of the academic status recorded on the official LSU transcript.

University Scholastic Warning

At the end of the fall or spring semester, intersession or summer term, students will be placed on University Scholastic Warning if their GPAs are one to nine quality points below a 2.00 on all work attempted or on all work attempted in the LSU System. A notation to that effect will be recorded on their transcripts. Students will remain on University Scholastic Warning until they bring their GPAs up to 2.00, or are placed on University Scholastic Probation.

University Scholastic Probation

At the end of the fall or spring semester, students will be placed on University Scholastic Probation if their GPAs are 10 or more quality points below a 2.00 on all work attempted or on all work attempted in the LSU System. Students will remain on University Scholastic Probation until they have cumulative averages of 2.00 or higher on all college work attempted *and* on all work attempted in the LSU System.

Students who have been removed from University Scholastic Probation will be placed on probation again at the end of any fall or spring semester in which their LSU System or cumulative averages are less than 2.00.

University Scholastic Drop

Students on University Scholastic Probation will be dropped from the university at the end of any fall or spring semester if their semester average is less than 2.00 unless application of the Grade Exclusion Policy results in the student's LSU system and cumulative GPAs being recomputed to 2.00 or higher.

Students in University Scholastic Drop status may not apply toward LSU degree requirements credit earned at any institution, including LSU distance program courses, during the period of their ineligibility to enroll at LSU.

Students dropped for university scholastic deficiency may enroll, with permission of their dean, in the summer term at LSU. If their quality point deficits are totally removed during the summer term, they may petition their dean to allow them to enroll for the fall semester. Students who remove their quality point deficiency and complete all degree requirements may not graduate at the end of the summer term. They must register for *degree only* during the subsequent fall semester and receive their degrees at December Commencement.

Students dropped for university scholastic deficiency who are already enrolled in an intersession, may continue their enrollment. If their quality point deficits are totally removed during the intersession, they may enroll for the subsequent semester or summer term. Students who remove their quality point deficiency and complete all degree requirements may not graduate at the end of an intersession. They must register for degree only during the subsequent semester or summer term.

The Summer Term/Intersessions

Students cannot be placed on University Scholastic Probation or dropped from the university on the basis of work taken during the summer term or an intersession. They can, however, be placed on University Scholastic Warning status.

Work taken during the summer term can result in students being removed from University Scholastic Warning status, Scholastic Probation, or Scholastic Drop status.

Work taken during an intersession can result in students being removed from University Scholastic Warning or University Scholastic Probation.

Re-entry after Scholastic Drop

Students dropped for the first time for academic reasons can be considered for readmission when they have been out of the university (all LSU System campuses) for one regular semester.

Students dropped the second or subsequent time for academic reasons must remain out of the university (all LSU System campuses) for one calendar year.

In either instance, readmission may be delayed or denied at the discretion of the dean of the college in which the student desires to enroll. Students entering the university after University Scholastic Drop will be admitted on University Scholastic Probation. Reinstatement after a University Scholastic Drop (see "Appeal of Academic Ineligibility to Enroll") will not remove the drop notation from the transcript.

College Scholastic Requirements

Students may also be placed on College Scholastic Probation or College Scholastic Drop status on the basis of unsatisfactory progress toward meeting the specific requirements of their academic program. College Scholastic Requirements differ from University Scholastic Requirements in that they apply only while a student is enrolled in the college that imposed the academic action. College Scholastic Probation and College Scholastic Drop are not noted on the official LSU transcript. Students should refer to the college sections for regulations regarding college academic action.

Academic Bankruptcy

Under specified conditions, undergraduate students who have interrupted their college careers for a period of at least five consecutive calendar years may, at the time of application for admission to the university, declare academic bankruptcy. Under this policy all college work taken at an earlier date is eliminated from computation of the grade point average *and cannot be applied toward a degree at LSU*. Such work will remain on the student's scholastic records and transcripts, but *will not* be used in the computation of the grade point average for honors or the University Medal. It may, however, be used to compute the grade point average for admission to graduate and professional study.

Students qualifying for academic bankruptcy will be admitted on scholastic probation. Details of this policy may be obtained from the Office of Enrollment Management.

Grade Appeals

Appeals of final grades must be initiated by the student by requesting in writing or actually attending a meeting with the faculty member who assigned the grade at issue within 30 calendar days after the first day of classes in the next regular semester. The procedure is as follows:

- The student must meet with the faculty member concerned to discuss the situation and attempt to arrive at a solution. Although each may have an advisor present, it is believed that under most circumstances, the meeting will be more productive if only the student and the faculty member are present. To the extent an advisor is utilized at this or any stage of the procedure, the advisor is not allowed to argue, advocate, make statements, present information, question witnesses, or raise objections on behalf of either party.

If the faculty member is on sabbatical leave or is otherwise unavailable, his/her place will be taken by a faculty member appointed by the department chair or his/her designee. The faculty member must inform the student of his/her decision within seven calendar days. If the decision reached requires change in an official university record, the faculty member must comply with all university regulations and procedures necessary to accomplish the change.

If an administrative officer (department chair, dean, executive vice chancellor and provost) is the faculty member who assigned the grade that is appealed, that officer should recuse himself or herself from the appellate process in any capacity other than as the faculty member who assigned the grade; his or her place in the procedure will be taken by a faculty member appointed ad hoc by the executive vice chancellor and provost or the chancellor, as appropriate.

A change of grade is accomplished by filing a "Grade Correction Report." A satisfactory reason for the change is "academic appeal." The department chair and/or the student's dean (dean of the college in which the student is enrolled) may request documentation of the facts of the matter to facilitate any decision with respect to approval of the grade change.

- If the matter is not resolved between the student and the faculty member, and the student wishes to pursue the appeal, he or she shall make a written request to the chair of the department in which the course was taught asking for a meeting of the department chair, the faculty member, and himself or herself. The faculty member will provide the name of the appropriate department chair. The written request should clearly state the purpose of the meeting and should indicate the faculty member's name; however, it should not go into detail as to justification for the appeal. This request must be submitted within 45 calendar days after the first day of classes of the next regular semester.

The department chair shall arrange a meeting within 14 calendar days from the date of receipt of the request. At this meeting, both the student and the faculty member may be accompanied by an advisor. At the close of the meeting, or within seven calendar days thereafter, the department chair shall make a decision. If a decision is made at the close of the meeting, it is to be given orally to all present. If the matter is taken under advisement, the department chair shall inform all parties, including the student's dean, of his or her decision in writing. If the decision reached requires change in an official university record, the faculty member must comply with all university regulations and procedures necessary to accomplish the change.

- Either the student or the faculty member may appeal the decision reached by the department chair to the dean of the college in which the department offering the course is located. The dean's name will be furnished by the department chair. Appeals concerning courses numbered 8000 or above should be directed to the dean of The Graduate School.

The appeal must be in writing and must be submitted within 14 calendar days after notification of the department chair's decision. The appeal must contain the following information: (1) a statement of the action(s) complained of; (2) the relief requested; and (3) a specific statement of the reasons supporting the relief sought.

Upon receipt of the appeal, the dean must promptly forward copies to the department chair and the other party concerned, who must promptly reply with *individual written statements* supporting their positions. Copies of the written replies must be forwarded to the appellant.

When the replies have been received from the department chair and the other party, the appellant may choose one—and only one—of the following options: (1) the dean will decide the question on the basis of the written appeal and the written replies from the other party and the department chair; (2) the dean will meet with all parties concerned, who may be accompanied by advisors if desired, and, after discussion, reach a decision; (3) the student, the faculty member, or the department chair may request that the dean refer the appeal to a hearing panel for its recommendation. Such a request must be made when the appeal is submitted to the dean.

Hearing panels to consider grade appeals will be appointed by the dean and shall be composed of three faculty members selected by the dean, with no more than two from the same department, and two students appointed by the president of the college's student governing body. The dean should designate the chair of the panel.

The panel shall hold a hearing with the department chair, the faculty member, and the student, each of whom may be accompanied by an advisor. After deliberation, the panel will make its recommendation in writing to the dean. Copies of the recommendation and the dean's final decision must be given to all parties, including the student's dean.

Regardless of the method used, the dean must make his or her decision within a reasonable time from the date of receipt of the appeal. The decision must be written, listing the reasons supporting the decision; copies must be given to all parties, including the student's dean. If the decision requires change in an official university record, the faculty member must comply with all university regulations and procedures necessary to accomplish the change.

- Any party to the appeal who believes that a *serious procedural error* occurred or that there was an *abuse of discretionary authority* in reaching the decision may file with the executive vice chancellor and provost a written petition for review. This petition, which must be filed within seven calendar days after receipt of the decision, must contain a complete statement of the alleged serious procedural error, or examples of abuses of discretionary authority complained of, and also must contain reasons for the relief sought. The petition must be accompanied by all documents produced in the appeal. Copies should be sent to all parties to the appeal and to the student's dean.

The executive vice chancellor and provost or the provost's designee shall decide within 30 calendar days after receipt of the petition whether further action should be taken. In reaching this decision, he or she may ask other parties to the appeal to make written replies to the request for a review, or these parties, on their own, may make written replies. If the decision is reached that a review is not justified, the student and all other parties, including the student's dean, will be so notified.

If the executive vice chancellor and provost or his or her designee decides to respond favorably to the petition for review, he or she may hold a formal meeting with all parties and their advisors, interview any persons who may have

relevant information, and/or review and consider any related records or documents.

Once a decision is reached, the executive vice chancellor and provost will notify all parties, including the student's dean, of his or her decision. The decision of the executive vice chancellor and provost shall conclude the matter, subject to the right of the chancellor to review the case. The chancellor will consider the case only on the basis of a petition for review following the procedure outlined above.

This grade appeal procedure is an academic process designed to provide students with the ability to appeal a final grade only. Interim grades and grades on particular exams, papers, projects, and other assignments may only be appealed to and discussed with the faculty member who assigned the grade. Any questions, regarding the interpretation or implementation of the grade appeal procedures shall be resolved by the executive vice chancellor and provost or his or her designee.

Appeal of Academic Ineligibility To Enroll

An undergraduate student dropped from the university because of scholastic deficiency may appeal the ineligibility based on extenuating circumstances. Such appeals must be submitted to the office of the student's dean at least seven calendar days prior to the beginning of the semester/summer term in which the student wishes to enroll. The appeal should be in the form of a letter to the dean, accompanied by documentation of the extenuating circumstances.

Appeals may be reviewed by the dean or, at the option of the dean, by a college committee established for that purpose. In the latter case, the committee will make a recommendation to the dean. Final authority in the college rests with the dean. If the appeal is approved:

- the student is eligible to enroll at LSU on academic probation for the next semester/term;
- the dean may set conditions based on the student's situation, which may include specific academic requirements the student must meet. The student will be informed of any conditions in writing; and
- the student's transcript will carry a notation that the student was dropped but reinstated, based on appeal.

If the dean denies the appeal, the student may submit it to the Office of Academic Affairs for review, along with a statement of the reasons why the Office of Academic Affairs should consider the appeal. Final authority rests with the executive vice chancellor and provost.

Privacy and Release of Student Education Records

The Family Educational Rights and Privacy Act of 1974 (sometimes referred to herein as "the Act"), as amended, sets forth requirements designed to protect the privacy of student education records. The Act gives parents certain rights with respect to their children's education records. These rights generally transfer to the student when he or she reaches the age of 18 or attends post-secondary (beyond 12th grade) school. The law governs access to records maintained by educational institutions and the release or disclosure of certain information from those records. This notice is published in each "Registration Schedule of Classes" to explain the rights of students with respect to records maintained by Louisiana State University and A&M College ("LSU" or "the university"). It also outlines LSU's procedures to comply with the requirements of the Act. Copies of the Act, the Federal Regulations adopted pursuant to it, and this notice are available for viewing on LSU's website (www.lsu.edu/registrar), and in the Office of the University Registrar, Room 112, Thomas Boyd Hall, Baton Rouge, LA 70803.

Definitions

I. EDUCATION RECORDS

1. The meaning of "education records" is, with certain exemptions as listed below, those records, files, documents, and other materials which contain information directly related to a student, and are maintained by any employee or agent of the university. The following categories of information are exempted and are not considered to be "education records":

- Records made by university personnel which are in the sole possession of the maker and are not accessible or revealed to any other person except a temporary substitute of the maker.
- Records maintained by the LSU Police Department for law enforcement purposes.
- Medical and counseling records used solely for treatment. (Medical records may be personally reviewed by a physician of the student's choice.)
- Records of student workers related exclusively to the student's employment with the university.
- Records only related to a former student (alumni records) that are not directly related to the student's attendance as a student. Records of that individual while a student continue to be considered education records.

2. All records pertaining to students which are maintained by university offices are official university records, and as such, remain the property of the university.

3. Each university unit has an obligation to keep a record of requests for access to, and disclosures of, personally identifiable information in student records information except when the request is from the student, a university official with a legitimate educational interest, someone requesting directory information, or related to a request with written consent from the student. Students have the right to review this record of requests and disclosures of student record information.

II. PERSONALLY IDENTIFIABLE INFORMATION

Data or information which includes, but is not limited to the following:

- The student's name.
- The name of the student's parents or other family members.
- The address of the student or the student's family.
- A personal identifier such as the student's Social Security Number, LSUID, or biometric record.
- Other indirect identifiers, such as the student's date of birth, place of birth, mother's maiden name.
- Other information that alone or in combination, is linked or linkable to a specific student that would allow a reasonable person in the school community, who does not have personal knowledge of the relevant circumstances, to identify the student with reasonable certainty.
- Information requested by a person whom the university reasonably believes knows the identity of the student whom the education record relates.

III. STUDENT

Any individual who is or has been in attendance at LSU and regarding whom LSU maintains education records.

POLICY DETAIL

I. RIGHT TO INSPECT AND REVIEW

Students are granted the right to inspect and review all of their education records, except the following:

- Financial records of parents.
- Confidential letters and statements of recommendation placed in education records prior to January 1, 1975.
- Confidential letters and statements of recommendation for admission, employment, or honorary recognition placed in education records after January 1, 1975, for which students have waived their right of access.

II. WAIVER OF RIGHTS OF ACCESS

Students may waive their right of access to confidential letters and statements of recommendation. Even if the student signs a waiver, upon request, the names of all persons making confidential recommendations will be made available. Employees or agents of the university may not require a student to waive his or her right of access for receipt of university benefits or services.

III. PROCEDURES FOR INSPECTION AND REVIEW

1. Students have the right to inspect and review education records within 45 days after receipt of the request for access. Requests to review records must be made separately, in writing, to each office maintaining records. That office will make arrangements to comply with the request as expeditiously as possible not later than 45 days after receipt of the request. If the records are not maintained by the office to which the request was submitted, that office shall so advise the student, and the student shall address his or her request to the appropriate office.
2. Information contained in education records will be fully explained and interpreted for students by university personnel assigned to, and designated by, the appropriate office.
3. Students have the right to review only their own records. When a record contains information about more than one student, disclosure cannot include information regarding the other student(s).
4. The university reserves the right to deny copies of records, including transcripts, not required to be made available by the Act if the student has an unpaid financial obligation to the university.

IV. RIGHT TO CHALLENGE INFORMATION IN RECORDS

1. Students have a right to challenge the content of their education records if they consider the information contained therein to be inaccurate, misleading, or in violation of the student's privacy rights.
2. This process includes an opportunity for amendment of the records or insertion of written explanations by the student into such records.
3. Students challenging information in their records must submit, in writing, a request for a hearing to the appropriate office maintaining the record, listing the specific information in question and the reasons for the challenge.
4. Within 45 days of receipt of the written request for hearing, the university will inform the student of the date, place, and time of the hearing and the identity of the official in charge of the hearing. The notice will be mailed to the student at least two weeks in advance of the hearing.
5. The right to challenge grades does not apply under the Act unless the grade assigned was inaccurately recorded, under which condition the record will be corrected.

V. PROCEDURES FOR HEARING TO CHALLENGE RECORDS

1. Students challenging information in their records must submit, in writing, a request for a hearing to the appropriate office maintaining the record, listing the specific information in question and the reasons for the challenge.
2. Within 45 days of receipt of the written request for hearing, the university will inform the student of the date, place, and time of the hearing and the identity of the official in charge of the hearing. The notice will be mailed to the student at least two weeks in advance of the hearing.
3. Hearings will be conducted by a university official who does not have a direct interest in the outcome of the hearing.
4. Students shall be afforded a full and fair opportunity to present evidence relevant to the reasons for the challenge, as referenced in item IV. The student may be assisted by individuals or an attorney at his or her expense.
5. The hearing officer will render a decision, in writing, noting the reason and summarizing all evidence presented within 30 days of the hearing. The decision will be based solely on the evidence presented and will include a summary of the evidence and the reason(s) for the decision.
6. Should the hearing be in favor of the student, the record shall be amended accordingly and the university shall notify the student of the amendment in writing. Should the request be denied, the student may choose to place a statement with the record commenting on the accuracy of the information in the record and/or setting forth any basis for inaccuracy. When disclosed to an authorized party, the record will always include the student's statement and the hearing officer's decision, as long as the student's record is maintained by the university.
7. If students have questions regarding the procedure for challenging records, they should contact the Office of the University Registrar at registrar@lsu.edu or 225-578-1690.

VI. CONSENT FOR RELEASE REQUIRED

Written, dated, and signed consent must generally be obtained from students for the release of information from education records, specifying what is to be released, the reasons for release, and name of the party or class of parties to whom the record are to be released, with a copy of the record sent to the student if he or she desires.

VII. RELEASE WITHOUT CONSENT

1. The requirement for consent does not apply to the following:
 - Requests from school officials who have a legitimate education interest on a "need to know" basis. School officials are members of the faculty and staff of LSU, including student employees or agents of the

university, as necessary or appropriate, to conduct official business, as authorized by the university. Legitimate educational interest includes performing a task related to the regular duties of the employee or agent, the student's education, the discipline of a student, a service or benefit for the student, or maintaining safety and security of the campus.

- Requests from a person employed by or under contract with the university to perform a special task.
- To public officials as specified in the Act.
- To agencies or institutions that have requested records in which a student seeks or intends to enroll or is already enrolled so long as the disclosure is for purposes related to the student's enrollment or transfer.
- To organizations for use in studies designed to develop, validate, or administer predictive tests, administering student aid programs, and improving instruction. Such agencies must agree not to divulge personally identifiable records to third parties and must agree to ultimately destroy these records.
- Requests in compliance with a judicial order or lawfully issued subpoena, provided the university makes a reasonable attempt to notify the student in advance of compliance (except in certain cases involving grand jury subpoenas and subpoenas issued for law enforcement purposes and the court has ordered that the existence of the subpoena not be disclosed); or, when the university is involved in a legal action with a parent or student, where disclosure to the court, without a court order or subpoena, of records that are relevant for the university to proceed as plaintiff or to defend itself is permissible.
- To comply with a court order obtained under the USA PATRIOT Act of 2001 for education records considered relevant to a terrorism investigation or prosecution, without advance notice to the student.
- Requests in connection with a student's application for or receipt of financial aid.
- Requests by state authorities and agencies specifically exempted from the prior consent requirements by the Act for disclosure of records to organizations conducting studies on behalf of the university, if such studies do not permit the personal identification of students to any persons other than to representatives of such organizations and if the personal identification data is destroyed when no longer needed.
- Information submitted to accrediting organizations.
- Requests by parents of a dependent student, as defined in Section 152 of the Internal Revenue Code of 1986.
- To parents or legal guardians of a student regarding the student's violation of any federal, state or local law, or of any rule or policy of the university governing the use or possession of alcohol or a controlled substance.
- To any person, including a parent, whose knowledge of the situation is necessary to protect the health or safety of the student or any other individuals when, considering the totality of the circumstances, the university has determined that there is an articulable and significant threat to the health or safety of a student or any individual.
- To authorized federal officials who have need to audit and evaluate federally-supported programs.
- To the U.S. Citizenship and Immigration Services (USCIS)/Department of Homeland Security (DHS) concerning an F, J, or M nonimmigrant alien, only to the extent necessary for the university to comply with Student and Exchange Visitor Program (SEVP) reporting requirements, as mandated by the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, the USA PATRIOT Act, the Enhanced Border Security and Visa Entry Reform Act of 2002, and the regulation at 8 CFR 214.1(h). Consent is not necessary for the university to disclose required information to USCIS or DHS in compliance with SEVP reporting obligations.
- As of January 3, 2012, the U.S. Department of Education's FERPA regulations expand the circumstances under which education records and personally identifiable information (PII) contained in such records — including the Social Security Number, grades, or other private information — may be accessed without the student's consent. First, the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local education authorities ("Federal and State Authorities") may allow access to the records and PII without the student's consent to any third party designated by a Federal or State Authority to evaluate a federal- or state-supported education program. The evaluation may relate to any program that is "principally engaged in the provision of education," such as early childhood education and job training, as well as any program that is administered by an education agency or institution. Second, Federal and State Authorities may allow access to education records and PII without the student's consent to researchers performing certain types of studies, in certain cases even when the university objects to or does not request such research. Federal and State Authorities must obtain certain use-restriction and data security promises from the entities that they authorize to receive the PII, but the Authorities need not maintain direct control over such entities. In addition, in connection with Statewide Longitudinal Data Systems, State Authorities

may collect, compile, permanently retain, and share without the student's consent PII from education records, and they may track a student's participation in education and other programs by linking such PII to other personal information about the student that they obtain from other Federal or State data sources, including workforce development, unemployment insurance, child welfare, juvenile justice, military service, and migrant student records systems.

- The results of any disciplinary proceeding conducted by the university against an alleged perpetrator of a crime of violence to the alleged victim of that crime.
 - To the victim of an alleged perpetrator of a crime of violence or non-forcible sex offense.
 - To disclose information provided to the university under Section 170101 of the Violent Crime Control and Law Enforcement Act of 1994 (42 U.S.C. 14071) concerning registered sex offenders who are required to register under that section.
 - Requests for "directory information" (see item VIII).
2. The university reserves the right to verify the accuracy of any information contained in what purports to be an official university document (e.g., a transcript or diploma) or is provided to a third party. In addition, degrees (any honors, majors, minors and specializations) are considered public information since they are conferred in a public ceremony.

VIII. DIRECTORY INFORMATION

1. LSU, in accordance with the Act, has designated the following information about students as public (directory) information:
- Name
 - Address (local, home, and e-mail)
 - Telephone (local and home)
 - Major field of study/classification
 - Dates of attendance
 - Degrees, awards, and honors received
 - Most recent educational agency or institution attended
 - Participation in officially recognized activities and sports
 - Weight and height of members of intercollegiate athletic teams
2. Students have the right to have this directory information withheld from the public if they so desire. Each student who wants all directory information to be withheld needs to complete a form available in the Office of the University Registrar. The hold will remain in effect until the student requests that it be lifted. Only currently enrolled students may place a hold on the release of directory information.
3. The university receives many inquiries for "directory information" from a variety of sources, including friends, parents, relatives, prospective employers, other institutions of higher education, honor societies, licensing agencies, government agencies, and the news media. Each student is advised to carefully consider the consequences of a decision to withhold "directory information." The university, in good faith, will not release directory information requested to be withheld, and any requests from persons or organizations outside the university will be refused unless the student provides written consent for the release.
4. Given the ability of students to stay connected with family and friends via the Internet, etc., the university strongly recommends that personnel with access to directory information not release any addresses, phone numbers, or e-mail addresses to third parties. Requestors are to be directed to the Office of the University Registrar.
5. The university publishes student address information on the myLSU Directory, but not on the public directory. If students want to withhold their address information from the myLSU Directory, they may do so using the myLSU Directory Information application.

IX. COMPLAINTS, CONCERNS, OR SUGGESTIONS

Final responsibility for the interpretation of the provisions of this policy rests with the University Registrar. Any student who has reason to believe that the university is not complying with the Act or this policy should inform the University Registrar in writing. The University Registrar shall promptly review all such allegations. Students also have the right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the Act.

RESOURCES

I. TYPE, LOCATION, AND CUSTODIAN OF STUDENT RECORDS

LSU does not maintain education records in one central office. Education records are maintained in the respective colleges and schools, the Graduate School, and the Office of the University Registrar. Other education records are maintained in the Office of Academic Affairs, Student Life and Enrollment Management (undergraduate admission, financial aid information, and student employment), Student Advocacy and Accountability (disciplinary records), Athletic Department, International Services Office, and other offices. Questions regarding individual student records should be directed to the appropriate location. See complete list under "Responsibilities."

Other Rules and Regulations

Standards of Conduct

The university's guidelines and expectations for behavior and accountability procedures for students are outlined in the *Code of Student Conduct*. Policies and procedures governing student organizations, activities, and conduct may be accessed at www.lsu.edu/deanofstudents and www.lsu.edu/campuslife. Student Advocacy & Accountability has administrative responsibility for coordinating all university accountability procedures for students and student organizations. Students who are charged with alleged violations of the Code of Student Conduct are provided rights, including the right to a notice and a hearing. Additional details regarding standards of conduct may be found at: www.lsu.edu/saa. LSU's Commitment to Community is an additional

university document which details the expectation to uphold the highest standards of performance in an academic and social environment.

The General Education Component of Undergraduate Education

The General Education Component of Undergraduate Education

The general education of LSU students spans the four years of undergraduate study. In courses designated as general education, students begin a process of developing the University Learning Competencies that continue through their study in upper-level elective courses and courses in the major field of study.

Recognizing that the fundamental characteristics for effective participation in the marketplace and the community necessarily involve multidisciplinary study, each student designs a unique curriculum based on a major field of study and including 39 hours of general education courses across six areas of focus: English Composition, Analytical Reasoning, Arts, Humanities, Natural Sciences, and Social Sciences. In general education courses, students begin the development of the LSU Learning Outcomes, which are refined and focused in disciplinary courses taken during the junior and senior years, with the intention that all graduates, regardless of major, will develop a set of intellectual abilities, a degree of sophistication, and a civic-minded perspective that correspond to the high level of functionality represented in the outcomes taken as a whole.

University Learning Competencies

1. An LSU graduate will demonstrate effective communication of complex knowledge and ideas through written, oral, visual, and technological media.
2. An LSU graduate will demonstrate an understanding of historical, cultural, and philosophical complexity which supports sophisticated discourse.
3. An LSU graduate will be able to conduct research-based inquiry, including articulation of complex disciplinary and interdisciplinary problems, effective evaluation and analysis of primary and secondary sources, and integration of relevant information into original discourse.
4. An LSU graduate will be able to employ scientific and mathematical methods and technology in the resolution of laboratory and real-world problems.
5. An LSU graduate will demonstrate an understanding of the factors associated with global interdependence, including economic, political, psychological, cultural, and linguistic forces.
6. An LSU graduate will have the knowledge, skills, and disposition which attest to a commitment and ability to recognize and to participate in processes which improve the civic life of communities.

Area Breakdown of the 39 Credit Hours of General Education Coursework:

- English composition (six hours)
- Analytical reasoning (six hours)
- Arts (three hours)
- Humanities (nine hours)
- Natural sciences (nine hours)
- Social sciences (six hours)

Regulations

- Students must complete the 39-hour general education requirement *prior to graduating from LSU*. It is recommended that students complete the requirement during their first four semesters at the university.

- Only those courses on the approved list below may be used to satisfy the general education requirement.
- No more than six hours of credit taken through *distance learning courses* may be applied to a student's general education requirement.
- An entering student may receive *three or six hours of credit in English composition* on the basis of ACT scores and/or performance on approved placement tests.
- An entering student may receive credit for *one or more of the required mathematics courses* on the basis of placement test scores.
- *Advanced placement and advanced standing* credit may be used to satisfy the general education requirement.
- General education courses *will be graded on the "A," "B," "C," "D," "F" system*. No courses taken on a pass/fail basis will count toward the general education requirement.
- *Appeals for an exception to the general education requirements*: A "Request for an Exception to the General Education Requirement" must be submitted to the dean of the student's college using the appropriate form. Scheduling difficulties or allegations of poor advising typically do not constitute a reasonable basis for an appeal. The dean's evaluation as well as the student's request must then be submitted to the Office of Academic Affairs. A final decision will be made after consideration by the Faculty Senate Committee on General Education. Students are strongly encouraged to obtain a decision **prior** to registering for a LSU course intended to substitute for an approved general education course.

Transfer Course Approval

Deans are to determine the applicability of transfer courses to a component of LSU's general education requirements.

If the course is deemed to be applicable, and there is no equivalent LSU course, deans are asked to enter a course substitution on the Student Records and Registration database, indicating that the course is accepted for general education credit. Documentation concerning this decision should be kept on file in the college.

If it is determined that a course is equivalent to an LSU course, colleges should notify the Office of Enrollment Management so the Admissions Transfer Table can be updated.

If the college does not approve a transfer course for general education credit, the student may petition the Office of Academic Affairs for a decision.

Regents' Statewide Articulation

LSU participates in the Board of Regents' Statewide Articulation Consortium. Students who plan to transfer to another Louisiana public institution should consult the Office of Enrollment Management for information about the course transfer agreement.

General Education Courses

In the list of courses in the **"**COURSE SEARCH**"** section of this catalog, general education courses are designated within the course description.

In the list below, cross-listed courses are identified by information enclosed in parentheses.

- I. English Composition (6 Sem. Hrs.)
- II. Analytical Reasoning (6 Sem. Hrs.)
- III. Arts (3 Sem. Hrs.)
- IV. Humanities (9 Sem. Hrs.)
- V. Natural Sciences (9 Sem. Hrs.)
- VI. Social Sciences (6 Sem. Hrs.)

Louisiana State University

2014-2015 General Catalog

I. English Composition (6 Sem. Hrs.)

All students must complete 6 credits in English composition, one course from each group listed below.

Group one:

English

- ENGL 1001 English Composition (3) or
- ENGL 1004 English Composition (3) (for international students only)

Group two:

English

- ENGL 1005 English Composition (3) (for international students only)
- ENGL 2000 English Composition (3)

Honors

- HNRS 2000 Critical Analysis (3)
 - HNRS 2012 The 19th Century (3)
 - HNRS 2013 The 20th Century (3)
 - HNRS 2020 Contemporary Studies (3)
 - HNRS 2021 Colloquium in the Arts (3)
 - HNRS 2030 Humanities Colloquium (3)
 - HNRS 2033 Social Science Colloquium (3)
 - HNRS 2041 Classical Traditions: The Mediterranean World (4)
 - HNRS 2042 Modern Traditions: Europe and the West (4)
-

II. Analytical Reasoning (6 Sem. Hrs.)

General education analytical reasoning courses must come from the following list. All students must have credit in at least one Mathematics course.

Computer Science

- CSC 1240 Statistics and Graphics with MATLAB (3)

Experimental Statistics

- EXST 2201 Introduction to Statistical Analysis (4)

Mathematics

- MATH 1021 College Algebra (3)
- MATH 1022 Plane Trigonometry (3)
- MATH 1023 College Algebra and Trigonometry (5)
- MATH 1029 Introduction to Contemporary Mathematics (3)
- MATH 1100 The Nature of Mathematics (3)
- MATH 1431 Calculus with Business and Economic Applications (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- MATH 1551 HONORS: Analytic Geometry and Calculus I (5)
- MATH 1552 Analytic Geometry and Calculus II (4)
- MATH 1553 HONORS: Analytic Geometry and Calculus II (4)
- MATH 1554 Calculus II for Life Sciences (4)

Philosophy

- PHIL 1021 Introduction to Logic (3)
 - PHIL 2010 Symbolic Logic I (3)
-

Louisiana State University

2014-2015 General Catalog

III. Arts (3 Sem. Hrs.)

Architecture

- [ARCH 2401 Appreciation of Architecture \(3\)](#)

Art

- [ART 1001 Introduction to Fine Arts \(3\)](#)

Art History

2014-2015 General Catalog

V. Natural Sciences (9 Sem. Hrs.)

To complete the natural science requirement, a student must take at least nine semester hours from the following list. A minimum of six hours must be in a physical or a life science course sequence and the remaining hours must be in an area other than that previously selected (i.e., both physical and life sciences must be taken). Life science courses are identified in the following list with an asterisk ().*

Sequence Courses

Astronomy

Programs

- Center for Freshman Year
- Division of Pre-Professional Programs

University College is the portal of entry for most incoming freshmen enrolling at LSU. It also serves many returning students and transfer students who are not yet eligible for admission to a degree-granting senior college on campus. The two enrollment divisions of University College are the Center for Freshman Year and the Center for Advising & Counseling. In addition, a variety of retention-specific programs that focus on particular student populations are a significant part of the role and mission of University College.

Center for Freshman Year enrolls students with fewer than 30 hours of attempted credit and who have not yet been admitted to a senior college. Undecided, pre-nursing, and some allied health majors may remain in UCFY for 45 attempted hours.

Center for Advising & Counseling enrolls students who have attempted 30-plus hours of college credit and who have not yet met the admission requirements for one of the university's degree-granting senior colleges. Other special populations are included as well. Visiting students, cross-enrolled students from other institutions, and non-matriculating students who are not working toward degrees are examples of these special populations.

Allied Health and Pre-Nursing Programs – Many Allied Health and pre-nursing students begin their academic careers at LSU with the intent of continuing their studies at one of the campuses of the LSU Health Sciences Center or possibly one of several state and private schools offering degrees in these areas. University College provides advising assistance for these students as they prepare for the selective admission process for these professional programs.

Student Support Services is a federally funded TRIO program that serves a select group of undergraduate students experiencing income, first generation, and disability barriers to academic success. The program provides academic, personal, and career enhancement opportunities designed to increase retention and graduation success.

Ronald E. McNair Research Scholars, also a federally funded TRIO program, is a part of University College. The program prepares eligible participants for doctoral studies through involvement in research and other scholarly activities. Participants are first generation students, students from a background of financial need, and students who are from ethnic groups underrepresented in graduate education.

Center for Advising & Counseling

OFFICE	150 Himes Hall
TELEPHONE	225-578-8281
FAX	225-578-8268
E-MAIL	ucac@lsu.edu
WEBSITE	www.lsu.edu/ucac

The Center for Advising & Counseling serves both traditional and nontraditional students and allows them the opportunity to meet their individual academic goals. Within the framework of university regulations, students may be admitted to the Center for Advising & Counseling according to the following:

- **Students admitted from the Center for Freshman Year** must have earned a minimum of 30 credit hours and meet the university's requirements for continued enrollment. Students exiting the Center for Freshman Year who are in good academic standing, on University Scholastic Warning, or on University Scholastic Probation are admissible.
- **Transfer students, re-entry students, and students from other divisions** of the university may be admitted for a limited time in an effort to meet the admissions requirements to a senior college. These students will be considered for enrollment based on their potential for success in a particular degree program.

All admitted students will meet with an academic counselor to develop a plan outlining conditions and duration of enrollment in the Center for Advising & Counseling. Plans may be revised based on student performance, and continued enrollment may be denied if students fail to progress as defined in the individualized enrollment plan. Students are generally allowed a maximum of four regular semesters of enrollment in UCAC. In some instances, it is appropriate to limit enrollment to less than four regular semesters.

Enrollment Options

- **Pre-degree** - Students with a declared major that are not eligible for enrollment in the freshman college but do not meet the admission criteria for a senior college.
- **Pre-professional** - Allied health or nursing students who are not pursuing an undergraduate degree at LSU and have the potential to pursue one of the pre-professional programs at the LSU Health Sciences Center in New Orleans or Shreveport.
- **Not Regularly Admitted Students** - Students pursuing a degree at another college or university and taking courses at LSU with the intent to transfer all credit to their home institutions.
- **Non-matriculating Students** - Students who have completed a degree at a four-year institution and wish to take undergraduate courses with no specific degree path or who are in need of meeting admission requirements to a senior college that will offer a second degree.

International students who are in the U.S. on student visas are not eligible for admission to pursue their studies as non-matriculating or non-degree seeking students in the Center for Advising & Counseling according to the regulations of the United States Citizenship and Immigration Services.

- **Restricted Admit** - Students who have been previously enrolled in a senior college and are petitioning enrollment in UCAC as a condition of College Scholastic Probation or for students who are exiting a senior college to attempt admission to another senior college offering a newly declared major. Enrollment in this category is generally limited to one semester.
- **Southern University Cross Enrollment** - Students regularly enrolled at Southern University and taking a course or courses at LSU through the cooperative agreement between the two institutions.

A University College appeals committee will exercise discretion in considering other variables important to the admission decision of students being considered for enrollment in UCAC.

Ronald E. McNair Research Scholars, a U.S. Department of Education (ED) TRIO program, promotes a cohort of scholars that more accurately reflects the emergent diversity in life experiences, cultures, and perspectives represented in academia by preparing students who are first generation, low-income, and underrepresented in graduate education for doctoral studies. We connect undergraduate students with faculty-directed research experiences, provide individualized advisement, and foster knowledge of the graduate school application process. McNair Research Scholars conduct research under the mentorship of some of the most distinguished faculty in their country and communicate the results of their work through publications and workshops.

Student Support Services (SSS) is a federally funded TRIO program providing services to help participants achieve academic success. The goal of the program is to increase retention and graduation rates of participating students. Individuals who are first-generation college students, who have a documented disability, or who meet the income eligibility established by the U.S. Census Bureau and have a need for academic support are encouraged to apply. The Student Support Services program offers a class, free tutoring, personalized counseling and academic advising, career decision-making assistance, opportunities for cultural enrichment, a computer lab solely for SSS students, and much more. Additional information can be obtained from Student Support Services Assistant Director, 136 Allen Hall, online, or by calling 225-578-2869.

Departments, Schools, and Curricula

The dean, directors of schools, heads of departments, and members of the faculty of the college will consult with students on their choices of curricula. Requests for substitutions for required courses in any curricula in the college must have approval of the dean, upon recommendation of the head of the department or school. A maximum of six semester hours of basic ROTC and eight semester hours of advanced ROTC may be allowed for elective credit in any curriculum.

- Department of Agricultural Economics & Agribusiness
- Department of Plant Pathology & Crop Physiology
- School of Nutrition & Food Sciences
- Agricultural Education (Intercollegiate Program)
- Department of Entomology
- Department of Textiles, Apparel Design & Merchandising
- School of Plant, Environmental & Soil Sciences
- Department of Experimental Statistics
- School of Animal Sciences
- School of Renewable Natural Resources

The College of Agriculture was established at LSU in 1908; however, its roots go back to the first graduation class that had, as one of its five graduates, a planter. The mission of today's College of Agriculture is one rooted in business, science, and technology. The application of knowledge to meeting the world's food and fiber needs remains the common thread that binds the college's past to its future.

The college's land-grant mission dates to 1862 and consists of three emphases: learning, discovery, and active engagement in our community. The discovery and engagement components of the college's mission are often conducted in concert with the LSU Agricultural Center. Many faculty hold joint appointments with the Louisiana Agricultural Experimental Station or the Louisiana Cooperative Extension Service—the research and education units of the LSU Agricultural Center. The interlinking of learning,

discovery, and engagement are hallmarks of the land-grant system and are likewise the cornerstones of the College of Agriculture's strategic agenda for the future.

The College of Agriculture is home to more than 40 majors and areas of concentration within 9 academic departments and schools. All of the programs provide an interdisciplinary educational experience that reflects the latest in science and technology and is built on the five focus areas that are core to the college's strategic agenda.

Degree Programs

All undergraduate degrees in the College of Agriculture are Bachelor of Science degrees. The following programs are offered by the College of Agriculture:

- Agricultural Business
- Agricultural Education, Grades 6-12
- Plant & Soil Systems*
- Animal, Dairy & Poultry Sciences
- Nutrition & Food Sciences
- Textiles, Apparel & Merchandising
- Environmental Management Systems
- Natural Resource Ecology & Management

** The curriculum in plant and soil systems consolidates the curricula in the areas of agronomy, entomology, horticulture, plant pathology, and crop physiology. Students in this curriculum take core courses that provide a basic knowledge required for specialization in one of the ten areas of concentration: agricultural pest management (entomology emphasis), agricultural pest management (plant pathology emphasis), crop science, environmental horticulture, horticultural science, landscape management, soil science, sustainable production systems, turfgrass management, and urban entomology. Each area is further individualized by the addition of approved and free electives.*

Vision

To be a leading college of agriculture, taking undergraduate and graduate students to the highest levels of intellectual and personal development in the milieu of a competitive research, service, and teaching land-grant university.

Mission

To provide programs of excellence to educate undergraduate and graduate students of agriculture, environmental sciences, renewable natural resource sciences, human resource sciences, quantitative sciences, and human sciences; to support and encourage research, public service, and other scholarly pursuits; to further the purposes of the land-grant college system for the benefit of the citizens of Louisiana, the nation, and the global community.

Strategic Agenda

To achieve our mission, the College of Agriculture has developed a strategic agenda focused on five interdisciplinary areas. These areas encompass broad fields of work and are, by their content, interdisciplinary and cross many administrative lines both within the college and in other administrative units. In particular, these areas coincide with and closely follow the research and development agenda of the LSU Agricultural Center.

- Environmental quality and renewable resource management
- Bioscience and technology in agriculture
- Processes and products for added value
- Agribusiness, consumer science, and global competitiveness

- Food quality, nutrition, and health

Coordination with the LSU Agricultural Center

The College of Agriculture, in coordination with the LSU Agricultural Center, offers students unique and unparalleled educational opportunities. The Louisiana Agricultural Experimental Station maintains research programs in Baton Rouge and at branch stations throughout Louisiana. The Louisiana Cooperative Extension Service disseminates knowledge throughout Louisiana through its network of specialists in Baton Rouge, county agents, and family and consumer sciences in every parish. A compressed video system that links all areas of the state greatly facilitates the delivery of educational programming.

Close cooperation between the college and the Agricultural Center provides an instructional program of exceptional quality, combining knowledge and the latest in technology and application. Because many faculty members in the college also hold appointments in the Agricultural Center, students are exposed to the latest in cutting-edge research and how that knowledge is disseminated to the field through the extension service.

The College of Agriculture and the Agricultural Center are actively involved in disseminating new knowledge and methods throughout the world. Internationally experienced faculty and staff bring their insights and experiences into the classroom to further enhance the learning experience. An active international program provides opportunities for students to gain valuable international experience that can assist them in future employment or study. The college and the Agricultural Center are currently active in Central and South America, Southeast Asia, West Africa, Europe, and countries of the former Soviet Union.

Facilities

Facilities for instructional purposes include more than 4,500 acres of farm and timber land and buildings for the care and study of crops and plants, livestock and poultry, and wildlife and forests.

Computer facilities, laboratories, and related research facilities are used for teaching purposes. Land and facilities at branch research stations throughout Louisiana also play a part in the teaching program, particularly at the graduate level. The state's land and water resources; plant, animal, and aquatic life: and its communities and people strengthen instruction through a constantly changing complex of hundreds of research projects throughout the state that are coordinated with the teaching program. Similarly, research, teaching, and extension activities in foreign countries are made an active part of the classroom instruction.

Livestock include purebred herds of Angus, Brahman, and Hereford cattle that are used in teaching and research studies. Artificial insemination and embryo transfer are used to incorporate current genetics from leading herds in Louisiana and throughout the U.S. Other herds of beef cattle near the campus include breeds and crosses representative of the Southern beef cattle industry. Brahman-British cow herds are bred to either British or heavy muscled terminal sire breeds such as Charolais or Braford bulls to produce a broad range of cattle types for research and teaching purposes. The dairy herd is composed of the Holstein breed.

A number of Quarter Horses and grade mares are maintained for research and instruction. The Dairy Improvement Center cooperates with Genex in the operation of a commercial artificial breeding program. Commercial strains of poultry are used in instruction and research. Research and teaching with poultry are conducted at a modern state-of-the-art facility. Totally enclosed tunnel-ventilated houses are designed to conduct research with broilers, layers, and broiler-breeders.

Admission Requirements

Within the framework of university regulations, students may be admitted to the college according to the following policies:

- Entering freshmen who meet the university admissions standards and have a declared major within the College of Agriculture will be directly admitted to the College of Agriculture.
- Students transferring from another academic unit on the LSU campus will be admitted to the College of Agriculture after they have earned at least a 2.00 cumulative and in major (all courses accepted towards degree requirements)

grade-point average, and a "C" or better in MATH 1021 or higher and ENGL 1001 (ENGL 1004 for international students).

- Students transferring from another institution must also meet university transfer admission requirements as detailed in this catalog under "Undergraduate Admissions".
- On recommendation of the appropriate department head/school director and the dean of the college, probationary admission may be granted in special cases.
- Students not meeting requirements may appeal their admission by contacting the College of Agriculture's Office of Student Services.

Degree Requirements of the College

The baccalaureate degree is conferred on students who fulfill the following requirements:

- Students must complete their curricula with at least a 2.00 grade point average on all work taken not resulting in grades of "P," "W," or "I." Students must have a 2.00 average on work taken at this university, as well as a 2.00 average on the entire college record.
- Teacher Education Program only: Minimum grade point average of 2.50, cumulative and LSU; passage of all state-required sections of the PRAXIS II Series; minimum grade of "C" in course work as specified by the Louisiana Board of Elementary and Secondary Education.
- The last 30 semester hours of the degree program must be taken in residence in the College of Agriculture. Independent and Distance Learning courses taken in the last 30 hours will not be considered residence credit without prior approval of the department head concerned and the dean of the college.
- Graduation check-out must be completed and approved by the Dean's Office during the semester prior to graduation.

Enrollment in Two Degree Programs

With the dean's approval, a student may be enrolled in two degree programs concurrently. A student can enroll as a dual registrant using one of the following procedures:

- Dual Enrollment within the College of Agriculture—By completing residence and academic requirements for two degree programs, a student may earn one bachelor of science degree with two majors. By completing residence and academic requirements and earning 30 hours over the degree requiring the fewer number of hours, a student may earn two separate bachelor's degrees.
- Dual Enrollment in the College of Agriculture and a Second Academic College—By completing residence and academic requirements for two degree programs and earning 30 hours more than the degree requiring the fewer number of hours, a student may earn two bachelor's degrees. The student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

Scholastic Requirements

In addition to university requirements, the College of Agriculture has additional scholastic requirements:

- Students must complete at least one general education English composition course and one general education analytical reasoning course with a "C" or better within the first 30 hours of study.
- Students who fail to earn a 2.00 average in each of two consecutive regular semesters and whose LSU or cumulative grade point average is below a 2.00 will be declared ineligible to continue in the College of Agriculture for one regular semester.

- Seniors who have completed the first semester of the senior year, are degree candidates, and are under scholastic suspension from the university may be placed on probation for one additional semester at the discretion of the dean of the College of Agriculture.

Readmission to the College

Students who have completed terms of scholastic suspension from the university may apply for readmission through the Office of Enrollment Management. They may be readmitted only with the approval of the head of the appropriate department/school and the dean of the College of Agriculture. Readmission is not guaranteed.

Distance Program Courses

Up to one-fourth of the number of hours required for the baccalaureate degree may be taken through distance program courses. Before scheduling such work, however, students should obtain approval from the dean of the college.

Graduate Programs

Through the Graduate School, the college offers master's and doctoral degrees in the fields of agricultural economics, animal and dairy sciences, entomology, food science, human ecology, plant, environmental management, and soil sciences, plant health, and renewable natural resources. In addition, a master's degree is offered in applied statistics. For further details, consult "The Graduate School" section of this catalog.

Louisiana Consortium of Public Agricultural Colleges (LCPAC)

Louisiana State University is a member of the Louisiana Consortium of Public Agricultural Colleges (LCPAC). The consortium has developed a 60-hour, two-year core curriculum to facilitate the transfer of agricultural students among Louisiana public colleges and universities. The articulation policy for the LSU College of Agriculture is shown below.

[Click here to view the LSU Course Equivalencies for the LCPAC Core.](#)

Minor Field Requirements (Optional)

Students in the College of Agriculture are not required to pursue a minor. They may choose to do so by the guidelines outlined below:

- A minor is the student's field of secondary academic emphasis. A minor consists of a minimum of 18 hours of related course work designed to provide breadth and depth in a student's undergraduate program
- At least nine hours must be taken at the 3000- and/or 4000-level on this campus
- A minimum GPA of 2.00 is required in the minor field on all work taken in the LSU System and on all work taken
- Minors inside the College of Agriculture must be initiated by the department or school administering the majority of the courses constituting the minor. When submitting a minor for approval, the department or school should specify whether its students may elect that minor. All minors must be approved by the college committee on courses and curricula
- Students may not minor and major in the same degree program.

The degree program of a student outside the College of Business may not consist of more than 30 hours of degree credit earned in courses offered by the College of Business.

Minor in Agriculture

The College of Agriculture also offers a *minor in Agriculture*. To graduate with a minor in agriculture: Choose nine hours from the following: AGEC 2003; AGRI 1005; AGRO 1001; ANSC 1011 or ANSC 1049; EMS 1011; ENTM 2001; FDSC 1049; HORT 2050; AEA 2001; HUEC 1110; HUEC 2045; RNR 1001.

Choose nine hours from any course (3000/4000-level) within the College of Agriculture.

For a list of all other minors within the College of Agriculture, please see the individual departmental links above.

Pre-Veterinary Medicine

The pre-veterinary program involves three or more years of training—at least 66 semester hours—prior to application to the LSU School of Veterinary Medicine. Students interested in attending veterinary school can pursue a degree program in one of two areas listed below and enter the LSU School of Veterinary Medicine after completion of the first three years of the chosen curriculum. The pre-veterinary program will allow you to pursue an undergraduate degree in either of the following areas: animal, dairy, and poultry sciences or natural resource ecology and management. After successful completion of the first year of work at the LSU School of Veterinary Medicine, you will be awarded a Bachelor of Science degree in your chosen undergraduate field of study. You will then complete the remainder of the professional curriculum in veterinary science required for a Doctorate of Veterinary Medicine.

Pre-Medicine and Pre-Dental

The College of Agriculture at LSU provides unique opportunities that prepare students to enter careers in medicine, dentistry, and allied health fields. Programs within the School of Animal Sciences and the School of Nutrition and Food Sciences offer appealing options for students; however, students in the college's departments and schools can fulfill pre-medical or pre-dental course requirements while pursuing a major in an area that matches their own career interest. The College of Agriculture not only provides students with an exceptional academic basis for professional careers in medicine or dentistry, but also enhances their education with communication, leadership skills, and opportunities in community service and research. Alumni of these programs have been accepted at prestigious medical schools such as Columbia, Emory, Johns Hopkins, and the LSU Health Sciences Centers in New Orleans and Shreveport.

Gamma Sigma Delta

Gamma Sigma Delta is an honor society that promotes the advancement of all disciplines associated with agriculture and their contributions to mankind. We encourage high standards of scholarship and worthy achievements as well as excellence in practice in all branches of agricultural and related sciences.

Members of the LSU chapter include graduate and undergraduate students, faculty members, and administrators representing research, teaching, and outreach. We represent a diversity of disciplines including textiles, renewable natural resources economics, business, nutrition and food science, human resources, workforce development, veterinary medicine, horticulture, and traditional agricultural animals and crops.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Departments, Schools, and Curricula

- School of Architecture
- School of Art
- Department of Interior Design
- Robert Reich School of Landscape Architecture

The College of Art & Design is a community of engaged students and faculty committed to speculative endeavors in all aspects of the visual arts and design disciplines.

The college community's core is fundamental practices while recognizing the challenge of creative activity are met by mining the core of traditional disciplines and exploring the interstices between disciplines.

The college recognizes that critical investigations in art and design occur in a context of regional, national, and global concerns. These contexts are meaningful only when referenced to a framework of one's immediate cultural and physical context. The college faculty constructs these frames of reference through general education, discipline specific education, interdisciplinary investigations, creative activities, colloquia, and community outreach.

The college's student and faculty collaborators value inquiry-based learning, encourage a spirit of risk taking, excite an appetite for thinking and making, nurture a capacity to create, and passionately pursue the means to capitalize on the opportunities thereby presented.

As a key component of the arts and cultural community, the college advances the role of the artist/designer in the broader community through distinctive public education and exhibition programs that serve the citizens of Louisiana with an enriched appreciation of culture.

Degree Programs

The following undergraduate programs are offered by the College of Art & Design:

- Architecture, BAR
- Studio Art, BFA
- Interior Design, BID

- Landscape Architecture, BLA

Accreditation

The college has nationally accredited degree programs in architecture, art, interior design, and landscape architecture. The School of Architecture offers both a bachelor of architecture and a master of architecture accredited by the National Architectural Accrediting Board (NAAB). The School of Art's seven areas of concentration are accredited by the National Association of Schools of Art and Design (NASAD). The School of Art offers a Bachelor of Fine Art, a Master of Fine Art, and a Master of Art in Art History. The Department of Interior Design offers a Bachelor of Interior Design degree that is accredited by the Council of Interior Design Accreditation (CIDA). The Robert Reich School of Landscape Architecture offers both a Bachelor of Landscape Architecture and a Master of Landscape Architecture accredited by the Landscape Architecture Accreditation Board (LAAB).

Admission Requirements

Entering freshmen who meet the university's admissions standards and have a declared major in the College of Art & Design will be directly admitted to the College of Art & Design.

Units within the College of Art & Design have selective admission and retention policies that apply to degree programs in architecture, interior design, landscape architecture, and studio art. Students planning to apply to one of these programs should carefully review this catalog for special requirements and application deadlines. Entering freshmen admitted to the college but not to a specific program due to selective admissions will be advised on what courses to take to be competitive for future selective admissions. For students not directly admitted as freshmen, general requirements for entering the college are as follows:

From University College, other division of LSU, or by transfer from another college or institution • Students must have earned a minimum of 24 semester hours, with a 2.00 cumulative GPA, and they must be admitted to an Art & Design degree program.

Students transferring from another institution must also meet university transfer admission requirements.

Applicants will be required to submit a portfolio for admission to some degree programs. The extent to which transfer credits acceptable for admission to the university fulfill degree requirements will be determined by the college.

Readmission

Students who were not registered at LSU for the preceding regular semester must file a formal application for readmission.

Degree Requirements of the College

It is the student's responsibility to qualify for a bachelor's degree by meeting these requirements:

- Complete 39 hours of general education courses as specified in a separate section of this catalog.
- Complete one of the established curricula offered by this college. Any substitutions submitted for the curricula as published must have written approval of the department chair or school director and the dean's office.
- Achieve a minimum GPA of 2.00 on all work taken in the LSU System and on all work taken at other institutions.
- Complete a minimum of 30 semester hours in residence in the college. Independent and Distance Learning courses taken in the last 30 hours will not be considered for residence credit.
- Complete the last 30 semester hours while in residence in this college on the LSU campus. Independent and Distance Learning courses taken in the last 30 hours will not be considered residence credit without prior approval of the department head and the dean of the college.
- Initiate the graduation check-out procedure with the dean's office during the semester *prior* to the semester in which the degree is to be awarded.

Requirements for a Second Bachelor's Degree

Second degrees may be awarded at the bachelor's level in architecture, art, interior design, and landscape architecture. The program of study for the second degree must include a minimum of 30 semester hours of work beyond requirements for the first degree, including any degree requirements not previously met.

Enrollment in Two Degree Programs

With the dean's approval, a student may be enrolled in two degree programs concurrently. A student can enroll as a dual registrant using one of the following procedures.

- *Dual Enrollment Within the College of Art & Design*—By completing residence and academic requirements, and earning 30 hours more than the degree requiring the fewer number of hours, a student will earn two separate bachelor's degrees.
- *Dual Enrollment in the College of Art & Design and in a Second Academic College*—By completing residence and academic requirements for two degree programs and earning 30 hours over the degree requiring the fewer number of hours, a student can earn two bachelor's degrees.

The student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files will be maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

College Probation

In addition to university requirements, the College of Art & Design has these additional academic requirements:

- Students who fail to earn a minimum 2.00 grade point average for any semester will be placed on college academic probation.
- Students on academic probation for two consecutive semesters will not be permitted to continue their academic program and will be administratively dropped from the College of Art & Design. Students who have been dropped from the college may apply for readmission to the college and their academic program on a probationary basis once a 2.00 semester GPA and a cumulative 2.00 GPA is achieved. (Students should check individual programs for probation, separation, and readmission criteria.)

Special Provisions of the College

The pass-fail grading option is limited to courses that are electives in the degree programs.

Independent and Distance Learning Credit

Special restrictions apply to Independent and Distance Learning (IDL) credit used toward degree credit. Students who wish to have IDL credits accepted by this college must have approval from the dean's office prior to scheduling the courses.

Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL credit during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL credit during the summer term.

No more than 15 semester hours of IDL credit may be applied toward the degree requirements of the college. No more than six semester hours of IDL credit may be applied to a student's general education requirement.

Students may not be enrolled in IDL credit during the semester they plan to graduate.

Graduate Programs

The Master of Architecture, Master of Fine Arts, Master of Arts in Art History, and Master of Landscape Architecture are offered through the Graduate School. Consult "The Graduate School" section.

Minor Field Requirements (Optional)

Students in the College of Art & Design may pursue a minor field under the following guidelines:

- Earn a minimum of 15-18 semester hours in the minor field, of which at least six semester hours must be in courses taken on this campus at the 3000- and/or 4000-level. See the individual curricula for specific courses.
- Earn a minimum GPA of 2.00 in the minor field.
- Courses used to satisfy minor requirements may not be taken on a pass-fail basis.

A minor field may be selected from any major field currently offered by the college in which appropriate requirements for a minor have been established.

Minors outside the college can be established, provided that the minor conforms to the guidelines noted above for minors in the college and the minor meets the guidelines established by the department, school, or college concerned.

Students who major in one of the studio art concentrations or students from other colleges may pursue an undergraduate minor in art history, ceramics, digital media AVATAR arts, fine art, printmaking, or sculpture. Minors in photography and painting are only open to art majors. Students from other colleges are not restricted from minors offered by the other disciplines within the College of Art & Design. Please check prerequisites for all courses.

Tau Sigma Delta

Tau Sigma Delta (ΤΣΔ) was founded in 1913 to recognize excellence in art and design education. It is a scholastic honor society open to students enrolled in accredited degree programs in architecture, landscape architecture, interior design, or art who have a minimum GPA of 3.00 and who rank in the upper 20 percent of the cohort in their discipline. The Alpha Zeta chapter at LSU performs service for the university and for the community at large through the creative work of its members. New members are initiated and honored in the spring semester, and wear identifying ΤΣΔ stoles on their academic gowns at commencement exercises.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Undergraduate Programs

The E. J. Ourso College of Business is Louisiana's premier public business school, committed to excellence in fostering learning and pursuing discovery in an intellectually diverse, global business environment. It serves its constituents in the following ways:

- Making significant contributions to the advancement of knowledge in related business disciplines;
- Delivering high quality degree programs that produce graduates who will excel in their respective fields of business;
- Providing programs that strengthen the business skill sets of firms and institutions;
- Making valuable contributions to the practice of business in related business disciplines; and
- Engaging in other academic or applied programs and activities that advance business development in the State of Louisiana, the nation, and worldwide.

The E. J. Ourso College of Business offers specialized professional training in several areas of business in addition to a program of general business. All undergraduate degrees in the E.J. Ourso College of Business are Bachelor of Science degrees. The following programs are offered by the E.J. Ourso College of Business:

- Accounting
- Economics
- Finance
- General Business
- Information Systems & Decision Sciences
- International Trade & Finance
- Management
- Marketing

Each curriculum is constructed to ensure that students receive a broad general education and a sound foundation in the basic areas of business knowledge. At the same time, students may obtain limited specialization in a particular area of business. The objective of the college is to provide training in the functional fields of business so students will be qualified to hold positions of leadership, trust, and responsibility in business and industry.

The E. J. Ourso College of Business is a member school of the Association to Advance Collegiate Schools of Business (AACSB). Its undergraduate programs have been accredited continuously by the AACSB since 1931.

Graduate Programs

Master's and doctoral degrees are offered through the Graduate School by the various departments within the college. In addition, the following specialized master's degrees are offered. For information about these degrees consult "The Graduate School" section.

James C. & Cherie H. Flores Master of Business Administration Program

The combination of a general or a technical undergraduate education with a graduate-level Master of Business Administration degree is a widely recognized avenue to opportunity and success in the business world. To this end, the college offers an MBA program for students who aspire to management careers in business and industry. The program is open to those who hold degrees in humanities and social sciences or specialized fields such as engineering, geology, chemistry, physics, or agriculture, as well as to students with undergraduate degrees in business.

Master of Public Administration

The Master of Public Administration is a professional program for students interested in public management and/or public policy issues. The MPA program provides students with the management and financial skills to work in public agencies, non-profit organizations, private consulting and research organizations, and private companies in governmental relations. This program is administered by the Public Administration Institute. MPA students take 33 credit hours of core courses and nine credit hours in an area of specialization.

Undergraduate Admission Requirements

Students in good standing may apply for admission to the E.J. Ourso College of Business. Students transferring from another institution must also meet university transfer admission requirements. Application forms are available in Room 1053 Business Education Complex or online (www.business.lsu.edu). Students who are denied admission may reapply for admission in a subsequent semester.

Students are eligible for admission to the E.J. Ourso College of Business once they have successfully completed the following requirements:

- Complete a minimum of 30 hours of university course work.
- Complete the Pre-Business Core classes (ENGL 1001, MATH 1021 and MATH 1431, ECON 2000, ISDS 1102, and ACCT 2001) with a "C" or better. Students who place or test out of any of the Pre-Business Core classes will be given credit for successfully completing those classes.

Students majoring in accounting, finance, or management must meet the following GPA requirements at the time of their application for admission into the major:

- A minimum 3.0 cumulative GPA
- A minimum 2.5 LSU GPA
- A minimum 2.5 business GPA
- A minimum 2.5 LSU business GPA

Students majoring in economics, general business, international trade & finance, information systems and decision sciences, or marketing must meet the following GPA requirements at the time of their application for admission in to the major:

- A minimum 2.0 cumulative GPA
- A minimum 2.0 cumulative LSU GPA
- A minimum 2.0 business GPA
- A minimum 2.0 LSU business GPA

Maintenance Requirements

Continued enrollment in the E.J. Ourso College of Business is dependent upon satisfying the following requirements:

- Maintain a cumulative GPA of 2.0 on all university course work.
- Maintain a minimum LSU cumulative GPA of 2.0 on all LSU system course work.
- Maintain a minimum 2.0 business GPA.
- Maintain a minimum 2.0 LSU business GPA.
- Maintain satisfactory academic progress towards the completion of the degree.

College Probation

A student will be placed on college probation and will be required to meet with an academic advisor in the dean's office for the following reasons:

- The student's cumulative GPA falls below a 2.0 at the end of any academic semester.
- The student's LSU GPA falls below a 2.0 at the end of any academic semester.
- The student's business GPA falls below a 2.0 at the end of any academic semester.
- The student's LSU business GPA falls below a 2.0 at the end of any academic semester.
- The student fails to make satisfactory academic progress towards the completion of the degree.

A minimum 12-hour load is expected in the probationary semester. Students on *college probation* will have a college hold placed on their registration which will require them to schedule an appointment with a college academic advisor to register for classes for the next semester. The registration flag will be automatically removed after the student is taken off college probation. Students will be dropped from the college if they are not removed from college probation after one probationary semester.

Removal from the College

Students will be **dropped** from the E. J. Ourso College of Business for the following reasons:

- Students placed on college probation and who fail to improve their GPA to the minimum maintenance standard after one probationary semester. Minimum maintenance standards are a 2.0 cumulative GPA, a 2.0 LSU GPA, a 2.0 business GPA, and a 2.0 LSU business GPA.
- Students placed on college probation for failure to make satisfactory academic progress and who fail to make satisfactory academic progress during the probationary semester.

Readmission to the College

Students, who have been dropped from the E.J. Ourso College of Business for any reason, may reapply for admission to the college. Students who were not registered at LSU for the preceding regular semester must also file a formal application for readmission. All students applying for readmission will be subject to the admission requirements at the time of the readmission. Readmission to the E.J. Ourso College of Business is not automatic. Students seeking readmission are encouraged to schedule an appointment with a college academic advisor.

Degree Requirements of the College

The degree of Bachelor of Science will be conferred on E.J. Ourso College of Business students who complete one of the approved curricula with a 2.0 or better grade point average on all work taken and a 2.0 or better GPA on all business courses. The requirements above apply both to the total course work taken and to LSU course work.

A 2.0 or better grade point average is required in all accounting course work in order to graduate with a major in accounting. This requirement applies both to the total accounting course work taken and to LSU accounting coursework.

Twenty-four of the last 30 hours taken toward the degree must be earned in residence as a registrant in the E.J. Ourso College of Business at LSU. The university requires that all candidates for the bachelor's degree must fulfill a minimum residence requirement of at least 25 percent of the total number of hours required for the degree at this university.

The AACSB *Standards for Accreditation* state that "the school should require that at least 50 percent of the business credit hours required for the business degree be earned at the degree-awarding institution."

The student must complete a minimum of 120 semester hours in accordance with the following regulations.

Academic Work: 120 Semester Hours

All 3000/4000 level business courses, except ACCT 3001, ISDS 3115, MGT 3200, and MKT 3401 are restricted to students who have completed 60 hours of college-level course work. Many 3000/4000-level business courses have prerequisite requirements. Students are responsible for ensuring they have completed the necessary course prerequisites as stated in the most recent catalog prior to registration for a course.

All business majors must complete six hours of Oral and Written Communication courses. See "Departments and Curricula" for more details.

General Education Requirements for a Degree in Business

- *English Composition (6 hours)*—ENGL 1001 with a grade of "C" or better; and ENGL 2000 with a grade of "C" or better
- *Analytical Reasoning (6 hours)*— MATH 1021 and MATH 1431 with a grade of "C" or better; MATH 1023 may be substituted for MATH 1021. MATH 1550 or MATH 1551 may be substituted for MATH 1431. Students should refer to their chosen curriculum to determine the specific mathematics requirements. No student may receive more than nine semester hours of mathematics courses numbered below 1550.

- *Natural Sciences (9 hours)*—Students must take three General Education Natural Science courses, two of which must be in a two semester sequence from the approved list of General Education Natural Science courses. A minimum of six hours must be in a physical or a life science course sequence and the remaining hours must be in an area other than that previously selected (i.e., both physical and life sciences must be taken). See those courses listed as General Education Natural Science courses in the catalog.
- *Arts (3 hours)*—See those courses listed as General Education Arts courses in the catalog.
- *Humanities (9 hours)*—See those courses listed as General Education Humanities courses in the catalog.
- *Social Sciences (6 hours)*—ECON 2000 with a grade of "C" or better and ECON 2010.

Electives

Students may choose any degree credit courses offered by the university consistent with their specific degree requirements. However, no more than six hours may be selected from kinesiology activity courses, band, chorus, or music skills courses. Up to six semester hours in ROTC may be used as electives in all business curricula.

Transfer of Credit from Other Institutions

In the E.J. Ourso College of Business, transfer credits accepted by the Office of Enrollment Management: Undergraduate Admissions shall be valid for degree credit only to the extent to which they represent courses acceptable in the curricula of the college. The extent to which credit earned in other colleges and universities is accepted toward fulfilling degree requirements is determined by the office of the dean.

Transfer credit in which grades of "F" or "U" have been earned is not accepted toward fulfilling the degree requirements. For business courses, only transfer credit of a "C" or higher may be applied towards the degree. Students enrolled in this college who wish to obtain credits from other colleges or universities (including other campuses of the LSU System) and who plan to use such credits toward degree requirements should obtain prior approval in writing on a course-specific basis from the dean's office.

Independent and Distance Learning Credit

Students must have the permission of the dean of the college prior to scheduling Independent and Distance Learning (IDL) coursework.

Students who are taking classroom courses at the university may not take IDL courses. Students not enrolled in classroom courses during a given semester may be approved for IDL courses through the dean of the E.J. Ourso College of Business (Business Education Complex, Room 1053) and may enroll at the Office of Independent & Distance Learning (1225 Pleasant Hall; 578-3171). Enrollment in IDL courses must be completed by the final date for adding courses for any semester, including summer term.

The deadline for completion of all IDL course work is the last day of final examinations for the semester during which the student is enrolled. IDL coursework is restricted to non-business and non-departmental electives and up to six hours of General Education Arts and/or Humanities courses. No more than 12 semester hours of IDL credit may be applied toward the degree requirements of the college. A student must complete all IDL coursework before registering to receive a degree and no degree may be awarded during a semester in which a student is enrolled in an IDL course.

Graduation Requirements

Each student must see an advisor or counselor for a final degree checkout when there are approximately 30 hours remaining to complete the degree requirements. Students who complete degree requirements during spring intersession should plan to graduate in August and must inform the dean's office of this intention. Such students should see a counselor and register in the summer for "degree only." Students who complete degree requirements during winter intersession should plan to graduate in May and must inform the dean's office of this intention. Such students should see a counselor and register in the spring semester for "degree

only." Students who complete degree requirements during summer intersession should plan to graduate in December and must inform the dean's office of this intention. Such students should see a counselor and register in the fall semester for "degree only."

Students who have completed courses at another college or university must have an official transcript covering this work on file in the Office of the University Registrar before registering for the degree.

Requirements for a Second Bachelor's Degree

To receive a second bachelor's degree from this college, students must:

- reapply for and gain admission to the college;
- complete two semesters in residence in the college;
- meet all stated requirements for a BS degree in the college;
- earn 30 additional hours of course work at the 3000-level or above, except when
 - the second degree program requires a 2000-level or below course, or
 - the course is in a language other than the student's native language.

Minor Field Requirements

General Business majors are required to complete an official university minor. Students majoring in other business areas have the option to pursue a minor. Minors may be selected from any of the minors approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs with the exception of the Business Administration Minor. Students in the E.J. Ourso College of Business must obtain permission from the Office of the Dean to pursue a minor.

Minor in Business Administration

The E.J. Ourso College of Business also offers a *minor in business administration*. To graduate with a *minor in business administration*, students must complete 18 hours consisting of the following courses: ACCT 2000 or ACCT 2001; ECON 2030; FIN 3715; ISDS 1100; MGT 3200; MKT 3401. Students must have a 2.0 GPA in the courses used to satisfy the minor. At least nine semester hours must be taken on this campus and, of the nine hours, three must be at the 3000- or 4000-level. This minor is **NOT** available to students in the E.J. Ourso College of Business.

Placement Service

The university maintains a professionally staffed Career Services office located in B-4 Coates Hall. Interviews are conducted throughout the year. The mission of Career Services is to assist students and alumni in choosing careers, obtaining career-related work experiences while in school, developing job search skills, and securing employment or admission to graduate or professional school.

Beta Gamma Sigma

Membership in *Beta Gamma Sigma* is one of the highest forms of recognition at the national level that a student can receive in an undergraduate or master's program in business or management. To be eligible for membership, a student must rank in the upper 10 percent of the junior class (second semester), upper 10 percent of the senior class, upper 20 percent of the graduating master's class, or must have completed all requirements to receive a doctorate. Transfer students must complete one full year as a full-time student at LSU to qualify for membership. Members are elected to membership and publicly recognized during the Spring Awards Ceremony.

Beta Gamma Sigma has three purposes: to encourage and reward scholarship, to promote advancement of education in business, and to foster integrity in the conduct of business operations.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

School of the Coast & Environment

School of the Coast & Environment

CHRISTOPHER D'ELIA <i>Dean</i>	RICHARD F. SHAW <i>Associate Dean</i>
LEAH D. COURVILLE <i>Assistant Dean</i>	KAM-BIU LIU <i>Chair, Department of Oceanography & Coastal Sciences</i>
LAWRENCE J. ROUSE <i>Chair, Department of Environmental Sciences</i>	VINCENT L. WILSON <i>Director of Undergraduate Programs</i>
1002Q Energy, Coast & Environment Building TELEPHONE 225-578-6316 FAX 225-578-5328 WEBSITE www.sce.lsu.edu	

Departments and Curricula

- Departmental of Environmental Sciences
- Department of Oceanography & Coastal Sciences

The *School of the Coast & Environment* (SC&E) includes two academic departments - Department of Environmental Sciences and Department of Oceanography & Coastal Sciences. The school administers undergraduate and graduate degrees and facilitates the development of innovative research programs leading to a better understanding of coastal and environmental systems worldwide.

The *B.S.* degree program in *Coastal Environmental Science* is the only academic program focusing on coastal environmental sciences in the Southern Gulf states. This degree program provides undergraduates with a solid math and science based curriculum that prepares students for graduate programs in a broad choice of advanced fields of study, professional programs in medicine, veterinary medicine, dentistry, or law, and careers in environmental sciences, environmental planning and management, oceanography, coastal and marine sciences, and wetland studies. During the junior and senior years, students may choose one of four areas of specialty for their upper division courses and have the opportunity to perform an independent research project in an environmental or coastal science related field. Diversity in the upper division curriculum enables students to focus on courses and areas of study that will help them pursue their desired future careers, whether that is in additional biological and medical studies, environmental toxicology, environmental chemistry, coastal restoration and management, or environmental law. This undergraduate degree program is hosted jointly by the Department of Environmental Sciences and the Department of Oceanography & Coastal Sciences.

The School of the Coast & Environment and the LSU Law School share faculty and programs in environmental law, energy, and the environment.

For specific information concerning undergraduate degree requirements for the *BS* in *Coastal Environmental Science*, refer to the curriculum within the departmental sections above. Detailed information about graduate degree programs in Environmental Sciences or Oceanography & Coastal Sciences may be found in "The Graduate School" section.

Admission Requirements

Students who are considering a BS in Coastal Environmental Science should pay special attention to the mathematics and science courses they select and should consult a representative of the program prior to their initial registration. Students will be admitted to the program when they have earned 24 or more semester hours of credit in courses numbered 1000 or higher; maintained a GPA of at least 2.00 on both LSU and cumulative averages; and have passed all courses in mathematics and science with a grade of "C" or better, or received special approval from the dean of the school.

Students transferring from another institution must meet university transfer admission requirements. Transfer students must also meet the current admission requirements of the school and receive approval from the dean of the school.

Students who, after initial enrollment in this school, wish to obtain credit for courses taken at other accredited institutions, and who plan to use this course credit toward their degree requirements, must obtain approval from the dean.

Degree Requirements

It is the student's responsibility to qualify for the bachelor's degree by meeting the following requirements:

- Meet the university's general education course requirements.
- Achieve a "C" or better in all science and mathematics requirements.
- Achieve a 2.00 GPA, as required by the university, for all work taken at LSU and on all work attempted at U. S. institutions.
- Successfully complete a minimum of 30 hours of residence in the Coastal Environmental Science program. These hours are included in the university requirement that a minimum of 25 percent of hours applied toward the degree be earned at LSU.
- Six hours of ROTC may be allowed for degree credit as long as they are taken at 3000-level or above.

Minor Field Requirements (Optional)

The Department of Oceanography and Coastal Sciences offers a minor in *oceanography and coastal sciences*. Students majoring in Coastal Environmental Science may *not* choose oceanography and coastal sciences as a minor.

The Department of Environmental Sciences offers an undergraduate minor in *environmental sciences*. This minor provides students with a background in fields of science immediately relevant to problems facing modern society. Students majoring in diverse fields of study will gain an understanding of the broad field of environmental sciences.

It should be noted that students may be eligible for undergraduate minors in both *chemistry* and *biological sciences* depending upon the courses selected. See the "College of Science" curriculum notes for specific requirements regarding minors in these programs.

College Probation

A student in the School of the Coast & Environment who fails to earn a 2.00 semester GPA in a regular semester will be placed on college probation. In addition, students who fail to meet the school academic requirements noted in the section on degree requirements, or who enter the school with deficiencies, may be placed on college probation. At the discretion of the dean, a student who is on college probation and fails to meet the academic requirements, including earning a 2.00 or better semester GPA, may be declared ineligible to continue in the School at the end of a regular semester. A student on college probation who does earn a 2.00 or better semester GPA, who remediates course deficiencies, and who makes satisfactory progress in the degree program will be removed from college probation at the end of a regular semester or summer term.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Departments, Schools, and Curricula

All curricula meet the university general education requirements with explicit course requirements and approved electives.

All technical electives must have approval of the chair of the engineering department in which the student registers. Under no circumstances may electives be chosen from remedial courses or courses that are preliminary to the first courses in engineering. Examples of such courses are MATH 1021, MATH 1022, etc. Students are advised to check with their departments on the selection of these electives.

- Department of Biological & Agricultural Engineering
- Gordon A. and Mary Cain Department of Chemical Engineering
- Department of Civil & Environmental Engineering
- Department of Construction Management
- School of Electrical Engineering & Computer Science
- Department of Mechanical & Industrial Engineering
- Craft and Hawkins Department of Petroleum Engineering

Engineering is defined by the American Society for Engineering Education as "...the profession in which a knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to utilize the materials and forces of nature economically for the benefit of mankind." Consistent with this definition, the College of Engineering prepares individuals for professional careers in engineering research, development, design, operation, or management industry, business, education, and government. This preparation is accomplished through education in a chosen engineering discipline consisting of general education fundamentals and design, mathematics, physical and life sciences, English composition, the arts, humanities, and social sciences.

The college also offers degrees in computer science and in construction management. The computer science degree program is a rigorous plan of study that provides the strong theoretical and applied background necessary for solving diverse problems related to software development. The construction management program establishes a unique plan of study into the business side of

construction by combining engineering, design, business, finance, law, and technical courses with emphasis in the different industry types – industrial, commercial, highway, and residential construction.

The College of Engineering includes seven degree granting departments, the Center for Geoinformatics, the Center for Rotating Machinery, the Hazardous Substance Research Center (South and Southwest), the Louisiana Transportation Research Center, the Louisiana Water Resources Research Institute, Energy Frontier Research Center, Gulf Coast Research Center for Evacuation and Transportation Resiliency, and the Turbine Innovation and Energy Research Center. The faculty is actively engaged in design, research, and problem solving in well-equipped facilities for research and teaching.

Degree Programs

The following undergraduate programs are offered by the College of Engineering:

- Biological Engineering, BSBE
- Chemical Engineering, BSCHE
- Civil Engineering, BSCE
- Environmental Engineering, BSEVE
- Construction Management, BSCM
- Industrial Engineering, BSIE
- Electrical Engineering, BSEE
- Computer Engineering, BSEE
- Computer Science, BS
- Mechanical Engineering, BSME
- Petroleum Engineering, BSPE

Proficiency Requirements

Mathematical proficiency is essential to engineers and to engineering education. Accordingly, students who plan to study engineering should schedule all appropriate mathematics courses available to them in high school. Placement tests are given to all incoming freshmen, and those who do not qualify to begin university mathematics at the level prescribed in the freshman engineering program cannot expect to complete requirements for a degree in the nominal length of time. Credit for mathematics courses preliminary to analytical geometry and calculus cannot be applied toward the engineering degrees in the College of Engineering.

Proficiency in college-level mathematics and physics is essential to successful completion of upper-division engineering courses. Engineering students must earn a minimum grade of "C" in MATH 1550, MATH 1552, and PHYS 2110 before they enroll in any engineering course numbered above 2999. However, CE 3700, IE 3201, IE 4462, and PETE 3025 may be taken.

English proficiency is defined as a grade of "C" or better in all required English courses in the student's curriculum (ENGL 1001 and ENGL 2000).

More stringent requirements may be imposed by individual departments. Refer to the curricular requirements of each department.

Admission Requirements

Admission to the university does not constitute acceptance into the College of Engineering or into a particular curriculum within this college. Where enrollment may exceed the facilities of a department, it may be necessary to limit the size of the classes in that curriculum. In such cases, the department establishes criteria for admission with approval of the university administration.

Students may enter the college from University College or by transfer from another division of LSU or from another approved college or university.

Students in the *LSU Center for Freshman Year* who meet the following criteria will be admitted to the college:

- 24 or more semester hours of earned credit in courses numbered 1000 or above;
- LSU and cumulative GPA of 2.00 or better;
- credit in MATH 1550 with a grade of "C" or better.

Petroleum Engineering majors must meet all College of Engineering admissions requirements and have a minimum 2.8 GPA in all courses that apply to the petroleum engineering degree.

Other students seeking admission from another division of LSU or by transfer from another college or university must also meet the above requirements. Students with more than 60 hours attempted will be considered for admission on the basis of the dean's evaluation of the entire academic record. Students transferring from another institution must also meet university transfer admission requirements as detailed in this catalog in the "Undergraduate Admissions" chapter.

Transfer of Credit from Other Institutions

In this college, transfer credits accepted by the Office of Enrollment Management shall be valid for degree credit only to the extent to which they satisfy courses in the curricula of the college. Transfer credits in junior and senior engineering courses will be accepted only if taken in programs accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Credit in courses in which grades of "D" have been earned is not accepted for transfer toward the degree requirements, if the course is taken outside the LSU System. Students enrolled in this college who wish to obtain credits from other colleges or universities (including other campuses of the LSU System) and who plan to use such credits toward degree requirements should obtain *prior approval* in writing on a specific-course basis from the dean's office.

Readmission

A student seeking readmission to this college must submit an application for admission. The dean, with recommendation of the department in which the student seeks admission, will determine whether readmission is granted and may prescribe the conditions for reinstatement.

Degree Requirements

It is the student's responsibility to qualify for the bachelor's degree by meeting these requirements:

- Completing one of the established curricula—any substitutions from the curricula as published must have written approval of the department chair and the dean's office.
- Achieving a 2.00 average, as required by the university, for all work taken at LSU and on all work attempted at U.S. institutions.
- Achieving a 2.00 average on all courses attempted in the major department at LSU and on all work attempted in the major field at U.S. institutions (with the exception of certain courses offered by the major departments for non-majors only). Civil engineering students must achieve a 2.00 average in all civil engineering (CE) and environmental engineering (EVEG) courses and on all work completed in the major field at U. S. institutions. Environmental engineering students must achieve a 2.00 average in all chemical engineering (CHE), civil engineering (CE), and environmental engineering (EVEG) courses and on all work completed in the major field at U.S. institutions. Industrial Engineering students must achieve a 2.0 average in all industrial engineering (IE) courses and construction management (CM) courses.
- Successfully completing a minimum of 30 hours of residence in the College of Engineering. These 30 hours are included in the university requirement that a minimum of 25 percent of the hours applied toward a degree be earned while in residence at the university. (These residence hours must include 15 hours of required major department courses or approved technical electives at the 3000- or 4000-level. Students must complete nine hours of these courses at the 4000-level in the major. The individual courses used to satisfy the residency requirement must be approved by the department chair.)

- Initiating the checkout procedure with the departmental advisor in the semester prior to the one in which the degree is to be awarded. The checkout is completed only when approved by the dean's office and the Office of the University Registrar.

General Education Requirements

All engineering, computer science, and construction management majors must complete one arts course, three humanities courses, two social sciences courses, and one life science course from the approved general education list from their catalog of record and according to the major curriculum requirements. Specific major requirements are noted in the "College Survival Handbook" available in the Student Services Office or online (www.eng.lsu.edu, see "Current Students").

Requirements for Second Bachelor's Degree

Students who hold one baccalaureate degree may wish to obtain a baccalaureate degree in engineering as a second degree. To do so, they must complete a minimum of 30 semester hours while enrolled in the department granting the second degree. In addition to the requirements of the first discipline, the student must satisfy all requirements for the second discipline, as shown in the curriculum.

They must attain a minimum 2.00 GPA average on all work scheduled while enrolled in the College of Engineering and on all work subsequent to receipt of the first degree. A student whose first degree was obtained elsewhere must also satisfy all the admission requirements of the college, as previously listed.

College Policy for "D" Grades and Repetition of Courses

Only those courses in which grades of "D" or "F" were earned may be repeated. Courses in which a grade of "F" were earned may be repeated only as allowed by the university as detailed in the "Regulations" chapter of this catalog. A student who earns a "D" or "F" in a course in which a minimum grade of "C" is required must register for the course again in the next regular semester in which the student is enrolled and the course is offered.

Graduate Programs

The college offers the Master of Science and the Doctor of Philosophy degrees through the Graduate School. The Master of Science program is mostly research oriented and emphasizes fundamental theory. It is offered in engineering science, coastal and ecological engineering, construction management, systems sciences, and biological and agricultural, chemical, civil, electrical, industrial, mechanical, and petroleum engineering. The Doctor of Philosophy degree is awarded in the fields of chemical engineering, civil engineering, computer science, electrical engineering, mechanical engineering, petroleum engineering, and engineering science. For additional information, consult "The Graduate School" section.

Independent and Distance Learning Credits

Independent and Distance Learning (IDL) courses to be used for degree credit must be approved by the office of the dean. Students must see a counselor in the Dean's Office to enroll and establish a Dean's Deadline for completion of the course. Consistent with university regulations, students may earn no more than one-fourth of the number of hours required for the bachelor's degree through IDL courses. In addition, no more than six hours of credit earned through IDL study may be applied to a student's general education requirement.

Students not registered in campus courses may enroll in IDL courses for degree credit; however, students who have been dropped from the university may not enroll in IDL courses for degree credit.

Students registered in the university may enroll in a maximum of 19 semester hours (21 would have to be approved by the Dean's Office) of combined IDL and campus course work during a regular semester and a maximum of 12 hours during the summer. Only in exceptional cases will students be allowed to enroll in IDL course work during the semester they plan to graduate.

Minor Field Requirements (Optional)

A student may earn a minor in a second field. The specific requirements are determined by the department offering the minor. Students who plan to minor in a second field must see a counselor in the dean's office to initiate the proper procedures. A student must earn a minimum 2.00 cumulative GPA in the minor field. The College of Engineering also offers *minors in Digital Media AVATAR Technology* and *Technical Sales*.

Minor in Digital Media AVATAR Technology

To earn a *Digital Media AVATAR Technology minor* a student must complete 21 credit hours of course work. These must include: CSC 1253, CSC 1350 or IE 2060; one course from ART 1001, ART 1011, ARTH 2470, MUS 1751, MUS 1799, ENGL 2009; nine credit hours of approved engineering and/or science electives; three credit hours of approved arts electives; and the three credit hour Tech AVATAR capstone course, EE 4859.

Minor in Technical Sales

Students in the College of Engineering wishing to earn a *minor in technical sales* must complete ACCT 2000, BLAW 3201 or CM 4211, ECON 2030, IE 3201 or FIN 3715 or PETE 3025, MGT 3200, MKT 3401, PHYS 1202, PHYS 2102 or PHYS 2112 or PHYS 2113 or PHYS 2002, and CMST 1061, CMST 2010, CMST 2060 or CMST 2061.

Students in other colleges must have approval from the College of Engineering dean's office to declare this minor.

Students who return to campus after having completed their undergraduate degrees and who complete the surveying or technical sales minors will be issued a certificate by the college.

For a list of all other minors within the College of Engineering, please see the individual departmental links above.

The Engineering Council

The Engineering Council is a college-wide student organization whose members are the elected representatives of the various professional and honorary student organizations. In addition to the general goal of bridging organizational gaps between the different departments, the Engineering Council sponsors several student activities including an engineering newsletter and the annual Engineers' Week.

Special Programs

Career Services offers a *cooperative education program* in all curricula offered by the college. In some cases, course scheduling should be carefully coordinated with the department to ensure course availability. Students alternate periods of classroom attendance and employment, resulting in one year of work experience upon graduation. The Co-op Office will assist the student in obtaining employment in the student's area of interest. Although it may delay graduation, the program is an excellent opportunity to explore career choices and integrate classroom theory with industry practices. While employed, the student must also register, for a nominal fee, to be considered formally affiliated with the university. For additional information concerning this cooperative program, please see "Career Services Center" in the section "Student Life."

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Honors College

Honors College

The LSU Honors College is a highly selective four-year enrichment program for intellectually motivated undergraduate students. Honors students enter as freshmen and enroll in at least 32 hours of honors courses over their four-year career, culminating in the production of an Honors thesis or project in their major field of study. From small enrollment seminars in the freshman year to independent research activities in preparation for the senior honors thesis, the Honors College experience is characterized by close interaction between Honors students and outstanding faculty.

Honors students pursue a rigorous academic program which satisfies all requirements for graduation, including the requirements of their major academic department. Honors courses go beyond the basic requirements to provide the basis for outstanding achievement and appropriate recognition at graduation. In the first two years of study in the Honors College, breadth of academic experience is emphasized. Honors work involves the student in a variety of fields ranging from the humanities to the sciences and students may elect to take specialized seminars in a variety of disciplines. Honors students in the junior and senior years usually become more focused in their majors, developing increasingly independent research interests and culminating in the production of a senior thesis or project under the direction of a faculty member in the student's major department.

Participation in the Honors College supplements, but does not replace, work in a major field. Credits earned in Honors College courses may be used to satisfy general education requirements or specific degree requirements. Honors College and departmental advisors assist in assuring that Honors students meet all requirements of each student's major curriculum.

Admission Requirements

Entering Freshmen

Entering freshmen with the following minimum ACT or SAT scores and a 3.50 academic high school GPA are invited to apply for admission to the college.

- ACT requirements—30 composite and 30 English or 29 composite and 31 English.
- SAT requirements—1330 combined math and critical reading and 660 critical reading.

Continuing or Transfer Students

Continuing students who have completed at least their first semester of college and have attained at least a 3.50 GPA are also invited to inquire about admission to the college.

Readmission

Students who have been dropped from the college may apply for readmission if they meet the following requirements:

- they have attained a minimum cumulative GPA of 3.00; and
- they request registration in an honors course at the time of readmission.

Recognition Requirements

Honors College students earn their graduation degrees from LSU through their senior colleges and earn Honors College recognition by meeting the following requirements (for all recognition awards, see curriculum for description of courses eligible for Honors credit):

Good Standing: All students must be in good standing to participate in the Honors College, register for honors courses, and be eligible for priority registration. Following the initial semester in the Honors College, an honors student is considered to be in good standing if he/she maintains a minimum cumulative GPA of 3.00 and successfully completes a minimum of two honors courses (five to six hours) per academic year in residence.

College Honors: Noted on both the diploma and the LSU transcript, College Honors is the culmination of the Honors College curriculum. Students who earn College Honors at graduation will receive special recognition at LSU commencement. To graduate with College Honors a student must meet all requirements as established by the student's own college including at least 32 hours of Honors classes as follows:

- a minimum of six hours of HNRS course work;
- 12 hours at 3000+ level, following upper division departmental honors programs, where they exist;
- senior thesis or project, following thesis guidelines;
- 3.5 GPA in cumulative, LSU, and honors course work.

Upper Division Honors Distinction: Students achieving this distinction will receive recognition at LSU commencement and on their transcripts. Students working toward upper division honors distinction are expected to indicate their intention, in person, to the Honors College upper division advisor who will furnish them with detailed requirements including the following:

- 12 hours of honors courses at the 3000-level or above, including three to six hours of thesis or project;
- Senior honors thesis or project following thesis guidelines;
- 3.50 GPA in both cumulative and LSU coursework, and for all honors courses used in the student's Upper Division program.

Sophomore Honors Distinction: Recognition includes a notation on the transcript and a certificate awarded after the end of the fourth semester. This designation will be subject to approval by the dean of the student's college upon recommendation of the

dean of the Honors College. To achieve this distinction, students must complete the following by the end of their fourth regular semester in college:

- 20 hours of HNRS or departmental honors courses, including a minimum of six hours of HNRS courses;
- A 3.50 GPA in cumulative, LSU, and Honors coursework.

Honors College Curriculum

Honors students are required to take at least five to six hours of honors courses per year to remain in good standing and at least 32 hours of honors courses (including thesis) to graduate with College Honors. The following types of courses qualify for credit as honors courses:

- **Honors College courses:** Designated with the HNRS prefix in the Schedule of Classes and administered by the Honors College. Example: HNRS 2013 The 20th Century (3).
- **Honors Departmental courses:** Designated with a departmental prefix and "Honors" in the course title as listed in the Schedule of Classes. Example: CHEM 1421 HONORS: General Chemistry (3).
- **Honors Options:** The honors option is available to students when separate upper division honors courses are not available. A student will work with a professor to produce a contract outlining the work to be done in addition to the regular work for a given course. The student will enroll in this course and will obtain honors credit by successfully completing the work outlined in the contract. Honors option regulations and forms are available through the Honors College. Honors credit is noted on the transcript with the letter "H." Example: ENGL 3020 British Literature I: The Middle Ages, Renaissance and 18th Century (3) (H).
- **Honors Thesis/Project:** An Honors Thesis of high quality is required for students to graduate with College Honors. Students in all disciplines are encouraged to link their Honors thesis with requirements in their own majors and must consult with their departments concerning its final format. The Honors Thesis should be completed in course work totaling at least six hours. Students may enroll in thesis preparation courses in their own departments, or may use HNRS 4000 Thesis (3) with the agreement of their department.

Honors College Experience

Academic Experience

The goal of the Honors College is to prepare academically motivated students for success following graduation and throughout their future careers. In addition to Honors course work, Honors College students have the opportunity to engage in a wide range of academically related activities during their undergraduate careers. The Honors College advising staff works to guide students toward the following opportunities and students are encouraged to meet with our advisors on a regular basis.

- *Community Service Opportunities:* Freshmen can work together on a community service activity, learning to work together as a group and learning more about the LSU and Baton Rouge communities.
- *Study Abroad:* All Honors College students are encouraged to participate in foreign study programs, especially during their sophomore or junior years.
- *Research Assistantship/Internships:* In their junior year, Honors College students should identify areas of academic/career interest and begin to work on more specialized research under the supervision of a faculty member or on internships in fields appropriate to their career goals.
- *Postgraduate Fellowships/Scholarships:* In their senior year, Honors College students should identify and apply for prestigious fellowships and scholarships that pertain to their career interests.

Residential Experience

The Laville Honors House is a residential college affiliated with the Honors College. The residence hall is located adjacent to the Honors College classrooms and administrative offices in the French House and is available for all Honors College students

(freshmen through seniors). The Laville Honors House provides a living environment that fosters academic excellence and close personal interaction between students and faculty. In addition to regular participation in activities by "Faculty Friends," faculty offices and seminar rooms are also located in the Laville Honors House to enhance student academic performance.

Honors Courses and Curricular Equivalents

In meeting the requirements for their degrees, honors students may substitute a number of honors courses (HNRS and departmental) for non-honors courses required for their degree programs. A list of honors courses follows.

[Click here to view the Honors Courses and Curricular Equivalents.](#)

General Education Honors Courses (HNRS)	General Education Area	Format
HNRS 1007	Natural Sciences (Life)	Lecture/Lab

Schools and Curricula

- School of Education
- School of Library & Information Science
- School of Human Resource Education & Workforce Development
- School of Social Work
- School of Kinesiology

LSU's College of Human Sciences and Education offers bachelor's degrees and – through the Graduate School – master's degrees, certificates of education specialist, and doctoral programs. The college consists of six units: the School of Education, the School of Human Resource Education & Workforce Development, the School of Kinesiology, the School of Library & Information Science, and the School of Social Work. The K-12 University Laboratory School comprises the sixth unit in the college. The college's mission is to advance cognitive, social, emotional, communicative, and physical development across the lifespan. Through teaching, research, and service, the college plays a significant leadership role in addressing the complex human issues and policy decisions facing Louisiana and the nation.

Faculty, students, and graduates are actively engaged in the research tradition of the university, thus they are uniquely positioned at the cutting edge in using sophisticated approaches for improving the quality of life for and educating a diverse population in a complex and interdependent world.

The School of Education offers three undergraduate programs in teacher education: Early Childhood Education: PK-3 Teacher Certification, Dual Certification: General and Special Education, and Elementary Grades Education. The School also offers an undergraduate program in secondary education with an area of concentration in art, grades K-12 (**currently suspended**) and collaborates with the College of Humanities and Social Sciences and the College of Science in providing teacher certification concentrations in other areas of secondary education (English, French, history/social studies, mathematics, Spanish, biological sciences, chemistry, and physics). The school takes pride in producing graduates who are inquiring pedagogues, effective professionals, and reflective practitioners. Through the Graduate School, the School of Education offers graduate programs in

educational leadership, counseling, curriculum, educational research, gifted education, higher education, instruction, and special education.

The School of Human Resource Education & Workforce Development offers an undergraduate program in human resource education. Master's and doctoral programs are also available.

The School of Kinesiology provides undergraduate and graduate programs for students interested in the art and science of human movement and in the business of sport. Undergraduate areas of concentration are sports studies, fitness studies, human movement science, K-12 health and physical education, sport commerce, and sport leadership. Graduates pursue careers in K-12 educational settings, health and fitness programs, professional programs such as allied health and medicine, and sport agencies and businesses.

The School of Library & Information Science offers the Master of Library and Information Science degree (MLIS). Students may complete the degree online, in face-to-face classes at LSU, or in a combination of both formats. The MLIS degree provides education for careers in all types of libraries (including school, public, academic, digital, medical, and law libraries), archives, and information centers.

The School of Social Work offers the Child & Family Studies undergraduate curriculum, which is unique from most social sciences programs in that it provides extensive classroom experience and two field internships for students who plan to enter the workforce upon receiving their BS degree. The School of Social Work also offers a Master of Social Work degree (MSW) and Doctor of Philosophy (PhD).

The University Laboratory School offers a comprehensive K-12 curriculum for approximately 1,300 students. The school serves as a demonstration center for educational pedagogy methodology and provides for observation, research, and pre-service field experiences for university students and faculty.

The following programs are offered by the College of Human Sciences and Education:

- Bachelor of Science in Early Childhood Education, Grades PK-3 (BS);
- Bachelor of Science in Elementary Grades Education (BS);
- Bachelor of Science in General/Special Education, Grades 1-5 (Dual Certification);
- Bachelor of Science in Secondary Education (BS) with an area of concentration in art (**currently suspended**);
- Bachelor of Science in Human Resource Education (BS) with an area of concentration in human resource and leadership development;
- Bachelor of Science in Athletic Training (BS);
- Bachelor of Science in Kinesiology (BS) with areas of concentration in sports studies, fitness studies, human movement science, and health and physical education teacher certification;
- Bachelor of Science in Sport Administration (BS) with areas of concentration in sport commerce and sport leadership; and
- Bachelor of Science in Child and Family Studies (BS)

The following graduate programs are offered through the Graduate School:

- Master of Arts in Teaching (MAT), called the Holmes Program, with certification in elementary education (grades 1-5) or in secondary education (grades 6-12 English, mathematics, sciences, social studies);
- Master of Education (MEd) with areas of study in educational leadership, guidance (school counseling), curriculum and instruction (elementary education, English, foreign language, mathematics, science, social studies, special education, gifted education);
- Master of Arts in Education (MA) with areas of study in community counseling, curriculum studies, educational research, educational technology, and higher education;
- Master of Science in Kinesiology (MS) with areas of study in exercise physiology, motor behavior, pedagogy and psychological sciences, and sport management;
- Master of Science in Human Resource Education (MS);
- Master of Library & Information Science (MLIS);

- Master of Social Work (MSW);
- Certificate of Education Specialist (EdS) with areas of study in curriculum and instruction, administration, and counseling;
- Doctor of Philosophy in Curriculum and Instruction (PhD);
- Doctor of Philosophy in Educational Leadership and Research (PhD) with areas of study in higher education, K-12 education, and research;
- Doctor of Philosophy in Human Resource Education;
- Doctor of Philosophy in Kinesiology (PhD) with areas of study in exercise physiology, motor behavior, pedagogy and psychological sciences, and sport management; and
- Doctor of Philosophy in Social Work (PhD).

Admission/Advising

Students anticipating careers in teaching and undergraduate students pursuing degrees in human resource education, athletic training, kinesiology, sport administration, or child and family studies should contact the Office of Student Services, College of Human Sciences and Education, 236 Peabody Hall, to declare their interest and to obtain additional information. The variety of routes to teacher certification and specific general education requirements for all programs necessitate early and continuous advisement by the Office of Student Services.

Students transferring from another institution must meet university transfer admission requirements.

Students interested in graduate programs that do not include initial teacher certification should contact the Graduate School and respective schools.

Basic Undergraduate Degree Requirements

Undergraduate students in the College of Human Sciences and Education are required to:

- Satisfactorily complete an approved program of study that has been determined by the faculty of the college and by the university. In addition, all university programs leading to teacher certification, including concentrations, must be approved by the Louisiana Board of Elementary and Secondary Education.
- Complete the final 25 percent of the program in residence in the College of Human Sciences and Education.
- Sport administration program only: Satisfactorily complete the program with a minimum cumulative and LSU GPA of 2.20 on all work taken.
- Child and Family Studies and Human Resource Education programs only: Satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.20 on all work taken.
- Holmes five-year elementary education program only: Complete the undergraduate component of the program with a minimum 2.75 cumulative and LSU GPA on all work taken.
- Teacher education programs and concentrations only: Pass all required sections of the PRAXIS Series, earn a grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education, and satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.50 on all work taken.
- Kinesiology and Athletic Training programs only: satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.50 on all work taken.

Enrollment in Two Degree Programs

A student may enroll in two bachelor's degree programs concurrently and thereby earn either two degrees or earn one degree with two majors listed on the transcript, provided all requirements are completed as of the same commencement. Written requests must be submitted to the Office of Student Services for dean's approval.

Refer to the section on "Earning Two Degrees" in the "Regulations" chapter in this catalog.

Scholastic Requirements

Retention

College of Human Sciences and Education faculty monitor the growth of students enrolled in the college's programs. The College of Human Sciences and Education reserves the right to review at any time student suitability to continue in a curriculum. In addition to the university's scholastic requirements, specific retention criteria in the College of Human Sciences and Education include, but are not limited to, the following:

- *English Proficiency*—Students must earn a grade of "C" or better in the following courses or have the equivalent in transfer credit: ENGL 1001 (ENGL 1004) and ENGL 2000 (ENGL 1005).
- *Grade Point Average Maintenance*—A student who fails to earn a 2.00 semester average in any one semester, regardless of cumulative grade point average, will be placed on college probation. To be removed from college probation, a student must earn a 2.00 or better semester GPA, remediate course deficiencies, and make satisfactory progress in the degree program. A student who fails to earn a 2.00 GPA for two consecutive semesters, regardless of cumulative GPA, will be dropped from the college.

Office of Student Services

The Office of Student Services provides all student-related services for undergraduate students in the college and for master's students seeking initial teacher certification. The office strives to provide a single, student friendly environment designed to meet all student needs: recruitment, application procedures, admissions, advising and counseling services, student records, retention services, scholarships, PRAXIS information, student-related experiences (e.g., student council), degree audits, teacher certification, and alumni follow-up.

Independent and Distance Learning Credit

No more than one-fourth of the number of hours required for the baccalaureate degree may be taken as Independent and Distance Learning (IDL) course work. Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL course work during a regular semester (12 semester hours in the summer term). Written requests to exceed this maximum must be submitted to the Office of Student Services for dean's approval.

Students in residence may take IDL courses only in exceptional cases (e.g., conflicts between single sections of required courses) and with specific approval of the dean of the college through the Office of Student Services. Students in all programs must complete all IDL course work prior to the final semester of their program.

Study Abroad

Students in the College of Human Sciences and Education are encouraged to participate in study abroad programs administered by the Office of Academic Programs Abroad. Course requests must be submitted in advance to the respective department for evaluation of equivalency. In addition, students must meet in advance with a College of Human Sciences and Education counselor to ensure that degree credit will be granted upon return to LSU.

Honors College

Students interested in dual membership in the Honors College and the College of Human Sciences and Education should contact the Honors College for admission information.

Paths to Teacher Certification

LSU is a leader in teacher education reform. Extensive research and practice support varied ways to become certified as a teacher: a bachelor's program, a master's program, and a post-baccalaureate nondegree program (music and agricultural education areas only). Students may choose from a bachelor's program in the college (grades PK-3, grades 1-5, grades K-12 art – **currently suspended**, grades K-12 health and physical education), in the College of Agriculture (grades 6-12 agricultural education), in the College of Humanities & Social Sciences (grades 6-12 English, French, history/social studies, Spanish), in the College of Music & Dramatic Arts (grades K-12 instrumental music, vocal music), or in the College of Science (grades 6-12 biological sciences, chemistry, mathematics, physics). Students may also choose to pursue a five-year master's program offered by the College of Human Sciences and Education for certification in grades 1-5 or a fifth year master's program for certification in grades 6-12 (English, mathematics, science, or social studies). Students interested in special education/elementary grades certification should contact the Office of Student Services. Regardless of the route chosen, students will find that teacher education at LSU links contemporary research and practice, focuses on preparing teachers for a culturally diverse world, provides early and extended experiences in diverse educational settings, incorporates instructional technology, and prepares P-12 teachers who truly understand children, content, and pedagogy. The program's focus is to prepare educators to be effective professionals, inquiring pedagogues, and reflective practitioners.

Bachelor's Programs: Initial Teacher Certification

Undergraduate students eager to complete their education in four years may find the bachelor's programs most attractive. The College of Human Sciences and Education offers undergraduate programs leading to certification in grades 1-5, grades PK-3, and grades K-12 (art–**currently suspended** or health and physical education). The college collaborates with the College of Humanities & Social Sciences and the College of Science in concentrations leading to certification in grades 6-12. The College of Agriculture offers an undergraduate program in grades 6-12 (agricultural education). The College of Music and Dramatic Arts offers undergraduate programs in grades K-12 (instrumental music and vocal music). Depending upon the area and level of certification desired, students earn bachelor's degrees from the College of Human Sciences and Education, the College of Agriculture, the College of Humanities & Social Sciences, the College of Music & Dramatic Arts, or the College of Science and attain Louisiana Teacher Certification in programs that combine general education, an area of focus, professional education courses, and practical experiences. These programs are designed for students who know early in their college careers that they want to become teachers and who want to enter the profession immediately, following receipt of the bachelor's degree. Programs feature early and extensive connections between university-based and field-based learning and include at least one semester of full-time, professionally supervised student teaching.

Master's Program: Initial Teacher Certification

Students who wish to spend extended time developing the expertise to enter the teaching profession with an enhanced capacity for leadership may choose the master's program which includes a full year of graduate-level professional preparation and full-time professionally supervised student teaching.

Students earn a master's degree and Louisiana Teacher Certification by completing 36 credit hours beyond a bachelor's degree. The program features extended experiences in diverse school settings, the support of peers who work together in small cohort groups, mentoring by graduate faculty, and the development of teacher-researcher skills.

Admission to Teacher Education

Undergraduate Programs

Undergraduate students may enter basic teacher education programs after 24 semester hours of college-level course work with a minimum 2.50 GPA, cumulative and LSU. Formal admission to a specific undergraduate teacher education program/concentration requires a 2.50 GPA, cumulative and LSU, and passing scores on the PRAXIS I: Pre-Professional Skills Tests or minimum ACT composite of 22 or minimum SAT composite of 1030. *Admission to upper division professional education courses (3000-level and above) is restricted to students who have been formally admitted to a teacher education program/concentration.*

Master's Program (Holmes only)

Elementary Holmes Program: Admission into the Elementary Holmes Program is on a selective basis. Students admitted into the Elementary Holmes Program will be selected from those candidates who have a GPA of at least 3.00, present acceptable GRE scores, have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030, have passing scores on all required PRAXIS II tests, and are eligible for admission to the LSU Graduate School. Meeting the minimum admission requirements does not guarantee acceptance into the Elementary Holmes Program. A College of Human Sciences and Education admissions panel will select from among qualified applicants those students to be admitted into the Elementary Holmes Program.

Secondary Fifth Year: Admission requirements for the Holmes master's level secondary certification program include admission to the LSU Graduate School and passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 and PRAXIS II subject area/specialty assessment(s). (See "Holmes Master's Programs Leading to Teacher Certification" for additional requirements.)

Basic Requirements for All Teacher Education Majors and Concentrations

Undergraduate teacher education students are required to meet the following requirements:

Admissions Requirements:

- Minimum grade point average of 2.50, cumulative and LSU
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum grade point average of 2.50, cumulative and LSU, for entry into and continuation in upper (3000/4000) level education courses, including student teaching
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university and the Louisiana Board of Elementary and Secondary Education
- Minimum GPA of 2.50 on all work completed, cumulative, and LSU*
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

* NOTE: Minimum 2.75 GPA required in the five-year master's program leading to elementary grades 1-5 certification.

PRAXIS

Satisfactory scores on the PRAXIS Series are required for teacher certification by the state of Louisiana. *Students in teacher education curricula or concentrations must pass all required sections of the PRAXIS Series prior to graduation.*

Undergraduate students must have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to be formally admitted to a specific undergraduate teacher education program/concentration. * Undergraduate students should take the required PRAXIS II assessments during the last semester of course work prior to student teaching.

Undergraduate students in the Holmes elementary certification program leading to the master's degree must have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to be formally admitted to this program. Undergraduate graduation requirements include passing scores on required PRAXIS II assessments.

Students must take all required PRAXIS II assessments by the March testing during their senior year for timely receipt of test scores.

Master's level students in the Holmes secondary certification program must have passing scores on both the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 and the appropriate PRAXIS II subject area/specialty test(s) to be formally admitted to the master's year. Students must take the required PRAXIS II: Principles of Learning and Teaching Test(s) by the March testing during the master's year for timely receipt of test scores. Passage is required for program completion/graduation.

*See "Admission to Teacher Education" and "Holmes Master's Programs Leading to Teacher Certification" for additional requirements for admission. Contact the Office of Student Services, College of Human Sciences and Education, for additional information on the PRAXIS Series.

Student Teaching

Application for Student Teaching

Application for student teaching must be made to the Office of Student Services no later than three weeks after classes begin in the semester *prior* to student teaching. Late applicants cannot be guaranteed consideration.

Requirements for Student Teaching

The student teaching semester is scheduled as an all-day, all-week experience with some programs requiring two semesters. LSU requirements for the student teaching experience far surpass the state minimum requirements of 270 clock hours, 180 of which must be actual teaching with a substantial portion thereof on an all-day basis.

All course requirements must be completed prior to student teaching, other than those courses requiring concurrent enrollment with student teaching. No student may schedule course work in addition to that required during the student teaching semester(s) without prior approval by the dean of the College of Human Sciences and Education through the Office of Student Services. Students are advised to schedule no more than 15 hours of employment weekly during student teaching. To be permitted to student teach, students must also meet the following requirements:

- LSU and cumulative GPAs of 2.50 with no grade lower than "C" in professional education courses and in other courses as required for certification, regardless of institution(s) attended.
- Proficiency in written expression.

University Laboratory School

OFFICE 109 Laboratory School

TELEPHONE 225-578-3221

FAX 225-578-3326

WEBSITE www.uhigh.lsu.edu

The University Laboratory School, an integral part of the College of Human Sciences and Education, provides for observation, research, and pre-service field experiences in grades K through 12. The Laboratory School, therefore, maintains a staff of teachers for the purpose of instructing children, demonstrating teaching procedures to pre-service teachers and observers, developing innovative programs, conducting educational research, acquainting pre-service and in-service teachers with approved and tested teaching procedures and viewpoints, and mentoring pre-service teachers.

The Laboratory School serves as a demonstration center for educational methodology. Faculty members demonstrate reflective practice through classroom research relative to the development of concepts and principles. Graduate and undergraduate students observe and participate in the use of instructional and testing materials. Graduate students and university faculty utilize the school for research studies.

The Lab School offers a comprehensive college preparatory curriculum, including the International Baccalaureate Program, Advanced Placement, and Dual Enrollment classes. Combined, these offerings provide students with an opportunity to complete most/all of their core freshman courses for college prior to leaving high school. A limited number of pupils can be accommodated in the Laboratory School. The admission process is based on seventeen criteria for admission and can be found here. Tuition and activity fees are charged for each pupil in grades K-12. A construction fee is also charged that, although included as part of tuition, is designated for the purpose of construction related expenses.

Student Organizations

The college's Student Council includes student representatives and members-at-large from each department. The college also sponsors other organizations, including an honorary organization, *Kappa Delta Epsilon*; the Kinesiology Club; Alpha Tau Sigma, a professional student organization for athletic training students; the Association of Pre-Physical Therapy Students; the Physician Assistant Collegiate Society; and the Student Organization for Sport Management. Teacher certification students may also participate in student chapters of national organizations in their certification content area (such as National Association for the Education of Young Children, National Council of Teachers of English, National Council of Teachers of Mathematics, etc.). The college also sponsors Chi Sigma Iota, an honorary organization for graduate students in counseling.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Departments and Curricula

- Department of Aerospace Studies
- Comparative Literature (Interdepartmental Program)
- Department of Foreign Languages & Literatures
- Department of History
- Liberal Arts (Intercollegiate Program)
- Department of Philosophy & Religious Studies
- Department of Sociology
- Department of Communication Sciences & Disorders
- Economics (Intercollegiate Program)
- Department of French Studies
- Interdisciplinary Studies (Interdepartmental Program)
- Linguistics (Interdepartmental Program)
- Department of Political Science
- Department of Communication Studies
- Department of English
- Department of Geography & Anthropology
- International Studies (Interdepartmental Program)
- Department of Military Science
- Department of Psychology

The College of Humanities & Social Sciences' primary purpose is to afford the student a liberal education, which by its nature is broad rather than narrow, devoted to intellectual development and discipline rather than to the acquisition of technical skills. It

should give the student some knowledge of the achievements of the human mind, with special reference to the western civilization of which both the ancient world and contemporary America are parts; the historical and cultural backgrounds essential to a true understanding of our world; and above all, orderly thinking processes and a scale of values by which the distinction can be made between permanent and trivial, substantial and pretentious, good and bad. To that end, some familiarity with historical and political studies, the sciences, and the arts is necessary.

As a human being and as a citizen, the student will find this education of lasting significance. As a member of a profession, each student will find desirable backgrounds for scholarship and teaching in all fields of knowledge and for law and medicine, which stress, increasingly, the value of broad intellectual training.

The curricula within the college require a number of courses which are deemed essential—individually and as a group—to the intellectual competence at which the liberal education aims; in addition to these, the student has electives which may be used to further general knowledge or to specialize in certain fields.

To accomplish its primary purpose, the college offers Bachelor of Arts, Bachelor of Science, and Bachelor of Interdisciplinary Studies degrees. By completing a major in the college, the student will obtain a much broader background than is generally possible under the standard curriculum. The advantages of broad training for everyday life are obvious. Moreover, the added breadth of knowledge will be helpful in case the student continues beyond the bachelor's degree level.

Degree Programs

The following undergraduate degrees in the College of Humanities & Social Sciences are Bachelor of Arts degrees:

Anthropology	Communication Disorders	Communication Studies
Economics	English	French
Geography	History	International Studies
Liberal Arts	Philosophy	Political Science
Sociology	Spanish	

The following undergraduate degrees in the College of Humanities & Social Sciences are Bachelor of Science degrees:

Geography	Psychology
-----------	------------

The College of Humanities & Social Sciences also offers a Bachelor of Interdisciplinary Studies degree.

Admission Requirements

Students will be admissible to the College of Humanities & Social Sciences if they have earned at least 24 semester hours; have a grade point average of at least 2.00 ("A" = 4) in all work taken within the LSU System and in all work taken overall; completed ENGL 1001 with a "C" or better; and completed three hours of the general education analytical reasoning requirement. Students majoring in psychology, communication disorders, or any of the secondary education areas of concentration must have a GPA of at least 2.50 in all work taken within the LSU System and in all work taken overall. Students majoring in any of the secondary education areas of concentration must have a passing score on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to declare their respective concentration.

Transfer students from other divisions of the university and other accredited colleges and universities must meet the eligibility requirements stated above. Students transferring from another institution must also meet university transfer admission requirements. Transfer credits acceptable for admission shall be valid for degree credit in the college only to the extent to which they represent courses acceptable in the curricula of the college.

General Education Requirements

General education requirements of the university are included in the curricula of the various departments in the college. For specific information concerning these requirements, see the "General Education Requirements" section of this catalog.

Degree Requirements of the College

General Requirements

In order to qualify for a bachelor's degree in this college, a candidate must satisfy these requirements:

- Meet departmental/program requirements for the major and all university requirements as detailed in the "General Education Requirements" section of this catalog, except that the general education humanities requirement cannot be fulfilled with a foreign language. (Students who break residence, either voluntarily or by compulsion, for at least two consecutive semesters may not elect a catalog earlier than the one in force at the time of their re-entry.)
- A minimum GPA of 2.00 on all work taken in the LSU System and on all work taken overall. A 2.50 LSU system and cumulative grade point average is required for students graduating in any of the secondary education concentrations.
- A minimum GPA in the major field of 2.00 on all work taken in the LSU System and on all work taken overall.
- A minimum grade of "C" in all academic content (major) and education courses for students in secondary education concentrations (English, French, history, or Spanish).
- A minimum of 30 semester hours in courses numbered 3000 or above. A minimum of 45 hours in courses numbered 3000 or above for the interdisciplinary studies major (15 of which must be at the 4000 level).
- Degree credit will not be allowed for more than nine semester hours of 1000 level mathematics courses below 1550.
- A minimum of 15 semester hours in residence in the major field, including at least nine semester hours in courses numbered 3000 or above.
- A minimum of 30 semester hours in residence in the college. The last year of work (last 30 semester hours) will be taken in residence in this college on the LSU campus.
- *Foreign Language*—A minimum of 14-16 credits (four semesters) in a foreign language for the BA or BS degrees. Students should take a placement test and register at the appropriate level. Students who have a native fluency in a language other than English may satisfy the foreign language requirement in one of three ways: (a) by completing the prescribed number of hours in the curriculum for the BA or BS degree in a language *other than* English or their native language; (b) by taking a minimum of 12 hours in courses numbered 3000 or above in their native language; or (c) by taking nine semester hours of English and/or communication studies above the minimum general education or major requirements. (Only three hours may be earned in ENGL 2001 or ENGL 2002 to meet this requirement. Professional and specialized courses in communication studies may not be counted toward this requirement.) Students who have a native fluency in a language other than English should consult credit restrictions in that language under the appropriate foreign language departmental entry in this section of the catalog.
- *Grade Point Average Maintenance*—A student who fails to earn a 2.00 semester average in any one semester, regardless of cumulative GPA, will be placed on college probation. To be removed from college probation, a student must earn a 2.00 or better semester GPA, correct course deficiencies, and make satisfactory progress in the degree program. A student who fails to earn a 2.00 GPA for two consecutive semesters, regardless of cumulative GPA, will be dropped from the college.
- *Scholastic Requirements*—Full-time students are expected to make reasonable and satisfactory progress in a degree program.

The college reserves the right to review at any time a student's suitability to continue in a degree program.

Enrollment in Two Degree Programs

Double Majors—Students may pursue double majors in this college. By completing all residence and academic requirements for the two programs, a student may earn one bachelor's degree with two majors.

Dual Degrees within the College of Humanities & Social Sciences—Students may pursue dual degrees in this college. Both majors must be offered by departments/programs within the college. By completing residence and academic requirements, and earning 30 hours over the degree requirements, a student may earn two separate bachelor's degrees.

Dual Enrollment in the College of Humanities & Social Sciences and a Second Academic College—By completing residence and academic requirements for two degree programs and earning 30 hours more than the degree requiring the fewer number of hours, a student can earn two bachelor's degrees. The student must be accepted for admission to both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

Requirements for a Second Bachelor's Degree

To qualify for a second bachelor's degree in this college, students must meet the admission requirements of the college and the department/program. Once admitted, students must complete (with at least a 2.00 GPA) a minimum of 30 semester hours, including any degree requirements not previously met. The 30 hours must be completed in residence in the College of Humanities & Social Sciences.

Graduation with College Honors

To graduate "with College Honors" in the College of Humanities & Social Sciences, a student must meet the following requirements:

- achieve "Sophomore Honors Distinction"
- take at least 12 semester hours of honors seminars or departmental honors courses beyond the minimum required for "Sophomore Honors Distinction"
- register in a curriculum offered in the College of Humanities & Social Sciences
- complete a curriculum of courses approved by the department concerned and by the dean and the faculty of the Honors College. This curriculum should be developed using the general curricular principles of the college, the purposes of which are to afford students a liberal education and to include (besides the major field) historical and political studies, the life and physical sciences, the humanities, and the arts
- demonstrate competence in a major field by doing independent research, writing a senior thesis, and taking an oral examination. The thesis counselor and one additional member of the student's committee must be from the student's major department.
- after the freshman year, maintain at least a 3.33 GPA ("A" = 4.00)

Pass-Fail Option

Students in the College of Humanities & Social Sciences may register for courses on a pass-fail basis under the following conditions:

- Only *free elective* courses may be taken on a pass-fail basis. Required courses and restricted electives may not be taken on a pass-fail basis. A student may not take courses offered by the Honors College on a pass-fail basis.
- A student must have permission (by signature on a petition form) from the dean of this college, the instructor of the course, and the dean of the college in which the course is offered.
- Pass-fail registration must be completed before the final day for adding courses.
- Eligible students may take one course per semester on a pass-fail basis.

Courses offered by the College of Humanities & Social Sciences that are required in a student's curriculum will not be approved on a pass-fail basis.

Independent and Distance Learning Credit

A maximum of 30 semester hours of Independent and Distance Learning (IDL) credit are acceptable toward meeting degree requirements. Students who wish to have IDL credits accepted by this college must make their registration in IDL courses a matter of record in the office of the dean of the college at the time of such registration.

Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL coursework during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL coursework during a summer term. *Students may not be enrolled in IDL coursework within their last semester. All IDL coursework must be completed by the last weekday of final examinations in the semester prior to the one in which the student intends to graduate. Depending on the IDL course, a special time limit may be imposed by the dean's office.*

Electives

A student in the College of Humanities & Social Sciences may elect for degree credit any course offered by the following programs, departments, or schools:

Aerospace Studies	African & African American Studies	Art	Art History
Biological Sciences	Chemistry	Communication Sciences & Disorders	Communication Studies
Comparative Literature	Curriculum & Instruction	Disaster Science & Management	Economics
Educational Leadership, Research, & Counseling	English	Entomology	Environmental Studies
Experimental Statistics	Film and Media Arts	Foreign Languages & Literatures	French Studies
Geography & Anthropology	Geology & Geophysics	History	Honors
International Studies	Linguistics	Mathematics	Military Science
Music	Oceanography & Coastal Sciences	Philosophy & Religious Studies	Physics & Astronomy
Political Science	Psychology	Sociology	Theatre
Women's & Gender Studies			

Students may select elective courses in departments not listed above. Students must meet all prerequisites for these courses. Twenty-four semester hours of elective credit in such courses may be counted toward degree requirements from this college. A student may receive a maximum of 12 semester hours of degree credit in ROTC. No more than eight hours of kinesiology activity courses may count toward degree requirements from this college.

Placement Services

Students in this college may use the services of the university's Career Services Center. These services include counseling, job-seeking skills workshops, job search handbooks, résumé service, career days, and on-campus recruiting and interviews.

Study Abroad

Students in the College of Humanities & Social Sciences are encouraged to participate in the study abroad programs administered by the Office of Academic Programs Abroad and the International Student Exchange Program. Students who participate in these programs must receive departmental evaluations of the courses to be taken prior to going abroad. In addition, students must make an appointment with a counselor to ensure that degree credit will be granted upon return to LSU.

National Student Exchange

LSU cooperates with a number of other universities throughout the United States in an exchange program. Students may spend one year (usually the junior year) at another university at little or no more cost than they pay at LSU. Additional information can be obtained from the Office of Academic Programs Abroad.

Preparation for the Study of Law

Because of the rich complexity of this discipline, students with very different academic backgrounds can undertake and excel in the study of law. *There is no single curriculum or course of study which is prerequisite to or guarantees success in law school.* Curricula in the College of Humanities & Social Sciences provide excellent preparation for students who intend to study law.

The degree requirements of the college ensure the development of the following skills, which are essential components of pre-law training: (1) the ability to express oneself competently in writing; (2) the ability to understand the human institutions and values with which the law deals; and (3) the ability to think creatively. Students who intend to pursue a legal career are therefore encouraged to choose a curriculum in the College of Humanities & Social Sciences.

Minor Field Requirements (Optional)

Although students are not required to pursue a minor field (except in the interdisciplinary studies major), they may choose to do so under the following guidelines:

- Earn a minimum of 15-18 semester hours in the minor field, of which at least six semester hours must be in courses taken on this campus at the 3000 and/or 4000 level; see individual departments in the "Departments and Curricula" section of this chapter for more specific requirements.
- Earn a minimum GPA *in the minor field* of 2.00 on all work taken in the LSU System *and* on all work taken overall.
- Courses used to satisfy minor requirements may not be taken on a pass/fail basis.

Minor fields may be selected from any major field currently offered by the college in which appropriate requirements for a minor have been established or any field of an interdisciplinary nature for which a minor has been approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs.

Minors may also be taken in fields outside the college if:

- the total number of semester hours does not exceed 24 (total number of non-Humanities & Social Sciences electives that may be counted toward graduation);
- the work conforms to guidelines established by the department, school, and college concerned;
- the work meets the general minor field requirements of the College of Humanities & Social Sciences, as stated above.

Teacher Preparation Program for Grades 6-12

The Departments of English, Foreign Languages & Literatures, French Studies, and History offer undergraduate degree programs with an area of concentration in secondary education (middle school and high school). Students in the program may receive a bachelor's degree in English, French, history, or Spanish and qualify for teacher certification. The curricula have been developed cooperatively with faculty in the College of Human Sciences and Education and include courses taught jointly by faculty in the College of Humanities & Social Sciences and the College of Human Sciences and Education. Students completing these degree

programs and meeting any additional requirements of the Louisiana State Department of Education will be eligible for certification in the state of Louisiana as teachers in grades six through 12.

The following requirements pertain to students enrolled in the secondary education concentration:

Admissions Requirements:

- Minimum cumulative and LSU grade point average of 2.50
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum cumulative and LSU grade point average of 2.50 for entry into and continuation in upper (3000/4000) level education courses, including student teaching

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university, and the Louisiana Board of Elementary and Secondary Education
- Minimum cumulative and LSU GPA of 2.50 on all work completed
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

A second option for students interested in teaching in the above areas at the middle/high school level is to pursue a traditional bachelor's degree in the content area and then complete a master's degree through the LSU College of Human Sciences and Education. The master's degree program (Holmes Program) begins in June and requires 12 consecutive months of course work and classroom experience leading to both the master's degree and teaching certification. Information about the program and potential scholarship assistance is available through the College of Human Sciences and Education, Office of Student Services.

Honors Courses

Besides courses offered through the Honors College, other honors courses are offered through various departments, including:

- | | | | |
|-------------|-------------|-------------|-------------|
| • ANTH 4999 | • BIOL 1503 | • CHEM 1421 | • CHEM 1422 |
| • CHEM 1431 | • CHEM 2463 | • ENGL 3000 | • ENGL 3821 |
| • ENGL 3822 | • ENGL 3823 | • ENGL 3824 | • ENGL 3825 |
| • GEOG 4999 | • GEOL 1002 | • GEOL 1004 | • HIST 1002 |
| • HIST 1004 | • MATH 1551 | • MATH 1553 | • MATH 2058 |

| • SPAN 2104 | | | |

HSS Student Council/Clubs

The college's Student Council is composed of student representatives from the college's departments, as well as members at large. The purpose of the council is to enhance the academic environment in the college. In addition, many departments sponsor clubs with programs of interest to majors.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

School of Mass Communication

School and Curricula

- Manship School of Mass Communication

For information regarding the GRADUATE PROGRAM, [click here](#).

Mission of the Manship School

The mission of the Manship School of Mass Communication is to produce highly competent communicators with broad knowledge and training in the liberal arts and the media. The school promotes effective communication, critical thinking, and ethical responsibility. Overall, and especially in the graduate program, the school is committed to leading the study and practice of media and public affairs. Believing that media should reflect society and provide leadership to society, the school seeks diversity in its outlook, student body, and staff.

The Manship School of Mass Communication offers an undergraduate degree in Mass Communication (BAMC). For specific information concerning the undergraduate degree requirements for the *Bachelor of Arts in Mass Communication*, refer to the curriculum below.

Admission Requirements

Admission to the Manship School is competitive. At a minimum, applicants must have completed at least 30 hours of college-level course work, including MC 2010, *Media Writing*, with a course grade of "B" or better. Applicants presenting the highest qualifications will be accepted into the Manship School each semester of the academic year. Students with a 3.00 LSU GPA and a 3.00 cumulative GPA will be given priority for admission on a space available basis. Grade point average will remain the primary factor for admission, but secondary factors taken into account include the need to balance enrollment among the school's areas of concentration, demographic diversity, demonstrated professional potential through work on high school or college media, or other life experiences that suggest a strong likelihood of success as a communication professional.

Application Process • Students should apply by the Friday of the final week of classes of the semester in which they will have completed the 30 hours of course work and earned a "B" or better in MC 2010; however, they may apply at any time after they

have met the minimum criteria. Applications for admission to the Manship School must be submitted directly to the school's main office. The school's Application Review Committee will attempt to notify applicants of admission decisions prior to the first day of class each semester. Students who are denied admission may reapply for admission in a subsequent semester.

Transfer Students • Transfer students from another institution must meet university transfer admission requirements. Transfer students must complete a minimum of 12 hours of course work on the LSU campus with at least a 3.00 LSU GPA and a 3.00 cumulative GPA to be eligible for admission to the Manship School. All other admission guidelines and procedures described above also apply to transfer students.

Laptop Computer Requirement

Students declaring a major or minor in Mass Communication are required to have their own laptop computer with wireless Internet access upon entering the first Mass Communication class. Information regarding the type specifications and software may be obtained on the Manship website, www.manship.lsu.edu, or from 211 Journalism Building.

Transfer of Credit from Other Institutions

In the Manship School, transfer credits accepted by the Office of Enrollment Management: Undergraduate Admissions shall be valid for degree credit only to the extent to which they satisfy courses in the curriculum of the school. Credit in mass communication courses in which grades of "D" have been earned is not accepted for transfer toward the degree requirements, if the course is taken outside the LSU System. Students enrolled in this school who wish to obtain credits from other colleges or universities (including other campuses of the LSU System), and who plan to use such credits toward degree requirements, should obtain *prior approval* in writing on a specific-course basis from the associate dean for undergraduate studies of the Manship School.

Readmission

Students who were not registered at LSU for the preceding regular semester must file a formal application for readmission. Readmission to the Manship School is not automatic.

Degree Requirements of the School

To qualify for a bachelor's degree in this school, a candidate must satisfy these requirements:

- A minimum GPA of 2.00 ("A" = 4) on all work taken in the LSU System and on all work taken.
- A minimum GPA in the major field (mass communication) of 2.00 ("A" = 4) on all work taken in the LSU System and on all work taken.
- At least a "C" in any mass communication course. (In addition, for any mass communication course, a "C" or better is required in prerequisite mass communication courses.)
- A minimum of 120 semester hours of degree credit.
- A minimum of 30 semester hours in courses numbered 3000 or above.
- Degree credit will not be allowed for more than nine semester hours of 1000 level mathematics courses below 1550.
- A minimum of 30 semester hours in residence in the Manship School. The last year of work (30 semester hours) will be taken in residence in this school on the LSU campus.
- *A minor in a department other than mass communication.* The minor will be defined by the minor department.
- English proficiency– a "C" or better in ENGL 2000 or the equivalent.
- Foreign language– a level of proficiency in one foreign language as required in the mass communication curriculum. Students should take a placement test and register at the appropriate level.

Students who have a native fluency in a language other than English may satisfy the foreign language requirement in one of three ways: (a) by completing the prescribed number of hours in the curriculum for the BA degree in a language *other than* English or

their native language; (b) by taking a minimum of six hours in courses numbered 3000 or above in their native language; or (c) by taking nine semester hours of English and/or communications studies above the minimum requirements, as stated in the curriculum for the BA degree. (Only three hours may be earned in ENGL 2001 or ENGL 2002 to meet this requirement. Professional and specialized courses in speech may not be counted toward this requirement.)

Students who have a native fluency in a language other than English should consult credit restrictions in that language under the appropriate foreign language department entry in this section of the catalog.

Areas of Concentration

The Bachelor of Arts in Mass Communication (BAMC) degree is conferred on students who complete a concentration in one of the following four areas: digital advertising, journalism, political communication, or public relations. All areas are fully accredited by the Accrediting Council on Education in Journalism and Mass Communication.

The *digital advertising* concentration develops skills in marketing, research, media, and creative planning and execution. Graduates typically become involved in account development and management; media analysis, research, and sales; copywriting; advertising design; and sales promotion.

The *journalism* concentration develops skills in researching, interpreting, organizing, and reporting issues of vital importance to a democratic society across multiple platforms. Students are digitally cross-trained in the theory and practice of journalism for the web, newspapers, magazines, television, and social media. Graduates usually become reporters, editors, and producers.

The *political communication* concentration develops skills in interpreting and communicating information to mass media practitioners and other individuals involved in the political process. Students normally aspire to careers in public or governmental communication, political reporting, and political campaigns.

The *public relations* concentration develops skills and prepares future practitioners in planning and executing the building of relationships and coalitions to advance an enterprise. Graduates typically move to positions in media, governmental, investor, community, and employee relations; special events management; issues management; and public relations counseling.

General Education Requirements

General education requirements of the university are included in the curriculum for mass communication. For specific information concerning these requirements, see the "General Education Requirements " section of this catalog.

Electives

Students may choose any degree credit courses offered by the university consistent with their degree requirements. However, no more than 12 semester hours of ROTC or eight hours of kinesiology may be counted for degree credit.

Pass-Fail Option

Students may not elect the pass-fail grading option for courses within their major. Only the internship (MC 3998) and independent study (MC 4999) courses are graded on a pass-fail basis.

Independent and Distance Learning Credit

A maximum of 32 semester hours of credit in Independent and Distance Learning (IDL) credit is acceptable toward meeting degree requirements. Students who wish to have IDL credits accepted by the Manship School must make their registration in IDL courses a matter of record in the office of the dean in the school at the time of such registration.

Students registered in the school may enroll in a maximum of 19 semester hours of combined resident and IDL course work during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL work during a summer term. *Students may not be enrolled in IDL course work the semester they intend to graduate. Depending on the IDL course, a special time limit may be imposed by the dean's office.*

Minor Field Requirements

Students in other majors may apply to declare a *minor in mass communication* after completion of 30 semester hours of course work and successful completion of MC 2010. Those who have completed 30 semester hours with at least a 3.00 GPA *and* MC 2010 with at least a grade of "B" will automatically be allowed to minor in mass communication. Students who do not meet *both* of these standards will be allowed in the minor on a space available basis.

Students minoring in mass communication must complete 18 semester hours in the Manship School of Mass Communication. Mass communication minors must earn at least a grade of "C" in any mass communication course taken as part of the minor. For any mass communication course, a grade of "C" or better is required in prerequisite mass communication courses.

Practical Media Experience

Mass communication students gain considerable practical experience to supplement classroom instruction. In some courses, students work on news and advertising assignments for *The Reveille*, for the campus radio station, KLSU, and for the campus television station, Tiger TV. Students in advanced reporting courses acquire experience with the Baton Rouge *Advocate* and other local media.

Placement Services

Students in the Manship School may use the services of the university's Career Services. These services include counseling, job-seeking skills workshops, job search handbooks, résumé service, career days, and on-campus recruiting and interviews.

Study Abroad

Students in the Manship School are encouraged to participate in the study abroad programs administered by the Office of Academic Programs Abroad and the International Student Exchange Program. Students who participate in these programs must receive school evaluation of the courses to be taken. In addition, students must make an appointment with a counselor to ensure that degree credit will be granted upon return to LSU.

National Student Exchange

LSU cooperates with a number of other universities throughout the U.S. in an exchange program. Students may spend one year (usually the junior year) at another university at little or no more cost than they pay at LSU. Additional information can be obtained from the Office of Academic Programs Abroad.

Manship School Student Government Association

The Manship School Student Government Association serves as a liaison between the Manship School's undergraduate student body and the school's dean. The association is also the official representative to the LSU Student Government.

The Honors Program

An honors program is available to Man-ship students. Requirements may be obtained from the Honors College, 205 French House. To best serve mass communication honors students, the Manship School offers honors courses, allowing students to take many of their honors hours within the Manship School. Non-honors students may take honors courses in the Manship School when space is available. The following courses are regularly scheduled Mass Communication honors courses: MC 2001, MC 2011, MC 2016, MC 3003, MC 3019, MC 3081, MC 4091, MC 4096.

College of Music & Dramatic Arts

College of Music & Dramatic Arts

KRISTIN SOSNOWSKY Interim Dean	STEPHEN DAVID BECK <i>Associate Dean; Director, School of Music; Derryl & Helen Haymon Professor of Composition & Electro-Acoustic Music</i>

Departments, Schools, and Curricula

- School of Music
- Department of Theatre

The College of Music & Dramatic Arts is comprised of the Department of Theatre and the School of Music. The Department of Theatre offers theatrical productions under the joint auspices of LSU Theatre and Swine Palace, the latter being a professional equity theatre. Divisions in the School of Music are: Academic Studies, Bands, Ensembles and Conducting, Instrumental, Keyboard, Music Education, and Voice/Opera. Areas of concentration in the Department of Theatre are: Performance, Physical Theatre, Design/Technology, Film and Television, Theatre Studies, and Arts Administration. Both the Department of Theatre and the School of Music offer comprehensive degree programs from the baccalaureate through the doctorate.

The primary goals of the college are:

- to offer advanced training in the performing arts to students who are committed to developing their innate talents;
- to make the performing arts a cultural asset in their lives and the lives of others;
- to prepare graduates for leadership roles and careers in the performing arts.

The School of Music and the Department of Theatre at LSU have long been recognized regionally and nationally for the quality of their performance and research programs. Their faculties have distinguished themselves as specialists in their fields and many currently lead their respective discipline's professional associations. Student groups have appeared as invited featured performers at the Kennedy Center in Washington, D.C., Notre Dame Cathedral (France), Berlin Cathedral (Germany), and at national and regional conferences and conventions.

The college provides numerous public performances and opportunities for artistic learning and cultural enrichment throughout the year for students and the community at large.

The following undergraduate programs are offered by the College of Music & Dramatic Arts:

- Music (BA)
- Music (BM)
- Music Education (BME)
- Theatre (BA)

Admission Requirements

Within the framework of university regulations, students may be admitted to the college according to the following policies:

- **Entering Freshmen** who meet the university admissions standards and have a declared major within the College of Music & Dramatic Arts will be admitted to the college during Freshmen Orientation. Prospective music majors must successfully audition before they may be admitted to the college or register for music major courses.
- Students may be admitted from University College to the college provided that they have credit for the freshman-year courses for the curriculum they plan to follow and with an audition for the appropriate faculty (required for music majors only).
- *Transfer students* from University College or other divisions of LSU, or from other colleges and universities who have passed the required audition for admission (music majors only) may be admitted to the college. Students transferring from another institution must meet university transfer admission requirements. Students must have earned a cumulative grade point average of 2.00 or better to be admitted unconditionally to the Bachelor of Music Education degree program.

All transfer students in music must take an advisory examination in theory. This includes ear-training, keyboard work, harmonization, and analysis. The results of the examination will be used to aid in planning a practical schedule of courses consistent with the student's training and ability. The examinations are given at stated times during registration in each semester or summer term. Students in music degree programs also must audition. See the "School of Music" information in this chapter.

Independent and Distance Learning Course Credit

Up to one-fourth of the number of hours required for the baccalaureate degree may be taken in Independent and Distance Learning (IDL) courses. Acceptance of such work is contingent upon its applicability to the student's curriculum; therefore, students should obtain approval from the dean of the College of Music & Dramatic Arts before registering for IDL courses. IDL study in music theory and work in applied music completed through other universities or colleges must be verified by examination and auditions.

Requirements for a Second Bachelor's Degree

A person holding a baccalaureate degree who wishes to obtain a second baccalaureate degree through this college must satisfactorily complete all requirements in the curriculum selected. In addition, general university requirements for a second bachelor's degree must be met.

Graduate Programs

The Graduate School offers the following degrees in the field of music: Master of Music, Doctor of Musical Arts, and Doctor of Philosophy. The following graduate degree programs are available in theatre: Master of Fine Arts (acting; technology/design) and the Doctor of Philosophy. The requirements for these degrees are given in "The Graduate School" section.

Minor Field Requirements (Optional)

Students in the College of Music & Dramatic Arts may earn a *minor in a field outside of their current major* under the following conditions:

- Students must earn at least 15 semester hours in the minor field, of which at least six semester hours must be taken on this campus and at the 3000 and/or the 4000 level.
- Each course used in the minor must be passed with a grade of "C" or better.
- Courses used for the minor may not be taken on a pass-fail basis.

Minor fields may be chosen from any major field currently offered in which the specific requirements for a minor have been established and approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs.

The department offering the minor may impose additional requirements.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

Departments and Curricula

- Department of Biological Sciences
- Department of Chemistry
- Department of Geology & Geophysics
- Department of Mathematics
- Department of Physics & Astronomy

The College of Science offers preparation for careers in biochemistry, biological sciences, chemistry, geology and geophysics, mathematics, microbiology, and physics and astronomy. Students are also provided with strong academic backgrounds for professional study in medicine, dentistry, pharmacy, and many other careers that require in-depth study of science and mathematics.

The departments within the college, the various curricula, and the degrees that may be earned are shown in the chapter, "Academic Programs." These curricula provide broad general education as well as knowledge of the structure of science. Students in the college may also choose curricula that provide pre-medical or pre-dental preparation, including curricula in biochemistry, biological sciences, chemistry with a pre-professional concentration, and physics with a medical physics concentration. Classroom and laboratory study may be supplemented by contact with active research programs.

The departments of the college offer work leading to the bachelor's, master's, and doctoral degrees.

Degree Programs

All undergraduate degrees in the College of Science are Bachelor of Science degrees. The following programs are offered by the College of Science:

- Biochemistry
- Biological Sciences
- Microbiology
- Chemistry
- Geology
- Mathematics
- Physics

For specific information concerning undergraduate degree programs, refer to the curricula offered by the departments on the following pages. Detailed information about graduate degree programs may be obtained from "The Graduate School" section.

Admission Requirements

Students who contemplate entering this college should give special attention to the mathematics and science courses they select and should consult a representative of the department they plan to enter prior to completing their initial registration.

Students will be admitted to the college when they:

- have earned 24 or more semester hours of credit in courses numbered 1000 or above;
- have maintained a grade point average of at least 2.00 on both LSU and cumulative averages;
- have passed all courses in mathematics and science with grades of "C" or better or received special approval of the dean of the college;
- have passed ENGL 1001 or the equivalent with a grade of "C" or better;
- have earned credit in either MATH 1022, MATH 1023, MATH 1550 or MATH 1551 with a grade of "C" or better.
- entry into any of the three majors (biochemistry, biological sciences, and microbiology) in the Department of Biological Sciences requires earned credit in BIOL 1201 and BIOL 1202; CHEM 1201; and MATH 1550.
- entry into any of the four secondary education concentrations (biological sciences, chemistry, mathematics, or physics) requires a 2.50 LSU and cumulative GPA and passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030.

Students transferring from another institution must meet university transfer admission requirements. Transfer students must also meet the current admission requirements of the senior college and receive approval of the dean of the college.

Students who, after initial enrollment in this college, wish to obtain credits from colleges or universities other than LSU and who plan to offer such credits toward their degree requirements must obtain prior approval from the dean on a specific-course basis.

Degree Requirements of the College

The college offers the bachelor's degree in curricula designed to give students a thorough education in a particular scientific discipline. In addition, a core of material representing a broad exposure to the human cultural heritage is an integral part of the curricula in the college. That core consists of the following course work:

English • Nine semester hours including ENGL 1001, ENGL 2000, and three hours chosen from 2000-level or above English or Honors courses from the general education humanities list. Some curricula require an additional three hours in English.

Mathematics • A minimum of five semester hours of calculus (MATH 1550). Most curricula require additional credits in mathematics. Degree credit will not be allowed for mathematics courses numbered below 1550.

Foreign Language • Students may satisfy the college foreign language requirement by passing four semester hours in foreign language. Some curricula require eight semester hours in a single foreign language.

International students whose native language is not English and who did not attend an English-speaking high school may satisfy the foreign language requirement as follows:

- As shown above (in a language other than the student's native language); or

- By passing six to nine hours (depending on curricula) in his or her native language in courses that may be taken for credit by native speakers of the language; or
- By taking six to nine hours (depending on curricula) of English and/or speech (CMST) above the minimum requirements in the curriculum for the BS degree. The courses must be pre-approved by the dean and must be taken at LSU. At least three hours must be at the 2000-level or above.

Sciences • Eleven hours including a two-semester sequence of study in a biological science or a physical science and a one-semester course in the alternative field not chosen for the one-year requirement. The one-year sequence must include two hours of laboratory credit. Courses selected to meet this requirement must be chosen from courses offered by departments in the College of Science.

Social Sciences and Humanities • These hours are in addition to the English and foreign language requirements described above. Nine to twelve hours of the required social sciences/humanities courses must be chosen from the list of general education courses in the following way: three hours in the arts, three hours in the humanities (depending on the curriculum), and six hours in the social sciences.

Academic Policy • Following is a listing of the more important academic policies of the college offered to guide students toward degrees.

- All students must complete a program of study established by the department concerned and approved by the faculty and the dean of the college.
- No curriculum in the college requires less than 120 semester hours; some curricula require more. Students in all degree programs of the college must earn at least 24 of the last 30 semester hours offered toward their degrees as registrants in the College of Science at LSU. The university requires that all candidates for the bachelor's degree must fulfill a minimum residence requirement of at least 25 percent of the total number of hours required for the degree at this university.
- Students in all degree programs of the college must earn in residence on the LSU campus (Baton Rouge) at least 18 of the hours offered toward their degrees in courses offered by departments in the College of Science. In all degree programs, at least nine of these 18 hours must be in courses numbered above 3000 and offered by the department administering the major program. Students majoring in the Department of Biological Sciences must have nine semester hours in courses numbered above 3000 in their major. Research courses cannot be used in the residence requirement of nine hours numbered above 3000. A maximum of three semester hours in research courses may be used in the 18-hour residence requirement. Courses used to satisfy all residence requirements must be passed with a grade of "C" or better.
- Independent and Distance Learning courses, Online Distance Learning courses, and courses in which credit was earned through credit examination may not be used to satisfy the college residence requirement.
- The following courses must be passed with a grade of "C" or better: (1) all required science, computer science, and mathematics courses; (2) all restricted, second discipline, and advanced sciences electives; and (3) ENGL 1001 and ENGL 2000. If a student makes a "D" or "F" in a course requiring a "C," the course must be taken and not dropped the next semester the student is in residence and the course is offered.
- Non-participation courses in kinesiology may be taken for elective credit. A maximum of three semester hours will be allowed in kinesiology participation (activity) courses. Twelve semester hours of ROTC may be allowed for degree credit, with no more than six of the twelve semester hours in courses numbered below 3000. However, the sum of basic (1000/2000 level) ROTC course credits and kinesiology activity course credits allowed toward the degree may not exceed six semester hours.
- Students are expected to make reasonable and satisfactory progress in a degree program. Consequently, sequential scheduling of courses in the major field is necessary, and required courses in English and mathematics must be scheduled each semester until they are satisfactorily passed. If necessary, a required course may be dropped *once*, but normally, *not* a second time.
- Application for the bachelor's degree must be made in writing and approved by the dean of the college during the semester *prior* to the semester in which the degree is to be awarded.
- In order to meet graduation requirements, students must have a 2.00 on both the LSU and cumulative grade point averages. A 2.50 LSU and cumulative grade point average is required for students graduating in any of the secondary education concentrations.

Earning Two Degrees or one Degree with Two Majors

With the dean's approval, a student may be enrolled in two bachelor's degree programs concurrently and thereby either earn two degrees, or earn one degree with two majors listed on the transcript, provided all requirements are completed as of the same commencement.

A student may earn one degree, with two majors listed on the transcript, by completing the residence and academic requirements for each major and the degree program to which it belongs. The student may earn two degrees by, in addition, earning 30 hours more than required for the degree that requires the fewer number of hours.

If the two programs are in different colleges, then the student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. The student must declare a home college, where registration will be initiated and permanent files maintained, and must maintain contact with the second college to ensure that satisfactory progress is being made toward the requirements of its degree program.

College Probation

A student in the College of Science who fails to earn a 2.00 semester average in a regular semester or a summer term will be placed on college probation. In addition, students who fail to meet the college academic requirements noted in the section on degree requirements, or who enter the college with deficiencies may be placed on college probation. At the discretion of the dean, a student who is on college probation and fails to meet the academic requirements, including earning a 2.00 or better semester average, may be declared ineligible to continue in the college. A student on college probation who does earn a 2.00 or better semester GPA, who remediates course deficiencies, and who makes satisfactory progress in the degree program will be removed from college probation.

Pre-Medical and Pre-Dental Counseling

Counselors are available to help students with applications to medical and dental schools. This application process begins one and one-half years prior to professional school entry. Information regarding the pre-medical/pre-dental program at LSU and the professional school application process is available [here](#).

The College of Science sponsors a Pre-medical/Pre-dental Review Committee that provides letters of evaluation for LSU students applying to professional schools. Students wishing to use the services of the LSU Pre-medical/Pre-dental Review Committee must: (1) have a minimum 3.0 cumulative and science GPA, (2) have been enrolled on the LSU main campus as a full time student for the two semesters preceding the committee review, (3) attend mandatory informational meetings, and (4) meet all registration deadlines.

Further information about the committee procedures and requirements may be obtained in the dean's office, 351 Hatcher Hall.

Pass-Fail Option

Students in the College of Science may register for courses in the college on a pass-fail basis under the following conditions:

- Only students with a 2.50 average or better may participate.
- Only *free elective* courses may be taken on a pass-fail basis. Required courses, restricted electives, and courses germane to the major and the career for which the student is preparing may not be taken on a pass-fail basis. Registration for a course on a pass-fail basis will not be permitted until the required work in the same area has been satisfactorily completed. A student *may not* take courses offered by the Honors College on a pass-fail basis.
- Eligible students may take one course per semester up to a total of 12 hours toward the degree on a pass-fail basis.
- A student must have permission (by signatures on a petition form) from the dean of this college, the instructor of the course, and the student's department chair.
- Pass-fail registration must be completed before the final day for adding courses.

Students from other colleges who wish to register for courses in this college on a pass-fail basis will present a petition form to the dean of the college. If the petition is approved, the student will then present the form to the instructor concerned for the appropriate action.

Courses offered by the College of Science that are required in a student's curriculum or are normally considered important in preparation for the student's career will not be approved on a pass-fail basis.

Distance Learning Credit and Intersession Credit

LSU Continuing Education offers both Independent and Distance Learning (IDL) and Online Distance Learning (ODL) courses. Credit earned through this LSU division may be accepted toward meeting degree requirements only with approval of the dean of the college and may not exceed a total of 12 hours.

Students in residence may take IDL or ODL credit only in exceptional cases (e.g., conflicts between single sections of required courses) and with specific approval of the dean of the college.

Students may not be enrolled in IDL or ODL credit the semester they intend to graduate.

Students in the College of Science may not register for more than three semester hours of credit during Intersession without approval of the dean.

Minor Field Requirements (Optional)

A student in the College of Science may earn a minor in a second field under the following conditions:

- The minor must include at least 15 semester hours of course work, of which at least six semester hours must be taken on this campus and at least three of the six hours must be at the 3000- or 4000-level.
- Each course used in the minor must be passed with a grade of "C" or better.
- Courses used for the minor may not be taken on a pass/fail basis.
- All minors must be approved by the dean.

The department offering the minor may impose additional requirements; the specific requirements of the department must be stated in the catalog.

Students in other colleges who wish to obtain a minor in one of the departments of the College of Science must meet the same requirements listed above.

Teacher Preparation Program for Grades 6-12

The departments of Biological Sciences, Chemistry, Mathematics, and Physics & Astronomy offer undergraduate degree programs with an area of concentration in secondary education (middle school and high school). Students in the program may receive a BS in biological sciences, chemistry, mathematics, or physics and qualify for teacher certification. The curricula have been developed cooperatively with faculty in the College of Human Sciences and Education and include courses taught jointly by faculty in the College of Science and the College of Human Sciences and Education. Students completing these degree programs and meeting any additional requirements of the Louisiana Department of Education will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

The following requirements pertain to students enrolled in the secondary education concentration:

Admissions Requirements:

- Minimum cumulative and LSU grade point average of 2.50
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum cumulative and LSU grade point average of 2.50 for entry into and continuation in upper-level (3000/4000-level) education courses, including student teaching

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university, and the Louisiana Board of Elementary and Secondary Education
- Minimum cumulative and LSU GPA of 2.50 on all work completed
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

Application for Student Teaching:

Application for student teaching must be made to the College of Human Sciences and Education Office of Student Services no later than three weeks after classes begin in the semester prior to student teaching. Late applications cannot be guaranteed consideration.

A second option for students interested in middle/high school science teaching is to pursue a traditional bachelor's degree in science and then complete a master's degree in the LSU College of Human Sciences and Education. The master's degree program (Holmes Program) begins in June and requires 12 consecutive months of course work and classroom experience leading to both the master's degree and teaching certification. Information about the program and potential scholarship assistance is available through the College of Human Sciences and Education, Office of Student Services.

Departments, Schools, and Curricula

The graduate program descriptions below include, for each major field, a variety of subheadings—program overview, administration, degree programs, the graduate faculty (including research areas), and other information of interest to students and applicants. These pages represent departmental and interdepartmental programs in which formal degrees are offered. Also included are interdepartmental programs that do not offer degrees. In these programs, a student enrolls in one of the participating departments and earns his or her degree in that department, although his or her research is done through the interdepartmental program.

For additional information about any graduate program at LSU, please contact the appropriate department.

Degree Programs

All degree programs are listed by title followed by the LSU curriculum code, e.g.:

- Master of Science (MS) in Petroleum Engineering (MSPE)
- Doctor of Philosophy (PhD) in Political Science (PPOLI)

Graduate Minors

[Click here](#) to view a list of Graduate Minor Codes 2014-15.

Introduction

This chapter contains information for individuals considering graduate study at Louisiana State University, as well as for enrolled students, faculty, and staff.

For prospective students: this chapter provides a guide to LSU's resources for graduate and professional study, the expertise of the graduate faculty, and other pertinent matters, including application procedures and criteria, graduate assistantships and fellowships, and degree requirements.

For enrolled students, faculty, and staff: this chapter serves as a handbook for graduate study at LSU. The rules and regulations of the Graduate School, as well as detailed descriptions of requirements for advanced degrees, are included.

This Graduate School chapter presents a flexible program of the current graduate educational plans, offerings, and requirements that may be altered from time to time to carry out the purposes and objectives of Louisiana State University. The provisions of this chapter do not constitute an offer for a contract that may be accepted by students through registration and enrollment in the university. The university reserves the right to change any provision, offering, or requirement at any time within the student's period of study at LSU.

Graduate Programs

Information on specific degree programs or areas of study is available directly from the department offering the degree. Further information is available online at www.gradschool.lsu.edu. A complete listing of all graduate programs, concentrations and minors is available [here](#).

LSU has developed flexible rules for the composition of advisory committees for master's and doctoral students, allowing students to work with professors from several departments. It is not possible to get a clear picture of the resources of the university without looking beyond the formal boundaries of the graduate program to which one is applying or in which one is enrolled.

A complete listing of graduate course offerings may be found in the ****COURSE SEARCH**** section.

Since some graduate courses are offered in a two- or three-year rotation, persons interested in knowing the specific courses available in a given academic year should request lists of graduate course offerings directly from the departments in which they are interested.

Admission

Applicants must be admitted to both the Graduate School and to a specific graduate program. All prospective graduate students must complete the online application that can be found at www.lsu.edu/gradapply.

Concepts and Purpose

Doctoral research programs are the essential defining feature of a university. LSU's status as one of the top 70 research universities in the nation and its classification as Research-Extensive by the Carnegie Foundation, depend chiefly on two criteria held to be prime indicators that an institution is a major center for the creation of new knowledge: research funding and doctoral education, both of which ensure the training of future generations of scholars. The synergy between our nationally renowned faculty and our graduate student population helps to keep Louisiana and the nation on the leading edge of discovery.

The Graduate School's primary purposes are:

- Supporting a broad array of graduate degree programs and extensive research opportunities designed to attract, educate, and graduate highly qualified students;
- Supporting faculty who are excellent teacher-scholars, nationally competitive in research and creative activities, and who, with staff and students, contribute to solving economic, cultural, environmental, educational, and social challenges via development of new resources.

The Graduate School administers more than 120 graduate degree programs offered at LSU. LSU's Graduate School was established because the university recognized its obligation to provide an environment for research and inquiry and to make the results of these activities available to the public.

As the state's center of academic research and advanced studies, the Graduate School administers a more extensive and comprehensive program than any other educational institution in Louisiana.

LSU offers doctoral programs in 50 major fields of study. These programs offer opportunities for advanced training and research in all areas of the sciences, social sciences, and humanities. Master's degree programs are offered in 74 major fields. These range from Master of Fine Arts degrees in creative writing, studio art, and theatre, to professional degree programs in social work, business administration, and library and information science.

Additional information about specific graduate and professional programs is published in catalogs and brochures that may be obtained from individual departments or schools at the addresses listed in this chapter. This information may also be accessed online through the LSU homepage: www.lsu.edu.

History and Organization

The first awarded graduate degree on record was a master's degree in civil engineering awarded in 1869. By 1890, 14 master's degrees had been awarded, and by 1909, 32 individuals had received graduate diplomas. In 1909, the Graduate Department was established; the general supervision of graduate work was vested in a Committee on Graduate Courses. During the period from 1909 to 1931, 439 master's degrees were awarded.

In 1931, the Graduate School was established, and the first graduate dean, Charles W. Pipkin, was appointed. The former Committee on Graduate Studies was reorganized into a Graduate Council. Doctoral programs were also established in 1931, and the first doctorate was awarded in 1935. From 1931 through spring 2013, 10,285 Doctor of Philosophy degrees, 589 doctorates other than Doctor of Philosophy degrees, and 51,642 master's degrees were awarded. The total number of advanced degrees awarded by LSU thus reached 62,516.

The Graduate School is administered by the graduate dean, in consultation with the Graduate Council. This council is composed of the dean of the Graduate School, who serves as ex-officio member, and 16 faculty members appointed for rotating terms of five years each by the graduate dean with the concurrence of the provost. The council considers proposals for new degree programs, recommends graduate faculty membership classifications, and recommends changes in Graduate School policy.

Admission to Graduate Study

Admission to the Graduate School is awarded on the basis of evidence of academic achievement and promise. Applications of students who meet the Graduate School requirements are forwarded to the appropriate academic units for final approval.

Certain programs require higher admission standards than those of the Graduate School. Due to the high demand for many graduate programs, meeting the minimum requirements of the Graduate School does not guarantee admission into a particular program.

General Information

Applicants meeting the following requirements are eligible for regular admission to the Graduate School. Applicants failing to meet all requirements may be granted probationary admission, provided other substantial evidence of capacity to do satisfactory graduate work—including outstanding performance in post baccalaureate and/or graduate work, high Graduate Record Examination (GRE) scores (or Graduate Management Admission Test (GMAT) scores, where appropriate), and other outstanding achievement—is presented.

Applicants with unsatisfactory undergraduate records who have completed a minimum of nine hours of graded graduate coursework with at least a 3.33 graduate grade point average (GPA) ("A" = 4.0) in a graduate program and who have acceptable GRE scores (GMAT, where applicable) will be considered for admission.

Applicants who appear admissible on the basis of unofficial and/or incomplete transcripts of previous work or unofficial test scores, but who are unable to supply the required records prior to registration, may be granted provisional admission. Subsequent enrollment will not be permitted until all provisions are met. Provisional admission does not guarantee subsequent regular admission to the Graduate School.

Admission to a Degree Program

Regular Admission

Regular admission is awarded to applicants who intend to pursue a degree and meet the following requirements:

- A bachelor's degree from an accredited U.S. institution or the equivalent from a foreign institution.
- A grade point average of at least 3.00 ("A" = 4.0) on all undergraduate work (or last half-degree requirement) and a 3.00 GPA or better on any graduate work already completed. International applicants must have at least a 3.00 GPA, or equivalent, on all college-level work attempted.
- Acceptable GRE scores (in some cases, a high GRE may be used to compensate for a low GPA). An acceptable GMAT score is required for graduate programs in the E.J. Ourso College of Business, except for the MS and PhD in economics. The MPA program and the Information Systems & Decision Sciences program will accept either the GRE or the GMAT.

- Certain professional master's programs allow work experience to be substituted for either the GRE or GMAT. Please contact the department to which you intend to apply to determine their requirements for admission to the master's degree.
- Acceptance by the graduate faculty in the applicant's area of study. Applicants who are narrowly trained or who have taken a significant amount of work on a pass-fail basis or in ungraded courses may be required to submit scores on GRE Subject (Advanced) Tests before their applications can be considered. Consult individual departments for additional admission requirements.

Probationary Admission

Applicants who fail to meet one or more of the requirements for regular admission may be admitted on probation, provided additional evidence of capacity to do satisfactory work is presented. Such evidence might include superior performance in a substantial amount of post baccalaureate work, high GRE scores (GMAT scores, when appropriate), and other achievements.

Students entering on probation will remain on probation until the completion of nine hours of graduate-level, graded courses ("A," "B," and "C" only) with at least a 3.00 average. Part-time students entering on probation and registering for fewer than nine hours may be dropped from the Graduate School if their GPA is less than 3.00 during any semester in which they are registered.

Students admitted on probation may not be appointed to assistantships or fellowships until they attain good academic standing. (See PS-21 for additional information.)

Provisional Admission

Provisional admission may be considered for applicants who appear to be admissible on the basis of the credentials submitted, but who are unable to supply all of the required official records prior to registration. Students admitted provisionally must submit complete and satisfactory records within 60 days (45 days in summer term) after the first day of class for the semester in which graduate study begins. If these credentials are not received by the date specified, or if they prove to be unsatisfactory, students will not be permitted to register for the following semester. Provisional admission does not guarantee subsequent regular admission.

Admission of International Students

Applicants who have completed degree requirements outside the U.S. must present all of the following:

- A complete and accurate chronological outline of all previous college-level education.
- Authorized school or university records—transcripts, marksheets, certificates of degrees—showing all courses taken and all grades received (with certified translations if the records are in a language other than English).
- A bachelor's degree or its equivalent, with a grade point average equivalent to a "B" or better on all previous undergraduate work (or last half-degree requirement) from an accredited college or university.
- Verification of the availability of sufficient funds to meet all costs while studying at LSU as an F-1 student before the I-20 Certificate of Eligibility will be processed. For the current list of estimated expenses for international students, please visit International Services' website here.
- GRE Test scores (GMAT where appropriate).
- A satisfactory score on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Pearson's Test of English (PTE).

English Proficiency

An applicant whose native language is not English and/or who has been educated outside of the U.S. in a country or province where English is not the only official language must demonstrate proof of English proficiency by submitting either a TOEFL, an IELTS, or PTE score before the application is evaluated for admission.

TOEFL:

On the TOEFL (Test of English as a Foreign Language), the following minimum scores are required for admission:

- 550 (paper-based exam)
- 79 (internet-based exam)

Information regarding TOEFL may be obtained by visiting the official website at www.toefl.org

IELTS:

On the IELTS (International English Language Testing Service), the following minimum score is required for admission:

- 6.5

Information about IELTS may be found at www.ielts.org. IELTS is jointly owned by the British Council, IDP: IELTS Australia, and the University of Cambridge ESOL Examinations. Official TOEFL/IELTS scores are those reported directly to LSU by the respective testing service at the request of the student.

PTE:

On the PTE (Pearson's Test of English), the following minimum score is required for admission:

- 59

Applicants may be exempt from the TOEFL/IELTS/PTE requirement if they have completed one of the following:

- A bachelor's degree earned from an accredited U.S. institution;
- A college-level degree showing the completion of post-secondary education in a country where English is the primary official language.

Official transcripts or scores are required showing completion of one of the above before a student can be exempted from the TOEFL/ IELTS/PTE requirement. The Office of Graduate Student Services reserves the right to require a satisfactory TOEFL/IELTS/PTE score from any applicant. All international students who are admitted will be required to take an English placement test prior to registration.

Application deadlines for international students are the same as for all other applicants; however, because transcripts from foreign universities require special evaluation, prospective international students should begin the application process at least nine to twelve months prior to the semester in which they plan to enroll. Applications received after the deadline dates will be processed for the following semester or summer term. When sufficient scholastic records and acceptable evidence of English proficiency are not received early enough to determine admissibility for the semester for which application is made, consideration for a subsequent semester will be made only upon the applicant's written request.

Upon arrival on campus and before registration, international applicants (except citizens of Canada, Australia, New Zealand, Ireland, the United Kingdom, certain Caribbean islands, and Belize) who have been admitted to the Graduate School must take the LSU Comprehensive English Language Test, consisting of the Michigan Test and a writing sample. Students with teaching duties whose tests indicate a deficiency in English will be required to register for appropriate English composition courses with a reduced load of graduate courses.

All international graduate students awarded graduate teaching assistantships must demonstrate proficiency in English. Any international graduate assistant who has not received a favorable recommendation from this speech course may not teach in any capacity.

An international applicant who has completed an undergraduate degree at an accredited U.S. institution must meet regular admission requirements. Before the applicant can be considered, the Graduate School must receive a satisfactory GRE or GMAT score. An international applicant will not be admitted until this information has been received.

Application Procedures

The application for admission to the Graduate School is accessed at www.lsu.edu/gradapply. Only online applications may be submitted to the Graduate School. Submission of the application fee requires a credit or debit card. The application fee is \$50US for U.S. citizens and permanent residents and \$70US for all other applicants.

A late fee of \$25US is assessed if the application is submitted after the following dates: May 1 for spring intersession, July 15 for summer intersession, May 15 for the fall semester, October 15 for the spring semester, December 1 for winter intersession, and May 15 for the summer term. International applications received after these dates will be processed for the following semester and no late fee will be assessed. Fall applications should be received before the January 1 priority date in order to receive full consideration for assistantships, fellowships, or scholarships for which the applicant has applied.

International applicants are encouraged to determine course availability before applying for summer entry, and they are further encouraged to apply at least nine months in advance of their intended semester of enrollment. Applicants for graduate admission are responsible for the following:

1. Online Application:
 - a. The completed online *Application for Admission to Graduate Degree Program* (www.lsu.edu/gradapply).
 - b. The required application fee and any applicable late fee.
2. Submitting the following items to the Graduate School:
 - a. One set of official transcripts of all previous college or university work from each institution attended. An official transcript bears the official seal of the issuing school. Photocopies, facsimiles, or transcripts marked "issued to student" are not official. Transfer credit posted on the records of other institutions is not accepted in lieu of transcripts from the original institution(s). If the college or university will supply an official transcript in a sealed and signed envelope, the student should obtain the transcript in this manner and submit it unopened. If the college or university will not send official transcripts to a student, please request that a transcript be sent to: LSU Office of Graduate Student Services, 114 David Boyd Hall, Baton Rouge, LA 70803. Transcripts from the LSU main campus need not be submitted.
 - b. A satisfactory score on the verbal and quantitative portion of the Graduate Record Examination (GRE). LSU's code for GRE reporting is R6373-5. Test information may be obtained from the Graduate School at LSU; graduate schools at most colleges and universities; or by writing to Educational Testing Service, P.O. Box 6000, Princeton, New Jersey 08541-6000. Allow at least six weeks for examination results to reach LSU.
 - i. Applicants to the Master of Fine Arts program in studio art and theatre, Master of Music, and programs in business administration are not required to submit GRE scores. Applicants for the Master of Fine Arts in creative writing are required to submit GRE scores. Applicants to the Master of Fine Arts program in theatre (specialization in Scenic Technology and Design) are required to submit GRE Scores. Applicants to all other Master of Fine Arts programs in theatre are not required to submit GRE scores.
 - ii. The Graduate Management Admission Test (GMAT) is required of applicants for all degrees in the E.J. Ourso College of Business, except for the MS and PhD with a major in economics which require the GRE. The Department of Information Systems & Decision Sciences and the MPA program will accept either the GRE or GMAT score. Application procedures for the GMAT are the same as described above. This examination may be taken at LSU. The LSU code for GMAT score reporting is R6373-5.
 - iii. Certain professional Master's programs allow work experience to be substituted for either the GRE or GMAT. Please contact the department to which you intend to apply to determine their requirements for admission to the master's degree.
 - c. International applicants should also submit:
 - i. degree statements and an official English translation of each foreign document
 - ii. financial statement
 - iii. a satisfactory score on either the TOEFL, IELTS, or PTE
 - d. Three letters of recommendation; these letters may be submitted electronically through the online application.
3. Many departments have other specific departmental admission requirements. For specific information, consult the individual departments.

Admission is for the semester requested. Those admitted who do not register must make a written request to be reconsidered for admission for a subsequent semester. Request for a delay of admission will only be considered for two subsequent semesters

from the original application semester (intersessions excluded). A new application is required for a delay of more than two semesters from the original semester of application (summer included).

Non-degree Admission

A student who holds a baccalaureate degree but who does not desire to enroll in a degree program in the Graduate School may enroll as a graduate non-matriculating student. Coursework is taken for academic credit, and all rules and regulations for graduate students apply. A student in this category must register for at least one course numbered 4000 or above each semester to maintain graduate status. Courses numbered below 4000 may be taken concurrently with graduate coursework.

Enrollment in courses numbered 6000 and above is limited to a total of six semester hours for graduate students in this classification. However, an unlimited number of courses numbered 5999 and below may be taken.

No more than 12 hours of graduate credit taken as a non-matriculating student may be applied toward the requirement for a master's degree.

No more than 12 hours of combined credit transferred from other schools and earned as an LSU extension or non-matriculating student may be applied toward a master's degree at LSU. (See "Transfer of Credit".)

Students wishing to enroll only in courses numbered below 4000 should apply for undergraduate admission through the Office of Enrollment Management, 1146 Pleasant Hall. Students classified as extension students are ineligible to enroll in on-campus courses. Applications for graduate non-degree admission may be completed by accessing the online application at www.lsu.edu/gradapply. Students applying for graduate non-degree admission must submit one official transcript from the highest degree-granting institution and from each institution where graduate credit was earned or attempted. Transcripts must indicate that the applicant has a 2.50 or better GPA on all undergraduate work completed and a 3.00 or better GPA on all graduate work completed. Transcripts should be mailed directly to the LSU Office of Graduate Student Services, 114 David Boyd Hall, Baton Rouge, LA 70803. In addition, a TOEFL score of at least 550 on the paper-based test or 79 on the Internet-based test, an IELTS score of at least 6.5, or a PTE score of at least 59 must be received before an international student's application is evaluated for admission. Applicants from Canada, Australia, New Zealand, Ireland, certain Caribbean islands, Belize, and the United Kingdom are exempt from the TOEFL, IELTS, or PTE requirement. International students who have received a degree from an accredited institution in the U.S., Canada, Australia, New Zealand, Ireland, certain Caribbean islands, or the United Kingdom are also exempt from taking the TOEFL, IELTS, or PTE. A nonrefundable application fee must be submitted with the application. The application fee is \$50US for U.S. citizens and permanent residents and \$70US for all other applications.

Students not regularly admitted to the university may attend classes as auditors, provided they meet all previously mentioned requirements for admission, have written permission from the individual course instructor(s) and the graduate dean, and have made the necessary arrangements and paid the required fees. Prospective auditors should initiate registration by obtaining an "Audit Only" form from the Office of the University Registrar.

Regularly enrolled graduate students may also audit courses with consent of the individual instructor(s). Auditors will not receive degree credit and will not be permitted to take a credit examination on audited coursework. However, previously audited courses may be taken for credit. Audited courses do not count in total course loads and are not recorded on official transcripts.

Readmission

Readmission to Original Program

Previously enrolled graduate students who fail to enroll for three or more consecutive semesters (summer term included) must reapply to the Graduate School. Applications for re-entry will be subject to reevaluation under current admission criteria; readmission is not guaranteed.

Official transcripts must be submitted if work has been taken at another institution since the student was last enrolled at LSU. The application deadlines for admission also apply for readmission, as do application fees and late fees.

Readmission with a Change of Program

A student wishing to pursue a degree or program other than the one originally sought and who has not enrolled for three or more semesters (including summer terms) must complete application procedures as described above and comply with the requirements for the new program. Acceptance into one program does not guarantee admission into another. The admission decision ultimately rests with the admission committee of the department or interdepartmental program concerned.

Decisions

All official notifications regarding admission to the Graduate School are conveyed to the student through the online application site. Students must log in to their application to view their admission status.

Graduate Fees & Financial Aid

Graduate student expenses, other than those explained below, will vary with the individual. The Board of Supervisors may change fees and costs for dining plans and housing at any time and without advance notice. Students should check the Office of Budget and Planning's Website at www.bgplan.lsu.edu.

The following discussion of fees, required minimum registration, and related matters covers items that apply only to graduate students and for which graduate students and undergraduates are treated differently. For all other fees (vehicle registration, audit, student insurance, the Student Health Center, and the like), see "Undergraduate Fees and Expenses".

Graduate Fees

Included in university fees for full-time graduate students are subscriptions to the *Daily Reveille* campus newspaper and *Legacy* student magazine; a copy of the *Gumbo* student yearbook; an allocation to Student Government; admission to various athletic events in the spring semester; membership in the LSU Student Union; and reduced golf green fees at the LSU Golf Course.

Student allocations included in university fees are a campus transit fee, a Student Recreational Sports Complex fee, a fee for "The Phone," a KLSU radio fee, and an LSU Tiger TV fee. Additionally, university fees include a nonrefundable registration fee and a Student Health Center fee.

Application Fees

All applications for graduate admission must be paid when completing the online application process. Additional nonrefundable late fees, where applicable, are assessed for all applications received after the published deadlines for a given semester.

The late application fee also applies to applications for readmission submitted after the established deadline dates. International applicants should consult the section "Admission of International Students" for additional information.

Minimum Graduate Student Registration

Graduate students engaged in the writing of theses or dissertations are expected to register for research hours commensurate with the amount of university resources—faculty time, equipment, library facilities, and/or office space—to be used that semester. Out-of-town students are also expected to register for research hours if they are receiving any faculty advice or direction.

In addition, doctoral candidates must maintain continuous registration for a minimum of three semester hours of credit each regular semester (excluding summers) from the completion of the general examination to the end of the semester in which an

approved dissertation is submitted to the Graduate School. Students must be registered for a minimum of one to three semester hours of credit during any semester in which they are taking master's or doctoral examinations, including the qualifying examinations required by some departments.

"Degree Only" Registration

Students, who have completed all degree requirements, including final examinations taken in a previous semester, may register for "degree only" and pay only the graduation fee. "Degree only" registration is only allowed for students whose theses or dissertations are submitted to the Graduate School on or before the last day to add courses for credit. Non-thesis students may also register "degree only," provided all degree requirements are met in a previous semester. Degree Only registration must be completed by close of business on the last date to add classes for the semester of graduation.

Audit Fees

Fees for auditing courses are in accordance with the regular semester and summer term fees. Fees for students enrolling for combined credit and audit work will be assessed in accordance with total hours scheduled.

Residency Status for Tuition Purposes

Eligibility for classification as a Louisiana resident is determined by the Graduate School in accordance with university regulations and is based on evidence provided on the application for admission and related documents. Regulations relate primarily to location of the permanent home and place of employment.

A student classified as a resident is one who has abandoned all prior domiciles and has been domiciled in the state of Louisiana continuously for at least one full year (365 days) immediately preceding the first day of classes of the term for which classification as a resident is sought. Physical presence within the state solely for educational purposes without substantial evidence of the intent to remain in Louisiana will not be sufficient for resident classification, regardless of the length of time within the state. Further detailed information is available in PM 31 and on the Graduate School website.

Graduation Fees

- Master's degree fee—\$35; processing fee, \$20
- Doctoral degree fee—\$55; processing fee, \$35
- Doctor of Veterinary Medicine degree fee, \$40
- Duplicate diploma fee—\$20 (charged if a diploma is ordered and student does not graduate at that commencement)
- Replacement diploma fee—\$30

Special Research Fees

- For specially planned research programs arranged through the Office of International Programs, departmental research fees are applicable and vary with the individual program.
- For students in the School of Social Work, an internship fee of \$100 per course is assessed. The fee(s) must be paid by all students enrolled in SW 7008, SW 7502, and SW 7503.
- For students in the School of Veterinary Medicine, a microscope fee of \$40 per semester is assessed to each student in Years I and II of the professional curriculum. Regularly admitted students are not assessed fees in the summer (regardless of the elective blocks taken in Year III and IV). Regularly admitted students accepted from contract states pay the same fees as Louisiana residents, with respective states paying an additional increment as specified by contract.

Tuition and Required Fees

Tuition and required fees are subject to change. For current figures, please visit the website of the Office of Budget and Planning. For information about room rent, dining plans, refunds, and other special fees, see "*Undergraduate Fees and Expenses*".

Financial Aid

The university offers financial assistance to graduate students through a variety of programs, including fellowships, assistantships, internships, student jobs, and loans. Since these programs are administered by separate offices, a student interested in applying should contact the appropriate office for more detailed information.

Students should work with their financial aid officer to carefully study the impact of any employment or award on their eligibility for student loans.

Fellowships and Scholarships

The Graduate School offers a number of fellowships and scholarships to exceptional students. Most students can expect to receive some type of aid throughout their graduate careers. In some cases, recipients are required to have completed a minimum amount of graduate work prior to receiving an award. All such assistance is awarded on the basis of the individual's academic achievements. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate Enrichment Funds • Superior graduate students awarded departmental assistantships and fellowships in selected departments may receive a monetary enhancement to their departmental assistantship or fellowship. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate School Dissertation Fellowships • Dissertation fellowships are available to exceptional doctoral students who will begin their final year of study. A maximum one-year (9 month) stipend of \$18,000 is awarded. Resident and nonresident tuition are exempted. The recipient will be responsible for paying the required university fees.

Applicants must be able to demonstrate that there is a high probability for completion of the dissertation during the fellowship year. Dissertation fellowships are available only to full-time students. For information on application procedures that entail departmental nomination each spring for the following fiscal year, please visit the Financial Assistance section of the Graduate School web page. Interested students should contact the graduate advisor of the department in which they plan to study.

Board of Regents Graduate Fellowship Program (PhD and MFA) • The Louisiana Educational Quality Support Fund provides Board of Regents Graduate Fellowships for exceptionally qualified graduate students in selected professional programs. These awards range from \$14,000 to \$30,000+ per year for up to four years. Resident and nonresident tuition are exempted. Recipients are responsible for paying required university fees. Academic departments eligible for these awards vary from year to year. Most major areas award these fellowships annually, including humanities, social sciences, basic sciences, arts, design, education, agriculture, and engineering.

Applications must be submitted to the candidate's department and must include scores on the verbal and quantitative portions of the Graduate Record Examination (or GMAT scores if appropriate), an official transcript of all grade point averages on all college work, a one-page narrative of educational goals, and three letters of recommendation. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate School Tuition Awards • The graduate dean may award up to 200 tuition exemptions to incoming graduate students from underrepresented groups. These tuition awards provide for an exemption from either the resident fee or both the resident and nonresident fees for up to two years. Recipients are responsible for paying required university fees. Preference will be given to African Americans and students from Latin American countries. Students must be regularly admitted to a graduate program at LSU and be nominated by their department. Interested students should contact the graduate advisor of the department in which they plan to study.

Assistantships

More than 2,000 teaching, research, and service assistantships are awarded annually. All communication regarding graduate assistantships should be directed to the chair of the appropriate department. Applications and supporting credentials are accepted at all times, but priority for graduate assistantships beginning in the fall semester is given to applicants who submit their materials by early January. Students who accept assistantships before April 15 may be free to resign in order to accept another offer up to that date. An acceptance given or left in force after April 15 is a commitment not to accept another appointment without first obtaining formal release from the prior commitment.

A graduate assistantship is intended to be supportive of the student's educational experience by relating to the graduate program in which the student is enrolled. Proposed appointment to duties unrelated to the student's major program must have the concurrence of the student's major department prior to approval by the Graduate School.

Eligibility Requirements • Graduate students with acceptable academic records may be appointed to graduate assistantships. A student admitted on probation may not be appointed to a graduate assistantship until he or she achieves good standing. A graduate student placed on academic probation by the Graduate School for failing to make satisfactory progress may not be appointed or reappointed to a graduate assistantship unless the student's cumulative/semester grade point average is at least 3.00.

Details and additional information regarding eligibility for a graduate assistantship may be found in PS-21—available online, in the appendices of this chapter, from the Graduate School, and in departmental offices.

Stipends • Graduate assistant stipend levels vary widely depending on the department and assigned duties. Assigned duties may include research, teaching, and/or service. Graduate assistantship appointments may also be for one-third or one-quarter time, with an appropriate adjustment in the stipend. Appointments for more than one-half time require special justification. Although most appointments are made on an academic-year basis, assistantships are available in certain departments during the summer months, with an appropriate adjustment in the stipend. Fiscal year appointments are also available.

Federal Financial Aid Programs

Please see the section entitled "Financial Aid and Scholarships" in this General Catalog.

GRADUATE APPLICATION FEES			
	Fee	Fee Deadline	Fee if Paid After Deadline
Fall Semester			
U.S. Citizens and Resident Aliens	\$50	May 15	\$75
Nonimmigrant Applications	\$70	May 15	0*
Non-degree Applications	\$50	N/A	N/A
Priority Date (for financial assistance)**	\$50	January 1	N/A
Spring Semester			
U.S. Citizens and Resident Aliens	\$50	October 15	\$75

Nonimmigrant Applications	\$70	October 15	0*
Non-degree Applications	\$50	N/A	N/A
Summer Term			
U.S. Citizens and Resident Aliens	\$50	May 15	\$75
Nonimmigrant Applications	\$70	May 15	0*
Non-degree Applications	\$50	N/A	N/A
<p>*International applications received after the deadline will be processed automatically for the following semester or summer term.</p> <p>**No late fees are associated with the January 25 priority date for full consideration for assistantships and fellowships.</p> <p>± International applications for nondegree enrollment must be pre-approved and are assessed the \$70 international student application fee.</p>			

Graduate School Regulations

The following discussion of general Graduate School regulations should be read in conjunction with "Requirements for Advanced Degrees." Regulations common to graduate and undergraduate students (the Code of Conduct, grade appeals, etc.) are covered in "Regulations."

Graduate School requirements are minimal, and in many cases, are exceeded by those of individual departments. Statements of specific departmental requirements for degrees are included in the departmental section of this chapter. Most departments also have brochures describing their programs and requirements in detail.

Graduate Student Classification

In order to be classified as a graduate student and to be considered full-time, students must maintain registration in a minimum of 9 semester hours in the fall or spring semester (with a minimum of six hours of graduate credit coursework), or a minimum of 6 semester hours in a summer term or online module (with a minimum of 3 hours of graduate credit coursework). At least one half of the registered credit for part-time graduate students must be in graduate credit coursework.

Program Change

Graduate students must assume full responsibility for knowledge of Graduate School policies and departmental requirements concerning their individual degree programs. Advances in knowledge and changes in methodology at times require alterations in degree programs. Therefore, graduate students should be aware of the current regulations and requirements of the Graduate School and of their departments at all times. Current regulations and requirements take precedence over any previously promulgated policies.

Between *LSU General Catalog* issues, notices of changes will be available from the Graduate School and from each department.

Graduate Credit

A student may receive graduate credit only for courses taught by members of the graduate faculty or other persons approved in advance by the dean of the Graduate School. Except as noted, a student may receive graduate credit only for work taken while officially enrolled as a graduate student.

Any student dropped from a graduate program because of unsatisfactory performance will not be permitted to take courses for credit toward a graduate degree beyond the semester in which the student is dropped.

Graduate students may not take credit examinations in graduate-level courses.

Graduate Credit in Law

Students registered in the Graduate School may receive graduate credit for certain courses offered by the Hebert Law Center if the courses have been approved in advance by the Hebert Law Center and the dean of the Graduate School. Students should submit a written petition to the Graduate School for such approval. They must obtain permission from the vice chancellor of the Paul M. Hebert Law Center in order to register for these courses.

Dual Degree Programs

Students interested in these programs are encouraged to visit the individual program sites.

- JD/CL-MBA
- JD/CL-MMC
- JD/CL-MPA
- JD/CL-MS in Finance

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/CL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the websites listed above.

Students successfully completing one of the programs listed above will receive two degrees, a JD/CL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Transfer of Credit

Hours transferred may not exceed one-half of the total semester hours of graduate coursework (thesis hours excepted) required for the student's degree program. For example, a maximum of 12 hours may be transferred in a master's program requiring 24 hours of coursework.

A maximum of 12 semester hours of credit earned as an LSU extension or non-matriculating student may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. This includes a maximum of six hours at the 6000-level and above for LSU extension or non-matriculating credit.

A maximum of 12 hours of transfer credit from other schools may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. Only six hours applied toward a previous master's degree may be applied toward a second master's degree (see "Second Master's Degree").

To petition for acceptance of these credits, the student must be currently enrolled, must have completed at least nine hours of graduate coursework in a degree program at LSU, and must be in good academic standing.

Transfer credit from other accredited schools must have been earned for graduate credit. This course work must be judged appropriate to the student's program by the graduate faculty of the major department, must have been taught by a professor whose credentials are comparable to those of graduate faculty at LSU, and must, in terms of time invested, be comparable to graduate courses at LSU. Transfer work may not be used to fulfill the master's program requirement that at least one-half of the minimum required credit be in courses at or above the 7000-level.

No more than 12 hours of combined credit transferred from other schools and earned as an LSU extension or nonmatriculating student may be applied toward a master's degree at LSU. Credit earned as an LSU extension or nonmatriculating student or transferred from another institution must be for coursework in which the student earned a grade of "A" or "B." Courses in which a grade of "C" was earned will not be accepted for transfer into a master's degree program.

Transfer work must have been completed within five years of the time the student is eligible to petition. Once transfer credit is approved, it is valid as long as the master's degree is completed within the five-year time limit or the transfer work is within five years of degree completion.

Graduate work transferred from other institutions may be applied toward degree requirements, but the grades earned will not be computed in the LSU graduate average nor will transfer work appear on the official transcript. Graduate course work taken at other campuses within the LSU System is not considered transfer credit, and any number of hours may be applied toward a degree if approved by the chair of the student's department on this campus.

Graduate Credit for LSU Seniors

Refer here within the chapter, "Courses of Instruction," in this catalog for additional information on enrollment for undergraduate credit in the 4000- or 7000-level courses.

Correspondence Study

No graduate credit is allowed for work done by correspondence study at this or any other university.

Eligibility of Faculty and Staff for Graduate Degrees

LSU System regulations govern LSU employees' eligibility to work toward graduate degrees. A faculty member above the rank of instructor may not work toward a graduate degree at this university. Other employees who, in the opinion of the Graduate Council, are of equivalent status may not work toward graduate degrees. Non-faculty, professional staff, and/or administrators may pursue master's degrees; only those who do not hold positions where there is a potential conflict of interest will be permitted to pursue doctoral degrees.

If an employee serving as a professional staff member and/or administrator wishes to pursue a doctoral degree, the employee, his or her immediate supervisor, and the chair of the department in which he or she wishes to pursue the degree must submit to the dean of the Graduate School statements outlining the employee's job responsibilities and providing an analysis of the independence of the employee's official duties from the department in which doctoral work is to be taken. The Graduate Council will review these statements and make a recommendation through official channels to the chancellor.

Grades

Graduate Grading System

Grades in the Graduate School have the following meanings:

- Marks carrying advanced degree credit are "A," "B," "C" (up to, but no more than six hours); "S" (satisfactory); and "P" (pass).

- Marks carrying no credit for advanced degrees are "D" (poor), "F" (fail), "I" (incomplete), "W" (withdrawn), "U" (unsatisfactory), and "NC" (no credit).
- Cumulative grade point average is the average based only on graduate work graded "A," "B," "C," "D," and "F" ("A" = 4, "B" = 3, "C" = 2, "D" = 1, "F" = 0).
- Semester grade point average is the average based on graduate and undergraduate work graded "A," "B," "C," "D," and "F."

"I" Grade: An "I" grade indicates that course performance was satisfactory, but because of circumstances beyond the student's control, all requirements were not met. Authorization from the dean of the Graduate School is not required to assign an "I" grade to a graduate student.

An "I" grade should never be given to enable a student to do additional work to bring up a deficient grade. A task should not be assigned to a class that will take longer than a semester to complete, thus causing everyone in the class to get an "I" grade. An "I" grade may not be given for a course taken in the semester in which the student graduates if that course is listed on the application for degree or if changing the "I" grade to an "F" would result in the student's cumulative average being less than 3.00. An "I" grade should never be assigned for thesis/dissertation research. "S" (satisfactory) and "U" (unsatisfactory) grades are given for thesis (8000) and dissertation (9000) research courses up to and including the semester the student graduates.

An "I" grade is valid only until the final day of classes in the next regular semester (fall or spring), whether or not the student is enrolled. "I" grades received in the spring semester or the summer term are valid until the end of classes in the fall semester. "I" grades received in the fall semester are valid until the final day of classes in the spring semester. There will be no extension of time. Responsibility for changing an "I" grade lies both with the student and the faculty member concerned. The faculty member's failure to submit a "Grade Correction Report" to change the "I" grade by the final day of class for the next regular semester will result in the "I" grade becoming a permanent "F" grade.

Unusual circumstances that preclude a student from completion of course requirements may—at the discretion of the dean of the Graduate School—permit assignment of a permanent "I" grade.

Unusual circumstances might include, but would not be limited to, withdrawal of the student from the university because of prolonged medical problems, or death or resignation of the faculty member concerned, and the absence of another faculty member to supervise the unfinished work. The student must initiate the petition for a permanent "I" grade. This petition must be accompanied by a letter of justification from the faculty member concerned, if possible. The petition must also be endorsed by the chair of the student's department before it is submitted to the dean of the Graduate School.

"W" grade: A "W" grade indicates that a course has been dropped between the dates specified on the academic calendar. In extraordinary cases, the dean of the Graduate School may authorize a resignation and/or course drop after the last date specified.

The policies and procedures of the university governing grade appeals are described in the section concerning university regulations.

Pass-Fail Option

With approval of the student's major professor, department chair, instructor of the course involved, and the dean of the Graduate School, a graduate student may register on a pass-fail basis for courses not included in the major or minor requirements. The deadline for changing from pass-fail grading to letter grading, or vice versa, is the last day for adding courses for credit.

If the student's major department agrees, graduate courses passed with a grade of "P" may be offered for degree credit, but the grade will not be considered in computing the grade point average. For graduate-credit courses, a grade of "P" will be assigned only if the work is of at least "B" quality. A grade of "F" in a pass-fail course will be treated as any other "F." Some departments have designated certain research and seminar courses to be taught on a pass-fail basis. All students enrolled in these courses will be graded in this manner.

Grade Requirements

Good Standing: Graduate students are considered to be in good academic standing, (making satisfactory academic progress), if they maintain a 3.00 cumulative grade point average on all graduate course work taken within the LSU System and a 3.00 semester average on all coursework (undergraduate and graduate), and earn a grade of "S" in research.

Probation and Dismissal: A student whose cumulative LSU average is below 3.00 will be placed on probation, except that a student whose cumulative average is as low as 2.75 may be dropped from the Graduate School without having a probationary period. For these purposes, a summer term is counted the same as a regular semester. A student already on probation whose cumulative average is below 3.00 will be dropped from The Graduate School. A student receiving a "U" grade in research will be placed on probation. A student receiving a second "U" in research may be dropped from the Graduate School. Rules governing students admitted on probation are provided in "Admission to Graduate Study" in this chapter. The grades recorded determine the student's academic status, even if the student changes to a different graduate degree program.

Students who have been dropped from a graduate degree program and are ineligible to continue in the Graduate School may not reapply as non-degree students.

Applicants admitted on probation and students placed on probation may not be appointed to a graduate assistantship. Refer to PS-21 for further details concerning assistantships and students on probation.

Academic Dishonesty: Academic integrity and honesty must be fundamental qualities of any graduate student's program, and a graduate student's conduct must be above reproach. Academic dishonesty undermines the entire academic enterprise. As a result, it cannot and will not be tolerated. It is the responsibility of all students to familiarize themselves with the Code of Student Conduct and other university rules and regulations governing student conduct and activities.

The Office of the Vice Chancellor for Student Life has administrative responsibility for coordinating all university disciplinary procedures and practices.

Graduation: To receive a graduate degree, students must be enrolled for the semester and have at least a 3.00 cumulative average on all graduate course work taken that is applicable to the degree program and on all graduate course work taken while registered in the Graduate School. "S" and "P" grades are not considered in determining whether this minimum level of performance has been achieved. A maximum of six credit hours of course work with a grade of "C" may be counted toward degree requirements.

Graduate Registration

Specific registration dates for each semester or summer term are listed on the academic calendar. Registration procedures are published in the semester schedule of classes at the website of the University Registrar.

Course Loads

Any graduate student who is utilizing university facilities and/or faculty time must register for an appropriate course load. Graduate students engaged in writing or defending theses or dissertations are expected to register for research hours commensurate with the amount of university resources (faculty time, equipment, library facilities, and/or office space) to be utilized that semester. There is a continuous registration requirement for doctoral students who have passed the general examination.

Full-time Study in Graduate School

To be considered full-time, students must maintain registration in a minimum of 9 semester hours in the fall or spring semester (a minimum of six hours for graduate credit), or a minimum of 6 semester hours in the summer term (a minimum of 3 hours for graduate credit). At least one half of the registered credit for part-time graduate students must be in coursework at the graduate level.

Graduate students may, with prior written approval of the dean of the Graduate School, receive credit for work taken concurrently at another university. For example, LSU has a cooperative registration program with Southern University and some cooperative graduate programs with other universities in Louisiana.

Course Loads of Graduate Assistants

Graduate students holding graduate assistantship appointments must meet certain minimum registration requirements. Such students are expected to register for a full load—nine hours in the spring and fall, at least six of which must be at the graduate level, and six hours in the summer, at least three of which must be at the graduate level—each semester until all degree requirements are completed.

Course Loads of Graduate Students Taking Examinations

Students must be registered for a minimum of one to three semester hours of credit during any semester in which they are taking the master's final examination or doctoral general examination, including the qualifying examinations required by some departments. Doctoral students who have completed the general examination should see "Continuous Registration Requirement" under "Requirements for Advanced Degrees" in this chapter.

Course Loads of Full-Time Faculty and Other Academic Employees

A member of the faculty holding the rank of assistant professor or above may register for a maximum of four semester hours of credit each semester or summer term provided written approval has been given by the department chair and the dean of the college or school in which the faculty member is employed.

Full-time instructors and associates may register for a maximum of four semester hours of course work at the 7000-level or six semester hours (four during summer term) at the 4000-level.

Course Loads of Part-Time Faculty and Staff

Persons employed by the university half-time or less may register as full-time graduate students. Persons employed more than half-time by the university should not register as full-time graduate students. The maximum load permitted will depend on the extent of employment. Written permission to register as a full-time student must be obtained from the employee's supervisor and academic advisory committee. Audits are not counted in the permitted load.

Registration of Employed Persons

The sum of the fraction of full-time registration and the fraction of full-time employment of nonacademic LSU employees should not exceed one and one-half. Written permission to exceed this registration/employment sum must be obtained from the employee's supervisor and academic advisory committee.

"Degree Only" Registration

Students, who have completed all degree requirements, including final examinations taken in a previous semester, may register for "degree only" and pay only the graduation fee. "Degree only" registration is only allowed for students whose theses or dissertations are *submitted to and approved by* the Graduate School on or before the last day to add courses for credit. Eligible students must submit an application for degree and inform the Graduate School of their intent to register for "degree only." Non-thesis students may also register "degree only," provided all degree requirements are met in a previous semester.

Registration of Candidates for Degrees

Students expecting to receive their degrees in the current semester must be registered for coursework (if in a non-thesis degree program) or thesis/dissertation research hours (if writing a thesis or dissertation) unless they qualify to be registered "degree only" (see "Degree Only" Registration). Eligible students must submit an "Application for Degree" by the published deadline.

Adding or Dropping Courses

A course may be added or dropped only in accordance with the dates indicated on the academic calendar. During the drop/add period, the student will initiate the action using the myLSU online registration system. A change from credit to audit is treated as a drop and add action, but it must be approved by the Graduate School by the published deadline. See "Auditing Courses" below for additional information about auditing courses.

Auditing Courses

Regularly enrolled graduate students may audit courses with the consent of individual instructors. Auditors will not receive degree credit for courses audited, nor will they later be permitted to take a credit examination on work audited. However, courses previously audited may be taken for credit later. Audited courses do not count in total course loads and are not recorded on official transcripts.

Changing Degree Programs

A student in one degree program who wishes to change to another degree program, or a student who completes one degree and wishes to pursue another degree, must obtain approval of the current department, new department and The Graduate School. A "Request for Change of Department" form may be obtained from the Graduate School website.

Students wishing to pursue a different degree in the same department must obtain approval from the department. The department must notify the Graduate School in writing of such a change.

Dual Degree

Students wishing to pursue dual degrees must complete and submit the "Request for Dual Degree" form. Information on available dual degree programs is available on the departmental sites.

Resignation from the University

Dropping an entire course load constitutes resignation from the university for that semester. A graduate student who wishes to resign must first secure approval of the dean of the Graduate School. A resignation form must be completed within 10 days of the date approved by the dean, and in no case later than the date shown on the academic calendar as the final date for resigning from the university. Completion of resignation involves clearance through certain administrative divisions of the university, as shown on the resignation form provided by the Graduate School. A student who abandons courses without resigning will receive a grade of "F" in each course.

Interinstitutional Cooperation

Academic Common Market

Louisiana participates with 13 other southern states in the Academic Common Market, an interstate agreement for sharing uncommon programs. Residents of these states who are accepted for admission into selected out-of-state programs can enroll on an in-state tuition basis.

To enroll as Academic Common Market students, applicants must be accepted for admission into a program to which their state has made arrangements to send its students, and obtain certification of residency from the Common Market Coordinator in their home state. Applications for admission should be made directly to the institution offering the program. Additional information about the Academic Common Market and programs available at in-state tuition rates for residents of Louisiana can be obtained from the Office of the University Registrar.

Cooperative Program with Southern University

See the section "LSU–Southern University Cooperative Programs" in the *LSU General Catalog* for information about this program.

Multi-campus Registration, LSU System

With appropriate approval, LSU graduate students may take courses for resident credit at the LSU Health Sciences Center in New Orleans. Fees paid at LSU will be for the number of hours to be taken at LSU plus the number of hours to be taken at one of the other campuses in the LSU System.

An application for multi-campus registration may be obtained from the LSU Office of the University Registrar. In order to prevent delay in registration, this form should be submitted at least two weeks before the scheduled time of registration. Approval for multi-campus registration must be obtained from the student's major department, the LSU Graduate School, the LSU Office of the University Registrar, the dean of the other campus' college, and registrar of the other campus.

Cooperative Graduate Programs

Several of LSU's graduate degree programs have specific cooperation with other universities in Louisiana. These programs include applied statistics, economics, education, oceanography and coastal sciences, physics, psychology, and systems science. Details and additional information may be obtained from the graduate coordinator in the appropriate area.

Foreign Exchange Programs

In order to provide students with a variety of culturally enriching experiences, the Graduate School has student exchange programs with foreign universities. Additional opportunities for study abroad are available through other campus offices. For more information, contact the Graduate School.

Requirements for Advanced Degrees

Satisfaction of the minimum requirements of the Graduate School, as stipulated in this publication, does not relieve graduate students of the responsibility for satisfying any additional requirements deemed appropriate by the graduate faculty of the degree programs in which they are enrolled.

Requirements for the Master's Degree

Programs in liberal arts and social sciences ordinarily lead to the MA degree. Programs in other fields usually lead to the MS degree or to specialized master's degrees.

Hours Required

The minimum requirement is 30 semester hours of graduate work, 24 hours of which must be in course work and six hours in thesis research. In programs not requiring a thesis, the minimum requirement is normally 36 semester hours. At least one-half of

the minimum required credit in the student's master's program must be in courses at or above the 7000-level. Transfer work from other institutions may not be counted toward this requirement. Six hours of thesis credit will be counted as work above the 7000-level. Students pursuing a 36-hour non-thesis option must complete a minimum of 18 hours in courses numbered at or above 7000. A student's efforts will be concentrated in one major field, but a department may require a minor of six or more semester hours of credit in one or more related fields.

A maximum of 12 semester hours of transfer credit from other schools and/or credit taken while classified as an LSU extension or non-matriculating student may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. See "Transfer of Credit" under "Graduate School Regulations" in this chapter.

Application for Degree

Early in each semester or summer term there is a deadline for submitting the "Application for Degree" to the Graduate School. Master's candidates are required to submit the "Application for Degree" form along with the "Master's Application for Degree" forms. On these forms, a student lists all course work taken that applies toward the degree. Submission of the application carries with it the implication that the student intends to graduate that semester. If circumstances prevent graduation, a "Request for Degree Update" form must be submitted to the Graduate School by the designated application for degree deadline for the next semester in which the student plans to graduate.

Time Limit

Programs for master's degrees must be completed within five years from entrance into a degree program. Credit for individual courses taken at LSU more than five years before the termination of a program may be revalidated by the student's graduate committee through an examination. This examination may be oral, written, or both oral and written, depending on the requirements of the department concerned. The documentation of such an examination must be signed by members of the committee and the department's graduate advisor and reported to the Graduate School on the "Master's Course Revalidation form" before the request for the student's final examination will be approved. Students are responsible for verifying if their department has a revalidation policy. No more than 50 percent of the courses in a student's program may be revalidated and counted toward the degree requirements. For regulations regarding time limits and eligibility of transfer work, see "Transfer of Credit" under "Graduate School Regulations".

The Thesis and the Master's Committee

In most departments, the preparation of a thesis is an important element in the program leading to the master's degree. The master's thesis should demonstrate capacity for research, originality of thought, and facility in organizing materials. The thesis must be acceptable in subject matter and exhibit creditable literary workmanship. At least six semester hours of thesis credit are required for the master's degree with the thesis option. For additional information concerning thesis preparation, consult the electronic thesis and dissertation guidelines available at etd.lsu.edu/.

Final acceptance of the master's thesis rests with a committee of three or more members of the graduate faculty nominated by the chair of the major department and appointed by the dean of the Graduate School. See the "Graduate Faculty" section of this chapter for definitions of full, associate, and affiliate members of the graduate faculty.

The major professor, who must be from the major department, is designated as chair or co-chair of this committee. If either an adjunct or a non-tenure-track faculty member is the major professor, a full-time tenured or tenure-track graduate faculty member must co-chair the committee. Other committee members may be from the major department or from other pertinent departments. If there is an external minor, one committee member must represent the minor department. Both thesis and non-thesis committees must include at least one full member of the graduate faculty, and at least one-half of the committee's graduate faculty members must be full-time tenured or tenure-track faculty members at LSU. Any additions to or changes in the makeup of this committee must be approved in advance by the dean of the Graduate School. The dean of the Graduate School may serve as a member of any committee or may appoint additional members.

Non-thesis Programs

Some departments offer optional non-thesis programs for the master's degree. Departmental websites indicate whether this option is available.

Comprehensive Final Examination

Candidates for master's degrees in most programs are required to pass a comprehensive final examination. This examination may be oral, written, or both oral and written, depending on the requirements of the department concerned. In non-thesis programs, greater weight is ordinarily given to this examination, and it will probably be broader in scope than the examination given to a student who completes a thesis.

At least three weeks prior to the time this examination is to be given (and by the current semester deadline if the student is a degree candidate), the student's department should submit to the Graduate School a "Request for Final Exam" form. Normally, a candidate for the master's degree will take the final examination during the semester in which he or she plans to graduate. If a student wishes to take the final examination at an earlier date, the student's committee must furnish the graduate dean with a sound academic reason for doing so. To be eligible to take the final exam, the student must have a 3.00 cumulative average and must be registered for at least one hour of graduate coursework (if in a non-thesis degree program) or thesis research (if writing a thesis). Exams may be taken anytime the university is open for business. In non-thesis programs, all degree requirements must be met no later than the deadline in the regular semester following the final examination.

This committee, nominated by the chair of the student's major department and appointed by the dean of the Graduate School, is ordinarily composed of those faculty members who served as the student's thesis committee. For the non-thesis option, the committee must consist of three or more members of the graduate faculty nominated by the chair of the major department and appointed by the dean of the Graduate School. At least one member of the examining committee must be a full member of the graduate faculty. The major professor serves as chair or co-chair of the examining committee. Representatives of the graduate faculty may be added by the dean.

For students defending a thesis, the examining committee must have copies of the thesis at least two weeks prior to the final examination.

In order for a student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards and the thesis approval sheets submitted to the Graduate School.

Timely Completion of the Degree after Final Exam

Approved theses, including Graduate School corrections, must be submitted to the Graduate School no later than the deadline for submission of approved theses in the regular semester following the final examination. As with thesis candidates, non-thesis students who pass the final exam in one semester must complete degree requirements no later than the next regular semester following the final exam. A final examination may be voided by the dean of the Graduate School for failure to submit the approved thesis in a timely manner as described.

Second Master's Degree

Students who wish to obtain a second master's degree from the university must meet all academic and residence requirements set by the Graduate School and the department concerned. A maximum of six hours from the first degree may be applied toward the second degree. These hours must be listed on the "Application for Degree" for the second master's degree under the "Transfer or Petitioned Credits" section.

Accelerated Master's Degree Program

The accelerated master's program is open to superior undergraduate students who have completed at least 60 semester hours of credit (including AP credit) with a grade point average of at least 3.50 for all work taken at LSU. To be eligible, transfer students must have a 3.50 average on all undergraduate work taken prior to attending LSU and must complete at least one semester at LSU with a 3.50 GPA.

Acceptance into the accelerated program requires approval from the following: (1) chair of the undergraduate department in which the student is enrolled; (2) dean of the college in which the student is enrolled; (3) chair of the department or the coordinator of the interdisciplinary program in which the student proposes to work toward the master's degree; and (4) dean of the Graduate School. The requested approvals will be given as signatures on a form designed specifically for this program. It is the responsibility of the chair or coordinator of the graduate program to appoint the student's graduate faculty advisory committee.

Other admission requirements for graduate study, such as the GRE and the GMAT, will be waived until the student receives the baccalaureate degree and is ready to enter the Graduate School. Until that time, admission into the accelerated program will constitute provisional admission to the graduate program. Students will register as graduate students only after receiving the baccalaureate degree and satisfying departmental and the Graduate School admission requirements.

Continuing eligibility for the accelerated master's program will require maintenance of a 3.50 average in all courses that apply to the undergraduate degree and a 3.00 average for all graduate course work.

Students who wish to obtain a master's degree under this program must meet all academic and residence requirements set by the Graduate School and the department concerned. Requirements for the baccalaureate degree will not be affected.

Students may take a maximum of half of the required hours for the master's degree while enrolled as undergraduates. These hours may be applied toward the master's degree, provided a GPA of 3.00 in graduate coursework is maintained and provided none of these hours apply toward the baccalaureate degree.

A student may wish to apply some graduate coursework toward the undergraduate degree. In such instances, the graduate committee can alter the distribution of course work and independent study required for the master's degree. No course credit can be applied toward more than one degree.

Requirements for the Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) is the highest earned degree offered by universities. It is conferred only for work of distinction in which the student displays decided powers of original scholarship and only in recognition of marked ability and achievement. Nothing in the following summary of minimum standards should be construed to imply that the degree will be granted merely in recognition of faithful performance of prescribed work.

Satisfaction of the minimum requirements of the Graduate School, as stipulated in this section, in no way relieves a doctoral student of responsibility for satisfying any additional requirements deemed appropriate by the graduate faculty of the degree program in which he or she is enrolled. The basic requirements are: (1) students must exhibit unmistakable evidence of mastery of a broad major field. Such evidence is ordinarily provided by passing a general examination; and (2) students must prove ability to complete a significant program of original research by preparing a dissertation embodying creative scholarship and by passing a rigorous final examination. The dissertation must add to the sum of existing knowledge and give evidence of considerable literary skill.

Course Work

While the Doctor of Philosophy degree cannot be earned solely by passing courses, the program of work prescribed by a department ordinarily provides for a substantial amount of course work, equivalent to a minimum of 54 hours including dissertation hours, beyond the requirements for the baccalaureate degree. Some departments require considerably more coursework. At least one-third of credits toward a graduate or a post-baccalaureate professional degree are earned through instruction offered by the institution awarding the degree.

Although coursework requirements are concentrated in the student's major field, a certain amount of work may be required in one or two minor fields. If there is minor course work, the Graduate Council recommends that the minor field requirement include at least one 7000-level course. The course work and the number of hours needed to satisfy the minor field requirement are determined by the graduate faculty in the minor department. The Graduate School recommends that the minimum minor hour requirement be no less than nine hours.

Academic Course Plan

The Graduate School does not require a formal qualifying examination or procedure for doctoral students, although departments may, if they wish, administer such examinations or procedures. A student is eligible to work toward a doctoral degree beginning with the semester in which he or she is formally admitted into a doctoral program.

After meeting with the student, the advisory committee will be required to approve a departmental-level academic course plan listing all curricular requirements for the degree during the first or second semester following the student's formal admission to the doctoral program. If the student already has a master's degree, the departmental-level academic course plan should be formulated during the first semester; if the student is bypassing the master's degree, formulation may be delayed until the second semester. The advisory committee, which should include at least one representative from the minor field (if appropriate), is not necessarily identical to the student's committee for the general examination. The suggested general examination committee will be approved when the request for the general examination is submitted to the Graduate School.

The student's departmental-level academic course plan is subject to Graduate School policy and departmental requirements. Graduate course work taken at another institution with grades of "A," "B," "P," and "S," or the equivalent, is not subject to the policy on transfer of credit for the master's degree, and may be included in the departmental-level academic course plan if accepted by the department and the student's advisory committee.

Advisory Committee

During the entire period of work toward the doctorate, the student's program is directed by a special advisory committee. This advisory committee consists of three members of the graduate faculty. See the "Graduate Faculty" section for definitions of full, associate, and affiliate members of the graduate faculty. After the outlines of the program have assumed more definite form and the direction of research has been clearly established, this special committee is enlarged to three or more members with the addition of the Graduate School Dean's Representative. This enlargement must take place prior to the general examination.

The full advisory committee must comprise at least three members of the graduate faculty, including the major professor, who acts as chair or co-chair and who must be from the major department. If either an adjunct or a non-tenure track faculty member is the major professor, a full-time tenured or tenure-track graduate faculty member must co-chair the committee.

At least one-half of the graduate faculty on doctoral committees must be full-time tenured or tenure-track faculty at LSU. A minimum of two of those faculty members must be from the student's major department and at least one of whom must be a full member of the LSU graduate faculty. The remaining members may be from the major department or may be from outside the department if pertinent to the student's area of concentration, with the proviso that at least one of the remaining members must be a full member of the graduate faculty.

Any declared outside minors require representation, either from among the first three members of the committee or by additional appointments to the committee. The dean of the Graduate School may serve as an *ex officio* member. Members of the special advisory committee are nominated by the chair of the major department and appointed by the dean of The Graduate School, who may make any changes deemed desirable.

The dean of the Graduate School appoints a member or members of the graduate faculty to serve on doctoral general and final examination committees. These individuals represent the dean and the entire graduate faculty. They are full voting members of the committee with all the rights and responsibilities of the other committee members. In the case of final examinations, it is the responsibility of the committee chair to ensure that the dean's representatives receive copies of dissertations as soon as possible, but no later than two weeks before the date of the examination.

General Examination

It is in the best interests of students that those with high probability of continuing successfully toward a doctoral degree be identified as soon as possible. Doctoral students are, therefore, required to pass a rigorous qualifying examination or the general examination within three calendar years (36 months)—or a period deemed equivalent for part-time students—of their classification as doctoral students. An exception may be made to this if a department notifies the Graduate School.

Whether a qualifying or general examination is used to meet the above requirement, the procedure should be sufficiently rigorous so as to provide reasonable confidence that the student who passes it may proceed successfully to a doctoral degree.

A student becomes eligible to take the general examination after demonstrating to the advisory committee adequate academic and professional aptitudes. Exams may be taken anytime the university is open for business. Students on probation will not be allowed to take the general examination. Students must be registered for a minimum of one to three hours of credit during the semester in which they are taking the general exam.

There is no Graduate School requirement that doctoral students pass a pre-general examination before becoming eligible to take the general examination. However, since pre-general examination requirements may be retained by individual departments, students should check with the appropriate departmental office concerning this requirement.

A request for the general examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date. This request must state the time and place proposed and the names of faculty members nominated to serve as the examining committee. Under ordinary circumstances, these will be the members of the enlarged advisory committee and one or more representatives of the graduate faculty will be appointed by the dean of the Graduate School. Any additions to or changes in the makeup of this committee must be approved in advance by the dean of the Graduate School. At this time the final departmental-level academic course plan should be completed and submitted to the Graduate School with the "Request for General Exam."

The general examination is ordinarily the most rigorous test in the entire doctoral program. In order for the student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards submitted to the Graduate School.

The examination may be oral, written, or both oral and written, according to the rules of the major department. However, the minor department (if an outside minor has been declared) retains the right to decide the format of its part of the examination. The examination must be comprehensive enough to demonstrate expert competence over broad segments of the major field and a high degree of familiarity with the content of and current progress in one or more minor fields (if appropriate).

The general examination should be regarded as the culmination of a student's program in course work. In most cases, the remaining time spent obtaining the degree is to be devoted to concentrated work on the dissertation and preparation for the final examination. When a student passes the general examination, examination cards should be completed in duplicate and forwarded by faculty and staff only to the Graduate School.

Continuous Registration Requirement

Doctoral candidates must maintain continuous registration for a minimum of three semester hours of credit each regular semester (excluding summers) from the completion of the general examination to the end of the semester in which an approved dissertation is submitted to the Graduate School.

The dean of the Graduate School may exempt a student from the continuous registration requirement upon departmental certification that the student is in absentia from the university and is not drawing directly upon university resources. Exemptions are intended to accommodate students whose dissertation research requires extended periods of absence for field work in distant archives and laboratories; exemptions are not intended for students who have accepted positions as employees in business, industry, or education.

Dissertation

Students who have passed the general examination normally direct most of their energies toward preparation of the dissertation, which must be a contribution to knowledge in the major field of study. The dissertation must demonstrate a mastery of research techniques, ability to do original and independent research, and skill in formulating conclusions that in some way enlarge upon or modify accepted ideas.

The form of the dissertation must be in accordance with the instructions in the electronic thesis and dissertation guidelines available online at etd.lsu.edu.

LSU Alumni Association Distinguished Dissertation Award

The Distinguished Dissertation Award, consisting of \$2,000 and a certificate, is presented annually to two doctoral students whose research and writing epitomize superior scholarship. One award is designated for a student in the arts, humanities, or social sciences and one for a student in science, engineering, or technology. These awards are made each spring in conjunction with the Distinguished Research Master Award.

Final Examination

A request for the final examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date or by the current semester deadline, if the student is a candidate for a degree (see the academic calendar for all pertinent dates). This request must specify the major and minor fields (if appropriate), dissertation title, time and place proposed for the examination, and nominations for the examining committee. The examining committee, including the dean's representative, must have copies of the dissertation at least two weeks prior to the final examination. Exams may be taken anytime the university is open for business. The student must be registered for dissertation research hours (a minimum of three hours during the fall and spring semester or one hour during summer).

Permission to hold the final examination will be granted by the dean of the Graduate School only after all the foregoing conditions are satisfied and three (3) calendar months have elapsed since the student passed the general examination.

The dean of the Graduate School will approve the final examination committee. In most cases, it will consist of the student's special advisory committee or a similarly constituted group to which one or more additions may have been made as representatives of the dean and the graduate faculty. Any additions to or changes in the makeup of this committee must be approved in advance of the examination.

Although the final examination is traditionally conducted as an oral test primarily concerned with the dissertation and related problems, the committee determines procedure and content, which may extend into subject matter related to major and minor fields (if appropriate), even though well removed from topics suggested by the dissertation.

In order for the student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards and the approval sheets submitted to the Graduate School.

Timely Completion of the Degree after the Final Exam

Approved dissertations, including Graduate School corrections, must be submitted to the Graduate School no later than the deadline for submission of approved dissertations in the regular semester following the final examination. A final examination may be voided by the dean of the Graduate School for failure to submit the approved dissertation in a timely manner as described.

Application for Degree

Early in each semester or summer term, there is a deadline for submitting the "Application for Degree" to the Graduate School. Doctoral candidates are required to submit the "Application for Degree" form.

Submission of this form carries with it the implication that the student intends to graduate that semester. If circumstances prevent graduation, a "Request for Deree Update" form must be submitted to the Graduate School by the designated deadline for the semester in which the student plans to graduate.

Certification of Completion of Requirements

Upon timely submission of the "Application for Degree," when the student has passed the final examination with no more than one member of the committee dissenting, and upon submitting a dissertation in acceptable form to The Graduate School, the student will be certified to the LSU Board of Supervisors by the dean of the Graduate School as having fulfilled all requirements for the degree of Doctor of Philosophy. This certification takes place at the next commencement, at which time the degree is conferred.

Time Limit

The program for the doctoral degree must be completed within seven years from the time a student is classified as a doctoral student. This time limit may not be exceeded except by special permission of the advisory committee, department chair and college dean. A formal meeting of the advisory committee must be held to approve any time limit extension. No less than three calendar months may elapse between the passing of the general examination and the completion of all requirements for the doctoral degree.

Requirements for the Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) is a professional degree in music. The coursework, residence requirements, and examination sequences are similar to those for the PhD degree. Major differences in the two programs are in the dissertation and minor field requirements (if appropriate).

For the special admission and course requirements for this degree, consult the School of Music.

FULFILLING DOCTORAL DEGREE REQUIREMENTS	
Prepare Departmental-Level Academic Course Plan	<ul style="list-style-type: none"> • During the first semester after the master's degree is awarded or during the first full year of full-time graduate study for a student not taking the master's degree.
Request General Examination	<ul style="list-style-type: none"> • After completing most coursework. • Request for the general examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date.
Request Final Examination	<ul style="list-style-type: none"> • At least three calendar months after passing the general examination. • Request for the final examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date or by the current semester deadline, if the student is a candidate for the doctoral degree.

Graduate Faculty

Graduate Faculty Membership Status:

Graduate faculty membership status is indicated by a number plus a letter or just by letter as follows:

- (M) Full member
- (7M) Seven (7) year member
- (6A) Six (6) year associate member
- (3A) Three (3) year associate member
- (3F) Three (3) year affiliate member
- (3P) Three (3) year professional member
- (EM) Emeritus full member status
- (EA) Emeritus associate member status
- (O) Ex-officio

Full descriptions of graduate faculty status can be found [here](#).

Please note that graduate faculty status is subject to change. Current graduate faculty status can be checked [here](#).

University Policy Statements

This section includes links to the full text of two university policy statements that are of special interest to graduate students. PS-21 governs the entire graduate assistantship program; PS-85 deals specifically with the preparation of teaching assistants for instructional duties.

Other applicable Policy Statements, Permanent Memoranda, and additional rules and regulations are listed on the LSU Website. Students should pay particular attention to PM-64 and PS-106.

PS-21 • Graduate Assistantships

Overview

The primary mission of the LSU Graduate School is to promote excellence in graduate education. Part of this responsibility mandates that The Graduate School develop policies governing the appointment and evaluation of graduate assistants (GAs) and monitor their implementation by employing units.

These policies include setting minimum academic qualifications for holding GA appointments, establishing appointment and renewal procedures, setting average workloads, and reviewing stipend levels and ranges.

This policy statement outlines procedures and guidelines affecting the graduate assistantship program. For special policies on the preparation of teaching assistants for instructional duties in classrooms and laboratories, see PS-85, Preparation of Teaching Assistants.

See full text of PS-21 [here](#).

PS-85 • Preparation of Teaching Assistants

Overview

To lay out principles and requirements for the assignment, preparation, supervision, and evaluation of graduate teaching assistants at Louisiana State University.

Excellence in undergraduate and graduate instruction is central to the mission of the university. Preparation in pedagogy in a variety of teaching situations is an integral part of the education of graduate students. Accordingly, the graduate faculty must be committed to designing appropriate programs for the assignment, preparation, supervision, and evaluation of graduate teaching assistants with the aim of enhancing graduate student preparation and undergraduate learning. This policy statement should be read in the context of the general institutional policy on graduate assistantships as set forth in PS-21.

See full text of PS-85 here.

Graduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Graduate Students in addition to their academic course of study.

School of Veterinary Medicine

For information regarding the GRADUATE PROGRAM in VETERINARY CLINICAL SCIENCES, [click here](#).

The LSU School of Veterinary Medicine admitted its first students to the professional curriculum during the 1973-74 academic year. The original entering class consisted of 36 students, all residents of Louisiana. Class size has increased significantly in recent years.

The school participates in the Southern Regional Education Board's (SREB) program for education in veterinary medicine. Training contracts negotiated through SREB provide a limited number of entering spaces for qualified candidates from Arkansas. A limited number of entering spaces is also allocated for highly qualified nonresident applicants under the school's special admission policy.

The AVMA Council on Education (COE) is the national accrediting agency for veterinary medical education in the United States. The AVMA COE assures that minimum standards in veterinary medical education are met by all AVMA-accredited colleges or schools of veterinary medicine, and that students enrolled in those colleges or schools receive an education that will prepare them for entry-level positions in the profession. The LSU program has met all essential requirements for an acceptable college or school as established by the AVMA COE. Full accreditation was granted in 1977 and reaffirmed in 1984, 1991, 1998, 2005, 2010, and 2012.

The School of Veterinary Medicine offers the professional degree, Doctor of Veterinary Medicine. Interdepartmental Master of Science and Doctor of Philosophy degree programs in veterinary medical sciences are offered through the Graduate School.

The Professional DVM Program in Veterinary Medicine

Admission Requirements

Students contemplating a career in veterinary medicine should acquire a sound foundation in the biological and physical sciences and a general knowledge of the arts and humanities in both high school and college. In addition, they should be motivated by a liking for animals, a sincere desire to serve the public, a propensity for the biological and medical sciences, and a deep interest in promotion of the health of animal and human populations. They must have a high aptitude for scientific study and must possess an excellent moral and ethical character.

Candidates for the Doctor of Veterinary Medicine degree must complete a minimum of six years of college education. This includes two or more years of pre-veterinary training and four years of professional training. The pre-veterinary requirements may be completed at LSU or any other accredited college or university offering courses of the quality and content of those prescribed in the *LSU General Catalog*. (See the section of this catalog titled "College of Agriculture" for the pre-veterinary medicine curriculum at LSU.)

The minimum requirement of 66 semester hours, including 20 hours of elective courses, may be completed in two years. Successful completion of a pre-veterinary program does not guarantee admission to the school for professional training. Currently, there are more qualified applicants each year than there are spaces available in the entering class. Instruction in the four-year program is available only through the School of Veterinary Medicine at LSU.

Scholastic achievement is measured by performance in the prescribed pre-professional courses. A minimum grade point average of 3.0 ("A" = 4.00) in these courses is required for consideration for admission. A grade of less than "C" in a required course is unacceptable. Physical education activity courses may not be used as electives for meeting pre-professional requirements. Requirements are not waived in lieu of work experience.

Credit earned through advanced standing is acceptable, but is not used in the computation of the grade point average. Evaluation of the applicant's record in the pre-professional program is made in accordance with LSU procedures. Credit is not granted for College Level Examination Program (CLEP) general examinations. Granting of credit for CLEP subject examinations may be considered in those subjects recommended by various departments of the university upon receipt of test scores indicating the student meets the minimum acceptable scores required by those departments.

Admission Procedures

The following information pertains only to the professional DVM program. Students interested in the MS and/or PhD programs should contact the LSU Graduate School for more information.

Admission to the School of Veterinary Medicine is granted only for the fall semester of each school year and only on a full-time basis. A prescribed number of student spaces is planned for each class and formal application material with all supporting credentials is required of each applicant. Students admitted and enrolled in the school must be capable of satisfactorily meeting all requirements of the curriculum in veterinary medicine. Eligible candidates are chosen to be interviewed by members of the Faculty Committee on Admissions and Scholastic Standing and are carefully selected to ensure that they are properly motivated, competent to undertake the rigorous courses of professional study, and capable of meeting the demands of a professional career.

The Faculty Committee on Admissions and Scholastic Standing is responsible for determining the application procedure and for selecting the entering class in the professional curriculum. All pre-professional requirements must be completed by the end of the spring semester before fall matriculation in the LSU School of Veterinary Medicine. Formal applications must be submitted no later than early October. (Please check the LSU SVM Admission website at www.vetmed.lsu.edu/admissions for the specific deadline date.) Applications must be submitted through the Veterinary Medical Colleges Application Service (VMCAS). Along with the VMCAS application materials, a supplemental application must be completed and submitted directly to the School of Veterinary Medicine's Admissions Office, as well as all official undergraduate/graduate transcripts, GRE scores, and letters of recommendation. Please visit the LSU SVM's Admission Office's website at www.vetmed.lsu.edu/admissions for more details on the application process. Students reapplying must submit a completely new application for each application period, including the VMCAS application, all official transcripts, GRE scores, supplemental applications, etc.

Academic and non-academic qualifications are considered in the selection process. Selection for admission is based on the sum of the objective and subjective scores. The exact combination of each component to the total score may vary slightly from year to year and is determined by the admissions committee and the dean.

- An objective score that comprises approximately 65 percent of the final calculation is determined by the GPA in all required courses (approximately 29 percent), the GPA in the last 45-60 hours (approximately 18 percent), and the score on the GRE (approximately 18 percent).
- A subjective score comprises approximately 35 percent of the final calculation and is determined by a review of the applicant's folder (approximately 15 percent), an interview (for Louisiana and Arkansas residents only – approximately 10 percent), and a holistic assessment by the admissions committee.

The objective evaluation is based on scholastic achievement and standardized test scores. Official transcripts of college course grades are examined to determine scholastic achievement. The total objective score is derived from the grade point average on required courses, the grade point average on the most recent 45-60 semester hours of course work, and the results of the GRE. New knowledge, especially in the sciences is accruing at a rapid rate, so if a student has completed the pre-professional requirements several years prior to application, records will be carefully scrutinized. It is advised that all required science courses should be completed within six calendar years immediately prior to application. Within the last six years, organic chemistry, at least one biology (preferably microbiology), and one general physics course must be completed.

In addition to the specific prerequisite courses, also factored into the Required Course GPA are any other animal science, physical science, or biological science courses that are taken and in which an "A" grade is earned. Social science, humanities, business, engineering, kinesiology, and any general education courses are NOT calculated into the required course GPA; however, these courses (with the exception of kinesiology courses) will still be used for the last 45 credit hours as seen below.

The subjective evaluation of applicants is based on non-academic qualifications considered relevant to the determination of the applicant's prospective performance in the veterinary medical curriculum and in the practice of veterinary medicine. Motivation, maturity, attitude, interest, and other characteristics will be evaluated for all qualified candidates, along with work experience, familiarity with animals, and reference information submitted in support of the application. These qualities are evaluated by two separate committees. The first committee reviews the supporting documents (autobiography, letters of recommendation, transcripts, work experience, and familiarity with animals). The second committee evaluates the individual through a personal interview. These appraisals result in an average subjective score which is added to the objective score to produce the total numerical evaluation of the candidate. Through this process, the professional judgment of several faculty members is included in

arriving at a final decision of recommended students for the new class. Interviews are not granted to every Louisiana and Arkansas applicant, and only select out-of-state applicants will be invited to interview.

The final decision rests with the dean of the LSU School of Veterinary Medicine. The Faculty Committee on Admissions and Scholastic Standing makes their recommendations to the dean who then finalizes the offers of admission.

Under exceptional circumstances, a limited number of applicants not selected under the above criteria may be admitted. Factors to be considered by the Faculty Committee on Admissions & Scholastic Standing include undergraduate experience, GRE score, advanced academic work, work experience, or participation in special educational programs, as well as those special attributes possessed by the applicant that add to the cultural, educational, and/or geographical diversity of the entering class.

Please visit the School of Veterinary Medicine's Admission Office website at www.vetmed.lsu.edu/admissions for more information on admission requirements, residency, classifications, minimum prerequisites, admissions procedures, statistics, important dates and deadlines, and much more.

Minimum Prerequisites for Admission (66 sem. hrs.)

Pre-veterinary students are encouraged to familiarize themselves with admission requirements for the professional program at the School of Veterinary Medicine. Students should seek knowledgeable pre-veterinary counselors and/or advice from the LSU School of Veterinary Medicine's Admission Office (admissions@vetmed.lsu.edu) when enrolled in pre-professional programs other than at LSU. A minimum of 66 total semester hours is required for consideration for admission into the professional DVM program. This must include the 46 semester credit hours of the courses listed below. More specific details regarding course descriptions can be at the School of Veterinary Medicine Admissions website at www.vetmed.lsu.edu/admissions.

Biological Science, twelve sem. hrs. • Must include at least eight sem. hrs. (two-semester course sequence with laboratory) in introductory zoology or general biology at a level appropriate for premedical students. Must also include at least four sem. hrs. (one-semester course with laboratory) in microbiology at a level appropriate for pre-medical students. LSU courses—BIOL 1201, BIOL 1208, BIOL 1202, BIOL 1209, and BIOL 2051.

General Chemistry, eight sem. hrs. • Must include laboratory and must be at a level for science or engineering majors. LSU courses—CHEM 1201, CHEM 1202, CHEM 1212.

Organic Chemistry, three sem. hrs. • Must cover aliphatic and aromatic compounds with an emphasis on the biological aspects of organic chemistry. LSU course—CHEM 2060

Biochemistry, three sem. hrs. • Must include three sem. hrs. of basic concepts and an introduction to the nature and physiological uses of natural substances. LSU course—BIOL 2083.

Mathematics, five sem. hrs. • Must be at the college algebra/trigonometry level or higher. LSU courses—MATH 1021, MATH 1022. Students who qualify for more advanced math may substitute MATH 1023 (5 sem. hrs.) for MATH 1021 and MATH 1022.

Physics, six sem. hrs. • Must be at a level for science majors and must include mechanics, heat, sound, light, electricity, magnetism, and topics in modern physics. LSU courses—PHYS 2001, PHYS 2002.

English Composition, six sem. hrs. • Must include six sem. hrs. of English composition. LSU courses—ENGL 1001 and/or ENGL 2000.

Speech Communications, three sem. hrs. • Must include three sem. hrs. of a public speaking or interpersonal communication course. LSU courses—CMST 2010, CMST 2060, or CMST 1061.

LSU students in the College of Agriculture should contact his/her undergraduate academic advisor to ensure that the speech communication course taken meets the student's degree curriculum requirements.

In selecting the remaining required courses for admission to the professional program, applicants should consider the following:

- The objective of the DVM program is to offer a well-rounded curriculum in veterinary medical education enabling the graduate to select from a wide range of professional opportunities. The selection of elective courses in the pre-professional curriculum should reflect the interests and objectives of the candidate. Potential applicants should plan their programs with the recognition that these elective courses provide the only formal opportunity in the college years to obtain a broad general education.
- Applicants who have completed advanced preparatory courses in high school are, in all probability, qualified to complete the prerequisites in four semesters. These students are encouraged to take higher level university courses when so permitted. Applicants who are inadequately prepared may find it advantageous to complete the pre-veterinary requirements over a longer period.
- Although the primary objective of the applicant may be to complete the pre- veterinary requirements, those who have not previously obtained a baccalaureate degree are encouraged to plan for alternative career possibilities through a degree-granting program that has similar course requirements. Several LSU curricula include all of the minimum mandatory requirements.

Many other curricula that do not specify all of the requirements allow them as electives. Because not all applicants will gain admission to the School of Veterinary Medicine on the first attempt, they should continue in degree programs while making themselves more competitive in subsequent years. Some students may elect to complete a baccalaureate degree in order to pursue graduate training during the first and second summers of the professional program.

- Since applicants must take the GRE in the fall preceding application or earlier, those students following a four-semester program must complete this test only four weeks after beginning the sophomore year. Appropriate preparation and the selection of a curriculum that contributes to an acceptable score are strongly suggested.

Students who are enrolled at accredited institutions other than LSU must determine that courses taken conform in content and quality to descriptions contained in the latest issue of the *LSU General Catalog*. If there are any questions regarding equivalency of courses, please contact the School of Veterinary Medicine's Student Affairs Office by e-mail (svmadmissions@lsu.edu) or telephone (225-578-9537).

All requirements must be completed by the end of the spring semester of the year in which admission is sought. All application materials must be received by the appropriate deadlines. Application materials received after the given deadlines will not be accepted, and will result in the applicant being removed from consideration. Please visit the School of Veterinary Medicine's admissions website at www.vetmed.lsu.edu/admissions for application deadlines.

Information concerning LSU's pre-veterinary medicine program is contained in this *LSU General Catalog* or may be obtained from the dean of the College of Agriculture.

The Graduate Program in Veterinary Medicine

The School of Veterinary Medicine offers advanced studies in a variety of contemporary biomedical sciences leading to an MS or PhD degree (graduate academic programs) and specialized advanced professional training in one or more clinical specialties of veterinary medicine (graduate professional programs). Specific research training opportunities vary in each of the three departments and are summarized below by department. All aspects of the graduate academic program are in compliance with current regulations and requirements of the LSU Graduate School. The school's three departments have some additional distinct requirements. Graduate professional programs in some clinical sciences, pathology, and laboratory animal medicine may also require completion of a graduate degree.

Graduate Academic Programs

The graduate academic program in veterinary medical sciences offers both the MS and PhD degrees specializing in a variety of research areas, all requiring a thesis or dissertation.

All aspects of the graduate program in veterinary medical sciences (e.g., hours required, composition of graduate advisory committees, general and comprehensive final examinations, etc.) are in compliance with the current "General Graduate School Regulations" and "Requirements for Advanced Degrees."

Areas of Specialization

Graduate degrees (as indicated in parentheses) are offered by the School of Veterinary Medicine in its three departments. These include: the Department of Comparative Biomedical Sciences (MS, PhD), the Department of Pathobiological Sciences (MS, PhD), and the Department of Veterinary Clinical Sciences (MS, PhD).

Courses in the professional curriculum are designated as Veterinary Medicine (VMED) courses, rather than departmental courses, because of the integration of the disciplines. These courses, all at the 5000 level, are described in the School of Veterinary Medicine Bulletin. Prerequisite for enrollment in these courses is formal admission to the professional curriculum in the School of Veterinary Medicine. All courses must be taken in the proper sequence, as each is a prerequisite for the succeeding course. The following courses are utilized by all concentrations in the Veterinary Medical Sciences graduate program: VMED 7004, VMED 8000, VMED 8900, VMED 9000.

Research/Faculty Resources

Research and scholarly activity are fundamental to the role of the faculty and essential to the attainment of the university's goals of academic excellence and national prominence. Research is a crucial part of graduate instruction and has profound effects upon the currency and vitality of undergraduate education. This exploration of the boundaries of knowledge is undertaken by faculty in the various departments and by the research units included in this section.

Office of Research & Economic Development

VICE CHANCELLOR FOR RESEARCH & ECONOMIC DEVELOPMENT	Kalliat T. Valsaraj
OFFICE	134 David Boyd Hall
TELEPHONE	225-578-5833
FAX	225-578-5983

Center for Computation & Technology

DIRECTOR	J. "Ram" Ramanujam
OFFICE	216 Johnston Hall
TELEPHONE	225-578-4012
FAX	225-578-5362
WEBSITE	www.cct.lsu.edu
E-MAIL	info@cct.lsu.edu

The *Center for Computation and Technology* was created in response to a funding initiative created by Governor Mike Foster and the Louisiana Legislature to invest in university research and teaching programs as engines of economic development.

The center draws on the established areas of expertise at LSU in computer science, engineering, mathematics, physics, biological sciences, mass communication, coastal studies, information systems and decision sciences, and digital media and experimental music via the AVATAR Program (Arts, Visualization, Advanced Technologies, and Research). By uniting researchers from diverse disciplines, ideas and expertise are disseminated across LSU departments to foster knowledge and invention. Likewise, this interdisciplinary research relationship invigorates computational science and technology, providing essential tools and resources to accelerate discovery.

CCT supports advanced cyberinfrastructure, high-speed networks, high-performance computing, advanced data storage and analysis, and hardware and software development for both the university and the state of Louisiana in academia and industry.

The center also looks to create new areas of research excellence in order to provide the state and nation with graduates who are equipped to handle the growing technology infrastructure.

Center for Energy Studies

EXECUTIVE DIRECTOR	Allan Pulsipher
OFFICE	1101 Energy, Coast & Environment Building
TELEPHONE	225-578-4400
FAX	225-578-4541
WEBSITE	www.enrg.lsu.edu
E-MAIL	ces@lsu.edu

The Center for Energy Studies provides analysis, research, information, and technology transfer on energy and environmental issues that are important to Louisiana. The center is composed of divisions for Policy Analysis, Energy Information and Data, Minerals Processing Research, and Research and Development.

Also reporting through the center's executive director are the *Louisiana Geological Survey*, which includes the Basin Research Institute as its Oil & Gas Division and the *Radiation Safety Office*. Although independent, these units have either a state legislative or federally mandated mission, an applied resource policy focus, and a strong commitment to public service. Neither the center nor its associated independent units have academic programs, but they frequently employ graduate assistants and work with staff or faculty from academic units on projects of mutual interest.

The center, created by the Louisiana Legislature in 1982, is the state's only officially recognized energy studies center for public higher education. The center conducts, encourages, and facilitates energy-related research and analysis concerning problems and issues affecting Louisiana's economy, environment, and citizenry. Whether conducted by its staff or by others it supports, the goal of the center is to provide a balanced, objective, and timely treatment of issues with potentially important consequences for Louisiana. The center provides information and analysis that respond to the needs of the legislature, public agencies, and business and civic groups.

Louisiana Geological Survey

DIRECTOR/STATE GEOLOGIST/PROFESSOR- RESEARCH	Chacko John
OFFICE	3079 Energy, Coast & Environment Building
TELEPHONE	225-578-5320
FAX	225-578-3662
WEBSITE	www.lgs.lsu.edu
E-MAIL	cjohn@lsu.edu

Founded officially in 1934 by Act 131 of the Louisiana legislature, the Louisiana Geological Survey (LGS) is the premier geological research institution in the state of Louisiana which had its beginnings in 1869. Always housed on the campus of Louisiana State University (LSU) the LGS was originally part of the Louisiana Department of Conservation, and later was a division of the Louisiana Department of Natural Resources. It was transferred by the Louisiana legislature's HB 2353 to LSU in 1997 and now reports through the Executive Director of the Center for Energy Studies to the LSU Vice Chancellor for Research & Economic Development.

The LGS carries out applied and fundamental geologic research in the areas of Louisiana's surface and subsurface geology, coastal geology and processes, petroleum geology, alternate energy resources (geopressured-geothermal), environmental geology, mineral resources, and ground water. LGS does statewide geologic mapping, producing maps and reports designed to encourage both economic development and environmental protection. The LGS also studies geologic hazards, including active faulting, producing maps and reports designed to identify such hazards and to minimize their impacts. Earth science educational materials are provided to school teachers when requested. The LGS works cooperatively on research grants and contracts with several state and federal agencies including the Department of Natural Resources, the Department of Transportation & Development, the Office of Emergency Preparedness, the U.S. Geological Survey, and the U.S. Department of Energy.

The *Basin Research Energy Section* of the LGS includes stratigraphic research laboratories; a computer/plotting laboratory; petrographic laboratories equipped for thin-section preparation and carbonate and siliciclastic studies; and conference rooms and storage space. A separate well-log library, a core storage facility with a work lab equipped with saws, and other core processing and photographic equipment are located nearby on campus. The LGS core repository and well log library (called the LGS Resource Center) are an integral part of the *Louisiana Museum of Natural History*. Access to other laboratory facilities for geochemical, isotope, SEM, EM, XRD, sedimentology, and paleontological analyses is available in the nearby Department of Geology & Geophysics.

The LGS has a well-recognized *Cartography Section* that produces maps, atlases, illustrations, slides, LGS publications and exhibits, both in support of LGS research and for other LSU departments and state agencies. The LGS cartography section, well equipped with computer equipment, plotters, and GIS facilities, has produced several maps, including the official state map of Louisiana, an oil and gas map, and a Louisiana Shoreline Change map, 1937-2000. Several maps designed and produced by the LGS Cartographic Section have won national awards.

The *Water and Environmental Section* works primarily on modeling and geologic characterization of the various aquifers in the state, on projects requiring analysis of water from various locations, and effects of major amounts of water withdrawals from the aquifers for industrial and other purposes.

The LGS is the only institution in the state which currently does Geologic Mapping of the State. Derivative maps from geologic maps are utilized by industry for various purposes. This work is carried out by the *Geologic Mapping and Mineral Resources Section*. LGS reviews permits for drilling wells in the coastal and wetland areas of the state in order to reduce environmental impacts associated with drilling and this work is done by the *Geologic Review Section* of LGS.

In performing its applied mission and tasks the LGS is also charged with effectively transferring geological information to the citizens of the state through the production of maps, bulletins, reports, newsletters, sponsored short courses, professional presentations, and publications. The LGS receives and answers a large number of inquiries from the public related to geologic matters, and its publications are available for sale at nominal prices.

Minerals Processing Research Division

DIRECTOR	Ralph Pike
OFFICE	1139 Energy, Coast & Environment Building
TELEPHONE	225-578-3428
FAX	225-578-1476
WEBSITE	www.mpri.lsu.edu
E-MAIL	pik@lsu.edu

The *Minerals Processing Research Division*, supported by funds from federal and state agencies and private organizations, was established at LSU in 1979. The division conducts research on minerals processing, related business and legal issues, and environmental matters.

This research is directed at the chief minerals in the state and region: oil and natural gas, sulfur, salt, and lignite. These mineral resources are among Louisiana's most valuable assets.

Radiation Safety Office

DIRECTOR	Wei-Hsung Wang
OFFICE	112 Nuclear Science Building
TELEPHONE	225-578-2008
FAX	225-578-2094
WEBSITE	www.radsafety.lsu.edu
E-MAIL	weihsung@lsu.edu

Authorization for Louisiana State University and Agricultural & Mechanical College to possess, store, and use sources of radiation is stipulated in a broad-scope Radioactive Material License issued by the Louisiana Department of Environmental Quality, which has vested responsibility from the United States Nuclear Regulatory Commission within the State of Louisiana. The broad-scope license allows the university maximum flexibility in the use of sources of radiation for teaching and research activities through the operation of an internal radiation safety and protection program. Administrative authorization from the university is contained in Permanent Memorandum-30 (*PM-30*). Under the direction and supervision of the Radiation Safety Committee, the Radiation Safety Office is responsible for implementing radiological control policies and ensuring safe practice in order not only to be fully in compliance with the federal and state regulations, but also to assure individual well-being and the integrity of the university.

Approval of the Radiation Safety Office must be obtained for all procurement of licensed radioactive materials and radiation producing equipment, all teaching and laboratory uses, research and development projects, as well as any other activities with potential radiological hazards, all contracts and grant proposals involving sources of radiation, all personnel who will directly use sources of radiation, and all facilities, construction, outfitting, and renovation involving sources of radiation.

The radiation protection program is conducted in such a manner so that radiation exposure to faculty, staff, students, the general public, and the environment will be maintained as low as reasonably achievable and that no radiation exposure will be received without societal benefit. This will be accomplished without hindering legitimate research or realistic teaching objectives. Professional health physicists equipped with a full spectrum of state-of-the-art radioanalytical instrumentation as well as high energy irradiation and neutron activation facilities are available for consultation and research development to support a broad range of radiation applications.

Stephenson National Center for Security Research & Training

EXECUTIVE DIRECTOR	James Fernandez
OFFICE	3160 Pleasant Hall
TELEPHONE	225-578-3299
FAX	225-578-9119
WEBSITE	www.sncsrt.lsu.edu
E-MAIL	info@sncsrt.lsu.edu

The *Stephenson National Center for Security Research & Training* (SNCSRT) has been established to coordinate efforts in security research and training. The university is currently a leader in providing training on anti-terrorism and counter-terrorism techniques and regularly supports projects initiated by state and federal law enforcement agencies. The purpose of the center is to:

- establish a coordinated, university-based system to promote interaction and collaboration toward the common objectives of safety and security;
- coordinate the activities of existing units that focus on security and emergency preparedness;
- create a collaborative structure that incorporates faculty expertise; and
- partner with private and public entities.

National Center for Biomedical Research & Training

DIRECTOR	Thomas Tucker
OFFICE	3128 Pleasant Hall
TELEPHONE	225-578-1375
FAX	225-578-8973
WEBSITE	www.ncbrt.lsu.edu
E-MAIL	info@ncbrt.lsu.edu

The *National Center for Biomedical Research & Training* (NCBRT), *Academy of Counter-terrorist Education* (ACE) at LSU is a primary component of the Stephenson National Center for Security Research & Training (SNCSRT). The NCBRT is a national leader in the development and delivery of a wide range of training programs in the areas of homeland security, domestic and international terrorism, weapons of mass destruction, and high-consequence events. Since 1998, the NCBRT has developed more than 40 courses certified by the Department of Homeland Security for the emergency responder community. Course topics include: prevention and deterrence, tactical operations, law enforcement operations, campus emergencies, emergency response to biological incidents, sampling, and agroterrorism, just to name a few. These courses are delivered year round by NCBRT adjunct instructors to law enforcement, fire and emergency personnel; medical and public health professionals; and local, state, and national lawmakers throughout the United States and its territories.

Stephenson Disaster Management Institute

EXECUTIVE DIRECTOR	Joseph Booth
OFFICE	Business Education Complex, Room 3049
TELEPHONE	225-578-0238
FAX	225-578-8741
WEBSITE	www.sdmi.lsu.edu
E-MAIL	sdmi@lsu.edu

The mission of *LSU's Stephenson Disaster Management Institute* is to save the lives of people and animals by continuously improving the practice of disaster management through leadership in applied research and executive education. Founded in 2007

in response to the aftermath of Hurricane Katrina, SDMI is a part of the Stephenson National Center for Security Research and Training at LSU. SDMI is hosted by the E. J. Ourso College of Business for enhanced collaboration with the private sector community.

The center's goals include:

- bringing business principles and research to bear on disasters;
- producing applied research and disseminating best practices to the business and practitioner communities;
- building partnerships between academic scholars, emergency management practitioners, and the private sector

The institute enhances LSU's ability to focus its existing programs and research capacity on the particular problems of disaster management. SDMI's projects create a collaboration between the public and private sectors to reduce the consequences of disasters by building community resilience.

Carrol L. Herring Fire & Emergency Training Institute

DIRECTOR	Michael Donahue
OFFICE	6868 Nicholson Drive
TELEPHONE	225-334-6300 or 800-256-3473
FAX	225-334-6341
WEBSITE	feti.lsu.edu
E-MAIL	feti@lsu.edu

The Carrol L. Herring Fire & Emergency Training Institute (FETI) is Louisiana's leading agency in providing basic, advanced, and specialized training to fire fighters and emergency service providers. Training centers in Baton Rouge and Minden, combined with a regional staff, enables FETI to deliver nationally recognized courses to individuals, municipalities, the Department of Defense, and private industries in all areas of the state. Courses include instruction in aircraft, structural, marine, and OSHA-approved industrial firefighting, hazardous materials mitigation, and various specialized command and control courses developed at the National Fire Academy. The rescue program offers advanced courses in Urban Search and Rescue, basic rope, confined space rescue, and other specialized technical rescue courses.

Because of the increasing demand for pre-hospital advanced life support care, FETI's *Emergency Medical Services Program* has expanded its course offerings from basic emergency medical care to paramedic, advanced cardiac life support, and pediatric advanced life support. The paramedic course includes extensive study in subject areas including, but not limited to: intravenous/intraosseous therapy, pharmacology, cardiology, and endotracheal (advanced) airway management. The didactic component consists of 500 hours of lecture and lab, while the clinical component requires 630 hours of hospital and ambulance experience under the watchful eye of an assigned preceptor. Upon successful course completion, students are eligible to take the National Registry of EMT's practical and written examination. Once registered, candidates may apply for State of Louisiana certification as an EMT-Paramedic. FETI is currently in the application process for national accreditation of the paramedic course.

The *Firefighter and Emergency Responder Certification Program* offers certification for career and volunteer firefighters at all levels based on the National Fire Protection Association Professional Qualification Standards. The certification procedure, which involves a practical and written evaluation process, is offered throughout the state, both on-demand and on predetermined test dates. The Certification Program is accredited by the International Fire Service Accreditation Congress (IFSAC) and the International Board on Fire Service Professional Qualifications (Pro Board). Additional information about the programs at FETI can be found on the website.

National Center for Disaster Fraud

DIRECTOR	Kathleen Wylie
OFFICE	255 Johnston Hall
TELEPHONE	225-334-4804
FAX	225-334-4707
E-MAIL	kwylie@lsu.edu

The *National Center for Disaster Fraud* (NCDF) was established in 2005 as the Katrina Fraud Task Force with members from 19 federal agencies. Due to the high volume of disaster activity, the Katrina Fraud Task Force became the National Center for Disaster Fraud in 2008. It is currently funded through a Cooperative Agreement between LSU and the U.S. Department of Justice. Fiscal Year 2011 funding level of \$1.1 million includes the interagency agreements from:

- U.S. Department of Justice
- Department of Homeland Security Office of Inspector General
- Recovery & Accountability Transparency Board
- Federal Housing Finance Agency Office of Inspector General

Law Enforcement Online/INFRAGARD

DIRECTOR	Ty Winter
OFFICE	402 Johnston Hall

E-MAIL	twinter@lsu.edu

Law Enforcement Online (LEO) is an online (real-time), controlled-access communications and information sharing data repository. It provides a focal point for electronic Sensitive But Unclassified (SBU) communication and information sharing for federal, state, local, and tribal law enforcement agencies. LEO supports anti-terrorism, intelligence, law enforcement, criminal justice, and public safety communities. LEO currently supports a user base of more than 120,000 account holders.

InfraGard (IG) provides a mechanism for law enforcement entities and private sector members to share data internally and externally with critical infrastructure personnel. The system provides an Internet accessible focal point for electronic SBU communications and information sharing for InfraGard members.

Coastal Studies Institute

DIRECTOR	Samuel J. Bentley
ASSISTANT DIRECTOR	John R. White
OFFICE	Howe-Russell Complex, Old Geology Building, Room 331
TELEPHONE	225-578-2935
FAX	225-578-2520
WEBSITE	www.csi.lsu.edu

E-MAIL

csi@lsu.edu

Coastal Studies Institute, CSI, was established as an interdisciplinary and field-oriented research organization in 1952 to address the US Navy's needs, with long-term funding from the Geography Programs of the Office of Naval Research. Over the years, we have broadened our sources for research support, and CSI has received research funding through competitive grants and contracts from a wide range of federal and state agencies and industrial partners. CSI was expanded and reorganized in 2012, with support from the LSU Office of Research and Economic Development. CSI is now a central organization and point of contact at LSU that focuses on interdisciplinary coastal science and engineering, spanning the expertise of faculty in multiple colleges and schools. We actively promote coastal activities at LSU to state and federal agencies.

Our research is interdisciplinary, including coastal geology, engineering, and oceanography, emphasizing deltaic, shelf, and slope sedimentary environments. Our research capabilities include a wide range of field operations, physical and numerical modeling, and laboratory facilities, from deep-ocean moorings to beach monitoring, wave tanks, physical models, high-performance computing, and biogeochemical analyses. Our primary research goal is to develop scientific knowledge, engineering principles, and planning tools to facilitate a resilient human presence and renaissance on deltaic coasts, which are threatened worldwide by land loss and declining water and sediment supplies. An additional broader goal is to enhance LSU research efforts in coastal and shelf-sea processes and products around the world.

CSI recognizes that sustaining human presence on deltaic coastlines is essential to healthy coastal societies and economies. Accordingly, CSI scientists and engineers work closely with the Coastal Sustainability Studio and other LSU units and faculty with coastal research in social science and economics to foster a fully integrated LSU approach to the study, conservation, and growth of coastal communities and environments.

Intellectual Property, Commercialization & Development

E-MAIL oiip@lsu.edu

The objective of LSU's *Office of Intellectual Property, Commercialization & Development* (OIP) is to commercialize the university's intellectual property—new ideas, inventions, and discoveries. This includes obtaining patents and copyrights and seeking licensees and business partners in the U.S. and worldwide to commercialize that technology for the benefit of society, the university, and the inventors.

Intercollege Environmental Cooperative

DIRECTOR Barry Dellinger

OFFICE 338 Choppin Hall

TELEPHONE 225-578-6759

FAX 225-578-0276

WEBSITE www.srp.lsu.edu

E-MAIL barryd@lsu.edu

The mission of the Intercollege Environmental Cooperative is to facilitate collaborative relationships that span traditional college and disciplinary boundaries and enhance the research, teaching, and public outreach that is necessary to address effectively today's complex second and third generation environmental stakeholders, decision makers, and research sponsors throughout the state, region, and nation.

The Intercollege Environmental Cooperative provides a platform for multidisciplinary and interdisciplinary collaboration among LSU researchers and their partners, improves communication and exchange of ideas among environmental researchers and educators across traditional departmental and college/school boundaries, and works to establish ties with industrial organizations that can benefit from increased interaction with LSU on environmental issues.

Institute for Advanced Materials

DIRECTOR Ward Plummer
OFFICE 202 Nicholson Hall
TELEPHONE 225-578-2262
E-MAIL wplummer@phys.lsu.edu

The Institute for Advanced Materials (IAM) will serve as a Materials Science and Engineering umbrella organization that will foster interdisciplinary research and education, which will enable development of advanced materials needed for a broad variety of life-transforming applications. The objective of IAM is to make sure that LSU is a major player in the development of materials for the 21st century. The institute will manage the new Shared Instrumentation Facility (SIF), which is a partnership between ORED, the Colleges of Science and Engineering, 13 departments, and over 100 faculty involved in Materials Research and Engineering on the LSU campus. SIF will pool the resources on campus and provide high-quality characterization capabilities with an affordable fee structure. The educational component of IAM is associated with the "Graduate Certificate in Materials Science and Engineering," which will provide our graduate students with an opportunity to receive specialized interdisciplinary education and training in contemporary materials science and engineering.

The institute will reach out to other academic institutions in the southeast and to the industrial sector to create working collaborations with the faculty at LSU and with SIF. IAM encompasses most of the areas of focus in the Battelle Report on economic development in Louisiana.

J. Bennett Johnston, Sr., Center for Advanced Microstructures & Devices

INTERIM DIRECTOR Richard Kurtz
OFFICE 6980 Jefferson Hwy.

FAX 225-578-6954
WEBSITE www.camd.lsu.edu
E-MAIL rlkurtz@lsu.edu

The *J. Bennett Johnston, Sr. Center for Advanced Microstructures & Devices* (CAMD) is an experimental facility for science and engineering that is centered on a 1.3 GeV electron storage ring. This electron accelerator produces a broad spectral range of electromagnetic radiation, essentially light, from the infrared to X-rays. This light is used for developing advanced materials for new energy technologies, for evaluating environmental issues and remediation, for biomedical applications including new drugs and cancer therapy, and for producing microstructures that are at the heart of new miniaturized devices.

Life Course and Aging Center

By the year 2020, more than 20 percent of the population is expected to reach the age of retirement. With the increase in the number of older adults living in Louisiana, there will be a greater need to ensure the successful aging of the population of our state. The Life Course and Aging Center (LCAC) recognizes that successful aging begins at birth and continues through the rest of our lives. Therefore, its researchers are committed to identifying the keys to successful aging and educating the public about these important issues.

The LCAC's mission is to promote collaborative research activities across many fields including the biological, social, and psychological sciences, develop life course and aging education and curriculum, and collaborate with child and senior service organizations throughout the state. LCAC faculty members represent six colleges and 14 departments and programs at LSU. Areas of research include cognitive processes and aging, early childhood development, education across the lifespan, interpersonal relations across the lifespan, lifespan development and public policy, physical processes and aging, and sociological aspects of aging.

Louisiana Space Consortium

The *Louisiana Space Consortium* (LaSPACE), supported by funds from the National Aeronautics & Space Administration and the Louisiana Board of Regents, is a group of Louisiana institutions of higher education working with the two state educational boards, business/industry, nonprofit organizations, and a local government partner.

The goal of LaSPACE is to enhance space and aerospace related research, technology, education, and public awareness throughout the state and to promote mathematics and science education, workforce development of aerospace professionals, diversity, and economic development. This goal is accomplished through competitive awards to researchers, fellowships for graduate students, mentored research assistantships for undergraduates, outreach to K-12 teachers and students, and public awareness events. LaSPACE is Louisiana's representative to the National Network of Space Grant Consortia, a congressionally mandated federal/state partnership that is administered by NASA. This national network encompasses every state in the nation plus Puerto Rico and the District of Columbia.

Louisiana Sea Grant College Program

EXECUTIVE DIRECTOR	Robert Twilley
OFFICE	239 Sea Grant Building
TELEPHONE	225-578-6710
FAX	225-578-6331
WEBSITE	www.laseagrant.org
E-MAIL	cwilson@lsu.edu

The Louisiana Sea Grant College Program is part of the National Sea Grant College Program, a congressionally mandated federal/state endeavor that is administered by the National Oceanic & Atmospheric Administration (NOAA) of the U.S. Department of Commerce. The national program network includes 32 lead institutions and consortia, based in coastal and Great Lakes states, involving more than 330 U.S. colleges, universities, laboratories, and private entities in research, training/education, technology transfer, and advisory service activities focused on coastal and marine issues.

The Louisiana Sea Grant College Program is responsible for administering all activities approved by NOAA for Sea Grant funding in Louisiana. The mission of the Louisiana program is to provide knowledge, trained personnel, and public awareness needed to wisely and effectively develop and manage coastal and marine areas and resources in a manner that will assure sustainable economic and societal benefits. This goal is pursued by supporting and developing selected capabilities in the Louisiana university community and, as appropriate, drawing on those in the national program network. The work requires:

- designing and conducting research, technology transfer, extension, and educational activities involving a broad range of natural science, engineering, economic, legal, public policy, and sociological expertise, and
- extensive cooperation with pertinent federal, state, business, and citizen groups. Providing a base of fundamental research and bringing the results to the market by enhancing existing businesses and growing new businesses are key program elements.

The Louisiana Sea Grant NOAA-funded core program supports individual projects at universities throughout Louisiana. These projects typically support graduate students, as well as provide undergraduate students with the opportunity to work on research-related activities. There is also an annual, national competition for approximately 50 Knauss Marine Policy Fellowships that provides selected graduate students a unique opportunity to spend a year working in host offices of the U.S. Congress and federal agencies located in the Washington, D.C. area. Core program activities are supplemented with projects funded by various federal and state agencies that have mutual goals and interests. Private sector support for the program is exemplified by the John P. Laborde Endowed Chair for Sea Grant Research and Technology Transfer that brings internationally and nationally renowned scientists to LSU for periods of one semester to two years to work on marine and coastal issues identified as critical to Louisiana.

In 1978, LSU was named a Sea Grant College, the 13th university in the nation to be so designated and the highest classification attainable in the program. This status was reaffirmed by national performance evaluation teams in 2011. LSU is currently one of only a handful of universities in the U.S. designated as a land-grant, space-grant, and sea-grant institution.

FAX 225-578-2696

WEBSITE www.ccell.lsu.edu

E-MAIL ccell@lsu.edu

The Center for Community Engagement, Learning & Leadership (CCELL) promotes service-learning, a cornerstone of LSU's structured approach to community engagement designed to advance learning outcomes and develop leaders who practice their discipline with the highest sense of civic responsibility.

CCELL facilitates educational experiences in which students take part in credit-bearing, organized service activities that meet community needs. Service-learning offers students "hands-on" learning, allowing them to serve others, gain a deeper understanding of course material, improve their leadership skills, acquire greater self-knowledge, and increase their sense of connection to the community.

CCELL provides a number of services to faculty who are engaged in service-learning, such as assisting in the recruitment of community-based partners; consulting with faculty in syllabus design, course development, and grant-writing; and functioning as

a liaison between faculty and their community partners. The Community Engagement Advisory Council, comprised primarily of senior LSU faculty with student and community representation, articulates and promotes the objectives of CCELL. The council develops strategies and provides leadership to advance service-learning funding, curriculum development, and scholarship.

Communication Across the Curriculum (CxC)

LSU Communication across the Curriculum (CxC) is a nationally recognized academic enhancement program that promotes deeper learning of undergraduate course content and advanced instruction on effective, discipline-specific communication.

CxC provides the following services for all undergraduates:

- rhetorical and technical support on writing, speaking, visual, and technological communication-intensive projects via discipline-specific CxC studios across campus;
- communication skills-building workshops;
- recognition on transcripts of completion of communication-intensive (CI) courses within the disciplines;
- opportunities for advanced learning and recognition through the Distinguished Communicator certification program

CxC provides the following services for all faculty:

- interdisciplinary learning communities focused on advancing undergraduate learning and teaching;
- workshops on integrating communication-intensive (CI) pedagogy into courses and curricula;
- consultations on syllabus, assignment and assessment design;
- cooperative publishing of research on learning and teaching of communication within the disciplines;
- assistance with grants that target improving students' discipline-specific communication skills.

A faculty-led advisory council, appointed by the provost, sets CxC policy and standards and shapes program development.

The *LSU Libraries* offer students and faculty strong support for learning and research through combined physical collections including more than three million titles, 15,000 linear feet of archives and manuscripts, 500,000+ maps, comprehensive collections of state and federal documents, and millions of microforms. Extending beyond the physical walls, the Libraries provide access to hundreds of thousands of online books, articles, and databases for faculty and students, supporting research, teaching, and public service. The LSU Libraries' subject strengths include Louisiana materials, sugar culture and technology, Southern history, agriculture, petroleum engineering, plant pathology, natural history, and various aspects of aquaculture including crawfish, wetlands research, and marine biology. Subject specialist librarians offer personalized research assistance and work with other teaching faculty to tailor library instruction sessions to meet the needs of their students, both in the classroom and online.

The LSU Libraries belong to the prestigious Association of Research Libraries, which includes the top 115 academic libraries in the U.S. and Canada; the Association of Southeastern Research Libraries (ASERL); Lyris, the nation's largest regional membership organization for libraries; and the Louisiana Academic Library Information Network Consortium (LALINC). The Libraries play a leadership role in LOUIS, the Louisiana Online University Information System, a statewide consortium housed by LSU's Information Technology Services.

Middleton Library is the main library, with special collections housed in the adjacent Hill Memorial Library.

In addition to print and digital resources, Middleton Library offers research and instruction services, circulation services including equipment check-out for students, hundreds of computers, wireless access, quiet and group study areas, presentation practice rooms, interlibrary borrowing services, electronic classrooms, and a coffee shop. Within Middleton, the Carter Music Resources Center and Education Resources house specialized collections and resources in those fields. Middleton also houses the Shell Tutorial Center, offering students free assistance with homework, test preparation, and study strategies.

LSU Libraries' U.S. Regional Depository Library collection and the U.S. Patent Depository Library collection are housed in Middleton Library. The library has been a depository for publications of the federal government since 1907 and became a Regional Depository in 1964. The patent collection includes all patents issued from 1871 to the present. The department has an extensive collection of scientific and technical reports from the U.S. Department of Energy, the National Aeronautics and Space Administration, and the National Technical Information Service, serves as an ASERL "Center of Excellence" for U.S. Army Corps of Engineers documents.

The LSU Libraries' Special Collections division (lib.lsu.edu/special), housed in Hill Memorial Library, provides access to historical, cultural, and artistic treasures and a wealth of research materials in fields ranging from the humanities and social sciences to the natural sciences, agriculture, aquaculture, the fine arts, and design. One of the primary strengths of Special Collections resides in the *Louisiana and Lower Mississippi Valley Collections* (LLMVC), an outstanding collection of materials documenting the history and culture of the region. It provides rare and early imprints pertaining to the exploration and colonization of the region; books on Louisiana subjects and Louisiana authors from all eras; Louisiana newspapers on microfilm; the papers of Louisiana political figures, most notably members of Congress and state government, including the Long family; more than 5,000 manuscript collections, which include the personal papers and records of individuals, businesses, professions, and organizations important to the region; and extensive photographic collections. Special Collections serves as a full depository for Louisiana state documents, including what is perhaps the most comprehensive collection in existence.

University Archives, administered by Special Collections and housed in Hill Memorial Library, is the official repository for all permanent noncurrent records of academic and administrative units of the university.

The Rare Book Collection is wide-ranging and eclectic in nature, with concentrations in 17th and 18th century English literature and history; book arts and the history of the book; New World exploration and travel; economic history; science fiction and fantasy; and many other areas supporting teaching and research at LSU.

The E. A. McIlhenny Natural History Collection was donated to the LSU Libraries in 1971, in memory of Edward Avery McIlhenny, whose private library forms the core of the collection. Rich in ornithological and botanical art, it is an exceptional resource for researchers in the history of those fields. High points in this collection include John James Audubon's double-

elephant folio Birds of America, and the "Native Flora of Louisiana" collection of original watercolor drawings by internationally renowned botanical artist Margaret Stones.

The T. Harry Williams Center for Oral History is also administered as part of the LSU Libraries Special Collections. Established in 1991, the Williams Center supports and encourages the collection, preservation, and dissemination of the social, political, cultural, and economic history of Louisiana through the use of recorded interviews. Recordings and transcripts generated by the program and its affiliated researchers are deposited in the *LLMVC*.

Hill Memorial Library also features two floors of exhibition gallery space and frequently hosts cultural events, including films, lectures, and other activities. Exhibits change regularly. Visitors to campus are welcome and encouraged to visit this historic building.

Special Collections publishes the *Civil War Book Review*, the quarterly journal of record for new or newly reprinted books about the antebellum, Civil War, and Reconstruction eras. It is available online at www.cwbr.com.

Since 2000, the Libraries have competed successfully for more than \$1.7 million in grant funding to digitize and make freely accessible materials from our collections, ranging from historical Louisiana newspapers, manuscripts, maps, and photographs, to complete sets of the *Louisiana Conservationist* and *The Sugar Bulletin*. Selected materials from the Libraries are available online through the Louisiana Digital Library, www.louisianadigitalibrary.org, the Internet Archives, and the Library of Congress's site *Chronicling America* (chroniclingamerica.loc.gov)

LSU Online extends access to higher education by offering the highest quality online programs, taught by highly qualified faculty. LSU Online seeks to provide distance learning opportunities to students all around the globe.

LSU Online provides the following services for all LSU Online teaching faculty:

- Instructional design support
- LSU Online Moodle support
- ProctorU services (for exam proctoring)
- Instructional Connections (academic coaches for large sections of courses)
- Echo 360 lecture capture
- Support via the Faculty Technology Center (FTC)
- Professional development opportunities including:
 - Sloan-C (the Sloan Consortium)
 - WCET (WICHE Cooperative for Education Technologies) webinars
 - United States Distance Learning Association webinars/resources
 - LSU Online Lunch & Learn

LSU Online provides the following services for all LSU Online students:

- Fully online student orientation
- New student checklist
- Enrollment management/financial aid experts for online programs
- Program officer in the LSU Graduate School for online programs

- LSU Online Moodle support
- LSU Libraries (online resources)
- LSU Center for Academic Success (online resources)
- Auxiliary aids for students with disabilities
- Enrollment and retention support personnel

The Office of Assessment & Evaluation (OAE) provides theoretical and practical measurement support to the university administration and community, including

- Administration and management of strategic planning and assessment reports in *TaskStream*
- Reviews and assessments associated with the *General Education Component of Undergraduate Education*, including course assessment, senior-level assessment, and assessment of college-level student learning outcomes
- Coordination of *University Review and Assessment Council* reviews of degree program assessment
- Consultation on tests, measurements, program evaluation, unit strategic plans, and assessment of student learning outcomes
- Administration of computer-based testing for LSU courses
- Administration of course placement and advanced-standing credit assessments
- Large-scale and localized test development, administration, statistical analysis and score reporting
- Electronic test scoring, statistical analysis, and reporting of data gathered via machine-scannable forms
- Custom survey design, production, statistical analysis and reporting in both scan and computer-based modes
- Development and implementation of experimental designs employing qualitative methodologies such as focus groups and group interviews
- Administration of programs for student teaching evaluations of faculty and courses
- Coordination of large-scale national surveys and assessments related to institutional assessment
- Computer-based testing for externally-based entrance and proficiency examinations

Rural Life Museum and Windrush Gardens

The *Rural Life Museum*, an outdoor museum complex, is located approximately five miles from campus on the university's 450-acre Burden Research Plantation. Open daily, this unique outdoor museum is divided into three areas. *The Barn* contains hundreds of artifacts dealing with everyday rural life dating from prehistoric times to the early 20th century. *The Plantation* consists of a complex of buildings, commissary, overseer's house, kitchen, slave cabins, sick house, school-house, blacksmith's shop, sugarcane plantation. Louisiana *Folk Architecture* is exemplified in seven buildings, a country church, a pioneer's cabin and corn crib, potato house, shotgun house, Acadian house, and a dogtrot house, whose divergent construction traits illustrate the various cultures of Louisiana settlers.

Adjacent to the museum are the *Windrush Gardens*, designed and planted by the late Steele Burden. This five acre expanse of semiformal gardens with winding paths and open areas is reminiscent of 19th century Louisiana gardens. The museum and gardens are open daily from 8:30 a.m. to 5 p.m. Admission is charged.

Founded in 1935, LSU Press quickly established itself as one of the nation's outstanding scholarly presses and continues to garner national and international accolades, including four Pulitzer Prizes. For over 75 years, LSU Press has published significant works of scholarship and preserved Louisiana's history and culture. Over half of the books we have published remain in print around the world. LSU Press is a nonprofit book publisher dedicated to the publication of scholarly, general interest, and regional books. An integral part of LSU, the Press shares the university's goal of the dissemination of knowledge and culture. LSU Press is one of the oldest and largest university presses in the South and among the outstanding publishers of scholarly books in the country. It holds membership in the Association of American University Presses, the largest organization of scholarly publishers in the world.

LSU Press performs a service of inestimable value to the scholarly community as well as to the broader world of our state and even to society itself. Unlike a commercial publisher that focuses on making money by publishing for popular audiences, LSU Press publishes works of scholarly, intellectual, or creative merit. The Press exists to disseminate knowledge, and as a nonprofit institution, it is mission-driven. Publications must undergo rigorous assessment by outside scholars and receive the favorable recommendations of the University Press Committee, a group of distinguished faculty.

By attracting outstanding authors and publishing outstanding books, the Press contributes to LSU's academic prominence through scholarly inquiry and ensures LSU's significant contribution to the world of scholarly endeavor. Additionally, as the only regularly publishing university press in Louisiana, we take seriously our mission to promote the achievements of our state and region and educate readers about its history.

Our books are published to rigorous standards, including approval by the Faculty Senate University Press Committee, which is composed of eight faculty members.

The Southern Review is a quarterly literary journal devoted to publishing the best contemporary poetry, fiction, and essays, including creative nonfiction and in-depth book reviews. The journal also publishes translations and an eight-page art portfolio. Recent contributors include such literary lights as Albert Goldbarth, Mary Oliver, Claudia Emerson, Billy Collins, Francine Prose, Sven Birkerts, Melanie Rae Thon, Mark Richard, and Ron Rash. Work from its pages is regularly anthologized in the Best American series, the Pushcart Prize series, and the O. Henry Prize series.

Founded in 1935 by Cleanth Brooks, Robert Penn Warren, Albert Erskine, and Charles Pipkin and now in its second series, *The Southern Review* has long made literary history. Among writers published since the journal's beginning are T.S. Eliot, W.H. Auden, Eudora Welty, John Berryman, Federico Garcia Lorca, Paul Valéry, Wallace Stevens, Randall Jarrell, Ford Madox Ford, Katherine Anne Porter, Aldous Huxley, W.S. Merwin, Pablo Neruda, Mavis Gallant, Theodore Roethke, Joyce Carol Oates, N. Scott Momaday, Maxine Kumin, and Toni Morrison, and we continue to feature the best writers of our time.

Subscriptions are \$40 a year for individuals and \$75 a year for institutions. Special rates are available for LSU students and employees.

LOUIS: The Louisiana Library Network is a partnership with academic libraries, state and private libraries, museums, and archives. With a centralized support staff, commonly referred to as "LOUIS" and located on the LSU Campus, LOUIS combines the collective resources of all members to produce a dynamic library consortium. It provides information technology solutions to consortium members in a cloud computing environment: an integrated library system (ILS), a digital library, interlibrary loan, electronic scholarly resources, consulting, authentication, training, communication, and operational support. Established in 1992, by academic library deans and directors, LOUIS has 49 members and is funded by the Louisiana Academic Libraries Information

Network Consortium (LALINC) members and the Board of Regents. LOUIS is growing; adding new members each year. LALINC members elect an Executive Board to oversee the initiatives of the consortium.

LSU University Networking and Infrastructure is responsible for the campus voice and data networks, messaging, back office server support, infrastructure, and the Network Operations Center (NOC) and Data Center.

Network facilities include 2,100 wireless access points, extensive fiber and copper infrastructures that support more than 30,000 network nodes, 12,000 telephone ports and a core data network capable of transmitting up to 30 Gigabits per second. LSU is a member of Internet2, SURAggrid, and the Louisiana Optical Networking Initiative and has been designated a vBNS Authorized Institution by the National Science Foundation.

Back office server operations provide enterprise level support for Microsoft Windows server platforms including SQL servers, IIS, Exchange and Active Directory in support of campus wide applications.

The Network Operations Center (NOC) provides uninterrupted operational, production control and monitoring services 24 hours a day, 365 days per year. The NOC monitors mainframe services and applications, campus network equipment and services, network traffic, network security systems as well as all external connections to the LSU network.

University Information Systems

EXECUTIVE

DIRECTOR/DEPUTY CIO Cynthia Hadden

OFFICE Frey Computing Services Center

TELEPHONE 225-578-3700

FAX 225-578-6400

WEBSITE www.lsu.edu/uis

University Information Systems (UIS) is responsible for the development and maintenance of comprehensive management information systems for the university. UIS has developed and installed more than 50 major applications, including registration, degree audit, admissions, payroll, general ledger, and financial aid.

The division is also responsible for myLSU, the Web-based portal, available to all students, faculty, and staff. Each individual's portal is unique and is customized to reflect the individual's relationship to the university. Further, each myLSU portal dynamically adapts in real-time when this relationship changes.

The division includes System Programming; IS Architectures; HR/Financial Applications; Distributed Systems & Technical Administration; Student and Research Applications; and Portals of Business Intelligence.

User Support and Student IT Enablement

EXECUTIVE DIRECTOR	Pam Nicolle
OFFICE	Frey Computing Services Center
TELEPHONE	225-578-3700
FAX	225-578-6400
WEBSITE	www.lsu.edu/uss

User Support and Student IT Enablement (USS) serves as the primary campus interface for information technology services at LSU. Located in the Frey Computing Services Building, the LSU Student Union, and in the Middleton Information Commons, the Help Desk, Print Desk, Adaptive Technology Services, and the Faculty Technology Center provide both walk-up and telephone technical assistance to faculty, staff, and students. IT training and education opportunities are offered on a variety of introductory and advanced topics, in addition to customized training upon request. The GROK Knowledge Base (grok.lsu.edu) serves as an online repository of the latest campus technical information, as well as an FAQ of common computing questions and answers. TigerWare (tigerware.lsu.edu) is LSU's online software warehouse, where faculty, staff, and students can download both freeware and institutionally licensed software. USS also maintains and supports the STF funded computing labs, multi-media, and distance education classrooms located throughout campus, where faculty and students have access to both Windows and Macintosh computers and instructor stations loaded with the latest general use and discipline-specific software programs. USS also provides technical assistance to departments via its Departmental Services and topic-based IT forums each semester. Digital Imaging and Video Services assist with photographic needs, desktop conferencing, and lecture/course capture.

The *Louisiana State Arthropod Museum* (LSAM), located in the Life Sciences Building, is a part of the Department of Entomology and a component collection of the *Louisiana Museum of Natural History*. The LSAM is the largest repository of insects and related arthropods in Louisiana. It houses approximately 1.2 million specimens, including 1 million pinned specimens, 100,000 fluid-preserved samples, and 30,000 microscope slides. One of the main strengths of the collection is a nationally significant beetle collection. In addition to preserving examples of the non-marine arthropod fauna of Louisiana, the LSAM's holdings include substantial numbers of specimens from elsewhere in the southern United States, Central and South America, and the Caribbean region.

The LSAM serves the research needs of Louisiana's scientific community by conserving voucher specimens generated by projects in agricultural entomology, biodiversity, and conservation biology. It serves the needs of the public by providing identifications of insects and other non-marine arthropods and by providing information about their habits and life histories. Specimen loans are made to qualified researchers throughout the world. The LSAM is not open to the general public and no exhibits are maintained, but requests for identifications and related information are welcome. A diagnostic fee is charged for identification services.

FAX 225-578-2697
WEBSITE www.textilemuseum.huec.lsu.edu
E-MAIL textile@lsu.edu

The *Textile & Costume Museum* offers changing exhibitions of regional, national, and international interest. Museum hours are 8 a.m. to 4:30 p.m., weekdays. The scope of the museum's more than 12,000-piece collection is global. Holdings include prehistoric and ethnic textiles and costume as well as contemporary high fashions and high-tech textiles. Types of items include apparel, accessories, household textiles, piece goods, books, patterns, and a variety of items related to textile and apparel production, use, and care. As part of the School of Human Ecology, the museum promotes conservation, research, teaching, and public service. Research includes studies of the technical, aesthetic, historic, and sociocultural significance of textiles and apparel. It is a component collection of the Louisiana Museum of Natural History at LSU.

The organization, Friends of the Textile & Costume Museum, supports the goals and functions of the museum by providing funds for purchases, exhibitions, workshops, and other activities throughout the year.

Coastal Sustainability Studio

DIRECTOR Jeffrey Carney
OFFICE 212 Design Building
TELEPHONE 225-578-4990
WEBSITE www.css.lsu.edu
E-MAIL jcarney@lsu.edu

The goal of the *Coastal Sustainability Studio* is to envision and design sustainable systems that reduce vulnerability associated with increased storm strength, land subsidence, habitat degradation, and global environmental change. The environmental and societal issues in coastal Louisiana mirror similar concerns in major river delta regions worldwide. At the same time, the specific problems facing the Mississippi River Delta are unique. To address these challenges, the CSS was conceived as a laboratory to develop new strategies that reduce risk to social, economic, and natural resources. The results of this design experimentation provide a sound basis for major policy decisions that focus on adaptation through more sustainable regional land-use planning, protection, and education.

Computer-Aided Design & Geographic Information Systems Research Laboratory

OFFICE 216 Design Building

The *Office of Community Design and Development (OCDD)* is an interdisciplinary community outreach center in the School of Architecture that connects students with Louisiana's communities to improve the quality of the built environment and the lives of citizens across the state and beyond. Funded through grants and sponsored research, OCDD's practice-centered pedagogy strengthens the efficacy of student learning through a comprehensive approach to professional education, undergraduate research, civic engagement, and service learning.

Research Office for Novice Design Education

DIRECTOR James Sullivan
OFFICE 145 Atkinson Hall
TELEPHONE 225-578-4262
FAX 225-578-2168
WEBSITE beginningdesign.org
E-MAIL jsullivan@lsu.edu

The mission of the *Research Office for Novice Design Education* is to preserve, generate, and disseminate knowledge of theories and practices pertaining to novice design education. Its goal is to become a central resource for educators and scholars interested in novice design education.

The research office addresses salient questions regarding how one has taught, teaches, or should teach design to learners who are new to the field of study. Such questions inquire into issues such as the particular educational challenges faced by novice learners and educators and the impact of those challenges on the relationship of novice design education to the broader design disciplines, the content and curricular structure of novice education, and the types of assignments and projects most suited for that content and structure. At their best, these questions, and the answers to them, implicitly or explicitly state a position on the status of knowledge, the means by which one transfers, acquires or constructs knowledge, and how one has used, uses or should use knowledge in the world.

To achieve its mission and goal, the research office is engaged in three ongoing initiatives.

1. **Collect Existing Scholarship:** The research office collects papers, books, or bibliographic reference material on novice design education. The purpose of this initiative is to develop a comprehensive reference archive for research on novice design education.
2. **Scholarship:** The research office produces and facilitates scholarship through the work of its directors and scholars who use its library.
3. **Distribute Scholarship:** The research office disseminates scholarship through this website, other publications, and open access to the scholarship it collects.

The research office is honored to house the past proceedings of the National Conference on the Beginning Design Student in searchable PDF format. Over the past 25 years, the participants of NCBDS have produced a remarkable body of knowledge on beginning design education. With this database, the NCBDS and the research office is pleased to make this rich body of knowledge available to scholars.

Research projects currently include investigations into: (1) the relationship between cognition and drawing, (2) film media as an alternative mode of representation in novice design education, (3) teaching critical reasoning in professionally oriented undergraduate design courses, and (4) the application of Henri Lefebvre's theory of the everyday to novice design education.

Media and Site Technologies Lab

The *Media and Site Technologies Lab* is an effort initiated by the School of Landscape Architecture focusing on research in visualization, simulation, sensing, and site technologies. The lab provides facilities that include workspace for prototyping, high end visualization and video editing components, and display and projection technologies.

The lab provides a research resource for faculty and graduate students with collaborative projects and funding from a variety of private and governmental organizations. Current projects are focused on site technologies, responsive landscapes, visualization, and simulation. Project sponsors have included the McKnight Foundation, Louisiana Department of Homeland Security, CSS, and various foundations.

Urban Landscape Lab

DIRECTOR	Wes Michaels
OFFICE	302 Design Building

TELEPHONE 225-578-1434
WEBSITE landscape.lsu.edu/resources_ull.htm
E-MAIL laadm1@lsu.edu

The Urban Landscape Lab (ULL) is a research and service-learning center at the Robert Reich School of Landscape Architecture at LSU. The center's mission is to design and build projects in urban areas that promote the development of innovative, healthy and environmentally sustainable landscapes and to provide hands-on learning opportunities for LSU students. The current focus within the lab is expanding the New Orleans Schoolyard Project.

New Orleans Schoolyard Project

The New Orleans Schoolyard Project is a collaborative effort to design and build healthy, educational, and sustainable schoolyards for public schools in New Orleans. Well-designed school environments promote learning, increase activity levels, and improve the overall health and well-being of students. This project focuses on developing innovative design solutions that make children more active in order to combat childhood obesity, develop environmentally sustainable campuses, and engage the school children in design exercises. The Prevention Research Center at Tulane University's School of Public Health and Tropical Medicine has collaborated with the ULL to research the impact of schoolyard design on children's health and activity levels. The New Orleans Schoolyard Project has worked with the Priestly School for Architecture and Construction and the Martin Luther King, Jr. School for Science and Technology and is currently partnering with KIPP New Orleans Schools.

Viet Village Urban Farm Project

The Viet Village Urban Farm project is located in east New Orleans, a Vietnamese-American community with long ties to this area of New Orleans. Over 90 percent of the pre-Katrina population has returned to this area. The Viet Village Urban Farm is an urban farming project on 21 acres of land located at the center of the community. The farm will support both household farming and producing crops for local consumption as well as commercial crops for distribution to local New Orleans restaurants. Educational and recreational activities are also incorporated into the design to create a project that will be the new center of this urban community. This project is being developed in collaboration with the City Center at Tulane University.

The *Highway Safety Research Group* (HSRG) is responsible for collecting, maintaining, storing, and analyzing crash data captured from law enforcement agencies throughout the state of Louisiana. The HSRG has two primary functions: research and development. On the research front, the HSRG analyzes crash data obtained from a variety of sources to produce numerous published reports each year, including the annual "Louisiana Traffic Records Data Report." In terms of development, the HSRG specializes in developing advanced software and innovative support for law enforcement agencies around the state. The HSRG's LACRASH software system, designed to capture electronic crash reporting information in an accurate and timely manner, is currently in use by more than 170 Louisiana law enforcement agencies. Ongoing development projects include integrating digital dashboards and geographical information systems (GIS) into various platforms to enhance data interpretations. These projects are made possible through a grant provided by the Louisiana Department of Transportation and Development.

Louisiana Business & Technology Center

EXECUTIVE
DIRECTOR Charles D'Agostino

TELEPHONE 225-578-7555

FAX 225-578-3975

WEBSITE www.business.lsu.edu/lbtc

E-MAIL lbtc@lsu.edu

The *Louisiana Business & Technology Center* (LBTC) was created in 1988 as a joint venture of the university, the Baton Rouge Chamber of Commerce, and the Louisiana Public Facilities Authority. LBTC is now part of the E. J. Ourso College of Business. Its purpose is to enhance economic development in the state through a job creation network. A community resource, LBTC assists new and small businesses by offering:

- management and marketing expertise;
- technology and technical assistance; and
- incubator space and business services.

The intent is to develop and nurture small business growth as a means of diversifying the economy.

LBTC provides space for new business start-ups in the incubator at LSU Innovation Park. Companies located in the LBTC can concentrate on production and marketing, which affect success and profit. Day-to-day administrative details and overhead problems are left to the facility manager. The LBTC was named the *2005 National Business Incubator of the Year* by the National Business Incubation Association (NBIA), the *2009 U.S. Department of Commerce–Excellence in Economic Development and the 2009 NBIA–Most Innovative Program*.

The LBTC was designated as both an International Soft Landing Incubator by the NBIA and a Clean Energy Incubator by the US Clean Energy Alliance.

LSU Small Business Development Center • A partnership with the U.S. Small Business Administration and the Louisiana Department of Economic Development, this center serves small and new businesses in three areas: education, research, and outreach. Job creation and economic development are the main goals of the center.

Students work with entrepreneurs and small business clients to produce business plans, market studies, software programs, and accounting systems. The program provides students with real world experience and practical application of acquired knowledge.

Technology Transfer • The LBTC operates the Louisiana Technology Transfer Office at NASA's John C. Stennis Space Center (SSC) in Bay St. Louis, Mississippi, under a contract from the Louisiana Department of Economic Development. The office is a technology clearinghouse for Louisiana business and industry. Its purpose is to foster technology commercialization and economic development.

Goals of the Technology Transfer Office are:

- to broker technical requirements of Louisiana businesses with the federal agencies;
- to establish a process for matching Louisiana businesses with Small Business Innovation Research grant requests and for assisting businesses in applying for grants;
- to foster local and state economic development by accessing the federal labs for problem solving, innovation, and technology transfer;
- to represent LSU in the Federal Laboratory Consortium and at other national and international forums; and
- to provide access for state agencies, local government, and Louisiana businesses to conduct research and develop technologies.

LBTC Mobile Classroom and Rural Entrepreneurship Program • The LBTC has a 30-seat mobile classroom that it deploys to rural Louisiana and the hurricane impacted areas of the state to offer training in entrepreneurship, business planning, marketing and disaster recovery. This program is funded by the U.S. Department of Commerce–EDA, USDA–Rural Development with assistance from the LED, LPFA, LSU Ag Center, Louisiana Municipal Association, and Capital One. The unit visits 30 locations annually offering workshops and one-on-one counseling.

Access LSU • The LBTC has established a program to be the gatekeeper for businesses needing access to LSU's wealth of talent, expertise, equipment, and technology. Business owners call the LBTC with their problems and needs and the LBTC researches the LSU System to find and connect the proper expert with the business.

Disaster Recovery • The LBTC was established as a Small Business Disaster Recovery Center immediately after the hurricanes of 2005. The LBTC has partnered with Louisiana Economic Development and others including Shell and ExxonMobil to provide assistance to businesses and entrepreneurs in the hurricane parishes from Cameron to Calcasieu to St. Bernard and Plaquemines. The program provides one-on-one counseling as well as workshops on procurement, business recovery, and business development.

Student Incubator • The LBTC Student Incubator is a 1,200 square foot incubator facility designed for student entrepreneurs interested in starting businesses prior to graduation in an attempt to "create their own job" after graduation. The Student Incubator provides space, equipment, furniture, business counseling, mentoring and access to capital to student entrepreneurs. The LBTC staff and Advisory Board provide business support and training programs at no cost to students.

The LSU Innovation Park • LSU has developed a more than 200 acre, premier research park four miles south of the campus on Highway 30 in Baton Rouge. The designated qualified research park offers tax incentives and credits to eligible businesses operating in the park. Companies located in the LSU Innovation Park must meet stringent requirements and have a strong relationship with the university in areas of expertise compatible with LSU's research mission. This park provides faculty and students with a broader avenue for intellectual enrichment and technological discovery by partnering with scientific investigators from federal labs and industry. By helping researchers bring new technologies to market, the LSU Innovation Park creates high quality jobs, benefits the community, and enhances the image of LSU and Louisiana.

Current partners at the LSU Innovation Park include the Louisiana Army National Guard and Disaster Response Center, Electronic Arts/EA Sports Video Game's North American Testing Center, the National Center for Biomedical Research & Training, the LSU Center for BioModular Multi-Scale Systems, the Louisiana Business Emergency Operations Center, the Louisiana Technology Transfer Office, the Manufacturing Extension Program of Louisiana, and the Louisiana Business & Technology Center.

Stephenson Entrepreneurship Institute

INTERIM DIRECTOR Charles F. D'Agostino

TELEPHONE	225-578-0313
FAX	225-578-6606
TELEPHONE	225-578-6411
WEBSITE	www.business.lsu.edu/sei
E-MAIL	sei@lsu.edu

The *Stephenson Entrepreneurship Institute's* mission is to inspire, innovate, integrate, and implement new ways of thinking, education, and outreach to positively impact students, the regional economy, the state of Louisiana, and the nation. This multi-disciplinary, university-wide institute promotes innovative approaches to identifying needs and solving problems through an entrepreneurial view of opportunity recognition and realization.

The institute offers programs and activities such as educational seminars and workshops in an executive education format; university course work; business planning, marketing and management consultation; and venture funding assistance, to give entrepreneurs effective management tools and problem-solving skills with the primary goal of economic development and job creation in Louisiana. Available university academic course work areas include: entrepreneurship, small business management, innovation and creativity, doing business in China, consulting field projects, family business management, franchising management, and independent study topics as approved.

Focus Programs

- **Executive & Entrepreneurial Education** - a certificate course that instills a new vitality and effectiveness by hosting guest speakers and lecture for mid-career level executives seeking professional development.
- SEI has partnered with several universities to deliver the **Entrepreneurial Boot Camp for Veterans with Disabilities** assisting our service-disabled heroes find a career after their military service is completed.

A generous donation by Emmet and Toni Stephenson will permit The Stephenson Entrepreneurship Institute, the Louisiana Business & Technology Center, the Small Business Development Center, the LSU System Emerging Technology Center, and other colleges within LSU to create a more responsive environment to assist in economic development and entrepreneurship related endeavors.

Public Administration Institute

DIRECTOR	James Richardson
OFFICE	Business Education Complex, Room 2000

WEBSITE	www.business.lsu.edu/pai
E-MAIL	pai@lsu.edu

The *Public Administration Institute* (PAI) offers the Master of Public Administration (MPA) degree to enhance career opportunities for those planning to enter public service; provide help for those currently employed in public service who want to acquire or to extend their professional knowledge; offer service to those interested in the not-for-profit sector of the economy; and offer training for those who are in the private sector or who intend to work in the private sector who will deal with the public sector. Students from a social science, liberal arts, business, or physical science background are encouraged to apply.

The curriculum consists of course work in the disciplines of finance, economics, political science, management, and statistics. The course work focuses on analytical, quantitative, and management skills needed by today's successful public or private manager. Core courses are taught by faculty in the PAI and supporting departments throughout the university. Classes are scheduled to accommodate career professionals, as well as full-time students. Challenging internships in government and non-profit agencies are available to qualified students.

WEBSITE	www.business.lsu.edu/leri

The *Louisiana Real Estate Research Institute* was established in 1985 with funding from the E.J. Ourso College of Business and the Louisiana Real Estate Commission. Its purpose is to encourage, support, and conduct applied and basic research in real estate, with particular focus on real estate and related economic activity in Louisiana. The institute has sponsored nearly 200 research projects, ranging from the analysis of nonparametric location theory to investigation of the effect on housing markets of below-market financing bond issues. An integral part of the institute's effort is to fund research grants for faculty and graduate students, as well as to provide scholarship support for students.

The institute's work is closely supported by the Louisiana Real Estate Commission Endowed Chair of Real Estate, the Latter & Blum Professorship of Business Administration, and the C. J. Brown Professorship of Real Estate. Continued funding for the institute has been provided by the Louisiana Real Estate Commission, the E.J. Ourso College of Business, the Commercial Investment Division of the Baton Rouge Board of Realtors, and various local and state private corporations.

DIRECTOR	Nan D. Walker
OFFICE	331 Howe-Russell Geoscience Complex
TELEPHONE	225-578-5331
FAX	225-578-2520

WEBSITE www.esl.lsu.edu

The *Earth Scan Laboratory* is a satellite receiving station and image processing facility for environmental data from six unique earth observing sensor systems. The laboratory specializes in real-time access to satellite imagery and measurements of the atmosphere, oceans, and coastal areas within the Gulf of Mexico, Caribbean Sea, W. Atlantic, and E. Tropical Pacific Ocean. Satellite measurements are obtained directly from satellite transmissions many times each day. The mission of the laboratory is to support education, research, and state emergency response. During hurricane season, the laboratory supplies hurricane images every few minutes to the Governor's Office of Homeland Security and Emergency Response. ESL's comprehensive web page, www.esl.lsu.edu, provides daily imagery and animations of oceanic and atmospheric circulations both in real-time and as historic archives.

WAVCIS

DIRECTOR Chunyan Li

OFFICE 218 Howe-Russell Geoscience Complex

TELEPHONE 225-578-3619

FAX 225-578-2520

WEBSITE www.wavcis.lsu.edu

The objective of *WAVCIS* (*wave-current information system*) is to provide wave information (sea state) including wave height, period, direction of propagation, water level, surge, near surface current speed and direction and meteorological conditions on a real time basis around the entire Louisiana coast.

WAVCIS involves offshore deployment of instrumentation at nine sites in the northern Gulf of Mexico (eight in Louisiana waters) in order to provide real time information on a frequent basis (3 hours or less) describing sea state, surface current and meteorological conditions. The instrumentation provides information from deep to shallow water off the Louisiana coast in addition to the major bays.

Data from each station is transmitted by a solar powered cellular link to a base station at Louisiana State University where it undergoes quality control, post-processing and archiving in an online database. The information is then made available on the Web and is accessible to computers with an Internet connection and web browser. Various data displays are available for the real time information as well as a specified time history for archived data.

The *Center for Rotating Machinery* (CeROM), established in 2000, was created by an interdisciplinary research group led by faculty in the Department of Mechanical Engineering in close collaboration with business and industry leaders. By providing cutting-edge technological innovations to solve complex problems in engineering systems, the center serves as an intellectual foundation to the industry with focus on long-range development.

The center fosters the development of the next generation of mechanical components, materials synthesis, and fabrication techniques, and serves the needs of the large industrial base in Louisiana and elsewhere in the nation. Current collaborations exist between researchers in the center and a number of industries as well as the Gulf South Rotating Machinery Symposium (GSRMS) Conference steering committee. Projects of note include research in the areas of tribology, materials synthesis, characterization, modeling, mechanical systems analysis, nondestructive testing, fatigue testing and analysis, and advanced sensing technology. The center is committed to maintaining a strong partnership with industry through stimulating technological innovation; facilitating commercialization of new research and development; serving as a magnet for attracting new industries to Louisiana; hosting workshops, symposia, and advanced specialty courses for training professional engineers; and providing graduate students with real-world, relevant experience to produce a high quality workforce for Louisiana and beyond.

The *Louisiana Transportation Research Center* (LTRC) is a cooperative research, education, and technology transfer center jointly administered by LSU and the Louisiana Department of Transportation & Development. The center was established in 1986 by the Louisiana Legislature with the goal of improving the state's transportation system through basic and applied research, education, and technology transfer. The primary focus of the center is development of nationally recognized research and educational programs in transportation systems resulting in the implementation of more efficient design, planning, maintenance, operation, and construction practices as well as improved safety. LTRC also offers courses, seminars, and training sessions designed to enhance the professional capabilities of DOTD engineers and all transportation professionals. These courses are offered through LTRC's Transportation Training and Education Center (TTEC) located adjacent to the LTRC building. TTEC has state-of-the-art classrooms and lecture facilities with advanced distance-learning capabilities. LTRC also publishes reports, brochures, and training materials. These publications are available to students in appropriate disciplines.

The Louisiana Local Technical Assistance Program (LTAP), a division of LTRC, is part of a national network dispersing the latest in transportation practices to local governing bodies by means of publications, seminars, workshops, and technical assistance.

E-MAIL brian@rsip.lsu.edu

The *Gulf Coast Center for Evacuation and Transportation Resiliency* was established as a federal University Transportation Center (UTC) in 2008 under the support of the United States Department of Transportation. The center seeks to create and disseminate new knowledge to address a multitude of issues that impact transportation processes under emergency conditions. These are developed through the research, teaching, and outreach mission of the center and include topics such as evacuation for natural and man-made hazards and other types of major events as well as the need to develop and maintain the ability of transportation systems to economically, efficiently, and safely respond to the changing conditions and demands that may be placed upon them. Work within these areas has recently included the development of modeling and analysis techniques; innovative design and control strategies; and travel demand estimation and planning methods that can be used to predict and improve travel under periods of immediate and overwhelming demand. In addition to detailed analysis of emergency transportation processes, the center also provides support for the broader study of transportation resiliency. This has included research on key components of redundant transportation systems, analysis of congestion in relation to resiliency, and the impact of climate change.

The *Center for French & Francophone Studies* develops and encourages interdisciplinary research in French and Francophone literatures, cultures, and language. It provides facilities and opportunities for LSU and visiting faculty as well as for student researchers. The center is involved with all French and Francophone activities at the university and with state and international organizations. Open to faculty and students, a library of French and Francophone literature and reference materials is also housed in the center, as is a video library containing many francophone films.

Southern Regional Climate Center

DIRECTOR Kevin Robbins
OFFICE E328 Howe-Russell Geoscience Complex
TELEPHONE 225-578-5021
FAX 225-578-2912
WEBSITE www.srcc.lsu.edu
E-MAIL krobbins@srcc.lsu.edu

The *Southern Regional Climate Center* (SRCC), one of six regional climate centers serving climate information needs of the U.S., provides climate information services for Arkansas, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas. Housed in the Department of Geography & Anthropology, the SRCC is administered by the National Climatic Data Center (NCDC), an agency of the National Oceanic & Atmospheric Administration (NOAA).

The SRCC receives a wide array of National Weather Service (NWS) data via the Internet and through an on-site NOAA port satellite receiver. We also receive observed and processed data and information from non-federal sources. These data are processed at the SRCC and merged with historical climatic archives to provide a comprehensive source of climate information. Providing more than an archive service, these operational data products enable the SRCC staff to monitor and assess the current

state of the regional climate, provide value-added climatic information to decision-makers, promote regional economic development, provide information to promote environmental management and stewardship, and supply researchers with needed climate information to assist domain-specific research.

The SRCC works within the national RCC program to provide support for the U.S. National Climate Assessment, a periodic snapshot of the U.S. climate as it relates to climate change; provides weekly regional assessments of U.S. drought conditions for the National Integrated Drought Information System (NIDIS); and provides monthly reports to NCDC on climate extremes across the SRCC region. More recently, the SRCC has begun plans to assume a larger regional scale that will include the states of Alabama, Georgia, Florida, Puerto Rico, and the U.S. Virgin Islands. This expansion allows the SRCC to monitor a region that includes all Gulf of Mexico bordering states. We are expanding our reach into the coastal margins of the Gulf of Mexico in preparation for this responsibility.

Faculty, staff, and graduate students utilize SRCC climatic data and computing resources to perform applied and basic research on a variety of climate-related topics that include rainfall frequency analysis, regional flooding, drought, extreme weather and climate events, climatic impacts on agriculture, tropical storms and storm surge, and numerous issues related to climatic change and variability. SRCC is active participants in the Southern Climate Impacts Planning Program, a joint venture between LSU and the University of Oklahoma (OU), and have partnered with OU, Oklahoma State University, Texas Tech University, the Chickasaw and Choctaw Nations of Oklahoma, and the NOAA Geophysical Fluid Dynamics Laboratory to form the South Central Climate Science Center, a five-year project sponsored by the Department of the Interior. This research center focuses on ecological studies impacted by climate extremes and global climate change.

The *Louisiana Office of State Climatology* (LOSC) is recognized by the American Association of State Climatologists as the official climate office for the state, housing the Louisiana State Climatologist. It has been providing climate data services to the state's public, private, industrial, and governmental sectors since the late 1970s. The LOSC is charged with maintaining historical climate data for the state, and then making these data available to the public. The State Climatologist monitors current weather impacts and trends for Louisiana, and is very active with local and regional media. The LOSC is supported in this activity by the Southern Regional Climate Center (SRCC) and the National Climate Data Center. Located within the Department of Geography & Anthropology, the LOSC is closely linked to the department's SRCC and shares the SRCC's data and computer resources.

E-MAIL esandoz@lsu.edu

The *Eric Voegelin Institute for American Renaissance Studies*, a humanities-social science research institute with no instructional program, was created as a unit within the College of Humanities & Social Sciences in 1987. The institute is named for perhaps the greatest scholar-teacher in the history of the university (1942-1958) and one of the original Boyd Professors, Eric Voegelin, of the Department of Government (renamed the Department of Political Science in the 1960s). The institute is devoted to revitalizing the teaching and understanding of the great books of Western civilization in comparison with other civilizational traditions, especially along lines embodied in Voegelin's own massive scholarship.

Largely supported by private contributions and other external funding, the institute is principally involved in two activities: conferences conducted both in the U.S. and abroad in the fields of constitutionalism, individual liberty, and political philosophy; and publications (books and monographs) in these same interest areas. It is the principal editorial and financial support unit for the large edition titled *The Collected Works of Eric Voegelin*, University of Missouri Press, 34 vols., completed in 2009.

E-MAIL areynolds@lsu.edu

The *Reilly Center for Media & Public Affairs*, launched in 2000, is the focus of numerous projects and activities aimed at elevating the quality of civic discourse. The center is housed in the Manship School of Mass Communication but collaborates with other academic units.

The center supports cutting-edge scholarship on all aspects of media and public affairs. Topics range over a wide variety of issues, including news coverage of government and business, the impact of technology on foreign news coverage, the role of advocacy groups in reaching the electorate, public opinion analysis, and constituent building by public and private entities.

The center has a number of venues for making its research public and useful. It cooperates with LSU Press to publish an ongoing series of books. It also supports symposia, conferences, and a public policy fellows program for the discussion of media and public affairs issues. The John Breaux Symposium is held annually, bringing in outstanding scholars, journalists, public officials, and business and civic leaders. Symposia focus on state and national issues of pressing contemporary importance. Symposia are

often published as reports and distributed nationally. The center manages the Manship School Research Facility which houses the Public Policy Research Lab and the Media Effects Lab.

No degree is offered, but the center is tied to the PhD program in mass communication and public affairs, which offers fellowships to support doctoral candidates who assist faculty and the center with research. Work in the center provides valuable experience for students, thereby enhancing the quality of their education. The center also brings in visiting scholars to collaborate on projects and work with students.

The center's public service arm directly assists media companies, industry, government, and nonprofit agencies by focusing the expertise of superior scholars on practical problems. Projects may include opinion surveys, communication plans, media training, and other special projects.

Public Policy Research Lab

The *Public Policy Research Lab* is dedicated to quality public policy research through state-of-the-art survey technologies. It helps advance scholarly and practical research while playing a leadership role in state and national public policy development. The lab serves other units on campus, government agencies, non-profits, business and industry. National surveys have resulted in publication in both practical and scholarly journals. The lab's projects benefit from the multiple disciplines and intellectual assets at LSU. One of the lab's core projects is the Reilly Center for Media & Public Affairs' annual Louisiana Survey, a longitudinal study of advancements and regressions of citizen views regarding state services and contemporary issues.

The Manship School Research Facility houses the Public Policy Research Lab (PPRL) and the Media Effects Lab (MEL).

Media Effects Lab

DIRECTOR	Meghan S. Sanders

The *Louisiana Museum of Natural History*, the official state museum of natural history, consists of 16 major research collections located on the LSU campus. Together, these collections hold a total of more than 2.8 million specimens, objects, and artifacts that document the rich natural history of Louisiana, the central-Gulf region, and the world. These collections are dispersed among six independently administered units on campus, and include the *Vascular Plant Herbarium*, the *Mycological Herbarium*, the *Lichen Herbarium*, the *Log Library & Core Repository*, the *Louisiana State Arthropod Museum*, the *Center for Excellence in Palynology*, the *Gems & Minerals Collection*, the *Textile & Costume Museum*, and eight collections of the *Museum of Natural Science* (the *Collection of Amphibians & Reptiles*, the *Collection of Birds*, the *Collection of Fishes*, the *Collection of Genetic Resources*, the *Collection of Mammals*, the *Vertebrate Paleontology Collection*, the *Collection of Fossil Protists & Invertebrates*, and the *Ethnology-Archaeology Collection*).

The collections of the *Louisiana Museum of Natural History*, used actively for education, research, display, and public service, represent an important historical trust for future generations of Louisiana's citizens. Details about each collection, including educational and exhibits programs, can be obtained by contacting the curator-in-charge of the collection (see individual listings) or by visiting the museum's website.

LSU Herbarium

DIRECTOR Lowell Urbatsch
OFFICE A257A Life Sciences Annex
TELEPHONE 225-578-8555
FAX 225-578-2597
WEBSITE www.herbarium.lsu.edu
E-MAIL leu@lsu.edu

Lichen & Bryophyte Herbarium

The *Lichen & Bryophyte Herbarium*, located in A257 Life Sciences Annex, is a permanent scientific collection of preserved material of more than 45,000 specimens of lichens—the largest collection of its kind in the Gulf South—and several thousand mosses and liverworts. It is the result of the work of Boyd Professor Emerita Shirley Tucker, Department of Biological Sciences. Geographical emphasis is on species native to Louisiana and the southeastern U.S. Other areas represented include the western and northern U.S., Canada, the American tropics, New Zealand, Europe, and Australia. The collection is particularly rich in tropical and subtropical crustose lichens.

The herbarium is primarily a research and teaching facility. Research programs are in progress on floristics of southeastern U.S. lichens and on ultrastructure of subtropical crustose lichens. On request, specimens are available for loan to other institutions.

Mycological Herbarium

The *Bernard Lowy Mycological Herbarium*, located in A257 Life Sciences Annex, contains the university's permanent collection of more than 25,000 preserved specimens of nonlichenized fungi from all over the world. It was collected principally by the late Dr. Bernard Lowy, an LSU mycologist and ethnobotanist of international stature. It includes a large representative collection of Amazonian Tremellales and other Basidiomycetes, as well as an important collection of Gulf Coast wood decay fungi. The herbarium is principally a research and teaching facility, and specimens are loaned to other institutions, both domestic and foreign.

Vascular Plant Herbarium

The *Vascular Plant Herbarium*, located in A257 Life Sciences Annex, houses the permanent, scientific collection of preserved specimens of ferns, fern allies, gymnosperms, and flowering plants. Founded in 1869, it is the oldest herbarium in the Gulf South and presently comprises more than 180,000 specimens, including one of the best collections of Louisiana plants.

The collection includes dried, pressed specimens and material preserved in alcohol. Many historically important 19th and early 20th century specimens from the Louisiana Gulf Coast are included. New material is obtained through the collecting efforts of herbarium personnel, associated colleagues, amateurs, and through the exchange of duplicates with other herbaria. The goal of the herbarium is to be the premier collection of Louisiana and Gulf South plants, and a resource of international importance.

The herbarium is a reference and service facility, and is an essential resource for all research, teaching, and public service involving identification, classification, economic importance, and ecology of the plants and vegetation of Louisiana, the Gulf South, and the northern Neotropics. Numerous publications are based on the collections. The herbarium also supports an extensive website (www.herbarium.lsu.edu), which features browse and search functions of specimen records, specimen images, a plant image gallery, and plant fact sheets. Use of the LSU Herbarium may be arranged through Dr. Lowell Urbatsch, herbarium director, by visiting A257D Life Sciences Annex, calling 225-578-8564, or emailing leu@lsu.edu.

The *Museum of Natural Science*, a subunit of the *Louisiana Museum of Natural History*, consists of the Division of Zoology, located in Foster Hall, and the Division of Geoscience, located in the Howe-Russell Geoscience Complex. The exhibits in Foster Hall consist of nine major dioramas that depict with meticulous accuracy the flora and fauna of selected scenes from North America, including representatives of Louisiana's animal life. Other exhibits and visual aids explain various biological and geological principles. Three new exhibits highlight research on tiger conservation, Antarctica, and Louisiana pre-history. The museum's exhibits are free and open to the public from 8 a.m. to 4 p.m., Monday through Friday (call 578-2855 for information); closed on Saturday, Sunday, and university holidays.

The museum's *Division of Zoology* contains extensive research collections, numbering more than 500,000 catalogued specimens of birds, mammals, fishes, amphibians, reptiles, and their tissue samples. This internationally known repository of zoological material provides the basis for a program of research and serves as an important aid in teaching biological subjects.

The *Division of Geoscience* contains the most extensive archaeological and geological research collections in Louisiana. The museum's archaeological collections include more than one million lots from 1,800 sites in Louisiana and many other sites in the Gulf Coast and Caribbean regions. Ethnological collections include material from North and South America, Africa, Australia,

Oceania, Asia, and the Arctic. The *H. V. Howe Type Collection* of fossil ostracoda and the *H. B. Stenzel Collection* of fossil oysters are among the best of their kind in the world.

The museum is a member of the Natural Science Collections Alliance.

Center for Excellence in Palynology

INTERIM DIRECTOR S. Warny
OFFICE 109 Howe Russell

FAX 225-578-2302
WEBSITE www.geol.lsu.edu/warny
E-MAIL swarny@lsu.edu

The *Center for Excellence in Palynology* (CENEX) was established in 1993 by Louisiana State University and the American Association of Stratigraphic Palynologists, Inc. (AASP). Its mission is to promote research and training in stratigraphic palynology. AASP initiated this collaborative effort as a result of a concern for the availability of trained palynologists in the United States. The CENEX Palynologic Processing Laboratory was established in 1994 with support from several sources including industrial support from Amoco Production Company, Chevron, Shell Oil Company, and UNOCAL. Additional specialized equipment was purchased with external funding (e.g. NSF). CENEX is now equipped with 7 BX41 Olympus microscopes for research and graduate student training. The CENEX Palynologic Library contains some 25,000 palynologic reprints, books, and reports and a pollen reference slide collection of more than 8,000 modern pollen species donated from several sources and 60,000 palynologic slides from oil wells, primarily from the Gulf of Mexico.

Palynology is the study of organic-walled microfossils (e.g., spores, pollen, fungal debris, acritarchs, dinoflagellate cysts, etc.). These entities, collectively called palynomorphs, were and are produced in prodigious quantities by a variety of terrestrial, aquatic, and marine organisms. Their resistant organic walls assure that they are preserved in sediments and rocks, some dating back 3.5 billion years. Stratigraphic palynology developed because of the need of the oil and coal industries to date and correlate subsurface sedimentary deposits. Palynomorphs are also particularly useful for reconstruction of past environmental conditions and are commonly used today in climate change studies or in studies focusing on the co-evolution of Earth and life since the Precambrian.

The center currently has three PhD students focusing on palynological research in Antarctica, Papua New Guinea, and Canada; and five master's students focusing on palynological research in Colombia, the Black Sea, the Antarctic Peninsula, and the Gulf of Mexico. These students are supported by grants from NSF (CAREER and OPP); by the oil and gas industry (HESS, MARATHON, BP, and ECOPETROL); and by teaching assistantships from the LSU Department of Geology & Geophysics and the LSU Museum of Natural Science.

Other Research Partnerships

LSU Agricultural Center

As the research arm of the *LSU Agricultural Center*, the *Louisiana Agricultural Experiment Station* is a major partner in graduate education and research. Research in the major soil, climate, and agricultural production areas is conducted in campus departments and in research stations located throughout the state. Many Agricultural Experiment Station faculty hold joint teaching and research appointments in the College of Agriculture, College of Engineering, and the School of Veterinary Medicine. In addition, the Experiment Station provides a large number of graduate assistantships, and laboratories, equipment, and facilities of the station are made available to graduate students.

Audubon Center for Research of Endangered Species

OFFICE P.O. Box 4327, New Orleans, LA 70178

TELEPHONE 504-398-3260

WEBSITE www.auduboninstitute.org

The *Audubon Center for Research of Endangered Species* (ACRES), opened in 1996, is an ambitious and innovative initiative in species conservation. Located in New Orleans, ACRES includes a 36,000 square-foot facility designed to house scientists whose research programs include studies in reproductive physiology, endocrinology, genetics, embryo transfer, and the expansion of a "frozen zoo" to assure the future of endangered species through the banking of genetic materials.

The alliances between LSU and ACRES (joint programming, data pooling, collaborative research, and cooperative funding) enables interdisciplinary field-and-lab teams to conduct far-reaching research programs which range in scope from regional to international.

The knowledge gained through collaborative research between LSU and ACRES will help scientists and conservationists cope with threats to the most seriously endangered species by developing new reproductive technologies and reintroduction techniques necessary to ensure their long-term survival.

Louisiana Universities Marine Consortium

E-MAIL information@lumcon.edu

Louisiana Universities Marine Consortium (LUMCON) was formed in 1979 "with the primary function of conducting research and promoting education in the marine sciences and marine technology, particularly where related to coastal resources and the impact of energy related industries upon these coastal resources." LUMCON provides coastal laboratory facilities to Louisiana universities and conducts research and educational programs in the marine sciences.

LUMCON's primary facilities are located at the DeFelice Marine Center in Cocodrie, approximately 85 miles southwest of New Orleans. This location, situated within the estuarine wetland complex of the Mississippi River delta plain between the Atchafalaya and Mississippi Rivers, provides ready access to the most productive estuaries in the U.S., to a variety of coastal environments, and to the open Gulf of Mexico.

LUMCON is governed by a six-member Executive Board comprised of chief executive officers of LSU, Nicholls State University, and the University of Louisiana at Lafayette. This board reports to the Louisiana Board of Regents. For more information about LUMCON visit their website at www.lumcon.edu.

Oak Ridge Associated Universities

E-MAIL	monnie.champion@orau.org

Undergraduate and graduate students, postgraduates, and faculty enjoy access to a multitude of opportunities for study and research through Oak Ridge Associated Universities (ORAU) and the Oak Ridge Institute for Science and Education (ORISE). Students can participate in programs covering a wide variety of science, technology, engineering, and math disciplines. Most appointments range in length from one month to four years and include a stipend or salary, as well as funding for travel related to research or professional meetings. Some programs pay for tuition and fees. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *ORISE Catalog of Education and Training Programs*, which is available at <http://www.orau.gov/orise/educ.htm>.

Through ORAU's University Partnerships Office, opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities are developed. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

Since 1946, students and faculty of LSU have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 100 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Organization for Tropical Studies

The *Organization for Tropical Studies* (OTS) is a nonprofit, scientific, academic consortium whose mission is to provide leadership in tropical biology by promoting education, research, and the wise use of natural resources in the tropics. Founded in 1963, OTS is now composed of 63 premier universities and institutions throughout the world, including LSU. Graduate students at LSU are eligible to participate in the renowned field courses in tropical biology in Costa Rica and other countries and to apply for tropical research fellowships through OTS. Undergraduate biology majors are eligible for the *OTS Semester Abroad*, an integrated program of environmental sciences and Latin American culture.

OTS offices are located at Duke University in the USA and in San Jose in Costa Rica. Three field stations in Costa Rica are located in tropical rain forest (La Selva), tropical dry forest (Palo Verde), and tropical montane forest (Las Cruces) environments. La Selva Biological Station, OTS's flagship facility, is a modern biological research laboratory in the midst of a 3,000-acre lowland rain forest preserve. OTS provides logistical support and offers the use of equipment and field stations for field research in tropical biology. Funds are available through OTS for qualified graduate students to initiate research projects.

Additional information regarding the program and course application forms are available from LSU's OTS Delegate, Dr. Kyle Harms, Department of Biological Sciences, LSU, 202 Life Sciences Building and at kharms@lsu.edu; or from the Organization for Tropical Studies, North American Office, P.O. Box 90630, Durham, North Carolina 27708 and at www.ots.duke.edu.

The role of International Programs at LSU is to provide and facilitate global activities that lead to learning, discovery, diversity, and engagement in keeping with the spirit of the LSU Flagship Agenda. Complementing Louisiana's rich history of global commerce, International Programs is the port of connectivity to a world that is becoming increasingly flatter and easier to navigate. We establish and maintain partnerships with international universities and institutions through which we develop opportunities for students and faculty to achieve a higher level of global awareness, competency, and engagement. Four IP units facilitate the mobility of students and faculty around the world. Academic Programs Abroad provide study abroad experiences for students; International Services and the International Cultural Center serve LSU's international students, scholars, and faculty; Development and Outreach establish the legal framework that enables exchanges of students, faculty, research, and expertise worldwide.

Through its support of all aspects of international education, International Programs contribute to the formation of human capital that makes LSU students and faculty more globally competent and competitive by:

- Making internationalization an integral part of learning, discovery, diversity, and engagement activities;
- Promoting the involvement of all students in significant international education experiences;
- Creating and maintaining an inviting and stimulating environment for academic and cultural experiences for international students and scholars;
- Facilitating an increase in participation by faculty and professional staff in international activities;
- Assisting academic units in internationalizing their curriculum;
- Promoting and facilitating interdisciplinary collaborative research and scholarship; and
- Enhancing international awareness as part of an appropriate balance in student and faculty engagement.

WEBSITE www.lsu.edu/studyabroad

Students participating in *Academic Programs Abroad (APA)* travel worldwide to study for a summer, semester, or academic year. Students earn credit toward LSU degrees and return to LSU to complete their degree. Study abroad is open to all majors.

Through overseas study, students are immersed in foreign languages and cultures, have access to course work unavailable on the home campus, develop personal independence and global awareness, and enjoy academic and travel opportunities that enrich their general education. Many students find that studying abroad gives them an advantage in the job market and in applying for graduate school. Others discover routes to international careers in business, government, law, the arts, and engineering.

Students select from a variety of options. Many join group programs led by LSU faculty, to locations in Europe, Australia, Latin America, Asia, and Africa. Others participate in exchange and junior year abroad programs, which place students directly in overseas universities where they study alongside natives of the host countries. Others participate in domestic exchanges to over 170 U. S. universities in places such as New York, California, and Hawaii. Some students join programs offered by other U. S. schools or enroll directly at a foreign university.

Summer and intersession programs are open to all students with a 2.5 grade point average or better, regardless of classification. International semester or year-long exchanges are open to students with a 2.75 grade point average or better. Domestic exchanges are open to students who have a 2.5 grade point average or better.

Students receive academic credit for study abroad. In LSU faculty-led programs, students receive regular credit in LSU courses, just as they would on campus. In exchange programs and direct-enrollment programs, students earn the credits at the host institution and transfer them to LSU. Prior approval of course selection is required of all students who desire credit for overseas course work. During the period students are away on exchange, they are concurrently enrolled at LSU. *Only students who are enrolled at LSU the semester prior to the semester of study abroad are eligible for concurrent enrollment.*

Students scheduled for full-time studies abroad may use TOPS and most LSU and federal financial aid for their programs. Other scholarship opportunities specifically for study abroad are also available.

The best time for students to begin thinking about study abroad is during the freshman year. At this time, students can decide which courses to take abroad and which courses they plan to complete at LSU. They can also prepare for any language or other skills necessary for the overseas experience.

Interested students are urged to contact Academic Programs Abroad, 103 Hatcher Hall, or call 225-578-6801 for information and an application.

International Services

DIRECTOR	Natalie Rigby
OFFICE	101 Hatcher Hall

WEBSITE	www.oip.lsu.edu/iso

International Services (IS) provides primarily immigration advisory services to international students regarding their educational, financial, immigration, and personal concerns. Similar services are available to international faculty, staff, and research scholars. International Services is responsible for approving the U.S. visa clearance of F and J nonimmigrant students based on financial and immigration information. This office prepares documentation and processes electronic records necessary for F and J international students to achieve and/or maintain proper nonimmigrant F and J student status in the U.S. It organizes orientation programs for all new international students and employees. IS is also responsible for the university's federal regulations compliance with the Department of Homeland Security and U.S. Immigration.

All F and J nonimmigrant international students seeking permission to work on or off campus must receive approval from this office by federal regulations.

The IS assists with the coordination of the university's international student services and programs with community organizations, faculty, campus and student groups, and governmental and private agencies. At this office, international students may apply for very small, short-term personal emergency loans.

All F and J visa status holders are billed for the mandatory university international student service charge each semester of registration.

International Cultural Center

The *International Cultural Center (ICC)* is a cultural and activity center largely funded and governed by international students. Typical ICC programs include social events and excursions, workshops, music, satellite television delivery of live sports from around the world, and theater productions. Space is also available for short-term and emergency overnight accommodations for newly arrived international students and other international guests on a first-come, first-served basis. The ICC also provides pickup services for new international students at the airport or bus station, as well as assistance when needed in finding housing and obtaining a social security number.

With its computer mini-lab and new wireless connection to "LSU Secure" throughout the building, the ICC offers ideal study space until closing time at 10:00 p.m., Monday through Friday.

The ICC is also an occasional venue for rental by the general LSU and Baton Rouge community for events related to the ICC's mission of enabling international students to have a truly multidimensional experience at LSU and to promote international understanding.

Development and Outreach

ASSISTANT DIRECTOR	Jane Chandler

WEBSITE	international.lsu.edu/DevelopmentOutreach.php

Development and Outreach promotes an international presence for our university and our faculty through internationally oriented study, research, and projects on campus and abroad.

The staff works with faculty to secure funding from government and non-government agencies to develop mutually beneficial outreach projects and scientific exchanges that support economic development in Louisiana and other parts of the world.

Serving as the major campus resource for best practices in comprehensive internationalization, the unit also establishes international bilateral and multilateral agreements that serve as the vehicle for research, faculty, and student exchanges abroad. This engagement encourages use of LSU faculty expertise to address real-world issues and strives to make LSU students more competitive in the post-graduate world.

Vision

As a leading university provider of educational outreach and engagement, our vision is to help people achieve their goals and improve their quality of life, their organizations, and their communities.

Mission

The mission of LSU Continuing Education is to identify, create, and support lifelong learning opportunities through quality programs that are timely, capitalize on university expertise, and address educational needs with both credit and non-credit programs.

LSU Continuing Education serves thousands of registrants each year through a wide variety of credit and non-credit programs. Since 1924, Continuing Education has provided flexible and relevant educational programs to meet the needs of both traditional and nontraditional students, whether on the LSU campus or across the globe. Last year, participants in our programs came from every parish in Louisiana, every state in the nation, and 30 countries. From a world-class Management and Leadership Institute to programs designed for lifelong learners of all ages, LSU Continuing Education works to support, promote, and enhance LSU's Flagship 2020 through both face-to-face and distance delivery methods. All programs offered through Continuing Education follow the criteria for evaluation established by the Southern Association for Colleges and Schools (SACS). Credit courses are listed on an LSU transcript along with on-campus courses. Many Professional Development courses award Continuing Education Units (CEUs). All courses are taught by LSU faculty or qualified subject matter experts.

To address the changing needs of lifelong learners, Continuing Education programs focus on four main areas: Distance Learning Programs, Professional Development, Pre-College Programs, and Personal Enrichment.

Distance Learning Programs

PROGRAM MANAGER Donald Beale

MANAGER	Marti Ratcliff

E-MAIL	answers@outreach.lsu.edu

Continuing Education provides opportunities for nontraditional learners to enroll in LSU college credit courses. Through Distance Learning Programs, students are able to earn credit for a wide range of credit courses at anytime, anywhere. Distance Learning programs serve registrants from all over Louisiana, the U.S., and the world.

LSU Continuing Education offers two distance learning programs. *Independent & Distance Learning (IDL)* and *Online Distance Learning (ODL)* offer college credit courses taught by members of the university faculty and qualified instructors. LSU Distance Learning courses attract over 7,000 enrollments annually, from individuals all across the nation and several countries.

College-level distance learning courses are substantially the same in scope and content as those taught on campus. Online, web-enabled, and paper-based delivery methods are offered, and no admission or classroom attendance is required. Enrollment in a distance learning course may be made at any time. These courses are of particular interest to college students who are unable to attend campus classes or who need the flexibility of self-paced enrollment. In addition, college-level courses are taken by high school seniors or graduates who want to earn college credit, as well as individuals working independently toward their professional and academic goals.

Further information concerning independent and distance learning and online distance learning courses, requirements, and opportunities may be obtained on the Continuing Education website, www.outreach.lsu.edu.

Professional Development

Serving the needs of working adults, Continuing Education's Professional Development programs deliver cutting-edge knowledge applicable to today's workforce, in effective formats and at convenient locations.

The programs are designed to build on the strengths and expertise of the LSU faculty and their academic and research units for the purpose of helping participants become more effective in their professional roles. The vast majority of programs are presented by teams comprised of select LSU faculty and proven professionals from business, industry, academia, and leading consulting firms from across the nation. LSU Professional Development's programmatic activities increasingly serve as a major vehicle for knowledge and technology transfer.

Computer & Information Technology

DIRECTOR	Kristy Anthony

FAX	225-578-6761
WEBSITE	www.outreach.lsu.edu

The *Paralegal Studies Program* is approved by the American Bar Association and is an outgrowth of Continuing Education's paralegal course offerings begun in 1982. The program offers a non-credit certificate for individuals seeking careers as paralegals. A bachelor's degree is recommended for admittance to the program, but students with 45 hours of college credit are eligible for admission. The program features evening classes and can be completed in one year. The courses are taught by attorneys, judges, and practicing paralegals.

The Notary Public Preparatory Course is one of the other programs in the paralegal department. There are no entrance requirements to the program and meets once a week for 16 weeks in the evening. It prepares students to take the state notary public exam administered by the Secretary of State's office.

Pre-College Programs

Pre-College & Youth Programs

DIRECTOR Kristy Anthony
OFFICE 1225 Pleasant Hall

WEBSITE www.outreach.lsu.edu/pre-college

Pre-college & Youth Programs conducts numerous programs for young people of pre-college age. Offerings include major summer programs, such as Tiger Challenge, Tiger University, Career Discovery Camps, and various year-round programs and courses such as ACT Prep, Science & Engineering Fairs, and Junior Science & Humanities Symposium.

Science & Engineering Fairs

COORDINATOR Lisa Graves
OFFICE Pleasant Hall
TELEPHONE 225-578-1067
FAX 225-578-4800
WEBSITE www.outreach.lsu.edu/lsef

The *Louisiana Science & Engineering Fair* and the *Region VII Science & Engineering Fair* are LSU-based educational programs that provide unique opportunities for public, private, and home school students in grades six through twelve. Through development and presentation of science and engineering projects, students enhance their abilities to make observations; ask questions regarding scientific phenomena; formulate ideas regarding the solution to a program; develop and carefully follow procedures related to finding an answer or solution to a problem; and effectively present their works to society.

Personal Enrichment Programs

Osher Lifelong Learning Institute at LSU

COORDINATOR Joanne Johnson
OFFICE 2147 Pleasant Hall
TELEPHONE 225-578-6763
WEBSITE www.outreach.lsu.edu/OLLI

E-MAIL

olli@outreach.lsu.edu

The first and only Osher Lifelong Learning Institute in Louisiana, OLLI at LSU is a member-directed educational organization for persons 50 years and older. The program has over 1,200 members and last year conducted over 150 courses attracting more than 3,600 participants.

OLLI at LSU is affiliated with The Bernard Osher Foundation, part of a network of 117 institutes located on university and college campuses throughout all 50 states and the District of Columbia. The Foundation funding supports educational programs for people over 50 –many of whom are entering retirement—providing them with the opportunity to re-tool their skills for the future, explore new topics, discuss current events, and actively engage with peers from all walks of life.

Noncredit courses include such topics as Spanish for Travelers, Southern Women Writers, Backstage at the Symphony, and Digital Photography, offered at convenient times and locations. Members attend courses as participants and also have opportunities to teach courses and serve on committees.

English Language & Orientation Program

MANAGER Margaret Jo Borland

OFFICE 2156 Pleasant Hall

TELEPHONE 225-578-5642

FAX 225-578-4800

WEBSITE is.lsu.edu/newDOCE/elop/default.asp

The English Language and Orientation Program (ELOP) offers English as a second language (ESL) training to international students. The goal of the program is to enable international students to master English, to meet academic, professional, or personal goals, and to facilitate their adjustment to the educational, social, and cultural life of the U.S.

Five eight-week basic courses are offered each year delivering a core curriculum of 20 hours per week in reading, grammar, composition, listening, and speaking. Levels are established by placement tests and range from elementary through advanced. Classes are taught by experienced ESL faculty.

Elective classes include TOEFL preparation, conversation, and English for business classes. ELOP students have access to the ELOP computer lab for listening comprehension classes, independent study, and computer learning applications, including TOEFL programs, text support, and pronunciation programs.

Admission to the English Language and Orientation Program neither signifies nor guarantees admission to LSU.

FAX 225-774-3604

The Reserve Officers Training Corps program at LSU continues the military heritage that has been part of this institution since 1860.

The Army and Air Force ROTC programs are offered for men and women. Through a cross-enrollment agreement between LSU, Southern University, Southeastern University in Hammond, and Baton Rouge Community College, LSU students may also participate in the Naval and Marine Corps ROTC at Southern University A&M College. LSU students in this program take their major courses at LSU and attend Naval and Marine ROTC courses at Southern University. Upon graduation, students are commissioned as Ensigns in the United States Naval or 2nd Lieutenants in the United States Marine Corps. Participation in these programs is optional. These programs develop selected college-educated students for positions of responsibility and leadership in the U.S. armed forces and offer students an educational experience not otherwise available at this university.

Military Science and *Aerospace Studies* are the titles of the Army and Air Force ROTC programs, respectively. Military science, aerospace studies, and naval science are recognized electives, and students may choose to pursue Army, Air Force, or Navy curricula. Prior to graduation, Army ROTC cadets must take courses in military history and pass a combat water survival test.

Army ROTC conducts two- and four-year programs and Air Force ROTC conducts three- and four- year programs. Successful completion of any of these programs will result in the student being offered a commission in the appropriate service. In addition, scholarship programs that cover university fees, books, laboratory fees, and related academic expenses along with a monthly subsistence allowance are available for selected students. Students enrolled in the Army ROTC program may compete for scholarships of two, three, three and one half, or four year duration. Students enrolled in Air Force ROTC may compete for scholarships of two, three, three and one half, or four year duration.

Eligibility

In order to be considered for enrollment in an ROTC program, a student:

- must be full-time;
- must be a U.S. citizen or an applicant for naturalization;
- must have good moral character as required by military regulations;
- (for the advanced program) must be physically qualified to participate as prescribed by the Department of Defense;
- must be at least 14 years of age upon enrollment in the Air Force ROTC program, at least 17 years of age upon enrollment in the Army ROTC program, and at least 17 years of age upon enrollment in the Naval ROTC program;
- must be under 30 years of age at the time of commissioning (selected cases may be waived to age 35); and
- must take and sign the Oath of Allegiance.

Four-Year Program

The four-year program is divided into two phases—the freshman/sophomore phase and the junior/senior phase. These two phases are officially called the *Basic and Advanced Course* by the Army; the Air Force designates them as the *General Military Course* and the *Professional Officer Course*. Students who have completed the freshman/sophomore phase may apply for the junior/senior phase. Selection for enrollment into the latter is made from those who have demonstrated that they possess the qualities necessary to qualify for a commission.

Veterans and students who had junior ROTC training while in high school may be granted placement credit for the freshman and sophomore phase and may enter the junior and senior phase if their application is approved by the Professor of Military Science or the Professor of Aerospace Studies. For Air Force ROTC, you must have one year of ROTC in order to compete for entry into the *Professional Officer Course*.

Military Obligation

Except for ROTC scholarship cadets or contract cadets, LSU students do not incur a military obligation by enrolling in the Army ROTC Basic Course or the Air Force ROTC General Military Course.

Two-Year Program

The two-year program extends the advantages of ROTC to junior-college graduates, transfer students, graduate students, and LSU students who did not enroll in the freshman/sophomore phase. Upon successful completion of a five-week summer training period, the student applying for the two-year program may enter the junior/senior phase.

Army ROTC Summer Training

Army ROTC Advanced Course cadets attend a five-week camp between the junior and senior years of college. At this camp, cadets receive training and evaluation in troop leadership, marksmanship, land navigation, small unit tactics, physical training, and adventure training. In addition to this camp, cadets have the opportunity to attend Airborne School, Air Assault School, Northern Warfare School, and Cadet Troop Leadership Training.

Air Force Field Training

Air Force ROTC field training is offered during the summer months at Maxwell Air Force Base in Montgomery, Alabama. Students participate in a four week long field training program prior to enrollment in the Professional Officer Course. The major areas of study in the four-week field training program include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions and Air Force environment, and physical training.

Army Simultaneous Membership Program (SMP)

This program combines service in the Army National Guard or U.S. Army Reserve with enrollment in the Army ROTC program. It is open to eligible Guardsmen and Reservists who have attained sophomore academic standing. ROTC cadets also may enter this program after entering the Advanced Course. SMP participants will attend ROTC instruction and train with their military unit one weekend per month and two weeks in summer.

SMP participants will receive the ROTC subsistence allowance, plus the equivalent of a sergeant's pay for the monthly drill attendance and two weeks annual training. They will also receive the tuition exemption extended to all Louisiana residents in the Louisiana Army National Guard who maintain a 2.00 GPA. At the end of the Advanced ROTC program, these students will apply for commissions in the Active Army, Army National Guard, or the Army Reserve.

The Naval Reserve Officers Training Corps

Through a cross-enrollment agreement between LSU and Southern University, LSU students are eligible to enroll in the Naval Reserve Officers Training Corps (NROTC) leading to a commission in the U.S. Navy or Marine Corps. Openings are available in the four-, three-, or two-year programs. NROTC is open to all students; naval science courses are taught on the Southern University campus. There is no additional cost to full-time LSU students to cross-enroll in the NROTC program. Students incur no obligation while participating in the freshman and sophomore years. NROTC scholarship appointments are available to college students enrolled in the program who demonstrate satisfactory academic performance and aptitude for commissioned service.

Midshipmen are required to complete two semesters of mathematics courses (college algebra or above) and two semesters of a physical science in addition to naval science courses. Scholarship students have the additional requirement of completing two semesters of calculus (MATH 1550 and MATH 1552) and the physics sequence required by their degree program (PHYS 2110 and either PHYS 2112, PHYS 2113 or all three courses). Students who are in the second year of college, have completed one year of mathematics, and are in good academic standing are eligible to attend the Naval Science Institute (NSI) in Newport, Rhode Island. Successful completion of NSI, an academic and professional naval science program held for six weeks in the summer, qualifies students for enrollment in advanced NROTC courses and enables them to compete for a two-year NROTC scholarship. All costs for attending NSI are paid by the Navy, and students attending are under no obligation. Naval ROTC offers a wide range of career opportunities including naval aviation (Navy and Marine Corps); submarine, surface, and special warfare (Navy); and combat arms and combat service support (Marine Corps).

Information on the naval science curriculum and a listing of naval science courses may be found in the Southern University catalog. Additional details may be obtained from the Professor of Naval Science/Commanding Officer, NROTC Unit, Southern University, P. O. Box 9214, Baton Rouge, Louisiana 70813; 225-771-4370; FAX 225-774-3604.

LSU–Southern University Cooperative Programs

LSU and Southern University have conducted cooperative programs for a number of years. A student exchange program began in 1970, and exchange of faculty and cooperation in research have also occurred. In recent years, the number and extent of cooperative efforts between the two institutions have greatly increased.

Student Exchange

LSU and SU students may take courses at the other institution under an expanded and simplified cross-registration program between the two universities. This program enables students to take courses not available at the institution where they matriculate. Both full-time and part-time students are eligible to participate. Full-time students pay no additional fees; part-time students pay fees based on the total number of hours for which they are registered. Cross-registration tuition exemptions do not apply to Continuing Education courses, or to the special fees attached to some courses.

Work taken at Southern University is recorded as transfer credit, as is all course work taken outside the LSU System.

Interested students can obtain information from the Office of the University Registrar at LSU, the Registrar's Office at SU, and the offices of academic deans at both institutions.

Library Privileges

Participants in the faculty and student exchange are allowed the same library privileges granted to members of the faculty and student body at the home institution. Students and faculty not participating in these exchanges also have access to the library at the other institution.

Academic Programs

Chemistry and Chemical Engineering

This program enables a student to earn a Bachelor of Science degree with a major in chemistry from Southern University and a Bachelor of Science in Chemical Engineering degree from LSU within a period of approximately five years. At least three-fourths of the hours required for the Southern University bachelor's degree must be earned at Southern University. The student may then be admitted to LSU to complete requirements for the Bachelor of Science in Chemical Engineering degree. Such students qualify for all benefits of the student exchange program.

Environmental Sciences

The Master of Science degree in environmental sciences, a cooperative, multi-disciplinary program between LSU and SU, requires a minimum of 30 semester hours of course work and six hours of thesis research. Four options are available: environmental toxicology and environmental planning and management offered at LSU, and environmental biology and environmental chemistry offered at SU. A graduate student at either institution may register for any of the four options. Four core courses are common to all options and must be taken by all students. Different areas of concentration permit the design of individual and specialized job-oriented programs.

Mechanical and Petroleum Engineering

SU students enrolled in the mechanical engineering curriculum may elect a petroleum engineering option. Such students take six credit hours of specified chemistry courses at SU and twelve hours of specified petroleum engineering courses at LSU.

Naval Science

Through a cross-enrollment agreement between LSU and SU, LSU students are eligible to enroll in the SU Naval Reserve Officers Training Corps leading to a commission in the U.S. Navy or Marine Corps. Naval ROTC is open to all students, and all naval science courses are taught on the SU campus. For additional information, see the "Reserve Officers Training Corps" section of this catalog.

Honorary Societies

Louisiana State University sponsors honorary societies to recognize, through membership, those students who have established outstanding scholastic records. Criteria for membership varies e.g., scholastic achievement, grades, community service, or leadership. Some honorary societies select members by invitation only; for others, students must submit applications. In addition to the campus-wide honorary societies mentioned here, many colleges and departments sponsor campus chapters in their individual disciplines.

Information regarding specific college or departmental honorary societies can be obtained from the respective college or department.

Alpha Lambda Delta

WEBSITE

www.nationalald.org

Alpha Lambda Delta is a national society that recognizes academic excellence during a student's first year at college. Founded in 1924 at the University of Illinois, Alpha Lambda Delta has over 270 chapters across the United States and has initiated over 900,000 students. Membership is open to all freshman and transfer students who meet the following academic qualifications: 1) must be registered for a full course of study leading to a bachelor's degree; 2) rank in the top 20 percent of their freshman class; and 3) obtain a 3.5 GPA, the minimum scholastic average required for membership. Eligibility for freshman and transfer students is based grades from the first semester, or on the cumulative average of the first year in college; students must have completed 12 credits with no "D" or "F" in any subject.

Gamma Beta Phi

WEBSITE

www.lsu.edu/studentorgs/gbp/

Gamma Beta Phi is an honorary and service organization for students in colleges and universities in the United States. The three major objectives of Gamma Beta Phi is to recognize and encourage individual excellence in education, promote the development of leadership and character in its members, and to foster, disseminate and improve education through appropriate service projects. All students in the top 15 percent of their graduating class are invited to join. Students must earn a total of 7 points per semester to retain active member status.

Golden Key

WEBSITE

www.lsu.edu/studentorgs/goldenkey/index.html

Golden Key is an international honor society and service club that aims to help students serve the community and gain valuable experience. Golden Key was originally founded in 1977 by undergraduates at Georgia State University. It is currently the world's largest collegiate honor society, with over 365 chapters at universities in 7 countries: United States, Australia, Canada, Malaysia, New Zealand, South Africa, and the United Arab Emirates. Membership is invitation only, and only the top 15 percent will receive an invitation by the end of their freshman year.

Mortar Board

WEBSITE

www.lsu.edu/student_organizations/mortarboard/

Mortar Board is the premier national honor society recognizing college seniors for outstanding achievement in scholarship, leadership, and service. Since its founding in 1918, the organization has grown to 228 chartered collegiate chapters with nearly a quarter of a million initiated members across the nation. The Blazer chapter at LSU was chartered in 1934. Mortar Board

provides opportunities for continued leadership development, promotes service to colleges and universities, and encourages lifelong contributions to the global community.

National Society of Collegiate Scholars

WEBSITE

www.nscs.org

The National Society of Collegiate Scholars (NSCS) is an honor society for high-achieving first and second year students. NSCS has over 270 chapters across the United States and over 750,000 members. NSCS provides career and graduate school connections, leadership and service experiences, access to discounts and savings as well as \$250,000 in scholarships annually. Members must have a GPA of 3.4 or above and rank in the top 20 percent of their class.

Omicron Delta Kappa

WEBSITE

www.odk.org

Omicron Delta Kappa is the first college honor society of a national scope to give recognition for leadership. Since its founding, over 300,000 individuals from over 300 college and university campuses across the United States have been recognized for meritorious leadership and service in extracurricular activities. Membership is based on the candidate's scholastic record and aptitude for a career in the information professions. Membership is awarded to undergraduate junior and senior students; to graduate students; to faculty, staff, administration, and alumni; and to persons qualifying for membership "honoris causa." Student membership candidates must rank in the upper 35 percent of their school or college and must show leadership in at least one of the five phases of campus life: 1) Scholarship; 2) Athletics; 3) Campus or Community Service, Social and Religious Activities, and Campus Government; 4) Journalism, Speech, and the Mass Media; and 5) Creative and Performing Arts.

Phi Beta Kappa

WEBSITE

www.lsu.edu/student_organizations/phibetakappa/

The oldest academic society in the U.S., Phi Beta Kappa was founded in 1776 at the College of William and Mary. The LSU chapter was installed in 1977 as Beta of Louisiana. For more than two centuries, Phi Beta Kappa has advocated the ideal of a liberal education as a basis for a life-long love of learning and as a way to broaden the perspectives of students, whatever their chosen field of endeavor. At LSU, juniors and seniors with an excellent academic record and an adequate breadth of study are considered for membership.

Phi Eta Sigma

WEBSITE

www.phietasigma.org

Phi Eta Sigma was founded at the University of Illinois in 1923 to encourage and recognize scholastic achievement among members of the freshman classes. Phi Eta Sigma is the third most senior member of the Association of College Honor Societies. Since its founding, more than 975,000 scholars have been inducted, and chapters are chartered on 365 campuses across the United States. Those elected to membership include those who have a cumulative grade-point average of at least 3.5 on a 4.0 scale at the end of any first year, full-time curricular period, provided they have carried a normal academic load acceptable toward a bachelor's degree and rank in the upper 20 percent of their class.

Phi Kappa Phi

WEBSITE

www.phikappaphi.org/web/join/lsu.html

Founded in 1897 at the University of Maine, Phi Kappa Phi is the nation's oldest, largest, and most selective honor society for all academic disciplines. Its chapters are on nearly 300 campuses in the United States, Puerto Rico, and the Philippines. Each year, approximately 30,000 members are initiated. The LSU chapter was founded in 1930 as the 43rd chapter in the nation. The mission of Phi Kappa Phi is to recognize and promote academic excellence in all fields of higher education and to engage the community of scholars in service to others. Phi Kappa Phi is unique because it recognizes superior scholarship in all academic fields, rather than restricting membership to a limited field. Juniors in the top 7.5 percent and seniors and graduate students in the top 10 percent of their classes may be initiated and honored in the spring semester each year and wear identifying ribbons on their academic gowns at commencement exercises.

Alumni Relations Development

Private support of Louisiana State University is led by a consortium of three independent foundations, each with its own governing board, staff, and unique mission. In addition, many academic units of the university have volunteer development councils and "friends" groups who focus on the special interests of the units.

LSU Alumni Association

CHARLIE W. ROBERTS, JR., *President & CEO*
CLIFF VANNOY, *Executive Vice President & COO*

Lod Cook Alumni Center

FAX 225-578-3816

WEBSITE www.lsualumni.org

Since its establishment in 1905, the mission of the *LSU Alumni Association* (LSUAA) has been to protect, promote, and foster the welfare of LSU and to create and nurture mutually beneficial relationships between the university and its alumni and former students. The association, using the talents and resources of alumni and friends of LSU, supports the university in pursuit of excellence in its mission of teaching, research, and public service.

The LSU Alumni Association is a nonprofit organization whose members are graduates, former students, and friends of LSU. Active membership may be obtained through an annual contribution of \$50 or more to the Alumni Fund. Membership benefits include a subscription to *LSU Alumni Magazine* and discounts at the Shelton Gift Shop and the University Golf Course, The Cook Hotel, and car rentals. Members may participate in group travel, various insurance offerings, join the Campus Federal Credit Union, and apply for an LSUAA Gold or Platinum Plus MasterCard with no annual fee. In addition, members are entitled to limited use of several university facilities.

Alumni gifts generated through the Alumni Fund support the operation of its programs of academic excellence, including the Alumni Scholars Program and other academic scholarships; alumni professorships; various other faculty awards; and seminars, workshops, and meetings.

The association, headquartered in the Lod Cook Alumni Center, hosts reunions, campus visitations, and chapter programs throughout Louisiana, across the U.S., and abroad each year. Awards for outstanding individual achievement and service sponsored by the LSUAA include the *LSU Hall of Distinction*; *LSU Alumnus of the Year*, the university's highest alumni honor; *Young Alumnus of the Year*; and *Chapter Service Awards*. Extraordinary philanthropy is recognized and acknowledged with the prestigious *Purple and Gold Award*.

The LSU Alumni Association manages and operates The Cook Hotel on the LSU campus. Opened in October 2001, the hotel is located directly behind the Lod Cook Alumni Center. The hotel is open to the public and offers 128 first-class rooms and suites. In addition to the meeting rooms in The Cook Hotel, the Lod Cook Alumni Center offers 12,000 square feet of meeting space for conferences, seminars, workshops, receptions, lectures, and banquets. Catering is provided by Unique Cuisine Catering, the association's exclusive caterer. For conference or event bookings, call 225-578-3829. Individual or group hotel room reservations may be placed by calling toll-free 866-610-2665 or by logging on to www.thecookhotel.com.

The John and Rose Ann Shelton Gift Shop offers the very best in LSU attire, gifts, and accessories. Conveniently located in The Cook Hotel, shoppers are invited to visit the store Monday through Saturday from 8 a.m. to 5 p.m. Items can also be viewed and purchased via the website at giftshop.lsualumni.org. For more information, contact the gift shop at 225-383-0241.

The newest addition to the LSU Alumni Association Complex is the Jack and Priscilla Andonie Museum. Dedicated on May 25, 2004, the museum houses a spectacular display of historical LSU sports memorabilia donated by the Andonie family. For more information, visit the Andonie Museum website [here](#) or call 225-578-3828.

The LSU Alumni Association, organized along both academic and geographic lines, offers membership in alumni chapters and academic affiliate chapters nationwide. The organization is governed by a National Board of Directors, which formulates and administers policy. Additional information concerning membership in the LSU Alumni Association, its subsidiaries, or programs may be obtained by calling 888-RINGLSU or 225-578-3838 or at www.lsualumni.org.

WEBSITE www.lsufoundation.org

E-MAIL donorservices@lsufoundation.org

Chartered in 1960, the LSU Foundation is a nonprofit, tax-exempt, private foundation composed of business, professional, and civic leaders concerned with the advancement of LSU. Inquiries concerning LSU Foundation membership, current contribution priorities, assistance with estate planning, or other information are encouraged and welcomed.

The LSU Foundation fosters philanthropic support of the colleges and schools of the university, including capital gifts for endowments, facilities, special programs of educational excellence, and unrestricted funds for the highest priority needs of the university. The Foundation serves four units of the LSU System: LSU, the LSU Agricultural Center, LSU Law Center, and the LSU System Office.

The LSU Foundation also manages most of the endowed funds and other assets donated by private individuals, corporations, and organizations for the benefit of the university. The Foundation invests the funds for the benefit of specific purposes in the various colleges, schools, and departments of the university.

Gifts made through the LSU Foundation have provided many enhancements that would not have been available otherwise, including endowed chairs and professorships, distinguished lecture series, endowed scholarships, endowed fellowships, library resources, and awards programs for faculty, staff, and student achievement. The Foundation is the authorized agency for management of the 40 percent matching grants for chair and professorship endowments provided by the Louisiana Board of Regents Support Fund. Always, 100% of the donor principle donations, whether endowed or non-endowed, are used for its donor designated purpose.

Gifts made to LSU through the LSU Foundation may be designated by the donor for the highest priority needs of the university or a department, or may be restricted to specific uses. Endowments may be named by the donor. Gifts may also be included in the estate plans of individuals, using wills, trusts, insurance policies, and other planning methods. Gifts to the LSU Foundation are tax-deductible charitable contributions as allowed by law.

Further information may be obtained at www.lsufoundation.org. Confidential consultation is available upon request.

Tiger Athletic Foundation (TAF) is a private, nonprofit corporation dedicated to supporting LSU and its Athletic Program. Louisiana State University has a proud athletic tradition, highlighted by scores of Southeastern Conference and NCAA championships in more than 20 men's and women's varsity sports. Thanks to the generosity of its members, TAF continues to play an integral role in sustaining that outstanding tradition. As the primary source of private funding for LSU athletics, TAF's mission is clear: to lead the university in building a comprehensively superior athletic program.

Among the many accomplishments of the TAF are the \$110 million improvements to college football's greatest venue, Tiger Stadium. These improvements included the construction of the east side Tiger Den Suites and upper deck, the renovation of the west side Stadium Club, and a press box. Most recently, there has been construction of new entry gates and the addition of the Champion's Plaza on the west side of Tiger Stadium. In addition, TAF raised over \$18 million to construct the Cox Communications Academic Center for Student-Athletes, \$3 million to construct a state-of-the-art habitat for Mike the Tiger, \$19 million for the new LSU Football Operations Center, \$4 million for the construction of suites in the new Alex Box Stadium and the construction of Tiger Park, and \$4 million for the renovation of the University Club Golf Course.

TAF continues to raise funds for projects including the preservation of Tiger Stadium, a new tennis facility, a gymnastic practice facility, and the Foundation of Champions Scholarship Endowment Program.

Administration

LSU, the flagship institution in the state, reports to the Board of Supervisors of Louisiana State University and Agricultural and Mechanical College. The Board of Supervisors is established by Article 8, Section 7, of the Louisiana Constitution and is granted authority and responsibility to supervise and manage the institutions, statewide agricultural programs, and other programs administered through its system.

The university is administered by the LSU System Office, which also oversees nine other institutions located throughout the state.

A listing of websites for the Board of Supervisors, the University System, and LSU administrative offices is available below.

To view the complete organizational chart for the university, please visit: www.lsu.edu/orgchart.

Faculty

The *faculty* of the university is defined as full-time members of the academic staff having the rank of instructor or higher (or equivalent ranks).

Distinguished Professorships

Boyd Professors

Faculty members who are designated as Boyd Professors have attained both national and international distinction for outstanding teaching, research, or other creative achievement. The Boyd Professorship is the *highest professorial rank* awarded by the university.

Alumni Professors

Selection as an Alumni Professor is based on reputation for excellence in instruction, especially in undergraduate teaching; record of active and continuing interest and participation in areas of professor-student relations; dedication to an academic field; and outstanding professional relationships with other faculty and staff members.

LSU Foundation Professors

Funded through the generosity of the LSU Foundation, these professorships are awarded by the university in recognition of exemplary distinction in research, scholarship, and the arts.

For a complete and up-to-date list of professorships, please see the Office of Academic Affairs website here.

Graduate Faculty

The LSU Board of Supervisors requires the university to maintain a graduate faculty comprised of members of the teaching, research, and extension faculties who have been so designated by the Chancellor, upon the recommendation of the Graduate Council acting upon appropriate nominations. LSU's Graduate Faculty enables the university to maintain its accreditation through the Southern Association of Colleges and Schools (SACS) while furthering the university's national flagship agenda to increase the number and quality of graduate students and programs.

As described below, faculty members can qualify, depending on their qualifications, for the following types of graduate faculty membership: associate, full, research affiliate, or professional affiliate.

The academic deans are responsible for Graduate Faculty appointments for tenured and tenure-track faculty in their programs. The deans may elect to involve an associate dean or a college committee in the review process but the dean retains responsibility for the appointment of graduate faculty in their colleges. The Graduate School dean with the involvement of the Graduate Council maintains and periodically reviews records of graduate faculty status.

The academic deans approve graduate faculty status within hiring, promotion and/or tenure decisions, and in annual reviews (see items 1, 2, & 3). They continue to recommend three-year appointments for professional and research affiliates (see item 4) and recommend administrative approvals for non-graduate faculty (see item 5).

Graduate Faculty Status is determined and evaluated in the following situations.

1. INITIAL APPOINTMENT – With initial appointment at LSU, Graduate Faculty (GF) status (Associate, Member, Research Affiliate or Professional Affiliate) and term will be noted on the appointment form. The Graduate School

(GS) working with HRM will document these GF appointments. For tenured and tenure-track appointments the academic dean's approval of GF status on the appointment form is required. Assistant professors are appointed as associate members for six year terms.

2. **AT PROMOTION AND/OR TENURE REVIEW** – The promotion and/or tenure package will include a recommendation for GF status to be effective the same date as the proposed action. GS working with HRM will document the outcome of the review. Graduate Council Subcommittee review is continued for tenure and promotion as one part of the Provost's Advisory Committee review.
3. **ANNUAL REVIEW** – All faculty participate in an annual performance evaluation. In the annual evaluation, the department chair will consider whether the graduate faculty member has demonstrated a current and sustained record of scholarly or creative activities consistent with the standards for GF status. Based on the evaluation, the department chair will recommend to the dean (a) continued appointment to GF; (b) conditional continued appointment to GF – with recommendations for improvement in teaching and/or research; (c) change/removal of GF status. If the chair recommends conditional continued appointment or change/removal of GF status, the faculty member must submit a current CV to the dean. The dean will make the final determination of the GF status. Changes in GF status should be documented with a justification given. A review of the GF status of deans, vice-chancellors, and others reporting directly to the provost is included in the individual's annual review by the provost and any change in the GF status is reported to the graduate dean.
4. **TERM OR OFF-CAMPUS APPOINTMENTS** – Faculty not on tenure track or not appointed on the LSU A&M campus should include a GF status evaluation in annual reviews. These appointments usually involve research affiliate or professional affiliate status, which will continue as three-year term appointments. New appointments and reappointments should be reviewed and reported to the GS upon recommendation by the academic dean. The Graduate Council will make a recommendation regarding GF status to the graduate dean who will make the final approval.
5. **ADMINISTRATIVE APPROVALS** – All other GF appointments are handled via administrative approvals by chairs with the academic college dean's recommendation using an administrative approval form with CV. Administrative appointments should be sent forward to the GS upon recommendation by the academic dean for approval by the GS dean.

The faculty member may appeal the decision regarding his/her GF status to the Graduate Council. The appeal must include the justification for the status change or conditional continuation from the academic dean. The faculty member may choose to provide a defense of his/her record in addition to the CV. The Graduate Council will make a recommendation to the Vice-Chancellor for Research and Economic Development who will make the final decision regarding the individual's GF status.

Types of Membership

Associate Member (A)

Privileges and Responsibilities

- Engage in all graduate education activities.
- Chair a thesis or dissertation committee.

Terms and Criteria

- Newly appointed tenure-track assistant professors in units offering work for graduate credit are normally appointed to an associate member six-year term, subject to annual review.
- Faculty members with at least seven years in rank as associate professor or full professor who do not maintain full membership may be eligible for a renewable, three-year associate member term in units offering work for graduate credit.
- Associate members of the graduate faculty must possess the highest degree appropriate to the field or unquestionable evidence of comparable achievement in the field.
- To maintain graduate faculty status associate members must demonstrate a current and sustained record of scholarly or creative activities indicated by publications in recognized journals in the field, books, and exhibitions or performances.

Full Member (M)

Privileges and Responsibilities

- Determine policies of The Graduate School.
- Engage in all graduate education activities.
- Nominate faculty for membership on the graduate faculty.
- Chair a thesis or dissertation committee.

Terms and Criteria

- Newly appointed associate professors with tenure or tenure-track in units offering work for graduate credit are normally appointed as full members, subject to annual review.
- Newly appointed full professors with tenure or tenure track in units offering work for graduate credit are normally appointed to as full members, subject to periodic review.
- Full members of the graduate faculty must possess the highest degree appropriate to the field or unquestionable evidence of comparable achievement in the field.
- To maintain graduate faculty status full members must demonstrate a current and sustained record of scholarly or creative activities indicated by publications in recognized journals in the field, books, and exhibitions or performances.

Research Affiliate (F)

Privileges and Responsibilities

- May serve as a member of thesis and dissertation committees but may not chair except by permission of the college dean and dean of The Graduate School.
- May engage in instructional activities at the master's and doctoral level.

Terms and Criteria

- Individuals nominated for research affiliate may be appointed to a renewable, three-year term.
- Research affiliate membership is available to individuals whose appointments reside in units not offering work for graduate credit or whose appointments are not tenure-track.
- Research affiliate members must possess the highest degree appropriate to the field or unquestionable evidence of comparable achievement in the field.
- To maintain graduate faculty status research affiliate members must demonstrate a current and sustained record of scholarly or creative activities indicated by publications in recognized journals in the field, books, and exhibitions or performances.

Professional Affiliate (P)

Privileges and Responsibilities

- May engage in instructional activities at the master's level.
- May not engage in instructional activities at the doctoral level except by permission of the college dean and dean of The Graduate School.
- May serve as a member of thesis committees but may not normally chair except by permission of the college dean and dean of The Graduate School.

Terms and Criteria

- Individuals nominated for professional affiliate by units offering work for graduate credit may be appointed to a renewable, three-year term based on evidence of expertise or knowledge that is directly relevant and applicable to the professional program in which the individuals will be teaching.
- Expertise is defined in terms of recent activities recognized by the focal area as indicative of excellence. Appropriate indicators may include but are not limited to: terminal degrees in focal or relevant areas; professional certification;

licensure, diplomas, or record of professional practice; and demonstrated professional excellence through performances, exhibitions, presentations, professional publications, or national awards.

- Normally, a person who is eligible for full or associate graduate faculty status is ineligible for professional affiliate status.
- Individuals whose professional activities are a function of their LSU employment are normally ineligible for professional affiliate status.

Emeritus

A faculty member who holds full membership on the graduate faculty may be named as graduate faculty emeritus upon retirement provided that the faculty member has been approved for emeritus status through the LSU System per PM69. Emeritus graduate faculty status allows these faculty to continue to work with graduate students on master's and doctoral committees as chairs and members.

Review of Nominations

For individuals who are not appointed to tenure-track or tenured positions, units may nominate them for the appropriate level of membership. When it is time for a faculty member to be reviewed for graduate faculty status, the Graduate School will notify the unit. Graduate Faculty Nomination forms may be found on our website.

The dean of the Graduate School, or his/her representative, will review the Graduate Faculty Nomination and current vita to see that the nominee meets the requirements for appointment to the graduate faculty. The dean will appoint a committee comprised of the dean and three members of the Graduate Council to review the nomination. These four persons will independently review the nomination and arrive at their determinations as to the level of membership the faculty member should be accorded. Their votes will be recorded and tallied. If the majority of the votes agree with the nomination made by the unit, the nomination then goes to the entire Graduate Council for final review and vote.

If less than a majority agree with the unit's nomination, the dean will call the committee together to review the nomination. Each member of the committee then has an opportunity to discuss the nomination and change his/her vote. If the majority then agrees with the unit's nomination, the nomination goes to the entire Graduate Council for review and vote.

If there is not a majority of votes that support the unit's nomination, the dean will contact the chair to apprise him/her of the situation and determine if there is any additional information that can be supplied to support the nomination. The chair may agree with the committee's decision, in which case the nomination goes to the entire Graduate Council for review and vote. If the chair wishes to appeal the preliminary decision of the committee, additional materials may be submitted. If additional information is to be submitted, the chair should normally submit it to the Graduate School within two weeks. The materials are placed with the original nomination form and vita and each committee member independently reviews them once again as if it was a new nomination. The results of this second review are then submitted to the entire Graduate Council for review and vote.

At any time, units may submit a new nomination for a faculty member. Moreover, an individual faculty member may submit an appropriately prepared nomination at any time.

Evaluation of Administrators

The following is copied from a memo by Dean Hargrave to all departments on November 7, 1978 and is the procedure that is still followed by the Graduate Council today.

With respect to the extent to which persons with administrative responsibilities must satisfy requirement for "current and sustained creative activities related to programs of graduate education as evidenced, by publications in recognized journals in the field," The Graduate Council, in 1978, passed a resolution on this question:

"For department chairmen, deans, associate deans, and other persons holding administrative positions, the publication productivity may be less than that expected of other members of the department. At the same time, however, some

"current and sustained activity" should be in evidence. Graduate Faculty membership should reflect a working relationship to the graduate program as well as the proper qualifications for that relationship."

Administrative Approval to Teach Graduate Courses

The following is copied from a memo by Dean Hargrave to all departments on November 7, 1978 and is the procedure that is still followed by the Graduate Council today.

The Graduate Council has recommended that the Dean of The Graduate School grant administrative approval to teach 4000-level courses for graduate credit to faculty who do not meet the scholarship requirement for Associate Member or Member of the Graduate Faculty but who have the highest degree appropriate to the field and hold the rank of Assistant Professor or higher. It is best to submit that member for Administrative Approval rather than as Associate Member or Member.

Administrative Approval requests may be made for a period of up to three (3) years. A Graduate Faculty Administrative Approval Request Form and current LSU format vita should be submitted with the request.

For a complete and up-to-date list of graduate faculty members, please see the Graduate School website [here](#).

Glossary

The following are definitions of terms that may be used throughout this *General Catalog*.

Academic Load

The total number of semester hours for which a student is registered in one semester or summer term.

Academic Year

The period consisting of fall and spring semesters.

Advanced Standing

Academic credit for one or more courses awarded to beginning freshmen upon their successful performance on an examination.

Approved Elective

Elective that is not open to the free choice of the student.

Audit

To enroll in a course for no credit.

Center for Freshman Year

The division in University College in which most freshman students enroll. The freshman year in the center and the following three years in one of the senior colleges represent the normal time required for completion of a baccalaureate degree program.

Colleges and Schools

The academic units of the university that offer academic degree programs; administered by deans or directors and staffed by faculty members. The type of training and the degree anticipated determine the student's choice of school or college.

Concentration

An alternative track of courses within a major, accounting for at least *30 percent* of the major requirements. Establishment of a concentration does not require prior approval by the Board of Regents.

Corequisite

A concurrent requirement; usually a course or some other condition that must be taken at the same time as another course.

Credit

(1) The recognition awarded for the successful completion of course work.

Cross-Listed

The same course offered under the rubrics of two or more departments.

Cumulative Average

A student's grade point average based on the total number of quality points earned and the total number of semester hours attempted.

Curriculum

A description of the required and elective courses for a degree program.

Degree

The title of the award conferred on students by a college, university, or professional school upon completion of a unified program of study (i.e., Bachelor of Arts–BA; Bachelor of Science–BS; Master of Science–MS; Master of Fine Arts–MFA; Doctor of Philosophy–PhD, etc.).

Degree Designation

A degree designation for each authorized program at a public institution of higher education in Louisiana is listed in the *Board of*

Regents' Inventory. Some programs require the name of the subject area as part of the degree designation (i.e., Bachelor of Architecture–BArch; Master of Social Work–MSW; Juris Doctor–JD, etc.).

Degree Program

A grouping of campus-approved courses and requirements (i.e., minimum GPA, comprehensive examinations, English and mathematics proficiency, etc.) that, when satisfactorily completed, will entitle the student to a degree from a public institution of higher education.

Degree Subject Area

The primary discipline/field that constitutes the focus of a degree program. For example, a Bachelor of Arts in *history*. In some cases, the degree subject area is part of the degree title, as in Bachelor of Architecture, Master of Landscape Architecture.

Degree Title

The complete label of a degree program consisting of the degree designation and the degree subject area (i.e., Bachelor of Arts in history; Bachelor of Science in chemistry). After satisfactorily completing a degree program, a student will be entitled to a degree in the appropriate subject area from a public institution of higher education.

Departments

The academic units of the university within colleges or schools; administered by heads or chairs.

Elective

Course chosen by the student, as opposed to required course. The term *elective*, without a qualifier, will be understood to be a free elective, chosen by the student at his or her option from all the courses offered by the university for degree credit, with due regard for prerequisites.

Equivalent

When used in a course prerequisite (e.g., *Prereq: SOCL 2001 or equivalent*), this term means either credit in a comparable course or adequate preparation by other experience. Determination of equivalency is left to the discretion of individual departments.

Good Standing

Students are in good standing if they are eligible to continue or to re-enroll at the university, even if on scholastic probation or on scholastic warning status.

Grade Point Average (GPA)

A measure of scholastic performance; the ratio of quality points earned to semester hours attempted.

Major

That part of a degree program consisting of a specified group of courses in a particular discipline or field. The name of the major is usually consistent with the degree subject area. A major usually consists of *25 percent* or more of the total hours required in an undergraduate curriculum. Establishment of a major requires prior approval by the Board of Regents.

Matriculation

The state of being registered for credit and working toward a specific degree.

Minor

That part of a degree program consisting of a specified group of courses in a particular discipline or field. The minor usually consists of *15 percent* or more of the total hours required in an undergraduate curriculum. Establishment of a minor does not require prior approval by the Board of Regents.

myLSU

The newest LSU portal provides single sign on access to numerous LSU resources including Moodle and TigerWare.

Nonmatriculated

The state of being registered for credit but not working toward a specific degree. Both graduate and undergraduate students may register as *nonmatriculated*.

Pre-professional Program

A nondegree program of study in preparation for entry into a professional degree program at another institution or another division of the university; normally takes from one to three years to complete.

Prerequisite

The preliminary requirement, usually credit in another course, that must be met before a course can be taken.

Proficiency Examination

A test equivalent to a final examination in a college-level course in which a student not formally enrolled may demonstrate competence and earn academic credit.

Quality Point

Numerical value assigned to each letter grade from "A" to "F," when given as the final grade in a course; provides a basis for quantitative determination of a grade-point average. Quality-point values at LSU are as follows: "A" = 4, "B" = 3, "C" = 2, and "D" = 1.

Registration

The process by which a duly admitted student, upon payment of required fees, is enrolled in classes.

ROTC

The Reserve Officers Training Corps program.

Semester Hour

The unit by which course work is measured. The number of semester hours assigned to a course is usually determined by the number of hours the class meets per week.

Senior College

A college or school that establishes requirements for an undergraduate degree.

Student Schedule

The courses in which a student is enrolled.

Transfer Student

A student who terminates enrollment in one college or university and subsequently enrolls in this university.

****COURSE SEARCH****

The following is a listing of all courses of instruction offered by departments at LSU. This listing was up-to-date and as correct as possible at the time of publication of this catalog.

Since this catalog was prepared well in advance of its effective date, some courses may have been added, others may have been dropped, and/or changes in content may have been made.

Accounting

ACCT 2000 Survey of Accounting (3)

Prereq.: MATH 1021 or MATH 1029 or equivalent. Credit will not be given for both this course and ACCT 2001 or ACCT 2002. Students in nonbusiness curricula are advised to enroll in ACCT 2000 if they are given the option of ACCT 2000 or ACCT 2001, unless they plan to pursue a business degree at a subsequent date. All students in the E. J. Ourso College of Business are required to take ACCT 2001. Introduction to the meaning of the values presented in financial statements; management accounting concepts and internal decision making; fundamentals of individual income taxes.

ACCT 2001 Introductory Financial Accounting (3)

[LCCN: CACC 2113, Introduction to Financial Accounting] *An honors course, ACCT 2002, is also available. Prereq.: MATH 1021 or equivalent. Credit will not be given for both this course and ACCT 2000 or ACCT 2002. Required of all students in the E. J. Ourso College of Business. Students in nonbusiness curricula are advised to enroll in ACCT 2000 if they are given the option of ACCT 2000 or ACCT 2001, unless they plan to pursue a business degree at a subsequent date.* Financial accounting with emphasis on knowledge required for completion of the accounting cycle, including income measurement and financial statement preparation; accounting for current and plant assets, current and long-term liabilities, stockholders' equity, and cash flows.

ACCT 2002 Honors: Introductory Financial Accounting (3)

Same as ACCT 2001, with special honors emphasis for qualified students. Credit will not be given for this course and ACCT 2000 or ACCT 2001.

ACCT 2101 Introductory Managerial Accounting (3)

[LCCN: CACC 2213, Introduction to Managerial Accounting] *An honors course, ACCT 2102, is also available. Prereq.: ACCT 2000 or ACCT 2001 or equivalent. Credit will not be given for both this course and ACCT 2102.* Principles and methods

of accounting primarily concerned with data gathering and presentation for purposes of internal management evaluation and decision-making.

ACCT 2102 Honors: Introductory Managerial Accounting (3)

Same as ACCT 2101, with special honors emphasis for qualified students. Credit will not be given for this course and ACCT 2101.

ACCT 3001 Intermediate Accounting–Part I (3)

An honors course, ACCT 3002, is also available. Prereq.: grade of "C" or above in ACCT 2101; MATH 1431. Only Accounting and Finance students admitted to the College of Business or permission of department. Credit will not be given for both this course and ACCT 3002 or ACCT 7011. Accounting principles underlying preparation of financial statements; their application in measurement and reporting of selected balance-sheet items and related revenue and expense recognition.

ACCT 3002 Honors: Intermediate Accounting–Part I (3)

Same as ACCT 3001, with special honors emphasis for qualified students. Credit will not be given for this course and ACCT 3001.

ACCT 3021 Intermediate Accounting–Part II (3)

Prereq.: grade of "C" or above in ACCT 3001 or ACCT 3002. Continuation of ACCT 3001/ACCT 3002. Credit will not be given if credit was earned from ACCT 7011. Accounting for liabilities, income taxes, pensions, leases, stockholders' equity, earnings per share, accounting changes and corrections of errors, and income and balance sheet presentations.

ACCT 3121 Cost Analysis and Control (3)

[LCCN: CACC 3113, Cost Accounting (Upper Level)] *Prereq.: grade of "C" or above in ACCT 3001. Nature, objectives, basic systems, and procedures of cost accounting and control for manufacturing firms; cost-volume-profit relationships; standard costs and variance analysis; direct costing; relevant costs; activity-based costing.*

ACCT 3122 Accounting Information Systems (3)

Prereq.: grade of "C" or above in ACCT 3001 and ISDS 1100 or ISDS 1101 or ISDS 1102. Majors only or permission of department. Analysis and design of standard accounting systems; emphasis on computerized systems and internal control issues.

ACCT 3201 Fundamental Tax Problems and Tax Planning for Individuals (3)

Not open to accounting majors. Not intended to satisfy the requirements to sit for the CPA exam. For students with little or no previous work in accounting. Credit will not be given for both this course and ACCT 3221. General course in taxation; emphasis on aspects of taxation affecting the individual; federal and state income, estate, inheritance, gift, excise, and payroll taxes.

ACCT 3221 Income Tax Accounting I (3)

[LCCN: CACC 3213, Tax I (Upper Level)] *Prereq.: registration in or grade of "C" or above in ACCT 3001. Credit will not be given for both this course and ACCT 3201. Fundamentals of federal income taxation with respect to individuals and other entities, income inclusions and exclusions and statutory deductions in arriving at tax liability.*

ACCT 3222 Auditing (3)

[LCCN: CACC 3313, Auditing (Upper Level)] *Prereq.: grade of "C" or above in ACCT 3021 and ACCT 3122. Theoretical and practical development of the independent audit function; generally accepted auditing standards; collection and evaluation of audit evidence; understanding internal control; risk assessment; transaction cycles; and reporting.*

ACCT 3233 Internal Auditing I (3)

Internal auditing standards, ethics, concepts, audit techniques, and reporting practices.

ACCT 4021 Cases in Accounting Policy (3)

Prereq.: accounting major with senior standing. Case approach; integrates financial accounting, systems, auditing, income tax, and management uses of accounting information; emphasis on financial reporting to owners, the financial community, regulatory agencies, and the general public; relationship of accounting to the law.

ACCT 4022 Advanced Accounting (3)

Prereq.: grade of "C" or above in ACCT 3021. Completion of the core financial accounting sequence; business combinations, consolidated financial statements, segment reporting, foreign operations and Securities and Exchange Commission procedures.

ACCT 4121 Advanced Cost Analysis (3)

Prereq.: grade of "C" or above in ACCT 3121. Measurement, interpretation, planning, and control of manufacturing and distribution costs; budgets and budgetary control; comparison of costs of business alternatives.

ACCT 4221 Income Tax Accounting II (3)

[LCCN: CACC 3223, Tax II (Upper Level)] *Prereq.: grade of "C" or above in ACCT 3221; MS in accounting students or permission of department.*

Fundamentals of federal income taxation, with respect to partners, partnerships, corporations and shareholders.

ACCT 4225 Research in Federal Income Taxation (3)

Prereq.: registration in or grade of "C" or above in ACCT 3221. MS in accounting students or permission of department. Credit will not be given for this course and ACCT 7210. Techniques and procedures involved in tax planning and research.

ACCT 4231 Internship in Accounting (3)

Prereq.: permission of instructor and department chair required. Grade of "C" or above in ACCT 3021. Pass-fail grading. Credit will not be given for this course and ACCT 4333. At least 20 hours per week of learning experience in accounting under the general supervision of a faculty member and direct supervision of a professional in accounting. Grading based on the faculty member's evaluation, a written report by the professional supervisor, and a written report by the student.

ACCT 4233 Case Studies in Auditing (3)

Prereq.: grade of "C" or above in ACCT 3233. Case studies in operational, compliance, and financial audits.

ACCT 4234 Internal Auditing II (3)

Prereq.: grade of "C" or above in ACCT 3233. Operation, organization and quality control audits; organization theory.

ACCT 4235 Fraud Auditing and Forensic Accounting (3)

Prereq.: grade of "C" or above in ACCT 3001; MS in accounting students or permission of department. Credit will not be given for this course and ACCT 7235. Proactive and reactive fraud auditing including audit committee and liability related issues; investigative decision-making for prevention, detection, investigation and reporting of fraud.

ACCT 4237 Governance, Risk, and Controls (3)

Prereq.: grade of "C" or above in ACCT 3233 or ACCT 7233 or concurrent registration and permission of instructor. The study of the cornerstones of governance, enterprise risk management, internal audit risk planning, and control frameworks.

ACCT 4244 EDP Auditing (3)

Prereq.: grade of "C" or above in ACCT 3222 or ACCT 3233; MS in Accounting students or permission of department. Credit will not be given for this course and ACCT 7244 or ISDS 4244. Electronic data processing (EDP) control, audit applications and generalized audit software systems.

ACCT 4333 Internship in Internal Auditing (3)

Prereq.: permission of instructor and department chair required. Pass-fail grading. Credit will not be given for this course and ACCT 4231. At least 20 hrs. per week of learning experience in internal auditing under the general supervision of a faculty member and direct supervision of a professional in internal auditing. Grading based on the faculty member's evaluation, a written report by the professional supervisor and a written report by the student.

ACCT 4421 Governmental and Not-for-Profit Accounting (3)

Prereq.: grade of "C" or above in ACCT 3001.

Accounting, budgeting, fiscal processes, and financial records of local, state and federal governmental bodies and of private nonprofit institutions.

ACCT 4501 Petroleum Accounting (3)

Prereq.: grade of "C" or above in ACCT 3021 and ACCT 3121; MS in accounting students or permission of department. Accounting for oil and gas exploration and production; accounting for oil and gas leases, exploration costs, undeveloped properties, drilling and development operations, production and oil and gas revenues.

ACCT 7011 Intermediate Accounting (3)

Prereq.: ACCT 2001. Credit will not be given for this course and ACCT 3001 or ACCT 3002 and ACCT 3021. Accounting principles underlying preparation of financial statements; their application in measurement and reporting of selected balance-sheet items and related revenue and expense recognition.

ACCT 7021 Advanced Theory of Accounts (3)

Prereq.: ACCT 3021 and consent of instructor or ACCT 4022. MS in accounting students or permission of instructor. Corporate reporting strategies and practices by managers; preparation of financial statements; interpretation of corporate financial reports.

ACCT 7201 Tax Aspects of Business Entities (3)

Prereq.: ACCT 3021 or equivalent. Basic concepts of business entities, including corporations, partnerships, and S corporations; tax consequences of the formation and operation of a business entity and distributions to the owners.

ACCT 7210 Tax Research, Planning and Business Decision Making (3)

Prereq.: ACCT 3221 or equivalent.

Credit will not be given for both this course and ACCT 4225. Fundamental tax research methodology based on the Internal Revenue Code, regulations and rulings, judicial interpretations, annotated and topical tax services, computerized tax research methods and techniques of communicating research results.

ACCT 7222 Auditing Theory and Standards (3)

Prereq.: ACCT 3222; MS in accounting students or permission of instructor. A comprehensive analysis of the theory and practice of independent auditing.

ACCT 7231 Internship in Accounting (3)

Prereq.: permission of instructor and department chair required. Pass-fail grading. Credit will not be given for this course and ACCT 7333. At least 20 hours per week of learning experience in accounting under the general supervision of a faculty member and direct supervision of a professional in accounting. Grading based on the faculty member's evaluation, a written report by the professional supervisor and a written report by the student.

ACCT 7232 Case Studies in Internal Auditing (3)

Prereq.: ACCT 7233. Primarily for MBA and MS students. Performance, compliance, prudence and fraud audits.

ACCT 7233 Graduate Internal Auditing (3)

Prereq.: consent of instructor.

Primarily for MBA and MS students. Theory of internal auditing; efficiency, effectiveness and economy audits.

ACCT 7234 Operational Auditing (3)

Prereq.: ACCT 7233.

Primarily for MBA and MS students. Operational audit methodology for management audits, functional audits, risk analysis and auditable unit analysis.

ACCT 7235 Fraud Auditing (3)

Prereq.: ACCT 3001 or equivalent. MS in accounting students or permission of department.

Credit will not be given for this course and ACCT 4235. Study of risk and controls relative to the deterrence, prevention and detection of beneficial and detrimental fraud.

ACCT 7244 Systems Auditing (3)

Prereq.: ACCT 3222 or ACCT 3233 or permission of instructor.

Credit will not be given for this course and ACCT 4244 or ISDS 4244. Selected topics in the control and audit of computer systems.

ACCT 7250 Current Topics in Federal Income Taxation (3)

Prereq.: ACCT 3221 or equivalent.

May be taken for a max. of 6 hrs. of credit. Tax research and planning in current major interest areas of tax law.

ACCT 7270 Statement and Report Presentation and Analysis (3)

MS in accounting students or permission of department.

ACCT 7333 Internship in Internal Auditing (3)

Prereq.: permission of instructor and department chair required. Pass-fail grading. Credit will not be given for this course and ACCT 7231. At least 20 hrs per week of learning experience in internal auditing under the general supervision of a faculty member and direct supervision of a professional in internal auditing. Grading based on the faculty member's evaluation, a written report by the professional supervisor and a written report by the student.

ACCT 7401 Ethics for Professional Accountants (3)

Prereq.: MS in accounting students or permission of department. Case approach to understanding the ethical and regulatory environment of the practice of professional accounting.

ACCT 7601 International Accounting (3)

MS in accounting students or permission of department. Accounting principles, auditing environments, managerial objectives, and financial reporting requirements applicable to multinational corporations; causes of international accounting problems.

ACCT 7900 Individual Study in Accounting (3)

A proposal outlining the nature and objectives of a research project must be approved by department faculty prior to registration; written report of semester's activities and findings required for credit. In-depth study in a selected accounting problem.

ACCT 8900 Pre-dissertation Research (1-9)

Pass-fail grading. May be repeated for credit. Permission of instructor and department chair required.

ACCT 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

ACCT 9001 Accounting Research I (3)

For doctoral students only. Research methodologies in accounting and a survey of the accounting research literature.

ACCT 9002 Accounting Research II (3)

For doctoral students only. Theory and evidence relating to internal decision making and control, financial accounting and auditing.

ACCT 9003 Accounting Research III (3)

For doctoral students only. Continuation of ACCT 9002. Theory and evidence relating to internal decision making and control, financial accounting and auditing.

ACCT 9004 Accounting Research IV (3)

May be taken for a max. of 6 hrs. of credit. For doctoral students only. Seminar in current accounting research topics.

Aerospace Studies

ASST 1001 The Foundations of the United States Air Force (1)

Coreq.: ASST 1011, ASST 1012. Fundamentals of leadership, effective communication, organizational elements and weapons systems of today's Air Force.

ASST 1002 The Foundations of the United States Air Force (1)

Coreq.: ASST 1011, ASST 1012. Fundamentals of leadership, effective communication, organizational elements and weapons systems of today's Air Force.

ASST 1011 Leadership Laboratory I (1)

Coreq.: ASST 1001, ASST 1002. Pass-fail grading. 2 hrs. lab. Applied leadership in drill and ceremony, physical fitness and military protocol.

ASST 1012 Leadership Laboratory I (1)

Coreq.: ASST 1001, ASST 1002. Pass-fail grading. 2 hrs. lab. Applied leadership in drill and ceremony, physical fitness and military protocol.

ASST 2001 The Evolution of U.S.A.F. Aerospace Power (1)

Coreq.: ASST 2011, ASST 2012. Historical changes in the nature of warfare as a result of air power; effective communication skills in the Air Force.

ASST 2002 The Evolution of U.S.A.F. Aerospace Power (1)

Coreq.: ASST 2011, ASST 2012. Historical changes in the nature of warfare as a result of air power; effective communication skills in the Air Force.

ASST 2011 Leadership Laboratory II (1)

Coreq.: ASST 2001, ASST 2002. Pass-fail grading. 2 hrs. lab. Intermediate leadership training through drill and ceremony, physical fitness, team building and professional development.

ASST 2012 Leadership Laboratory II (1)

Coreq.: ASST 2001, ASST 2002. Pass-fail grading. 2 hrs. lab. Intermediate leadership training through drill and ceremony, physical fitness, team building and professional development.

ASST 3001 Air Force Leadership Studies (3)

Prereq.: permission of instructor. Coreq.: ASST 3011, ASST 3012. Skills required by the successful leader; individual motivational and behavioral processes; leadership, communication and group dynamics; use of analytical aids in planning and organizing; total quality management; ethics, management of change, organizational power, politics and managerial strategy.

ASST 3002 Air Force Leadership Studies (3)

Prereq.: permission of instructor. Coreq.: ASST 3011, ASST 3012. Skills required by the successful leader; individual motivational and behavioral processes; leadership, communication and group dynamics; use of analytical aids in planning and organizing; total quality management; ethics, management of change, organizational power, politics and managerial strategy.

ASST 3011 Leadership Laboratory III (1)

Coreq.: ASST 3001, ASST 3002. Pass-fail grading. 3 hrs. lab. Experiences designed to develop leadership potential; study of Air Force customs and courtesies; drill and ceremonies; career opportunities; and the life and work of an Air Force junior officer.

ASST 3012 Leadership Laboratory III (1)

Coreq.: ASST 3001, ASST 3002. Pass-fail grading. 3 hrs. lab. Experiences designed to develop leadership potential; study of Air Force customs and courtesies; drill and ceremonies; career opportunities; and the life and work of an Air Force junior officer.

ASST 4001 National Security Affairs/Preparation for Active Duty (3)

Prereq.: permission of instructor. Coreq.: ASST 4011, ASST 4012. Organization and implementation of national security; evolution of strategy; management of conflict; and civil-military interaction; military profession/officership; and the military justice system.

ASST 4002 National Security Affairs/Preparation for Active Duty (3)

Prereq.: permission of instructor. Coreq.: ASST 4011, ASST 4012. Organization and implementation of national security; evolution of strategy; management of conflict; and civil-military interaction; military profession/officership; and the military justice system.

ASST 4011 Leadership Laboratory IV (1)

Coreq.: ASST 4001, ASST 4002. Pass-fail grading. 3 hrs. leadership lab. Advanced development of leadership skills through planning and leading activities; study of Air Force customs and courtesies; drill and ceremonies; career opportunities; and the life and work of an Air Force junior officer.

ASST 4012 Leadership Laboratory IV (1)

Coreq.: ASST 4001, ASST 4002. Pass-fail grading. 3 hrs. leadership lab. Advanced development of leadership skills through planning and leading activities; study of Air Force customs and courtesies; drill and ceremonies; career opportunities; and the life and work of an Air Force junior officer.

African & African American Studies

AAAS 2000 Introduction to African & African American Studies (3)

This is a General Education course. Dimensions of African & African American thought and practice in contemporary and historical perspective.

AAAS 2025 African American Religion (3)

This is a General Education Course. See REL 2025.

AAAS 2050 Contemporary Africa (3)

African social and political institutions in transition; challenges of democratization and development in the current international context.

AAAS 2410 Black Popular Culture (3)

Explores participation by black peoples in the creation and critique of popular culture through media such as film, music and television and terms of topics such as representation and sexuality.

AAAS 2511 Race Relations (3)

See SOCL 2511.

AAAS 3024 African Diaspora Intellectual Thought (3)

Survey of critical ideas and theories by select diaspora scholars and writers. Emphasizes the intellectual tensions and deliberations that undergird attempts to theorize and resolve issues involving the status of black people in the world.

AAAS 3044 Black Rhetorical Traditions (3)

Survey of the development of black communication styles ranging from the sermonic to the academic. Examining the black world's most effective verbal and written communicators and the tension between orality and literacy.

AAAS 3120 Topics in History of Africa and the African Diaspora (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. This course surveys historical moments in the life of African and/or African diaspora peoples.

AAAS 3122 Topics in Pre-Colonial Africa (3)

May be taken for a max. of 6 sem. hrs of credit when topics vary. Surveys African empires and civilizations from ancient times to colonial period. Emphasizes culture, religion and/or political influence and practices.

AAAS 3341 African American English (3)

Also offered as LING 3341. Survey of major issues related to historical and contemporary development of African American speech, focusing on linguistic and social features.

AAAS 3425 Black Women in America (3)

Surveys intersection of race and gender in the U.S. through historical and contemporary lenses, course examines commonalities, differences and struggles that mark black women's subjectivity.

AAAS 3901 Directed Readings and Research in African and African-American Studies (1-3)

May be taken for a max. of 6 sem. hrs. credit when topics vary. Student must register with a faculty member in the AAAS discipline before registration to select the area of reading or research. Topic must not substitute for regularly offered courses.

AAAS 3902 Special Topics in African & African American Studies (1-3)

May be taken for a max. of 6 semester hrs. credit when topics vary.

AAAS 4020 Senior Seminar (3)

Prereq.: permission of instructor. Capstone for the minor and concentration; planning and execution of a major research project demonstrating the interdisciplinary processes used by those working in the field of African American studies to develop their arguments and interpretations.

AAAS 4124 Studies in African Diaspora Religions (3)

See REL 4124.

AAAS 4322 Studies in African Literature (3)

Also offered as ENGL 4322. *May be taken for a max. of 6 sem. hrs. of credit when topics vary.* Critical analysis of major figures and texts of fiction, drama and poetry.

AAAS 4323 Studies in Caribbean Literature (3)

Also offered as ENGL 4323. *May be taken for a max. of 6 sem. hrs. of credit when topics vary.* Critical analysis of major figures and texts of fiction, drama and poetry.

AAAS 4400 Religious Thought of Martin Luther King Jr. & Malcolm X (3)

See REL 4400.

AAAS 4450 African American Folklore (3)

See ANTH 4450.

Agricultural Economics

AGEC 1003 Introduction to Agricultural Business (3)

Nature and scope of agribusiness; application of management and marketing concepts to selected agribusiness problems; exploring agribusiness management as a profession.

AGEC 2003 Introduction to Agricultural Economics (3)

This is a General Education course. Role of agriculture in the general economy; economic principles applied to agricultural production, marketing, consumption and policy problems.

AGEC 3003 Economic Analysis in Agricultural Business (3)

Prereq.: grade of "C" or above in [AGEC 2003 and ECON 2030] or [ECON 2000 and ECON 2010] or equivalent; MATH 1431 or MATH 1550.

2 hrs. lecture; 2 hrs. lab. Applications of graphical, mathematical and computer-based microeconomic analysis to problems in the production and marketing of food and agricultural products.

AGEC 3203 Agricultural Commodity Marketing and Risk Management (3)

Prereq.: Grade of "C" or above in AGEC 2003 and ECON 2030, or ECON 2000 and ECON 2010, or equivalent. Description and analysis of agricultural and interdependent commodity markets within the food and fiber systems of domestic and international markets; enhancing understanding of market structure and risk management on farms and in agribusiness through a simulated futures trading experience where quantitative and qualitative methods are used to manage risk in commodity portfolios.

AGEC 3303 Farm Management (3)

Prereq.: AGEC 2003 or equivalent. Fundamental economic and business principles applied to a farm business; comprehensive and integrated treatment of management concepts for successful operation of a farm business.

AGEC 3413 Agricultural Business Management Decisions (3)

Prereq.: grade of "C" or above in AGEC 2003 and ECON 2030 or ECON 2000 and ECON 2010 or equivalent. Identification of

typical decisions of agricultural business firms; development of concepts, procedures and analyses that facilitate planning, organizing, directing, coordinating and controlling functions within agricultural business firms.

AGEC 3503 Natural Resource Economics (3)

Prereq.: AGEC 2003 or equivalent. Economic rationale for collective, public action in allocation of natural resources in agriculture; emphasis on economic efficiency, property rights, resource use, legal concepts, institutions and project evaluation.

AGEC 3700 Internship (1-3)

Prereq.: AGEC 2003 or equivalent and approval of department head. May be taken for a max. of 3 sem. hrs. of credit. Supervised career-oriented experience with a business or organization in the food and fiber system.

AGEC 3803 Agricultural Law (3)

Principles of law and their application to agricultural business firms and institutions; legal processes and relationships relevant to agriculture; Louisiana Civil Code and statutes; federal law, including bankruptcy code; analysis and review of cases, documents and processes.

AGEC 4203 Intermediate Food and Fiber Products Marketing (3)

Prereq.: AGEC 3003 or equivalent. Industrial organization analysis applied to the food and fiber system; emphasis on structural problems and their control by competition, antitrust and government.

AGEC 4243 Food Products Marketing (3)

Prereq.: Grade of "C" or above in AGEC 2003 and ECON 2030, or ECON 2000 and ECON 2010; MKT 3401. An overview of the food marketing system; marketing, management, and economic principles as applied to branded food products; formulation and implementation of marketing plans for branded food products.

AGEC 4273 Agricultural Price Analysis (3)

Prereq.: grade of "C" or above in [AGEC 2003 and ECON 2030] or [ECON 2000 and ECON 2010] or equivalent; MATH 1431 or MATH 1550; and EXST 2201 or ISDS 2001. Economic processes of price discovery and price determination in agricultural

input and output markets; emphasis on methods of price analysis and their application to decision processes; analysis of cyclical, trend and seasonal movements in prices.

AGEC 4403 Agricultural Finance (3)

Prereq.: grade of "C" or above in ACCT 2000 or ACCT 2001 or equivalent; grade of "C" or above in AGECE 2003 and ECON 2030, or ECON 2000 and ECON 2010 or equivalent. Capital acquisition and use in the agricultural sector; cost and availability of credit; emphasis on financial management concepts for managing growth, leverage, liquidity, risk and capital investment in agricultural business.

AGEC 4433 Agricultural Business Planning, Management and Policy (3)

Prereq.: senior standing; AGECE 3003, AGECE 3203, AGECE 3413; MKT 3401; MGT 3200; and BLAW 3200 or BLAW 3201. Integration of management, marketing and financial concepts for successful planning and implementation of agricultural business decisions; feasibility analysis, marketing policy, personnel policy, marketing mix, pricing decisions, market segmentation, marketing strategy and financial policy.

AGEC 4443 Farm and Rural Land Appraisal (3)

Prereq.: AGECE 2003 or equivalent. Not for graduate AGECE degree credit. Theory, methods and procedures of real estate appraisal applied to rural property; trends in rural real estate values; factors influencing rural real estate values; approaches used in rural real estate valuation.

AGEC 4603 Agricultural Policy (3)

Prereq.: grade of "C" or above in AGECE 2003 and ECON 2030, or ECON 2000 and ECON 2010 or equivalent. Role of agriculture in the national economy; how agricultural policy decisions affect the general public; emphasis on economic impacts of policies on producers and consumers of agricultural products; effects of other nations' policies on American agriculture.

AGEC 4613 Agricultural Trade (3)

Prereq.: AGECE 3003 or equivalent. Structure, trade and practices in exporting and importing regions and nations; policies of major agricultural trading nations and institutions; aid, development relationships and current development trade policy.

AGEC 4623 Rural Resource and Community Development (3)

Prereq.: AGEC 3003 or permission of instructor. Characteristics of developed and undeveloped rural areas; analysis of economic and related problems and potential for development; public policy issues concerning rural development.

AGEC 4700 Problems in Agricultural Economics (1-3)

Prereq.: approval of department head. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Independent study under the direction of a faculty member or faculty committee.

AGEC 7103 Advanced Statistical Methods in Agriculture (3)

Application of advanced statistical tools to problems in agricultural economics; emphasis on the general linear model, including diagnostics, applications and interpretation.

AGEC 7113 Agribusiness Research Applications (3)

Introduction to and overview of agribusiness research strategies; design of agribusiness research projects; preparation for data collection; collection of evidence; analysis of evidence; composition of research reports; applications to agribusiness market analysis, agribusiness planning and management, and agribusiness forecasting.

AGEC 7123 Operations Research Methods in Agricultural Economics (3)

Application of operations research methods to economic problems in agricultural production, marketing, and resource use; linear and nonlinear programming; integer programming; network analysis; dynamic programming; queuing; simulation.

AGEC 7203 Advanced Agricultural Marketing Theory (3)

Prereq.: ECON 7700 or concurrent enrollment. Basic and applied analytical procedures in marketing research emphasizing quantitative methods; firm theory applied to marketing.

AGEC 7213 Applied Demand for Food Commodities (3)

Examination of demand for food commodities from analytical and empirical perspectives; emphasis on economic principles that, combined with proper analytical techniques, enable students to derive theoretically-based demand systems for various components of the food and related marketing sectors.

AGEC 7303 Agricultural Production Economics (3)

Prereq.: ECON 7700 or concurrent enrollment. Production principles applied to use of agricultural resources; analysis and interpretation of research data; theory of the farm firm, including costs, uncertainty and expectations.

AGEC 7313 Agricultural Production and Labor Supply (3)

Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive farm households; human capital formation by households and firms. Implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

AGEC 7513 Dynamics in Natural Resource Economics (3)

Dynamic economic concepts in evaluating natural resource problems; economically optimal usage of renewable and non-renewable natural resources.

AGEC 7523 Nonmarket Valuation Methods in Agriculture and Natural Resources (3)

Economic concepts and methods of nonmarket valuation applied to agricultural and natural resource economics; contingent valuation, hedonic pricing, travel cost, conjoint analysis and contingent ranking, and benefit transfer.

AGEC 7603 Advanced Agricultural Policy (3)

Prereq.: ECON 7700 or concurrent enrollment. Development of agricultural policy; emphasis on objectives, procedures, accomplishments and consequences of policy on agriculture and rural areas.

AGEC 7613 International Agricultural Trade (3)

Prereq.: ECON 7700 or concurrent enrollment. International economic trade theory; special reference to trade in agricultural products.

AGEC 7623 Rural Development Economics (3)

Prereq.: ECON 7610. Theoretical concepts in international and domestic rural development; empirical methods used in analysis of economic structure and growth; modeling public policy issues concerning international and domestic rural development.

AGEC 7700 Internship in Agribusiness Administration (3)

Prereq.: prior approval of student's graduate committee. Pass/fail grading based on a written evaluation by the professional supervisor, a written report by the student and the faculty member's evaluation. May be taken for a max. of 3 hrs. credit. Open only to agricultural economics master's students. 300 hrs. of learning experience. General supervision by a faculty member; direct supervision by an agribusiness professional.

AGEC 7703 Independent Study (1-3)

Prereq.: graduate committee approval prior to enrollment. May be taken for a max. of 6 sem. hrs. when topics vary. Independent study of relevant subject matter areas in agricultural economics.

AGEC 7710 Advanced Topics in Agricultural Economics (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. New and specialized topics in agricultural economics.

AGEC 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

AGEC 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Agricultural, Extension and Adult Education

AEA 2001 Foundations of Human Resource Education (3)

2 hrs. lecture; 2 hrs. lab. Foundation of the economic, sociological and political influences on the historical development of workforce education; organization and delivery of workforce education programs and practices at the secondary and post-secondary levels.

AEA 3010 Internship in Cooperative Extension (6)

Su Prereq.: permission of instructor. Open to selected students completing their junior year who are considering a career with the Cooperative Extension Service. Seven-week period of study, observation, and practicum in a parish Louisiana Cooperative Extension Service office plus a two-week period of classes in extension education.

AEA 3101 Instructional/Curriculum Design for Human Resource Education (3)

Curriculum, course unit and lesson plan development in human resource; selection and evaluation of course materials.

AEA 3201 Presentation Methods in Human Resource Education (3)

Recognized methods of group presentation and individual training.

AEA 3603 Classroom Management in Human Resource Education (1)

Prereq.: concurrent enrollment in AEA 3604 and AEA 3605. Managing the human resource education classroom; emphasis on student behavior; techniques for preventing, diagnosing and handling student discipline problems.

AEA 3604 Human Diversity in Learning in Human Resource Education (1)

Prereq.: concurrent registration in or credit for AEA 3603 and AEA 3605. This course strives to better prepare today's teachers/trainers to achieve their goals of delivering an effective education to diverse students who are living in a complex, interdependent world. Each of the various diversities addressed in this course mediate one another and do not act in isolation, which further complicates an educator's task, but is nonetheless critical to an understanding of classroom interaction.

AEA 3605 Field Experiences in Human Resource Classroom Management (1)

Prereq.: concurrent registration in or credit for AEA 3603 and AEA 3604. The purpose of this field experience is to provide direct experiences to increase understanding of learning process and apply skills for facilitating the process. The course provides

detailed guides for observing the dynamics of the classroom and community, participating with the classroom teacher and then reflecting on the experience. Motivation, classroom management, and teaching strategies are the focus areas of the experience.

AEA 4010 Cooperative Extension Work (3)

History, objectives, organization, relationships, and teaching processes in cooperative extension.

AEA 4011 Communications in Extension Education (3)

Synthesis and application of concepts and principles of communication in the extension educational program.

AEA 4026 Informal Education Programs for Youth (3)

Organization, leadership and evaluation of informal youth education programs.

AEA 4039 Topics in International Development (3)

May be taken for a max. of 6 hrs. credit when topics vary. Issues related to international development; emphasis on extension and nonformal education programs in third world countries.

AEA 4200 Teaching in Human Resource Education Content Areas (3)

Prereq.: AEA 2001, AEA 3101 and AEA 3201. Teaching human resource education in the formal classroom; emphasis on content area, selection of materials and planning instruction.

AEA 4201 Management of Human Resource Education Laboratory Experiences (3)

Prereq.: AEA 2001, AEA 3101 and AEA 3201. Preparation, organization and evaluation of human resource education laboratory experiences.

AEA 4504 Youth Leadership Development (3)

Principles and practices in planning, organizing and conducting youth organization activities.

AEA 4601 Workforce Education Learner Assessment (3)

Assessment of progress of workforce education students in psychomotor, cognitive and affective skills.

AEA 4806 Student Teaching in Human Resource Education (9)

Prereq.: permission of instructor. Not for graduate credit. Professional responsibilities including developing instructional plans and materials; delivering instruction in classroom, laboratory, and field environments; organizing and operating instructional laboratories; participating in professional associations; planning and conducting teacher/parent/student organization activities; conducting school observational visits; completing teacher certification requirements.

AEA 4807 Teaching Internship in Human Resource Education (6)

Prereq.: permission of instructor. Professional responsibilities including developing instructional plans and materials; delivering instruction in classroom, laboratory and field environments; organizing and operating instructional laboratories; participating in professional associations; planning and conducting teacher/parent/student organization activities; conducting school observational visits; completing teacher certification requirements.

AEA 4819 Special Topics in Agricultural Education (1-3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Individual and group study of selected topics under the direction of a faculty member.

Agriculture

AGRI 1001 Introduction to Agriculture (1)

Enrollment in this course is limited to freshmen in the College of Agriculture or by permission of department. Opportunities and educational requirements in all fields of agriculture and careers in agriculture.

AGRI 1005 Science and Society (3)

This is a General Education course. Principles of biology applied in a sociological context; relationships among scientific inquiry, ethics, social values and public policies for the beginning science and nonscience student.

AGRI 2001 Special Topics in Agriculture (1-3)

Prereq.: permission of department. May be repeated for a max. of 6 sem. hrs. credit. Faculty directed agriculture seminar designed to aid students in becoming aware of the issues facing them as they pursue leadership roles in agriculture fields.

AGRI 2900 Directed Studies in Agricultural Leadership Development (1-3)

Prereq.: AGRI 1001 and permission of department. May be repeated for a max. of 3 sem. hrs. credit when topics vary. Faculty directed leadership development practicum in an agricultural-related activity or program intended to integrate academic learning with practice.

Agronomy

AGRO 1001 Plants and People (3)

This is a General Education course. 2 hrs. lecture; 2 hrs. lab. Survey of plant kingdom; anatomy, growth and development of plants; ecosystem structure, sustainable agriculture and animal/plant systems; plant nutrition, food additives, and food safety; plant breeding for improved food and fiber; biotechnology and its role in modern agriculture.

AGRO 2011 Analysis of Environmental Issues (3)

See EMS 2011.

AGRO 2051 Soil Science (4)

Also offered as EMS 2051. Prereq.: CHEM 1002 or CHEM 1212 or equivalent. 3 hrs. lecture; 2 hrs. lab. Principles of soil science; properties of soils related to plant growth and the environment.

AGRO 2086 Introduction to Turfgrass Management (3)

See HORT 2086.

AGRO 3010 Research Problems (3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Independent research under a faculty member, culminating in an oral and written report.

AGRO 3040 Soil Conservation (2)

Also offered as EMS 3045. Prereq.: AGRO 2051. Causes and effects of soil erosion and sedimentation; their effects on the quality of the environment; methods of reducing erosion and soil environmental pollution.

AGRO 3090 Agronomic Internship (3)

Prereq.: overall GPA of 2.50 and written consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Work experience in crop, soil or environmental quality related areas culminating in acceptable written reports and a seminar presentation.

AGRO 4005 Forage Ecology and Management (3)

Forage crop physiology, adaptation, production, utilization and management; impact on people, animals, and the environment.

AGRO 4052 Soil Fertility and Soil Management (4)

Prereq.: AGRO 2051. 3 hrs. lecture; 2 hrs. lab. Factors affecting plant growth and utilization of essential elements; mechanisms of nutrient uptake; diagnosis of deficiencies; use of lime and fertilizers; potential nutrient losses.

AGRO 4055 Chemical Properties of Soil (4)

Also offered as EMS 4055. Prereq.: AGRO 2051. 3 hrs. lecture; 3 hrs. lab. Chemical and mineral properties of soil constituents; their effects on major chemical processes in soils involving nutrients cycling and fate of hazardous chemicals within soil environment systems.

AGRO 4056 Microbial Ecology and Nutrient Cycling in Soils (4)

Also offered as BIOL 4256 and EMS 4056. Prereq.: AGRO 2051 and BIOL 2051. 3 hrs. lecture; 3 hrs. lab. Microorganisms in terrestrial environments and biogenic processes influencing C, N, S and P cycling; role of microorganisms in biological nitrogen fixation, plant nutrient availability, formation of soil humus and decomposition of organic and inorganic materials; impact of microbial processes on environmental quality.

AGRO 4058 Soil Morphology and Classification (4)

2 hrs. lecture; 4 hrs. lab (field and mapping). Genesis, profile morphology, processes related to classification and soil taxonomy; relationships of soil process and classification to environmental quality.

AGRO 4064 Principles of Plant Breeding (4)

Also offered as HORT 4064. Prereq.: ANSC 2072 or equivalent. 3 hrs. lecture; 2 hrs. lab. Methods of plant genetic improvement: hybridization, genetic manipulation and variety development; selection for insect, disease and environmental stress resistance; genetic engineering and biotechnology.

AGRO 4070 Weed Science and the Environment (3)

Prereq.: BIOL 1001, BIOL 1002, CHEM 1001, CHEM 1002 or equivalent. 2 hrs. lecture; 2 hrs. lab. Weed biology and economic importance of weeds in the diverse agriculture of Louisiana; weed management programs, characteristics of important herbicides, mechanisms of herbicidal action, fate of herbicides in the environment and pesticide application, labeling and safety.

AGRO 4071 Weed Biology and Ecology (3)

Prereq.: BIOL 1001, BIOL 1002, or equivalent. 2 hrs. lecture; 2 hrs. lab. Study of general plant ecological principles, reproduction, dormancy, interference, allelopathy, competition, herbicide resistance and the impact of weed control mechanisms on weed and crop communities.

AGRO 4077 Environmental Soil Physics (3)

Also offered as EMS 4077. Prereq.: AGRO 2051. The physical soil system; the soil components and their physical interactions; processes involving water flow in saturated and unsaturated soils, air and heat; fate and transport of applied chemicals in the soil profile and processes governing the mobility of contaminants.

AGRO 4078 Land Use Planning and Land Management (3)

Prereq.: AGRO 2051 or consent of instructor. 2 hrs. lecture; 2 hrs. lab. Land use planning and management based on chemical, mineralogical and physical properties of soils; includes applications of soils, plants, hydrology and remote sensing datasets for advanced GIS analysis. Land use management foci include crops, pasture, urban, disturbed and wetlands.

AGRO 4091 Special Topics in Crop Science (1-3)

Prereq.: written consent of instructor. May be repeated for credit; a total of 6 sem. hrs. may be earned in AGRO 4091 and AGRO 4092 combined.

AGRO 4092 Special Topics in Soil Science (1-3)

Prereq.: written consent of instructor. May be repeated for credit. A total of 6 sem. hrs. may be earned in AGRO 4091 and AGRO 4092 combined.

AGRO 6011 Topics in Plant, Environmental and Soil Sciences for Teachers (3)

See EMS 6011.

AGRO 7001 Seminar (1)

May be repeated for credit. Topics of current interest in agronomy, horticulture, soils and the environment.

AGRO 7040 Research Methods in Plant Science (3)

Prereq.: EXST 7005 or equivalent; field research experience. Research activities and methodology used to conduct field research in plant science and pest management disciplines from initial planning through publication of results; areas of emphasis include: research proposal preparation and protocol development; selection of experimental design and implementation of research; data analysis, interpretation and presentation; and manuscript preparation.

AGRO 7041 Plant-Herbicide Physiology (3)

Prereq.: AGRO 4070 or equivalent. 2 hrs. lecture; 3 hrs. lab. Lab project includes several techniques used in plant-herbicide physiology research. Physiological and physical interactions of herbicides with plants; emphasis on the specific mode of action, entry, movement, metabolism and selectivity mechanisms of each chemical family of herbicides.

AGRO 7051 Advanced Soil Fertility and Plant Nutrition (4)

Prereq.: AGRO 4052 and BIOL 3060 or equivalent. 3 hrs. lecture; 2 hrs. lab. Principles of bioavailability and acquisition of mineral nutrients by crop plants; interactions of plant roots with the soil environment; fertilizer use efficiency.

AGRO 7055 Advanced Soil Chemistry (3)

Prereq.: AGRO 4055, MATH 1552 and one semester of physical chemistry. Theory of physio-chemical properties of soils; emphasis on soil solution chemistry and soil environmental properties.

AGRO 7057 Advanced Soil Physics (4)

Also offered as EMS 7057. 3 hrs. lecture; 2 hrs. lab. Physical properties of the soil matrix, soil-water retention and processes governing water, gas, solute and heat fluxes in the soil profile.

AGRO 7058 Advanced Pedology (3)

Theory and current literature on pedogenic processes responsible for the physical, chemical and mineralogical properties found in soil environments.

AGRO 7067 Crop Breeding Practicum (2)

Prereq.: AGRO 4064 or equivalent. May be taken for a max. of 4 hrs. of credit when topics vary; consent of instructor. Application of plant breeding techniques for agronomic and horticultural crops, emphasis on visits to practicing public and commercial programs.

AGRO 7071 Advanced Plant Genetics (3)

See HORT 7071.

AGRO 7073 Current Topics in Plant Breeding and Genetics (1)

Prereq.: AGRO 4064 or equivalent. May be taken for a max. of 2 hrs. of credit when topics vary. Current discussion on plant breeding topics such as plant breeding theory, applied plant breeding, association mapping for crop improvement, and application of genome sequencing in crop improvement.

AGRO 7074 Quantitative Genetics in Plant Improvement (3)

Also offered as HORT 7074. Genotypic and environmental values, their effects and interactions, homeostasis, stability; variances, covariances, combining ability, genetic advance, selection indices, molecular markers for quantitative trait loci.

AGRO 7080 Applied Plant Genomics (3)

Prereq.: AGRO 4064 or equivalent. Advances in plant genomics, structure and function of plant genome, genomics tools and their practical application for plant improvement, future prospect of plant genomics.

AGRO 7165 Biogeochemistry of Wetland Soils and Sediments (3)

Same as OCS 7165.

AGRO 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

AGRO 8901 Research in Crop Science (3-6)

Prereq.: consent of department.

AGRO 8902 Research in Soil Science (3-6)

Prereq.: consent of department.

AGRO 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Animal Science

ANSC 1011 Introduction to Animal Science (3)

Science and production of beef cattle, sheep, swine and horses; their role in American agriculture.

ANSC 1048 Introduction to Dairy Science (3)

Introduction to dairy production and dairy foods technology.

ANSC 1049 Introduction to Poultry Science (3)

Principles and practices of commercial poultry production.

ANSC 2001 Animal Unit Internship (1)

Prereq.: ANSC 1011 and consent of school. 3 hrs. work experience. Pass-fail grading. May be taken for a max. of 5 sem. hrs. of credit, with no more than two credits each in beef, dairy, dairy foods, equine, poultry, sheep, swine and meat areas. Supervised work experience with animal behavior and care and/or animal foods processing.

ANSC 2030 Basic Horsemanship (3)

Prereq.: ANSC 1011 and permission of school; 2 hrs. lecture, 2 hrs. lab. Laboratory fee. Designed for beginning horsemen who desire training in horsemanship skills and horse care. Students are introduced to proper horse handling and safety, saddling and basic riding skills.

ANSC 2040 Techniques of Judging and Evaluating Dairy Cattle (2)

Development of live animal evaluation techniques in a clinical setting; emphasis on visual evaluation, decision making, oral communication.

ANSC 2042 Techniques of Judging and Evaluating Poultry and Poultry Products (2)

May be taken for a max. of 4 hrs. of credit when topics vary. 4 hrs. lab. Principles and techniques in evaluation of poultry and poultry products.

ANSC 2049 Dairy Cattle Production Practices (3)

Prereq.: ANSC 1048 and permission of school. 2 hrs. lecture, 2 hrs. lab. Dairy cattle production practices; care, fitting, showing dairy cattle.

ANSC 2060 Companion Animal Management (3)

Care, feeding, breeding, behavior and management of companion animals; emphasis on dogs and cats; opportunities in the pet-related fields and industries.

ANSC 2072 Introductory Agricultural Genetics (3)

Prereq.: BIOL 1002 or equivalent. Introduction to classical and modern genetic methodology used in agriculture including Mendelian principles, successful breeding techniques, assisted reproductive technology, genetic engineering and other biotechnological methods.

ANSC 2075 Milk and Dairy Foods (3)

Product processing techniques and related principles involved in market preparation of milk and dairy foods; emphasis on consumer and processor viewpoints relative to product composition, processing, marketing, sanitation and related environmental aspects.

ANSC 2085 Milk Quality Control Laboratory (2)

Prereq.: permission of department. 4 hrs. lab. Public Health Service laboratory and inspection procedures for quality control on dairy farms and in milk plants.

ANSC 2093 Dairy Products Judging (2)

Development of sensory evaluation techniques in a clinical setting; emphasis on sensory evaluation, decision-making, oral communication.

ANSC 2133 Growth and Development of Livestock (3)

2 hrs. lecture; 2 hrs. lab. Cell, tissue and body growth, development and composition; patterns of tissue deposition in livestock; control and modification of normal and abnormal growth; evaluation and measurement of composition of beef, sheep, swine and horses.

ANSC 3010 Applied Animal Feed Formulation (3)

Prereq.: ANSC 1011 or ANSC 1048 or ANSC 1049 and MATH 1021 or equivalent. Formulation of feed for agricultural animals, including feed laws, feed stuffs and requirements.

ANSC 3030 Advanced Horsemanship (3)

Prereq.: ANSC 2030 and permission of school. Laboratory fee. 2hrs. lecture; 2 hrs. lab. Designed for students who desire to learn about equitation and training techniques for horses and riders and have completed ANSC 2030. The course will focus on physiology of movement and locomotion patterns of the horse and how they affect various equitation disciplines.

ANSC 3033 Elements of Live Animal and Carcass Evaluation (3)

1 hr. lecture; 4 hrs. lab. Basic principles and techniques involved in evaluation of meat animals and their carcasses.

ANSC 3050 Animal Science Internship (3)

Prereq.: junior standing with an overall GPA of 2.20 and permission of school. May be taken for a max. of 6 hrs. of credit. 120 hours of supervised work experience in the animal industry per credit hour.

ANSC 3053 Meats (3)

2 hrs. lecture; 2 hrs. lab. Livestock and meat industry relationship; live animal and carcass comparison, slaughtering, processing, identification and utilization of meat and meat products.

ANSC 3060 Companion Animal Health Maintenance and Disease (3)

Prereq.: BIOL 1001, BIOL 1002, BIOL 1005 or BIOL 1201 and BIOL 1202, CHEM 1201 and CHEM 1202. Canine and feline health maintenance programs, diagnostic tests and tools used in animal health professions, etiology, clinical findings, diagnosis, prevention and treatment of common companion animal diseases and disorders, zoonotic disease transmission and prevention.

ANSC 3070 Small Animal Anatomy and Physiology (3)

Prereq.: BIOL 1001, BIOL 1002, BIOL 1005 or BIOL 1201 and BIOL 1202 and CHEM 1201 and CHEM 1202. Anatomy and physiology of small companion animals and exotic species.

ANSC 3900 Animal Science Research (1-3)

Prereq.: permission of school. May be taken for a max. of 6 sem. hrs. of credit. Directed individual research of a topic in the animal sciences.

ANSC 4001 Parasite Effects on Animal Performance (2)

Prereq.: ANSC 4009 or equivalent. 1 hr. lecture; 2 hrs. lab. Endo- and ecto-parasites that affect performance of domestic animals and birds.

ANSC 4009 Animal Nutrition (3)

Prereq.: CHEM 2060 or equivalent. Basic principles of nutrition including chemical composition of feedstuffs, digestion, metabolism and functions and values of nutrients.

ANSC 4018 Principles of Animal Genetics (4)

Prereq.: ANSC 2072 or BIOL 2153 and EXST 2201 or equivalent. 3 hrs. lecture; 2 hrs. lab. Concepts of animal breeding and genetics as they relate to farm livestock.

ANSC 4020 Dairy Foods Technology: Frozen and Cultured Dairy Products (4)

3 hrs. lecture; 3 hrs. lab. Principles and processes in the manufacture of ice cream and other frozen dairy products; concentrated milk products; cheese and fermented milk products.

ANSC 4031 Incubation and Hatchery Management (2)

Prereq.: 6 sem. hrs. of biological science or equivalent. 1 hr. lecture; 2 hrs. lab. Chick development and embryology; incubation principles and practices; hatchery equipment and design; hatchery management.

ANSC 4040 Quality Assurance in the Food Industry (4)

Also offered as FDSC 4040. Prereq.: BIOL 2051. 3 hrs. lecture; 2 hrs. lab. Laboratory functions, manufacturing processes and microbiological, chemical and statistical techniques used to provide complete quality assurance for the modern dairy food plant.

ANSC 4043 Domestic Animal Endocrinology (3)

Prereq.: BIOL 1001, BIOL 1002, BIOL 1005 or BIOL 1201, BIOL 1202 and CHEM 2060. Relation of endocrine system reproduction, growth and function of domestic animals.

ANSC 4045 Reproductive Physiology of Farm Animals (3)

Reproductive anatomy and physiology of farm animals; factors affecting reproductive performance.

ANSC 4046 Physiology of Lactation (2)

Prereq.: BIOL 1001, BIOL 1002, BIOL 1005 or BIOL 1201, BIOL 1202 and CHEM 2060. Anatomy and development of the mammary gland; physiological and biochemical regulation of mammary growth and milk secretion; emphasis on farm animals.

ANSC 4047 Reproductive Management (1)

Prereq.: credit or registration in ANSC 4045. 3 hrs. lab. Principles and techniques necessary for reproductive management in cattle.

ANSC 4050 Animal Biotechnology (3)

Prereq.: at least 8 hrs. of biological sciences. Recent developments in animal bio-technology; development of methods to increase the efficiency of growth, reproduction and lactation; improvement of resistance to disease and stress.

ANSC 4051 Poultry Biology (3)

2 hrs. lecture; 2 hrs. lab. Structure, conformation and selection of fowl; emphasis on egg formation and oviposition; other physiological factors of economic importance.

ANSC 4052 Poultry Management (3)

Prereq.: 6 sem. hrs. of biological science or equivalent. 2 hrs. lecture; 2 hrs. lab. Growth and development of the U.S. commercial egg and broiler industries; principles of nutrition, genetics, housing, management and marketing; types of integrated operations and contract production.

ANSC 4054 Dairy Farm Management (4)

Prereq.: ANSC 2049 or consent of instructor. 3 hrs. lecture; 3 hrs. lab. Principles of managing dairy cattle; recommended farm practices for economical milk production.

ANSC 4060 Contemporary Issues in the Animal Sciences (3)

Prereq.: ANSC 1011 or equivalent. Discussion and evaluation of contemporary issues and policies related to animal biology and agriculture; development of reasoning and interpersonal skills; preparation of subject matter for distribution to the public.

ANSC 4080 Dairy Microbiology (3)

Prereq.: BIOL 2051. 2 hrs. lecture; 2 hrs. lab. Application of specific microbiological procedures used in quality control and processing of dairy products.

ANSC 4081 Swine Production (3)

Prereq.: credit or registration in ANSC 4009 or ANSC 3010 or equivalent. Graduate students in animal, dairy and poultry sciences or animal and dairy sciences may not take more than one of the following for graduate credit: ANSC 4081, ANSC 4084, ANSC 4086 or ANSC 4088. 2 hrs. lecture; 2 hrs. lab. Management practices of swine; reproduction, nutrition, diseases and other aspects of production.

ANSC 4084 Beef Cattle Production (3)

Prereq.: ANSC 3010 or equivalent. Graduate students in animal, dairy and poultry sciences or animal and dairy sciences may not take more than one of the following for graduate credit: ANSC 4081, 4084, ANSC 4086, or ANSC 4088. 2 hrs. lecture; 2 hrs. lab. Management practices of beef cattle; reproduction, breeding, feeding, marketing, herd health and other aspects of production in the south.

ANSC 4086 Small Ruminant Production (3)

Prereq.: ANSC 3010 or equivalent. Graduate students in animal, dairy and poultry sciences or animal and dairy sciences may not take more than one of the following for graduate credit: ANSC 4081, ANSC 4084, 4086 or ANSC 4088. 2 hrs. lecture; 2 hrs. lab. Theory and practice of management, breeding and feeding of sheep and goats for production under southern conditions.

ANSC 4088 Horse Production (3)

Prereq.: ANSC 1011; Graduate students in animal, dairy and poultry sciences or animal and dairy sciences may not take more than one of the following for graduate credit: ANSC 4081, ANSC 4084, ANSC 4086 or 4088. 2 hrs. lecture; 2 hrs. lab. Theory and practice of raising horses; conformation and selection; nutrition, reproduction, breeding and production in the south.

ANSC 4092 Animal Science Proseminar (1)

Nutrition, animal breeding and production, and meat processing and preservation.

ANSC 4094 Meat Technology (3)

Prereq.: ANSC 3053; and BIOL 2083 or equivalent. 2 hrs. lecture; 2 hrs. lab.

ANSC 4095 Reproductive Physiology and Management of Zoo, Laboratory and Companion Animals (4)

Prereq.: basic course in biology or zoology; and ANSC 4045 or equivalent. Field trips are required. 3 hrs. lecture; 2 hrs. lab.
Reproductive biology of zoo, laboratory and companion animals, with emphasis on breeding management.

ANSC 4900 Special Topics in Animal Science (1-3)

Prereq.: permission of school. May be taken for a max. of 6 hrs. of credit when topics vary. Topics from the animal sciences.

ANSC 7001 Experimental Methods (2)

Prereq.: credit or registration in EXST 7004 or equivalent. Scientific methods applied to animal science.

ANSC 7004 Population Genetics in Animal and Plant Breeding (4)

Prereq.: EXST 7004 or equivalent. 3 hrs. lecture; 2 hrs. lab. Genetic concepts concerning characteristics of populations.

ANSC 7018 Rumen Physiology and Metabolism (3)

Comparison of ruminants to other herbivora and nonruminant animals; factors associated with obtaining and utilizing feeds; fermentation products; symbiotic relationship between microflora and the host animal; host animal metabolism.

ANSC 7020 Andrology (3)

Prereq.: ANSC 4045 or equivalent. Male reproductive physiology and anatomy of avian, aquatic and mammalian species.

ANSC 7050 Advanced Animal Physiology and Laboratory Techniques (4)

Prereq.: consent of instructor. 3 hrs. lecture; 2 hrs. lab. Physiological processes relating to domestic animal homeostasis and their interaction with production; current laboratory techniques.

ANSC 7051 Advanced Physiology of Reproduction (3)

Prereq.: ANSC 4045. Processes of reproduction in farm animals.

ANSC 7052 Biotechnology of Gamete and Embryo Physiology and Micromanipulation (4)

Prereq.: ANSC 4045 or equivalent. 3 hrs. lecture; 2 hrs. lab. Procedures for manipulation of mammalian gametes in vitro and general biotechnology techniques; emphasis on application to biological research.

ANSC 7061 Research in Animal Science (1-6)

Prereq.: consent of department head. May be repeated for credit; max. credit of 6 hrs. for MS degree and 9 hrs. for PhD degree. Research in animal nutrition, breeding and production; physiology of reproduction; meat technology.

ANSC 7091 Seminar (1)

May be taken for a max. of 4 hrs. of credit.

ANSC 7900 Special Topics in Animal Science (1-6)

Prereq.: consent of department head. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Special topics of interest in animal science.

ANSC 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

ANSC 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading.

Anthropology

ANTH 1001 Introduction to Physical Anthropology and Prehistory (3)

[LCCN: CATR 2023, Biological Anthropology] This is a **General Education course**. Origin and evolution of people; evolution and its physiological bases; human prehistory; human diversity; origin and development of human culture through the rise of civilization.

ANTH 1003 Introduction to Cultural and Social Anthropology (3)

[LCCN: CATR 2013, Cultural Anthropology] This is a **General Education course**. Diversity of human cultures; nature of culture, social organizations, subsistence patterns, economics, law, politics, religion, language and other institutions of culture viewed in cross-cultural perspective.

ANTH 2014 Introduction to Forensic Anthropology (3)

Exploration of medico-legal discipline of forensic anthropology with a focus on human skeletal anatomy.

ANTH 2015 Introduction to Archaeology (3)

This is a General Education course. Archaeological goals, methods, techniques and interpretations; particular prehistoric cultural sequences or projects; relationship of archaeology with other social, life and earth sciences.

ANTH 2016 Field Methods in Archaeology (3-6)

Prereq.: ANTH 2015 or equivalent. May be taken for a max. of 6 sem. hrs. of credit. Techniques of survey, mapping, excavation and recording; participation in one or more archaeological excavations.

ANTH 2050 World Archaeology (3)

This is a General Education course. Survey of human culture history from the stone age to the present; spread of humanity around the globe; major cultural developments including hunting and gathering, origins of agriculture, discovery and spread of metalworking, rise of ancient civilizations, and development of the modern world.

ANTH 2051 Introduction to World Ethnography (3)

This is a General Education course. Sex roles, economic pursuits, values, beliefs, families and other institutions of selected nonwestern peoples; implications for American culture.

ANTH 2423 Introduction to Folklore (3)

This is a General Education course. See ENGL 2423.

ANTH 3004 Archaeology and the Bible (3)

See REL 3004.

ANTH 3060 Introduction to Anthropological Linguistics (3)

Also offered as LING 3060. Cultural variation in language and its uses; problems of language classification and areal linguistics; practice in phonemic and morphemic analysis of nonwestern languages.

ANTH 3401 The Study of Folklore (3)

Also offered as ENGL 3401. History of the study of folklore; methods of collection, interpretation and analysis of folklore materials; myth, folktale, legend, folk song, ballads, folk humor, festival and folk speech; psychological, contextual and structural analysis of oral literature; specific reference to the heritage of Louisiana and the South.

ANTH 4002 South Asian Society, Polity and Culture (3)

See INTL 4002.

ANTH 4003 Indian Civilization of Middle and South America (3)

Ancient Maya, Aztec and Inca civilizations; modern Indian groups in Latin America.

ANTH 4004 The North American Indians (3)

Also offered as LING 4004. Origin, distribution, language and culture of the aboriginal population.

ANTH 4008 Ancient Civilizations of Middle America (3)

Ancient settlement, development of agriculture, rise and fall of ancient civilizations in Middle America including Olmec, Maya and Aztecs.

ANTH 4010 Human Osteology (3)

Prereq.: permission of instructor. Evolutionary biology and functional anatomy of the human skeleton.

ANTH 4013 Disaster Anthropology (3)

See DSM 4013.

ANTH 4014 Forensic Anthropology (3)

Prereq.: permission of instructor. Fundamental concepts and application of techniques in forensic anthropology.

ANTH 4017 Louisiana Archaeology (3)

Two overnight field trips. Archaeological data relative to the Indian cultures dating from the end of the Pleistocene period to the early historic era.

ANTH 4018 Historical Archaeology (3)

Also offered as HIST 4151. Broad range of archaeological goals, methods and interpretations unique to the study of the historic past; colonial and plantation archaeology in the southeastern U.S.

ANTH 4019 Geoarchaeology (4)

See GEOL 4019.

ANTH 4020 Method and Theory in Archaeology (3)

Prereq.: ANTH 1001 or ANTH 1003 and ANTH 2015 or equivalent. Empirical method and theory in archaeological research emphasizing the logic of scientific argument; history of American archaeology, survey of modern archaeological interpretations, types of explanation, logic of archaeological classification and formation of research designs.

ANTH 4021 Advanced Field Methods in Archaeology (3-6)

Prereq.: ANTH 2015 and ANTH 2016 or equivalent and at least one upper-division or graduate course in archaeology. May be taken for a max. of 6 sem. hrs. credit when topics vary. Advanced techniques of surveying, mapping, excavation, soil sampling and recording.

ANTH 4022 Ancient Civilizations of South America (3)

Survey of South American prehistory and the development of human civilizations. Archaeological perspective used to explore the various ways of life and cultural achievements in the various regions of the continent from the Amazon lowlands to the Andean highlands and the Pacific desert coast.

ANTH 4023 Latin American Cultures (3)

Spanish-American cultures in Latin America; their relationship to current societal changes.

ANTH 4024 Aerial Photo Interpretation and Image Processing (3)

See GEOG 4020.

ANTH 4025 Archaeology of Foodways (3)

Exploration of foodways through the material remains preserved in the archaeological record. Examination of the variability of foodways in the past from early human consumption patterns to the emergence of food production and ancient civilizations.

ANTH 4028 Ancient Maya in the Media (3)

Study of how ancient Maya are portrayed in the media including documentary and feature films, Internet, written texts, radio and television.

ANTH 4031 Comparative Religions (3)

Also offered as REL 4031. Religious systems in different levels of sociocultural evolution.

ANTH 4032 Religion, Gender and Society (3)

See REL 4032.

ANTH 4040 Physical Anthropology (3)

Prereq.: ANTH 1001, or BIOL 1002 or BIOL 1202. Evolutionary theory, human variation, fossil record of human evolution and primate behavior.

ANTH 4042 Enterprise Geographic Information Systems (3)

See GEOG 4042.

ANTH 4050 Black Music in America (3)

Cultural and historical survey of musical genres created and developed by black Americans.

ANTH 4051 Africa (3)

People and cultures of Africa; emphasis on cultural transformation and contemporary societies. Topics include: kinship, gender, economics, religion, healing, politics, urbanism, post-colonialism, and transnationalism.

ANTH 4053 African-American Cultures (3)

Cultures of African-Americans in the western hemisphere; their origins, development and present distinctiveness.

ANTH 4060 Language and Culture (3)

Also offered as LING 4060. Prereq.: ANTH 3060 or COMD 2050 or equivalent. Relationships between various aspects of language and culture.

ANTH 4070 Medicine, Bodies and Power (3)

Examines bodily practice, social theory and cultural analysis of the body in health, illness and healing. Cross-cultural perspectives and ethnography are considered in relation to forms of social power.

ANTH 4074 Place and Culture (3)

Also offered as GEOG 4074. Consideration of place and culture as two core concepts in geography and anthropology.

ANTH 4082 Social and Cultural Anthropology (3)

For graduate students with little or no anthropology background. Culture, society and language in primitive and complex settings.

ANTH 4083 Environmental Change of the Ice Age (3)

See GEOG 4083.

ANTH 4085 History of Anthropological Theory (3)

Major theories in all branches of anthropology; emphasis on cultural and social anthropology.

ANTH 4086 Human-Environment Interactions (3)

See GEOG 4086.

ANTH 4087 Gender, Place and Culture (3)

Also offered as GEOG 4087 and WGS 4087.

ANTH 4090 Ethnographic Methodology (3)

Theories and techniques of ethnography; emphasis on utilization of informants.

ANTH 4440 Vernacular Architecture and Material Culture (3)

Also offered as ARCH 4440. Subject matter and instructor may vary; additional details available from department. World vernacular architecture, including indigenous and folk buildings; other forms of material culture.

ANTH 4450 African American Folklore (3)

Also offered as AAAS 4450. Prereq.: permission of instructor. History, theories and methodologies used in the study of African American folklore in the United States.

ANTH 4470 Folklore of the African Diaspora (3)

African, Caribbean and African-American cultures from the viewpoint of the diaspora.

ANTH 4475 American Folklore (3)

See ENGL 4475.

ANTH 4909 Undergraduate Seminar in Anthropology (3)

Prereq.: written consent of instructor. May be taken for a max. of 9 sem. hrs. when topics vary.

ANTH 4997 Special Topics in Anthropology (3)

Prereq.: permission of instructor. May be taken for a max. of 6 sem. hrs. when topics vary.

ANTH 4998 Independent Reading and Research in Anthropology (1-6)

An honors course, ANTH 4999, is also available. Prereq.: written consent of instructor. May be taken for a max. of 6 sem. hrs. Supervised reading or research selected by qualified advanced students.

ANTH 4999 Honors: Independent Reading and Research in Anthropology (1-6)

Same as ANTH 4998, with special honors emphasis for qualified students.

ANTH 7032 Comparative Studies in World Costume (3)

See HUEC 7032.

ANTH 7060 Conversation and Discourse (3)

Also offered as LING 7060. Prereq.: completion of one course in linguistics. Analysis of language in use; conversation, narrative, culturally specific genres; emphasis on discourse structures in naturally occurring context.

ANTH 7070 Ritual: Theory, Context and Performance (3)

Investigates influential theories and key debates, range of activities and contexts and performance of rituals.

ANTH 7074 Poetics of Place (3)

Also offered as GEOG 7074. Prereq.: ANTH 4074/GEOG 4074 or permission of instructor. Combination of the observational method of social science with the literary insights of poetry and fiction; understanding of how places where humans live out their lives convey a variety of meanings beyond that of the strictly utilitarian.

ANTH 7081 Conceptual Issues in Human Evolution (3)

Prereq.: permission of instructor. May be repeated for a max. of 6 sem. hrs. credit when topics vary. Consideration of the various conceptual issues on human evolution.

ANTH 7108 Mesoamerican Archaeology Seminar (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

ANTH 7200 Human Fertility (3)

Biological, behavioral and demographic aspects of human reproduction.

ANTH 7760 Readings in Creolization (3)

A seminar on linguistic, literary, historical and anthropological creolization and creolized cultures.

ANTH 7766 Readings in the Caribbean and Louisiana (3)

Seminar on the theoretical interpretation of Caribbean and Louisiana cultures.

ANTH 7901 Introduction to Graduate Study (1)

Same as GEOG 7901. Techniques and methods of the profession for incoming graduate students.

ANTH 7906 Nature of Culture (3)

ANTH 7909 Selected Topics in Anthropology (3)

Also offered as LING 7909. Prereq.: permission of instructor. May be taken for a max. of 9 hrs. of credit when topics vary.

ANTH 7936 Advanced Qualitative Research in Geography and Anthropology (3)

Also offered as GEOG 7936.

ANTH 7943 Paleoclimatology (3)

See GEOG 7943.

ANTH 7954 Anthropology of Complex Societies (3)

Anthropological assumptions of theory and technique; problems generated by applying these assumptions to contemporary Africa, India, Latin America and Anglo-America.

ANTH 7962 Field Methods in Linguistics (3)

Also offered as LING 7962. Prereq.: at least one upper-division or graduate linguistics course. 2 hrs. lecture; 1 hr. individual consultation. Recording and analyzing a living non-European language and using a native-speaking informant.

ANTH 7999 Research in Anthropology (1-6)

Also offered as LING 7999. Prereq.: written consent of instructor. May be repeated for credit. Total credit earned in ANTH 4998 and ANTH 7999 cannot exceed 9 sem. hrs. Individual supervision of advanced research and field work in anthropology.

ANTH 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading. Permission of instructor.

ANTH 9000 Dissertation Research (1-12 per sem.)

Prereq.: permission of instructor. "S/U" grading.

Arabic

ARAB 1101 Beginning Arabic (4)

[LCCN: CARB 1014, Elementary Arabic I] This is a General Education course. *Native speakers of Arabic will not receive credit for this course.* Supplementary work in language laboratory. Introduction to alphabet, vocabulary and grammar; elementary language study with oral, written and reading practice.

ARAB 1102 Beginning Arabic (4)

[LCCN: CARB 1024, Elementary Arabic II] This is a General Education course. *Prereq.: ARAB 1101 or equivalent. Native speakers of Arabic will not receive credit for this course.* Supplementary work in language laboratory. Continuation of ARAB 1101. Elementary language study with oral, written and reading practice.

ARAB 2001 Arabic Culture (3)

Taught in English; knowledge of Arabic not required. Introduction to Arabic history and the varieties in Arabic Culture.

ARAB 2080 Arabic Conversation (3)

Prereq.: ARAB 1102. Intensive oral drills, supplemented with exercises in grammar and vocabulary.

ARAB 2101 Intermediate Arabic (4)

This is a General Education course. *Prereq.: ARAB 1102. Native speakers of Arabic will not receive credit for this course.* Continuation of the study of Arabic. Supplementary work in language laboratory. Development of writing, reading, and speaking skills.

ARAB 2102 Intermediate Arabic (4)

This is a General Education course. *Prereq.: ARAB 2101. Native speakers of Arabic will not receive credit for this course. Continuation of the study of Arabic. Supplementary work in language laboratory. Development of writing, reading and speaking skills.*

ARAB 3101 Advanced Arabic I (3)

Prereq.: ARAB 2102 or equivalent. Introduces authentic classical and modern Arabic texts; continuing development of reading, writing, speaking and listening.

ARAB 3102 Advanced Arabic II (3)

Prereq.: ARAB 3101 or equivalent. Introduces authentic classical and modern Arabic texts, especially poetry; continuing development of reading, writing, speaking and listening.

Architecture

ARCH 1001 Architectural Design I (6)

Prereq.: permission of department. 12 hrs. studio. Emphasis on two-dimensional representation of three-dimensional forms; development of basic skills in architectural design drawing and modeling.

ARCH 1002 Architectural Design II (6)

An honors course, ARCH 1102 is also available. Prereq.: ARCH 1001. Credit will not be given for this course and ARCH 1102. 12 hrs. studio. Emphasis on the organization of spaces, form and process, and development of skills in architectural design drawing and modeling.

ARCH 1102 Honors: Architectural Design II (6)

Same as ARCH 1002, with special emphasis for qualified Honor students. Prereq.: ARCH 1001. Credit will not be given for this course and ARCH 1002. 12 hrs. studio.

ARCH 2001 Architectural Design III (6)

An honors course, ARCH 2101 is also available. Prereq.: ARCH 1002 or ARCH 1102; Coreq.: ARCH 2003. Credit will not be given for this course and ARCH 2101. 12 hrs. studio. Emphasis on abstract and theoretical organizational concepts; space, form, function and resolution of materials and structural systems.

ARCH 2002 Architectural Design IV (6)

An honors course, ARCH 2102 is also available. Prereq.: ARCH 2001 or ARCH 2101; Coreq.: ARCH 2006. Credit will not be given for this course and ARCH 2102. Required field trip. Students are responsible for paying travel expenses associated with the course. 12 hrs. studio. Emphasis on process, materials theory, site inventory and analysis and impact of regionalism.

ARCH 2003 Architectural Techniques (3)

Prereq.: ARCH 1002; Coreq.: ARCH 2001. Exploration of drawing, modeling and digital applications to the design process; specific techniques will vary based on projects assigned in ARCH 2001.

ARCH 2006 Architectural Topics (3)

Prereq.: ARCH 2003; Coreq.: ARCH 2002. Use of case studies to contrast the meanings of buildings designed in urban or rural environments.

ARCH 2007 History of Architecture I (3)

This is a General Education course. The development of architectural and spatial forms as they relate to changing perceptions of self, society and the natural world. From prehistory to the 13th century.

ARCH 2008 History of Architecture II (3)

This is a General Education course. The development of architectural and spatial forms as they relate to changing perceptions of self, society and the natural world from the Italian Renaissance through modern times.

ARCH 2101 Honors: Architectural Design III (6)

Same as ARCH 2001, with special emphasis for qualified Honor students. Prereq.: ARCH 1002 or ARCH 1102; Coreq.: ARCH 2003; Credit will not be given for this course and ARCH 2001. 12 hrs. studio.

ARCH 2102 Honors: Architectural Design IV (6)

Same as ARCH 2002, with special emphasis for qualified Honors students. Prereq.: ARCH 2001 or ARCH 2101; Coreq.: ARCH 2006. Credit will not be given for this course and ART 2002. 12 hrs. studio.

ARCH 2401 Appreciation of Architecture (3)

This is a General Education course. Architectural concepts and principles; architectural vocabulary, style, symbolic form characteristics, spatial character and refinements.

ARCH 3000 Supervised Independent Study and Research (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit with consent of school director. Investigation of areas of interest not covered in other departmental courses.

ARCH 3001 Architectural Design V (6)

An honors course, ARCH 3101, is also available. Prereq.: approval for advancement to upper division in architecture. Required field trip. Students are responsible for paying travel expenses associated with the course. Credit will not be given for this course and ARCH 3101. 12 hrs. studio. Emphasis on programming, site analysis and planning, functional planning and resolution of structural and architectural systems.

ARCH 3002 Architectural Design VI (6)

An honors course, ARCH 3102 is also available. Prereq.: ARCH 3001 or ARCH 3101, ARCH 3007. Credit will not be given for this course and ARCH 3102. 12 hrs. studio. Emphasis on planning buildings while incorporating studies in the technologies of materials, structure, environmental controls, lighting and acoustics.

ARCH 3003 Architectural Structures I (3)

Prereq.: approval for advancement to upper division in architecture. Building structural mechanics, statics, strength of materials and theories of structures.

ARCH 3004 Architectural Structures II (3)

Prereq.: ARCH 3003. Design and application of timber and steel structures in architecture.

ARCH 3007 Architectural Systems (3)

Prereq.: approval for advancement to upper division in architecture. Detailed treatment of construction materials and systems, with emphasis on large scale application of enclosure systems and steel and concrete structures.

ARCH 3008 Environmental Control Systems (3)

Prereq.: approval for advancement to upper division in architecture. Principles and practices of selection and design of mechanical systems, including lighting, electrical distributions, acoustics, plumbing, vertical transportation and fire suppression.

ARCH 3101 Honors: Architectural Design V (6)

Same as ARCH 3001, with special emphasis for qualified Honors students. Prereq.: approval for advancement to upper division in architecture. Required field trip. Students are responsible for paying travel expenses associated with the course. Credit will not be given for this course and ARCH 3001. 12 hrs. studio.

ARCH 3102 Honors: Architectural Design VI (6)

Same as ARCH 3002, with special emphasis for qualified Honors students. Prereq.: ARCH 3001 or ARCH 3101, ARCH 3007. Credit will not be given for this course and ARCH 3002. 12 hrs. studio.

ARCH 4001 Architectural Design VII (6)

An honors course, ARCH 4101 is also available. Prereq.: ARCH 3002 or ARCH 3102. Service-learning course. Credit will not

be given for this course and ARCH 4101. 12 hrs. studio. Emphasis on the advancement of sustainable communities through analysis, building design and the study of socially responsible approaches to development and building practice.

ARCH 4002 Architectural Design VIII (6)

An honors course, ARCH 4102, is also available. Prereq.: ARCH 4001 or ARCH 4101 or permission of department. Required field trip. Students are responsible for paying travel expenses associated with the course. Credit will not be given for this course and ARCH 4102 or ARCH 4202. 12 hrs. studio. Emphasis on the design of single or multiple buildings in urban environments.

ARCH 4003 Intensive Design Studio (6)

Su Prereq.: *admission to the M.Arch program. 12 hrs. studio. Introduction to design, analysis, and the development of basic architectural skills.*

ARCH 4007 History of Architecture III (3)

Prereq.: ARCH 2008. Majors only or by permission of department. Development of architectural and spatial forms as they relate to changing perceptions of self, society and the natural world in the 20th century.

ARCH 4031 Architectural Structures III (3)

Prereq.: ARCH 3003. Design and application of concrete structures in architecture.

ARCH 4032 Advanced Architectural Technology (3)

Prereq.: ARCH 3008. Seminar relating to topics of architectural technologies including, but not limited to building structures, environmental concerns, electronic transfer of information.

ARCH 4041 Issues in Sustainability (3)

Examination of issues in sustainability as they relate to the practice of architecture.

ARCH 4051 Advanced 20th Century Architectural History (3)

Prereq.: ARCH 2007, ARCH 2008. Topics in 20th century architectural history and theory; writing component.

ARCH 4062 Urban Design and Planning (3)

Fundamentals of urban morphology in relation to historical, social, political and economic systems.

ARCH 4072 Community Design Studies (3)

Study of community design and community-based practice with emphasis on contemporary participatory action research and techniques.

ARCH 4090 Restoration Studies (3)

Theory and methodology of architectural restoration; tools and techniques of restoration.

ARCH 4101 Honors: Architectural Design VII (6)

Same as ARCH 4001, with special emphasis for qualified Honor students. Prereq.: ARCH 3002 or ARCH 3102. *Credit will not be given for this course and ARCH 4001. 12 hrs. studio.* Theory and methodology of architectural restoration; tools and techniques of restoration.

ARCH 4102 Honors: Architectural Design VIII (6)

Same as ARCH 4002, with special emphasis for qualified Honors students. Prereq.: ARCH 4001 or ARCH 4101 or permission of department. *Required field trip. Students are responsible for paying travel expenses associated with the course. Credit will not be given for this course and ARCH 4002 or ARCH 4202. 12 hrs. studio.*

ARCH 4155 Recording Historic Structures (3)

Prereq.: permission of department. *1 hr. lecture; 2 hrs. lab.* Hands-on field and laboratory experience in current methods of documenting historic buildings, including hand methods, photography and photogrammetry.

ARCH 4202 Architectural Design VIII Off-Campus (6)

For off-campus study only. Permission of department required. Credit will not be given for this course and ARCH 4002 or ARCH 4102. 12 hrs. studio. Emphasis on the design of single or multiple buildings in an urban setting.

ARCH 4221 Selected Topics in Architecture (3)

May be taken for a max. of 12 hrs. of credit with school approval. Studies in various subjects related to architecture.

ARCH 4353 Principles and Practices of Land Development (3)

Environmental, physical and financial aspects of land development.

ARCH 4440 Vernacular Architecture and Material Culture (3)

See ANTH 4440.

ARCH 4700 Research Methods (3)

Major research methods in architecture; hypothesis formulation and testing, data gathering and analysis.

ARCH 4993 Advanced Computer Aided Architectural Graphics (3)

Prereq.: consent of instructor. The development and application of advanced computer-based architectural design and communication skills.

ARCH 5001 Comprehensive Architectural Design (6)

An honors course, ARCH 5101, is also available. Prereq.: ARCH 4002 or ARCH 4102 or ARCH 4202; Coreq.: ARCH 5005. Credit will not be given for this course and ARCH 5101. 12 hrs. studio. Emphasis on the comprehensive design of a single building integrating material selection, mechanical, acoustical, structural, lighting and two- and three-dimensional studies.

ARCH 5002 Architectural Design Concentration (6)

An honors course, ARCH 5102, is also available. Prereq.: ARCH 4002 or ARCH 4102 or ARCH 4202. Credit will not be given for this course and ARCH 5102 or ARCH 5202. 12 hrs. studio. Emphasis on architectural problems developed around faculty expertise and emerging opportunities in the profession.

ARCH 5003 Advanced Architectural Topics (3)

Seminar relating to various topics in architecture; writing component.

ARCH 5004 Concentration Seminar (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Various topics relating to architectural issues.

ARCH 5005 Advanced Architectural Techniques (3)

Prereq.: ARCH 4002 or ARCH 4102 or ARCH 4202 or ARCH 7005; Coreq.: ARCH 5001, ARCH 5101 or ARCH 7006. Preparation and correlation of working drawings, specifications and/or manuals associated with various project phases and through a digital workflow.

ARCH 5006 Professional Practice (3)

Exploration and analysis of project acquisition, contract negotiations, governmental regulations, personnel, office management and the architect's societal role.

ARCH 5008 Community Design Practicum (6)

Prereq.: ARCH 3002 or ARCH 3102, LA 3002 or permission of department. Minimum 280 hours of supervised experience. Supervised learning experience in the Office of Community Design and Development or approved off-campus site with emphasis on pre-professional services for community-based projects.

ARCH 5101 Honors: Comprehensive Architectural Design (6)

Same as ARCH 5001, with special emphasis for qualified Honors students. Prereq.: ARCH 4002 or ARCH 4102 or ARCH 4202; Coreq.: ARCH 5005. 12 hrs. studio. Credit will not be given for this course and ARCH 5001 .

ARCH 5102 Honors: Architectural Design Concentration (6)

Same as ARCH 5002, with special emphasis for qualified Honors students. Prereq.: ARCH 4002 or ARCH 4102 or ARCH 4202. 12 hrs. studio. Credit will not be given for this course and ARCH 5002 or ARCH 5202.

ARCH 5202 Architectural Design Concentration Off-Campus (6)

May be taken for a max. of 12 sem. hrs. of credit when topics vary. For off-campus study only. Credit will not be given for this course and ARCH 5002 or ARCH 5102. Permission of department required. 12 hrs. studio. Emphasis on architectural problems developed around faculty expertise and emerging opportunities in the profession.

ARCH 7001 Graduate Design Studio I (6)

12 hrs. studio. The use of space and form in relation to concept in the exploration of basic architectural elements.

ARCH 7002 Graduate Design Studio II (6)

Prereq.: ARCH 7001. 12 hrs. studio. Emphasis on the design of buildings in a variety of physical settings.

ARCH 7003 Graduate Design Studio III (6)

Prereq.: ARCH 7002. 12 hrs. studio. Emphasis on architectural programming and the design of buildings incorporating technologies of materials and various architectural systems.

ARCH 7004 Graduate Design Studio IV (6)

Prereq.: ARCH 7003. 12 hrs. studio. Emphasis on the design of buildings incorporating technologies of environmental systems.

ARCH 7005 Graduate Design Studio V (6)

Prereq.: ARCH 7004. 12 hrs. studio. Introduction to contextual building design in an urban setting with emphasis on site and context analysis and community planning in a collaborative working environment.

ARCH 7006 Graduate Design Studio VI (6)

Prereq.: ARCH 7005. Coreq.: ARCH 5005. Credit will not be given for both this course and ARCH 8000. 12 hrs. studio. Emphasis on the synthesis of all issues addressed in previous studios in the comprehensive design of buildings.

ARCH 7600 Seminar in Architecture (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Selected topics in architecture.

ARCH 7900 Architectural Studies/Research (3)

Prereq.: written consent of School of Architecture Graduate Committee. May be taken for a max. of 6 sem. hrs. of credit. Selected readings and/or research under the supervision of graduate faculty.

ARCH 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading. Credit will not be given for both this course and ARCH 7006.

Art: Ceramics

ART 1661 Introduction to Ceramics: Handbuilding (3)

Prereq.: majors/minors only, ART 1009 or ART 1012 or consent of instructor. 6 hrs. studio. Students are responsible for studio fee associated with course. Exploration of hand-building techniques, surface applications and kiln firing.

ART 1662 Introduction to Ceramics: Wheel Throwing (3)

Prereq.: ART 1009 or ART 1012 or consent of instructor. 6 hrs. studio. Students are responsible for studio fee associated with course. Problems in ceramic forming techniques, mixing of clays and glazes and kiln firing.

ART 2655 Basic Jewelry/Metalsmithing (3)

6 hrs. studio. Students are responsible for studio fee associated with course. Piercing, construction, cold connection, soldering, forming, and stone setting; studio problems in bronze, copper, and sterling silver.

ART 2656 Intermediate Jewelry/Metalsmithing (3,6)

Prereq.: ART 2655 or consent of instructor. May be taken for a max. of 9 hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6, 12 hrs. studio. Students are responsible for studio fee associated with course. Intermediate studio work in jewelry/metalsmithing involving model making and the casting processes.

ART 2661 Intermediate Ceramics (3)

An honors course, ART 2662 is also available. Prereq.: ART 1661 or ART 1662 and permission of instructor. May be taken for a max. of 9 sem. hrs. of credit. Credit will not be given for this course and ART 2662. 6 hrs. studio. Studio techniques and issues in ceramics; continued investigation of hand-building and wheel-throwing.

ART 2662 Honors: Intermediate Ceramics (3)

Same as ART 2661 with special emphasis for qualified Honors students. Prereq.: ART 1661 or ART 1662 and permission of instructor. May be taken for a max. of 9 sem. hrs. of credit. Credit will not be given for this course and ART 2661. Students are responsible for studio fee associated with course. 6 hrs. studio.

ART 4641 Special Studies in Ceramics (3)

Prereq.: ART 1661 or ART 1662 or permission of instructor. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. of studio. Advanced studio work in predetermined area of specialization with emphasis on formulation of clay bodies, glazes and practice of kiln operation, building and maintenance.

ART 4651 Special Studies in Jewelry/Metalsmithing (3,6)

Prereq.: consent of instructor based on review of student's portfolio. May be taken for a max. of 15 hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6, 12 hrs. studio. Students are responsible for studio fee associated with course. Studio work in predetermined area of specialization with emphasis on a single technique, material or aesthetic research in art jewelry and metalsmithing.

ART 4655 Advanced Jewelry/Metalsmithing (3,6)

Prereq.: consent of instructor based on review of student's portfolio. May be taken for a max. of 15 hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6, 12 hrs. studio. Students are responsible for studio fee associated with course. Advanced studio work in one specific process such as: forging, forming, reproduction processes, advanced construction techniques, CAD/CAM, mechanisms, clasps, chain construction. Emphasis on historical and contemporary aesthetic in art jewelry and metalsmithing.

ART 4661 Advanced Ceramics (3)

Prereq.: ART 2661 or permission of instructor. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Studio problems in ceramics.

ART 4691 Senior Project (3)

Prereq.: permission of instructor, 12 sem. hrs. of credit in ART 4641 or ART 4651 or ART 4661 or ART 4761. This course is not offered during the summer term. Students are responsible for studio fee associated with course. 6 hrs. studio. Proposal and execution of a ceramics project under the direction of a major professor during the final semester of the senior year.

ART 7600 Graduate Ceramics (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 or 12 hrs. studio each.

Art: Digital Art

ART 2050 Digital Art I (3)

Prereq.: majors/minors only, ART 1008 or ART 1011. 2 hrs. lecture/2 hrs. studio. Students are responsible for studio fee associated with course. Introduction to digital applications in art.

ART 2210 Creative Coding (3)

Prereq.: ART 2050 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. An introduction to computer programming for creative applications focusing on languages useful for web development.

ART 2220 Moving Image (3)

Prereq.: ART 2050 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. Introduction to digital video production and editing systems; concepts will include basic compositing and motion graphics.

ART 2230 Virtual Space (3)

Prereq.: ART 2050 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. Introduction to modeling and animation using three-dimensional objects and spaces in a virtual environment.

ART 2551 Typography for Visual Communications (3)

Prereq.: consent of instructor and ART 1011. Students are responsible for studio fee associated with course. 2 hrs. lecture; 2 hrs. lab. Historical overview of type and letter forms; introduction to professional typography in print and digital environments; primary focus will be applications to contemporary communications.

ART 4059 Digital Media Capstone (3)

Prereq.: at least 15 hours credit towards the Digital Media-Arts minor. Credit will not be given for both EE 4859 and ART 4059. 2 hrs. lecture, 2 hrs. lab. Culminating capstone project experience requiring interdisciplinary teams to prototype a digital media work or application.

ART 4220 Advanced Moving Image (3)

Prereq.: ART 2220, ART 2230 and permission of instructor. May be taken for a max. of 6 sem. hrs. of credit. Students are

responsible for studio fee associated with course. 6 hrs. studio. Exploration of advanced topics in video through workshops, screenings, and selected readings on time based media; topics will also include intermediate compositing and motion graphics.

ART 4230 Virtual Space and Motion (3)

Prereq.: ART 2220, ART 2230 and permission of instructor. May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Investigation of advanced techniques and issues in the creation of virtual narrative and animation in three-dimensional space.

ART 4240 Topics in Digital Art (3)

Prereq.: consent of instructor. May be taken for a max. of 12 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Studio work in a predetermined area of specialization. Emphasis will be placed on an area of research from a particular faculty member or visiting practitioner.

ART 4290 Digital Art Synthesis (3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. 6 hrs. studio. Advanced studio focused on the completion and presentation of a large scale digital media project.

ART 4550 Digital Imaging for Visual Communications (3)

Prereq.: consent of instructor and ART 2551 or equivalent. Students are responsible for studio fee associated with course. 2 hrs. lecture; 2 hrs. lab. Basic exploration of digital photographic technology and its application in communications; topics include: scanning, image processing and manipulation, digital filtering, and imaging peripherals; emphasis on emerging technology and preparing images for multimedia applications.

ART 7250 Digital Art Praxis (3)

Prereq.: consent of instructor. May be taken for a max. of 24 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Collaborative research, development, and implementation of experimental digital media project.

ART 7255 Digital Art Seminar (3)

Prereq.: consent of instructor. May be taken for a max. of 21 sem. hrs. of credit. Creative and theoretical project critique, discussion of contemporary issues and research-based investigations in digital media.

Art: General Courses

ART 1001 Introduction to Fine Arts (3)

[LCCN: CART 1023, Introduction to Visual Arts] This is a General Education course. Fundamental problems and concepts of art in the fields of design, sculpture, graphics, painting and ceramics, as related to home, community, religion, commerce and industry.

ART 1008 Introduction to Two-Dimensional Composition (3)

[LCCN: CART 1113, Art Structure/2-D Design] *Credit will not be given for both this course and ART 1011. 6 hrs. studio.* An introduction to two-dimensional art and design practices using a variety of materials and techniques.

ART 1009 Introduction to Three-Dimensional Art (3)

[LCCN: CART 1123, 3-D Design] *Credit will not be given for both this course and ART 1012. 6 hrs. studio.* Introduction to fundamental concepts of three-dimensional art; projects will explore line, plane, spatial organization, surface and volume using a variety of materials and techniques.

ART 1010 Introduction to Drawing (3)

[LCCN: CART 2203, Beginning Drawing] *Credit will not be given for both this course and ART 1847. 6 hrs. lab.* Drawing from observation and invented images; various drawing materials, methods and subjects are explored as a mean to develop perceptual ability and descriptive drawing skills; drawing concepts including composition, line, perspective, shape, space and value.

ART 1011 Two-Dimensional Design (3)

Prereq.: majors and interior design majors only. 4 hrs. lab; 1 hr. lecture. Studio projects in visual literacy; fundamentals of the structure of two-dimensional works of art; principles of organization and elements of art; role of the visual arts in society.

ART 1012 Three-Dimensional Design (3)

Prereq.: majors only. Credit will not be given for both this course and ART 1009. Students are responsible for studio fee associated with course. 6 hrs. studio. Introduction to the fundamental concepts of three-dimensional art. Projects will explore line, plane, spatial organization, surface and volume; using a variety of materials and techniques.

ART 1013 Studio Art Abroad (3)

6 hrs. studio. Studio art fundamentals within the specific medium of faculty members participating in Academic Programs Abroad.

ART 2055 Digital Art II (3)

Prereq.: ART 2050 or permission of instructor. Students are responsible for studio fee associated with course. 2 hrs. lecture; 2 hrs. lab. Introductory work in digital animation and multimedia applications.

ART 4020 Special Topics in Studio (3)

Prereq.: permission of instructor.
May be taken for a max. of 6 hrs. of credit when topics vary. 6 hrs. studio. Directed studies with a visiting artist.

ART 4030 Independent Study in Studio Art (3)

Prereq.: permission of instructor. 6 hrs. lab. Proposal and execution of an individual creative research project under the direction of a studio art faculty member.

ART 4050 Digital Art III (3)

Prereq.: ART 2055 or equivalent. Primarily for students majoring in art. 6 hrs. studio. Students are responsible for studio fee associated with course. Intermediate work in digital animation.

ART 4055 Digital Art IV (3)

Prereq.: ART 4050 or equivalent and permission of instructor.

Primarily for students majoring in art. 6 hrs. studio. Advanced work in digital imaging, video and animation.

ART 4080 Performance Art (3)

Prereq.: completion of studio art fundamental courses and permission of instructor. 6 hrs. studio. Multi-disciplinary “live” art studio problems utilizing a diverse range of media such as drawing and painting, sound and movement and poetry; lectures and discussions on the history of performance art.

ART 7042 Visiting Artist Seminar (3)

May be taken for a max. of 9 hrs. of credit. Seminar with visiting artist: contemporary art, criticism, individual and group projects.

ART 8000 Thesis Research (1-12 per sem.)

“S”/“U”grading.

Art: Graphic Design

ART 1551 Basic Design (3)

Prereq.: majors/minors only, ART 1008 or ART 1011. 6 hrs. studio. Basic design projects that investigate form and the delineation of space within a two-dimensional field; emphasis on hand skills and traditional design media.

ART 2544 Letter Forms (3)

An honors course, ART 2545 is also available. Prereq.: ART 1011 and permission of instructor. Credit will not be given for this course and ART 2545. 6 hrs. studio. Drawn letter form studies; traditional and contemporary variations.

ART 2545 Honors: Letter Forms (3)

Same as ART 2544, with special emphasis for qualified Honors students. Prereq.: ART 1011 and permission of instructor. Credit will not be given for this course and ART 2544. 6 hrs. studio.

ART 2552 Color Design (3)

[LCCN: CART 2303, Color Theory] *Prereq.: ART 1011 and permission of instructor. 6 hrs. studio. Color as a functional design element of perception and visual communication.*

ART 2554 Graphic Design I (3)

An honors course, ART 2555, is also available. Prereq.: ART 1011 and permission of instructor. Credit will not be given for this course and ART 2555. 6 hrs. studio. Professional procedures for solving design problems from first ideas through finished presentations; emphasis on the integration of letter forms and graphics.

ART 2555 Honors: Graphic Design I (3)

Same as ART 2554, with special emphasis for qualified Honors students. Prereq.: ART 1011 and permission of instructor. Credit will not be given for this course and ART 2554. 6 hrs. studio.

ART 2564 Graphic Abstraction (3)

Prereq.: ART 1011 and permission of instructor. 6 hrs. studio. Simplification of pictorial images as graphic elements.

ART 4514 Experimental Design (3)

Prereq.: consent of instructor based on review of student's portfolio. 6 hrs. studio. Advanced experimental work in a predetermined area of graphic design.

ART 4526 Prepress Production Techniques (3)

Prereq.: consent of instructor. 6 hrs. studio. Studio techniques related to production problems in the graphic design profession; typesetting methods; primary printing processes, mechanical and digital systems.

ART 4527 Applied Typography (3)

Prereq.: consent of instructor. 6 hrs. studio. Developing and understanding typographic skills through functional and aesthetic use of type and its application within the digital environment.

ART 4541 Special Studies in Graphic Design (3)

Prereq.: consent of instructor based on review of student's portfolio. May be taken for a max. of 9 sem. hrs. of credit. 6 hrs. studio. Advanced work in a predetermined area of specialization.

ART 4551 Graphic Design II (3)

Prereq.: consent of instructor. 6 hrs. studio. Problems in design related to the professional design field; methods of reproduction, exhibition techniques and digital applications.

ART 4553 Digital Imaging Techniques (3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Digital imaging technology and its application in art and design areas; scanning, image processing, manipulation, digital filtering and imaging peripherals; emphasis on digital imaging aesthetics, emerging technology and preparing images for printed and multimedia applications.

ART 4555 Graphic Design III (3)

Prereq.: consent of instructor. 6 hrs. studio. Principles of visual communication through graphic design; problems in design theory and application.

ART 4560 Interactive Media for Visual Communications (3)

Prereq.: consent of instructor and ART 4550 or equivalent. Students are responsible for studio fee associated with course. 2 hrs. lecture; 2 hrs. lab. Basic application of interactive digital technology: design and application of Internet-based communications, hypermedia language, virtual reality, sound and visual synchronization, communications standards, emerging technologies and multimedia; special focus on the study and application of interactive multimedia theory.

ART 4561 Survey of Graphic Design (3)

Prereq.: consent of instructor. Overview of graphic design, covering its development from its inception to the present; its relationship to other arts; and the cultural influences and technological advances that have shaped its present role in the field of visual communications.

ART 4564 Senior Graphic Design (3)

Prereq.: consent of instructor. May not be taken concurrently with ART 4555. This course is not offered during the summer term. 6 hrs. studio. Design projects investigating problems of visual communication; individual and group projects with professional-level presentations.

ART 4567 Interactive Multimedia Design (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Application of interactive computer graphics technology for art and design; design and application of CD-ROM, video disks, Internet-based communication, hypermedia language, virtual reality, sound and visual synchronization, communication standards, emerging technologies and multimedia; emphasis on study and application of interactive multimedia design theory.

ART 4574 Graphic Design Synthesis (3)

Prereq.: consent of instructor based on review of student's portfolio. May be taken for a max. of 6 sem. hrs. of credit. 6 hrs. studio. Project or internship approved by graphic design faculty committee.

ART 7500 Graduate Graphic Design (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs. studio each.

ART 7553 Graduate Research in Design (3)

Prereq.: consent of instructor. 6 hrs. studio.

ART 7554 Graduate Research in Design (3)

Prereq.: consent of instructor. 6 hrs. studio.

ART 7556 Graduate Research in Design (3)

Prereq.: consent of instructor. 6 hrs. studio.

Art: Painting and Drawing

ART 1847 Drawing and Composition (3)

Prereq.: majors and Interior Design majors only. Credit will not be given for both this course and ART 1010. 6 hrs. studio. Basic principles of observation; emphasis on graphic analysis and delineation of spatial structure.

ART 1848 Beginning Figure Drawing (3)

[LCCN: CART 2213, Figure Drawing] *Prereq.: majors/minors only, ART 1010 or ART 1847. Students are responsible for studio fee associated with course. 6 hrs. studio. Studies from the live model; introduction of graphic representation, structure and form.*

ART 1849 Introduction to Painting (3)

Prereq.: majors/minors only, ART 1008 or ART 1011, ART 1010 or ART 1847. 6 hrs. studio. Basic studio practice and theory in painting; traditional and modern materials and terminology; value and color experiences involving simple forms and space.

ART 2800 Honors: Painting II (3)

Same as ART 2881, with special emphasis for qualified Honors students. Prereq.: ART 1848 and ART 1849 and permission of instructor. May not be taken concurrently with ART 2881. 6 hrs. studio.

ART 2879 Figure Drawing II (3)

Prereq.: majors/minors only, ART 1848. Students are responsible for studio fee associated with course. 6 hrs. studio. Continuing studies in life drawing.

ART 2880 Intermediate Drawing (3)

Prereq.: ART 1847 and ART 1848. 6 hrs. studio. Imaginative Composition utilizing the figure, still-life and landscape forms.

ART 2881 Painting II (3)

An honors course, ART 2800 is also available. Prereq.: majors/minors only, ART 1848, ART 1849 and permission of instructor. May be taken for a max. of 6 sem. hrs. of credit. May not be taken concurrently with ART 2800. 6 hrs. studio. Studio problems in painting directed toward conceptual attitudes, analysis of structure and color in composition; individual criticism, class discussion.

ART 2882 Abstract Painting (3)

Prereq.: majors/minors only, ART 1847, ART 1848 and ART 1849. 6 hrs. studio. Studio approaches to abstraction; individual criticism, class discussion.

ART 2883 Water Media Painting (3)

Prereq.: ART 2879 or consent of instructor. 6 hrs. studio. Objects and landscape; composition in water-soluble media on paper.

ART 4800 Senior Project Painting (3)

Prereq.: majors only, ART 4881 and ART 4889. 6 hrs. studio. Proposal and execution of a painting project under the direction of a major professor.

ART 4841 Special Studies in Painting and Drawing (3)

Prereq.: majors/minors only, consent of instructor based on review of student's portfolio. May be taken for a max. of 9 sem. hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 hrs. of studio. Advanced studio work in a predetermined area of specialization.

ART 4880 Figure Painting (3)

Prereq.: majors/minors only, ART 2881. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Studies from the life model.

ART 4881 Painting III (3)

Prereq.: majors/minors only, ART 2881. May be taken for a max. of 9 sem. hrs. of credit. 6 hrs. studio. Contemporary concepts in painting; individual criticism, class discussion.

ART 4882 Advanced Water Media Painting (3)

Prereq.: ART 2883. May be taken for a max. of 12 sem. hrs. of credit. 6 hrs. studio. Advanced studio work in water-soluble media on paper.

ART 4884 Painting IV (3)

Prereq.: majors/minors only, ART 4881. May be taken for a max. of 6 sem. hrs. of credit. 6 hrs. studio. Research into advanced visual schema through self-initiated studio problems.

ART 4886 Landscape Painting (3)

Prereq.: majors/minors only, ART 2881. 6 hrs. studio. On-location and studio development of the landscape.

ART 4887 Advanced Figure Drawing III (3)

Prereq.: majors/minors only, ART 2879 or equivalent. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Study of the human figure using various media.

ART 4889 Advanced Drawing Workshop (3)

Prereq.: majors/minors only, 9 sem. hrs. of drawing. May be taken for a max. of 9 sem. hrs. of credit. 6 hrs. studio. Directed studies for the advanced student.

ART 7800 Graduate Painting (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. of credit. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs.

ART 7881 Painting Seminar (3)

Prereq.: students currently enrolled in the graduate painting program. Pass/fail grading. May be taken for a max. of 18 sem. hrs. of credit. 3 hrs. seminar. Discussion of formal and conceptual issues related to the medium.

Art: Photography

ART 2995 Basic Photography (3)

Prereq.: majors/minors only, ART 1008 or ART 1011. Students are responsible for studio fee associated with course. 6 hrs. studio. Basic concepts and techniques of black and white photography; emphasis on photography as a visual art.

ART 2996 Intermediate Photography (3)

An honors course, ART 2997, is also available. Prereq.: ART 2995 and permission of instructor. Credit will not be given for this course and ART 2997. Students are responsible for studio fee associated with course. 6 hrs. studio. Continued investigation of basic photographic principles, utilizing specific subject areas drawn from major themes in visual art.

ART 2997 Honors: Intermediate Photography (3)

Same as ART 2996, with special emphasis for qualified Honors students. Prereq.: ART 2995 and permission of instructor. Credit will not be given for this course and ART 2996. 6 hrs. studio.

ART 3992 Introduction to Digital Photography (3)

Prereq.: ART 2996 or ART 2997 and permission of instructor. 6 hrs. studio. Introduction to digital photographic tools and techniques.

ART 3994 Advanced Photography (3)

Prereq.: ART 2996 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. Technical investigation of contemporary materials; critical testing of equipment, films and printing papers; emphasis on process control as an expressive tool.

ART 3996 Color Photography I (3)

Prereq.: ART 2996 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. Introduction to color theory, color perception and contemporary color printing materials; emphasis on color print portfolio.

ART 4941 Special Studies in Photography (3)

Prereq.: ART 3992 or ART 3994 or ART 3996 and permission of instructor. May be taken for a max. of 12 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Individual creative research in a predetermined area of specialization.

ART 4992 Concepts in Advanced Digital Photography (3)

Prereq.: ART 3992 and permission of instructor. 6 hrs. studio. Continued explorations of emerging concepts in digital photography.

ART 4994 Large Format Photography (3)

Prereq.: ART 3994 and permission of instructor. 6 hrs. studio. Fundamentals of the view camera.

ART 4996 Color Photography II (3)

Prereq.: ART 3996 and permission of instructor. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Continued investigation of color photography; color negative materials and printing processes.

ART 4997 Alternative Photographic Processes (3)

Prereq.: ART 3992 or ART 3994 or ART 3996 and permission of instructor. Students are responsible for studio fee associated with course. 6 hrs. studio. Exploration of alternative photographic processes; emphasis on historical printmaking techniques.

ART 4998 Senior Project: Photography (3)

Prereq.: permission of instructor. To be taken in the last full semester of the senior year. This course is not offered during the summer term. Students are responsible for studio fee associated with course. 6 hrs. studio. Proposal for and execution of an independent photography project under the direction of a major professor.

ART 7900 Graduate Photography (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs. of studio. Emphasis on personal vision and contemporary issues in photography.

Art: Printmaking

ART 1360 Introduction to Printmaking (3)

Prereq.: majors/minors only, ART 1011 and ART 1847. Students are responsible for studio fee associated with course. 6 hrs. studio. Basic concepts, materials and processes in printmaking.

ART 2332 Silkscreen Printing (3)

Prereq.: ART 1360. Students are responsible for studio fee associated with course. 6 hrs. studio. Basic silkscreen techniques using stencils, hand-drawn and photomechanical applications and digital transparencies.

ART 2342 Papermaking (3)

Prereq.: majors/minors only, ART 1011. Students are responsible for studio fee associated with course. 6 hrs. studio.
Introduction to the art and technology of making paper by hand.

ART 2352 Relief Printmaking (3)

Prereq.: ART 1010 or ART 1847. May be taken for a max. of 9 hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Investigation of relief printing techniques.

ART 2360 Intermediate Printmaking (3)

An honors course, ART 2361, is also available. Prereq.: majors/minors only, ART 1360. May be repeated for a max. of 6 sem. hrs. of credit. Credit will not be given for this course and ART 2361. Students are responsible for studio fee associated with course. 6 hrs. studio. Comprehensive investigation of printmaking concepts, materials, and techniques; emphasis on color printing.

ART 2361 Honors: Intermediate Printmaking (3)

Same as ART 2360, with special emphasis for qualified Honors students. Prereq.: ART 1360 and permission of instructor. May be repeated for a max. of 6 sem. hrs. of credit. Credit will not be given for this course and ART 2360. Students are responsible for studio fee associated with course. 6 hrs. studio.

ART 2363 Intaglio (3)

Prereq.: ART 1360. Students are responsible for studio fee associated with course. 6 hrs. studio. Intaglio printmaking processes, including drypoint, soft ground, line etching and aquatint methods.

ART 2371 Lithography (3)

Prereq.: ART 1360. May be repeated for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Planographic processes in lithography emphasizing drawing with crayon, wash and transfer methods.

ART 2381 Book Arts (3)

Prereq.: ART 1360 and permission of instructor.

Students are responsible for studio fee associated with course. 6 hrs. studio. Basic theory, design and production in the book arts.

ART 2392 Digital Printmaking (3)

Prereq.: majors/minors only, ART 2360. May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Exploration of personal imagery by means of digital and photomechanical application for contemporary printmaking.

ART 4300 Senior Project: Printmaking (3)

Prereq.: majors only, 9 hrs. of 4000-level printmaking courses and senior status. May be taken for a max. of 6 hrs. of credit. This course is not offered during the summer term. Students are responsible for studio fee associated with course. 6 hrs. studio. Proposal and execution of a printmaking project under the direction of a major professor.

ART 4360 Advanced Printmaking (3)

Prereq.: ART 2360 and permission of instructor.

May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio.

Advanced concepts, materials and processes in printmaking with a focus on the development of individual ideas and expression.

ART 4366 Special Studies in Printmaking (3,6)

Prereq.: consent of instructor. May be taken for a max. of 12 sem. hrs. of credit. Students are responsible for studio fee associated with course. To be taken in the last semester of the senior year. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs. studio. Individual creative research in a predetermined area of specialization.

ART 4380 Monotype and Monoprint (3)

Prereq.: ART 1847 and ART 1360 or permission of instructor. May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Creative image development using monotype and monoprint processes, with a focus on making unique prints.

ART 4381 Advanced Book Arts (3 or 6)

Prereq.: ART 2381 or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 or 12 hrs. studio. Advanced exploration, design and production in the book arts; emphasis on self-initiated book art problems.

ART 4383 Letterpress Printmaking (3)

Prereq.: ART 2381 or permission of instructor. May be taken for a max. 6 sem. hrs of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Fundamental concepts, design and processes using digital and traditional letterpress printing technologies.

ART 4390 Large Format Printmaking (3)

Prereq.: ART 4360 or permission of instructor. May be repeated for a max. of 6 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Advanced work in printmaking emphasizing multiple color and mixed media applications for creating large-scale prints.

ART 4391 Digital & Alternative Print Media (3)

Prereq.: ART 2392 and ART 4360. May be taken for a max. of 6 sem. hrs. credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Advanced investigation of digital, photomechanical and alternative processes in printmaking.

ART 7300 Graduate Printmaking (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. of credit. Students are responsible for studio fee associated with course. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs .

Art: Sculpture

ART 1762 Sculpture I (3)

Prereq.: majors/minors only, ART 1009 or ART 1012. Students are responsible for studio fee associated with course. 6 hrs.

studio. Introduction to a variety of materials and techniques used in contemporary sculpture. Students will explore contemporary and historical concepts and terminology for working in three-dimensional space.

ART 2761 Intermediate Sculpture (3)

Prereq.: permission of instructor and ART 1762. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Studies in sculpture involving various materials and methods. May include metal fabrication, metal casting and mixed media.

ART 4741 Special Studies in Sculpture (3,6)

Prereq.: consent of instructor based on review of student's portfolio. May be taken for a max. of 9 sem. hrs. of credit. Students are responsible for studio fee associated with course. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs. studio. Advanced studio work in predetermined area of specialization.

ART 4761 Advanced Sculpture (3)

Prereq.: majors/minors only, ART 2761 and ART 2655 or ART 2661. May be taken for a max. of 12 sem. hrs. of credit. Students are responsible for studio fee associated with course. 6 hrs. studio. Studies with various materials and methods, course content may include kinetics, installation, mixed media, nature-based art.

ART 4762 Senior Project: Sculpture (3)

Prereq.: 6 sem. hrs. of credit from ART 4761. Students are responsible for studio fee associated with course. To be taken in the last semester of the senior year. 6 hrs. studio. Independent study requiring the proposal and execution of a sculpture project, under the direction of a major professor.

ART 7700 Graduate Sculpture (3,6)

Prereq.: permission of instructor. May be taken for a max. of 36 sem. hrs. of credit. Students are responsible for studio fee associated with course. Registration for all multiple-credit courses taken for over three credits in a given semester will require the prior permission of the instructor. 6 or 12 hrs.

Art History

ARTH 1440 Historical Survey of the Arts (3)

[LCCN: CART 2103, Art History I] This is a **General Education course**. Prehistoric, Near-Eastern, Greek, Roman and medieval art.

ARTH 1441 Historical Survey of the Arts (3)

[LCCN: CART 2113, Art History II] This is a **General Education course**. Renaissance to modern art.

ARTH 2401 Art of the Ancient Near East and Egypt (3)

This is a **General Education course**. Development of art and architecture in the ancient Near East and Egypt over three millennia; influences of one culture on another and subsequent contributions to Western art.

ARTH 2402 Classical Art and Archaeology (3)

This is a **General Education course**. Survey of the art and archaeology of the ancient Greek and Roman worlds, ca. 1000 BCE-300 CE.

ARTH 2411 Survey of Asian Art (3)

This is a **General Education course**. The arts of China, India and Japan in relation to religious and philosophical beliefs that affected their production.

ARTH 2469 Italian Renaissance Art (3)

Italian painting, sculpture and architecture from 1400 to 1600.

ARTH 2470 Survey of Modern to Contemporary Art (3)

This is a **General Education course**. Survey of major art movements from the 1880s to the present day.

ARTH 2480 Introduction to Museum Studies (3)

Introduction to art and history museums, their missions and functions; practical aspects and philosophical issues related to museums.

ARTH 4401 History of Prints (3)

History of prints from the 15th century to the present.

ARTH 4404 The Art of Rome (3)

Development of architecture, sculpture and painting from Rome's early beginnings (600-200 B.C.) to the end of the 4th century.

ARTH 4405 Early Christian and Byzantine Art (3)

Painting, sculpture and architecture of the Christian era through 12th century Byzantium.

ARTH 4406 Romanesque Art (3)

Architecture, sculpture, manuscripts and painting from the 9th through the 12th centuries in France, Germany and England.

ARTH 4409 Early Greek Art (3)

Greek art to the time of the Persian Wars.

ARTH 4410 Later Greek Art (3)

Greek art from the time of Themistocles to the age of Augustus.

ARTH 4412 Gothic Art (3)

Architecture, sculpture and painting of Northern Europe from 1150 to 1450.

ARTH 4413 Early Netherlandish and German Painting (3)

Painting in the Netherlands and Germany in the 15th and 16th century.

ARTH 4420 Studies in Art History (3)

May be repeated for credit when topics vary. Advanced work in a predetermined area of specialization.

ARTH 4422 History of Modern Design (3)

Aesthetic theory and stylistic evolution of decorative arts from mid-19th century to the present; emphasis on crafts, architectural decoration, furniture, interior design and industrial design; Victorian period, arts and crafts movement, art nouveau, Bauhaus and international style.

ARTH 4423 Early Renaissance Painting in Italy (3)

The origins and early development of Italian Renaissance painting in Florence and Siena.

ARTH 4424 High Renaissance and Mannerist Painting in Italy (3)

The climax and aftermath of Italian Renaissance painting in Florence, Rome and Venice.

ARTH 4425 Renaissance Sculpture in Italy (3)

The origins and development of Italian Renaissance sculpture; its function, patronage, and significance within its social and cultural context.

ARTH 4427 Northern Baroque Painting (3)

Dutch, Flemish and French painting of the 17th century.

ARTH 4429 Southern Baroque Art (3)

Painting, sculpture and architecture of the 17th century in Italy and Spain.

ARTH 4433 18th Century European Art (3)

European art from the age of absolutism to the beginning of the Napoleonic era, including Rococo art, the influence of Enlightenment thought, the rediscovery of classical antiquity, Neoclassicism and the impact of the French Revolution on the visual arts.

ARTH 4440 African Art (3)

History of the traditional arts and architecture of Sub-Saharan Africa, emphasizing geographical origins, religious context, social practices, and aesthetic choices that defined the creation of the objects and monuments under investigation.

ARTH 4441 Chinese Painting (3)

History of Chinese painting from prehistoric times through the 20th century.

ARTH 4442 Japanese Art (3)

History of Japanese painting, sculpture, architecture and ceramics from prehistoric times through the early 20th century.

ARTH 4443 Indian Art (3)

History of Indian painting, sculpture and architecture from prehistoric times through the 16th century.

ARTH 4444 Southeast Asian Art (3)

History of architecture, sculpture, ceramics and painting in Burma, Thailand, Cambodia, Indonesia, Vietnam, and Laos from the prehistoric times through the 19th century.

ARTH 4449 Islamic Art and Architecture (3)

Architecture, painting, and sculpture in regions associated with the emergence and prominence of Islam as a world religion from the 7th/8th century to the present.

ARTH 4450 19th Century European Painting (3)

History of painting in European countries from the French Revolution (1789) to 1900; emphasis on neoclassicism, romanticism, realism, impressionism, post-impressionism and symbolism.

ARTH 4451 Early 20th Century European Art (3)

History of painting and sculpture in European countries from 1900 to 1960; emphasis on Fauvism, Cubism, geometric abstraction, Futurism, Dada and Surrealism, German Expressionism, British figurative art, and the School of Paris.

ARTH 4464 American Art to 1900 (3)

North American painting, architecture and sculpture from the colonial beginnings to 1900; emphasis on painting.

ARTH 4465 American Art: 1900-1960 (3)

Study of American painters and sculptors between 1900 and 1960; from the Impressionists to the Abstract Expressionists; emphasis on the artists' connections to social, political and cultural developments.

ARTH 4466 Contemporary Art (3)

Major movements and theories in art from World War II through the present, including the wane of modernism and the rise and fall of postmodernism.

ARTH 4467 Latin American Art (3)

Pre-Hispanic, colonial and contemporary architecture, painting, sculpture and related arts throughout Latin America.

ARTH 4468 Issues in Contemporary Art (3)

Principal issues confronting contemporary artists and the sources and theories behind the issues.

ARTH 4469 Art of the American South: 1560-1861 (3)

History of architecture, painting, sculpture and decorative arts made in the states below the Mason-Dixon Line.

ARTH 4470 History of Photography (3)

History of photography from its inception in the 1830s until the present; technological development of the medium and its inherent aesthetics; interrelationships between photography and more traditional media.

ARTH 4480 Video Art and Theory (3)

Sources and origins of artists' video from the late 1960s to the present day; consideration of theoretical, political and technological aspects; survey of single-channel, projected, installation and Internet formats for video art display.

ARTH 4482 Digital Art History (3)

Survey of art and technology focusing on the development of computer art and digital, interactive, and network-based art forms from the 1950s to the present.

ARTH 4484 New Media Art Theory (3)

A reading intensive course that introduces students to issues and theories of new media art.

ARTH 4490 Independent Study in Art History (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

ARTH 4499 Undergraduate Seminar (3)

Prereq.: ARTH 1440, ARTH 1441 and any four additional art history courses; only open to art history majors of junior and senior standing. Intensive reading, writing and classroom discussion; introduction to art-historical research and methodologies.

ARTH 7400 Art Theory and Criticism (3)

Critics; building of art collections from ancient to modern times.

ARTH 7410 Colloquium in Art Historical Methods (1)

Pass-fail grading. An introduction to the historical development of the discipline of art history and art historical methodology.

ARTH 7420 Special Topics in Art History (3)

Prereq.: graduate standing in art or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Advanced topics in art history.

ARTH 7441 Graduate Research Seminar in History of Art (3)

May be taken for a max. of 6 hrs. of credit when topics vary; no more than 3 hrs. per semester.

ARTH 7442 Graduate Research Seminar in History of Art (3)

May be taken for a max. of 6 hrs. of credit when topics vary; no more than 3 hrs. per semester.

ARTH 7490 Independent Study in Art History (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

ARTH 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading. Thesis preparation under the supervision of a graduate faculty member serving as the student’s major professor.

Astronomy

ASTR 1101 The Solar System (3)

[LCCN: CAST 1103, Astronomy/The Solar System] This is a General Education course. *Prereq.: MATH 1021 or an ACT math score of at least 21.* Fundamental principles of the solar system.

ASTR 1102 Stellar Astronomy (3)

[LCCN: CAST 1113, Astronomy/Stars & Galaxies] This is a General Education course. *Prereq.: MATH 1021 or an ACT math score of at least 21.* Fundamental principles of stellar astronomy.

ASTR 1108 Astronomy Laboratory (1)

Prereq.: credit or registration in ASTR 1101. 2 hrs. lab. Visual observation of positions of celestial bodies with application to star charts and globes; visual and photographic observations will be made using telescopes; provides student with practical observing experience.

ASTR 1109 Astronomy Laboratory (1)

Prereq.: credit or registration in ASTR 1102. 2 hrs. lab. Analysis of light from terrestrial and celestial sources; visual and photographic observations of stars and nebulae; training in the use of smaller telescopes and larger telescopes with multimedia technologies.

ASTR 4221 Introductory Astrophysics (3)

Prereq.: PHYS 1202 or PHYS 2112 and PHYS 2113, or consent of instructor. Sun, stars and stellar systems; results and problems of modern astrophysical research.

ASTR 4222 Introductory Astrophysics (3)

Prereq.: ASTR 4221. Sun, stars and stellar systems; results and problems of modern astrophysical research.

ASTR 4261 Modern Observational Techniques (3)

Prereq.: ASTR 1101, ASTR 1102 and MATH 1552. 1 hr. lecture; 6 hrs. lab. Modern astronomical observations and reductions; the telescope, astronomical photography, spectroscopic and photoelectric observations and reductions.

ASTR 4750 Special Topics in Observational Astronomy (3)

May be taken twice for credit when topics vary. One topic scheduled each time course is offered; current topics include astronomical spectroscopy and astronomical photometry.

ASTR 4997 Problems in Astronomy (1-3)

Prereq.: consent of instructor. May be taken for a max. of 3 sem. hrs. of credit. Individual reading and theoretical and/or experimental work on advanced problems.

ASTR 7741 Stellar Astrophysics (3)

Also offered as PHYS 7741. Application of physical principles to study of stars; spectroscopy, stellar atmospheres, stellar structure and stellar evolution.

ASTR 7742 Stellar Astrophysics (3)

Also offered as PHYS 7742. Prereq.: ASTR 7741 Application of physical principles to study of stars; spectroscopy, stellar atmospheres, stellar structure and stellar evolution.

ASTR 7751 Galactic Astrophysics (3)

Also offered as PHYS 7751. Application of physical principles to study of galaxies; interstellar medium, galactic structure and stellar motions, galaxies and cosmology.

ASTR 7752 Galactic Astrophysics (3)

Also offered as PHYS 7752. Prereq.: ASTR 7751 Application of physical principles to study of galaxies; interstellar medium, galactic structure and stellar motions, galaxies and cosmology.

ASTR 7777 Seminar in Astronomy and Astrophysics (1-6)

Also offered as PHYS 7777. May be taken for a max. of 6 sem. hrs. of credit.

ASTR 7783 Topics in Astronomy and Astrophysics (3)

Also offered as PHYS 7783. May be taken for a max. of 6 hrs. of credit.

Business Administration

BADM 7000 Internship in Business Administration (3)

Prereq.: prior approval of MBA director. Pass-fail grading based on a written evaluation by the professional supervisor, a written report by the student and the faculty member's evaluation. Open only to full-time MBA students. May be taken once for credit. 10 hrs. of learning experience (fall/spring); 20 hrs. (summer). General supervision by a faculty member; direct supervision by a business professional.

BADM 7010 Emerging Business Issues and Practices in a Global Economy (1)

Open only to students in the MBA program. Taken each semester of the MBA program. Course must be successfully completed four times prior to graduation. Exposure to the practice of business; a series of visits to area businesses, in conjunction with classroom experiences, to learn how managers and operations specialists in various industries cultivate, shape and exploit their companies' resources to meet current and future global market needs.

BADM 7020 Managerial Statistics (3)

Open only to students in the MBA program. An introduction to statistical thinking and overview of statistical methods used to analyze and interpret data, draw inferences and make decisions; topics include descriptive statistics, probability, sampling and sampling distributions, estimation, confidence intervals, hypothesis testing, linear regression, forecasting and control charting; emphasis on how to use spreadsheets to analyze data and how to interpret the results.

BADM 7030 Understanding Financial Information (3)

Composition of financial statements; information processing and reporting for the purpose of understanding accounting information; legal and ethical obligations of the accounting profession.

BADM 7050 Information Systems (3)

Prereq.: ISDS 1100 or equivalent. Open only to students in the MBA program. Contemporary topics in information systems; a survey of information system analysis and design; introduction to business data communication, database management systems and knowledge based systems; enterprise-wide systems and information systems control.

BADM 7060 Elements of Cost Management (3)

Prereq.: BADM 7030. Open only to students in the MBA program. Understanding and applying cost management practices used in business today; development of costing and budgeting systems used for cost management; applications of analysis used in management decision making and control; cost-profit-volume analysis; analysis of variances between budgeted and actual cost; methods of evaluating responsibility centers based upon profitability measures.

BADM 7070 Understanding Behavior in Organizations (3)

Open only to students in the MBA program. Broad understanding of factors influencing the behavior of individuals in organizations; topics include the individual and contextual determinants of behavior and the tools managers use to influence and direct employee behavior; emphasis on managerial applications of behavioral science theories.

BADM 7090 Financial Management (3)

Prereq.: BADM 7030. Investment and financing decisions of the firm and the role of capital markets are studied with the

objective of understanding how financial management creates wealth. Emphasis is placed on concepts of valuation, risk and opportunity cost.

BADM 7100 Marketing Administration (3)

Marketing decision- making and planning, including marketing research, product development and management, distribution, demand estimation, market structure analysis, pricing, promotion, advertising and direct marketing.

BADM 7120 Operations Management (3)

Prereq.: BADM 7020. Open only to students in the MBA program. Major problems and decision processes of operations management; operations strategy; process and capacity planning; facilities planning; aggregate planning; materials planning; quality planning.

BADM 7140 Legal Environment of Business (3)

Open only to students in the MBA program. The structure of the legal environment of business; sources of law affecting business; constitutional issues in the legal environment of business; contracts and sales; torts; products liability; corporations; securities; bankruptcy; antitrust; discrimination; labor relations; environmental law; criminal law; its impact negotiation strategies; associated ethical and international issues.

BADM 7160 Negotiation, Persuasion and Influence (3)

Experiential-based course designed to provide managers with the basic concepts and techniques necessary for effective negotiation and conflict resolution in a variety of business contexts.

BADM 7170 Understanding International Management Challenges (3)

Prereq.: prior approval of MBA Director. May be taken for a max. of 6 hrs. of credit when topics vary. Theories and management of international operations; development of environmental, operational, strategic and decision making perspectives.

BADM 7190 Managing Sources of Competitive Advantage (3)

Contemporary approaches to developing and sustaining a competitive advantage in global competition; topics include:

competition for competence, strategy and technology, managing home and host government relations, cooperative strategy, strategic alliances, organizational innovation and managing global strategic change.

BADM 7200 Economic Environment of the Firm (3)

National and global issues that affect the firm; an introduction to theoretical concepts and policy issues associated mainly with macroeconomics and to a lesser degree with managerial economics.

BADM 7270 Seminar in New Developments in Business Administration (3)

BADM 7420 Financing and Legal Issues for New Ventures (3)

Insight into financing new ventures and investing in companies in early stages; sourcing, qualifying and analyzing deals; negotiating, structuring and pricing; creating value; realizing value through various kinds of exit from the business. Focus on cases and projects taken from actual financing situations; structuring of venture capital; the process of making investments in emerging companies.

BADM 7440 Franchise Development (3)

Important factors in starting and managing a new franchise; characteristics of franchiser and franchisee; evaluation of franchising opportunities; legal concerns of franchising; development of appropriate strategies. Development of franchising business plan to include marketing, management, financial projections and operations manual outline.

BADM 7460 Special Topics in Entrepreneurship (1.5)

May be repeated for a max. of 6 sem. hrs. credit when topics vary. In-depth coverage in special topics such as women-owned business, home-based business, exporting for small business and team-building for start-ups.

BADM 7480 Independent Study in Entrepreneurship (1.5)

Prereq.: departmental approval. May be repeated for a max. of 6 sem. hrs. credit when topics vary. Detailed study of a specific aspect of entrepreneurship.

BADM 7600 Consulting Field Project (3)

Prereq.: Entrepreneurship Specialization or permission of instructor. Strategic focused field based project learning experiences and opportunities in public and private organizations. Team-based approach to offering consulting advice to organizations with the goal of improving their performance. Emphasis on experiential approaches that provide a participative type of learning about the crucial issues faced by organizations.

BADM 7900 Human Factors in Business and Industry: Current Problems (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Human factors related to business problems.

Basic Sciences

BASC 2010 Inquiry Approaches to Math and Science Teaching (1)

Introduction to the theory and practice of inquiry-based math and science instruction; design and execution of lesson plans in elementary school under guidance of course instructor and mentoring elementary school teacher.

BASC 2011 Inquiry-Based Math and Science Lesson Design (1)

Prereq.: BASC 2010. Design and teach lesson plans in middle school under guidance of course instructor and mentoring middle school teacher.

BASC 7000 Methods of Instruction in College Life Science Laboratories (1)

Pass-fail grading. Philosophy and practice of life science laboratory education at the college level.

Biological Engineering

BE 1250 Introduction to Engineering Methods (2)

6 hrs. lab. Fundamentals of engineering design; presentation of an engineering design; graphical expression of engineering design using computer-aided drafting.

BE 1252 Biology in Engineering (2)

Prereq.: credit or registration in BIOL 1201. 1 hr. lecture; 3 hrs. lab. Effect of variability and constraints of biological systems on engineering problem solving and design; engineering units; engineering report writing; oral report presentation; laboratory demonstration of biological engineering analysis.

BE 2350 Experimental Methods for Engineers (3)

Prereq.: credit or registration in EE 2950 or PHYS 2113. 2 hrs. lecture; 3 hrs. lab. Introduction to experimental methods, technical report writing and instrumentation for engineering applications; measurement of temperature, pressure, flow, strain and vibration in biological products; microprocessor data loggers and computer data acquisition systems.

BE 2352 Quantitative Biology in Engineering (3)

Prereq.: BE 1252. 2 hrs. lecture; 3 hrs. lab. Characterization of biological phenomena in engineering design; relationships among parameters using linear and nonlinear statistical expressions; case studies of engineering design solutions.

BE 3249 Engineering Practice I (3)

Su *Prereq.:* consent of instructor. Pass/fail grading. A minimum of six weeks full-time employment in an industry participating in the summer program. Selected engineering problems in an industrial environment.

BE 3290 Professionalism for Biological Engineers (2)

Prereq.: grade of "C" or better in CE 2450. Ethical standards, technical communication, goal setting, professionalism and professional organizations, safety and risk, team dynamics and proposal preparation.

BE 3320 Mechanical Design for Biological Engineering (3)

Prereq.: CE 3400; credit or registration in CE 2460 or ME 3133. Term project in mechanical design. 2 hrs. lecture; 3 hrs. lab. Philosophy of mechanical design for biological engineering; materials for construction; frame design; power transmission.

BE 3340 Process Design in Biological Engineering (3)

Prereq.: MATH 2065. 2 hrs. lecture; 3 hrs. lab. Application of engineering and science concepts to design unit operations and processes relevant to biological engineering.

BE 3371 Irrigation Fundamentals and Management (3)

Prereq.: consent of instructor. For majors in agriculture, design and natural sciences. Cannot be used to fulfill College of Engineering requirements. Turf, landscaping and other horticultural applications of irrigation; design of irrigation systems from water source to application and uptake by plants; covers typical irrigation application techniques from sprinkler to micro; friction loss in system components; irrigation scheduling; and auditing/troubleshooting irrigation system performance.

BE 3381 Nonpoint Source Pollution Engineering (3)

Prereq.: BE 2352 and EVEG 3110. 2 hrs. lecture; 3 hrs. lab. Water quality criteria and regulations for the agricultural community; production, treatment and disposal of agricultural and food processing wastes; management of agricultural nutrients; nonpoint source pollution; bi-product utilization; land application; wetland restoration; stream sampling and analysis; re-aeration studies and modeling.

BE 3989 Special Projects in Biological Engineering (1-4)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit. Library research, experimental and/or theoretical investigation and written report in form of engineering report.

BE 4290 Senior Engineering Design (2)

Prereq.: BE 3290. Students work in teams to develop a detailed design to address a technical problem that the team chose in BE 3290. Activities include developing measurable design objectives and a product design specification, creating multiple design solutions, evaluating design solutions and communicating a detailed design.

BE 4292 Senior Engineering Design Laboratory (2)

Prereq.: BE 4290. 6 hrs. lab. Engineering principles used to complete the project set forth in the design outline submitted in BE 4290; design project completion.

BE 4303 Engineering Properties of Biological Materials (3)

Prereq.: MATH 2065 and credit or registration in CE 3400. 2 hrs. lecture; 3 hrs. lab. Engineering properties, including rheology, friction, mechanical damage, texture, thermal, optical and electrical properties.

BE 4305 Engineering Entrepreneurship I (3)

Prereq.: MATH 1552, AGEC 2003, or ECON 2030. Concepts and current practice in technology related business; emphasis on business, planning, business finance, intellectual property and marketing.

BE 4306 Engineering Entrepreneurship II (3)

Prereq.: BE 4305. Advanced topics in technology based entrepreneurial business start-up examining case based methods; emphasis on product strategy, planning, IP strategy, regulatory strategy, operations, sales, distribution and finance. Students will engage in a semester long business planning exercise.

BE 4323 Biomechanics for Engineers (3)

Also offered as IE 4465. Prereq.: CE 2450. 2 hrs. lecture; 3 hrs. lab. Mechanical behavior of the human musculoskeletal system and component tissue when physical work is performed; engineering mechanics applied to the activities; fundamental knowledge of human anatomy and physiology; workplace design.

BE 4332 Molecular Methods in Biological Engineering (3)

Prereq.: BIOL 2083, BE 2350 and credit or registration in BE 4303. Fundamentals of the theory and applications of quantitative molecular techniques used in biological engineering research and design.

BE 4335 Tissue Engineering (3)

Prereq.: BE 4303, BIOL 1202, BIOL 2083 and CHEM 2261. Familiarizing engineers with tissue engineering concepts and current practice. Topics include: embryology, stem cell biology, cell signaling, nutrition, cryobiology, biomaterials, synthesis/characterization, biocompatibility and scaffold design; design project included.

BE 4336 Biocompatibility & Surface Modification of Materials (3)

Prereq.: BE 4303. Biocompatibility of materials; biomaterials and their biomedical applications; and surface modification technology. A design project will be included.

BE 4340 Food and Bioprocess Engineering (3)

Prereq.: BE 2352; credit or registration in BE 3340. 2 hrs. lecture; 3 hrs. lab. Design and analysis of systems for processing biological materials, with emphasis on food; topics include biotechnology, fluid flow, thermodynamics and transport phenomena in food and bioprocessing; unit operations, including freezing, extraction, drying and aseptic processing.

BE 4341 Biological Reactor Systems Design (3)

Prereq.: BIOL 2051 and BE 4352. 2 hrs. lecture; 3 hrs. lab. Microbial and biochemical principles used in design of biological reactors for biotransformation; metabolic output and cellular production; design of batch and continuous flow reactors utilizing microbial kinetic models; attached and suspended growth systems and eucaryotic and procaryotic cells.

BE 4342 Sugar Process Engineering (3)

Prereq.: EE 2950, CE 2200 or ME 3834 or CHE 3101, ME 2334 or ME 3333 or CHE 3172. Processes used in the manufacture of raw and refined sugar; application of scientific and engineering principles to unit operations of evaporation, crystallization, extraction, solids handling and drying, centrifuging, clarification and steam and power generation.

BE 4352 Transport Phenomena in Biological Engineering (3)

Prereq.: BE 2352, BIOL 2051; credit or registration in CE 2200 and ME 3333. Mass balances with consideration of chemical and biological reaction kinetics; energy balance and principles of conduction, convection and radiation including 3-D diffusion, transient heat transfer and convection analysis; energy transfer in engineering design and analysis; principle of mass transfer.

BE 4362 Agricultural Precision Systems (3)

2 hrs. lecture; 3 hrs. lab. Principles and applications of geospatial technologies supporting precision agriculture/farming and planning for natural resource data management.

BE 4380 Aquacultural Engineering (3)

Prereq.: senior standing. Engineering principles applied to aquacultural systems; water chemistry; fluid mechanics; aquacultural pumping plants; fish pond design; recirculating aquacultural systems; water filtration; disinfection; aeration and degassing.

BE 4383 Natural Resource Engineering (3)

Prereq.: CE 2200. Engineering analysis and design of natural resource control systems, including open channels, vegetated water-ways, terraces, water control structures, spillways, reservoirs, flood control, surface water quality and wetlands.

BE 4989 Independent Study in Biological Engineering (1-4)

Prereq.: senior standing. Written engineering report required. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Biological engineering practice; library research, experimental and/or theoretical investigation.

BE 7304 Advanced Natural Resource Engineering (3)

Prereq.: BE 4383. Advanced topics in statistical hydrology, flow theory, evapotranspiration, transport of pollutants, drainage, irrigation, erosion, sediment transport and sedimentation applied to rural fields and watersheds.

BE 7340 Advanced Food Engineering and Biotechnology (3)

Prereq.: BE 4340. Design and modeling of food and bioprocessing systems; application of advanced thermodynamic principles and transport phenomena with emphasis on numerical techniques in the design, analysis and modeling of food systems; focus on current research topics in food engineering and food biotechnology.

BE 7350 Advanced Instrumentation and Control for Biological Systems (3)

Prereq.: BE 2350 and MATH 2065. 2 hrs. lecture; 3 hrs. lab. Theory of measurement and feedback integrated with applied design work with biological systems; focus areas include: aquaculture, precision farming, environmental applications, bioprocess, biomedical measurement and control concepts.

BE 7381 Advanced Aquacultural Engineering (3)

Prereq.: BE 4380. Advanced topics in aquacultural aeration, oxygenation, disinfection of aquacultural systems and aquacultural wastewater characterization; integration with traditional agricultural production.

BE 7500 Seminar (1)

Prereq.: graduate standing in engineering. Pass-fail grading. Only 1 sem. hr. of credit will be allowed toward the degree.

BE 7909 Advanced Topics in Biological Engineering (1-4)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. One or more phases of advanced biological engineering practice.

BE 7910 Special topics in Biological Engineering (3)

May be taken for a max. of 9 hrs. when topics vary. One or more phases of advanced biological engineering practice.

BE 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

Biological Sciences

BIOL 1001 General Biology (3)

[LCCN: CBIO 1013, General Biology I] This is a General Education course. *Credit will not be given for this course and BIOL 1201. For nonscience majors. Not for degree credit for a student majoring in a biological science. General concepts in cell biology, genetics, ecology and evolution.*

BIOL 1002 General Biology (3)

[LCCN: CBIO 1023, General Biology II] This is a General Education course. *Prereq.: BIOL 1001 or BIOL 1201. Credit will not be given for this course and BIOL 1202. For nonscience majors. Not for degree credit for a student majoring in a biological science. Diversity, interactions and life histories of microorganisms, fungi, plants and animals.*

BIOL 1005 Introductory Biology Laboratory (2)

[LCCN: CBIO 1022, General Biology Lab I + II] *Prereq.: credit in BIOL 1001 and credit or registration in BIOL 1002; Credit not allowed for students who have had BIOL 1202, BIOL 1208 or BIOL 1209. 1 hr. lecture; 3 hrs. lab.* Basic principles of biology including cell biology, genetics, ecology, evolution, diversity and systems physiology.

BIOL 1011 Microorganisms and Man (3)

[LCCN: CBIO 2103, 2104 General Microbiology] **This is a General Education course.** *Credit will not be given for both this course and BIOL 2051. Not open to biological science majors.* Microorganisms and their relationship to people; microbial form and function; role of bacteria in health and disease, ecology and industry from food production to genetic engineering.

BIOL 1012 Microorganisms and Man Laboratory (1)

[LCCN: CBIO 2101, 2104, General Microbiology Lab] *Prereq.: credit or registration in BIOL 1011. Credit will not be given for both this course and BIOL 2051. Not open to biological science majors. 3 hrs. lab.* Basic laboratory skills for handling and observing microorganisms; demonstration of features of microorganisms discussed in BIOL 1011.

BIOL 1201 Biology for Science Majors I (3)

[LCCN: CBIO 1033, 1034, General Biology I (Science Majors)] **This is a General Education course.** *Prereq.: minimum ACT composite of 23 or "C" or better in CHEM 1201. Credit will not be given for both this course and BIOL 1001.* Primarily for students in science, agriculture or education. General concepts in cellular structure, cellular metabolism, cellular communication and genetics.

BIOL 1202 Biology for Science Majors II (3)

[LCCN: CBIO 1043, 1044, General Biology II (Science Majors)] **This is a General Education course.** *Prereq.: BIOL 1201. Primarily for students in science, agriculture or education. Credit will not be given for this course and BIOL 1002.* General concepts in evolution, ecology and the function of organisms.

BIOL 1207 Honors: Biology Laboratory for Science Majors (1)

Prereq.: credit or registration in BIOL 1201 and admission to the Honors College. Credit will not be given for this course and BIOL 1005 or BIOL 1208. 3 hrs. lab. Topics include biochemistry, enzymes, cell structures, osmosis, cellular respiration, photosynthesis, cell division, genetics and ecology.

BIOL 1208 Biology Laboratory for Science Majors I (1)

[LCCN: CBIO 1031, 1034, General Biology I Lab (Science Majors)] *Prereq.: credit or registration in BIOL 1201. Credit will not be given for this course and BIOL 1005 or BIOL 1207. 3 hrs. lab.* Primarily for students majoring in science, agriculture or education.

BIOL 1209 Biology Laboratory for Science Majors II (1)

[LCCN: CBIO 1041, 1044, General Biology II Lab (Science Majors)] *Prereq.: credit in BIOL 1208; credit or registration in BIOL 1202. Credit will not be given for this course and BIOL 1005.* Primarily for students majoring in science, agriculture or education.

BIOL 1503 Honors: Biology for Science Majors II (4)

This is a General Education course. *Prereq.: BIOL 1201 and BIOL 1207 or BIOL 1208 and consent of instructor. Credit will not be given for this course and BIOL 1002 and BIOL 1005 or BIOL 1202 and BIOL 1209. 3 hrs. lecture; 3 hrs. lab.* Similar content as BIOL 1202 and BIOL 1209 with special emphasis on selected topics for qualified students.

BIOL 2051 General Microbiology (4)

[LCCN: CBIO 2124, General Microbiology (Science Majors)] *Prereq.: BIOL 1202, BIOL 1209 and CHEM 1202. Credit will not be given for both this course and BIOL 1011 or BIOL 1012. 3 hrs. lecture; 3 hrs. lab.* Structure and function of microbial cells and their relationship to people and the environment.

BIOL 2083 The Elements of Biochemistry (3)

Prereq.: CHEM 2060 or CHEM 2261. Credit will not be given for this course, BIOL 4087 or either BIOL 4093 and BIOL 4094. Not for degree credit for students in Biological Sciences, Biochemistry, or Microbiology. Nature and physiological uses of natural substances of interest to education, agriculture and nutrition and food sciences majors.

BIOL 2153 Principles of Genetics (4)

[LCCN: CBIO 2513, Introduction to Genetics] *Prereq.: BIOL 1202, BIOL 1209 and enrollment or credit in CHEM 1202.* Fundamental laws of heredity.

BIOL 2160 Human Physiology (3)

BIOL 1001 or BIOL 1201 recommended. May be taken for free elective credit by a student majoring in Biological Sciences, Biochemistry, or Microbiology. Students will not receive credit for both this course and BIOL 4160.

Elements of human physiology; controls and functions of the various organ systems.

BIOL 2900 Careers in Life Sciences (1)

Prereq.: credit or registration in BIOL 1202; open to Biological Sciences, Biochemistry and Microbiology majors only. A one hour writing workshop outside class is required. Career opportunities in all fields of the biological sciences.

BIOL 3040 Evolution (3)

Prereq.: BIOL 2153. EXST 2201 recommended. Principles and processes in evolutionary biology.

BIOL 3060 Introductory Plant Physiology (4)

Also offered as PLHL 3060. Prereq.: BIOL 1202 and BIOL 1209; CHEM 2060, CHEM 2261 or CHEM 2461. 3 hrs. lecture; 3 hrs. lab. Life processes of plants emphasizing growth and development, metabolism, transport and water relations.

BIOL 3090 Cell Biology (3)

[LCCN: CBIO 4143, Cell Biology (Upper Level)] *Prereq.: BIOL 2153 and CHEM 2262. Molecular description of cell structure and function.*

BIOL 3116 Microbiology Laboratory (3)

Prereq.: BIOL 2051. 6 hrs. lab. Laboratory course illustrating experimental microbiology in ecology, taxonomy, physiology and genetics.

BIOL 3152 Comparative Anatomy of the Vertebrates (4)

[LCCN: CBIO 3234, Comparative Anatomy (Upper Level)] *Prereq.:* BIOL 2153. BIOL 3090 recommended. 2 hrs. lecture; 6 hrs. lab. Macroevolution, biomechanics and functional anatomy of vertebrates; lab dissection of selected vertebrates.

BIOL 3156 Developmental Zoology (4)

Prereq.: BIOL 3090. 3 hrs. lecture; 3 hrs. lab. Combination of classical descriptive embryology and contemporary experimental theories focusing on the mechanisms of development in vertebrates and invertebrates.

BIOL 3900 Undergraduate Seminar in Biological Sciences (1)

Prereq.: junior standing and consent of the instructor. Oral presentation of independent laboratory or library research on selected topics in biological sciences.

BIOL 3999 Undergraduate Research in Biological Sciences (1-3)

Prereq.: permission of department. May be taken for a max. of 6 sem. hrs. of credit. Individual research on problems in the biological sciences.

BIOL 4001 Physical Chemistry (3)

Prereq.: CHEM 2262, PHYS 2002, and MATH 1552 or MATH 1554. Theoretical chemistry; emphasis on solutions, equilibria and topics of interest to students in biological sciences.

BIOL 4002 Insect Biology (3)

See ENTM 4002.

BIOL 4003 Science Teaching in Secondary School III: Instructional Strategies in the Sciences (1)

Also offered as CHEM 4003. Prereq.: credit in EDCI 2500 and BASC 2011. How to teach high school level laboratory courses, including instructional strategies, laboratory management, safety. Focuses on preparation to teach high school level AP laboratory courses.

BIOL 4004 Seminar in Teaching Secondary School Science (3)

Also offered as CHEM 4004. Prereq.: credit or registration in EDCI 4004 or equivalent, credit or registration in EDCI 4005 or equivalent and credit in BIOL 4003, or CHEM 4003.

BIOL 4005 Science Research Methods (3)

Also offered as CHEM 4005 and PHYS 4005; permission of the department. Prereq.: credit for EDCI 2500 and credit or registration in EDCI 3550. Not for graduate credit. Focusing on the tools that scientists use to solve scientific problems, including use of experiments to answer scientific questions, experimental design, use of statistics and mathematical modeling of scientific phenomena; oral presentation of scientific work and a minimum of ten hours of work in area middle and high schools.

BIOL 4015 Conservation Biology (4)

Prereq.: 11 sem. hrs. biological sciences; genetics recommended. See ENTM 4015.

BIOL 4017 Laboratory in Conservation Biology (2)

Same as ENTM 4017. Coreq.: BIOL 4015/ENTM 4015 or equivalent. Laboratory to accompany BIOL 4015/ENTM 4015. 4 hrs. lab. Practical application of principles of conservation biology, field study of major threats to an importance of biological diversity; human responsibilities as global land stewards. Field study will be conducted as exercises to learn how to ask scientific questions, formulate a study, collect data, analyze data, and write scientific papers. Two all-day field trips on Saturdays.

BIOL 4020 Taxonomy and Ecology of Wetland Plants (4)

Also offered as RNR 4020. Prereq.: BIOL 1202 and BIOL 1209. 3 hrs. lecture; 3 hrs. lab; extended field trips. Field service fee. Taxonomy, ecology, distribution and economic significance of wetland plants in Louisiana.

BIOL 4041 Plant Taxonomy (4)

Prereq.: BIOL 1202 and BIOL 1209. 2 hrs. lecture; 4 hrs. lab. Principles of identification, classification, and nomenclature; their application to select groups of vascular plants.

BIOL 4054 Introductory Mycology (4)

Same as PLHL 4054. Prereq.: BIOL 1202 and BIOL 1209 or equivalent. 3 hrs. lecture; 3 hrs. lab. Developmental morphology, taxonomy and adaptive strategies of fungi; interactions of fungi with plants and animals.

BIOL 4055 Flora of the Central Gulf Coast (4)

Prereq.: BIOL 1202 and BIOL 1209. Two Saturday field trips. 2 hrs. lecture; 4 hrs. lab. Major plant groups and communities of Louisiana and the Gulf region; field and laboratory identification, natural history, ecology, environmental issues relating to natural vegetation and conservation of natural areas.

BIOL 4084 Geomicrobiology (3)

Prereq.: GEOL 3032 or BIOL 2051 or consent of instructor. See GEOL 4084.

BIOL 4087 Basic Biochemistry (4)

Prereq.: BIOL 2153, and CHEM 2262 or CHEM 2462. Credit will not be given for this course, BIOL 2083 and either BIOL 4093 or BIOL 4094. Cellular macromolecules; production and utilization of energy by the cell; major metabolic pathways and their control; molecular biology.

BIOL 4090 Marine and Environmental Microbiology (3)

See OCS 4090.

BIOL 4093 General Biochemistry I (3)

[LCCN: CBIO 3403, Biochemistry I (Upper Level)] *Prereq.: BIOL 2153 and CHEM 2262 or CHEM 2462. Credit will not be given for BIOL 2083 or BIOL 4087. Structure and function of proteins, nucleic acids, lipids and carbohydrates; enzymology; respiration.*

BIOL 4094 General Biochemistry II (3)

[LCCN: CBIO 4413, Biochemistry II (Upper Level)] *Prereq.: BIOL 4093. Credit will not be given for BIOL 2083, BIOL 4087. Metabolic pathways; nucleic acid structure; flow of genetic information; regulation of gene expression; recombinant DNA.*

BIOL 4097 Biochemistry of Aging (3)

Prereq.: BIOL 4087 or BIOL 4093. The phenomenon of aging and the underlying biochemical mechanisms.

BIOL 4104 Histology (4)

Prereq.: BIOL 3090 or BIOL 3156; permission of department. 2 hrs. lecture; 6 hrs. lab. Morphological basis of function in mammalian tissues and organs.

BIOL 4105 Parasitology (3)

Prereq.: BIOL 2153. Biology of animal parasites; emphasis on important human parasites.

BIOL 4106 Parasitology Laboratory (1)

Prereq.: credit or concurrent enrollment in BIOL 4105. 3 hrs. lab. Field and laboratory investigations in parasitology.

BIOL 4110 Introductory Microbial Physiology (3)

Prereq.: BIOL 2051 and CHEM 2261 or CHEM 2461. Concepts of bacterial nutrition, metabolism, adaptation and genetics as related to growth and environment.

BIOL 4115 Microbial Ecology (3)

Prereq.: BIOL 2051 and BIOL 2153. The structure and function of microbial communities in human/animal, terrestrial, subsurface, and aquatic biomes; emphasis on the linkages among microbial diversity, ecology, and evolution.

BIOL 4123 Immunology (3)

Prereq.: BIOL 2051; BIOL 3090 recommended. Molecular and cellular basis of innate and cell-mediated immunity.

BIOL 4124 Microbial Pathogens (3)

Prereq.: BIOL 2051 and either BIOL 3090 or BIOL 4123. Survey of pathogenic organisms including bacteria, viruses, fungi and parasites; host responses to pathogens.

BIOL 4125 Prokaryotic Diversity (3)

Prereq.: BIOL 2051. Biology of bacteria and archaea; evolution, diversity assessment, systematics, ecology; emphasis on molecular approaches.

BIOL 4126 Methods in Microbial Diversity (4)

Prereq.: BIOL 4125 and consent of instructor. 1 hr. lecture; 6 hrs. lab. Classical and molecular methods used to study microbial diversity.

BIOL 4132 Eukaryotic Molecular Genetics (3)

Prereq.: BIOL 2153, and BIOL 4087 or BIOL 4093. Molecular genetics, primarily in higher eukaryotes; gene structure and packaging in chromosomes; gene transcription and mRNA processing; translation; gene regulation; genetics in development; genetics of cancer; immunogenetics; genetic engineering in eukaryotes.

BIOL 4141 Mammalogy (4)

Prereq.: BIOL 1202 and BIOL 1209; Field service fee. 2 hrs. lecture; 6 hrs. lab. Biology of mammals; origins, adaptive radiations and ecology.

BIOL 4142 Ornithology (4)

Prereq.: BIOL 2153 or RNR 4103. Permission of department. 3 hrs. lecture; 3 hrs. lab and field work. Field service fee. Biology of birds; emphasis on ecology, behavior and evolution.

BIOL 4145 Ichthyology (4)

Also offered as RNR 4145. Prereq.: BIOL 1202 and BIOL 1209. Field service fee. 2 hrs. lecture; 6 hrs. lab and field work.
Biology of fishes; evolution, classification and ecology.

BIOL 4146 Herpetology (4)

Prereq.: BIOL 1202 and BIOL 1209; Field service fee. 2 hrs. lecture; 6 hrs. lab and field work. Taxonomy and natural history of amphibians and reptiles.

BIOL 4154 Invertebrate Zoology (4)

Prereq.: BIOL 2153. Field service fee. 3 hrs. lecture; 3 hrs. lab. Biology of the invertebrates; phylogeny, functional morphology.

BIOL 4155 Environmental Physiology (3)

Prereq.: BIOL 2153. Physiological adaptations of animals to physical and chemical parameters of the environment.

BIOL 4158 Endocrinology (3)

Prereq.: BIOL 3090 or BIOL 4087 or BIOL 4093. Physiology of neural and hormonal regulation in vertebrates.

BIOL 4160 Vertebrate Physiology (3)

Prereq.: BIOL 3090 or BIOL 4087 or BIOL 4093, and CHEM 2262 or CHEM 2462. Students will not receive credit for both this course and BIOL 2160. Principles of vertebrate systems physiology; emphasis on mammalian systems.

BIOL 4161 Vertebrate Physiology Laboratory (1)

Prereq.: credit or concurrent enrollment in BIOL 4160 or BIOL 4170 or equivalent and MATH 1552 or MATH 1554 or EXST 2201. 3 hrs. lab. Laboratory exercises in systems physiology.

BIOL 4162 Food Microbiology (4)

See FDSC 4162.

BIOL 4163 Industrial Microbiology (4)

Also offered as FDSC 4163. Prereq.: BIOL 4110 or equivalent. 2 hrs. lecture; 4 hrs. lab. Microbes used in industrial processes such as production of chemicals, antibiotics and vitamins.

BIOL 4165 Environmental Adaptations (3)

Prereq.: BIOL 2153. Biochemical and physiological mechanisms adapting organisms to environmental factors; emphasis on the evolutionary biochemical adaptations permitting organisms to inhabit diverse environments.

BIOL 4170 Comparative Animal Physiology (3)

Prereq.: BIOL 3090 or BIOL 4087 or BIOL 4093. Physiological principles at the molecular, cellular and systems levels are evaluated across many animal phyla. The ways in which diverse organisms perform similar functions are explained, revealing unifying themes of physiological response and adaptation only illuminated with a comparative perspective.

BIOL 4177 Neurobiology (3)

Prereq.: BIOL 3090 or BIOL 4160, and CHEM 2262 or CHEM 2462. Principles of organization and function in nervous systems; molecular basis of behavior.

BIOL 4190 Introductory Virology (3)

Prereq.: BIOL 2051. Viruses and their host cells; biochemistry and molecular biology of viral infections.

BIOL 4200 Microbial Morphogenesis (3)

Prereq.: BIOL 2051 and BIOL 2153. Cellular morphogenesis in microorganisms and its control by differential gene expression; physiological changes during microbial differentiation; adaptive roles and practical applications.

BIOL 4215 Molecular Biology of Bacterial Disease (3)

Prereq.: BIOL 2051. Discussion of the many strategies that pathogenic bacteria use to invade and prosper within the human body. Emphasis placed on acquired resistance, bacterial invasion strategies, interaction with host immune systems, and adaptive ability of bacteria.

BIOL 4246 Microbial Genetics (3)

Prereq.: BIOL 2051 and BIOL 2153. BIOL 4087 or BIOL 4093 recommended. Microbial genetic principles: mutation, conjugation, transformation, recombination, transduction, gene expression; molecular biology of bacteriophage and plasmids; recombinant DNA technology.

BIOL 4253 Principles of Ecology (3)

[LCCN: CECO 4123, 4124, Principles of Ecology (Upper Level)] *Prereq.: BIOL 1202, BIOL 1209 and MATH 1552 or MATH 1554 or EXST 2201.* Fundamental ecological principles governing the structure and function of populations, communities, and ecosystems; comparative habitat ecology.

BIOL 4254 Principles of Ecology Laboratory (1)

[LCCN: CECO 4121, 4124, Principles of Ecology Lab (Upper Level)] *Prereq.: credit or registration in BIOL 4253. Field service fee. 3 hrs. lab.* Laboratory exercises in ecology.

BIOL 4256 Microbial Ecology and Nutrient Cycling in Soils (4)

See AGRO 4056/EMS 4056.

BIOL 4262 Marine Communities (3)

Prereq.: BIOL 2153. Marine biology; ecology of benthic, planktonic, nektonic, estuarine, oceanic, coral and mangrove communities; emphasis on Louisiana's coastal environments.

BIOL 4263 Marine Communities Laboratory (1)

Prereq.: credit or concurrent enrollment in BIOL 4262 or equivalent. Field service fee. 3 hrs. lab. Laboratory experiences in marine communities.

BIOL 4270 Animal Behavior (4)

Prereq.: BIOL 2153. Students are responsible for personal expenses associated with mandatory field trips. 3 hrs. lecture; 3 hrs. lab. Introduction to the field of animal behavior with emphasis on how research in this area is performed; topics include physical, environmental and physiological effects on behavior as well as possible evolutionary causes of present-day behaviors.

BIOL 4299 Genetics of the Evolutionary Process (4)

Prereq.: BIOL 2153 or equivalent. 3 hrs. lecture; 3 hrs. discussion/lab. Principles of microevolution; emphasis on genetic and ecological mechanisms relevant to process of evolution.

BIOL 4308 Plants in Coastal Environments (3)

See OCS 4308.

BIOL 4385 Biochemistry Laboratory (3)

[LCCN: CBIO 4412, Biochemistry I+II Lab (Upper Level)] *Prereq.: credit or registration in BIOL 4087 or BIOL 4093. 1 hr. lecture; 6 hrs. lab.* Techniques including chemistry of amino acids and proteins; purification, immunochemistry, kinetics of enzymes; protein biosynthesis; nucleic acid chemistry; properties and restriction mapping of plasmids and recombinant DNA; spectrophotometry, chromatography, electrophoresis, centrifugation, and radioisotope labeling.

BIOL 4400 Molecular Genetics Laboratory (3)

Prereq.: BIOL 2153 and 6 hrs. of biological sciences at the 4000 level or BIOL 4246 and 3 hrs. of biological sciences at the 4000 level. 1 hr. lecture; 6 hrs. lab. Current techniques used to genetically engineer microorganisms, study gene expression and DNA modification, and identify organisms by specific genetic alleles; computer analysis of DNA and protein sequences.

BIOL 4444 Seed Physiology (3)

See PLHL 4444.

BIOL 4450 Cell Biology of the Nucleus (3)

Prereq.: BIOL 4087 or BIOL 4093. BIOL 3090 recommended. Molecular organization of eukaryotic cells; gene structure and function; molecular regulation of signal transduction and cell cycle.

BIOL 4596 Biophysics of Macromolecules (3)

Prereq.: BIOL 4087 or BIOL 4093, and BIOL 4001 or credit or registration in CHEM 3492. Theory and application of physical techniques to the study of biological macromolecules; spectroscopy (UV-VIS absorption and fluorescence, circular dichroism, IR, NMR, X-ray diffraction); helix-coil theory; theories of ligand binding.

BIOL 4600 Topics in Marine Zoology (2-6)

Su *Prereq.: 16 hrs. of biology or zoology including one laboratory course numbered above 3000. May be taken for a max. of 9 sem. hrs. of credit when topics vary. Courses to be offered vary from year to year; additional information available from department.* See also RNR 4600. Intensive field study of a special topic in marine zoology at the Louisiana Universities' Marine Consortium field stations.

BIOL 4753 Human Molecular Genetics (3)

Prereq.: BIOL 2153 and BIOL 4087 or BIOL 4093. Principles of human genetics, comparative genomics, forensic and molecular genetics.

BIOL 4800 Selected Topics in Biological Sciences (2-4)

Prereq.: 16 sem. hrs. of biological sciences and permission of department. May be taken for a max. of 6 sem. hrs. of credit when topics vary.

BIOL 4801 Laboratory for Selected Topics in Biological Sciences (1-2)

Prereq.: 16 semester hours of biological sciences and permission of department. May be taken for a max. of 4 semester hours of credit when topics vary.

BIOL 6147 Selected Topics in Life Science (1-3)

Prereq.: BIOL 1001, BIOL 1002, BIOL 1005 or equivalent. May be taken for a max. of 6 sem. hrs. credit when topics vary. Specific areas of biological sciences; topics offered determined by recent advances in the field, needs of students and availability of appropriate faculty.

BIOL 7010 Plant Molecular Biology (3)

Prereq.: BIOL 3060, BIOL 4093, and BIOL 4094 or equivalent. See PLHL 7010.

BIOL 7061 Plant Growth and Development (3)

See PLHL 7061.

BIOL 7063 Plant Metabolism (3)

See PLHL 7063.

BIOL 7067 Selected Topics in Plant Physiology (2)

Same as PLHL 7067. Prereq.: consent of instructor. May be repeated for credit. Mineral nutrition, metabolism, growth and development and herbicides.

BIOL 7080 Population Ecology (3)

Also offered as ENTM 7080. Prereq.: BIOL 4253 or equivalent. Advanced topics emphasizing animals in population growth and regulation; life histories; foraging behavior; agonism and territoriality; and group behavior.

BIOL 7083 Community Ecology (3)

Prereq.: BIOL 4253 or equivalent. Ecological processes of communities; predation, competition, mutualism, disturbance, succession, island biogeography and diversity.

BIOL 7110 Molecular Evolution (3)

Prereq.: BIOL 3040 or equivalent. Evolution of genes and genomes; nucleotide substitution rates; positive selection; gene duplication and conversion; transposable elements; evolution of genome size.

BIOL 7111 Systematic Biology (4)

Prereq.: 8 sem. hrs. of 4000-level biological science courses or equivalent; introductory statistics recommended. 3 hrs. lecture; 2 hrs. lab. Theoretical and empirical aspects of systematics and evolutionary biology.

BIOL 7120 Marine Ecology (3)

Also offered as OCS 7317. Prereq.: consent of instructor. 2 hrs. lecture; 3 hrs. lab. and field work. Physical, chemical and biological environmental factors affecting distribution of marine fauna; communities representative of each of the ecological subdivisions of the world's oceans treated with respect to species composition, food webs and seasonal changes; human impact on the marine environment.

BIOL 7132 Mechanisms of Eukaryotic Gene Regulation (3)

Prereq.: permission of instructor. Overview of the mechanisms that have evolved in eukaryotic cells to regulate gene expression and other aspects of molecular biology, such as DNA repair and nuclear organization.

BIOL 7152 Advanced Vertebrate Anatomy (4)

Prereq.: BIOL 3152. 2 hrs. lecture; 6 hrs. lab.

BIOL 7155 Energy Transducing Membrane Proteins (3)

Prereq.: BIOL 4110 and BIOL 4087 or BIOL 4093 or equivalent. Structure and function of energy transducing membrane proteins including bacteriorhodopsin, ATP synthase, cytochrome oxidase, cytochrome b/c1 complexes, the bacterial reaction center, photosystem I and II and antennae pigment protein complexes.

BIOL 7162 Molecular Biology of Microorganisms (3)

Prereq.: BIOL 4246, and either BIOL 4110 or BIOL 4094 or equivalent. Synthesis, activity and interactions of various molecular components of microbial cells; macromolecules and their relationship to cellular function and heredity.

BIOL 7253 Molecular Population Genetics (4)

Prereq.: BIOL 2153 or equivalent. 3 hrs. lecture; 3 hrs. discussion/lab. Molecular genetic variation in natural populations; effects of selection, inbreeding, random drift, migration and mutation on DNA and protein polymorphisms; emphasis in lab on computer-assisted manipulation and analysis of molecular data.

BIOL 7260 Advanced Genetics (3)

Prereq.: permission of instructor. The use of mutations and contemporary genetic approaches for genetic analysis of function in humans and research organisms.

BIOL 7280 Nucleic Acids (3)

Prereq.: BIOL 4094 or equivalent. Chemistry and biochemistry of nucleic acids; structure, expression and regulation of genes in prokaryotic and eukaryotic organisms.

BIOL 7284 Proteins (3)

Prereq.: BIOL 4001 and BIOL 4093 or equivalent. Conformations of fibrous and globular proteins; their interactions with small and large molecules.

BIOL 7285 Advanced Enzymology (3)

Prereq.: one semester of physical chemistry and credit or registration in BIOL 4094. Principles involving action of enzymes on a molecular level; includes kinetics, inhibition, Ph effects, active site, coenzymes, reaction mechanism and protein structure of enzymes.

BIOL 7288 Lipids and Membranes (3)

Prereq.: BIOL 4094. Chemistry and biochemistry of lipids and membranes; analytical methods for lipids; biosynthesis of complex lipids; organization and function of biological membranes.

BIOL 7290 Complex Carbohydrates (3)

Prereq.: BIOL 4094. Chemistry of carbohydrates including stereochemistry, reactions, derivatization and analysis; biosynthesis and functions of complex carbohydrates; structure and function of complex carbohydrates including polysaccharides, glycoproteins and glycolipids; immunology and receptorology.

BIOL 7626 Toxicology IV: Genetic Toxicology (3)

See ENVS 7626.

BIOL 7648 Museum Field Expedition (6)

Prereq.: consent of instructor. One semester in the field under direction of the Museum of Natural Science staff.

BIOL 7800 Special Topics in Biological Sciences (2-4)

Prereq.: consent of instructor. May be taken for a max. of 12 sem. hrs. when topics vary. Specialized topics of current interest in the biological sciences.

BIOL 7901 Departmental Seminar in Biological Sciences (1)

May be repeated for a max. of 6 sem. hrs. of credit. Reports on specialized subjects of current interest in the biological sciences.

BIOL 7902 Departmental Seminar in Biochemistry (1)

May be repeated for a max. of 6 sem. hrs. of credit. Reports on specialized subjects of current interest in biochemistry.

BIOL 7921 Research Presentations in the Biological Sciences (1)

Pass/fail grading. May be repeated for credit. Presentations of individual research projects in the biological sciences.

BIOL 7946 Seminar: Current Topics in Molecular Evolution (1)

Also offered as ENTM 7946. Prereq.: course in evolution, genetics, BIOL 4087 or equivalent. May be taken for max. of 6 hrs. credit when topics vary.

BIOL 7979 Tropical Biology: An Ecological Approach (1-8)

Also offered as ENTM 7979. Eight-week field course at research sites in Costa Rica; conducted by Organization for Tropical Studies. Complexities of tropical plants and animals and their interactions.

BIOL 7990 Independent Research in Biological Sciences (2-8)

Prereq.: consent of instructor. May be repeated for a max. of 9 sem. hrs. credit. Directed research under the guidance of a graduate faculty member.

BIOL 7995 Independent Readings in Biological Sciences (1-3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit. Directed individual readings under the guidance of a graduate faculty member.

BIOL 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

BIOL 8910 Research Participation (3)

Su For high school science teachers.

BIOL 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Business Law

BLAW 3200 Introduction to Law (3)

Not open to students in the E. J. Ourso College of Business. Credit will not be given for both this course and BLAW 3201 and BLAW 4203. Fundamentals of the American legal system; basic principles of the law of contracts, commercial paper, agency, partnerships, corporations, torts and crimes; case materials used to demonstrate legal analysis and reasoning.

BLAW 3201 Business Law (3)

Credit will not be given for this course and BLAW 3200. Development of Anglo-American common law, the American constitutional system, and the Louisiana civil law system; law of contracts, torts and agency; business aspects of criminal law; ethical facets of the legal environment; case materials used to demonstrate problem analysis.

BLAW 3202 Commercial Transactions (3)

Prereq.: BLAW 3201. Credit will not be given for this course and BLAW 3200. Louisiana law and Federal legislation in the following areas: employment law, workers' compensation, business entities, intellectual property, agency, insurance, sales, donations, leases, security devices, bankruptcy and commercial paper.

BLAW 3230 Sports Law (3)

Business and legal sports aspects, particularly professional and collegiate level; antitrust laws; labor law and collective bargaining; contract law and player agents; professional franchise location; college athletics and the NCAA; equal opportunities and Title IX; licensing and trademark rights; tort issues.

BLAW 4203 Commercial Transactions for Accountants (3)

Prereq.: BLAW 3201. Credit will not be given for this course and BLAW 3200. Specifically for accounting majors. Legal concepts underlying sale of goods; commercial paper; security interests, securities regulation, accountants' malpractice, negotiable instruments and bankruptcy; application of the Uniform Commercial Code and preparation for the CPA examination.

Comparative Biomedical Sciences

CBS 7001 Seminar: Comparative Biomedical Sciences (1)

May be taken for a max. of 8 hrs. of credit. Reports and discussions on topics of current interest in various scientific disciplines.

CBS 7002 Research Techniques in Comparative Biomedical Sciences (1-4)

May be taken for a max. of 8 hrs. of credit when topics vary. Specialized research techniques related to selected scientific disciplines in the department.

CBS 7003 Special Topics in Comparative Biomedical Sciences (1-4)

May be taken for a max. of 8 hrs. of credit when topics vary. Specialized coverage of a variety of topics related to selected scientific disciplines in the department.

CBS 7104 Biomedical Cell and Molecular Biology (3)

Prereq.: consent of instructor. Essential concepts of cell and molecular biology; cellular ultrastructure and function; basic genetic mechanisms in normal and transformed cells; methods of gene analysis; proteomics; molecular therapy and molecular approaches to disease diagnosis.

CBS 7108 Critical Analysis in Molecular Biology/Medicine (3)

Instruction/participation; formal presentations of research data. Discussion and presentations are drawn from landmark biomedical publications.

CBS 7109 Advanced Macroscopic Anatomy (1-3)

Prereq.: consent of instructor. May be repeated for credit when topics vary. Specialized dissection of one or more of the following: dog, horse, ruminants, laboratory, exotic or avian species.

CBS 7112 Advanced Microscopic Anatomy (1-3)

Prereq.: consent of instructor. May be repeated for credit when topics vary. Comparative or systemic microscopic anatomy of selected organs or organ systems of domestic, laboratory or exotic species.

CBS 7603 Clinical Toxicology (3)

Prereq.: consent of instructor. Pathophysiology of various clinically important toxicants; prevention, diagnosis and treatment of common intoxications in domestic animals.

CBS 7614 Central Nervous System (3)

Prereq.: CBS 7631 or equivalent. Neurotransmitter mechanisms, chemistry and anatomical distribution; neuropharmacology; synaptic physiology and anatomy of selected brain regions; central nervous system diseases.

CBS 7628 Biomedical Physiology I (3)

Prereq.: consent of instructor. Physiological mechanisms underlying the cardiovascular and gastrointestinal systems of domestic species.

CBS 7629 Biomedical Physiology II (3)

Prereq.: consent of instructor. Physiological mechanisms underlying the respiratory and renal systems of domestic species; emphasis on system control.

CBS 7631 Biomedical Neuroscience (3)

Prereq.: consent of instructor. 2.5 hrs. lecture; 0.5 hrs. lab. Physiological and anatomical mechanisms underlying the nervous system.

Civil Engineering

CE 2200 Fluid Mechanics (3)

Prereq.: grade of "C" or better in CE 2450. Statics and dynamics of continuous liquids and gases; control volume laws; conservation of mass, momentum and energy; dimensional analysis and similitude; applications to pipe flows.

CE 2250 Fluid Mechanics Laboratory (1)

Prereq.: CE 2200 (for CE majors, a grade of "C" or better is required in CE 2200) 3 hrs. lab. Measurement and calibration of hydraulic machinery; pump and turbine efficiency; flow in pipelines; viscosity; discharge coefficients.

CE 2450 Statics (3)

Prereq.: grade of "C" or better in MATH 1550, MATH 1552 and PHYS 2110. Vectorial treatment of resultants and equilibrium of force systems, centroids and centers of gravity, fluid statics, friction.

CE 2460 Dynamics and Vibrations (3)

Prereq.: grade of "C" or better in CE 2450 and credit or registration in MATH 2065. Credit will not be given for this course and ME 3133. Treatment of kinematics and kinetics of particles and rigid bodies; force, movement, velocity, acceleration; impulse and momentum; work and energy; dynamics and vibration; concepts applied to structural and machine components.

CE 2700 Introduction to Civil Engineering Practice (1)

Designed for civil engineering majors; open to non-majors by consent of department. Credit will not be given for this course and EVEG 2000. 3 hrs. lab. Civil engineering construction descriptions, principles of drawing and basic technical and professional aspects of civil engineering education and practice.

CE 3300 Geotechnical Engineering I (3)

Prereq.: GEOL 1001, CHEM 1202, CE 2200 (a grade of "C" or better is required in CHEM 1202 and CE 2200). Introduction to properties and engineering behavior of soil as a native earth material, an engineering material and an environmental medium subject to flux and transport of liquids, gases and contaminants; understanding of elementary physical, chemical and biological phenomena as such phenomena influence the engineering behavior of soils.

CE 3350 Geotechnical Engineering Laboratory I (1)

Prereq.: EXST 2201 and credit or registration in CE 3300. 3 hrs. lab. Laboratory measurement of properties, indices and behavior of soil as an engineering material and environmental medium; testing methods to determine gradation, specific shear strength testing, unconfined compression, one-dimensional consolidation, hydraulic conductivity, specific surface area, surface change, x-ray diffraction, pH-redox and conductivity measurements.

CE 3400 Mechanics of Materials (3)

Prereq.: Grade of "C" or better in CE 2450. Stress and strain, torsion, bending, deflections of beams, columns, statically indeterminate problems, combined stress.

CE 3410 Mechanics of Materials Laboratory (1)

Prereq.: EXST 2201 and CE 3400 (a grade of "C" or better is required in CE 3400). 3 hrs. lab. Mechanical properties and strengths of engineering materials and structural and machine elements.

CE 3415 Structural Analysis I (3)

Prereq.: MATH 2065 and CE 3400 (a grade of "C" or better is required in CE 3400). Analysis of statically determinate structures including beams, frames, trusses and arches for the effects of dead, live, moving and windloads.

CE 3500 Plane Surveying and Measurements (3)

Prereq.: EXST 2201 2 hrs. lecture; 3 hrs. lab. Plane surveying theory of measurements; use of surveying equipment; field and office work for boundary surveys and topographic mapping.

CE 3600 Principles of Highway and Traffic Engineering (3)

Prereq.: CE 3500. Basic traffic characteristics; highway capacity analysis; geometric design of highways; route location, traffic operations and signalized intersection design.

CE 3700 Engineering Materials Laboratory (1)

Prereq.: credit or registration in CE 3400 or equivalent. 3 hrs. lab. Design and properties of concrete and bituminous mixes.

CE 3740 Independent Studies in Civil Engineering (3)

Prereq.: senior standing, English proficiency and ENGL 3002 (unless ROTC is elected); GPA of at least 2.30 (overall and major

area); and consent of department chair. Project chosen in consultation with department chair. Formal proposal and final presentation required. Comprehensive design and/or development of a component, system, process or software package.

CE 4200 Hydrology (3)

Prereq.: CE 2200 (a grade of “C” or better is required in CE 2200). Water movement from arrival on land surface until it reaches the sea overland; concept of frequency, maximum probable runoff of rainfall, mass curves and other statistical methods of hydrologic engineering.

CE 4250 Ground Water (3)

Prereq.: CE 2200 (a grade of “C” or better is required in CE 2200). Occurrence of ground water; properties and classification of water-bearing formations; origin, discharge and methods of evaluating direction and rate of ground water movement; Darcy's Law, Theis Equation, analysis of aquifer tests and “safe yield;” legal doctrines, side effects of aquifer development and the economics of ground water.

CE 4260 Design of Hydrologic Systems (3)

Prereq.: EVEG 3200, CE 4200 and CE 4750 or equivalent. Hydrologic design of water resources projects; maximization of benefits; analysis techniques; and design parameters.

CE 4300 Geotechnical Engineering II: Shallow Foundations (3)

Prereq.: CE 3300 and credit or registration in CE 3350 and CE 4410. Fundamentals of geotechnics applied to design and analysis of shallow foundations, excavations, retaining structures and slopes; selected topics on soil improvement and vibration; emphasis on computer utilization.

CE 4310 Geotechnical Engineering III: Deep Foundations (3)

Prereq.: CE 3300 and credit or registration in CE 3350. Fundamentals of geotechnics applied to design and analysis of deep soil-structure systems; single piles and pile groups under axial load; caissons and piers; effects of lateral loads; computer utilization.

CE 4320 Coastal Engineering (3)

Prereq.: CE 3300 or equivalent. Engineering problems of the coastal zone; coastal processes, wave action, currents, sediment movement; environmental forces due to waves, currents and winds; offshore soil geotechnical properties, vertical and lateral pile capacity; design principles for submarine pipelines and offshore platforms; engineering case studies.

CE 4400 Principles of Steel Design (3)

Prereq.: CE 3415. Analysis and design of elements of steel structures, elastic and plastic design, critical comparison of specifications with theory.

CE 4410 Principles of Reinforced Concrete (3)

Prereq.: CE 3415; credit or registration in CE 3700. Working stress and ultimate strength theories as applied to concrete beams (reinforced and prestressed), columns, slabs and footings; experimental data and current design specifications.

CE 4420 Principles of Prestressed Concrete (3)

Prereq.: CE 4410. Analysis and design of prestressed concrete structural elements; full and partial prestressing; service ability and strength requirements; code criteria for bridges, buildings and other structures.

CE 4430 Structural Engineering (3)

Prereq.: CE 4750, CE 4400 and CE 4410 or equivalent. Fundamental principles applied to planning, analysis and design of structures; introduction to computer-aided design approach to solving structural engineering problems using mainframe and microcomputer software.

CE 4435 Indeterminate Structural Analysis (3)

Prereq.: CE 3415. Analysis of statically indeterminate structures; methods of consistent deformations, elastic energy, virtual work, slope deflection, moment distribution and matrix formulations.

CE 4440 Advanced Mechanics of Materials (3)

Prereq.: CE 3400 and MATH 2065 (a grade of "C" or better is required in CE 3400). Mechanics of materials; emphasis on needs of students interested in structural and machine design.

CE 4445 Hurricane Engineering (3)

Prereq.: CE 3415 and CE 2200 or equivalent. Credit will not be given for both this course and CE 4745. Analysis and design of structures to resist hurricanes and other natural hazards; wind engineering, flood engineering; hazard phenomena and probabilities of occurrence; estimation of loads, loading provisions of major building codes and standards; damage mechanisms; design strategies for life safety and damage mitigation.

CE 4450 Finite Element Methods (3)

Prereq.: CE 3400 and either MATH 2065 or MATH 2090 or MATH 2070 (a grade of "C" or better is required in CE 3400). Basic theory of finite element methods with applications to a wide class of physical problems; matrix representation of stress, strain and material relations; principle of virtual work, discrete finite element models of continuous systems, construction of basic finite element algorithms and solutions of physical problems by using existing finite element computer programs.

CE 4460 Design of Bridges (3)

Prereq.: CE 4410, CE 4750 and credit or registration in CE 4400 or CE 4420 or equivalent. 2 hrs. lecture; 3 hrs. lab. Design of concrete and steel bridges in accordance with the latest AASHTO specifications; understanding of theoretical background behind the codes such as risk and reliability concepts; load rating of bridges and hands-on bridge design using computer software and hand calculations.

CE 4500 Geodetic and Photogrammetric Surveying (3)

Prereq.: CE 3500 or equivalent. 2 hrs. lecture; 3 hrs. lab. Geodetic surveying for control surveys; photogrammetry and photointerpretation; calculation and field procedures used in ground control surveys and photogrammetry.

CE 4520 Advanced Surveying (3)

Prereq.: CE 3500 or equivalent. 2 hrs. lecture; 3 hrs. lab. Electronic surveying, simultaneous conveyances, subdivision surveys, flood plain management, state plane coordinates, solar azimuths, horizontal and vertical curves and earthwork.

CE 4530 Control Surveying with GPS (3)

Prereq.: CE 3500 or equivalent surveying course. 2 hrs. lecture; 3 hrs. lab. Understanding of spatial positioning capabilities available using satellite positioning system (GPS) receivers to calculate positions and to evaluate results; topics include classical

geodetic methods, geometric geodesy, GPS receivers, static and kinematic GPS surveys, GPS computations, GPS mapping, vertical GPS and gravimetric geodesy; lab includes demonstration and hands-on use of GPS equipment and software.

CE 4550 Boundary Surveying (3)

Prereq.: CE 3500 or equivalent. 2 hrs. lecture; 3 hrs. lab. Designed to prepare engineers to complete Land Surveyor Registration requirements in Louisiana. Procedures and laws governing surveying of boundaries; emphasis on U. S. Land Survey System and Louisiana surveying laws and grids.

CE 4560 Engineering Applications of Remote Sensing (3)

Prereq.: consent of instructor. 2 hrs. lecture; 3 hrs. lab. Photographic and digital image processes related to interpretation, principles, methods and techniques; engineering applications in materials, land use, energy, hydrology, transportation, geology, geomorphology and water resources.

CE 4600 Geometric Design of Highways and Airports (3)

Prereq.: CE 3600 or equivalent. 2 hrs. lecture; 3 hrs. lab. Principles of design and practice for rural and urban highway facilities and airport installations; design criteria and controls, capacity analysis, cross-section selection, design of horizontal and vertical alignment, intersections, interchanges and computer applications to design problems.

CE 4650 Introduction to Asphalt Mixture Design (3)

Prereq.: CE 3400 and credit or registration in CE 3700 (a grade of "C" or better is required in CE 3400). Principles of design and practice of hot mix asphalt mixture design; fundamental properties and analysis of binder rheology, aggregates and mixture design.

CE 4670 Fundamentals of Pavement Design (3)

Prereq.: CE 3600 or equivalent. Flexible and rigid pavement design procedures; subgrade, base and surfacing characteristics; loads; stresses in pavement systems; material characterization; pavement response models; pavement performance models; structural design systems; effects of natural forces; and construction practices.

CE 4745 Natural Hazards and the Built Environment (3)

Prereq.: junior standing. Credit will not be given for both this course and CE 4445. Engineering impacts and implications of hurricanes, floods, earthquakes and other natural hazards on the built environment; effects of hazards on buildings and infrastructure systems; damage mechanisms; principles of wind, flood and seismic resistant design; hurricane evacuation and sheltering; engineering preparedness, response and recovery issues; design strategies for life safety and damage mitigation; building codes, land use zoning, floodplain management and insurance as mitigation tools.

CE 4750 Professional Issues and Concept Design in Civil Engineering (2)

Prereq.: CE 2700 and senior standing. 1 hr. lecture; 2 hrs. lab. Engineering Graphics. Civil engineering design processes and systems; constructability and sustainability; use of consultants and contractors; project management, scheduling; economics and costing; ethical, health and safety; social, political and environmental considerations.

CE 4760 Civil Engineering Design (3)

Prereq.: credit in EVEG 3200, CE 3300, CE 3600, CE 4410 or equivalent, CE 4750 and credit in at least one of the following courses: CE 4200, CE 4300, CE 4400, CE 4600 or CE 4670. 2 hrs. lecture; 3 hrs. lab. Design of civil engineering facilities; feasibility studies for subdivisions, airports, shopping centers, interchanges.

CE 4780 Special Topics in Civil Engineering Science (3)

Prereq.: senior standing and departmental approval. May be taken for a max. of 6 hrs. of credit. More than one section may be taken concurrently for credit if topics differ. Topics in specialized civil engineering technical or analysis areas.

CE 4781 Special Topics in Civil Engineering Design (3)

Prereq.: senior standing and departmental approval. May be taken for a maximum of 6 hrs. of credit when topics vary. More than one section of this course may be taken for credit concurrently when topics differ. Selected topics in civil engineering design.

CE 7100 Theory and Operation of Wastewater Treatment Facilities (3)

Prereq.: EVEG 3110 or equivalent undergraduate preparation, or consent of instructor. Theoretical principles, design criteria and analysis of treatment systems for domestic and industrial wastewaters and sludges; includes modeling of ideal biochemical reactors and design criteria for suspended-growth and biofilm processes applicable to wastewater treatment.

CE 7101 Physical/Chemical Processes in Water and Wastewater Treatment (3)

Prereq.: EVEG 3110 or equivalent undergraduate preparation. Theoretical principles, design criteria, and analysis of physical and chemical unit operations in water and wastewater treatment; includes process applications in municipal and industrial settings.

CE 7105 Advanced Topics in Water Quality and Treatment (3)

Theory and application of advanced chemical principles to water quality and treatment; advanced equilibrium chemistry calculation; redox and colloidal chemistry as applied to environmental engineering.

CE 7135 Advanced Topics in Biodegradation (3)

Biological waste treatment applications in civil and environmental engineering, including current and emerging techniques for characterization, analysis, control and mathematical modeling of biological processes in municipal and industrial waste treatment systems.

CE 7145 Biological Treatment of Recirculating Systems in Aquaculture (3)

Theory, design and management of fixed film biofiltration processes used to recondition water in recirculating aquaculture systems and to provide tertiary treatment of domestic and industrial wastes characterized by low substrate regimes.

CE 7180 Water Quality Simulations (3)

Water quality modeling from a perspective of practicality and reliability; emphasis on model calibration and verification procedures and methodologies for quantifying uncertainties associated with model predictions.

CE 7255 Advanced Hydraulics (3)

Prereq.: CE 2200. Transportation of sediment, mixing current and other phenomena.

CE 7265 Advanced Subsurface Hydrology and Hydraulics (3)

Prereq.: CE 4250. Properties of porous media and fluid mixtures; dynamics of flow in single phase and multiphase flow systems;

miscible and immiscible flow; basic concepts in saturated and unsaturated flow; solution procedures and applications in engineering design; physics and mathematics of transport processes in ground water; governing equations, solution procedures and applications; waste management and pollution control in subsurface environments.

CE 7275 Modeling for Management of Groundwater (3)

Prereq.: CE 4250. Identification of management problems; applications of systems theory to develop modeling techniques; analytical and numerical techniques of groundwater modeling; development and application of models and computer codes for simulation and optimization management of surface and groundwater systems.

CE 7280 Modeling in Physical Hydrology (3)

Prereq.: CE 4200. Principles of mathematical physics applied to hydrologic processes; methods of solution and model building; application to water resource problems.

CE 7300 Advanced Geotechnical Engineering I: Stress Distribution, Seepage, Compressibility (3)

Prereq.: CE 3300 and CE 3350. Advanced theories of soil mechanics including stress distribution, seepage through soils, consolidation and settlement analysis; their applications in foundation engineering.

CE 7310 Advanced Geotechnical Engineering II: Shear Strength, Bearing Capacity, Slope Stability (3)

Prereq.: CE 7300. Shear strength of cohesive and cohesionless soils; stability problems including bearing capacity, slope stability and earth pressure distribution.

CE 7315 Principles of Soil Behavior (3)

Prereq.: CE 3300, CE 3350. Analysis of the effect of compositional and environmental factors on conduction phenomena, volume change behavior, deformation, strength stress-strain-time behavior in soils; soil composition, mineralogy, soil-water electrolyte systems in identification of influencing variables.

CE 7335 Soil Improvement and Stabilization (3)

Prereq.: CE 4300. Methodology and analysis of soil placement and improvement techniques; properties of mineral and organic salts, principles of soil compaction; methods of soil placement and improvement, chemical stabilization of soils, lime columns,

stone columns, ultimate strength and bearing capacity of columns, compression by surcharging and drains, dynamic consolidation, vibro stabilization, thermal properties of soils, thermal stabilization.

CE 7405 Statically Indeterminate Structures (3)

Prereq.: CE 4435. Analysis of statically indeterminate structures by modern methods.

CE 7409 Advanced Concrete Theory (3)

Analysis and design of reinforced concrete structural elements according to ultimate strength and limit design theories; prestressed indeterminate structures, shrinkage and creep.

CE 7410 Structural Reliability (3)

Fundamentals of reliability analysis of structures, load and resistance models, first-order reliability methods, probabilistic simulation techniques, calibration of design codes, system reliability, sensitivity analysis.

CE 7420 Limit Analysis and Design (3)

Prereq.: credit or registration in CE 4435. Analysis of steel structural behavior beyond elastic limit; design for ultimate load and use of load factors; application of linear programming and other computational techniques to optimization of structures designed by aid of concepts of limit analysis.

CE 7430 Structural Design for Dynamic Loads (3)

Sources, intensities and methods of transmission of dynamic loads; response of structural systems to dynamic loading; modern computation techniques.

CE 7455 Finite Element Method in Engineering (3)

Prereq.: CE 4450. Finite element method as an extended Ritz technique based on variational concepts for continua with applications to heat transfer, flow through porous media, fluid dynamics, elasticity, plasticity and stability and vibrations of elastic systems.

CE 7460 Theory of Plates (3)

Prereq.: credit or registration in CE 4440. Laterally loaded plates with various boundary conditions; approximate methods of plate analysis; large deflections of plates; elastic stability of plates.

CE 7475 Solid Mechanics (3)

Prereq.: CE 4440 and credit or registration in MATH 4038 or MATH 4340 or ME 4563. Mathematical approach to statics and dynamics of deformable solids; tensors in curvilinear coordinates and variational calculus used to formulate elasticity and viscoelasticity theory; energy theorems and conservation laws.

CE 7480 Plasticity and Viscoelasticity: Theory and Applications (3)

Prereq.: CE 4440. Elements of the theory of plasticity; yield criteria and stress-strain relations for perfectly plastic and strain hardening materials; boundary value problems of plasticity; the slip-line theory and applications; constitutive equations of viscoelastic bodies and methods of solution of the boundary value problems of viscoelasticity.

CE 7485 Mechanics of Composite Materials (3)

Prereq.: CE 3400. Modeling of the mechanical behavior of fibrous composites for application to structural components; emphasis on interlaminar stresses, strength and failure theories, thermal effects, nonlinear material response, test methods and micromechanics.

CE 7490 Damage Mechanics in Metals and Matrix Composites (3)

Prereq.: CE 7480 and CE 7485 or equivalent. Theoretical formulation and application of the different constitutive models to metals and metal matrix composites but with consideration of other materials; analysis of isotropic and anisotropic damage in materials.

CE 7600 Transportation Engineering Data Collection Methods (3)

Prereq.: EXST 7003 or CE 3600 or equivalent. Applications of sampling theory to data collections for transportation studies; determination of sample sizes; calculation of sampling error; expansion of sample survey data; survey methodologies, including interviews, counting programs, moving observer surveys, self-administered surveys. Simple panel surveys, etc.; design of survey instruments; conduct of data collection activities; data reduction techniques.

CE 7610 Traffic Engineering Operations and Control (3)

Prereq.: CE 3600 or equivalent. Traffic regulations, operational problems and engineering organization; theory and practice of application, design, operation and maintenance of traffic control devices; methods and devices studied include signing, markings, delineation and illumination, signals and signal systems, one-way street and unbalanced-flow street operations, speed zoning and freeway monitoring and control.

CE 7614 Intelligent Transportation Systems (3)

Theories and applications of Intelligent Transportation Systems (ITS).

CE 7615 Advanced Highway Design and Traffic Safety (3)

Prereq.: CE 4600 or consent of instructor. Theoretical development and application of highway design principles, particularly as they relate to safety; analysis of accident statistics, diagnosis of high-hazard locations, risk management, tort liability and design treatments to address high accident locations; design principles of traffic calming, highway-railroad grade crossings, highway work zones and roadway cross-sections.

CE 7621 Mass Transit Systems (3)

Prereq.: CE 3600 or equivalent. Historical development, role in society, federal participation and institutional and legislative development of transit; description of conventional and innovative forms, and characteristics of users; planning, vehicle scheduling, environmental impact and energy consumption; system costs, pricing and financing; future systems and policies.

CE 7640 Urban Transportation Policy and Planning (3)

Prereq.: CE 3600 or equivalent. Introduction to and definition of transportation planning; transportation planning context; characteristics of travel; politics, decision-making and models of decision makers; systems analytic approaches to transportation planning; inventory, data management and spatial representation of data; land use and transportation; inputs to travel forecasting.

CE 7641 Urban Transportation Planning Models (4)

Prereq.: CE 7640, ECON 5600, EXST 7003 or equivalent. 3 hrs. lecture; 2 hrs. lab. Theories of travel demand modeling; conventional four-step modeling procedures; network development for highways, transit, high-occupancy vehicles; development of trip generation, distribution and mode-choice models; highway and transit assignment procedures; use of current software for microcomputers.

CE 7650 Bituminous Materials and Mixtures (3)

Prereq.: CE 3700 or equivalent. 2 hrs. lecture; 3 hrs. lab. Properties of asphalts and tars used in bituminous materials; historical developments; properties and design of bituminous mixtures; theory and practice of asphalt concrete mix design for pavements and bases including specification and construction methods for hot-mixes and surface treatments.

CE 7655 Pavement Materials Characterization (4)

Prereq.: CE 3700 or equivalent. 3 hrs. lecture; 3 hrs. lab. laboratory and field test methods for determining engineering properties of pavement materials; interpretation of test data for selecting property values; use of fundamental engineering properties in design and analysis of pavement response to environmental and vehicular loads.

CE 7672 Pavement Management Systems (3)

Prereq.: CE 3600 or equivalent. Concepts of pavement, evaluation of pavement performance, serviceability concepts, structural evaluation, safety, maintenance and rehabilitation, economic considerations, selection of alternatives and life cycle cost analysis.

CE 7700 Special Topics in Civil Engineering (3)

Prereq.: permission of department. Each course may be taken for a max. of 6 hrs. of credit. Specialized civil engineering areas.

CE 7701 Special Topics in Civil Engineering (3)

Prereq.: permission of department. Each course May be taken for a max. of 6 hrs. of credit. Specialized civil engineering areas.

CE 7740 Master's Report (3)

Comprehensive report with oral defense on subject approved by the major professor.

CE 7750 Seminar (1)

Pass-fail grading. All graduate students are expected to enroll every semester. Only one semester hour of credit will be allowed toward degree.

CE 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

CE 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Chemical Engineering

Chemistry, Physics, Life Sciences and Mathematics Proficiency • A grade of "C" or better in each of the basic sciences preparatory courses—BIOL 1201; CHEM 1201 and CHEM 1202; PHYS 2110 and PHYS 2113; MATH 1550, MATH 1552, and MATH 2090—is required before students may register for any chemical engineering course other than CHE 2162 and CHE 2171.

CHE 1100 Introduction to Chemical Engineering (1)

Overview of what chemical engineers do, including guiding principles of the discipline and basics of large-scale chemical engineering problem solving.

CHE 2162 Introduction to Computer Modeling and Simulation of Chemical Engineering Systems (2)

Prereq.: MATH 1550. Introduction to basic concepts of simulation in engineering, programming techniques, and software tools used in the simulation of chemical engineering problems. Data analysis and visualization using computers.

CHE 2171 Chemical Engineering Fundamentals: Material and Energy Balances (3)

Prereq.: MATH 1550, CHEM 1202, and CHE 1100.

Emphasis on basic principles and concepts used to make chemical engineering calculations; techniques used in these calculations applied to typical industrial problems.

CHE 2176 Mathematical Modeling of Chemical Engineering Systems (3)

Prereq.: CHE 2162 and CHE 2171 and a grade of "C" or better in BIOL 1201, CHEM 1201, CHEM 1202, MATH 1550, MATH 1552, MATH 2090 and in PHYS 2101 and PHYS 2102 or PHYS 2110 and PHYS 2113.

Basic concepts and techniques in analysis of engineering processes; mathematical description of physical systems and application of modern computers to solution of resulting equations.

CHE 3100 Chemical Equilibrium and Kinetics of Environmental Processes (3)

Also offered as EVEG 3120. Prereq.: CHEM 2060; EVEG 2000. Not open to chemical engineering majors. Introductory chemical thermodynamic concepts extended to heterogeneous equilibrium, dilute solutions, surfaces and colloids of significance in environmental engineering processes; chemical reaction kinetics concepts applied to the environment; applications to waste treatment process design; property estimations for elucidating the fate and transport of chemicals in the environment.

CHE 3101 Transport Sciences: Momentum Transfer (3)

Prereq.: CHE 2171 and a grade of "C" or better in BIOL 1201, CHEM 1201, CHEM 1202, MATH 1550, MATH 1552, MATH 2090 and in PHYS 2101 and PHYS 2102 or PHYS 2110 and PHYS 2113.

Fundamentals of momentum transfer; applications to the fluid problems of engineering.

CHE 3102 Transport Sciences: Heat and Mass Transfer (4)

Prereq.: CHE 3101 or CE 2200 and MATH 2065 or MATH 2090. Fundamentals of heat and mass transfer; similarities of heat, mass and momentum transfer and their interrelation; engineering applications.

CHE 3104 Engineering Measurements Laboratory (3)

Prereq.: credit or registration in CHE 3102 and CHE 3173.

Laboratory work to accompany CHE 3101, CHE 3102, CHE 3172, and CHE 3173. 2 hrs. lecture; 3 hrs. lab.

CHE 3171 Process Economics and Optimization (3)

Prereq.: CHE 2176 and credit or registration in CHE 3102 and CHE 3173. Application of optimization principles to the economic design of chemical engineering unit operations.

CHE 3172 Chemical Engineering Thermodynamics (3)

Prereq.: CHE 2171 and a grade of "C" or better in BIOL 1201, CHEM 1201, CHEM 1202, MATH 1550, MATH 1552, MATH 2090 and in PHYS 2101 and PHYS 2102 or PHYS 2110 and PHYS 2113.

Basic concepts and chemical engineering applications of thermodynamics; emphasis on flow processes and real gas thermodynamics.

CHE 3173 Heterogeneous Equilibrium (3)

Prereq.: CHE 3172. Theory of vapor-liquid, liquid-liquid, and solid-liquid equilibrium, including the effects of chemical reactions; application of thermodynamic theory to the correlation of equilibrium data and the prediction of equilibrium compositions.

CHE 4151 Unit Operations Design (4)

Prereq.: CHE 3102, CHE 3171, and CHE 3173. 3 hrs. lecture; 3 hrs. lab. Unit operations analyzed as applications of chemical engineering fundamentals and transport sciences; use of these principles in design calculations.

CHE 4162 Unit Operations Laboratory (3)

Prereq.: CHE 3104 and credit or registration in CHE 4151. 1 hr. lecture; 6 hrs. lab. Obtaining and interpreting data needed to solve typical problems in design or operation of chemical engineering equipment.

CHE 4172 Process Design (4)

Prereq.: CHE 4151 and CHE 4190. 3 hrs. lecture; 3 hrs. lab. Chemical plant design from initial concept through preliminary estimate; flow diagrams, equipment cost estimation, economic analysis, safety, and environmental issues; computer-aided process design.

CHE 4190 Chemical Reaction Engineering (3)

Prereq.: CHE 3102 and CHE 3173 or equivalent. Credit will not be given for both this course and CHE 3100. Basic principles of reactor design; selection of best design alternatives; achievement of optimum reactor operation.

CHE 4198 Process Dynamics (3)

Prereq.: CHE 3171 and credit or registration in CHE 4151. Principles and practices of process dynamics and automatic control; mathematical modeling of process dynamics, feedback control and feed forward control.

CHE 4210 Industrial Catalysis (3)

Prereq.: credit or registration in CHE 4190. Principles of the industrial utilization of heterogenous catalysis; topics include absorption phenomena, methodology in catalyst preparation, characterization and evaluation of catalysts, diffusion and reaction in porous catalysts and a survey of major industrial processes.

CHE 4221 Senior Research (1)

Prereq.: credit or registration in CHE 3102, CHE 3104 and CHE 3173, GPA of at least 2.8 (in CHE) and consent of instructor. Not open to graduate students. Comprehensive research or development project of a theoretical or experimental nature, involving a team effort over two semesters (spring and fall periods).

CHE 4222 Senior Research (2)

Prereq.: CHE 4221 Not open to graduate students. 6 hrs. lab. Comprehensive research or development project of a theoretical or experimental nature, involving a team effort over two semesters (spring and fall periods).

CHE 4253 Introduction to Industrial Pollution Control (3)

Prereq.: CHE 3102 or equivalent introductory course in transport science. Quantitative application of chemical engineering principles to removal of objectionable components from effluents, with emphasis on industrial processing effluents; currently available techniques for controlling air and water pollution and solid wastes; concept of pollution control through basic process alterations developed by specific examples.

CHE 4260 Biochemical Engineering (3)

Prereq.: credit or registration in CHE 4190 or equivalent. Application of chemical engineering fundamentals to microbiological and biochemical systems; problems peculiar to industrial operations involving microbial processes; growth conditions and requirements, metabolisms, product separations, enzyme catalysis, sterilization and aseptic operations.

CHE 4263 Environmental Chemodynamics (3)

Prereq.: CHE 3102 or equivalent introductory course in transport science. Environmental chemodynamics: interphase equilibrium, reactions, transport processes and related models for anthropogenic substances across natural interfaces (air-water-sediment-soil) and associated boundary regions.

CHE 4270 Processing of Advanced Materials (3)

Prereq.: CHE 3102 or equivalent transport course. Treatment of coupled chemical reaction and mass, energy and momentum transport in the manufacturing and processing of semiconductors and advanced ceramic materials; engineering models for chemical and physical vapor deposition methods and condensed phase processes.

CHE 4272 Chemical Processing of Nanomaterials (3)

Prereq.: CHE 3102 or equivalent introductory course in transport science. Chemical engineering principles applied to preparation, handling and applications of nanomaterials. Emphasis will be on manufacturing and processing steps. Case studies will be developed to focus on specific device or material applications.

CHE 4275 Electrochemical Engineering (3)

Prereq.: CHE 3102 or equivalent. Introductory course in transport science. Principles of electrochemistry applied to engineering problems; potential distribution theory, kinetics, mass transport and thermodynamic principles; quantification of controlling factors in microfabrication, corrosion, battery design and electrochemical synthesis.

CHE 4285 Principles of High Polymers (3)

Prereq.: CHE 3172 and CHEM 3491. Solution and solid-state properties of high polymers; microstructure of polymer chains and effect on macromolecular physical properties of the final plastics.

CHE 4410 Special Topics in Chemical Engineering Design (3)

May be taken for a max. of 6 sem. hrs. when topics vary. One or more phases of current chemical engineering design.

CHE 4420 Special Topics in Chemical Engineering Science (3)

May be taken for a max. of 6 sem. hrs. when topics vary. One or more phases of current chemical engineering science.

CHE 7100 Chemical Engineering Fluid Mechanics (3)

Foundations of continuum fluid mechanics and the equations of motion; solution methods for lubrication flows, creeping flows, boundary layer problems, laminar flows with strong convection; introduction to selected topics including: turbulence, non-Newtonian fluids, interfacial flows, computational fluid dynamics, microfluidics, particle motion, droplet dynamics.

CHE 7110 Mathematical Methods in Chemical Engineering (3)

Review of physicochemical problem formulation; analytical and approximate techniques for the solution of linear and nonlinear differential equation models in chemical engineering systems.

CHE 7120 Chemical Engineering Thermodynamics (3)

Thermodynamic properties, first and second laws of thermodynamics, entropy, Maxwell relations, and relationship of thermodynamic properties to intermolecular forces; physical equilibrium with emphasis on partial free energy, fugacity, Raoult's law, K-values, equations of state, and activity coefficients; chemical equilibrium and free energies; fundamentals of statistical mechanics.

CHE 7130 Fundamentals of Heat and Mass Transport (3)

Foundations of heat and mass transport in continua; modeling and solution techniques; transport by diffusion, convection, and turbulence; forced convection; buoyancy-driven transport; introduction to computational modeling.

CHE 7140 Chemical Reactor Design Methods (3)

Basic principles of chemical kinetics, fluid flow, heat transfer and mass transfer used in design of chemical reactors; chemical equilibria, chemical kinetics, design of isothermal reactors, effects of nonideal flow, nonisothermal reactors and solid-gas catalytic reactions.

CHE 7314 Optimization (3)

Techniques of optimization including analytical methods, linear and nonlinear programming, geometric and dynamic programming and variational methods with application to systems of interest to chemical engineers.

CHE 7542 Catalysis (3)

Prereq.: CHE 7140 or equivalent. Heterogeneous catalysis; adsorption phenomena, physical methods, solid state spectroscopies and reaction mechanisms as applicable to fundamental and industrially significant processes.

CHE 7592 Design Problems in Chemical Engineering (3)

Prior to registration students should discuss a prospective design problem with faculty member under whom they plan to study and obtain departmental approval. Design problem cannot be directly related to student's research. Integration of technology into design of systems or plants for accomplishing specific objectives; emphasis on producing a design package considering technical, economic, manning and scheduling aspects of the project.

CHE 7700 Advanced Topics in Chemical Engineering (3)

May be taken for a max. of 9 hrs. of credit with consent of instructor. One or more phases of advanced chemical engineering practice.

CHE 7901 Speaking of Macromolecules (1)

See CHEM 7901.

CHE 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

CHE 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Chemistry

CHEM 1001 Chemical Fundamentals (3)

[LCCN: CCEM 1103, Chemistry I (Non-Science Majors)] This is a General Education course. *Prereq.: ACT mathematics score of at least 21 or eligibility for MATH 1021. For those students whose curricula require only one year of chemistry or physical science. Also may be taken as a preparatory course for CHEM 1201.* An overview of chemical theory and principles with emphasis on the role of chemistry in the modern world.

CHEM 1002 Chemistry of Life and the Environment (3)

[LCCN: CCEM 1113, Chemistry II (Non-Science Majors)] This is a General Education course. *Prereq.: CHEM 1001 or CHEM 1201 or CHEM 1421.* An overview of organic chemistry and biochemistry; emphasis on the molecular basis for the biological, materials and environmental sciences.

CHEM 1201 General Chemistry I (3)

[LCCN: CCEM 1123, Chemistry I (Science Majors)] This is a General Education course. *Prereq.: credit or registration in MATH 1022, MATH 1023, MATH 1431, MATH 1550 or MATH 1551. Credit will not be given for this course and CHEM 1421. For science/engineering curricula.* Modern chemical theories and principles; quantitative approach and problem solving; descriptive chemistry of selected elements and compounds.

CHEM 1202 General Chemistry (3)

[LCCN: CCEM 1133, Chemistry II (Science Majors)] This is a General Education course. *Prereq.: CHEM 1201 or CHEM 1421. Credit will not be given for both this course and CHEM 1422. For science/engineering curricula. Continuation of CHEM 1201.* Additional theory with emphasis on solution chemistry and a quantitative approach; descriptive chemistry of selected elements and compounds from the main groups and the first transition series.

CHEM 1212 General Chemistry Laboratory (2)

[LCCN:CCEM 1132, Chemistry I+II Lab (Science Majors)] Prereq.: credit or registration in CHEM 1002, CHEM 1202 or CHEM 1422. *Credit will not be given for both this course and CHEM 1431. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill. 6 hrs. lab.* Basic laboratory operations including selected experiments and introductory inorganic qualitative analysis.

CHEM 1421 HONORS: General Chemistry (3)

This is a General Education course. *Prereq.: credit or registration in MATH 1550 or MATH 1551. Credit will not be given for both this course and CHEM 1201. Chemistry majors who qualify should take this course. For well-prepared students with a special interest in chemistry.*

CHEM 1422 HONORS: General Chemistry (3)

This is a General Education course. *Prereq.: CHEM 1421 or CHEM 1201 with consent of department chair. Chemistry majors who qualify should take this course. Credit will not be given for both this course and CHEM 1202. Continuation of CHEM 1421.*

CHEM 1431 HONORS: General Chemistry Laboratory (2)

Prereq.: credit or registration in CHEM 1422 or credit or registration in CHEM 1202. Credit will not be given for both this course and CHEM 1212. For chemistry majors and other well-prepared students with special interest in chemistry. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill. 6 hrs. lab/demonstration. Fundamental chemical operations, a selection of experiments and elementary quantitative techniques.

CHEM 2001 Analytical Chemistry (3)

[LCCN: CCEM 2303, 2304, Analytical Chemistry] *Prereq.: CHEM 1202 or CHEM 1422. Basic principles and practices of modern methods of analysis.*

CHEM 2002 Analytical Chemistry Laboratory (1)

[LCCN: CCEM 2301, 2304, Analytical Chemistry Lab] *Prereq.: CHEM 1202 or CHEM 1422; credit or registration in CHEM 2001. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill. 3 hrs. lab. Experiments in modern methods of analysis.*

CHEM 2060 Survey of Organic Chemistry (3)

[LCCN: CCEM 2203, Organic Chemistry, Survey] *Prereq.: CHEM 1202 or CHEM 1422. Credit will not be given for both this course and CHEM 2261 and CHEM 2461. Aliphatic and aromatic compounds; biological aspects of organic chemistry.*

CHEM 2261 Organic Chemistry (3)

[LCCN: CCEM 2213, Organic Chemistry I] *Prereq.: CHEM 1202 or CHEM 1422. Credit will not be given for both this course and CHEM 2060 and CHEM 2461. Representative classes of organic compounds; emphasis on varied professional goals of students, e.g., life sciences, physical sciences, engineering.*

CHEM 2262 Organic Chemistry (3)

[LCCN: CCEM 2223, Organic Chemistry II] Prereq.: CHEM 2261. Continuation of CHEM 2261. Credit will not be given for this course and CHEM 2462.

CHEM 2364 Organic Chemistry Laboratory (2)

Same as CHEM 2463. Prereq.: CHEM 1212 and CHEM 2060 or credit or registration in CHEM 2262 or CHEM 2462. Credit will not be given for this course and CHEM 2463. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill.

6 hrs. lab. Fundamental laboratory operations of organic chemistry.

CHEM 2461 HONORS: Organic Chemistry I (3)

Prereq.: a grade of "A" or "B" in CHEM 1202 or CHEM 1422. Chemistry majors who qualify should take this course. For well-prepared students with a special interest in chemistry. Credit will not be given for this course and CHEM 2060 or CHEM 2261. Studies of structure, mechanism and synthesis in organic chemistry.

CHEM 2462 HONORS: Organic Chemistry II (3)

Prereq.: CHEM 2461 or a grade of "A" in CHEM 2261. Chemistry majors who qualify should take this course. For well-prepared students with a special interest in chemistry. Credit will not be given for both this course and CHEM 2262. Continuation of CHEM 2461.

CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

Same as CHEM 2364; primarily for chemistry majors. Credit will not be given for this course and CHEM 2364. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill.

CHEM 2900 Research Internship (1-2)

Prereq.: CHEM 1201 or CHEM 1431. Pass-fail grading. May be taken 6 times for credit; no more than 8 sem. hrs. of credit may be earned in CHEM 2900 and CHEM 3900. May be selected on recommendation of professor directing the work. Introduction to chemical research by association with departmental research groups.

CHEM 3491 Physical Chemistry I (3)

Prereq.: MATH 2057 or MATH 2090; PHYS 1202 or PHYS 2113; and CHEM 1202 or CHEM 1422; all three courses with a grade of "C" or better. Principles of physical chemistry including quantum mechanics, kinetics and thermodynamics.

CHEM 3492 Physical Chemistry II (3)

Prereq.: CHEM 3491. Continuation of CHEM 3491.

CHEM 3493 Physical Chemistry Laboratory (3)

Prereq.: PHYS 1209 or PHYS 2109; CHEM 1212 or CHEM 1431; and credit or registration in CHEM 3492. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill. *1 hr. lecture; 5 hrs. lab.* Selected experiments to accompany physical chemistry.

CHEM 3900 Chemical Problems (1-3)

Coreq.: CHEM 3492. A student may not continue in a course if the corequisite course is dropped prior to the last day of the midsemester examination period.
May be taken for a max. of 6 sem. hrs. of credit; no more than 8 sem. hrs. of credit may be earned in CHEM 2900 and CHEM 3900. May be selected on recommendation of professor directing the work and consent of the dean of the college. Written report of research problem is required. Introduction to chemical research methods.

CHEM 4003 Science Teaching in Secondary School III: Instructional Strategies in Science (1)

See BIOL 4003.

CHEM 4004 Seminar in Teaching Secondary School Science (3)

See BIOL 4004.

CHEM 4005 Science Research Methods (3)

See BIOL 4005.

CHEM 4010 Macromolecular Systems I (3)

Prereq.: CHEM 2262 and CHEM 3492 or BIOL 4001 or equivalent.

2 hrs. lecture; 2 hrs. lab. Principles of large molecules and polymeric materials: physical states, morphology, strength, processing; synthesis and biosynthesis; characterization.

CHEM 4011 Macromolecular Systems II (3)

Prereq.: CHEM 4010. 2 hrs. lecture; 2 hrs. lab. Behavior of large molecules, emphasizing theory and practice of modern and classical methods for molecular characterization.

CHEM 4150 Environmental Chemistry (3)

Also offered as ENVS 4101. Prereq.: CHEM 2001 and CHEM 2261 or CHEM 2461 or CHEM 2060 Chemical principles applied to the study of the distribution, transport, reactivity and toxicity of chemical species in the environment.

CHEM 4160 Industrial Organic Chemistry (3)

Prereq.: CHEM 2262 or CHEM 2462. Review of major industrial processes with special emphasis on polymer synthesis and applications.

CHEM 4552 Instrumental Characterization of Organic Compounds (2)

Prereq.: CHEM 2001, CHEM 2002 and credit or registration in CHEM 3491. Molecular analysis using NMR, IR, UV spectroscopy, mass spectrometry and chromatography.

CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)

Prereq.: CHEM 2001, CHEM 2002 and CHEM 4552. Laboratory usage deposit. 6 hrs. lab. Applications of molecular analysis.

CHEM 4556 Analytical Spectroscopy (3)

Prereq.: CHEM 2001 and credit or registration in CHEM 3491. Basic principles of spectroscopy for chemical analysis emphasizing optical methods: UV/VIS absorbance, fluorescence, vibrational spectroscopy and atomic spectroscopy.

CHEM 4557 Analytical Separations (3)

Prereq.: CHEM 2001 and credit or registration in CHEM 3492. Basic principles of chemical separations emphasizing analytical separations and chromatography. Gas chromatography, liquid chromatography, electrophoresis and related detection techniques.

CHEM 4558 Mass Spectrometry (3)

Prereq.: CHEM 2001 and credit or registration in CHEM 3492. Fundamentals of mass spectrometry, including ion formation, mass separation, detection and structure determination.

CHEM 4559 Electroanalytical Chemistry (3)

Prereq.: CHEM 2001 and credit or registration in CHEM 3491. Basic principles of electrochemical reactions, electroanalytical voltammetric methods for analysis, the chemistry of heterogeneous electron transfers, electrochemical instrumentation, micro- and nano- electrodes, surface modification for electro-catalysis and sensing.

CHEM 4561 Intermediate Physical-Organic Chemistry (3)

Prereq.: CHEM 2262 or CHEM 2462 and CHEM 3492. Selected topics in kinetics, reaction mechanisms, applications of quantum mechanics to organic chemistry, and related topics in physical-organic chemistry.

CHEM 4562 Intermediate Organic Chemistry (3)

Prereq.: CHEM 2262 or CHEM 2462. Selected topics in synthesis, natural products chemistry, stereochemistry, reaction mechanisms and related topics in structural and synthetic organic chemistry.

CHEM 4563 Problems in Organic Structure Elucidation (3)

Prereq.: CHEM 2262 or CHEM 2462 and CHEM 3492. Focus on interpretation of multiple types of NMR spectra, mass spectra or other spectra relevant to structure elucidation; extensive utilization of actual spectra in problem solving sessions.

CHEM 4564 Advanced Organic and Inorganic Laboratory (3)

Prereq.: CHEM 2364 or equivalent. Students registering for laboratory courses in chemistry are charged a laboratory usage deposit on their fee bill.

1 hr. lecture; 6 hrs. lab. Organic and inorganic preparations emphasizing modern synthetic methods and modern characterization techniques.

CHEM 4570 Advanced General Inorganic Chemistry (3)

Prereq.: credit or registration in CHEM 3492. For advanced undergraduates and beginning graduate students. Principles in advanced inorganic chemistry; modern interpretations.

CHEM 4571 Organometallic Chemistry (3)

Prereq.: CHEM 2262 or CHEM 2462 and credit or registration in CHEM 3492. Chemistry and principles of metal bonds with metal to carbon sigma and pi bonds; bonding concepts, electronic structure, periodic trends and fundamental reaction mechanisms; applications to homogeneous catalysis.

CHEM 4581 Introduction to Mathematical Chemistry (3)

Prereq.: MATH 2057 and credit or registration in CHEM 3491. Mathematical methods of chemistry, with application to selected chemical problems.

CHEM 4594 Introduction to Quantum Chemistry (3)

Prereq.: CHEM 3492 and MATH 2057. Basic ideas of quantum mechanics; application to atomic and molecular structure.

CHEM 4596 Chemical Thermodynamics (3)

Prereq.: CHEM 2262 or CHEM 2462 and CHEM 3492. Principles of macroscopic thermodynamics and application to systems of chemical relevance.

CHEM 4597 Introduction to Statistical Thermodynamics (3)

Prereq.: CHEM 3492 and MATH 2057. Introductory quantum and classical statistical thermodynamics of some simple systems of chemical relevance.

CHEM 6001 Chemistry Instruction Through Demonstration and Experiments (3)

Prereq.: one year of college chemistry. 2 hrs. lecture; 3 hrs. lab. Demonstration techniques for junior and senior high school instruction; hands-on experience.

CHEM 6002 Chemical Principles for Teachers (3)

For elementary and middle school teachers. A basic chemistry course with emphasis upon the principles relevant to effective use of educational materials developed by professional societies and national curricular development projects.

CHEM 6003 Laboratory Methods for Teachers (3)

For elementary and middle school teachers. 1 hr. lecture; 6 hrs. lab. Analysis of laboratory experiments in current elementary and middle school curricula; selected experiments in modern chemistry.

CHEM 6691 Seminar in Current Developments in Chemistry (1-3)

Su *Prereq.: CHEM 1202 or CHEM 1422 or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary.* For high school and junior college teachers; part of the MNS degree program.

CHEM 7010 Macromolecular Systems III (3)

Prereq.: CHEM 4010. Introduction to representative classes of macromolecules; emphasis on polymerization mechanisms and kinetics; advanced polymer synthesis techniques, including synthesis of inorganic polymers, biopolymers and conjugated polymers.

CHEM 7011 Macromolecular Systems IV (3)

Prereq.: CHEM 4011. Structure property relationships for materials such as liquid crystals; polymer blends and block copolymers; polymer nanocomposites and nanotechnology related materials.

CHEM 7221 Chemical Dynamics and Kinetics (3)

Prereq.: CHEM 3491 and CHEM 3492. Theories of chemical reaction rates in the gas phase and in solution; chemical dynamics; gas phase and solution kinetics; applications of kinetics and chemical dynamics to mechanistic studies; modern experimental techniques.

CHEM 7292 Special Topics in Chemical Physics (2-3)

May be taken 4 times for credit. Specialized areas of physical chemistry.

CHEM 7750 Special Topics in Analytical Chemistry (2-3)

May be taken 4 times for credit. Modern methods and techniques of analytical chemistry.

CHEM 7760 Special Topics in Organic Chemistry (2-3)

May be taken 4 times for credit. Specialized areas of current interest in organic chemistry.

CHEM 7770 Special Topics in Inorganic Chemistry (2-3)

May be taken 4 times for credit. Advanced treatment of areas of current interest in modern inorganic chemistry.

CHEM 7780 Special Topics in Macromolecular Chemistry (2-3)

May be taken 4 times for credit. Advanced treatment of specialized subjects of importance to current macromolecular research.

CHEM 7800 Seminar (1)

Pass-fail grading. May be taken 6 times for credit. All graduate students are expected to participate in report and discussion groups in field of chemistry of their particular interest.

CHEM 7901 Speaking of Macromolecules (1)

Also offered as CHE 7901. Pass-fail grading. May be taken for a max. of 3 sem. hrs. of credit. Multidisciplinary seminar that explores current research concerning macromolecules.

CHEM 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading. Students who receive 6 hrs. of credit for this course cannot obtain more than 9 hrs. of credit for CHEM 8900.

CHEM 8900 Procedures and Problems in Chemical Research (1-12)

Pass-fail grading. Open only to students of proven ability or exceptional potential. Students who receive 6 hrs. of credit for CHEM 8000 cannot obtain more than 9 hrs. of credit in this course. Experimental research methods, design and execution of experiments and analysis and correlation of experimental data.

CHEM 9000 Dissertation Research (1-12 per sem.)

Prereq.: 6 hrs. of credit in CHEM 8000 or CHEM 8900. “S”/“U” grading.

Child and Family Studies

CFS 2050 Family Dynamics (3)

A systems approach to examining family processes and development throughout the life span.

CFS 2065 Management of Family Systems and Services (3)

A systems perspective of contemporary families and their processes including environmental influences, elements of family management and management of school and community resources and services.

CFS 3055 Development of Young Children in Context (4)

Also offered as EDCI 3055. Prereq.: BIOL 1001. Credit will not be given for both this course and EDCI 3055. 3 hrs. lecture; 2 hrs. field observations. Development of children from prenatal to age eight in the family and other developmental contexts; field observations with infants and toddlers, observations and practical experience in the School of Human Ecology's Preschool Laboratory and in other early childhood settings.

CFS 3056 Young Children's Cognitive and Linguistic Development (3)

Also offered as EDCI 3056. Prereq.: CFS 3055. Credit will not be given for both this course and EDCI 3056. An introductory survey of current theory and research on young children's cognitive and linguistic development; special attention is given to the development of oral language, reading skills and mathematical concepts in young children; emphasis on implications for the early childhood education classroom.

CFS 3065 Adult-Child Relationships (3)

Prereq.: CFS 2050 and CFS 3055.

Parent-child and other adult-child interactions and relationships; emphasis on the development and interactive nature of adult-child relationships including the influence of adult-child relationships on child outcomes and adult behavior.

CFS 3067 Field Experience in Child and Family Studies (3)

Prereq.: CFS 2050 or CFS 2065. For majors only. 6 hrs. field experience per week. Supervised professional experience designed to integrate academic learning with practice.

CFS 3090 Professional Seminar in Child and Family Studies (2)

Prereq.: credit or registration in CFS 3067. For majors only. Pre-internship seminar.

CFS 4051 The Adolescent and the Family (3)

Prereq.: CFS 3055 or equivalent. Growth, development and guidance of the adolescent in the home, family and community.

CFS 4052 Families: Policy and Law (3)

Prereq.: POLI 2051 or POLI 2070 or HIST 3071 or equivalent. Marriage and family as legal institutions; history and development of family law principles; overview of the public policy process; emphasis on family policy issues.

CFS 4064 Family Stress Management (3)

Prereq.: CFS 2065 or consent of instructor. Strategies used by families to manage stress; current family stress management theory and research.

CFS 4065 Family Life Education (3)

Prereq.: Credit or concurrent enrollment in CFS 3065. Overview of family life education history, philosophy and topics; planning, implementation and evaluation of family life education programs in diverse settings.

CFS 4067 Internship in Child and Family Studies (8)

Prereq.: CFS 3090 and 3 cr. hrs. in CFS 3067. For majors only, senior standing. Application must be made at the school one semester prior to proposed enrollment. 2 hrs. lecture; 12 hrs. practicum. Supervised professional observation and experience in child and family studies.

CFS 7051 The Contemporary Family (3)

Also offered as EDCI 7051. Credit will not be given for this course and EDCI 7051. Effects of change on family integration; adaptive responses in family lifestyles, roles and relationships to political, social and technological change.

CFS 7052 Topics and Issues in Family and Consumer Sciences (3)

Also offered as EDCI 7052. Credit will not be given for this course and EDCI 7052. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Lectures and research on topics not covered in other family or consumer science courses.

CFS 7055 Human Development (3)

Prereq.: consent of instructor. Also offered as EDCI 7055. Credit will not be given for both this course and EDCI 7055. May be taken for a max. of 6 hrs. of credit when topics vary. Dynamics of human development and practical implications.

CFS 7056 Theories of Child Development (3)

Also offered as EDCI 7056. Credit will not be given for both this course and EDCI 7056. Research and theory in child development; relation to the major domains in the child's ecology—child development, the family, services and the environment.

CFS 7057 Theories in Family Science (3)

Also offered as EDCI 7057. Credit will not be given for both this course and EDCI 7057. Historical and contemporary theories and conceptual frameworks in family science.

Chinese

CHIN 1101 Beginning Mandarin Chinese (4)

This is a General Education course. *Persons with prior knowledge of Mandarin may not take this course for credit. Native speakers of Chinese will not receive credit for this course.* Basic lexicon and structure of Chinese; development of speaking and listening skills.

CHIN 1102 Beginning Mandarin Chinese (4)

This is a General Education course. *Native speakers of Chinese will not receive credit for this course.* Basic lexicon and structure; emphasis on communicative language use.

CHIN 2001 Intermediate Mandarin Chinese (4)

This is a General Education course. *Prereq.: CHIN 1102. Native speakers of Chinese will not receive credit for this course.* Continuation of the study of basic lexicon and structures of Chinese; emphasis on further development of speaking, writing and reading skills.

CHIN 2002 Intermediate Mandarin Chinese (4)

This is a General Education course. *Prereq.: CHIN 2001. Native speakers of Chinese will not receive credit for this course.*

Continuation of the study of basic lexicon and structures of Chinese; emphasis on further development of speaking, writing and reading skills.

CHIN 2020 Chinese for Travelers (3)

Credit not applicable to a minor in Chinese. Does not count toward satisfying the foreign language requirement for undergraduates. Basic communication patterns, practical everyday vocabulary, with exercises in comprehension and conversation.

CHIN 2070 Chinese Cinema (3)

This is a General Education course. Chinese cinema from 1896 to the present; emphasis on the New Chinese cinema since 1980s; screening and analysis of representative films; knowledge of Chinese not required.

CHIN 3101 Advanced Chinese (3)

Prereq.: CHIN 2002 or equivalent. Introduction of authentic materials of increasing complexity on a variety of topics; emphasis on the use of relatively sophisticated structures of vocabulary in complex communication.

CHIN 3102 Advanced Chinese (3)

Prereq.: CHIN 3101 or equivalent. Introduction of authentic materials of increasing complexity on a variety of topics; emphasis on the use of relatively sophisticated structures vocabulary in complex communication.

CHIN 3801 Traditional East Asian Literature (3)

Also offered as JAPN 3801. Taught in English; knowledge of East Asian languages not required. Introduction to the genres, themes and representative works of traditional Chinese and Japanese literature; emphasis on critical reading.

Classical Studies

CLST 2070 Ancient World in the Cinema (3)

An examination of how the cinema has interpreted the history and myths of Greece and Rome.

CLST 2080 Women in Antiquity (3)

Knowledge of Greek or Latin not required. The role of women in Greek and Roman society; readings from historical, legal, medical and religious documents.

CLST 2090 Greek and Roman Mythology (3)

Taught in English; knowledge of the Greek and Latin languages not required. Survey of the principal myths of the Greeks and Romans.

CLST 2092 Greek and Latin Word Study (3)

No previous knowledge of Greek or Latin required; credit not applicable toward a major in foreign languages. Etymology of common and scientific words derived from Greek and Latin; emphasis on medical terminology.

CLST 2101 Ancient Greek Civilization (3)

This is a General Education course. *Knowledge of Greek and Latin languages not required.* Survey of literature, philosophy, art and culture of ancient Greece from its beginnings to the death of Alexander the Great.

CLST 2102 Ancient Roman Civilization (3)

This is a General Education course. *Knowledge of Greek and Latin languages not required.* A survey of the literature, philosophy, art and culture of ancient Rome from its beginnings to the death of Marcus Aurelius.

CLST 3020 Classical Epic in Translation (3)

Knowledge of Greek and Latin languages not required. Growth and development of the Greek and Latin epic; basic themes, the nature of a hero and relevance to modern reader.

CLST 3032 Greek and Roman Tragedy in English Translation (3)

Taught in English; knowledge of Greek and Latin languages not required. Drama of Greece and Rome; origins, major examples and relevance; plays of Aeschylus, Sophocles, Euripides and Seneca.

CLST 3040 Greek and Roman Comedy in English Translation (3)

Knowledge of Greek or Latin languages not required. Masters of stage comedy from the ancient world, with special attention to Aristophanes, Menander, Plautus and Terence; origins and growth of comedy as an art form; problems in staging; social nature of comedy in the ancient world.

CLST 3050 Special Topics in Classical Studies (3)

May be repeated for a max. of 6 sem. hrs. of credit when topics vary. Taught in English, knowledge of Greek and Latin languages not required.

CLST 3090 Comparative Mythology (3)

Also offered as REL 3090. Introduction to myths from around the world with comparisons to Greek and Roman mythology.

CLST 4999 Senior Seminar (3)

Prereq.: four semesters of Greek or Latin or permission of instructor. An examination of the influence of the Classical world on Western culture. Focus on literature, history, politics, art and architecture.

Construction Management

A grade of "C" or better is required in all CM courses.

Registration in any CM course above CM 2101 is restricted to students admitted to a senior college with a declared CM major or minor.

CM 1011 Introduction to Construction Management (3)

A survey of the construction industry to include an orientation to essential elements of professional practice and development in construction management.

CM 1020 Engineering Graphics for Mechanical Engineering (2)

Credit will not be given for both this course and CM 1030. Not open to construction management majors. 4 hrs. lab. Conception, visualization and communication of creative design concepts; introduction to engineering drafting and USA Standards Institute standards; freehand sketching; three-dimensional forms used in solution of engineering problems; use of solid modeling software in design and design communication.

CM 1030 Honors Engineering Graphics (2)

Same as CM 1020, with special honors emphasis for qualified students. Credit will not be given for both this course and CM 1020.

6 hrs. lab.

CM 1102 Construction Plan Reading (3)

2 hrs. lecture; 2 hrs. lab. Principles of graphic communication applied to reading construction plans with emphasis on residential, commercial, industrial, and heavy highway plans.

CM 2100 Construction Materials and Methods I (3)

Credit will not be given for this course and CM 2101. Intended for post-baccalaureate leveling for non-CM majors. Principal materials and methods used in building construction, emphasizing common construction systems such as light wood frames, masonry bearing walls, steel frames, and reinforced concrete as well as project planning, work methods, materials, equipment, and sustainability.

CM 2101 Construction Materials and Methods I (3)

Credit will not be given for this course and CM 2100. Prereq.: CM 1011 and CM 1102. Principal materials and methods used in building construction, emphasizing common construction systems such as light wood frames, masonry bearing walls, steel frames, and reinforced concrete as well as project planning, work methods, materials, equipment, and sustainability.

CM 2102 Construction Equipment (3)

Prereq.: CM 2101. Overview of construction equipment, including economy, selection, and productivity of common construction equipment for commercial, industrial, and heavy civil construction.

CM 2103 Construction Materials and Methods II (3)

Prereq.: CM 1102. Basic fundamentals of materials and methods used in the industrial and highway construction sectors.

CM 2105 Construction Surveying (3)

Prereq.: MATH 1550 and CM 1011. 2 hrs. lecture; 2 hrs. lab. Principles of construction surveying, fundamental measuring procedures, error analysis, leveling, traverse measurements, horizontal curves, vertical curves, and earthwork calculations.

CM 2215 Construction Safety (3)

Construction safety relating to accident causation; contractual obligations; project management and coordination.

CM 2500 Structural Principles and Practices (3)

Credit will not be given for this course and CM 2501. Intended for post-baccalaureate leveling for non-CM majors. Statics and strengths of materials; design of ordinary timber, steel, and reinforced concrete for construction applications.

CM 2501 Structural Principles and Practices (3)

Credit will not be given for this course and CM 2500. Prereq.: MATH 1550 or equivalent and PHYS 2001. Statics and strengths of materials; design of ordinary timber, steel, and reinforced concrete for construction applications.

CM 3110 Construction Estimating (3)

Credit will not be given for this course and CM 3111. Intended for post-baccalaureate leveling for non-CM majors. Fundamentals of estimating including document review, quantity survey, material, equipment, and labor pricing, and bid package preparation for construction projects.

CM 3111 Construction Estimating (3)

Credit will not be given for this course and CM 3110. Prereq.: CM 2102.

Fundamentals of estimating including document review, quantity survey, material, equipment and labor pricing and bid package preparation for construction projects.

CM 3145 Commercial Estimating (3)

Prereq.: CM 3111. 2 hrs. lecture; 2 hrs. lab. Principles of estimating including quantity surveys, pricing analysis, and bid package preparation for commercial projects.

CM 3165 Highway Construction (3)

Prereq.: CM 2103, CM 2105, and CM 3111. Basic fundamentals of highway construction including earthmoving, drainage, road paving, bridge and retaining walls, interpretation of plans and specifications, materials, equipment and estimating.

CM 3200 Mechanical and Electrical Systems (3)

Credit will not be given for this course and CM 3201. Intended for post-baccalaureate leveling for non-CM majors. For residential and commercial buildings; design and construction of building MEP systems; emphasis on basic terminology, equipment and installation procedures, management of the complete MEP process, code compliance, and quality control issues.

CM 3201 Mechanical and Electrical Systems (3)

Credit will not be given for this course and CM 3200. Prereq.: PHYS 2002. For residential and commercial buildings, design and construction of building MEP systems; emphasis on basic terminology, equipment, and installation procedures; management of the complete MEP process, code compliance and quality control issues.

CM 3235 Residential Development (3)

Prereq.: CM 3111. Introduction to the principles and procedures of residential development. Land development, market research, and residential company start-up practices are explored; focusing on a multi-team based residential project.

CM 3236 Residential Design Codes and Specifications (3)

Prereq.: majors only. 2 hrs. lecture; 2 hrs. lab. A study of residential design theory, techniques, and application as it relates to the International Residential Code for one and two family dwellings.

CM 3355 Maintenance and Turnarounds (3)

Prereq.: CM 2103. Principles of industrial maintenance and turnarounds including facility types, process equipment, work order systems, safety, preventive maintenance programs, roles, planning, and facility shutdown concepts.

CM 3356 Industrial Construction Estimating (3)

Prereq.: CM 2103 and CM 3111. 2 hrs. lecture; 2 hrs. lab. Principles of estimating including quantity surveys, pricing analysis, and bid package preparation for industrial construction.

CM 3502 Construction and Civil Materials (3)

Prereq.: CM 2501 and CM 2103. Fundamentals involved in design, evaluation, testing, and construction of asphalt, concrete, aggregates, steel, and wood.

CM 3503 Soils in Construction (3)

Prereq.: CM 2105 and CM 3502. In depth coverage of engineering behaviors of soil, soil testing, and characterization, pore water pressure, stresses in soil, consolidation, excavation support, shear strength of soil, soil investigation and exploration; compaction, and retaining walls, and construction of shallow and deep foundations.

CM 3504 Applied Structural Design (3)

Prereq.: CM 2501. Structural design of ordinary timber, steel, and reinforced concrete buildings and other structures in accordance with appropriate design code specifications; emphasis on contemporary design methodologies and provisions to achieve safe and serviceable resistance to vertical and lateral load effects.

CM 4100 Construction Scheduling and Cost Control (3)

Credit will not be given for this course and CM 4101. Intended for post-baccalaureate leveling for non-CM majors. Fundamentals of planning and scheduling including network-based schedules, resource scheduling, probabilistic scheduling, and computer applications. Project control emphasis on goals, flow of information, time and cost control, and change management.

CM 4101 Construction Scheduling and Cost Control (3)

Credit will not be given for this course and CM 4100. Prereq.: CM 3111. Fundamentals of planning and scheduling including network-based schedules, resource scheduling, probabilistic scheduling, and computer applications. Project control emphasis on goals, flow of information, time and cost control, and change management.

CM 4110 Construction Productivity (3)

Prereq.: CM 4101. Productivity measurement and improvement; project organization, stakeholders roles, quantifying labor and equipment productivity.

CM 4202 Construction Enterprise (3)

Prereq.: CM 3201 or ARCH 3008 or consent of instructor.

Senior standing; only for graduating seniors in their last semester of coursework.

A comprehensive study of construction management as it relates to a single construction enterprise.

CM 4206 Special Topics in Construction Management (3)

May be taken for a max. of 6 sem. hrs. when topics vary. Advanced topics, current issues or recent developments in the construction industry.

CM 4207 Independent Study (3)

Prereq.: consent of a faculty member. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Research on a construction topic as chosen by the student under direct supervision of a chosen faculty member.

CM 4208 Internship in the Construction Industry (3)

Prereq.: consent of instructor. Pass/fail grading.

A minimum of 8 weeks of full-time employment (320 hrs. min.) or a minimum of 16 weeks of part-time employment (320 hrs. min.) by a construction company participating in the CM Internship Program. Selected job positions/descriptions in the construction industry.

CM 4210 Construction Contracting (3)

Credit will not be given for this course and CM 4211. Intended for post-baccalaureate leveling for non-CM majors. Principles and theory of construction company ownership and organization, the estimate and bid process, construction contracts, bonds, insurance, business methods and plans, management, administration, labor law and relations, safety, and avoidance of claims.

CM 4211 Construction Contracting (3)

Credit will not be given for this course and CM 4210. Prereq.: junior standing or higher. Principles and theory of construction company ownership and organization, the estimate and bid process, construction contracts, bonds, and insurance, business methods and plans, management, and administration, labor law and relations, safety, and avoidance of claims.

CM 4221 Construction Project Management (3)

Prereq.: CM 4101 and CM 4211. Field management of a project from inception to completion, including personnel needed, business aspects, estimating and bidding aspects, communication, record keeping, monitoring and control of project, risk and claims management, safety, and close out.

CM 4302 Sustainable Construction (3)

Prereq.: EVEG 4154 or CM 3502.

Credit will not be given for this course and ID 4772. Green building technologies as it applies to residential, commercial and heavy highway construction. Design and construction of high performance structures. Economical and ecological benefits of green buildings. U.S. green LEED, NAHB green guidelines and Green roads.

CM 4303 Life Cycle Assessment (3)

Prereq.: EVEG 4154 or CM 3502.

Computational structure and data sources for SETAC LCA, input-output LCA and hybrid LCA as tools selects a superior alternative on the basis of pollution prevention and resource conservation.

CM 4355 Driven Pile Construction (3)

Prereq.: senior standing and Construction Management major; or consent of instructor. Materials, construction techniques, and testing procedures used in the driven pile construction industry. Topics include: review of geotechnical parameters and testing methods, crane and hammer equipment selection, common construction practices, pile drivability, pile load testing, and dynamic pile testing.

CM 4357 Industrial Project Controls (3)

Prereq.: CM 3356 and CM 4101. Fundamentals of information management required for effective project control on an industrial construction project; data requirements, data collection, and data processing involved in measuring, evaluating, calculating, and reporting job performance from inception of project through closeout.

CM 4358 Industrial Electrical Installations (3)

Prereq.: CM 3201. Fundamentals of electrical and instrumentation concepts, systems, plans, and installations relevant to industrial facilities and applications.

CM 7030 Project Delivery (3)

Advanced concepts of project delivery, including project delivery systems, associated contractual methodologies, roles and responsibility of parties, feasibility analysis, project documentation, effective project execution, risk management and mitigation, and innovative construction practices.

CM 7110 Advanced Construction Productivity (3)

Prereq.: CM 4110 or consent of instructor. A comprehensive systems approach to construction productivity management and advanced improvement methods such as work sampling, crew balance methods, process flow charts, improved project organization, roles of the individual stakeholders, quantifying labor, equipment, and job site productivity, change orders, overmanning, stacking of trades, and other contemporary issues in construction productivity.

CM 7111 Advanced Construction Scheduling (3)

Advanced techniques in schedule development and implementation for effective project management during the planning and construction phases of a project, including monitoring, updating, and controlling the project schedule and computer software applications.

CM 7112 Construction Simulation (3)

Prereq.: consent of instructor. Decision-making using simulation in the planning and scheduling phases in the construction industry and using simulation languages to model construction operations.

CM 7150 Decision Making Tools in Construction Management (3)

Reviewing decision-making techniques that can be used by construction managers to assist in making decisions under uncertainty; decision-making techniques include financial and decision theory techniques along with sensitivity analysis; examples drawn from the construction industry as well as engineering.

CM 7206 Special Topics in Construction Management (3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. when topics vary. Graduate level advanced topics, current issues or recent developments in the construction industry.

CM 7207 Independent Study in Construction Management (3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Independent study in specialized areas of construction management. Research on a construction topic as chosen by the student under direct supervision of a chosen graduate faculty member.

CM 7211 Construction Dispute Resolution (3)

Recognizing the origins of construction disputes, ways to avoid disputes through quality control, communications, and negotiation, and the alternate dispute resolution methods available.

CM 7213 Soils in Construction (3)

Prereq.: consent of instructor. An in-depth understanding of geotechnical principles as it applies to soil construction activities.

CM 7220 Building Information Modeling for Construction Management (3)

Concepts related to the implementation of BIM in construction projects from the perspective of the general contractor; topics include applications of BIM for visualization, marketing, quantity take-off, scheduling, coordination, and facilities management.

CM 7230 Lean Construction (3)

Production management-based approach to improve the Architecture/Engineering/Construction (AEC) process and product; lean process foundations, management, measurement, tools/techniques, and practices.

CM 7250 Natural Hazard Resistant Construction (3)

Materials, construction techniques, and code requirements used in the construction industry to make buildings resistant to natural hazards, including wind, flood, hurricanes, and other hazards; emphasis on construction practices for residential buildings that are sustainable, long-term solutions to our hazard-filled environment.

CM 7302 Advanced Sustainable Construction (3)

Prereq.: consent of instructor. Continuation of CM 4302.

CM 8000 Thesis Research (1-12 per sem.)

"S/U" grading.

Communication Studies

CMST 1061 Fundamentals of Communication (3)

This is a General Education course. The practice of rhetoric, performance studies and communication theory; extensive practical and performance applications of communication skills in addition to lectures and readings.

CMST 1150 Introduction to Communication Studies (3)

[LCCN: CCOM 1013, Fundamentals of Communication] *Not a substitute for CMST 1061, CMST 2010, CMST 2040, CMST 2060 or CMST 2064.* Fundamental principles and subject areas in the study of human communication.

CMST 2010 Interpersonal Communication (3)

[LCCN: CCOM 2213, Interpersonal Communication] This is a **General Education course**. Theories and research in human communication; one-to-one interactions.

CMST 2012 Introduction to Film (4)

3 hrs. lecture; 3 hrs. lab. Nature and function of film as a mode of communication; basic language of cinema; selected films screened and studied.

CMST 2040 Introduction to Performing Literature (3)

This is a General Education course. The study of literature through performance; reading, analysis and performance of prose, poetry and drama.

CMST 2060 Public Speaking (3)

[LCCN: CCOM 2013, Public Speaking] This is a **General Education course**. Theory and skills needed by the effective communicator and critical consumer of speech; analysis of other speakers and practice in speaking.

CMST 2061 Communication for Business and the Professions (3)

[LCCN: CCOM 2313, Business & Professional Communication] *For students in the professional colleges, particularly the E.J. Ourso College of Business.* Communication used in business and professional organizations; proposal presentations, group decision making, parliamentary procedure and interviewing.

CMST 2063 Argumentation and Debate (3)

[LCCN: CCOM 2113, Argumentation and Debate] This is a **General Education course**. Principles of argumentation and debate; analysis, briefing, evidence, reasoning and refutation; debating on vital questions.

CMST 2064 Small Group Communication (3)

Aspects of group leadership; group discussion and the problems of communication in human relations.

CMST 2200 Practicum in Communication Studies (1-3)

Prereq.: consent of instructor. Pass-fail grading. May be taken for a max. of 3 sem. hrs.; however, no more than a total of 3 sem. hrs. in CMST 2200 and CMST 4200 may be taken for undergraduate credit. Practical experience in major interdepartmental activities outside the classroom under direct faculty supervision.

CMST 3012 History of Film (4)

3 hrs. lecture; 3 hrs. lab. Historical, cultural, artistic and technological development of the film industry; selected films screened and studied.

CMST 3013 Topics in Film Genres (4)

May be taken for a max. of 8 sem. hrs. of credit when topics vary. 3 hrs. lecture; 3 hrs. lab. Cultural history, structure, rhetoric and performance of particular film genres.

CMST 3040 Performance Composition (3)

Prereq.: CMST 2040. Study of the rhetorical and aesthetic elements of solo and group performance, including performances of literature, cultural performances and experimental performances.

CMST 3041 Performance in Everyday Life (3)

Communication-centered study of performance and theatricality in daily life.

CMST 3060 Advanced Public Speaking (3)

Prereq.: grade of "B" or better in CMST 1061 or CMST 2060. Refined development in platform speaking.

CMST 3106 Communication and Power (3)

How power is created, maintained and subverted through the strategic use of discourse.

CMST 3107 Rhetoric of the Contemporary Media (3)

Various forms of media (television, pulp novels, pop music); their promotion of cultural values and modes of conduct; study of major rhetorical critics and theorists.

CMST 3113 Conversation (3)

Analysis of verbal processes in conversation; emphasis on theory and research concerning language, messages and social interaction.

CMST 3114 Communication Research (3)

Techniques and procedures in communication research; topic development, research design, data collection, data analysis; examination of recent research in communication.

CMST 3115 Communication and Gender (3)

Prereq.: CMST 2010 or equivalent. Gender differences, sex roles and sexual stereotypes in communication.

CMST 3118 Intercultural Communication (3)

Prereq.: CMST 2010 or equivalent. Theories and research of how people of different cultures communicate; emphasis on developing a critical sensitivity and foundations for increased effectiveness appropriate to a multicultural society.

CMST 3167 Rhetoric and Civilization (3)

Role of oratory in the formation, mobilization and destruction of human communities from ancient to modern times.

CMST 3168 Rhetoric of Propaganda (3)

Prereq.: CMST 2060 or CMST 2063 Common persuasive strategies employed in propagandistic discourse.

CMST 3169 The Rhetoric of Social Movements (3)

Prereq.: CMST 2063, CMST 3106, CMST 3107 or CMST 3167. Persuasive strategies used to build social identities and collectively agitate for social change.

CMST 3210 Computer Mediated Communication (3)

Prereq.: CMST 2010. Theories of communication as they apply to communication by computerized means. The effects of CMC on daily human activity, interpersonal relationships and work life.

CMST 3300 Rhetorical Criticism (3)

Prereq.: CMST 2060. History and practice of criticism as a means of inquiry in rhetorical studies. Theoretical and methodological underpinnings of major schools of criticism examined.

CMST 3810 Independent Study (1-3)

May be taken for a max. of 3 hrs. of credit on a communication topic not duplicated in regular course offerings. Course may be taken for a max. of 6 hrs. of credit in the major.

CMST 3900 Selected Topics in Communication Studies (3)

Prereq.: consent of instructor. *May be taken for a max. of 6 hrs. of credit when topics vary. Consult Schedule of Classes for current offering.*

CMST 4012 Communication and Relationships (3)

Prereq.: CMST 2010 or equivalent. Survey of theories of interpersonal communication and misunderstandings in relational development and deterioration; more effective communication.

CMST 4100 Political Communication (3)

Factors and strategies in contemporary political communication in the U.S.; emphasis on electronic communication, candidates and images, campaign management, speech making and advertising; study of recent and current elections.

CMST 4101 Organizational Communication (3)

Prereq.: CMST 2010. Theories surrounding how people communicate within the organizational setting, as well as how communication relates to the process of organizing; examines relevant theories and research.

CMST 4102 Communication and Careers (3)

Prereq.: CMST 2010 or equivalent. Examines theoretical and practical discourses surrounding careers on individual and group levels; includes key career issues: meanings of work, work/life balance, mentorship, career analogies.

CMST 4107 Communication as Culture (3)

Prereq.: CMST 3106, CMST 3107 or CMST 3167. Creation, maintenance and alteration of cultural norms, institutions and values through both mass mediated spectacle and intimate communication ritual.

CMST 4111 Intrapersonal Communication (3)

Prereq.: CMST 2010. Examination of mental imagery, imagined interaction and listening across a variety of contexts.

CMST 4112 Health Communication (3)

Communication in the health care context; application to pragmatic problems in the healthcare industry; critical examination of health messages in popular culture.

CMST 4113 Communication and Leadership in Teams (3)

Analysis of communication processes in groups and teams; includes examination of theories and research findings; addresses individual and team participation, leadership and decision-making skills.

CMST 4114 Contemporary Theories of Communication (3)

Current methods and theories of human communication; research literature; behavioral antecedents and consequences of messages and their variations; how messages interact with communicators to produce behavioral outcomes.

CMST 4118 Modeling Communication Within Marital and Family Relationships (3)

Also offered as SOCL 4402. Prereq.: CMST 2010. Role of communication within marriages and other family arrangements.

CMST 4119 Nonverbal Communication (3)

Prereq.: CMST 2010 or equivalent. Nonverbal message systems such as kinesics and proxemics; relationship between nonverbal and verbal communication.

CMST 4130 Communication Skills Training and Assessment (3)

Provides students with a theoretically-based understanding of training communication skills.

CMST 4141 Analysis and Performance of Narrative (3)

Prereq.: CMST 2040. Advanced study of selected novels, short stories and oral narratives through solo and group performance; stylistic and rhetorical analyses.

CMST 4142 Selected Topics in Performance Studies (3)

Prereq.: CMST 2040 and CMST 3040 or equivalent. May be taken for a max. of 6 hrs. of credit when topics vary.

CMST 4143 Performance of Southern Fiction (3)

Prereq.: CMST 2040 or equivalent. Study of selected texts of contemporary southern fiction through solo and group performance; literary criticism of texts performed; relevant narrative and performance theory.

CMST 4144 Performance Art (3)

Also offered as THTR 4144. Prereq.: CMST 2040 and CMST 3040 or equivalent. History, theory, criticism and practice of 20th century avant-garde performance and performance art.

CMST 4145 Group Performance (3)

Prereq.: CMST 2040 and CMST 3040 or equivalent. Theory and techniques of adapting and staging nondramatic literature and other materials for group performance; directing for Reader's Theatre, Chamber Theatre, Story Theatre and other forms.

CMST 4147 Body Performance Culture (3)

Prereq.: CMST 2040 and CMST 3040 or equivalent. Theories and uses of the body as a site of cultural production and communication in everyday life and more formal performance events.

CMST 4150 Tourism as Communication & Performance (3)

Communication and performance-centered study of contemporary tourism and travel.

CMST 4160 Persuasive Communication (3)

Prereq.: CMST 1061, CMST 2060, CMST 2063 or equivalent. Nature of persuasive communication; the role of message, source and recipient factors in persuasive impact.

CMST 4165 History and Criticism of American Public Address (3)

Prereq.: CMST 2060 or CMST 2063 or CMST 4160. American public address from colonial times to the present; speeches of outstanding American statesmen, lawyers and clergymen and sources of their effectiveness.

CMST 4167 Contemporary Rhetorical Theory (3)

Prereq.: CMST 1061 or CMST 2060 or CMST 4160 or equivalent. Developments in rhetoric from contemporary theoretical and critical perspectives; key concepts in the philosophy of rhetoric.

CMST 4168 Rhetoric and the Arts (3)

Prereq.: CMST 2040, CMST 3041, CMST 3106, CMST 3107 or CMST 3167. The arts as a means of transforming experience and influencing social change.

CMST 4169 Visual Rhetoric (3)

Prereq.: CMST 2060 or CMST 2063. Methodological approaches useful in understanding how images communicate messages and make arguments.

CMST 4200 Practicum in Communication Studies (1-3)

Prereq.: consent of instructor. Pass-fail grading. May be taken for a max. of 3 sem. hrs. of undergraduate credit; no more than a total of 3 sem. hrs. of CMST 2200 and CMST 4200 may be taken for undergraduate credit. May be taken for a max. of 9 sem. hrs. of graduate credit in Communication Studies. Practical experience in major interdepartmental activities outside the classroom under direct faculty supervision.

CMST 4312 Topics in Critical Media Theory and Practice (3)

Prereq.: CMST 2012, CMST 3012, CMST 3107 or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Topics such as “Basic Concepts of Cinema,” “Aesthetics of Film and Video,” and “Cyberculture Theory.”

CMST 4971 Special Topics in Mass Communication (3)

Prereq.: consent of instructor. See MC 4971.

CMST 7900 Introduction to Graduate Study in Communication Studies (3)

Required of all master's students and of doctoral students on advice of their major professors.

CMST 7901 Seminar in Pedagogy for the Communication Classroom (1)

Information and support for first time college teachers; teaching skills; core teaching values and instructional strategies.

CMST 7903 Research Writing in Communication Studies (3)

Required of all graduate students in Communication Studies. Professional development seminar for graduate students in Communication Studies. Emphasis on refining research and writing skills for careers in the discipline.

CMST 7910 Seminar in Interpersonal Communication Theory (3)

Prereq.: CMST 4012 or equivalent. May be taken for a max. of 12 hrs. credit when topic vary. Current theoretical approaches to interpersonal communication, including developmental approaches, cognitive and relational theories.

CMST 7913 Seminar: Communication Theory (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Foundational and contemporary theories in communication.

CMST 7915 Seminar: Research in Communication Theory (3)

Prereq.: CMST 4114 or equivalent. May be taken for a max. of 9 sem. hrs. credit when topics vary. Research literature on advanced topics in communication theory.

CMST 7923 Seminar in Qualitative Research Methods in Communication Studies (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Theoretical and practical considerations of current methods of qualitative research in the discipline.

CMST 7940 Performance Theories and Methods (3)

Survey of theories and methods of twentieth and twenty-first century performance practices in western cultures.

CMST 7941 Seminar: Studies in the History of Performance (3)

Historical development of select Western performance practices outside the institution of theatre; methods of historical research in performance studies.

CMST 7943 Seminar: Performance and Culture (3)

Theories and research exploring the relations between performance and culture central to the field of Performance Studies. Emphasis on two main trajectories: performance as a subject of cultural inquiry and performance as a method of cultural invention.

CMST 7944 Performance and Media (3)

May be taken for a max. of 6 sem. hrs. credit when topics vary. Critical, historical and/or creative research in topics related to media in performance in contexts such as media theatre, film, video, television, Internet and virtual reality.

CMST 7945 Seminar: Contemporary Theories and Research in Performance Studies (3)

May be taken for a max. of 12 hrs. of credit when topics vary. Topics related to solo and group performance of literature; performance theory and criticism; interrelationships of performance and culture; experimental performance forms; qualitative research methods.

CMST 7946 Theory and Performance of Narrative Discourse (3)

Prereq.: CMST 4141, CMST 4142 or equivalent. Narrative theory in literature and performance; rhetoric of narrative discourse.

CMST 7961 Seminar: Evolution of Rhetorical Theory, Classical Period (3)

CMST 7962 Seminar: Rhetorical Criticism (3)

Prereq.: consent of instructor. Types of speech criticism, criteria and measures of effectiveness of public address.

CMST 7966 Problems in Rhetorical Theory, Criticism and History (3)

Prereq.: at least 12 hrs. (four courses) in public address. May be taken for a max. of 12 sem. hrs. of credit when content varies. Selected problem that goes beyond present advanced course offerings in public address; topic to be announced.

CMST 7967 Development of Contemporary Rhetorical Theory (3)

Pivotal questions in contemporary theory from I. A. Richards through postmodernism; future of rhetorical theory and its relationship to the humanities.

CMST 7968 Rhetoric and Public Culture (3)

Scope and function of rhetoric in formation and dissolution of publics and public opinion; the reciprocal influence of rhetoric and culture.

CMST 7969 Visual Culture (3)

May be taken for a max. of 6 sem. hrs. of credit when content varies. Intellectual genealogies, theories of the visual and problems in a visual culture.

CMST 7976 Rhetoric and Aesthetics (3)

The relationship between form and function in rhetorical discourse; the constitutive nature of aesthetics in language and the arts.

CMST 7999 Independent Research in Communication Studies (1-3)

Prereq.: consent of instructor and approval of department chair. May be taken for a max. of 6 sem. hrs. credit. For advanced graduate students to pursue research on special topics.

CMST 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

CMST 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Communication Disorders

COMD 2050 Introduction to Language (3)

This is a General Education course. *Also offered as LING 2050.* Linguistic study of the principal interrelated levels of language structure: phonetics, phonology, morphology, syntax and semantics; related topics such as writing systems and dialects.

COMD 2051 Introduction to Manual Communication (4)

3 hrs. lecture; 2 hrs. lab. Basic linguistic structure, educational and cultural aspects and reading and transmitting messages in manual communication systems; American Sign Language as well as English-based systems.

COMD 2081 Introduction to Communication Disorders (3)

Required initial course for undergraduates concentrating in speech pathology and audiology. Observations in Speech and Hearing Clinic required. Processes involved in speech production; definition, description and incidence of speech and hearing disorders; overview of the profession, including agencies, related professionals, job opportunities, publications, professional associations and certification.

COMD 3057 Research Methods for COMD (3)

Introduction to scientific literature and research methods employed in studies of human communication development and disorders across the lifespan.

COMD 4150 Phonetics (3)

Also offered as LING 4150. Prereq.: COMD 2050. Principles of phonemics; articulatory phonetics; description and classification of sounds; transcription at different levels of detail; production and perception.

COMD 4153 Acoustics of Speech and Hearing (4)

Also offered as LING 4153. Prereq.: COMD 2050 or equivalent. 3 hrs. lecture; 2 hrs. lab. Production, transmission and perception of speech acoustics in communication; acoustic phonetics and psycho-acoustics.

COMD 4190 Introduction to Audiology (3)

Prereq.: COMD 2081 and credit or registration in COMD 4153. Interaction of hearing and speech, effects of hearing loss on speech and language development, types of hearing loss and evaluation processes.

COMD 4250 Anatomy and Physiology of Speech and Hearing (3)

Prereq.: COMD 2050. Functional anatomy of structures associated with speech production and reception.

COMD 4380 Speech and Language Development (4)

Also offered as LING 4380. 3 hrs. lecture; 1 hr. lab. Language acquisition and behavior, language and cognitive development, verbal learning and structural properties of speech; theories of language development in the normal child.

COMD 4381 Basic Articulation Disorders (3)

Prereq.: COMD 2081, COMD 4150. Introduction to articulatory physiology, development, etiology, evaluation and treatment of disorders.

COMD 4382 Basic Language Disorders of Children (3)

Prereq.: COMD 4380 or equivalent and consent of instructor. Differential diagnosis and remediation of major language disorders of children.

COMD 4383 Basic Fluency Disorders (3)

Prereq.: COMD 4381 or equivalent. For clinical practicum take COMD 4683, COMD 4684 or COMD 4685. Stuttering and allied disorders; emphasis on symptomatology, testing, rehabilitation and prevention.

COMD 4490 Audiologic Assessment (3)

Prereq.: COMD 4250, COMD 4190. Practice and application in pure-tone and speech audiometry; middle-ear measurements, differential diagnosis; physiological tests including auditory evoked potentials.

COMD 4590 Auditory Rehabilitation in Children (3)

Prereq.: COMD 4153, COMD 4190. Methods of management including modes of communication, auditory and speech-reading training, amplification issues, early identification and intervention and educational placement.

COMD 4681 Clinical Preparation and Observation Laboratory (1)

For majors in communication sciences and disorders. 2 hrs. lab. Study of clinic rules and procedures, codes of ethics; observation of various types of therapy and evaluation.

COMD 4683 Clinical Practice: Therapeutic Techniques (1-6 each)

Prereq.: credit in course work related to practicum-specific speech, language or hearing disorder. May be taken for a max. of 8 sem. hrs. of credit each. On- and off-campus practica in speech, language and hearing disorders.

COMD 4684 Clinical Practice: Therapeutic Techniques (1-6 each)

Prereq.: credit in course work related to practicum-specific speech, language or hearing disorder. May be taken for a max. of 8 sem. hrs. of credit each. On- and off-campus practica in speech, language and hearing disorders.

COMD 4685 Clinical Practice: Therapeutic Techniques (1-6 each)

Prereq.: credit in course work related to practicum-specific speech, language or hearing disorder. May be taken for a max. of 8 sem. hrs. of credit each. On- and off-campus practica in speech, language and hearing disorders.

COMD 4750 Independent Research in Speech Science or Linguistics (1-3)

Also offered as LING 4750. May be taken for a max. of 3 hrs. of credit. Readings in speech science or linguistics directed by a senior faculty member.

COMD 4751 Special Topics in Communication Disorders (3)

May be taken for a max. of 6 hrs. undergraduate or graduate credit when topics vary.

COMD 4752 Survey of Adult Neurogenic Communication Disorders (3)

Prereq.: COMD 2050. Biopsychosocial model of health provides structure for study of basic neuroanatomy, assessment, treatment and social consequences of adult neurogenic communication disorders.

COMD 4753 Undergraduate Seminar in Speech Perception (3)

Prereq.: COMD 4190. Not for graduate credit. Introduction to problems in speech perception across the human lifespan, in both typical and atypical listeners.

COMD 7153 Research Design in Communication Science and Disorders (3)

Empirical research design problems in speech and hearing; emphasis on measurement validity and reliability.

COMD 7191 Hearing Science (3)

Prereq.: COMD 4250. Auditory transmission and processing from the outer ear to the cortical area; psychophysical phenomena germane to human audition.

COMD 7280 Neuroanatomical Bases of Speech and Hearing (3)

Prereq.: BIOL 2160 and COMD 4250 or equivalent. Study of neuroanatomy and physiology of the central nervous system as it relates to sensory/motor and cognitive processes underlying speech and hearing.

COMD 7381 Language and Learning Disorders (3)

Prereq.: COMD 4382. Language disorders and the communicative aspect of language; current research and treatment models for language intervention; relationship between language and learning; emphasis on school-aged child.

COMD 7382 Voice Disorders (3)

Incidence, etiology, concomitant problems; assessment and management of vocal dysphonias, aphonias and laryngectomees.

COMD 7383 Cleft Palate/Orofacial Disorders (3)

Prereq.: COMD 4250, COMD 4380. Orofacial anatomy, physiology and embryology; etiology and classification of orofacial cleft; surgical, dental, speech, hearing and psychosocial concomitants and their management.

COMD 7384 Early Communicative Intervention (3)

Prereq.: COMD 4382 or equivalent. For clinical practicum, take COMD 7684 or COMD 7685. Cognitive, social, and environmental conditions associated with “high risk” for communicative disorders; intervention approaches (prevention, evaluation, direct stimulation of child-caregiver interactions) and service delivery models (home-based, center-based).

COMD 7385 Neuropathologies of Speech (3)

Prereq.: COMD 4250, COMD 4381 and COMD 7280 or equivalent. Physiological and anatomical bases of dysarthria, apraxia and related speech disorders due to neuropathology in the adult population; emphasis on diagnosis, description and clinical management.

COMD 7387 Aphasia in Adults (3)

Prereq.: COMD 7280 or equivalent and consent of instructor. Neurological bases of aphasia and related disorders; appropriate therapeutic methodologies.

COMD 7390 Industrial Audiology and Hearing Conservation (3)

Audiological practices in industry and hearing conservation programs; professional, technical, business and legal issues.

COMD 7480 Measurement and Diagnosis of Communication Disorders (3)

Psychological and behavioral measurement of communicative functioning and treatment planning for common speech/language disorders.

COMD 7683 Graduate Clinical Practicum (1-6 each)

Prereq.: credit or enrollment in the course dealing with the specific disorder in which practicum is to be taken. May be repeated for credit in order to obtain the clock hours necessary for certification by the American Speech, Language, Hearing Association. Only 6 sem. hrs. of academic credit may be counted toward the degree, although all practicum hours count for professional certification. 2-8 hrs. clinic. On- and off-campus graduate practicum in specific areas (articulation, language, fluency, voice, aural rehabilitation, early intervention, diagnostic audiology, oral-facial anomalies, neurological disorders).

COMD 7684 Graduate Clinical Practicum (1-6 each)

Prereq.: credit or enrollment in the course dealing with the specific disorder in which practicum is to be taken. May be repeated for credit in order to obtain the clock hours necessary for certification by the American Speech, Language, Hearing Association. Only 6 sem. hrs. of academic credit may be counted toward the degree, although all practicum hours count for professional certification. 2-8 hrs. clinic. On- and off-campus graduate practicum in specific areas (articulation, language, fluency, voice, aural rehabilitation, early intervention, diagnostic audiology, oral-facial anomalies, neurological disorders).

COMD 7685 Graduate Clinical Practicum (1-6 each)

Prereq.: credit or enrollment in the course dealing with the specific disorder in which practicum is to be taken. May be repeated for credit in order to obtain the clock hours necessary for certification by the American Speech, Language, Hearing Association. Only 6 sem. hrs. of academic credit may be counted toward the degree, although all practicum hours count for professional certification. 2-8 hrs. clinic. On- and off-campus graduate practicum in specific areas (articulation, language, fluency, voice, aural rehabilitation, early intervention, diagnostic audiology, oral-facial anomalies, neurological disorders).

COMD 7750 Special Topics in Linguistics (3)

Also offered as LING 7750. May be taken two times for credit for the master's degree and four times for the doctorate when topics vary. Topics to be announced.

COMD 7754 Psycholinguistics: Linguistic Perspectives (3)

Also offered as PSYC 7754 and LING 7754. Theories of constituent structure and their application; discourse/semantic principles and their application; speech errors and language universals.

COMD 7756 Independent Research: Phonetics and Linguistics (1-3)

Also offered as LING 7756. Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. For advanced graduate students who wish to pursue research on special problems exclusive of thesis or dissertation.

COMD 7780 Seminar in Communication Disorders (3)

Prereq.: consent of instructor. May be repeated for max of 6 sem. hrs. credit when topics vary. Selected topics in communicative disorders.

COMD 7781 Independent Research: Speech Science (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. For advanced graduate students who wish to pursue research on special problems exclusive of thesis or dissertation.

COMD 7782 Individual Research in Communication Disorders (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. For advanced graduate students who wish to pursue research on special problems exclusive of thesis or dissertation.

COMD 7783 Dysphagia (3)

Prereq.: COMD 4250, COMD 7280. Characteristics, assessment and management of swallowing disorders in children and adults occurring secondary to neurological or structural deficits.

COMD 7880 Advanced Seminar in Language Disorders (3)

May be taken for max 6 sem. hrs. credit when topics vary. Theory, contemporary issues and research related to language disorders as a method of inquiry and intervention; evaluation of research methodology.

COMD 7882 Advanced Individual Research in Communication Science and Disorders (1-6)

Prereq.: admission to PhD program and consent of instructor. May be taken for a max. of 6 hrs. of credit. Research topics ancillary or extraneous to dissertation research.

COMD 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

COMD 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Comparative Literature

CPLT 2201 Introduction to World Literary Traditions (3)

This is a General Education course. *Also offered as ENGL 2201.* Study of the world's most influential literary classics in Western and non-Western traditions from beginnings to 1650; emphasis on reading and writing about literature.

CPLT 2202 Introduction to Modern World Literature (3)

This is a General Education course. *Also offered as ENGL 2202.* Overview of the literature of the world from 1650 to the present day; introduction of the concept and theory of world literature.

CPLT 7010 Research Methods and Bibliography (3)

Instruction in methods of research; specific projects in bibliography geared toward scholarship in comparative literature.

CPLT 7020 History and Theory of Criticism (3)

Historical survey of major works in literary theory from the classical through the modern period designed to ground subsequent work in criticism.

CPLT 7120 Topics in Theory of Criticism (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Study of a particular school of critical thought as it applies to specifically comparative literary scholarship.

CPLT 7130 Topics in Comparative Literature (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Basic techniques of studying a literary topic through the comparative method; examples taken from different national literary traditions.

CPLT 7140 Topics in the Interdisciplinary Study of Literature (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Relationship between literature and other domains, such as art, religion and film.

CPLT 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

CPLT 8900 Independent Study (1-3)

May be taken for a max. of 3 hrs. in the master's program and 9 hrs. in the doctoral program.

CPLT 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Computer Science

CSC 1100 Computers in Society (3)

Prereq.: credit in MATH 1021 or registration in MATH 1023. Credit will not be given for this course and ISDS 1100 or ISDS 1101 or ISDS 1102 or LIS 2001 or EXST 2000. 2 hrs. lecture; 2 hrs. lab. Introduction to computers, their applications and impact on people and social institutions; the Internet, e-mail, news groups, ftp, telnet, World Wide Web, multimedia, word processing, spreadsheets, databases.

CSC 1200 Ethics in Computing (1)

Prereq.: credit or registration in CSC 1253 or CSC 1350; credit or registration in ENGL 1001, ENGL 1005 or HNRS 2000. For majors only. Introduction to ethics theory, ethical decision-making as it relates to the computing professional, licensing, intellectual property, conflicts of interest, freedom of information and privacy, security.

CSC 1240 Statistics and Graphics with MATLAB (3)

This is a General Education course. *Prereq.: MATH 1021 or placement in MATH 1022, MATH 1023, MATH 1431, MATH 1550 or MATH 1551. Credit will not be given for both this course and CSC 2262 or CSC 2533 or OCS 2011. Not for degree credit for computer science majors. 2 hrs. lecture; 2 hrs. lab.* Introduction to MATLAB programming with applications in statistics and graphics.

CSC 1250 Introduction to Programming (3)

Credit will not be given for this course and CSC 1253 or CSC 1350. Fundamentals of problem solving, program design, algorithms and programming using a high-level language.

CSC 1253 Computer Science I with C++ (3)

Prereq.: credit or registration in MATH 1550 or credit in MATH 1431. Credit will not be given for both this course and CSC 1250 or CSC 1350. Fundamentals of algorithm development, program design and structured programming using an object-oriented language.

CSC 1254 Computer Science II with C++ (3)

Prereq.: CSC 1253; credit or registration in MATH 1550. Credit will not be given for both this course and CSC 1351. Develops solutions to problems using an object-oriented approach and emphasizes the concepts of recursion; dynamic memory; data structures (lists, stacks, queues, trees); exception handling.

CSC 1350 Computer Science I for Majors (4)

Prereq.: credit or registration in MATH 1550. Credit will not be given for both this course and CSC 1250 or CSC 1253. 3 hrs. lecture; 3 hrs. lab. Fundamentals of algorithm development, program design and structured programming using an object-oriented language.

CSC 1351 Computer Science II for Majors (4)

Prereq.: CSC 1350; credit or registration in MATH 1550. Credit will not be given for both this course and CSC 1254. 3 hrs. lecture; 3 hrs. lab. Develops solutions to problems using an object-oriented approach and emphasizes the concepts of recursion; dynamic memory; data structures (lists, stacks, queues, trees); exception handling.

CSC 2259 Discrete Structures (3)

Prereq.: credit or registration in CSC 1254 or CSC 1351 and MATH 1552. Set algebra including mappings and relations; algebraic structures including semigroups and groups; elements of the theory of directed and undirected graphs; Boolean algebra and propositional logic; these structures applied to various areas of computer science.

CSC 2262 Numerical Methods (3)

Prereq.: MATH 1552 and CSC 1254 or CSC 1351. Credit will be given for only one of the following: CSC 1240, 2262, CSC 2533 or IE 2060. Computer-oriented methods for solving numerical problems in science and engineering; numerical solutions to systems of simultaneous linear equations, nonlinear algebraic equations (root solving), differentiation and integration, ordinary differential equations, interpolation and curve fitting.

CSC 2463 Programming Digital Media (3)

Prereq.: MATH 1021; credit or registration in CSC 1253, CSC 1350, or IE 2060 or ART 2050 or MUS 2732 or permission of instructor. Programming concepts motivated by digital media applications: real-time graphics, audio processing, simple hardware devices, integration of technologies into interactive systems.

CSC 2533 Introduction to Engineering Computation (3)

Also offered as ME 2533. Prereq.: MATH 1550. Credit will not be given for both this course and CSC 1240 or CSC 2262 or OCS 2011. 2 hrs. lecture; 3 hrs. lab. Problem solving techniques and structured programming tools for engineering synthesis and analysis; application of symbolic solvers and technical computing toolkits.

CSC 2610 Cloud Fundamentals & Web Programming (3)

Prereq.: CSC 1254 or CSC 1351 or ISDS 3107. Characteristics, theory and fundamentals of cloud computing and related technologies; cloud types, services and architectures; principles of application protocols and collaborative web platforms; applications in the areas of mobile and social computing; lightweight programming models; socket programming.

CSC 2700 Special Topics in Computer Science (1-3)

Prereq.: CSC 1254 or CSC 1351 or permission of department. May be taken for a max. of 6 hrs. of credit when topics vary. Total credit earned in CSC 2700 and CSC 4700 should not exceed 9 hrs. Specialized areas of current interest in computer science.

CSC 2730 Data Science and Analytics (3)

Prereq.: CSC 1254 or CSC 1351 or ISDS 3107. Effective and efficient strategies for data capture; the relational database model, queries, and web programming; data mining and data warehousing process; descriptive statistics and visualization techniques; introduction to computational analysis and multidimensional analysis.

CSC 3102 Advanced Data Structures and Algorithm Analysis (3)

Prereq.: CSC 1254 or CSC 1351 and credit or concurrent enrollment in CSC 2259 or EE 2740. Description and utilization of formal ADT representations, especially those on lists, sets and graphs; time and space analysis of recursive and nonrecursive algorithms, including graph and sorting algorithms; algorithm design techniques.

CSC 3380 Object Oriented Design (3)

Prereq.: CSC 1254 or CSC 1351. Advanced object oriented software development; emphasis on the use of the unified modeling language as a design tool.

CSC 3501 Computer Organization and Design (3)

Prereq.: CSC 2259. Credit will not be given for both this course and EE 3752 or EE 3755. Computer arithmetic, design of high-speed adders and multipliers, CPU concepts, instruction fetching and decoding, hardwired control, microprogramming control, main memory, I/O organization, assembly language programming techniques, CPU instruction sets and addressing modes.

CSC 3991 HONORS: Undergraduate Research in Computer Science (3)

Prereq.: CSC 3102; consent of department; admittance to Upper Division Honors Program. Individual research on problems in computer science.

CSC 3992 HONORS: Undergraduate Thesis in Computer Science (3)

Prereq.: CSC 3991; consent of department; admittance to Upper Division Honors Program. Writing and formal defense of a research thesis in computer science. Defense committee of three faculty members must be approved by department.

CSC 3999 Independent Undergraduate Research (1-3)

Prereq.: consent of department chair. May be taken for a max. of 4 hrs. of credit. Individual readings, conferences and program development in computer science.

CSC 4101 Programming Languages (3)

Prereq.: CSC 3102. Principles of programming language design; specification of syntax and semantics; underlying implementation of block structured languages; dynamic memory allocation for strings, lists and arrays; imperative versus applicative programming; logic programming; modern programming languages.

CSC 4103 Operating Systems (3)

Prereq.: CSC 3102. Design techniques, process management, processor scheduling; deadlocks, memory management, secondary memory management, file management; I/O systems, Unix systems.

CSC 4243 Interface Design and Technology (3)

Prereq.: CSC 1253 or CSC 1350 or equivalent programming background. Human-computer interaction provides the bridges across which humans engage with computation. An overview and experience with the design of such interfaces. Programming and design projects employing both traditional graphical interfaces; handheld graphical interfaces; and tangible and embedded interfaces. All programming in Java languages.

CSC 4263 Video Game Design (3)

Prereq.: ART 2050 or CSC 3102 or MUS 2732 or permission of instructor. The essentials of video game design and implementation, including planning, graphics, sound, programming and testing. Focus is on a semester-long, small-team, interdisciplinary project to develop and present a complete full-featured game.

CSC 4304 Systems Programming (3)

Prereq.: CSC 4103. Batch process systems programs, their components, operating characteristics, user services and limitations; implementation techniques for parallel processing of input-output and interrupt handling; overall structure of multiprogramming systems on multiprocessor hardware configurations; addressing techniques, core management, file system design and management, system accounting and other user-related services; traffic control, interprocess communication, design of system modules and interfaces; system updating, documentation and operation.

CSC 4330 Software Systems Development (3)

Prereq.: CSC 3102, CSC 3380. Software requirements analysis; design representation, programming methodologies; verification, validation, maintenance and software planning.

CSC 4351 Compiler Construction (3)

Prereq.: CSC 4101 or equivalent. Program language structures, translation, loading, execution and storage allocation; compilation of simple expressions and statements; organization of compiler including compile-time and run-time symbol tables, lexical scan, syntax scan, object code generation, error diagnostics, object code optimization techniques and overall design; use of compiler writing languages and bootstrapping.

CSC 4356 Interactive Computer Graphics (3)

See ME 4573.

CSC 4357 Applied Computer Graphics (3)

See ME 4583.

CSC 4370 Software Modeling Techniques (3)

Prereq.: CSC 4330. Examination of modern modeling techniques for complex/high quality software including static/dynamic software models and project management models.

CSC 4402 Introduction to Database Management Systems (3)

Prereq.: CSC 3102. Network, hierarchical, relational and entity-relationship models; data definition, manipulation languages and conversion among these models; relational database design theory, efficient query evaluation, elementary query optimization techniques.

CSC 4444 Artificial Intelligence (3)

Prereq.: CSC 3102. Theorem proving and inferencing techniques, production systems, knowledge representation, approximate reasoning, nonmonotonic reasoning, natural language understanding, scene analysis, planning, game playing and learning.

CSC 4501 Computer Networks (3)

Prereq.: CSC 3102. Introduction to local, metropolitan and wide area networks using the standard OSI reference model as a framework; introduction to the Internet protocol suite and network tools and programming; discussion of various networking technologies.

CSC 4512 Optimization: Modeling Approaches, Algorithms and Applications (3)

Prereq.: MATH 2085 or MATH 2090 or permission of instructor. Optimization as a modeling tool with emphasis on modeling approaches, fundamental algorithms and applications in many diverse domains.

CSC 4610 Cloud Systems and Virtualization (3)

Prereq.: CSC 2610, CSC 4103, and credit or registration in CSC 4501. Advanced problems and challenges in defining, developing, and building a cloud system; virtualization; open source computing; provisioning; fairness, reliability, security, and monitoring.

CSC 4700 Special Topics in Computer Science (3)

Prereq.: CSC 3102 or permission of department. May be taken for a max. of 9 cr. hrs. when topics vary. Total hrs. earned in CSC 2700 and 4700 should not exceed 9 hrs. Specialized areas of current interest in computer science.

CSC 4740 Big Data Technologies (3)

Prereq.: CSC 2730. Advanced analytics and management techniques applied to large-scale datasets; Hadoop/MapReduce, NoSQL and cloud technologies; applied data mining techniques; applications to social, web and mobile data, and bioinformatics.

CSC 4890 Introduction to Theory of Computation (3)

Prereq.: CSC 2259. Introduction to finite automata, regular expressions and languages; push-down automata and context-free languages; selected advanced language theoretical topics; emphasis on technique.

CSC 4999 Advanced Independent Undergraduate Research (1-3)

Prereq.: consent of department chair. May be taken for a max. of 4 hrs. of credit. Individual readings, conferences and program development in computer science.

CSC 7080 Computer Architecture (3)

Background in electronics not required. Functional architecture of modern digital computer systems; detailed description of instruction set implementation with monoprocessor and multiprocessor structures; design and analysis of instruction sets and control structures.

CSC 7101 Programming Language Structures (3)

Prereq.: CSC 4101. Advanced study of data specification, storage management and control in programming languages; includes coverage of formal specification languages; languages for concurrent processing; languages that support program verification techniques; and in-depth study of applicative languages.

CSC 7103 Advanced Operating Systems (3)

Prereq.: CSC 4103. Concurrent programming: shared memory, communication and operation-oriented models; concurrent,

distributed and network programming; distributed operating systems; synchronization and deadlock detection in distributed systems.

CSC 7135 Software Engineering (3)

Prereq.: CSC 4330 or equivalent. Formal specification techniques, design techniques, abstraction, information hiding, modularity, software testing, automated testing tools, maintainability factors and cost estimation.

CSC 7150 Program Analysis and Model Checking (3)

Prereq.: CSC 4890 or CSC 7101 or equivalent. Automata on infinite objects; Buechi Automata; Muller Automata; Rabin Automata; safety and liveness properties; linear temporal logic (LTL), from LTL to automata; branching time logics; Knaster-Tarski fixpoint theorem; abstract interpretation.

CSC 7300 Algorithm Design and Analysis (3)

Characteristics of an algorithm; problems of algorithm existence; the design, implementation and complexity of algorithms; algorithm case studies.

CSC 7333 Machine Learning (3)

Prereq.: CSC 4444. Fundamental principles of machine learning; inductive learning; explanation-based learning; computational approach to Boolean function learning; learning formal languages and recursive theories; neural network learning and genetic algorithms; applications of machine learning.

CSC 7351 Advanced Compiler Design Theory (3)

Prereq.: CSC 4351 or equivalent. Automatic generation of LL (1), LR (1), LALR (1) parsers, syntax directed translation of high-level control structures, error recovery, optimization of branching, local code optimization using directed acyclic graphs, loop optimization, global data flow analysis and object-code optimization.

CSC 7375 Robot Vision (3)

Prereq.: CSC 3102 or equivalent and CSC 7300. Computational aspects of vision; utilization of techniques from computational geometry, combinatorics, probability theory and artificial intelligence; visual recognition and classification.

CSC 7402 Data Base Management Systems (3)

Prereq.: CSC 4402. Implementation of database systems (physical model and its mapping to conceptual model); data structures and their influence on performance, concurrency control, distributed databases; advanced database systems.

CSC 7442 Data Mining and Knowledge Discovery (3)

Prereq.: CSC 7333. Introduction to data mining and knowledge discovery in databases; data cleaning, statistical techniques, association rule learning; time series and spatial data mining algorithms, clustering algorithms, data visualization.

CSC 7443 Scientific Information Visualization (3)

Prereq.: CSC 7300 or equivalent. Study of computer visualization principles, techniques and tools used for explaining and understanding information; includes visualization algorithms, techniques and applications.

CSC 7444 Advanced Artificial Intelligence (3)

Prereq.: CSC 4444. Temporal and nonmonotonic logic; truth maintenance systems; probabilistic reasoning; deductive databases; automated learning, planning and tutoring; story understanding; structure of domain dependent expert systems.

CSC 7481 Information Retrieval Systems (3)

Also offered as LIS 7610. Prereq.: CSC 3102 or equivalent. Topics include commercially available retrieval systems, text content analysis, query processing models and current research problems.

CSC 7540 Distributed Systems (3)

Prereq.: CSC 4103. Networking and inter-networking; client-server model; remote procedure calls; processes and processors in distributed systems; distributed file systems; transaction-processing techniques; and distributed systems for high performance computing.

CSC 7600 High Performance Computing I (3)

Prereq.: consent of instructor. Fundamental computational techniques required for scientific computing; important algorithms for parallel computation; high performance computing.

CSC 7601 Design Issues in High-Speed Networks: Multicast, Pricing and Control (3)

Prereq.: CSC 4501. Multicasting architectures, protocols and applications; ATM and Internet solutions; scalable reliable multicast; distributed sensor networks; Internet pricing and economics of communication; game theoretic approaches to congestion control.

CSC 7602 Wireless Networks (3)

Prereq.: CSC 4501. Radio systems and ad-hoc wireless networks; relevant concepts in terms of mobility, migration and service levels and their impact on system design; wireless network communication; packet radio techniques; ad-hoc networks; nomadic computing; issues in cellular networks; TCP/IP over wireless.

CSC 7700 Special Topics in Computer Science (3)

May be taken for a max. of 12 hrs. of credit when topics vary. Specialized areas of current interest in computer science.

CSC 7701 Sensor Networking Concepts (3)

Prereq.: CSC 4501. Self-organizing sensor networks; querying, and data aggregation; routing; energy-efficient communication protocols; sensor network security.

CSC 7800 Computer Science Research Seminar (1)

Pass-fail grading. May be taken for a max. of 2 hrs. of credit when topics vary. Student presentations and discussions on research topics in computer science.

CSC 7999 Selected Readings in Computer Science (1-3)

Prereq.: consent of department chair. May be taken for a max. of 6 sem. hrs. of credit.

CSC 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Disaster Science & Management

DSM 2000 Hazards, Disasters and the Environment (3)

Also offered as GEOG 2000. Exploration of the interaction processes between natural/technical hazards and society that cause disasters; introduction to the natural and technological hazards and disasters; hazards and disaster management; environmental considerations and impacts.

DSM 2010 Fundamentals of Emergency Management (3)

Introduction and overview of emergency management functions and processes in federal, state and local governments; roles of nonprofit and private organizations in disaster planning, response and recovery; critical management issues in effective response and recovery to natural and man made hazards.

DSM 2020 Terrorism and Counter-Terrorism (3)

Terrorism and its origins; consequences of modern terrorist attacks and campaigns; ideological and religious justifications for terrorism; domestic versus international terrorist networks; state sponsored terrorism; factors contributing to the successful preemption and disruption of terrorist attacks and networks.

DSM 3200 Technology and Emergency Management (3)

Application of technology that may be applied in emergency planning, response, recovery and mitigation; current and emerging technology applications; special issues and problems associated with the use of technology in emergency management.

DSM 3900 Disaster Science and Management Internship (3)

Prereq.: DSM 2000 and junior standing. Written consent of DSM program coordinator and supervising faculty member. Faculty supervised field study with an agency or organization whose mission is considered relevant to the emergency management system or disaster planning, response or mitigation.

DSM 3910 Hazards Seminar (1)

Prereq.: DSM 2000 and junior standing. May be repeated for a max. of 3 sem. hrs. when topics vary. Guest speakers and presentation of reports and discussion with students and faculty concerning a broad range of issues, problems and topics related to disasters and emergency management.

DSM 4000 Disaster Science and Management Senior Seminar (3)

Prereq.: DSM 2000, DSM 2010 and 6 hours of additional DSM elective upper level courses or by permission of the instructor or program director. Examines, with community partners, the nature and impacts of disasters; explores individual, community and organizational strategies to mitigate the economic, social cultural, ecological or physical impacts of disasters and enhance resilience at a local, regional or national scale.

DSM 4013 Disaster Anthropology (3)

Also offered as ANTH 4013. Prereq.: 3 hrs. of DSM core courses or approved electives. Anthropological and interdisciplinary study of disasters that includes individual cultural identity issues, cross-cultural and multicultural approaches to planning, mitigation, response and recovery.

DSM 4600 Crisis Management (3)

Also offered as MGT 4600. Introduction to crisis management as it is applied in public, private and non-profit organizations; crisis management is a function of all organizations and supports strategic goals of ensuring survivability, economic viability and organizational continuity.

DSM 4900 Research in Disaster Science and Management (3)

Prereq.: SOCL 2211 or equivalent and 12 hrs. of course work including DSM 2000 and core courses in the disaster science management concentration or minor; consent of instructor.

DSM 4996 Directed Readings in Disaster Science and Management (1-3)

Prereq.: consent of instructor. May be repeated for a max. of 6 sem. hrs. when topics vary. For students with at least junior standing and 12 hrs. of coursework including DSM 2000 in the disaster science management concentration or minor.

DSM 7000 Policies and Practices of Emergency Management (3)

The evolution of hazard and disaster policies and emergency management organizational practices and their economic, social and environmental impacts; the impacts of natural and man-made hazard and disaster policies, and issues in the public, private and non-profit sectors.

DSM 7910 Disaster Science and Management Seminar (1)

May be repeated for a max. of 2 sem. hrs. of credit as sessions vary for fall and spring semesters. Reports and discussions with students and faculty concerning a broad range of issues, problems and topics related to natural and man-made hazards, disasters and emergency management.

Economics

ECON 2000 Principles of Microeconomics (3)

[LCCN: CECN 2223, Microeconomics] **This is a General Education course.** *An honors course, ECON 2001, is also available. Credit will not be given for both this course and ECON 2001 or ECON 2030.* Study of how households and firms make decisions and how they interact in specific markets; theories of production price determination, trade, externalities and public goods.

ECON 2001 HONORS: Principles of Microeconomics (3)

This is a General Education course. *Same as ECON 2000, with special honors emphasis for qualified students. Credit will not be given for this course and ECON 2000.*

ECON 2010 Principles of Macroeconomics (3)

[LCCN: CECN 2213, Macroeconomics] **This is a General Education course.** *An honors course, ECON 2011, is also available. Credit will not be given for both this course and ECON 2011 or ECON 2030. Prereq.: ECON 2000 or ECON 2001.* Study of economy-wide phenomena, including inflation, unemployment, the monetary system, economic growth, international trade and finance.

ECON 2011 HONORS: Principles of Macroeconomics (3)

This is a General Education course. Same as ECON 2010, with special honors emphasis for qualified students. Credit will not be given for this course and ECON 2010.

ECON 2030 Economic Principles (3)

[LCCN: CECN 2113, Economic Principles] This is a General Education course. An honors course, ECON 2031, is also available. Credit will not be given for both this course and ECON 2000 or ECON 2010 or ECON 2031. Economic understanding of both micro- and macro-economic principles; problems associated with monetary policy, fiscal policy, public finance, government and business, labor, international trade, economic growth and comparative economic systems.

ECON 2031 HONORS: Economic Principles (3)

This is a General Education course. Same as ECON 2030, with special honors emphasis for qualified students. Credit will not be given for this course and ECON 2030.

ECON 2035 Money, Banking and Macroeconomic Activity (3)

[LCCN: CECN 2313, Money, Banking & the Economy (Upper Level)] An honors course, ECON 2036, is also available. Credit will not be given for both this course and ECON 2036. Prereq.: ECON 2000 or ECON 2001 and ECON 2010 or ECON 2011 or ECON 2030. Role of commercial banks, other financial institutions and the central bank in affecting the performance of the economy; relationships of money and fiscal policy to prices, production, and employment; internal and external effects of U.S. fiscal and monetary policy.

ECON 2036 HONORS: Money, Banking and Macroeconomic Activity (3)

Same as ECON 2035, with special honors emphasis for qualified students. Credit will not be given for this course and ECON 2035.

ECON 3999 Independent Study: Economic Problems (1-3)

May be taken for credit for a max. of 6 sem. hrs. For undergraduate students with a grade point average of 3.00 or above. Independent economic research and study under the direction of a faculty member.

ECON 4070 Economic Growth (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Analysis of the determinants of economic growth through development of theoretical and empirical models of economic growth; discussion of both old and new growth theory and convergence of income levels across countries.

ECON 4075 American Economic History to 1860 (3)

See HIST 4075.

ECON 4076 American Economic History: 1860 to the Present (3)

See HIST 4076.

ECON 4110 Public Finance (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Economic theory applied to the private market and to the public sector; public goods, efficiency, voting, externalities, principles of taxation, benefit-cost analysis and policy analyses of current issues.

ECON 4120 Federal, State and Local Taxation (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Administration, fiscal importance and economic effects of federal, state and local taxes; emphasis on recent trends in taxation at each level of government and on significance of these trends for individuals and the nation.

ECON 4130 Urban and Regional Economics (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Economic analysis of the location and growth of urban and regional areas; emphasis on public policy issues; land-use patterns, measurement and change in regional economic activity and urban problems such as transportation, housing and poverty.

ECON 4220 Wage and Employment Analysis (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. The labor market; labor supply and demand, human capital, racial and sex discrimination, effects of minimum wage laws, causes of various wage and employment differentials.

ECON 4290 Sports Economics (3)

Also offered as KIN 4290. Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Microeconomic principles used to examine the sports industry; topics include sports leagues and organizations, revenue sharing, ticket pricing, advertising and broadcasting rights, competitive balance, antitrust policy, image and integrity, economic impact of sporting events, and other aspects.

ECON 4320 Environmental Economics (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Market failure and government failure, benefit cost analysis, the economics of energy, the efficient allocation of pollution, stationary and mobile source air pollution, water pollution and toxic wastes.

ECON 4325 Applied Resource Economics (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Analysis of environmental and resource problems; cost-benefit and other empirical techniques used to examine these problems.

ECON 4400 Industrial Organization and Public Policy (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Theory of the firm, perfect competition, monopoly, collusion and collusive strategies, strategic interaction, auctions, durable goods, predation, antitrust and experimental economics.

ECON 4421 Health Care Economics (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Economics of health care with particular emphasis on hospitals, physicians and other health care providers, as well as government programs.

ECON 4445 Internship in Economics (3)

Prereq.: consent of instructor. Pass-fail grading. On-the-job experience in approved positions with economic content.

ECON 4520 International Trade (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Introduction to the basic theories of international trade including classical, neoclassical and post-neoclassical theories; discussion on how these theories relate to current economic events and policies; brief overview of major U.S. trade law; overview and analysis of major bilateral and multilateral trading agreements including the North American Free Trade Agreement, the European Union and the World Trade Organization.

ECON 4530 The Chinese Economy (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Review of the history of the economy in China; major governmental policies in China that have shaped the growth and development of the Chinese economy; the development of the manufacturing and industrial sectors; China's role in the international trade and financial markets.

ECON 4550 International Finance (3)

Prereq.: ECON 2035 or equivalent. Exchange rates and the foreign exchange market; exchange rate determination in the short run and in the long run; alternative international currency systems, macroeconomic policy coordination under fixed and floating exchange rates.

ECON 4560 Central Banking and Monetary Policy (3)

Prereq.: ECON 2035. History, economic functions, operating techniques and policies of central banks; the role of monetary policy in promoting economic stability and growth; the Federal Reserve System and current problems of monetary policy and control.

ECON 4610 Introduction to Mathematical Economics (3)

Prereq.: ECON 2000 and ECON 2010, or ECON 2030; and college algebra or equivalent. Not normally open to students who have had differential calculus. Mathematical techniques used by economists; their application to economic analysis.

ECON 4620 Game Theory and Applications (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Methods to analyze optimal or strategic behavior in situations with multiple interactive decision makers. Topics range from the formal analysis of parlor games, cold war, auctions, voting behavior to pricing decisions of firms.

ECON 4630 Introduction to Econometrics (3)

Prereq.: ECON 2000 or ECON 2001 and ECON 2010 or ECON 2011, or ECON 2030 or ECON 2031; MATH 1431 or MATH 1550; and ISDS 2000 or ISDS 2010 or EXST 2201 Not open to students with credit in ECON 7630. For students interested in a basic knowledge of econometrics. Techniques of econometrics; estimating the basic linear model and hypothesis testing; empirical illustrations by reference to contemporary economic questions.

ECON 4631 Econometric Methods (3)

Prereq.: ECON 4630. Applications of econometric methods; treatment of heteroskedacity, autocorellation, and generalized least squares; the use of instrumental variables and two-stage least squares for models with endogeneity, simultaneous equations, regression using time-series data, the analysis of panel data, binary and multinomial choice models, and models for simple selection.

ECON 4633 Time Series Data Analysis (3)

Prereq.: ECON 4630. Applications of methods used in business and economic forecasting; economic and financial time-series modeling, regression analysis and combination forecasting.

ECON 4710 Aggregate Economic Analysis (3)

Prereq.: ECON 2035 or equivalent. The focus is on the factors determining the aggregate level of national income, employment and prices; models of business cycles and long-run growth are developed and compared and the macroeconomic effects of monetary and fiscal policy are analyzed.

ECON 4720 Intermediate Microeconomic Theory (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. Price determination, resource allocation and pricing in a market economy.

ECON 4900 Selected Topics in Economics (3)

Prereq.: ECON 2000 and ECON 2010; or ECON 2030. May be taken for a max. of 6 sem. hrs. when topics vary.

ECON 5600 Microeconomic Theory for Policy Analysis (3)

Also offered as PADM 5600.

ECON 7070 Theory of Economic Growth (3)

Prereq.: ECON 7715. Theories of economic growth and their development.

ECON 7130 Public Finance Theory (3)

Foundations of welfare economics for evaluating efficiency and equity of taxation and public spending policies; incidence and optimality of taxation.

ECON 7240 Seminar in Labor Economics (3)

Theoretical and empirical effects of trade unions and other labor organizations on individuals, firms, government policies and the economy.

ECON 7250 Wage and Employment Analysis (3)

Neoclassical wage and employment theory and its application to the labor market; labor force participation rates; discrimination; labor markets, human capital, the inflation-unemployment trade-off.

ECON 7320 Seminar in Environmental and Resource Economics (3)

Neoclassical and bio-economic tradition of resource utilization; emphasis on biophysical underpinnings of economics drawing from thermodynamics, ecology, geology and demography; ethical issues of stewardship in resource management; topical policy issues in energy, materials, food and air and water pollution.

ECON 7325 Applied Resource Economics (3)

Application of property rights, externalities and benefit-cost analysis to resource management; measurement problems; intertemporal allocation, technical changes and resources substitution; and utilization of environmental resources.

ECON 7420 Health Care Economics (3)

Prereq.: ECON 4720 or equivalent. Economics of health care with particular emphasis on demand and supply of health care services; roles of insurance and government in provision of health care services.

ECON 7480 Seminar in Industrial Organization (3)

Organization of industry in the American economy; empirical and analytical techniques used to investigate structure and performance in the manufacturing sector of the economy.

ECON 7580 Seminar in Economic Development (3)

Prereq.: consent of instructor. Third World development from neoclassical, neomarxist and neomalthusian perspectives.

ECON 7590 Seminar in Monetary and Fiscal Policy (3)

Prereq.: ECON 7710 and ECON 7630. Determining, implementing and evaluating monetary and fiscal policy; effect on the economy, monetary targets and indicators; role of interest rates in understanding monetary policy, sectoral impacts of monetary policy; role of fiscal policy in the economy.

ECON 7610 Mathematics for Economists (3)

Mathematical principles with frequent applications to economics; functions, derivatives, differentials, integrals, Taylor's series, matrix algebra, determinants, roots, quadratic forms, constrained and unconstrained optimizations and principles of linear and nonlinear equation systems.

ECON 7615 Dynamic Analysis (3)

Prereq.: ECON 7610 or calculus and linear algebra. Mathematical analysis of dynamic systems with applications to economics; integral calculus, differential equations, difference equations and optimal control theory.

ECON 7630 Econometric Methods (3)

Prereq.: calculus and linear algebra or concurrent enrollment in ECON 7610. For students interested in developing research skills in econometrics. Probability theory; distributions of random variables and their properties; mathematical expectation; estimation using method of moments, least squares, maximum likelihood; Bayesian methods; asymptotic theory; numerical optimization and simulation; bootstrapping; hypothesis testing.

ECON 7631 Econometric Methods II (3)

Prereq.: ECON 7630 or equivalent. Econometric techniques of regression; heteroskedasticity; regression with time series data; autocorrelation; random regressors and moment based estimation; instrumental variables; generalized method of moments and systems of equations.

ECON 7632 Microeconometrics (3)

Prereq.: ECON 7631 and either ECON 7610 or differential calculus and linear algebra. Emphasis on the analysis of models for panel data; fixed and random effects and dynamic panels; models for qualitative, choice, and count data; models for limited or partially observed dependent variables.

ECON 7633 Dynamic Econometric Theory (3)

Prereq.: ECON 7631. Time-series analysis; testing and model selection; distributed lags; dynamic properties of simultaneous equation model; autoregressive and moving average process; nonstationarity; autoregressive conditional heteroskedasticity; causality and exogeneity; unit root, cointegration and error correction.

ECON 7700 Price Theory I (3)

Development of microeconomic models of the individual firm, including a nonmathematical approach.

ECON 7710 Macroeconomics I (3)

Basic models of income, employment and prices. The models focus on aggregate demand and supply sectors and include an aggregate demand-supply model in which IS-LM underlies aggregate demand, an introduction to the new Keynesian/new Neoclassical synthesis model and an introduction to growth theory.

ECON 7715 Macroeconomics II (3)

Prereq.: ECON 7710 and ECON 7610 or equivalent. Dynamic models of the economy; includes growth models, business cycle dynamics and wage-price dynamics.

ECON 7720 Price Theory II (3)

Prereq.: ECON 7610 or equivalent. Theories of utility, demand, cost, production, factor pricing and welfare using an advanced mathematical approach.

ECON 7725 Advanced Microeconomic Theory (3)

Prereq.: ECON 7610, ECON 7700 and ECON 7720 or equivalent. Advanced price theory; capital theory, general equilibrium, distribution theory, market structures.

ECON 7735 Macroeconomics III (3)

Prereq.: ECON 7715 and ECON 7630. Advanced dynamic general equilibrium models; includes recursive methods, real business cycle models, new-Keynesian economics, asset pricing models, endogenous growth theories and empirical tests of these models.

ECON 7799 Seminar in Advanced Economic Problems (3)

May be taken for a max. of 6 hrs. of credit.

ECON 8900 Pre-dissertation Research (1-9)

Pass-fail grading. May be repeated for credit.

ECON 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Curriculum & Instruction

EDCI 1000 Introduction to the Study of Education (3)

Field experience in multicultural settings in secondary schools. Credit will not be given for both this course and MUED 1000. Historical foundations, organization and administration of American public education.

EDCI 1001 Introduction to College Study (3)

Intended for entering freshmen. College-level readings and techniques for organizing text and lecture information for effective study; critical thinking and reading; time management; preparation for tests.

EDCI 2001 Education, Schooling and Society (3)

This is a General Education course. Introduction to contemporary educational issues, especially as these are situated historically, culturally, socially and politically; topics include history, theory and politics of education, especially as related to gender, race, class and technology.

EDCI 2030 Teaching, Schooling and Society (3)

Prereq.: admission to Grades PK-3 or 1-5 teacher certification program. 2 hrs. lecture; 2 hrs. field experience in elementary schools. Experiences that join theory to practice; teaching as it operates in elementary school culture; a reflective approach to pedagogy; discussions of teaching in the historical and philosophical dimensions of discourse/practice.

EDCI 2045 Principles and Practices in K-12 Programs (4)

Prereq.: EDCI 1000 and enrollment in a program leading to teacher certification in grades K-12. Credit will not be given for both this course and MUED 2045. 3 hrs. lecture; 2 hrs. lab/field experience in multicultural settings. Managerial aspects of instruction; application of learning principles to the classroom setting.

EDCI 2081 PK-3 Program Overview (2)

Pass-fail grading. 1 hr. lecture; 2 hrs. field experience. The nature of PK-3 instruction and expectations of the PK-3 teacher education program.

EDCI 2083 Introduction to Early Childhood Education (3)

An introduction to the field of early childhood education (ECE), encompassing the years from birth through age eight.

EDCI 2271 Art Education for Elementary Schools (3)

2 hrs. lecture; 2 hrs. lab. Critical analysis and evaluation of past and present concepts of art education; development of a functional art program for elementary schools in Louisiana; art materials, techniques and activities recommended for elementary school grades.

EDCI 2272 Art Education for Elementary Schools (3)

Prereq.: ART 2271 is prerequisite for 2272. 2 hrs. lecture; 2 hrs. lab. Critical analysis and evaluation of past and present concepts of art education; development of a functional art program for elementary schools in Louisiana; art materials, techniques and activities recommended for elementary school grades.

EDCI 2400 Education and Diverse Populations (3)

Prereq.: admission to 1-5 teacher education certification program. 2 hrs. lecture; 2 hrs. lab/field experience in multicultural settings. Differences among elementary students (grades 1-5) associated with their developmental levels, cultural and ethnic backgrounds and gender.

EDCI 2500 Knowing and Learning in Mathematics and Science (3)

This is a General Education course. Introduction to multiple disciplinary perspectives on knowing and learning as guidance for pedagogical practice. Includes field experiences in area schools.

EDCI 2700 Characteristics of Learners with Exceptionalities (3)

Requires field experience in a school environment containing learners with exceptionalities. 2 hrs. lecture; 2 hrs. lab/field experience. An introductory course on differences of learners with various exceptionalities; characteristics, educational programs and resources for education and support.

EDCI 3000 Children's Literature (3)

Survey of children's literature across time, genres and media; focus on wide reading in children's literature and an appreciation of the value of literature for children.

EDCI 3001 Student Development and Diversity (3)

Prereq.: credit or concurrent enrollment in EDCI 2001 and concurrent enrollment in one of the following: ENGL 3201, FREN 3401, HIST 3001, or SPAN 3001. 2 hrs. lecture; 3 hrs. lab/field experience in multicultural settings. Differences among secondary students (grades 6-12) associated with their development levels, cultural and ethnic backgrounds, genders, learning abilities and special needs.

EDCI 3055 Development of Young Children in Context (4)

See CFS 3055.

EDCI 3056 Young Children's Cognitive and Linguistic Development (3)

See CFS 3056.

EDCI 3057 Learning Environments for Infants, Toddlers and Preschool Children (3)

Prereq.: CFS 2065, EDCI 2083 and CFS 3055; concurrent enrollment in EDCI 3058. 2 hrs. lecture; 3 hrs field experience. Planning and preparing environments and learning experiences to support optimal physical, social, emotional and cognitive development of young children.

EDCI 3058 Social-Emotional Growth & Socialization: Culture, Family & Providers (3)

Prereq.: CFS 2065, EDCI 2083 and CFS 3055 ; concurrent enrollment in EDCI 3057. 1 hr. lecture; 6 hrs. lab. Planning and providing instruction in consideration of infant temperament, stages of emotional development, responsive care-giving and guidance and discipline in the context of culture and identity formation, dealing with cultural differences, program policies for culturally sensitive care and creating partnerships with parents.

EDCI 3124 Curriculum Discipline: Mathematics Theory and Practice (6)

Prereq.: Professional Practice Block I; 12 sem. hrs. of mathematics, including MATH 1201 and MATH 1202; 11 sem. hrs. of

natural science; and concurrent enrollment in EDCI 3125 and MATH 2203. 3 hrs. lecture; 6 hrs. lab/field experience in multicultural, multi-level settings. Structures of the discipline of mathematics applied to teaching mathematics in grades 1-6; standards-based pedagogical strategies, techniques and materials are coordinated with basic principles of learning.

EDCI 3125 Curriculum Discipline: Science (3)

Prereq.: Professional Practice Block I, 11 sem. hrs. of natural science, 12 sem. hrs. mathematics, and concurrent enrollment in EDCI 3124 and MATH 2203.

2 hrs. lecture; 2 hrs. lab/field experience in multicultural, multi-level settings. Structures of science disciplines applied to teaching science in grades 1-6; standards-based pedagogical strategies, techniques and materials coordinated with basic principles of learning.

EDCI 3127 Curriculum Disciplines: Social Studies (3)

Prereq.: EDCI 2400, EDCI 3000 and concurrent enrollment in EDCI 3137, EDCI 3200 and either EDCI 4460 or EDCI 4705.

2 hrs. lecture; 2 hrs. lab/field experience in multicultural, multi-level settings. Structures of the social science disciplines applied to teaching social studies in grades 1-5; standards-based pedagogical strategies, techniques and materials coordinated with basic rationales and principles of learning.

EDCI 3136 Reading in the Content Areas (3)

Content area reading problems and solutions; the reading process, approaches, skills and materials.

EDCI 3137 Assessing and Guiding Classroom Reading Instruction (3)

Prereq.: EDCI 2400, EDCI 3000 and concurrent enrollment in EDCI 3200, EDCI 3127 and either EDCI 4460 or EDCI 4705.

2 hrs. lecture; 2 hrs. lab/field experience in multicultural, multi-level settings. Advanced reading instruction experience with particular emphasis on assessment in diverse and multicultural settings.

EDCI 3200 Reading, Writing and Oral Communication in the Elementary School (6)

Prereq.: EDCI 2400, EDCI 3000 and concurrent enrollment in EDCI 3127, EDCI 3137 and either EDCI 4460 or EDCI 4705. 3 hrs. lecture; 6 hrs. lab/field experience in multicultural, multi-level settings. Principles and practices of an effective program in reading, writing and the oral language arts in grades 1-5.

EDCI 3223 Adolescent Literature (3)

See ENGL 3223.

EDCI 3381 Early Childhood Curriculum (3)

Prereq.: EDCI 2083 and concurrent enrollment in CFS 3055, EDCI 3382 and EDCI 3383. Comprehensive integrated curriculum content for children in prekindergarten and kindergarten: reading/language arts, mathematics, science, social studies and the arts.

EDCI 3382 Early Childhood Pedagogy (3)

Prereq.: EDCI 2083 and concurrent enrollment in CFS 3055, EDCI 3381 and EDCI 3383. 2 hrs. lecture; 3 hrs. lab/field experience in multilevel, multicultural settings. Ways of instructing children from birth to kindergarten.

EDCI 3383 Assessment and Planning for Reflective Instruction (3)

Prereq.: concurrent enrollment in CFS 3055, EDCI 3381 and EDCI 3382. 2 hrs. lecture; 6 hrs. lab/field experience in multilevel, multicultural settings. Process of building the teaching and learning cycle (assessing, planning, teaching, reflecting) into integrated instruction of children in prekindergarten and kindergarten.

EDCI 3481 Curriculum in Grades 1-3 (3)

Prereq.: EDCI 3381, EDCI 3382, EDCI 3383; membership in PK-3 teacher education program; and concurrent enrollment in CFS 3056, EDCI 3482 and EDCI 3483. Comprehensive, integrated curriculum content for children in grades 1-3: reading/language arts, mathematics, social studies, science and the arts.

EDCI 3482 Pedagogy in Grades 1-3 (3)

Prereq.: CFS 3055; EDCI 3381, EDCI 3383; membership in PK-3 teacher education program; and concurrent enrollment in CFS 3056, EDCI 3481 and EDCI 3483. 2 hrs. lecture; 3 hrs. lab/field experience in multi-level, multicultural settings. Instructional strategies and materials for children in grades 1-3.

EDCI 3483 Assessment and Planning for Reflective Instruction: Grades 1-3 (3)

Prereq.: CFS 3055; EDCI 3381, EDCI 3382, EDCI 3383; membership in PK-3 teacher education program; and concurrent enrollment in CFS 3056, EDCI 3481 and EDCI 3482 1 hr. lecture; 6 hrs. lab/field experience in multi-level, multicultural

settings. The process of building the teaching and learning cycle (assessing, planning, teaching, reflecting) into integrated instruction of children in grades 1-3.

EDCI 3550 Classroom Interactions (3)

Prereq.: BASC 2011 (or concurrent enrollment) and EDCI 2500. 2 hrs. lecture; 2 hrs. field experience in multicultural settings. Classroom interactions in secondary mathematics and science education understood as a process of concept acquisition that encompasses learner's knowledge and emphasizes student thinking as well as illuminating the critical role of reflection and language in the construction of knowledge. Students in classroom interactions study classroom events that impact learning in mathematics and science and critical issues of student equity.

EDCI 3625 Student Teaching in the Elementary Grades (9)

Prereq.: See "Requirements for Student Teaching" 1 hr. lecture; 24 hrs. lab in diverse multicultural settings. All day, all semester student teaching experiences, including observation, participation and a minimum of 180 actual clock hours of teaching (with a substantial portion of the 180 hrs. in full-day teaching) under the professional supervision of an assigned public school mentor teacher.

EDCI 3630 Student Teaching in the Elementary and Secondary Grades (12)

Prereq.: See "Requirements for Student Teaching" Pass-fail grading. 2 hrs. lecture; 30 hrs. lab.

EDCI 3640 Dual Certification General/Special Education Student Teaching: Grades 1-5 (9)

Prereq.: See "Requirements for Student Teaching." Pass-fail grading. 1 hr. lecture; 24 hrs. lab in diverse multicultural settings. All day, all semester student teaching experiences in general and special education, including observation, participation, and a minimum of 180 actual clock hours of teaching (with a substantial portion of the 180 hours in a full day teaching) under the supervision of an assigned public school mentor teacher.

EDCI 3701 Assessment for Special Education Instructional Practice (3)

Prereq.: EDCI 2700 and admission to a Teacher Education Program. Requires practical field experience with student(s) with disabilities in a school environment. Does not satisfy the Louisiana requirements for certification as an Exceptional Diagnostician. 2 hrs. lecture; 2 hrs. lab/field experience. Assessing performance of students with disabilities; interpreting standardized test results; designing and using assessment in the classroom; instructional design based on assessment data.

EDCI 3702 Instructional Practice for Students with Disabilities I (3)

Prereq.: EDCI 3701. 2 hrs. lecture; 2 hrs. lab. Instructional methods, procedures and materials for teaching students with mild to moderate learning and behavior problems; overview of various methods and introductory procedures for explicit instruction and ongoing assessment.

EDCI 3703 Instructional Practice for Students with Disabilities II: Reading and Literacy (3)

Prereq.: EDCI 3702. 2 hrs. lecture; 2 hrs. lab. Instructional methods, procedures and materials for teaching reading and literacy to students with mild to moderate learning and behavior problems; includes the use of explicit instruction in academic subjects and ongoing assessment techniques in the context of relevant reading and literacy competencies; emphasis on reflective practice and making informed instructional decisions.

EDCI 3704 Improving Language Skills in Students with Exceptionalities (3)

Prereq.: EDCI 2700 and admission to a teacher certification program. Overview of the basic principles of language intervention and disorders, including etiological categories associated with different profiles of atypical development.

EDCI 3712 Secondary Methods and Transition Planning in Special Education (3)

Prereq.: EDCI 3702. 2 hrs. lecture; 2 hrs. lab. Application of foundational knowledge in secondary programs for students with mild to moderate disabilities; focus on the design, delivery and evaluation of transition services to post-school environments.

EDCI 4003 Curriculum and Pedagogy in Secondary Disciplines (3)

Prereq.: EDCI 3136 and concurrent enrollment in one of the following: ENGL 4203, FREN 4403, HIST 4403, or SPAN 4003 or permission of instructor. May be repeated for credit in a second subject area. Credit will not be given for both this course and EDCI 4465. 2 hrs. lecture; 3 hrs. lab/field experience in multicultural settings. Applying instructional approaches in particular subject areas for middle and high school students.

EDCI 4004 Critical Issues in Secondary School Content Area Teaching (3)

Prereq.: EDCI 4003 or permission of instructor. May be repeated for credit in a second subject area. Credit will not be given for both this course and EDCI 4466. 2 hrs. lecture; 3 hrs. lab/field experience in multicultural settings. Critical issues in the nature of knowledge and inquiry in specific school subjects.

EDCI 4005 Student Teaching in Grades 6-12 Humanities (9)

Prereq.: EDCI 4003 and concurrent enrollment in EDCI 4004 and in one of the following: ENGL 4204, FREN 4404, HIST 4404, SPAN 4004. 1 hr. lecture; 24 hrs. lab/field experience in diverse multicultural settings. All day, all semester student teaching experiences, including observation, participation, and a minimum of 180 actual clock hours of teaching (with a substantial portion of the 180 hrs. in a full day teaching) under the supervision of an assigned public school mentor teacher.

EDCI 4006 Student Teaching in Grades 6-12 Mathematics and Sciences (9)

Prereq.: EDCI 4500. 1 hr. lecture; 24 hrs. lab/field experience in diverse multicultural settings. All day, all semester student teaching experiences, including observation, participation, and a minimum of 180 actual clock hours of teaching (with a substantial portion of the 180 hours in a full day teaching) under the supervision of an assigned public school mentor teacher.

EDCI 4060 Organization and Administration of Early Childhood Programs (3)

Prereq.: EDCI 2083 or consent of department. Historical, cultural, and philosophical foundations; finances, budgeting, staff duties, policies and legal aspects, equipment and physical plant, parent education and communication, public relations.

EDCI 4269 Art Education Workshop (3)

Art as an integral part of the school curriculum; art activities and classroom procedures, materials and techniques.

EDCI 4272 Current Practices in Art Education (3)

Contemporary trends and practices in art education; critical review of texts, journals and other information sources.

EDCI 4273 Art Education in the Elementary and Secondary Schools (3)

For students concentrating in art education. Development of a functional art program for elementary and secondary schools; philosophy of art education, curriculum construction, teaching methods, planning and measurement of the results of instruction.

EDCI 4381 Student Teaching: Practice and Reflection in PK/K (12)

Prereq.: EDCI 3481, EDCI 3482 and EDCI 3483; concurrent enrollment in EDCI 4382. 4 hrs. lecture; 24 hrs. lab/field

experience in multi-level, multicultural settings. Designed to partially fulfill student teaching requirements and to prepare students to be effective classroom teachers in PK/K settings.

EDCI 4382 Critical Issues in Early Childhood Education (3)

Prereq.: EDCI 2083 or consent of department. Historical and contemporary perspectives on developmental, sociocultural and pedagogical issues in early childhood education.

EDCI 4450 Principles and Practices in Secondary Education (3)

Prereq.: cohort membership or consent of instructor. Analysis of criticisms of secondary education and of current proposals for reform; conflicting conceptions of teaching, learning, cognition and related approaches to curriculum, instruction and evaluation; current theoretical and research approaches; implications for educational policy and practice.

EDCI 4460 Planning, Managing and Evaluating School Instruction (3)

Prereq.: EDCI 2400, EDCI 3000 and concurrent enrollment in EDCI 3127, EDCI 3137 and EDCI 3200. 2 hrs. lecture; 2 hrs. lab. Exploration and observation of skills and techniques for organizing and assessing learning in schools.

EDCI 4465 Seminar: Reflective Teaching in Secondary Subjects (3)

Prereq.: cohort membership or consent of instructor. May be taken for a max. of 6 sem. hrs. when topics vary. Credit will not be given for both this course and EDCI 4003. Critical issues and pedagogical practices related to the reflective teacher of English, social studies, science or mathematics.

EDCI 4466 Seminar: Critical Issues in Secondary School Teaching (3)

May be taken for a max. of 6 sem. hrs. when topics vary. Credit will not be given for both this course and EDCI 4004. Critical issues in the nature of knowledge and inquiry in school subjects: English, mathematics, science and social studies.

EDCI 4481 Student Teaching: Practice and Reflection in Grades 1-3 (12)

Prereq.: EDCI 4381 and EDCI 4382; concurrent enrollment in EDCI 4482. 4 hrs. lecture; 24 hrs. lab/field experience in multi-level, multicultural settings. Designed to partially fulfill student teaching requirements and to prepare student to be effective classroom teachers in grades 1-3.

EDCI 4482 Capstone Seminar in Early Childhood Education (3)

Prereq.: EDCI 4381 and EDCI 4382; concurrent enrollment in EDCI 4481. Critically analyzing epistemology and contexts of learning; conducting action research; communicating teaching expertise.

EDCI 4500 Instructional Models for Mathematics and Science (3)

Prereq.: EDCI 3550. Applying instructional approaches in mathematics and science for middle and high school students. Includes supervised field experiences in multicultural settings and/or informal learning environments.

EDCI 4630 Student Teaching in K-12 Grades (9)

Prereq.: See "Requirements for Student Teaching." Pass-fail grading. 1 hr. lecture; 35 hrs. lab. Student teaching practicum in diverse, multicultural K-12 settings.

EDCI 4635 Internship in Curriculum and Instruction (3-12)

Prereq.: permission of the College of Human Sciences & Education Office of Field Experiences. Pass-fail grading. Specific teaching or practicum experience in a public school setting; periodic evening seminars.

EDCI 4701 Trends and Issues in Educating Learners with Exceptionalities (3)

Su Requires field experience with student(s) with exceptionalities in a school environment. Exceptionality and special education; characteristics, educational needs and instructional practice; current trends and issues in service provision.

EDCI 4703 School and Classroom Management Applied to Students with Exceptionalities (3)

Prereq.: EDCI 2700 or equivalent. 2 hrs. lecture; 2 hrs. lab. Skills for behavior management of children with exceptionalities in school settings, emphasizing evidence-based school-wide and classroom application.

EDCI 4705 Learning and Behavior Principles Applied to Students with Exceptionalities (3)

Prereq.: EDCI 2700.

2 hrs. lecture; 2 hrs. lab/field experience. Development of intervention programs based on the principles of applied behavior analysis; emphasis on proactive strategies that promote learning and prosocial behavior.

EDCI 4710 Consultation, Collaboration and Co-teaching (3)

Prereq.: EDCI 2700 or EDCI 4701. Professional roles; models and practices in building cooperative and inclusive environments for education; emphasis on consulting teacher, collaborative consultation, co-teaching and building effective communications among educators, parents and other professionals in providing education and other services to children with exceptionalities.

EDCI 4800 Teaching in the Multicultural Classroom (3)

Strategies and resources for teaching students of cultural diversity in the classroom; development of units and activities of cultural variety.

EDCI 4900 Special Topics in Curriculum and Instruction (1-3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit. Methods, trends and issues in curriculum and instruction.

EDCI 5880 Special Topics in Education (1-3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit. New methods, trends and techniques.

EDCI 6701 Foundations of Applied Behavioral Analysis in Education (3)

An introduction to behavior analytic principles, definitions, characteristics, processes, and concepts. An introduction to behavioral consultation.

EDCI 6702 Measurement of Behavior: Analysis and Evaluation of Behavior Change in Education (3)

Prereq.: EDCI 6701. A basic introduction to behavioral assessment and the measurement, display, analysis, and evaluation of behavioral data.

EDCI 6703 Promoting Positive Behavior Change in Education (3)

Prereq.: EDCI 6702. Behavior change procedures and systems support in applied behavior analysis.

EDCI 6704 Applied Behavior Analysis Practicum in Education (3)

Prereq.: EDCI 6703. Supervised practicum in the application of behavior analytic practices in an educational setting.

EDCI 7008 Trends and Issues in Emotional and Behavioral Disturbance (3)

An in-depth examination of issues and trends in emotional and behavioral disturbance including diagnosis, etiology, current theory and delivery systems.

EDCI 7009 Advanced Evaluation and Assessment for Students at-Risk (3)

Prereq.: EDCI 3701 or equivalent. Requires practical field experience with students with disabilities in a school environment. Identification and diagnosis of learning and behavior problems; IDEA and Section 504 legal requirements; administration and interpretation of individually administered standardized tests, design of classroom-based assessments and methods of comparative analysis; instructional and service recommendations based on multifaceted assessment.

EDCI 7010 Advanced Practicum in Evaluation and Assessment (3)

Prereq.: EDCI 7009. Supervised experience in educational evaluation and assessment; practical and in-depth approach; procedures for prereferral screening, for conducting individual assessments, including evaluating for eligibility, interpreting data for instructional decision-making and for designing ongoing data collection systems.

EDCI 7018 Strategic Instructional Models for Students with Disabilities (3)

Prereq.: ELRC 4249. 2 hrs. lecture; 2 hrs. lab. Evaluating the research base and theories supporting the use of strategic instructional and assessment models; emphasis on the use of strategic instruction with students with mild to moderate disabilities.

EDCI 7021 Legal and Ethical Issues in Special Education (3)

Su Legal and ethical issues in special education; specific emphasis on IDEA, Section 504, case law, regulatory issues, professional responsibilities and CEC standards for professional practice.

EDCI 7051 The Contemporary Family (3)

See CFS 7051.

EDCI 7052 Topics and Issues in Family and Consumer Sciences (3)

See CFS 7052.

EDCI 7053 Infant Behavior and Development (3)

Infant personality, development and socialization; major transactions in the infant's life; family and home; child-care facilities and caregivers; support systems within larger societies.

EDCI 7054 Child Guidance and Behavior (3)

Prereq.: EDCI 7056 or consent of instructor. Normal, age-related behavior patterns; child guidance practices and their consequences; techniques and procedures for successful parenting and for improved classroom management; theoretical bases.

EDCI 7055 Human Development (3)

See CFS 7055.

EDCI 7056 Theories of Child Development (3)

See CFS 7056.

EDCI 7057 Theories in Family Science (3)

See CFS 7057.

EDCI 7059 Parent Involvement in Early Childhood Education (3)

2 hrs. lecture; 2 hrs. lab. Interpersonal relationships and involvement of parents in early childhood education programs; research and existing models of parent involvement.

EDCI 7105 Teaching Reading in the Elementary School (3)

Current instructional procedures and research in reading instruction in the elementary school; approaches and ideas for teaching reading to culturally different students.

EDCI 7106 Teaching Reading to Students with Diverse Cultural Backgrounds (3)

Prereq.: EDCI 7105 or EDCI 7135 or consent of instructor. Characteristics of learners from different cultural settings; analysis of methods and materials that support reading instruction for these students.

EDCI 7107 Topics in Reading Education (3)

Prereq.: EDCI 7105 or EDCI 7135 or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Issues and practices in elementary through adult reading education.

EDCI 7109 Studies in the Teaching of Elementary School Mathematics (3)

Techniques and materials for teaching elementary school mathematics; relationship between learning theories and acquisition of mathematical skills and concepts.

EDCI 7111 Studies in the Teaching of Elementary School Language Arts (3)

Practices and curricula in the teaching of elementary school language arts.

EDCI 7112 Early Literacy Development and Instruction (3)

Current research on early literacy development and learning, with an emphasis on pre-conventional stages of literacy.

EDCI 7130 Techniques and Resources for Reading Instruction (3)

Prereq.: EDCI 7105 or EDCI 7135 or equivalent. Methods and materials in all areas of reading; demonstration and student production; application of materials and methods for effective reading instruction.

EDCI 7131 Developing Learning Skills through Content Reading (3)

Relationships between learning skills and content areas; the reading process; materials and research related to reading.

EDCI 7135 Techniques for Teaching Reading in the Middle and Secondary School (3)

Reading skills appropriate for the upper levels; approaches for teaching reading; techniques for improving the school reading program.

EDCI 7141 Studies in the Teaching of Mathematics in Secondary Schools (3)

Practices and issues in techniques and materials for teaching mathematics in secondary schools; relationship between learning theories and acquisition of mathematical skills and concepts.

EDCI 7142 Studies in the Teaching of English in Secondary Schools (3)

EDCI 7143 The Teaching of Literature in Secondary Schools (3)

EDCI 7147 Studies in the Teaching of Secondary School Science (3)

Prereq.: science teaching experience. Instructional materials, evaluation practices and science teaching skills for grades 6-12.

EDCI 7149 Studies in the Teaching of Foreign Languages (3)

Prereq.: completion of an undergraduate foreign language methods course and/or teaching experience; or consent of instructor. Principles and current research related to the teaching of foreign languages.

EDCI 7205 Critical Analysis of Current Research in Reading (3)

Prereq.: 12 hours of graduate reading courses or equivalent. Evaluation of current and needed research; application of research findings in the instructional program.

EDCI 7247 Teaching in the Science Laboratory (3)

2 hrs. lecture; 2 hrs. lab. Interpreting research in laboratory science instruction; use of results to generate creative laboratory activities.

EDCI 7307 Topics in Curriculum and Instruction (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

EDCI 7308 Topics in Science Education (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

EDCI 7309 Topics in Mathematics Education (3)

Prereq.: EDCI 7109 or EDCI 7141 or consent of instructor. *May be taken for a max. of 6 hrs. of credit when topics vary.*

EDCI 7310 Topics in Social Education (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

EDCI 7311 Topics in Language Arts Education (3)

Prereq.: EDCI 7111 or EDCI 7142 or equivalent. May be taken for a max. of 6 hrs. of credit when topics vary. Selected topic in a specific subject matter, level of instruction or a methodological problem in teaching English language arts.

EDCI 7312 Diagnostic and Prescriptive Teaching in Mathematics (3)

Prereq.: EDCI 7109 or EDCI 7141. Techniques for assessing students' skill levels and understanding in K-12 mathematics and for tailoring instruction to individual needs.

EDCI 7313 Teaching Literature in the Elementary School (3)

Role of literature in elementary education; relevant teaching issues and strategies; integration of literature into the elementary curriculum.

EDCI 7314 Teaching Written Composition in the Elementary School (3)

Practices and curricula in the teaching of written composition in the elementary school; its relationship to language arts instruction.

EDCI 7315 Teaching Multicultural Children's Literature (3)

Multicultural literature for children from elementary through junior high school; historical and contemporary perspectives; implications for the classroom.

EDCI 7455 Foundations of Secondary or K-12 Educational Theory, Policy and Practice (3)

Prereq.: cohort membership and completion of EDCI 7460, EDCI 7461 or consent of instructor. Social contexts, history and philosophy of current and perennial issues in education; conflicting purposes and functions of public schooling; economic and political analysis of educational policy; implications of conflicting approaches to teaching and learning; current theory and research.

EDCI 7460 Fall Practicum in Secondary or K-12 Schools (6)

Prereq.: cohort membership or consent of instructor. Pass-fail grading. 1 hr. lecture; 10 hrs. lab. First of two practica in local schools.

EDCI 7461 Spring Practicum in Secondary or K-12 Schools (6)

Prereq.: cohort membership or consent of instructor. Pass-fail grading. 1 hr. lecture; 10 hrs. lab. Second of two practica in local schools.

EDCI 7465 Seminar: The Teacher-Researcher in Secondary School Subjects (3)

Prereq.: cohort membership or consent of instructor. May be taken for a max. of 6 sem. hrs. when topics vary. Study of teacher-researcher literature; its application to secondary teaching and curriculum in the subject area (English, mathematics, science or social studies).

EDCI 7475 Research Project in Secondary or K-12 Teacher Education (3)

Prereq.: cohort membership and completion of EDCI 7460 and EDCI 7461 or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. 2 hrs. lecture; 2 hrs. lab. Development, completion and presentation of a research problem in curriculum and instruction that grows out of fifth-year clinical experiences and precedes course work.

EDCI 7480 Teaching Practicum I (6)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7482, EDCI 7484. Pass-fail grading. 20 hrs. lab. Along with the Seminar in Teaching Research and the Master's Project, this course is designed to partially fulfill student teaching requirements and to prepare students to be effective classroom teachers.

EDCI 7481 Teaching Practicum II (6)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7483, EDCI 7485. Pass-fail grading. 20 hrs. lab. Along with the Seminar in Teaching Research and the Master's Project, this course is designed to partially fulfill student teaching requirements and to prepare students to be effective classroom teachers.

EDCI 7482 Seminar in Teaching Research I (3)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7480, EDCI 7484. 2 hrs. lecture; 2 hrs. lab. An integral part of the fifth-year teaching research project; along with the Teaching Practicum and the Master's Project, this course partially fulfills student teaching requirements.

EDCI 7483 Seminar in Teaching Research II (3)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7481, EDCI 7485. 2 hrs. lecture; 2 hrs. lab. An integral part of the fifth-year teaching research project; along with the Teaching Practicum and the Master's Project, this course partially fulfills student teaching requirements.

EDCI 7484 Master's Project I (3)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7480, EDCI 7482. Development and completion of a research problem in curriculum and instruction that grows out of the first semester's clinical experience.

EDCI 7485 Master's Project II (3)

Prereq.: cohort membership or consent of instructor and concurrent enrollment in EDCI 7481, EDCI 7483. Development and completion of a research problem in curriculum and instruction that grows out of the second and culminating semester's clinical experience.

EDCI 7610 Advanced Seminar and Practicum in Curriculum and Instruction (3-6)

The student, major professor and a committee will structure experiences around the student's needs and interests.

EDCI 7682 Assessment Techniques and Practicum in Reading (3)

Prereq.: EDCI 7105, EDCI 7135, or equivalent. 2 hrs. lecture; 2 hrs. lab. Mastery level skills for evaluating reading strengths and weaknesses of elementary and secondary school students; theoretical models and a practicum for applying techniques.

EDCI 7683 Guiding Classroom Instruction and Practicum in Reading (3)

Prereq.: EDCI 7105 and EDCI 7682 or equivalent. 2 hrs. lecture; 2 hrs. lab. Procedures for guiding instruction in reading; theory and practice.

EDCI 7684 Advanced Internship in Reading (6)

Prereq.: advanced standing in the specialist or doctoral program or equivalent. Field experiences in various job-related settings. 1 hr. lecture; 10 hrs. lab. Teaching experiences at the local school and university levels; administrative experience at the parish level and consultant experience at the state level.

EDCI 7685 Applied Research in Reading (3)

Prereq.: enrollment in advanced graduate program and ELRC 4249 or equivalent. Individual research projects.

EDCI 7701 Advanced Seminar in Special Education I (3)

Prereq.: ELRC 4249. Current trends and issues in special education, including legal/ethical considerations, history, theory and seminal research.

EDCI 7705 Applied Learning Theory for Exceptional Learners (3)

A study of the development of human learning theories, experimental research, and the application of these theories and research to evaluating and modifying the behavior of exceptional learners in modern classrooms.

EDCI 7713 Individual Study in Special Education (3)

EDCI 7760 Nature and Needs of the Gifted and Talented (3)

Historical perspective, social, emotional and educational characteristics; administrative considerations; sociological and psychological studies; special populations.

EDCI 7761 Models and Strategies for Teaching the Gifted (3)

Prereq.: EDCI 7760 or equivalent. Examination of models, teaching strategies and resources for planning appropriate learning experiences for gifted and talented students in diverse settings.

EDCI 7762 Creative Behavior (3)

Nature and analysis of creative behavior; appraisal and implementation of specific processes designed to encourage creative productivity.

EDCI 7763 Developing Curriculum for the Gifted (3)

Su Prereq.: *EDCI 7761*. An examination of curricular theories and models for use in gifted education programs, including the development and evaluation of educational plans for individuals and groups.

EDCI 7764 Social and Emotional Development of the Gifted (3)

Prereq.: *EDCI 7760*. In depth study of the social and emotional development of the gifted; specific emphasis on underachievement, counseling, youth with special needs and working with other mental health professionals in the school setting.

EDCI 7768 Practicum in Education for the Gifted (3-6)

Prereq.: *EDCI 7760, EDCI 7761 and EDCI 7762*. Planning, implementing and evaluating teaching strategies, materials and counseling techniques in a school program.

EDCI 7811 Seminar in Current Trends in Education Literature (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Seminar for beginning doctoral students in curriculum and instruction.

EDCI 7821 Problems in Curriculum and Instruction (2-4)

For advanced graduate students who are qualified to undertake individual problems.

EDCI 7822 Problems in Curriculum and Instruction (2-4)

For advanced graduate students who are qualified to undertake individual problems.

EDCI 7824 Elementary School Curriculum (3)

Content, organization and evaluation of the elementary school curriculum.

EDCI 7825 Secondary School Curriculum (3)

Content, organization, and evaluation of the secondary school curriculum.

EDCI 7843 Early Childhood Education (3)

See HUEC 7843. Historical, theoretical, philosophical and programmatic issues that affect contemporary early childhood education.

EDCI 7901 Curriculum Theory (3)

Means for strengthening the curriculum; links between past and current concepts of curriculum.

EDCI 7902 Analysis of Research on Teaching (3)

Prereq.: ELRC 7006 or equivalent. Theory of design and application of research related to systematized instruction.

EDCI 7904 Education and Cognition (3)

Understanding human cognition and cognitive change; implications for educational theory, practice and research.

EDCI 7910 Traditions of Inquiry in Education (3)

Prereq.: ELRC 7299 or permission of instructor. Theoretical and methodological issues related to research traditions in education; development of major traditions.

EDCI 7920 Analysis of Research in Curriculum and Instruction (3)

Prereq.: ELRC 7241 or equivalent. A max. of 6 sem. hrs. may be earned in this series; only 3 sem. hrs. may be earned in any one area. Factors influencing research and critical analysis of selected research in one of the following areas: curriculum, mathematics, science, language arts, social or early childhood education.

EDCI 7921 Analysis of Research in Curriculum and Instruction (3)

Prereq.: ELRC 7241 or equivalent. A max. of 6 sem. hrs. may be earned in this series; only 3 sem. hrs. may be earned in any one area. Factors influencing research and critical analysis of selected research in one of the following areas: curriculum, mathematics, science, language arts, social or early childhood education.

EDCI 7930 Seminar: Curriculum and Instruction (1-6)

A max. of 6 sem. hrs. may be earned in this series when topics vary. Trends and issues in one of the following areas: curriculum, mathematics, science, language arts, social or early childhood education.

EDCI 7931 Seminar: Curriculum and Instruction (1-6)

A max. of 6 sem. hrs. may be earned in this series when topics vary. Trends and issues in one of the following areas: curriculum, mathematics, science, language arts, social or early childhood education.

EDCI 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

EDCI 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Education

EDUC 2000 Special Topics in Education (1-3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit. Methods, trends and issues in education.

Electrical Engineering

EE 1810 Introduction to Engineering: Electrical and Computer Engineering (2)

Pass-fail grading. 1 hr. lecture, 2 hrs. lab. Survey of engineering concepts with specific focus on the electrical and computer engineering discipline.

EE 2120 Circuits I (3)

Prereq.: credit or registration in EE 1810, MATH 2070 or MATH 2090, and PHYS 2113 or consent of division. Time-domain analysis of electrical networks.

EE 2130 Circuits II (3)

Prereq.: EE 2120, PHYS 2113, and MATH 2070 or MATH 2090. Frequency-domain analysis of electrical networks.

EE 2230 Electronics I (3)

Prereq.: EE 2120. Terminal behavior of semiconductor devices and basic circuits.

EE 2231 Electronics Laboratory I (2)

Prereq.: credit or registration in EE 2230. 1 hr. lecture; 2 hrs. lab.

EE 2731 Digital Logic Laboratory (2)

Prereq.: EE 2740. 1 hr. lecture; 2 hrs. lab. Familiarization with conventional logic gates and flip-flops; design and testing of various combinational and sequential circuits.

EE 2740 Digital Logic (3)

Prereq.: MATH 1550. Boolean algebra; logic gates; minimization methods; analysis and synthesis of combinational and sequential logic circuits; design examples; practical impact of design choices.

EE 2810 Tools in Electrical and Computer Engineering (2)

Prereq.: CSC 1253 and credit or registration in EE 2130 and EE 2231. Contemporary tools in the area of electrical and computer engineering.

EE 2950 Comprehensive Electrical Engineering (3)

Prereq.: MATH 1552 or equivalent. For nonelectrical engineering majors. Elementary circuits, devices and systems in electrical engineering.

EE 3000 Special Topics in Electrical and Computer Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Prerequisites will vary depending on the topic.

EE 3001 Special Topics in Electrical and Computer Engineering with Lab (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Prerequisites will vary depending on the topic. 2 hrs. lecture; 2 hrs. lab.

EE 3060 Special Projects (2)

Prereq.: consent of department. Pass-fail grading. Individual work with instructor on special project selected by instructor and student.

EE 3061 Special Projects (2)

Prereq.: consent of department. Pass-fail grading. Individual work with instructor on special project selected by instructor and student.

EE 3070 Engineering Practice (3)

Prereq.: permission of department and either completion of one co-op session or six months of full time employment in an appropriate area. Pass-fail grading. Written final report required. Work experience in solving electrical and computer engineering problems in an engineering environment.

EE 3150 Probability for Electrical and Computer Engineering (3)

Credit will not be given for this course and MATH 3355. Prereq.: MATH 2057. Basic concepts of probability theory and statistics with applications to electrical and computer engineering; axioms of probability, continuous, discrete, and conditional probability density and distribution functions, expectations, statistical inference, and random processes.

EE 3160 Introduction to Digital Signal Processing (3)

Prereq.: EE 2130 and EE 2810 or equivalent.

Digital processing of continuous-time signals; Discrete-time Fourier transform; z-transform, signals and systems in the transform domains; Digital filter design techniques; Discrete Fourier transform and FFT algorithm.

EE 3220 Electronics II (3)

Prereq.: EE 2130, EE 2230 and EE 2231. Analysis and design of electronic circuits; emphasis on concepts and device models.

EE 3221 Electronics Laboratory II (2)

Prereq.: EE 2231 and concurrent registration in EE 3220. 1 hr. lecture; 2 hrs. lab.

EE 3232 Solid State Devices I (3)

Prereq.: EE 2230 and EE 2130. Physics and analysis of basic semiconductor devices; principles of integrated circuit fabrication.

EE 3320 Electrical and Magnetic Fields (3)

Prereq.: MATH 2057 and EE 2130. Maxwell's equations; wave propagation and reflection in isotropic media; static fields.

EE 3410 Electric Power (3)

Prereq.: EE 2130. Basic principles of electromechanical energy conversion and power system analysis.

EE 3530 Introduction to Control Engineering (3)

Prereq.: EE 2130 and EE 2810.

Modeling, simulation, realization, analysis and feedback control design of dynamic systems.

EE 3610 Signals and Systems (3)

Prereq.: EE 2130 and EE 2810.

Methods of analysis of continuous time signals and systems.

EE 3710 Communications in Computing (3)

Prereq.: EE 2740. *Coreq.:* EE 3150 or equivalent. Theoretical and practical factors in designing computer communications networks; communication principles and codes; network topology and architecture; protocol layers; security; current and advanced applications.

EE 3752 Microprocessor Systems (3)

Prereq.: CSC 1253 and EE 2740. 2 hrs. lecture; 2 hrs. lab. Theory and design of microprocessors; semiconductor technologies, architectures, assembly language, software development, input/output design, applications, and interfacing.

EE 3755 Computer Organization (3)

Prereq.: EE 2740 or equivalent. Credit will not be given for both this course and CSC 3501. Structure and organization of computer systems; instruction sets; arithmetic; data path and control design.

EE 3950 Electronics (2)

Prereq.: EE 2950. For nonelectrical engineering majors. Basic electronics and instrumentation.

EE 4000 Special Topics in Electrical Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Students in curricula other than electrical engineering should consult the instructor. ABET category: 3 hrs. engineering science. Selected topics of current interest.

EE 4002 Special Topics in Electrical Engineering (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Students in curricula other than electrical engineering should consult the instructor. ABET category: 2 hrs. design; 1 hr. engineering science. Selected topics of current interest.

EE 4003 Special Topics in Electrical and Computer Engineering with Lab (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Prerequisites will vary depending on the topic. 2 hrs. lecture; 2 hrs. lab.

EE 4060 Research for Undergraduates I (3)

Prereq.: permission of the department. Pass-fail grading. Individual work with instructor on research topic selected by instructor and an undergraduate student who is also enrolled in the ECE Accelerated Masters's Program.

EE 4061 Research for Undergraduates II (3)

Prereq.: EE 4060. Pass-fail grading. Individual work with instructor on advanced research topic selected by instructor and undergraduate student who is also enrolled in the ECE Accelerated Master's Program.

EE 4160 Algorithms and Implementations for Digital Signal Processing (3)

Prereq.: EE 3160 or equivalent. Design algorithms for FIR and IIR filters, adaptive estimation and its applications and multirate digital signal processing; Digital signal processors and implementations for signal processors for spectrum analysis and estimation, FIR and IIR digital filters and adaptive echo cancellation.

EE 4232 Solid State Devices II (3)

Prereq.: EE 3232. Physics and analysis of advanced semiconductor devices, including photonic and high-frequency devices.

EE 4240 Linear Circuit Design (3)

Prereq.: EE 3220 and EE 3221. Credit or registration in EE 3232. 2 hrs. lecture; 2 hrs. lab. ABET category: 2 hrs. design; 1 hr. engineering science. Fabrication and use of discrete and monolithic integrated circuits; use of building blocks for design of analog systems.

EE 4242 VLSI Design (3)

Prereq.: EE 2740, EE 3220. 2 hrs. lecture; 2 hrs. lab. Design and implementation of logic gates for application-specific integrated circuits; system design methodology using CMOS technology.

EE 4247 Chemical and Biological Sensors (3)

Prereq.: CHEM 120I and EE 3232 or their equivalents. Fundamentals of chemical and biological sensors; molecular recognition and transduction principles; fundamentals of electrochemical sensors, optical and mass-sensitive sensing techniques, and performance factors of chemical and biological sensors.

EE 4250 Digital Integrated Circuits (3)

Prereq.: EE 3220, EE 3221 and EE 3232. 2 hrs. lecture; 2 hrs. lab. ABET category: 2 hrs. design; 1 hr. engineering science. Analysis and design of digital integrated circuit logic gates in bipolar and MOS technology; semiconductor memories and their operations.

EE 4262 Electronic Instrumentation and Metrology (3)

Prereq.: EE 3220 and EE 3221 or equivalent. 2 hrs. lecture; 2 hrs. lab. ABET category: 2 hrs. design; 1 hr. engineering science. Application of electronic principles to the design and development of practical systems including instrumentation, data analysis and metrology; design and construction of term projects.

EE 4270 Optical Electronics (3)

Prereq.: EE 3320 or equivalent. 2 hrs. lecture; 2 hrs. lab. Interaction of optical radiation with various media; theory of laser oscillations and specific laser systems; modulation and detection of optical radiation; fiber optic applications.

EE 4340 Fiber Optic and Microwave Propagation (3)

Prereq.: EE 3610 and EE 3320 or equivalent. Wave propagation at microwave and optical frequencies in metallic waveguides and optical fibers.

EE 4350 Applied Electromagnetics: RF Systems (3)

Prereq.: EE 3320 and EE 3610. 2 hrs. lecture; 2 hrs. lab. Analysis and design of RF systems, transmission lines, impedance matching networks, RF filter design, antennas, high speed circuits, single and multi-port networks, RF modeling.

EE 4410 Power System Protection (3)

Prereq.: EE 3410 or equivalent. Broad based introduction to utility and industrial power system protection. Topics of study include transmission, distribution, generation and industrial distribution systems.

EE 4422 Electric Machine Design (3)

Prereq.: EE 3410 or equivalent; 2 hrs. lecture, 2 hrs. lab. ABET category: 2 hrs. design, 1 hr. engineering science. Design and performance analysis of electric machines in steady-state and dynamic conditions using a simulation on PC and lab experiments.

EE 4430 Power System Analysis (3)

Prereq.: EE 3410 or equivalent. Power system analysis using computer methods; power flow, economic power dispatch and faults.

EE 4445 Power System Operation and Control (3)

Prereq.: EE 3410 or equivalent. Introduction to operation and control of major utility interconnected power system. Control of generation and operation of interconnected utility grid, transmission systems, utility distribution systems and large industrial power systems.

EE 4450 Distribution System Design (3)

Prereq.: EE 3410 or equivalent. ABET category: 2 hrs. design; 1 hr. engineering science. Power distribution systems; emphasis on design and applications.

EE 4460 Power Electronics (3)

Prereq.: EE 3220 and EE 3410. 2 hrs. lecture; 2 hrs. lab. ABET category: 2 hrs. design; 1 hr. engineering science. Design of power semiconductor converters including controlled rectifiers, inverters, AC voltage controllers and DC-DC converters.

EE 4490 Adjustable Speed Drives (3)

Prereq.: EE 3410, EE 3530. 2 hrs. lecture, 2 hrs. lab. ABET category: 2 hrs. design, 1 hr. engineering science. Design and test of DC and AC motor variable speed drives combined with an analysis of their static and dynamic properties.

EE 4580 Topics in Control System Design (3)

Prereq.: EE 3530. ABET category: 2 hrs. design; 1 hr. engineering science. Compensation of single loop and multiloop systems; state estimation; stability; application to industrial controllers; design using computer simulation packages.

EE 4585 Discrete Control System Design (3)

Prereq.: EE 3530. ABET category: 2 hrs. design; 1 hr. engineering science. Sampling and reconstruction of signals; analysis and design of sampled data systems; discrete time systems and controllers.

EE 4625 Digital Communication and Networking (3)

Prereq.: EE 3610 and EE 3150 or equivalent. Digital coding of analog information, baseband transmission, decision theory, modulation, design considerations, applications.

EE 4660 Random Processes I (3)

Prereq.: EE 3150 or equivalent. Probability spaces; random variables and processes; second order processes; spectral analysis; filtering.

EE 4700 Special Topics in Computer Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Students in curricula other than computer engineering should consult the instructor. ABET category: 3 hrs. engineering science. Selected topics of current interest.

EE 4701 Special Topics in Computer Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Students in curricula other than computer engineering should consult the instructor. ABET category: 1 hr. design; 2 hrs. engineering science. Selected topics of current interest.

EE 4702 Special Topics in Computer Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Students in curricula other than computer engineering should consult the instructor. ABET category: 2 hrs. design; 1 hr. engineering science. Selected topics of current interest.

EE 4720 Computer Architecture (3)

Prereq.: EE 3752 and EE 3755 or equivalent. Memory hierarchy; pipelining techniques; design philosophies; parallel computing fundamentals.

EE 4730 3D Graphical and Geometric Modeling (3)

Prereq.: CSC 3102 and MATH 2090 or equivalent in the areas of C/C++ programming and linear algebra. Theory and design in computer graphics modeling and processing; 3D shape representation and manipulation; interactive 3D shape design, deformation and editing.

EE 4740 Discrete Structures for Computer Engineering (3)

Prereq.: EE 2740 or equivalent. Mathematical logic and proof methods; graph theory; complexity of algorithms; algebraic structures; applications in computer engineering.

EE 4745 Neural Computing (3)

Prereq.: EE 2810. Neural networks and automata; network architecture; learning models; applications to signal processing, vision, speech, and robotics; VLSI implementations.

EE 4750 Microprocessor Interfacing Techniques (3)

Prereq.: EE 3752.

2 hrs. lecture; 2 hrs. lab. Theory and design techniques of microprocessor interfaces to memory and input/output devices.

EE 4755 Digital Design Using Hardware Description Languages (3)

Prereq.: EE 3755 or equivalent. Design of digital systems using a hardware description language (HDL). Basic and intermediate language topics; structural and behavioral models as synthesis sources; synthesis tools; coding for efficient synthesis; coding strategies for common digital circuits.

EE 4760 Introduction to Compiler Optimization (3)

Prereq.: EE 3755 and CSC 3102. ABET category: 2 hrs. design; 1 hr. engineering science. Processor architecture, source program analysis, compiler optimization techniques, compiler design.

EE 4770 Real Time Computing Systems (3)

Prereq.: EE 3752 or equivalent.

Real time computing systems; systems components, architectures, I/O structure, interrupts, interfacing, A/D converters and multitasking.

EE 4775 Networked Games and their Algorithms (3)

Prereq.: CSC 3102 or equivalent. Algorithms for computer games including path finding and artificial intelligence. Compensating for latency and bandwidth constraints in massively multiplayer online games.

EE 4780 Introduction to Computer Vision (3)

Prereq.: EE 2810.

Computer processing of images, including image acquisition systems and computer systems for processing images; preprocessing techniques; image segmentation; emphasis on design of image processing software.

EE 4790 Structure of Computers and Computations I (3)

Prereq.: CSC 3102 and EE 3755. Hardware and software complexity analyses; structures of both computers and computations.

EE 4810 Senior Design I (3)

Prereq.: EE 3610 or EE 3752, senior standing in the College of Engineering, and one of EE 3160, EE 3220, EE 3410, EE 3530, EE 3755. 2 hrs. lecture, 2 hrs. lab. Senior design projects.

EE 4820 Senior Design II (3)

Prereq.: EE 4810. 6 hrs. lab. Continuation of senior design projects from EE 4810. Construction and test.

EE 4859 Digital Media Capstone (3)

Prereq.: At least 15 hours credit towards the Digital Media TECH minor. Credit will not be given for both EE 4859 and ART 4059. 2 hrs. lecture, 2 hrs. lab. Culminating capstone project experience requiring interdisciplinary teams to prototype a digital media work or application.

EE 7000 Advanced Topics in Electrical Engineering (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7091 Electrical Engineering Research I (3)

Prereq.: permission of department. Pass-fail grading. Individual study.

EE 7092 Electrical Engineering Research II (3)

Prereq.: EE 7091 and permission of the department. Pass-fail grading. Advanced individual study.

EE 7100 Advanced Topics in Signal Processing (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7150 Theory and Application of Digital Signal Processing (3)

Prereq.: EE 3160 or equivalent. Digital filter design, spectrum analysis, digital hardware implementations and applications.

EE 7160 Multirate Signal Processing and Filter Banks (3)

Prereq.: EE 4160 or equivalent and knowledge of linear algebra and vector space analysis. Multi-rate signal processing operations, multi-rate system analysis, maximally decimated and perfect reconstruction filter banks, time frequency analysis, and fundamentals of wavelets.

EE 7200 Advanced Topics in Electronics (3)

May be taken for a max. of 12. hrs. of credit when topics vary.

EE 7220 Semiconductor Devices I: Bipolar (3)

Prereq.: EE 3232 or equivalent. Semiconductor material properties, equilibrium and nonequilibrium processes, physical principles of p-n junctions and quasi-neutral material; modeling of diodes and bipolar transistors.

EE 7222 Semiconductor Devices II: Field Effect (3)

Prereq.: EE 3232 or equivalent. Surface effects; metal-insulator-semiconductor structure; modeling of MOS capacitors and IGFETs.

EE 7230 Physics of Device Electronics (3)

Semiconductor physics and necessary assumptions for tractable device analysis; elements of statistical physics, transport phenomena in solids, band theory of solids and semiconductor junctions.

EE 7232 Small-Geometry and High-Speed Devices (3)

Prereq.: EE 7230 or equivalent. Charge carrier transport in small and high-electron mobility semiconductor devices, hot-electron effects, size effects and heterojunction boundaries, heterostructure devices, tunneling devices, ballistic transport devices and surfaces and interfaces in heterostructures.

EE 7240 Integrated Circuit Engineering (3)

Fabrication processes and device design for monolithic integrated circuits; relation to circuit performance; thin- and thick-film circuits.

EE 7242 VLSI Systems (3)

Prereq.: consent of instructor. Design and implementation of very large scale integrated systems; structured design methodology using MOS technology.

EE 7244 Advanced Lithography and Metrology (3)

Prereq.: EE 7240 or consent of instructor. Physical principles used in state-of-the-art microlithography; optical systems, x-rays, e-beams, resists, measurement and inspection techniques.

EE 7246 Integrated Sensors and Actuators (3)

Prereq.: EE 7240 and EE 4242 or consent of instructor. Sensor principles and design considerations; bulk and surface micromachining fabrication technologies including LIGA; microactuators and microelectromechanical devices; integration of sensors/actuators and electrical circuitry on the same chip.

EE 7247 BioMEMS (3)

Prereq.: consent of instructor. Fundamentals and fabrication techniques of biomicroelectromechanical systems (BioMEMS); technical issues and applications of biomedical microdevices; emerging BioMEMS and lab-on-a-chip technologies.

EE 7248 Mixed-Signal Integrated Circuit Design (3)

Prereq.: EE 4240 and EE 4242 or consent of instructor. Design and technology of analog and mixed analog-digital integrated circuits for signal processing including applications; mixed-signal integrated circuit testing and measurements.

EE 7250 Semiconductor Power Devices (3)

Prereq.: EE 3232 or equivalent. Operation and characteristics of semiconductor energy conversion devices with emphasis on physical mechanisms involved; fabrication of energy conversion devices.

EE 7260 Semiconductor Materials (3)

Theory and application of crystal growth from melt and chemical vapor deposition; preparation and purification of elemental and compound semiconductors; structural properties and their effect on electrical and physical parameters; amorphous semiconductors.

EE 7400 Advanced Topics in Power (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7420 Power System Dynamics (3)

Modern approach to power system transient and dynamic stability studies; detailed synchronous machine models; their linearizations, excitation systems and multimachine system stability analysis.

EE 7422 Advanced Electric Machines

Prereq.: EE 4422 or consent of instructor. Topics on special purpose electric motors used in automation, robots and electric or magnetically levitated vehicles.

EE 7460 Static Power Converters (3)

Prereq.: EE 4460 or equivalent. Design of power converters and AC drives, including voltage controllers, PWM inverters, cycloconverter and switched-mode power supplies.

EE 7480 Harmonics in Power Systems (3)

Power flow in nonsinusoidal systems, measurements, compensation, symmetrization and harmonic suppression.

EE 7490 Advanced Electrical Drives (3)

Prereq.: EE 4490 or consent of instructor. Advanced topics in electric drives including vector control of induction motor drives and permanent magnet synchronous motor drives.

EE 7500 Advanced Topics in Controls (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7510 Advanced Linear Systems (3)

Modern approaches for the analysis and identification of linear, discrete and continuous time, control systems; state variable and fractional description techniques, functional analytic methods.

EE 7525 Robust Control (3)

Prereq.: EE 4580. Internal stability, model uncertainty, robust stability, robust performance, controller parameterizations, design limitations, loop shaping H_∞ control and other optimal robust control design techniques.

EE 7530 System Identification (3)

Prereq.: EE 4660 or equivalent. Conventional parameter estimation and adaptive modeling; control oriented identification; model uncertainties; model validation; review of research literature on system identification.

EE 7560 Topics in Modern System Science (3)

Research literature, operator theory and functional analysis applied to control engineering problems.

EE 7585 Advanced Digital Control Systems (3)

Prereq.: EE 4585. Theory and design of sampled-data control systems: including discretization of continuous-time systems and lifting of sampled-data systems; performance analysis in frequency and time domain; design techniques based on optimal controls; robustness analysis of sampled-data feedback control systems under plant perturbations.

EE 7600 Advanced Topics in Communications (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7615 Digital Communication I (3)

Prereq.: EE 4660 or equivalent. Decision theory, geometric representation of signals, optimum receiver principles, digital modulation schemes, bandwidth and power efficiency, coded modulation.

EE 7625 Advanced Topics in Digital Communications (3)

Prereq.: EE 7615 or equivalent. Time and Frequency domain approaches to transceiver design for communication over frequency selective, inter-symbol-interference (ISI) and multiuser channels.

EE 7630 Detection and Estimation Theory (3)

Prereq.: EE 4660 or equivalent. Hypothesis testing, detection of known and unknown signals, estimation of signal parameters, signal resolution.

EE 7640 Information Theory, Coding and Cryptography (3)

Prereq.: EE 4660 or equivalent. Measures of information, channel capacity, Shannon and Huffman coding, rate-distortion theory, linear codes, cyclic codes, BCH and Goppa codes, convolutional codes, problems of data security, probabilistic ciphers, computational complexity ciphers.

EE 7660 Random Processes II (3)

Prereq.: EE 4660 or equivalent. Sequences of random variables, renewal processes, Markov chains and queueing models.

EE 7674 Wireless Communication Networks (3)

Prereq.: EE 7615. Theory, implementation, standards and security issues in mobile wireless communication networks.

EE 7700 Advanced Topics in Computer Engineering (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

EE 7715 Computer Arithmetic (3)

Prereq.: EE 3755 or equivalent. Number systems; arithmetic algorithms; high performance adders, multipliers, dividers; floating-point arithmetic; residue number systems; hardware implementation.

EE 7720 Advanced Computer Architecture (3)

Prereq.: EE 4720 or equivalent. High performance computer architectures; vector processing; parallel processing and interconnection networks.

EE 7722 GPU Microarchitecture (3)

Prereq.: EE 4720 or equivalent. Organization, programming, and design of graphics processing units (GPUs) and similar devices.

EE 7725 Interconnection Networks (3)

Prereq.: EE 4720 or equivalent. Interconnection network theory, analysis and implementation; shared memory, coherent caches and related topics.

EE 7728 Multiprocessor Computer System Design (3)

Prereq.: EE 4720 or equivalent. Symmetric shared memory multiprocessors, distributed shared memory systems, simultaneous multithreading and chip-multiprocessors.

EE 7730 Image Analysis I (3)

Prereq.: EE 3610 or equivalent. Basic fundamentals and techniques of digital image processing; hardware and software applications, 2D transforms, preprocessing, texture analysis and edge detection; emphasis on application of theory to practical problems.

EE 7750 Machine Recognition of Patterns (3)

Prereq.: EE 4660 or equivalent and knowledge of programming language. Decision functions; Bayesian decision theory; cluster analysis; design of deterministic, stochastic and fuzzy classifiers; unsupervised learning; feature selection.

EE 7770 Internetworking Principles (3)

Prereq.: EE 3710 or equivalent. Internet concepts, networks, and transport layers, IP switching, Routing techniques, Internet security, Firewalls.

EE 7780 Software Design Principles (3)

Prereq.: CSC 3102 or equivalent. Engineering approach to computer software development; structured and modular programming concepts; software design and management; program testing and correctness proofs; diagnostic tools; software measures; other topics from software engineering.

EE 7785 Program Parallelization (3)

Prereq.: EE 3755 or equivalent. Analysis and optimization of programs for a variety of architectures; impact on architectural design.

EE 7790 Structure of Computers and Computations II (3)

Prereq.: EE 4790 or consent of instructor. Mathematical treatment of space and time complexity of computations; formal models of computers and computations.

EE 7795 Models and Methods for Parallel Computation (3)

Prereq.: EE 4740 or consent of instructor. Abstract models of parallel computation; algorithms, complexity and simulations.

EE 8000 Thesis Research (1-12 per sem.)

Prereq.: permission of department. "S"/"U"grading.

EE 9000 Dissertation Research (1-12 per sem.)

Prereq.: permission of department. "S"/"U"grading.

Educational Leadership, Research & Counseling: General Courses

ELRC 7299 Introduction to Scholarship in Education (3)

Restricted to PhD or EdS students in the department or permission of instructor. Introduction to scholarship in education and to demands and expectations of doctoral study.

ELRC 7612 Student Development Theory (3)

Explores the development of students in the higher education environment, including theories and research related to intellectual, moral, ego, psychosocial, career and spiritual development.

ELRC 7811 Seminar in Current Trends in Education (3)

Open only to students who have completed qualifying examination for the doctoral degree. Current issues and trends; sources, bibliography and research in the student's major.

ELRC 7900 Independent Study (1-6)

May be taken for a max. of 12 sem. hrs. of credit. Open to advanced graduate students. Directed individual study under the guidance of a graduate faculty member.

ELRC 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

ELRC 8900 Pre-dissertation Research (1-9)

Prereq.: consent of department.

ELRC 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Educational Leadership, Research & Counseling: Counselor Education

ELRC 4360 Introduction to School Counseling (3)

Introduction to the design, implementation, management and evaluation of comprehensive programs.

ELRC 4361 Counseling Children (3)

Introduction to methods and procedures.

ELRC 4365 Basic Course in Interpersonal Communication (3)

Credit will not be given for both this course and ELRC 7345. Introduction to basic communication skills and counseling techniques.

ELRC 4600 Counseling for Disabling Conditions (3)

Etiology, identification and counseling interventions for conditions and disorders which result in disablement and impaired functioning.

ELRC 4602 Introduction to Counseling Services (3)

Overview of counseling profession; ethical and legal issues in counseling.

ELRC 5300 Special Problems in Guidance and Counseling (3)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. 1 hr. lecture; 4 hrs. lab.

ELRC 7330 Group Techniques and Dynamics in Counseling (3)

Dynamics of small group processes, theories of group counseling and basic group leadership skills.

ELRC 7331 Counseling Theory and Techniques (3)

Review of major counseling theories and intervention methods.

ELRC 7333 Analysis of the Individual (3)

Su Overview of selection, administration, interpretation and use of assessment and evaluation instruments and techniques in counseling.

ELRC 7334 Vocational Counseling (3)

Also offered as HRE 7334. Materials and techniques in vocational counseling of adolescents and adults.

ELRC 7345 Counseling Skills and Interventions (3)

Credit will not be given for both this course and ELRC 4365. Overview of counseling techniques and interventions to facilitate client engagement in the counseling process.

ELRC 7362 Practicum in School Counseling (3-6)

Prereq.: ELRC 4360, ELRC 4365, ELRC 7330, ELRC 7331, ELRC 7395 and consent of instructor. 6-18 hrs. lab in work setting. Supervised experience in elementary, middle or high school settings.

ELRC 7364 Community Agency Counseling Practicum (3-6)

Prereq.: ELRC 4365, ELRC 4600, ELRC 4602, ELRC 7330, ELRC 7331, ELRC 7395 and consent of instructor. 2 hrs. conf.; 1 hr. lab; 6-18 hrs. lab in a work setting. Supervised clinical experience in community agency settings (e.g., counseling center, mental health center).

ELRC 7365 Seminar in Counseling (3)

Prereq.: ELRC 4365 and ELRC 7331 or equivalent. May be taken for a max. of 6 hrs. of credit when topics vary. Consultation with professor and peers regarding problems encountered in implementing counseling services.

ELRC 7391 Counseling Across the Lifespan (3)

Su Assessment of the comprehensive development of clients and design of developmentally appropriate counseling interventions.

ELRC 7393 Multicultural Counseling (3)

Su Overview of cross-cultural counseling skills and review of factors which influence the behaviors of individuals from diverse populations.

ELRC 7395 Family Counseling (3)

Introduction to family system principles and their application to problem assessment, including family dynamics, family assessment, developmental stages, ethical and cultural issues.

ELRC 7397 Special Topics in Counseling (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. 1 hr. lecture; 4 hrs. lab.

ELRC 7399 Supervised Counseling Internship (3-9)

Prereq.: ELRC 7362 or ELRC 7364 and consent of instructor. May be taken for a max. of 9 hrs. of credit. 2 hrs. conf.; 20-40 hrs. per week at a clinical setting, serving children, adolescents, adults or families.

Educational Leadership, Research & Counseling: Educational Administration

ELRC 7401 Administration of School Personnel (3)

Role of the school administrator in personnel planning, staff development and employee relationships.

ELRC 7402 Organizational Research in Educational Administration (3)

Prereq.: consent of instructor. Primarily for doctoral students in educational administration. Research, bibliography and source materials; critical examination of organizational research studies.

ELRC 7404 Internship in Educational Administration (3-6)

Prereq.: consent of instructor. Pass-fail grading. May be taken for a max. of 6 sem. hrs. of credit. For advanced graduate students qualified for internship in educational administration.

ELRC 7407 Politics, Policy and Administration in Education (3)

Prereq.: consent of instructor. Primarily for doctoral students in educational administration. Critical analysis of educational policy and its development.

ELRC 7422 Introduction to School Improvement/Action Research (3)

School effectiveness research; teacher effectiveness research; school improvement; action research; based on the knowledge of these literatures, students will be required to develop a research proposal whose objective is to improve school and/or faculty performance.

ELRC 7423 Advanced School Improvement/Action Research (3)

Prereq.: ELRC 7422. Students refine and administer an action research project at a selected school site. Students will assess the success of their interventions through multiple measures and write a research report that reflects their experiences throughout the semester. In class discussions focusing on methodological difficulties that students encounter and how to overcome them.

ELRC 7432 Best Practices of Principal Leadership I (3)

Introduction to the knowledge and experiential base to support decision-making and action at a level of whole school responsibility.

ELRC 7433 Best Practices of Principal Leadership II (3)

Prereq.: credit or registration in ELRC 7432. Knowledge and experiential base to support decision-making and action at a level of whole school responsibility.

ELRC 7434 Best Practices of Principal Leadership III (3)

Prereq.: ELRC 7433. Builds upon students' knowledge and experiential base to support decision-making and action at a level of whole school responsibility.

ELRC 7435 Best Practices of Principal Leadership IV (3)

Prereq.: credit or registration in ELRC 7434. Extends the knowledge and experiential base to support decision-making and action at a level of whole school responsibility.

ELRC 7450 Supervision of Instruction in Elementary and Secondary Schools (3)

Theories, principles, and practices concerning the role of the supervisor in today's multicultural school settings.

ELRC 7451 Supervision of Student Teaching (3)

Principles of planning, observing and evaluating student teaching; participation in student conferences.

ELRC 7602 Organization and Administration of Higher Education (3)

Organization and administration of postsecondary education in the United States and abroad; organizational theory; organization and governance structure of American higher education; patterns of institutional administration.

ELRC 7802 Theory Development in Educational Administration (3)

Prereq.: ELRC 7006, ELRC 7402 and ELRC 7407 or equivalent; and consent of instructor. Primarily for doctoral students in educational administration. Critical analysis of approaches to inquiry; development of theory in educational administration.

ELRC 7805 Perspectives on Leadership (3)

Examines theories and practices of leadership from multiple perspectives.

ELRC 7806 Leadership for Learning (3)

Prereq.: ELRC 7805 or equivalent. Examination of leadership theories and practices relevant to K-12 school settings.

ELRC 7890 Seminar: Educational Administration (1-3)

Prereq.: master's degree. May be taken for a max. of 9 sem. hrs. of credit when topics vary. Advanced topics in educational administration.

Educational Leadership, Research & Counseling: Educational Foundations

ELRC 3600 Women, Gender and Leadership (3)

Also offered as WGS 3600.

ELRC 7000 Seminar in Philosophy of Education (3)

Su Theories of education and schooling with special focus on the context of pluralistic societies.

ELRC 7001 Ethics and Educational Leadership (3)

Study of ethical theory, judgement and practice in educational contexts.

Educational Leadership, Research & Counseling: Educational Research

ELRC 4006 Introduction to Applied Statistics in Educational Research (3)

Basic descriptive and inferential statistics in educational research; systematic examination and interpretation of statistical information in published educational research.

ELRC 4249 Understanding and Applying Research in Education (3)

For the specialist or nonthesis master's degree student. Instructing teachers and administrators to become intelligent consumers of research.

ELRC 7006 Educational Statistics (4)

Prereq.: ELRC 4006 or equivalent. 3 hrs. lecture; 2 hrs. lab. Descriptive and inferential statistics in educational research, computerized data analysis using SPSS or SAS; correlation and regression; normal, t, chi-square and F distributions; hypotheses testing and interval estimation; analysis of variance, nonparametric chi-square test.

ELRC 7010 Principles of Testing and Measurement (3)

Prereq.: ELRC 7006. Construction of measurement instruments for research purposes; utilization of standardized tests and inventories in research; measurement in multicultural and cross-cultural contexts; implications of measurement reliability and validity for research design and statistical analysis.

ELRC 7016 Advanced Educational Statistics (4)

Prereq.: ELRC 7006 or equivalent. 3 hrs. lecture; 2 hrs. lab. Advanced statistical procedures and computerized data analysis using SPSS or SAS; analysis of variance and covariance; application of multiple regression techniques in educational research.

ELRC 7220 Education Program Evaluation (3)

Prereq.: ELRC 4249 and either ELRC 4006 or ELRC 7006. Current models and issues in educational evaluation as a professional practice; design and development of a comprehensive evaluation plan that includes specification of theoretical framework, problem identification, data collection/analysis procedures, report writing format and dissemination plans.

ELRC 7241 Educational Research Methodology (3)

Prereq.: ELRC 4006 or ELRC 7006. Completion of a research proposal, preferably a pre-dissertation proposal, is required. Comprehensive and general review of qualitative and quantitative research methods in education.

ELRC 7243 Qualitative Methods in Educational Research (4)

Prereq.: ELRC 4249 or ELRC 7241. 3 hrs. lecture; 2 hrs. lab. Introduction to qualitative research traditions and methods in education, including: ethnography, grounded theory, and case study; major methods including observational techniques, interviewing and document analysis; philosophical issues regarding the qualitative research approach; emphasis on qualitative data analysis, including the use of computer programs, such as ATLAS.ti.

ELRC 7248 Introductory Research Practicum (3)

By arrangement with a state agency, a local school system or other educational agency, students assist in the conducting of a variety of research methodologies under the supervision of the course instructor and the professional practice supervisor at the site.

ELRC 7249 Advanced Research Practicum (3)

Prereq.: ELRC 7248. By arrangement with a state agency, a local school system or other educational agency, students assume a leadership role in conducting research studies under the supervision of the course instructor and the professional practice supervisor at the site.

ELRC 7270 Mixed Methods Research in Education (3)

Prereq.: ELRC 4249 or ELRC 7241. Mixed methods as a separate research methodology integrating both the quantitative and the qualitative approaches.

ELRC 7280 Content Analysis (3)

Prereq.: ELRC 4249 or ELRC 7241. Principles, theories and strategies for systematically examining the content of textual and other mediated communication.

ELRC 7290 Seminar: Educational Research Methodology (1-3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Advanced topics in educational research methods.

Educational Leadership, Research & Counseling: Educational Technology

ELRC 2507 Introduction to Classroom Technology (3)

Introduction to technology tools and effective technology integration methods to enhance student learning.

ELRC 3500 Utilization of Instructional Materials (3)

Open only to candidates for teacher certification. Basic techniques for preparing effective instructional materials.

ELRC 4507 Computer Technology in Education (3)

Applications of computers in instruction; educational data processing, computer-assisted and computer-managed instruction; information storage and retrieval; use of micro/mini computers.

ELRC 4535 Educational Telecommunications and the Internet (3)

Prereq.: ELRC 4507 or equivalent. 2 hrs. lecture; 2 hrs. lab. Use of telecommunication tools found in educational settings; integration of telecommunications resources into instruction; research using the World Wide Web; design, development and evaluation of Web-based materials that include multimedia; security and legal issues; configuration of school and district networks; distance education applications; and emerging trends and research issues.

ELRC 7240 Critical Analysis of Current Research in Educational Media (3)

Su *Prereq.: ELRC 4507 or equivalent.* Analysis of current literature in the field; evaluation of current and needed research; systems approach to solving instructional problems.

ELRC 7420 Administration of Technology Programs (3)

Prereq.: ELRC 4507 or consent of instructor. Primarily for personnel responsible for planning, implementing and evaluating educational technology programs. Topics include applications, facilities, finances, acquisitions and staff development.

ELRC 7500 Technology in Educational Leadership (3)

Overview of salient advances in theory, research and practice in educational technology; examining leadership roles in regard to emerging trends and issues in educational technology; analyzing current technology integration models.

ELRC 7502 Principles of Distance Education (3)

Prereq.: ELRC 4507 or consent of instructor. Applications of the principles of distance education to teaching and learning in educational and training contexts.

ELRC 7503 Instructional Design (3)

Prereq.: ELRC 4507 or approved equivalent. Instructional design theories and models and their application in solving real world instructional/learning problems.

ELRC 7504 Educational Technology and the Law (3)

Legal issues concerning educational technology.

ELRC 7505 Design and Development of Multimedia Instructional Units (3)

Prereq.: ELRC 4507 and ELRC 7503 or equivalent. Instructional design for computer-assisted instruction; emphasis on learning theory, events of instruction, structuring instructional sequences for maximum content retention.

ELRC 7516 Practicum in Educational Media (3-6)

Prereq.: ELRC 7420 or ELRC 7505; or consent of instructor. 9-18 hrs. lab. Practical experience in teaching, producing, utilizing and administering educational media.

ELRC 7517 Seminar in Educational Media (3)

Prereq.: ELRC 7240 and ELRC 7420 or consent of instructor. Advanced topics in instructional technology.

ELRC 7525 Professional Development for K-12: Technology Integration (3)

Analyze effective professional development strategies; plan, design and implement and evaluate technology staff development activities.

ELRC 7535 Advanced Telecommunications and Electronic Learning (3)

Prereq.: ELRC 4507 or consent of instructor. Scope and elements of the online environment; technologies and strategies for online teaching and learning; design, development or conversion of courses for online delivery; course management, assessment and evaluation; policy issues.

ELRC 7550 Theory and Research in Educational Technology (3)

Prereq.: ELRC 7240 and ELRC 7503. For advanced graduate students. Theoretical foundations and research in educational technology; emphasis on theories of communication, learning theories, educational psychology and behavioral sciences.

Educational Leadership, Research & Counseling: Higher Education

ELRC 4364 Student Affairs in Higher Education (3)

Basic concepts and issues in the college student affairs field.

ELRC 7600 Issues of Race and Gender in Higher Education (3)

Historical and socio-political perspectives on the higher education experiences of women, African-Americans, Asian-Americans and Hispanics, focusing primarily on the period from the 1960s to the present.

ELRC 7601 Foundations of Higher Education (3)

History of the sociological and philosophical foundations for higher education in the United States.

ELRC 7603 Leadership in Higher Education (3)

Analysis of leadership issues and theory relating to postsecondary education, including the college presidency and academic governance; institutional culture; student diversity, curricular change and new providers of higher education.

ELRC 7605 Higher Education and the Law (3)

Legal issues concerning higher education, including tenure, academic freedom, campus crime, sexual harassment, laws against discrimination, student discipline and liability for accidents and injuries.

ELRC 7606 Curriculum and College Teaching (3)

Critical analysis of college curriculum and approaches to teaching; historical development of curricular models; introduction to teaching and learning theories.

ELRC 7609 Strategic Planning in Higher Education (3)

Strategic plans for institutions of higher education; processes by which those plans are developed; higher education strategy within the context of the cultural and competitive environment; emphasis on current topics in organizational strategy.

ELRC 7610 Assessment and Evaluation in Higher Education (3)

Analysis of assessment and evaluation practices in higher education; role of assessment in policy development and strategic planning.

ELRC 7611 College Students in the United States (3)

Critical analysis of issues related to college students in the United States, including access, choice, climate, student organizations and development and identity.

Environmental Management Systems

EMS 1011 Environment and Technology: Perspective on Environmental Problems (3)

See ENVS 1000.

EMS 2011 Analysis of Environmental Issues (3)

Also offered as AGRO 2011 and HORT 2011. Prereq.: ENGL 1001. An introduction to reading, writing and speaking in the sciences, with an emphasis on environmental topics.

EMS 2051 Soil Science (4)

See AGRO 2051.

EMS 3040 Applied Environmental Management (4)

Prereq.: EMS 1011, ENGL 2000. 3 hrs. lecture; 3 hrs. lab. Applications of planning, management and decision-making to environmental policy, systems and management; evaluation of environmental decision making; environmental ethics; analysis of environmental issues at the local, state and national levels.

EMS 3045 Soil Conservation (2)

See AGRO 3040.

EMS 3050 Environmental Regulations and Compliance (3)

Prereq.: EMS 1011, ECON 2030 or AGECE 2003. Local, state and federal environmental regulations; enforcement of and compliance with regulations; roles of regulatory agencies.

EMS 3090 Environmental Internship (3)

Prereq.: permission of department and junior standing. Credit will not be given for this course and AGRO 3090. Professional experience in some aspect of environmental management; student must submit a proposal explaining internship goals and education component; reports, employer evaluation, paper and presentation are required.

EMS 4010 Applied Ecology (2)

See ENVS 4010.

EMS 4020 Quantitative Risk Assessment (3)

Prereq.: six hours of chemistry and six hours of biological sciences, MATH 1431 or equivalent. Assessment of environmental risks; interactions of pollution/toxins with the human body; managing and predicting risks.

EMS 4030 Environmental Permit Writing (3)

Prereq.: ENGL 3002 or ENGL 3101, EMS 3040. May not be taken for graduate credit. Permit writing; permitting process; environmental assessment; environmental impact statements; communicating technical information.

EMS 4055 Chemical Properties of Soil (4)

See AGRO 4055.

EMS 4056 Microbial Ecology and Nutrient Cycling in Soils (4)

See AGRO 4056 or BIOL 4256.

EMS 4077 Environmental Soil Physics (3)

See AGRO 4077.

EMS 4999 Senior Project in Environmental Management (1-3)

Prereq.: permission of department, senior standing, and a minimum GPA of 3.00 on all course work taken in the major. This course may be repeated for up to 6 hrs. of credit. Course may not be taken for graduate credit. Student will develop and submit a research proposal to the faculty; student will work on a specific project under the supervision of a faculty member. This course is intended to prepare students for graduate work in some area of environmental management.

EMS 6011 Topics in Plant, Environmental and Soil Sciences for Teachers (3)

Also offered as AGRO 6011 and HORT 6011. Prereq.: permission of department. May be taken for a max. of 6 hrs. of credit when topics vary. Key concepts in life and earth sciences related to K-12 science education standards explored through inquiry-based investigations and other pedagogical approaches.

EMS 7057 Advanced Soil Physics (4)

See AGRO 7057.

Engineering

ENGR 1050 Introduction to Engineering (2)

Introduction to engineering history, disciplines and principles of design.

ENGR 2050 Undergraduate Seminar (1)

Pass-Fail grading. For engineering students only. Topics related to academic, professional and career development for engineering students. Speakers will include on-campus representatives, industrial, governmental and consulting professionals and education experts.

ENGR 2785 Manufacturing, Technology & Society (3)

Su History and development of manufacturing and technology and its influence on production, society and environment. Course available only as part of a study abroad program.

ENGR 7050 Future Faculty Development Seminar (2)

Pass-fail grading. Open to all engineering and construction management graduate students. Provides fundamental skill sets and knowledge needed to successfully prepare for an academic career in engineering.

ENGR 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

English

ENGL 0004 English Composition (5)

Pass-no credit grading. For international students whose diagnostic tests indicate the need for intensive work in basic writing skills. Not for degree credit. Required during the first semester of residence for all international students (graduates, undergraduates and transfer students) who are not excused on the basis of the placement examination required of every new international student.

ENGL 1001 English Composition (3)

[LCCN: CENL 1013, English Composition I] This is a General Education course. *Placement by department.* Introduction to analytical writing and research-based inquiry.

ENGL 1004 English Composition (3)

This is a General Education course. *Same as ENGL 1001, with emphasis on usage and idiom problems specific to international students. Prereq.: ENGL 0004 or placement by department and permission of instructor. Required during the first semester of residence for all international students (graduates, undergraduates and transfer students) who demonstrate on the placement examination need for work in English, but not at the intensive level of ENGL 0004. Graduate students graded pass-no credit.*

ENGL 1005 English Composition (3)

This is a General Education course. *Prereq.: ENGL 1004 or placement by the department and permission of instructor. Graduate students graded pass-no credit. Credit will not be given for both 1005 and ENGL 2000. For international students, with continued work on problems specific to international students.*

ENGL 1051 Spoken English for International Graduate Assistants (3)

Prereq.: oral interview and permission of department. Pass/no credit grading. May be taken for a max. of 9 sem. hrs. of credit. For current and potential international graduate assistants only. Developing spoken English skills (pronunciation, stress, intonation, rhythm); improving overall comprehensibility through tasks/activities, drills and videotaped oral presentations.

ENGL 2000 English Composition (3)

[LCCN: CENL 1023, English Composition II] This is a General Education course. *Prereq.: ENGL 1001 or equivalent and 39 total credit hours earned by the time of enrollment.*

Practice in argument writing and research-based inquiry.

ENGL 2001 Advanced English Composition (3)

Credit will not be given for both ENGL 2001 and ENGL 3101. Theory and practice of exposition, description and narration.

ENGL 2002 Business Writing (3)

[LCCN: CENL 2513, Foundations of Professional Writing (Lower Level)] *Credit will not be given for both ENGL 2002 and ENGL 2102.* Preparing business documents such as reports, articles and letters.

ENGL 2005 Introduction to Writing Short Stories (3)

[LCCN: CENL 2523, Creative Writing (Various Genres)] *Prereq.: ENGL 2024, ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2231, ENGL 2270, ENGL 2593, ENGL 2673 or ENGL 2674.* Writing short stories for workshop criticism; practice in techniques of using point of view, dialogue, setting and characterization.

ENGL 2007 Introduction to Writing Poetry (3)

[LCCN: CENL 2523, Creative Writing (Various Genres)] *Prereq.: 3 hrs. from ENGL 2024, ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2231, ENGL 2270, ENGL 2593, ENGL 2673, or ENGL 2674.* Writing poems for workshop criticism; practice in both open and closed forms; emphasis on contemporary techniques and prosody.

ENGL 2008 Introduction to Writing Drama (3)

[LCCN: CENL 2523, Creative Writing (Various Genres)] *Also offered as THTR 2008.* Writing plays for workshop criticism; practice in techniques of exposition, characterization and dramatization.

ENGL 2009 Introduction to Writing Screenplays (3)

[LCCN: CENL 2523, Creative Writing (Various Genres)] *Prereq.: 3 hrs. from ENGL 2024, ENGL 2025, ENGL 2027, ENGL*

2029, ENGL 2123, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2220, ENGL 2231, ENGL 2270, ENGL 2593, ENGL 2673 or ENGL 2674. Writing screenplays for workshop criticism; techniques of exposition, characterization and dramatization.

ENGL 2012 Practical Grammar and Usage (3)

Practical grammar, usage and punctuation; effective word choices and sentences; elimination of common errors; use of dictionaries; current language controversies, regional and social language variation.

ENGL 2024 Critical Strategies (3)

This is a General Education course. *Credit will not be given for both this course and ENGL 2824.* Skills for reading and writing about literature from a variety of critical perspectives; approaches such as reader response, psycho-analysis, myth, new historicism and feminism applied to a range of literary texts.

ENGL 2025 Fiction (3)

[LCCN: CENL 2303, Introduction to Fiction] **This is a General Education course.** Skills for reading and writing about fiction; attention to generic conventions and critical perspectives; section emphasis may vary, consult departmental handout.

ENGL 2027 Poetry (3)

[LCCN: CENL 2313, Introduction to Poetry/Drama] **This is a General Education course.** Skills for reading and writing about poetry; attention to generic conventions and critical perspectives; section emphasis may vary, consult departmental handout.

ENGL 2029 Drama (3)

[LCCN: CENL 2313, Introduction to Poetry/Drama] **This is a General Education course.** Skills for reading and writing about drama; attention to generic conventions and critical perspectives; section emphasis may vary, consult departmental handout.

ENGL 2085 Science Fiction Studies (3)

Science fiction literature, particularly that of the 20th century.

ENGL 2086 Fantasy Literature (3)

Variety of literary types employing conventions of the fantastic; uses of older literatures in modern fantasy novels; themes such as quest for identity, ideal of the hero and nature of good and evil.

ENGL 2102 Business Writing for International Students (3)

Credit will not be given for both ENGL 2002 and 2102. Preparing business documents such as reports, articles and letters; oral presentation of reports.

ENGL 2123 Studies in Literary Traditions and Themes (3)

[LCCN: CENL 2323, Introduction of Literature] This is a General Education course. *Credit will not be given for both this course and ENGL 2823.* Skills for reading and writing about literature; attention to historical development, context and critical perspectives; topics such as "The Epic," "Imagining the Family," "Literature and the City"; section emphasis will vary, consult departmental handout.

ENGL 2148 Shakespeare (3)

This is a General Education course. The more popular plays.

ENGL 2173 Louisiana Literature (3)

Fiction, poetry, essays and drama of Louisiana.

ENGL 2201 Introduction to World Literary Traditions (3)

[LCCN: CENL 2203, World Literature I] This is a General Education course. See CPLT 2201.

ENGL 2202 Introduction to Modern World Literature (3)

[LCCN: CENL 2213, World Literature II] This is a General Education course. See CPLT 2202.

ENGL 2220 Major British Authors (3)

[LCCN: CENL 2123, Major British Writers] **This is a General Education course.** Selected major British authors from the Anglo-Saxon period to the present.

ENGL 2222 Popular Fictions (3)

Critical analysis of popular literature, television programs, films and advertisements; emphasis on development of textual interpretative skills.

ENGL 2231 Reading Film (3)

This is a General Education course. Introduction to analytical study of film; mastery of film language through formal, cultural, and theoretical approaches to film study; emphasis on writing about film.

ENGL 2270 Major American Authors (3)

[LCCN: CENL 2173, Major American Writers] **This is a General Education course.** Selected major American authors from the Colonial period to the present.

ENGL 2300 Interpreting Discourse (3)

This is a General Education course. Study of and writing about discourse forms (fiction, popular and critical texts, technical and legal documents), using linguistic, rhetorical and cultural analysis.

ENGL 2423 Introduction to Folklore (3)

[LCCN: CENL 2503, Mythology or Folklore] **This is a General Education course.** *Also offered as ANTH 2423.* Folklore genres of the world; sources of folklore; literary, psychological, sociological, anthropological and historical approaches to folk material; relationships between folklore and written literature.

ENGL 2593 Images of Women: An Introduction (3)

[LCCN: CENL 2413, Introduction to Women's Literature] This is a **General Education** course. Critical analysis of women's representations, addressing a range of traditional and/or popular genres, historical periods and/or critical approaches; emphasis on developing textual and interpretive skills; section emphasis may vary, consult departmental handout.

ENGL 2673 Literature and Ethnicity (3)

This is a **General Education** course. Literature of America's ethnic cultures.

ENGL 2674 Introduction to African-American Literature (3)

[LCCN: CENL 2403, Introduction to African American Literature] This is a **General Education** course. Major figures and popular texts of black American literature, including writers of fiction, poetry, drama and essays; influence of genre on the articulation of common political and social themes.

ENGL 2710 Descriptive Grammar of English (3)

Also offered as LING 2710. Examination of what every English speaker has internalized about English, including sentence structure, sound patterns and word formation.

ENGL 2823 HONORS: Studies in Literary Traditions and Themes (3)

This is a **General Education** course. *Honors equivalent of ENGL 2123. Credit will not be given for both this course and ENGL 2123.*

ENGL 2824 HONORS: Critical Analysis of Literature (3)

This is a **General Education** course. *Honors equivalent of ENGL 2024. Credit will not be given for both this course and ENGL 2024. Study and writing about literary forms.*

ENGL 2920 Independent Work (1)

Prereq.: sophomore standing and an average of not less than 2.00 in all previous English courses. Consult department before registering. Reading, conferences and reports under departmental faculty direction.

ENGL 2921 Independent Work (1)

Prereq.: sophomore standing and an average of not less than 2.00 in all previous English courses. Consult department before registering. Reading, conferences and reports under departmental faculty direction.

ENGL 2922 Independent Work (1)

Prereq.: sophomore standing and an average of not less than 2.00 in all previous English courses. Consult department before registering. Reading, conferences and reports under departmental faculty direction.

ENGL 3000 HONORS: Honors Thesis (3)

Conclusion of the English honors program; for details, consult the department.

ENGL 3002 Technical Writing (3)

Prereq.: junior status. Credit will be given for only one of the following: ENGL 3002, ENGL 3003 and ENGL 3102. Training in skills required of practicing scientists, engineers and technical managers.

ENGL 3003 Technical Writing for Nontechnical Majors (3)

Prereq.: junior status. Credit will not be given for both ENGL 3002 and 3003 and ENGL 3102. This course will not substitute for ENGL 3002 requirement. Formats and processes of writing found in business, science, government and industry.

ENGL 3004 Writing with Style: Advanced Expository Prose (3)

Experimentation with different styles of writing in a work-shop format.

ENGL 3015 Composition Tutoring (3)

Prereq.: consent of instructor. 1 hr. lecture; 6 hrs. lab. Composition theory as applicable to undergraduate tutoring.

ENGL 3020 British Literature I: The Middle Ages, Renaissance and 18th Century (3)

Survey of English literature from the Anglo-Saxon period through Chaucer, Shakespeare, the 17th and 18th centuries.

ENGL 3022 British Literature II: Romantics, Victorians and Moderns (3)

Survey of British literature from the French Revolution through the Industrial Revolution into the 20th century.

ENGL 3024 Criticism (3)

Influential works of literary criticism from the classical to the modern period.

ENGL 3070 American Literature I: Forging a Nation (3)

Emergence of an American literature and national consciousness in major writings from the Colonial era to the Civil War.

ENGL 3072 American Literature II: Coming of Age (3)

American literature from the Civil War to the present; realism, naturalism, modernism; effects of industrialization, immigration, the women's movement, the civil rights struggle, the world wars.

ENGL 3080 Post-colonial Literature (3)

Survey of literature from former British colonies in South Asia, Africa and the Caribbean; colonialism; nationalism; independence; diaspora; transnationalism; hybridity; women's rights; building a new nation, etc.

ENGL 3084 Modern Criticism (3)

Influential works of literary criticism and theory written in the 20th century.

ENGL 3101 Legal Writing (3)

Credit will not be given for both this course and ENGL 2001. Discussions and writing assignments tailored to forms of writing common in law and in law-related fields; emphasis on writing clear, precise, effective prose.

ENGL 3102 Technical Writing for International Students (3)

Prereq.: junior status. Credit will be given for only one of the following: ENGL 3002, ENGL 3003, 3102. Training for non-native speakers of English in skills required of practicing scientists, engineers and technical managers.

ENGL 3124 The Literature of the English Bible (3)

Also offered as REL 3124. Literary themes and forms in the King James version; particular reference to the literary influence of the Bible on later literature.

ENGL 3133 Introduction to Nonfiction Film and Video (3)

Historical and theoretical background in the genre; filmmakers such as Grierson to Varda, Moore, McElwee, Folman, Caouette. Production work when chosen by students.

ENGL 3201 Language Development and Diversity (1)

Prereq.: EDCI 2001. Concurrent enrollment in EDCI 3001. Usually offered in fall semester only. Language development and diversity of adolescent speakers, writers and readers of English.

ENGL 3202 Dynamics of Learning in the English Classroom (1)

Prereq.: EDCI 3001 and ENGL 3201. Concurrent enrollment in EDCI 3136. Usually offered in spring semester only. 3 hrs. lab/field experience in multicultural settings. Dynamics of learning in middle school and high school English classes, including methods of small group and whole class interaction and instruction, including integration of technology.

ENGL 3220 Major Themes in Literature (3)

May be taken for a max. of 6 hrs. of credit. Consult department for topic to be offered. Examination of a particular theme (e.g., revolution, quest or spiritual crisis) in the works of several authors crossing historical and cultural boundaries.

ENGL 3222 Survey of Popular Genres (3)

Survey of such genres as ballads, miracle and morality plays, broadsides, melodrama, romance, detective fiction, science fiction, westerns, situation comedies.

ENGL 3223 Adolescent Literature (3)

See also EDCI 3223. Critical analysis and survey of literatures with adolescents as main characters and written for adolescent and adult audiences.

ENGL 3300 Rhetoric: Texts and Historical Contexts (3)

Development of rhetoric and writing within their cultural contexts; modes of writing and rhetoric particular to historical periods, classical to modern.

ENGL 3301 Writing: Practice, Pedagogy and History (3)

Cultural, technological and historical influences on writing, the teaching of writing and today's teaching practices.

ENGL 3310 Historical Perspectives on Language Issues (3)

Also offered as LING 3310. A writing intensive course. Survey of major issues in the history of language study.

ENGL 3384 Cultural and Textual Studies (3)

Introduction to the theory and practice of cultural studies; reading of theoretical statements; analysis of exemplary texts (films, videos, literary works, autobiographies, historical and legal documents).

ENGL 3401 The Study of Folklore (3)

See ANTH 3401.

ENGL 3593 Survey of Women and Literature (3)

Significance of gender for the author, the reader and the work itself; connections between texts and society; literary influences and relations between mainstream and nontraditional literature.

ENGL 3674 Survey of African-American Literature (3)

Literature of the black experience in the U.S. from slave narratives to the present.

ENGL 3716 Dialects of English (3)

Also offered as LING 3716. Regional and/or social variation in pronunciation, grammar and vocabulary.

ENGL 3720 Methods for Teaching English as a Second Language (3)

Also offered as LING 3720. Theories and practical approaches for teaching English as a second language to elementary, secondary and adult education students.

ENGL 3821 HONORS: Seminar (3)

Prereq.: permission of department. Normally open only to juniors and seniors. Topics vary, consult departmental handout.

ENGL 3822 HONORS: Seminar (3)

Prereq.: permission of department. Normally open only to juniors and seniors. Topics vary, consult departmental handout.

ENGL 3823 HONORS: Seminar (3)

Prereq.: permission of department. Normally open only to juniors and seniors. Topics vary, consult departmental handout.

ENGL 3824 HONORS: Seminar (3)

Prereq.: permission of department. Normally open only to juniors and seniors. Topics vary, consult departmental handout.

ENGL 3825 HONORS: Seminar (3)

Prereq.: permission of department. Normally open only to juniors and seniors. Topics vary, consult departmental handout.

ENGL 3920 Independent Study (1-3)

May be taken for a max. of 3 hrs. of credit. Readings, reports and conferences under departmental faculty direction.

ENGL 3925 HONORS: Independent Work (1)

Prereq.: GPA of at least 3.00 in all work taken and permission of department. May not be taken by students who have already completed ENGL 2920, ENGL 2921, ENGL 2922. Consult department before scheduling course. Reading, conferences and reports under departmental faculty direction.

ENGL 3927 HONORS: Independent Work (1)

Prereq.: GPA of at least 3.00 in all work taken and permission of department. May not be taken by students who have already completed ENGL 2920, ENGL 2921, ENGL 2922. Consult department before scheduling course. Reading, conferences and reports under departmental faculty direction.

ENGL 3929 HONORS: Independent Work (1)

Prereq.: GPA of at least 3.00 in all work taken and permission of department. May not be taken by students who have already completed ENGL 2920, ENGL 2921, ENGL 2922. Consult department before scheduling course. Reading, conferences and reports under departmental faculty direction.

ENGL 3930 Internship in English (1-3)

Prereq.: permission of department. Normally open to only juniors and seniors. May be taken for a max. of 3 sem. hrs. of credit. Program of study, research project, book discussion, conferences with faculty mentor, and work in a position related to writing and critical analysis, such as editing and publishing.

ENGL 4000 Special Projects for Creative Writing Majors (3)

Prereq.: permission of department; at least one 2000-level course in creative writing. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Explorations in a wide variety of projects that basic courses are unable to accommodate.

ENGL 4001 Writing Essays and Reviews (3)

Prereq.: at least one 2000-level course in creative writing. Essays and reviews as literary forms, with guided practice in writing both.

ENGL 4002 Scientific and Professional Writing for Peers (3)

Individual instruction. Students must have well-defined projects. Credit will not be given for this course and OCS 4038. Principles and practice of effective research writing in academic and professional settings; emphasis on translating research results into publishable articles and effective grant proposals.

ENGL 4005 Short Story Writing (3)

Prereq.: ENGL 2005. Guided practice in short story writing; techniques involved.

ENGL 4006 Writing the Novel (3)

Prereq.: at least one 2000-level course in creative writing. Guided practice in writing the novel; techniques involved.

ENGL 4007 Writing Poetry (3)

Prereq.: ENGL 2007. Guided practice in writing poetry; techniques involved.

ENGL 4008 Writing Drama (3)

Also offered as THTR 4008. Prereq.: at least one 2000-level course in creative writing. Guided practice in writing plays; techniques involved.

ENGL 4009 Advanced Screenwriting Workshop (3)

Prereq.: consent of instructor and ENGL 2009. Practice in advanced screenwriting; students will be required to write a full-length screenplay or teleplay.

ENGL 4023 Studies in Life Writing (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as St. Augustine, Margery Kempe, Montaigne, Rousseau, Franklin, Douglass, Adams, Stein, Malcolm X; topics such as "Autobiography, Memoir, and Diary," "Biography," "Slave Narrative," "Autobiographical Fiction."

ENGL 4027 Studies in Lyric, Epic and Other Poetic Forms (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Poets such as Sidney, Spenser, Milton, Wordsworth, Keats, Dickinson, Whitman, Yeats, Stevens, Wheatley, Rich; topics such as "Development of the English Epic," "Love Lyrics and the Representation of Women."

ENGL 4028 Studies in Drama (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Marlowe, Jonson, Congreve, Sheridan, Shaw, Synge, O'Neill, Miller; topics such as "The Beginnings of English Drama," "Shakespeare's Contemporaries," "Irish Drama," "Women in the Theatre."

ENGL 4040 Studies in the Age of Elizabeth (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Sidney, Spenser, Marlowe, Shakespeare; developments in romantic epic, lyric, comedy, tragedy, devotional literature; topics such as "Quest for Utopia," "Psychology of Love," "Theatre and Court."

ENGL 4050 Studies in the Restoration and 18th Century (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Dryden, Behn, Swift, Pope, Equiano, Fielding, Richardson, Austen; developments in satire, comedy of manners, the novel; topics such as “The Line of Wit,” “Literature and Empire.”

ENGL 4055 Studies in the Novel and the Idea of Narrative (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Novels such as Tristram Shandy, Madame Bovary, The Trial, To the Lighthouse, Beloved; theorists such as Booth, Bakhtin, Kermode, Girard, Barthes, Kristeva, Said; topics such as time, structure, voicing, self-reflexivity.

ENGL 4060 Studies in the Romantic Movement (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Blake, Wollstonecraft, William and Dorothy Wordsworth, Coleridge, Byron, Percy and Mary Shelley, Keats; topics such as “Romanticism and the French Revolution,” “The Poetic Imagination,” “The Romantic Novel.”

ENGL 4062 Studies in the Victorian Age (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Authors such as Dickens, the Brontës, Thackeray, Eliot, Tennyson, Browning, Arnold, Ruskin, Wilde; topics such as “The Bildungsroman,” “London, Crime, and Victorian Literature,” “The Victorian Heroine.”

ENGL 4070 Studies in American Literature to 1865 (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Franklin, Poe, Emerson, Hawthorne, Douglass, Melville, Whitman, Dickinson; themes such as American identity, nature and culture; topics such as “The Puritan Imagination,” “Rethinking the American Renaissance.”

ENGL 4071 Studies in American Literature since 1865 (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Twain, James, Wharton, Eliot, Moore, Hughes, Cather, Ellison, Faulkner; developments in the novel, poetry, nonfiction prose; topics such as “The American Self,” “Naturalism,” “Postmodernism.”

ENGL 4080 Studies in Modernism (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Pound, Eliot, Stein, Joyce, Woolf, and Faulkner; topics such as “The Avant-Garde Movements in the Arts,” “Nationalism and Literature,” “War Poetry,” “The Expatriates.”

ENGL 4086 Studies in the Short Story (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Authors such as Chekhov, Joyce, Hemingway, Cather, Wright, Garcia Marquez, Flannery O'Connor; theorists such as Poe, Frank O'Connor, Friedman, Pratt; problems such as short story sequences, beginnings and endings, compression, conflict.

ENGL 4102 Capstone Seminar in Writing Poetry (3)

Prereq.: ENGL 4007, 92 total credit hrs. and 27 hrs. in English beyond ENGL 2000 or permission of instructor. Advanced seminar in which students consolidate their knowledge in writing poetry and obtain a perspective on the significance of that knowledge. Independent research project.

ENGL 4104 Capstone Seminar in Literature (3)

Prereq.: for English Majors with 92 total credit hrs. and 27 hrs. in English beyond ENGL 2000, including three hours from ENGL 3024 or ENGL 3084 or permission of instructor. Advanced seminar in which students consolidate their knowledge of English and obtain a perspective on the significance of that knowledge. Independent research project. Course topics will vary.

ENGL 4105 Capstone Seminar in Writing Fiction (3)

Prereq.: ENGL 4005, 92 total credit hrs. and 27 hrs. in English beyond ENGL 2000, ENGL 3024 or ENGL 3084 or permission of instructor. Advanced seminar in which students consolidate their knowledge in writing fiction and obtain a perspective on the significance of that knowledge. Independent research project.

ENGL 4109 Capstone Seminar in Screenwriting (3)

Prereq.: ENGL 4009, 92 total credit hrs. and 27 hrs. in English beyond ENGL 2000 or permission of instructor. Advanced seminar in which students consolidate their knowledge in screenwriting and obtain a perspective on the significance of that knowledge. Independent research project.

ENGL 4120 Studies in Major Authors (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Detailed study of works by one or two authors from Spenser and Donne to Joyce and Morrison; attention to the author's life and times, predecessors and influence.

ENGL 4121 Studies in Literary History (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Topics such as "Literature and the King's Peace," "The Development of the Pastoral," "From Romantic to Victorian: A Study of Influence," "Self and Society."

ENGL 4122 Topics in Interdisciplinary Studies (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Literature in cultural contexts and/or in relation to other academic disciplines; topics such as "Fictions of the Working Class," "Race in Literature and Culture," "Modernism in Fiction and Painting."

ENGL 4133 Studies in Nonfiction Film and Video (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Advanced study in nonfiction film and video; topics such as "Nonfiction Film Essays," "Documentary Auteurs," "Women and Nonfiction Film," "Experimental Nonfiction Film." Production work when chosen by students.

ENGL 4137 Studies in Chaucer (3)

Attention to *The Canterbury Tales*, their literary and cultural significance; topics such as "Chaucer, Boccaccio and Framed Tales," "'The olde daunce': Chaucer on Love, Sex and Marriage."

ENGL 4147 Studies in Milton (3)

Attention to *Paradise Lost*, *Paradise Regained* and *Samson Agonistes*; their literary and cultural significance; topics such as "Paradise Lost and the Christianization of the Epic," "Milton and Women," "Milton and Revolution."

ENGL 4148 Studies in Shakespeare (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Attention to poetry and plays, literary and cultural significance; topics such as "The Comedies and Histories," "The Tragedies," "Shakespeare and Film," "Shakespeare and Gender."

ENGL 4173 Studies in Southern Literature (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Authors such as Chopin, Faulkner, Wright, Welty, Tennessee Williams; topics such as "Survey of Southern Literature," "Civil Rights Literature," "Historical Fiction," "Southern Women Writers."

ENGL 4203 Curricula, Pedagogy and Assessment in the English Classroom (1)

Prereq.: EDCI 3136 and ENGL 3202. Concurrent enrollment in EDCI 4003. Usually offered in fall semester only. Current methods of course design, pedagogy, and assessment for teaching English in middle school and high school classrooms.

ENGL 4204 Capstone Seminar in English Education (3)

Prereq.: EDCI 4003 and ENGL 4203. Concurrent enrollment in EDCI 4004 and EDCI 4005. For English majors in the Secondary Education Concentration. Independent research project. Course topics will vary. Usually offered in spring semester only.

Advanced seminar in which students consolidate their knowledge in English and obtain a perspective on the significance of the knowledge.

ENGL 4220 Drama of Africa and African Diaspora (3)

See THTR 4220.

ENGL 4222 Studies in Popular Fictions (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Topics such as "Louisiana Popular Fictions," "Images of Women and Minorities in Popular Texts," "Popular Culture and Folklore," "The Literature of Horror."

ENGL 4231 Studies in Literature and Film (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Comparative study of literature and film as art forms; literary bases of film; topics such as "Film Authors," "Film and Ideology," "Adaptations of Literary Classics," "Film Genres," "Film and Gender."

ENGL 4234 Studies in Literature and Politics (3)

Also offered as POLI 4234. May be taken for a max. of 6 hrs. of credit when topics vary. Literary representations of politics; historical role of literature in politics; topics such as “Literature and Politics of the Modern American South,” “Revolution and the Avante-Garde.”

ENGL 4236 Studies in Literature and Religion (3)

Also offered as REL 4236. May be taken for a max. of 6 hrs. of credit when topics vary. Authors such as Sophocles, Dante, Shakespeare, Donne, Hawthorne, Eliot, O’Conner, Morrison; topics such as “Major Religious Novelists,” “Literature of Illness and Death,” “Moral Universes of Greek and Christian Tragedy,” “Creation Stories.”

ENGL 4300 Studies in Rhetorical Theory (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Topics such as “Rhetoric of/in Literary Studies,” “Rhetoric of Political Discourse.”

ENGL 4301 Studies in Composition Theory (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Modern composition theory as it relates to the teaching of writing; topics such as “Social Theories of Composition.”

ENGL 4302 Studies in Literacy (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Varied perspectives on literacy, especially written literacy; issues raised by its complex and problematic nature.

ENGL 4304 Capstone Seminar in Rhetoric, Writing, and Culture (3)

Prereq.: for English Majors with 92 total credit hrs. and 27 hrs. in English beyond ENGL 2000, including three hours from ENGL 3024 or ENGL 3084 or ENGL 3384 or permission of instructor. Advanced seminar in which students consolidate their knowledge in English and obtain a perspective on the significance of that knowledge. Independent research project. Course topics will vary.

ENGL 4310 Studies in Language (3)

Also offered as LING 4310. May be taken for a max. of 6 hrs. of credit when topics vary. A writing intensive course. Devoted to special topics, such as "African-American English," "English-based Pidgins and Creoles," "Current Trends in Linguistic Theory," "Issues in Applied Linguistics and Language Learning."

ENGL 4322 Studies in African Literature (3)

See AAAS 4322.

ENGL 4323 Studies in Caribbean Literature (3)

See AAAS 4323.

ENGL 4475 American Folklore (3)

Also offered as ANTH 4475. Folklore of the U.S., including regional, racial, ethnic and occupational groups; relation of folklore to other aspects of American vernacular culture and to American literature.

ENGL 4493 Women and Folklore (3)

Examination of folk materials, including oral genres, music, art and artifacts and rituals; focus on how and why information about women in folklore is communicated.

ENGL 4593 Studies in Women and Literature (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Authors such as Behn, Woolf, Chopin, Atwood, Cliff; topics such as "Reading and Writing About Women's Lives," "The Female Gothic," "Women and Ethnicity," "Early Modern Women Writers."

ENGL 4674 Studies in African-American Literature (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Authors such as Douglass, Hurston, Wright, Morrison; topics such as "Slave Narratives," "The Harlem Renaissance," "The Black Arts Movement," "The Black Diaspora," "African Survivals."

ENGL 4680 Studies in Post-colonial Literature & Culture (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Topics may include “Imagining India,” “Black British Cultures,” “Islam and Literature,” “Politics and Post-colonial Literature,” “Atlantic Studies,” etc.

ENGL 4710 Introduction to Linguistics (3)

Also offered as LING 4710. Introduction to the major fields of linguistic study: phonology, morphology, syntax, semantics.

ENGL 4711 History of the English Language (3)

Also offered as LING 4711. Survey of the development of the English language from its Germanic roots to the present day.

ENGL 4712 Roots of English (3)

Also offered as LING 4712. The use of language to reconstruct the ancient Indo-European physical and cultural world: myth, religion, ritual, law and medicine.

ENGL 4713 Syntax (3)

Also offered as LING 4713. Basic principles of syntactic structure; topics include constituency, subordinate clauses, coordinate structures, question formation, topicalization and the passive.

ENGL 4714 Phonology (3)

Also offered as LING 4714. Introduction to phonology, concentrating on the English language; phonetic and phonemic inventories; feature-analysis and rules; examination of linear, nonlinear and metrical paradigm.

ENGL 4715 Semantics (3)

Also offered as LING 4715. Approaches to the study of meaning: theories of the lexicon, word-formation and meaning; the interaction between sentence structure and signification; pragmatics.

ENGL 7001 Literary Nonfiction Workshop (3)

Prereq.: admission to the MFA program or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Creative writing of nonfiction essays.

ENGL 7006 Fiction Writing (3-6)

Prereq.: admission to the MFA program or permission of instructor. May be taken for a max. of 12 hrs. of credit. Intensive composition and critical evaluation of fiction; fictional techniques and forms.

ENGL 7007 Poetry Writing (3-6)

Prereq.: admission to the MFA program or permission of instructor. May be taken for a max. of 12 hrs. of credit. Composition and critical evaluation of poetry; poetic forms and problems of poetry writing.

ENGL 7008 Drama Writing (3-6)

Also offered as THTR 7008. May be taken for a max. of 12 sem. hrs. of credit. Composition and critical evaluation of drama; techniques of dramatic composition and dialogue.

ENGL 7009 Advanced Screenwriting Workshop (3-6)

Prereq.: admission to the MFA program or permission of instructor. May be taken for a max. of 12 hrs. of credit. Composition and critical evaluation of screen and teleplays; screenwriting composition and dialogue.

ENGL 7020 Proseminar in Graduate Study (3)

Introduction to the profession of English through an examination of the central theoretical issues and institutional questions that currently organize the field and instruction in basic research practices.

ENGL 7030 Medieval Literature (3)

Survey of major Medieval works (exclusive of Chaucer) in lyrical, poetic narrative, dramatic and prose genres.

ENGL 7040 Renaissance Literature (3)

Survey of representative works of English literature in poetry and prose in the 16th and 17th centuries.

ENGL 7072 American Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Survey of American poetry and prose in the 17th and 18th centuries, the 19th century, or the 20th and 21st centuries.

ENGL 7106 Forms of Prose Fiction (3)

Prereq.: admission to MFA program. May be taken for a max. of 6 sem. hrs. credit when topics vary. Fictional techniques in conventional and experimental short stories, novellas and novels; elements of plot, characterization, theme, setting and tone; formal analysis of literary texts related to specific problems of writing.

ENGL 7107 Prosody and Poetic Forms (3)

Prereq.: admission to MFA program. May be taken for a max. of 6 sem. hrs. credit when topics vary. Representative forms of poetry from early sagas to contemporary free verse; relationship to principles of versification; some concurrent practice in writing poetry in specific forms.

ENGL 7109 Forms of Film Writing (3)

Prereq.: permission of instructor. Examination of screenplays and teleplays; techniques of exposition, characterization and dramatization.

ENGL 7137 Chaucer (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Poetry and prose in Middle English.

ENGL 7173 Literature of the American South (3)

Southern writing from colonial times to the present.

ENGL 7174 Survey of African-American Literature I (3)

Writings of African Americans from the colonial/slavery experience to 1915.

ENGL 7182 Postcolonial Literatures (3)

Survey of Anglophone literatures from formerly colonized nations.

ENGL 7221 Topics in Critical Theory and Cultural Studies (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Specialized explorations in critical theory and cultural studies; topics include “Derrida and American Deconstruction,” “Critical Theory and Science Fiction,” “Marxism and the Western,” “Reader-Response Theory and Popular Romance,” “Postmodernism.”

ENGL 7222 Topics in Literacy Studies (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Intensive study of a topic in history or theories of literacy; topics include “Technology and Literacy,” “Gender and Literacy,” “Orality and Literacy,” “Theory and Politics of Literacy,” “Working-Class Literacy.”

ENGL 7321 Topics in Gender Theory (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Analysis of an aspect of gender theory in relation to literary or cultural study; topics such as “Gender, Narrative, and Property,” “Film and Gender,” “Psychoanalysis and Sexuality.”

ENGL 7423 Topics in Folklore (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Examination of particular folk genres, issues or methods in the study of folklore.

ENGL 7521 Topics in the History of Rhetoric and Poetics (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Topics may cover any aspect of the historical relationship between formal rhetoric, poetic theory and English literature from the Middle Ages to the present.

ENGL 7522 Topics in Rhetorical and Poetic Theory (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Intensive study of a topic in rhetorical and poetic theory, such as “Rhetorics of the Self,” “Lacanian Poetics,” “Rhetoric and Politics.”

ENGL 7541 Topics in Rhetoric, Media and Representation (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Analysis of literature, film and media as cultural representations of societal norms, beliefs and needs.

ENGL 7542 Topics in Rhetorics of Class and Gender (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Analysis of writing and language in light of their contextual and material influences and the methods for their study; emphasis on class and gender.

ENGL 7621 Research Methods in Composition, Literacy and Rhetorical Studies (3)

Survey and theoretical discussion of research methodologies such as discourse analysis, rhetorical analysis, interviews, talk-aloud protocols and ethnography in the fields of composition studies, literacy studies or rhetorical studies.

ENGL 7622 Topics in Composition Studies (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Historical survey of the theoretical, research and pedagogical issues in the field of composition studies or special topics such as “Genre Theory,” “Assessment,” “Technology and Composition.”

ENGL 7623 Topics in Professional Writing and Technical Communication (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. History or theories of professional writing or technical

communication; topics include "Writing in the Profession," "Workplace Literacy," "Computers and Writing," or "Technical Writing Methodology."

ENGL 7711 Forms of Early English (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Languages and linguistic structures of early forms of English: Old English, Middle English, and Early Modern English; period focus will vary.

ENGL 7712 Topics in Historical Linguistics (3)

Also offered as LING 7712. May be taken for a max. of 9 sem. hrs. of credit when topics vary. An exploration of a topic or topics in the history of English, of the Germanic language or of the Indo-European language family.

ENGL 7713 Topics in Syntax and Semantics (3)

Also offered as LING 7713. May be taken for a max. of 9 sem. hrs. of credit when topics vary. An exploration of a topic or topics in the structure and/or the interpretation of Modern English and related languages.

ENGL 7724 Topics in Feminist Theory and Criticism (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Analysis of a particular aspect of feminist theory, such as feminist psychology, feminist film theory, gender and popular culture.

ENGL 7783 Topics in Film and Video Studies (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Intensive examination of a topic in the history or theory of film, television or other video productions, or in the relation of such productions to literature.

ENGL 7910 Language (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

ENGL 7915 Teaching College Composition (3)

Prereq.: students must be graduate teaching assistants in the English Department. Course is designed for graduate students teaching in the First-Year Writing program. Theoretical and pedagogical issues in the teaching of college writing.

ENGL 7920 English Seminar (3)

May be taken twice for credit when topics vary.

ENGL 7921 Topics in Genres (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Intensive study of works in a literary genre from different national and cultural traditions and from different historical periods; topics include "Medieval and Renaissance Drama," "The Long Poem in English," "The Origins of the Novel," "The Short Story."

ENGL 7922 Authors Seminar (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Detailed study of one or two authors in American, British or other Anglophone literatures; attention to the life and time, predecessors and influence.

ENGL 7942 Topics in Renaissance Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

ENGL 7943 Studies in Shakespeare (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

ENGL 7951 Topics in Restoration and 18th Century Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

ENGL 7960 Studies in the Romantic Period (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Topics such as “Romanticism and Place,” “Literature and Revolution,” “Romanticism and Linguistic Theory.”

ENGL 7962 Studies in the Victorian Period (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Topics such as “Victorian Literature and Race,” “Victorian Literature and Economics,” “Victorian Literature and the City.”

ENGL 7963 Topics in 19th Century British Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Topics such as “19th Century British Women Poets,” “Youth and Identity in 19th Century Literature,” “British Working-Class Writing.”

ENGL 7970 Topics in American Genres (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Focused study of genres in the American context; genres may include the novel, the short story, drama, poetry, the captivity narrative or the essay.

ENGL 7971 Topics in Southern Studies (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Interdisciplinary approaches to southern literature and culture; topics such as “Southern Sexualities,” “The Color Line in the American South,” “Media Made Dixie.”

ENGL 7972 Topics in Southern Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

ENGL 7974 Topics in American Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

ENGL 7975 Topics in African-American Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

ENGL 7981 Topics in Modern and Contemporary Literature (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Intensive study of works in modern and contemporary literature; topics include “Modern Irish Literature,” “Modernism,” “Postmodern Literature,” “Contemporary Australian Literature.”

ENGL 7983 Topics in Ethnic and Postcolonial Literatures (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Detailed study of different aspects of American ethnic literatures such as Asian American, Native American, Latino/Chicano and postcolonial literatures such as Indian, African, West Indian, Transnational.

ENGL 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

ENGL 8900 Independent Study (1-3)

May be taken for a max. of 3 sem. hrs. in an MA program, 6 sem. hrs. in an MFA program and 9 sem. hrs. in a PhD program. Directed individual readings guided by the graduate faculty.

ENGL 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Entomology

ENTM 2001 Insects in the Environment (3)

Prereq.: BIOL 1201, BIOL 1208; and either BIOL 1001, BIOL 1002 or equivalent. 2 hrs. lecture; 2 hrs. lab. Insect recognition, classification and life cycles; factors affecting insect diversity and abundance; interactions between insects and the natural environment.

ENTM 3000 Pest Management Internship (3)

Su See PLHL 3000.

ENTM 3002 Pest Management Seminar (1)

See PLHL 3002.

ENTM 4002 Insect Biology (3)

Also offered as BIOL 4002. Prereq.: BIOL 2153 or consent of instructor. No entomology training necessary. Biological, biochemical and ecological principles as they relate to the success of insects.

ENTM 4005 Insect Taxonomy (4)

Prereq.: ENTM 2001. A collection is required. 2 hrs. lecture; 4 hrs. lab. Identification, nomenclature, phylogenetic relationships and life histories of insects at the family level.

ENTM 4006 Fundamentals of Applied Entomology (3)

Prereq.: ENTM 2001 or consent of instructor. 2 hrs. lecture; 2 hrs. lab. Principles and methodology of managing insect pests; emphasis on field crops insect pest management; interdisciplinary perspective.

ENTM 4007 Forensic Entomology (3)

No entomology training necessary. 2hrs. lecture; 2 hrs. lab. Determining the succession and species composition of necrophilous insects and other arthropods on carcasses; estimate time of death using insects; learning investigative procedures used by police and wildlife officers in human and animal deaths; review of case studies from crime scene to courtroom.

ENTM 4012 Fundamentals of Horticultural Entomology (3)

Prereq.: ENTM 2001. 2 hrs. lecture; 2 hrs. lab. Principles of insect control; recognition of major pest species of insects and mites and their injury to horticultural plants; economic and aesthetic injury thresholds; methods of control, including identification and utilization of beneficial species.

ENTM 4015 Conservation Biology (4)

Same as BIOL 4015 Prereq.: 11 sem. hrs. biological sciences; genetics recommended; permission of department. 3 hrs. lecture; 1 hr. discussion. Underlying principles and concepts of conservation biology; practical applications to preserves and human society; threats to and importance of biological diversity; human responsibilities as global land stewards.

ENTM 4017 Laboratory in Conservation Biology (2)

Same as BIOL 4017. Coreq.: BIOL 4015/ENTM 4015 or equivalent. 4 hrs. lab.

ENTM 4018 Forest Insects and Diseases (4)

Also offered as PLHL 4018. Prereq.: BIOL 1201, BIOL 1208. One day-long field trip. 3 hrs. lecture; 2 hrs. lab. Identification, ecology, epidemiology and control of forest insects and diseases.

ENTM 4040 Insect Ecology (3)

Prereq.: BIOL 1201 and BIOL 1208 or equivalent or consent of instructor. Two Saturday field trips. Service learning component. Ecological principles pertaining to insect individuals, populations, communities and their role in ecosystems; emphasis on life history strategies and behavior.

ENTM 4099 Undergraduate Entomological Research (1-3)

Prereq.: ENTM 2001 or ENTM 4018 or equivalent. May be taken for a max. of 4 hrs. of credit. Not for graduate credit. Supervised entomological research in a laboratory or field setting; data collection and interpretation of results.

ENTM 4100 Insect Behavior (3)

Prereq.: ENTM 2001 or consent of instructor. Current and classical concepts in behavioral theory; communication systems; stimuli orientation, social interaction; aspects of insect control using behavior modification.

ENTM 4199 Special Topics in Entomology (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Lab/field trip may be required. Subjects not covered in other entomology courses.

ENTM 7001 General Entomology (4)

No entomology training necessary. 3 hrs. lecture; 3 hrs. lab. Provides a framework of information about the evolution of insects and related arthropods, anatomy, functional morphology and physiology and an introduction to insect diversity at the ordinal level.

ENTM 7002 Plant Resistance to Arthropods (4)

Prereq.: consent of instructor. 3 hrs. lecture; 3 hrs. lab. Detailed examination of the mechanistic basis of plant-insect interactions, with special reference to host-plant resistance in agricultural systems; integrates relevant concepts from diverse fields including insect physiology, plant physiology, plant biochemistry and ecology; evaluation of the current theoretical basis for research in plant-insect interactions; laboratory demonstrations and exercises emphasize the techniques used in host-plant resistance research.

ENTM 7005 Classification of Immature Forms of Insects (3)

Prereq.: ENTM 4005 or equivalent. 2 hrs. lecture; 2 hrs. lab.

ENTM 7006 Advanced Insect Pest Management (3)

Prereq.: ENTM 4006 and one 4000 or higher level statistical course (EXST 4050, EXST 7003, EXST 7004, EXST 7005, EXST 7013, EXST 7014, EXST 7015, and EXST 7031) or consent of the coordinator. Ecological and economic basis of pest management; advances in major pest management tactics; insect sampling; system analysis, biotechnology and geographical information system in pest management.

ENTM 7007 Seminar in Entomology (1)

May be repeated for credit. 1 sem. hr. of credit required for each graduate degree in entomology.

ENTM 7008 Special Topics in Entomology (1-3)

Prereq.: consent of department head. May be taken for a max. of 6 sem. hrs. credit when topics vary for 6 sem. hrs. credit for M.S. and 9 sem. hrs. credit for PhD. Lectures and/or labs on advanced topics in entomology not covered in other entomology courses.

ENTM 7010 Teaching Practicum (1-3)

Prereq.: students whose native language is not English must pass the Michigan Test of English proficiency or ENGL 0004 or equivalent, and receive prior approval of student's graduate committee and supervising faculty. Pass/fail grading based on a written evaluation by the supervisor and a written report by the student. May be taken for a max. of 6 sem. hrs. of credit. Open only to entomology PhD students. Teaching practicum and learning experience under the supervision of a graduate faculty member. Support one faculty member's teaching through grading assignments and exams, delivering material and preparing and conducting laboratories, as needed and directed by the supervising faculty. Student will be exposed to different learning styles and various teaching approaches. Course credit will range from 1-3 hrs. depending on anticipated involvement.

ENTM 7017 Introduction to Insecticide Toxicology (3)

Prereq.: organic chemistry or equivalent. 2 hrs. lecture; 3 hrs. lab. Principles of toxicology as they relate to insecticides; bioassays, risk assessment, mode of action, pharmacokinetics, insecticide resistance and selectivity.

ENTM 7030 Aquatic Entomology (4)

Also offered as RNR 7030. 3 hrs lecture; 3 hrs lab. Provides a general understanding of aquatic insect diversity and ecology, with emphasis on Gulf of Mexico Coastal Plain and lower Mississippi alluvial valley faunas. Training includes methodologies for aquatic insect field sampling, curation, and identification and application of analytical techniques to aquatic insect data.

ENTM 7080 Population Ecology (3)

See BIOL 7080.

ENTM 7600 Entomology Extension Practicum (1-2)

Prereq.: consent of the course coordinator. This course may be taken for a max. of 2 hrs. of credit. Students will gain knowledge, training and experience in extension entomology. Emphasis on land-grant institution service, technology transfer and initiating and evaluating an entomology extension project.

ENTM 7946 Seminar: Current Topics in Molecular Evolution (1)

See BIOL 7946.

ENTM 7979 Tropical Biology: An Ecological Approach (1-8)

See BIOL 7979.

ENTM 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

ENTM 8900 Research Problems (1-4 per sem.)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. credit.

ENTM 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Environmental Sciences

ENVS 1000 Environment and Technology: Perspective on Environmental Problems (3)

Also offered as EMS 1011. Environmental quality problems involving water, air and land, and society's response to such problems; analysis of the interrelationships and nature of ecological stresses.

ENVS 1051 Soils and the Environment (3)

Complexity and diversity of the earth's land surface; soils and land use management, reclamation of mismanaged soils and use of recyclable waste materials as soil amendments.

ENVS 1126 Introduction to Environmental Sciences (3)

[LCCN: CEVS 1103, Environmental Science] This is a General Education course. *An honors course, ENVS 1127, is also available. Credit will not be given for both this course and ENVS 1127.* Essential principles of environmental sciences; comprehensive and fundamental understanding of sound science, stewardship and sustainability in environmental sciences; interactions and relations between humans and earth; an up-to-date look at today's global, national and regional environmental issues.

ENVS 1127 HONORS: Introduction to Environmental Sciences (3)

This is a General Education course. *Similar to ENVS 1126 with special honors emphasis for qualified students. Credit will not be given for both this course and ENVS 1126.*

ENVS 3102 Mathematical Methods in Science (3)

Prereq.: MATH 1550, MATH 1552 and EXST 2201 or equivalent. Introduction to numerical methods, data analysis, error propagation, box models, linear and nonlinear least squares, perturbation theory, numerical integration.

ENVS 3999 Undergraduate Research (1-4)

Prereq.: permission of instructor. May be taken for a max. of 4 hrs. of credit. Individual study of a specific environmental problem or individual laboratory research.

ENVS 4007 Cancer: A Family of Environmental Diseases (3)

Prereq.: ENVS 4477; BIOL 4087 or BIOL 4093, or consent of instructor. Introduction and characterization of the basic components of cancer including causes and molecular disease processes, environmental and genetic etiological factors, biomarkers, and therapeutic approaches.

ENVS 4010 Applied Ecology (2)

Also offered as EMS 4010. Prereq.: minimum of 10 sem. hrs. of biological and/or physical science. The biosphere, air, land and aquatic environments; development of alternative techniques for correcting environmental pollution; environmental risk assessment analysis and management.

ENVS 4015 Physical Climatology (3)

See GEOG 4015.

ENVS 4035 Aquatic Pollution (3)

Prereq.: ENVS 1126 or ENVS 1127 or OCS 1005 or OCS 1006; or OCS 2007 and OCS 2008 or equivalent. Credit will not be given for this course and ENVS 4036. Interdisciplinary study of the interaction between man and the aquatic environment and human impacts on marine and freshwater biological systems; biological, ecological, social, legal and managerial aspects of water pollution are examined through a series of case studies.

ENVS 4036 HONORS: Aquatic Pollution (3)

Same as ENVS 4035 with special honors emphasis. Prereq.: ENVS 1126 or ENVS 1127 or OCS 1005 or OCS 1006; or OCS 2007 and OCS 2008 or equivalent. Credit will not be given for both this course and ENVS 4035.

ENVS 4045 Air Pollution and Society (3)

Foundations of the science of air pollution. Fundamentals of sources, measurements, standards and societal impacts of air pollution.

ENVS 4101 Environmental Chemistry (3)

See CHEM 4150.

ENVS 4145 Remote Sensing Fundamentals for Environmental Scientists (3)

Basic principles and concepts in remote sensing and its applications to environmental sciences. Emphasis is placed on remote sensing instrumentation and the acquisition of remote sensing data.

ENVS 4149 Design of Environmental Management Systems (3)

Environmental systems planning at local, national and international levels; identification of system requirements and available resources; definition of constraints, establishment of evaluation criteria; evaluation of alternative concepts and plans for subsystems; implementation using qualitative tradeoffs, mathematical models and computer simulations.

ENVS 4261 Energy and the Environment (3)

Methods of stationary power generation; pollution related to fuel production, transportation and use; energy use and pollution problems related to transportation; energy resources, regulatory aspects and control technology related to stationary and moving sources of air pollution.

ENVS 4262 Environmental Hazards Analysis (3)

Systematic framework for examining the nature and consequences of natural and man-made hazards; strategies that may be taken to plan, respond, recover, prevent or mitigate hazards.

ENVS 4264 Regulation of Environmental Hazards (3)

Federal, state and local regulation for mitigating the occurrence and effects of hazardous events, including the National Flood Insurance Act, Emergency Planning and Community Right to Know Act and government planning and zoning authority.

ENVS 4266 Ocean Policy (3)

National and state ocean policy; Law of the Sea; regulation of the high seas; marine pollution, marine resources, and marine scientific research; other related topics.

ENVS 4477 Environmental Toxicology: Introduction and Applications (3)

Prereq.: 6 hrs. of chemistry, 6 hrs. of life sciences and permission of instructor. Introduction to the basic principles of environmental toxicology; applications of these principles in industrial and other job related environments; regulatory

perspectives; spills; anthropogenic pollution problems; human risk management; overview of classes of toxic agents, routes of exposure, target tissues (human mammalian) and toxicological testing.

ENVS 4500 Health Effects of Environmental Pollutants (3)

Prereq.: minimum of 6 sem. hrs. of chemistry and 6 sem. hrs. of either biology or zoology. Effects of environmental pollutants on human health and quality of life.

ENVS 4600 Global Environmental Change: Past, Present and Future (3)

See OCS 4600.

ENVS 4900 Watershed Hydrology (3)

Also offered as RNR 4900. Prereq.: an introductory statistics course. 1 1/2 hrs. lecture; 1 1/2 hrs. lab. The principles of hydrology with emphasis on how natural systems are analyzed, modeled and used in management decisions; laboratory exercises involve hands-on experience with hydrologic data analysis, use of geographic information systems (GIS) and spatial modeling.

ENVS 4950 Special Topics in Environmental Sciences (1-3)

Prereq.: permission of the Department. May be taken for a maximum of 6 hours of credit. More than one section may be taken for credit concurrently when topics differ. Special topics in environmental issues, problems, techniques and/or methods.

ENVS 4999 Capstone in Coastal Environmental Science (1)

Also offered as OCS 4999. Prereq.: Senior standing as a declared Coastal Environmental Science Major and consent of instructor. May be taken for a maximum of 2 hours of credit, but only one hour will count towards the Coastal Environmental Science BS degree. Required of all students in the Coastal Environmental Science BS degree program. Written paper, poster and oral presentation of an analysis of a chosen environmental issue as selected by the student and the instructor.

ENVS 7010 Mathematical Modeling in Energy and Environmental Management (3)

Prereq.: OCS 4410 or equivalent. Advanced studies in the development of models of energy and environmental systems.

ENVS 7040 Environmental Planning and Management (3)

Prereq.: consent of instructor. Environmental systems planning and management at local, state and federal government levels using problem identification; design of alternative solutions, evaluation of alternatives, political action decision processes and implementation and monitoring.

ENVS 7041 Environmental Policy Analysis (3)

Prereq.: consent of instructor. Management-oriented approach to major phases of environmental policy; formulation, implementation, evaluation; theoretical bases and analytical techniques.

ENVS 7042 Environmental Conflict Resolution (3)

Practical approaches and techniques commonly used to mediate environmental conflicts and facilitate participatory group decision making among stakeholders.

ENVS 7043 Environmental Law and Regulation (3)

Introduction to basic principles of federal and state laws, regulations and court decisions involving pollution of the environment, including the National Environmental Policy Act, Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, Oil Pollution Act; current topical legal developments.

ENVS 7044 Regulation of Toxic Substances (3)

Federal laws, regulations, judicial decisions and policies regarding the development, production, use and disposal of toxic substances, including the Toxic Substances Control Act, Federal Insecticide, Rodenticide, and Fungicide Act and the Food, Drug, and Cosmetic Act; toxic tort lawsuits will be reviewed.

ENVS 7046 International Environmental Law (3)

International and multilateral agreements and practices for controlling pollution and depletion of natural resources; relationship between international trade agreements and environmental quality; other international environmental issues.

ENVS 7047 Environmental Economics and Policy (3)

Prereq.: ECON 4720 or equivalent or consent of instructor. Economic concepts applied to the development of appropriate policies to achieve environmental protection goals; emphasis given to linkages between economics and the environment, the role of market failure and economic instruments that can be used to address environmental concerns.

ENVS 7050 Spatial Modeling of Environmental Data (3)

Prereq.: EXST 7003 or EXST 7004 or EXST 7005. Development of an approach to analyze spatial and temporal processes for environmental data modeling.

ENVS 7061 Water Quality Management and Policy (3)

Also offered as RNR 7061. Physical, chemical and biological characteristics of surface water in natural systems; sources and effects of water pollutants; water quality standards and criteria; total maximum daily loads; federal water quality regulations; watershed approach and application of mathematical models to water quality management.

ENVS 7110 Toxicology of Aquatic Environments (3)

Cross listed with OCS 7110. Aquatic pollution and toxicology of industrial materials related to environmental risk assessment in coastal areas; physical, chemical and biological factors affecting the fate of toxicants in marine and freshwater coastal areas.

ENVS 7112 Concepts in Marine Ecotoxicology (3)

Also offered as OCS 7112. Prereq.: ENVS 7110 or permission of instructor Marine pollution and toxicology of industrial and non-point sources materials related to ecological risk assessment in coastal and marine areas; biological processes and wastes in the ocean; physicochemical processes and wastes in the ocean; laboratory and field techniques in epibiotic, endobiotic and fecal-sediment habitats; benthic habitats and metals/chemical specification/geoavailability; fish as a biological model; microcosm theory and design for littoral and neritic habitats; approaches to ecological risk assessment in marine habitats.

ENVS 7151 Watershed Hydrology and Floodplain Analysis (3)

See RNR 7151.

ENVS 7623 Toxicology I (3)

Prereq.: ENVS 4477 or consent of instructor. Fundamental principles of toxicology, dose response relationship, design and conduct of acute and chronic toxicity tests, basic analytical toxicology, biochemical markers, basic principles of hazard evaluation and risk assessment, industrial toxicology, principles of toxicology applied to the environment and ecosystems.

ENVS 7626 Toxicology IV: Genetic Toxicology (3)

Also offered as BIOL 7626. Prereq.: ENVS 7623 or approval of instructor. Evaluation of induced heritable and/or phenotypic changes in the organism and individual cells (germline and somatic); emphasis on human and mammalian species; reproductive toxicology and teratogenesis; testing and screening agents for genotoxic activities; molecular genetic approaches to human and environmental biomonitoring.

ENVS 7700 Integrated Environmental Issues (3)

Multi-disciplinary analysis of a current environmental issue. Discussion of topics from the perspectives of natural science, economics, social science and political science. Integration and synthesis of information to develop a science-based approach to environmental decision-making.

ENVS 7900 Special Problems in Environmental Sciences (1-4)

May be taken for a max. of 4 hrs. credit. Individual study of a specific environmental problem.

ENVS 7950 Special Topics in Environmental Sciences (1-6)

Research and methodological review of current topics.

ENVS 7995 Environmental Seminar (1)

Reports and discussions of student/faculty activities in environmental sciences.

ENVS 7997 Environmental Practicum (1-6)

Prereq.: Graduate standing in Environmental Sciences and consent of the instructor. Pass-fail grading. May be taken for a maximum of 12 credit hours, but no more than 3 hours may count toward the student's degree. Required of all students in the

ENVS Professional Option program. Open to students accepted by an approved internship program or accepted for an approved team research project.

ENVS 7998 Environmental Colloquium (2)

May only be taken during semester of graduation. Non-thesis students only. Written and oral presentation of a literature review on a selected environmental issue, as approved by the departmental non-thesis committee.

ENVS 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

ENVS 9000 Dissertation Research (1-12 per sem.)

"S/U" grading.

Experimental Statistics

EXST 2000 Introduction to Microcomputers (3)

Credit will not be given for this course and CSC 1100, ISDS 1100 and LIS 2001. 2 hrs. lecture; 2 hrs. lab. A user-oriented introduction to microcomputers and applications software; terminology; hardware; software: the operating system, word processing, spreadsheets, data management, graphics, communications.

EXST 2201 Introduction to Statistical Analysis (4)

This is a General Education course. *Prereq.: MATH 1021 or equivalent. 3 hrs. lecture; 2 hrs. lab. Descriptive statistics; inferential statistical methods including confidence interval estimation and hypothesis testing for one and two population means and proportions; one-way analysis of variance; simple linear regression and correlation; analysis of categorical data.*

EXST 3201 Statistical Analysis II (4)

Prereq.: EXST 2201 or equivalent. 3 hrs. lecture; 2 hrs. lab. Applied statistical modeling: multiple regression, variable selection, serial correlation, repeated measures, multivariate tools, logistic regression, blocking and factorial design, categorical data analysis and nonparametric techniques.

EXST 3999 Supervised Independent Study and Research (1-4)

Prereq.: consent of instructor. May be taken for a max. of 8 sem. hrs. of credit with consent of department head. Investigation of areas of interest not covered in other departmental courses, under the guidance of departmental faculty.

EXST 4012 Introduction to Sampling Techniques (3)

Su *Prereq.: EXST 2201 or equivalent.* Simple random, stratified random, cluster, systematic, multistage, multiphase and unequal probability sampling procedures methods and applications; ratio and regression estimation; non-response and non-sampling errors.

EXST 4025 SAS Programming (3)

Prereq.: EXST 2201 or equivalent. Reading, processing, manipulating, transforming and outputting data in various formats; descriptive and summary statistics procedures; subsetting and combining data sets; DO loops and arrays; industry standard programming practices.

EXST 4050 Principles and Theory of Statistics (4)

Prereq.: EXST 2201 or equivalent and MATH 1550 or equivalent. 3 hrs. lecture; 2 hrs. lab. Probability distributions as models for real-world processes; sampling distributions and the central limit theorem; estimation and confidence region methods; principles of hypothesis testing; modeling; emphasis on links between theory, methodology and application.

EXST 4087 Special Topics in Applied Statistics (3)

Prereq.: EXST 2201 or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary.

EXST 7003 Statistical Inference I (4)

Prereq.: MATH 1021 or equivalent. Credit will be given for only one of the following: EXST 7003, EXST 7004, EXST 7005.

EXST 7009. 3 hrs. lecture; 2 hrs. lab. Basic concepts of statistical models and sampling; descriptive and inferential methods; normal, t, chi-square and F distributions; tests of hypothesis and estimation, analysis of variance, correlation, regression, analysis of categorical data; emphasis on social and behavioral sciences research problems; computer software applications.

EXST 7004 Experimental Statistics I (4)

Prereq.: MATH 1021 or equivalent. Credit will be given for only one of the following: EXST 7003, 7004, EXST 7005, EXST 7009. 3 hrs. lecture; 2 hrs. lab. Basic concepts of statistical models and use of samples; measures of variation and central tendency; normal, t, chi-square and F distributions; test of hypothesis, analysis of variance, regression and correlation; emphasis on laboratory-oriented sciences research problems; computer software applications.

EXST 7005 Statistical Techniques I (4)

Prereq.: MATH 1021 or equivalent. Credit will be given for only one of the following: EXST 7003, EXST 7004, 7005, EXST 7009. 3 hrs. lecture; 2 hrs. lab. Basic concepts of statistical models and sampling methods, descriptive statistical measures, distributions, tests of significance, analysis of variance, regression, correlation and chi-square; emphasis on field-oriented life sciences research problems; computer software applications.

EXST 7009 Statistical Methods I—Web-Based (3)

Prereq.: MATH 1021 or equivalent and knowledge of SAS statistical analysis software. Credit will be given for only one of the following: EXST 7003, EXST 7004, EXST 7005, 7009. Basic concepts of statistical models and use of samples; measures of variation and central tendency, normal, t, chi-square and F distributions; tests of hypothesis; analysis of variance, regression and correlation; emphasis on field-oriented life science research problems.

EXST 7011 Nonparametric Statistics (3)

Su Prereq.: *EXST 7003 or EXST 7004 or EXST 7005 or equivalent.* Nonparametric one- and two-sample location and distribution tests, including binomial, chi-square, Kolmogorov-Smirnov, Mann-Whitney U, Wilcoxon; analyses of variance, including Cochran's Q, Kruskal-Wallis, Friedman; correlation and regression, including Kendall's tau, Spearman's rho and point biserial.

EXST 7012 Fundamental Sampling Techniques (3)

Su Prereq.: *EXST 7003 or EXST 7004 or EXST 7005 or equivalent.* Simple and stratified random sampling; ratio and regression estimation; cluster, multistage and multiphase sampling procedures; systematic sampling; nonresponse and nonsampling errors; links between methodology and application emphasized.

EXST 7013 Statistical Inference II (4)

Prereq.: EXST 7003 or equivalent. Credit will be given for only one of the following: EXST 7013, EXST 7014, EXST 7015, EXST 7019. 3 hrs. lecture; 2 hrs. lab. Analyses of variance and experimental designs; completely randomized and complete block designs; latin square designs; split plot; arrangements of treatments; multiple comparisons; covariance analysis; multiple and curvilinear regression techniques; emphasis on social and behavioral sciences research problems.

EXST 7014 Experimental Statistics II (4)

Prereq.: EXST 7004 or equivalent. Credit will be given for only one of the following: EXST 7013, 7014, EXST 7015, EXST 7019. 3 hrs. lecture; 2 hrs. lab. Multiple classification analysis of variance and covariance, individual degrees of freedom, factorial arrangement of treatments and multiple regression; emphasis on science/laboratory research problems.

EXST 7015 Statistical Techniques II (4)

Prereq.: EXST 7005 or equivalent. Credit will be given for only one of the following: EXST 7013, EXST 7014, 7015, EXST 7019. 3 hrs. lecture; 2 hrs. lab. Multiple classification analyses of variance and covariance, sampling designs, parameter estimation, multiple regression and correlation, tests of specific hypothesis, and factorial experiments; emphasis on field-oriented life sciences research problems

EXST 7019 Statistical Methods II–Web-Based (3)

Prereq.: EXST 7003 or EXST 7004 or EXST 7005 or EXST 7009 or equivalent and knowledge of SAS statistical analysis software. Credit will be given for only one of the following: EXST 7013, EXST 7014, EXST 7015, 7019. Multiple classification analyses of variance and covariance; sampling designs, parameter estimation, multiple regression and correlation, tests of specific hypotheses and factorial experiments; emphasis on field-oriented life science research problems.

EXST 7025 Biological Population Statistics II (3)

Prereq.: EXST 7015 or equivalent. Extensive development and application of statistical techniques to parameter estimation in population dynamics; principles of model building and role of model building in population management.

EXST 7031 Experimental Design (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 or equivalent. Comparison of designs, models and analyses; emphasis on factorial experiments, complete and incomplete block designs, and confounding.

EXST 7034 Regression Analysis (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 or equivalent and knowledge of matrix algebra. Fundamentals of regression analysis, stressing an understanding of underlying principles; response surfaces, variable selection techniques and nonlinear regression.

EXST 7035 Applied Least-Squares (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 or equivalent. Applications of least squares methods; usual constraints, no constraints and means model constraints to unbalanced cross classified and nested data; emphasis on analysis of variance and covariance for fixed effects models.

EXST 7036 Categorical Data Analysis (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 or equivalent. Statistical techniques used in analyzing data from discrete distributions; contingency tables, loglinear and logit models, logistic regression and repeated measures for nominal and ordinal data; emphasis on computer analysis and interpretation.

EXST 7037 Multivariate Statistics (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 or equivalent and knowledge of matrix algebra. Comparison of multivariate techniques and analyses; emphasis on discriminant analysis, factor analysis and principal component analysis, canonical correlation, cluster analysis and multivariate analysis of variance.

EXST 7039 Statistical Methods for Reliability and Survival Data (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015. Characteristics of lifetime data; non-parametric methods including Kaplan Meier estimation; lifetime parametric models, parametric methods for single distribution data; planning life test; system reliability concepts; failure time regression; accelerated testing.

EXST 7060 Probability and Statistics (3)

Prereq.: MATH 2057 or equivalent. Probability, random variables, discrete and continuous distribution functions; expected values, moment generating functions; functions of random variables.

EXST 7061 Statistical Theory (3)

Prereq.: EXST 7060 or equivalent. Point estimation; hypothesis testing; interval estimation; large sample theory; new developments in statistical inference.

EXST 7083 Practicum in Statistical Consulting I (2)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 and permission of instructor. Pass-fail grading. 4 hrs. independent study
Supervised application of statistical techniques to research problems; readings, oral presentations and discussions on statistical consulting; problem-solving; mock-consulting sessions; participation in real-life statistical consulting sessions under faculty supervision.

EXST 7084 Practicum in Statistical Consulting II (2)

Prereq.: EXST 7083 and permission of instructor. Pass-fail grading. May be taken for a max. of 6 sem. hrs. credit. 4 hrs. independent study. Primary responsibility for statistical consulting projects under the supervision of graduate faculty.

EXST 7085 Special Problem in Statistics (1-3)

Prereq.: permission of department. Pass-fail grading. A technical paper on an advanced topic in statistics is required.
Development of a topic in advanced statistics under faculty supervision.

EXST 7086 Advanced Seminar in Statistics (1)

Prereq.: consent of instructor. Pass-fail grading. May be repeated for credit when topics vary. Develop and present a 50-minute seminar on an advanced topic in statistics as a part of the department's seminar series.

EXST 7087 Advanced Topics in Statistics (1-3)

Prereq.: consent of instructor. May be repeated for credit when topics vary. Lectures on advanced topics in statistics not covered in other experimental statistics courses.

EXST 7142 Statistical Data Mining (3)

Prereq.: EXST 7013, EXST 7014, EXST 7015, EXST 7019 or equivalent. Data preparation; predictive modeling, including normal-based and logistic regression, decision trees, neural networks, ensemble methods; handling missing data; model assessment and model comparison; model implementation and scoring of new data; pattern discovery.

EXST 7152 Advanced Topics in Statistical Modeling (3)

Prereq.: EXST 7013 or EXST 7014 or EXST 7015 and EXST 7034 or equivalent or consent of department head. Regularized linear regression and classification methods; penalized spline fitting to normal and non-normal data; tree-based methods; ensemble methods including boosting; support vector machine and kernel-based methods.

EXST 7999 Independent Study (1-3)

Prereq.: permission of instructor. May be taken for a max. of 9 sem. hrs. of credit when topics vary. Independent study under the guidance of graduate faculty.

EXST 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

Environmental Engineering

EVEG 1050 Introduction to Environmental Engineering (1)

Designed for Environmental Engineering majors; open to non-majors by consent of department. 2 hrs. lab. Introduction to the environmental engineering discipline; fundamentals of engineering design and methods; overview of professional ethics, regulations, and the multimedia aspects of the discipline; technical presentation and communication skills.

EVEG 2000 Environmental Engineering I (3)

Prereq.: CHEM 1202 and MATH 1550. Basic principles of calculations in environmental engineering; overview of professional

ethics; regulations and multimedia aspects of environmental problem solving with emphasis on fundamental concepts and definitions.

EVEG 2050 Environmental Engineering Design Methods (1)

Designed for Environmental Engineering majors; open to non-majors by consent of department. 2 hrs. lab. Case-based, design studies to expose students to the components of professional environmental designs; component exposure includes regulations, numerical methods software, design drawing interpretation, ethics, economics, social consideration, design alternative decision analysis.

EVEG 3050 Global Issues in Environmental Engineering (1)

Designed for Environmental Engineering majors; open to non-majors by consent of department. 2 hrs. lab. Past and current global topics used to investigate the impact of global issues on local, regional and state environmental engineering design and decision-making processes.

EVEG 3110 Water and Wastewater Treatment (3)

Prereq.: CE 2200 (a grade of "C" or better is required in CE 2200). Physical, chemical and biological characteristics of water and wastewater; water quality regulation; basic reactor engineering; operation and simple design of physical, chemical and biological unit processes in water and wastewater treatment.

EVEG 3120 Chemical Equilibrium and Kinetics of Environmental Processes (3)

Same as CHE 3100.

EVEG 3145 Environmental Engineering III (3)

Prereq.: CHEM 2060/CHEM 2261. Application of chemical principles to water quality problems in the area of water supply, wastewater treatment, and pollution of natural waters. Fundamentals of equilibrium chemistry, chemical kinetics, organic and colloidal chemistry as applied to environmental engineering.

EVEG 3200 Water Resources Engineering (3)

Prereq.: CE 2200. Fundamentals of fluid mechanics applied to problems in the field of water; steady and unsteady flow in closed

conduits including analysis of water supply systems, flow in open channels, storm and wastewater collection systems and turbo machinery; emphasis on computer methods.

EVEG 3271 Senior Project I: Consulting Format (3)

Prereq.: EVEG 3200, EVEG 3110. Student project teams tackle selected design projects within a designated time allocation. Project management (proposals, flow charts, technical content) mimicking methodologies utilized by professional consulting firms; findings presented using professional format, i.e., final reports address rationale, process treatment trains and/or process sizing.

EVEG 3272 Senior Project II: Consulting Format (3)

Prereq.: EVEG 3271. Student project teams finalize design effort initiated in EVEG 3271. Construction of prototypes and bench scale demonstrations; extension of designs; simulation analysis.

EVEG 3273 Independent Undergraduate Research Project (1-4)

Prereq.: EVEG 3145, EVEG 4136, and consent of department. Independent research project under the direction of a faculty member. Students develop the objectives and scope of the research and conduct appropriate analytical and experimental (field and/or laboratory) studies. Results and conclusion of the project are summarized in a report and defended orally.

EVEG 3400 Environmental Engineering II (3)

Prereq.: CHEM 2060 (CHEM 2261); EVEG 2000. Fundamentals of microbiology, ecology, enzyme kinetics and biochemistry as applied to environmental engineering; applications to biological wastewater treatment; bioremediation of soil, air, surface and ground waters, landfill and natural systems.

EVEG 4105 Quantitative Water Management (3)

Prereq.: EVEG 3110. Quantitative tools used to solve water management problems based upon hydraulic, mass balance, stoichiometric, kinetic and equilibrium phenomena.

EVEG 4110 Unit Operations Laboratory (1)

Prereq.: CHEM 2060, EVEG 3110, EVEG 3145.

Understanding of the physical, biological and chemical operations and processes commonly utilized in environmental engineering; presentation of theoretical concepts and operational problems; laboratory experiments; and formal reports.

EVEG 4120 Design of Solid and Hazardous Waste Management Systems (3)

Prereq.: EVEG 3110 and EVEG 4125. Design of solid and hazardous waste systems; process selection; elements of waste management systems; physicochemical, biological, and thermal process design; regulations related to design of waste management systems.

EVEG 4125 Environmental Transport Processes (3)

Prereq.: EVEG 3120 and EVEG 3200. Fundamentals of chemical transport in engineered environments and natural systems with an emphasis on applications to environmental engineering practice.

EVEG 4136 Water Quality Analysis Laboratory (1)

Prereq.: CHEM 1212, ENGL 2000, EXST 2201 and credit or registration in EVEG 3145.
Water quality analysis of wastewater and natural waters.

EVEG 4140 Design of Wastewater Management Facilities (3)

Prereq.: EVEG 3200 and EVEG 3110; civil engineering students enrolled in this course must have credit in CE 4750 2 hrs. lecture; 3 hrs. lab. Design of wastewater management facilities; process selection and evaluation using computer-assisted procedures; preparation of design drawings, reports and cost estimates.

EVEG 4150 Integrated Environmental System Design I (3)

Prereq.: EVEG 3110 and EVEG 4125. Preliminary designs will be applied to final full designs in EVEG 4151. Principles of integrated environmental system design; economic, regulatory and risk-based requirements in initial preliminary design of environmental systems incorporating minimization, destruction, treatment and disposal technologies in all media; emphasis on preliminary design and screening of classical management systems.

EVEG 4151 Integrated Environmental System Design II (3)

Prereq.: EVEG 4150. Continuation of EVEG 4150. Final project designs are presented to representatives of the public and

private sectors. Economic, regulatory and risk-based requirements in completion of environmental design projects developed in 4150; minimization, destruction, treatment and disposal technologies in all media.

EVEG 4153 Hazardous Waste Management (3)

Prereq.: consent of instructor. Identification and classification of wastes; regulations; treatment, storage and disposal techniques; facilities parameters.

EVEG 4154 Sustainability Engineering (3)

Prereq.: CE 2450 or equivalent and consent of instructor. Engineering analysis and design approaches that minimize impacts on the environment, human health and social conditions; ecodesign; life cycle assessment; full-cost accounting; pollution prevention.

EVEG 4156 Water and Wastewater Treatment in Developing Countries (3)

Prereq.: EVEG 3200 and EVEG 3110. Design of sustainable water and wastewater treatment approaches in the developing world; low-cost, low-energy and low-maintenance treatment approaches; technology constraints; decentralized treatment strategies; case studies.

EVEG 4780 Special Topics in Environmental Engineering Design (3)

Prereq.: senior standing and departmental approval. May be taken for a max. of 6 sem. hrs. of credit when topics vary. More than one section of this course may be taken for credit concurrently when topics differ. Selected topics in environmental engineering design.

EVEG 4781 Special Topics in Environmental Engineering Science (3)

Prereq.: senior standing and departmental approval. May be taken for a max. of 6 sem. hrs. of credit when topics vary. More than one section of this course may be taken for credit concurrently when topics differ. Selected topics in environmental engineering science.

Food Science

FDSC 1049 Science of Foods (2)

Concepts and principles related to selection, preparation, processing, preservation, distribution and use of foods.

FDSC 2000 Fundamentals of Food Science (3)

Prereq.: BIOL 1201 and CHEM 1201 or permission of instructor. Introduction to scientific principles in chemistry of food constituents, new product development, food preservation, processing, packaging and safety.

FDSC 3000 Food Safety (3)

Prereq.: BIOL 1201 and CHEM 1201 or permission of instructor. Basic concepts of food safety including: introduction into food safety; extensive examination of causative agents responsible for food borne illness; and food borne illness case studies.

FDSC 3900 Food Science Research (1-3)

Prereq.: permission of department. May be taken for a max. of 6 sem. hrs. of credit. Student outlines and executes project and prepares a written report; problems related to processing, quality control, safety, and nutritional evaluation of food stuffs.

FDSC 3999 Food Science and Technology Seminar (1)

Prereq.: permission of department. May be taken for a max. of 2 sem. hrs. credit. Scientific seminar preparation and presentations on selected topics in food science and technology.

FDSC 4005 Food Engineering Systems (3)

Prereq.: PHYS 2001 and MATH 1550 or equivalent. 2 hrs. lecture; 3 hrs. lab. Application of engineering principles to various unit operations in food processing.

FDSC 4040 Quality Assurance in the Food Industry (4)

See ANSC 4040.

FDSC 4050 Food Composition and Analysis (4)

Prereq.: FDSC 4060 and CHEM 2060 or CHEM 2261 or equivalent. 3 hrs. lecture; 3 hrs. lab. Principles of official and acceptable chemical and physical methods used in food analysis; application of these methods to examination of raw and processed foods.

FDSC 4060 Food Chemistry (4)

Prereq.: BIOL 2083 and either CHEM 2060 or CHEM 2261 or equivalent. 3 hrs. lecture; 3 hrs. lab. Chemistry of food components; reactions occurring during processing and storage.

FDSC 4070 Food Laws, Standards and Regulations (2)

Prereq.: consent of instructor. Federal, state and city food laws, and how they are regulated, manufactured, distributed and use of foods, additives and regulated products.

FDSC 4075 Food Preservation (3)

Prereq.: CHEM 2060 or CHEM 2262 or equivalent, BIOL 2051 and at least 3 sem. hrs. in any food science course or consent of instructor. 2 hrs. lecture; 3 hrs. lab. Microbiology and biochemistry of food spoilage; engineering techniques of food preservation and food plant sanitation; methods of food preservation.

FDSC 4076 Food Product Development (3)

Prereq.: FDSC 4060 and FDSC 4095. Capstone course that food science students should take in their last spring semester of their program, after having taken a majority of their food science courses. 2 hrs. lecture; 3 hrs. lab. Development of new food products; marketing, package design and other aspects of product development.

FDSC 4086 Seafood Processing (3)

Prereq.: BIOL 1201 and CHEM 1201 or permission of instructor. Examination of all aspects of seafood processing including: history and economic importance of the seafood processing industry; resources; processing techniques (freezing, canning, drying, salting and pickling); processing by species; storage and distribution; and regulatory and food safety considerations.

FDSC 4095 Principles of Sensory Evaluation of Foods (4)

Prereq.: EXST 2201 or equivalent. 3 hrs. lecture; 3 hrs. lab. Theory and current practices used to evoke, measure, analyze and interpret reactions to those characteristics of foods and materials as they are perceived by the human senses of sight, smell, taste, touch and hearing.

FDSC 4162 Food Microbiology (4)

Also offered as BIOL 4162. Prereq.: BIOL 2051 and consent of department. 2 hrs. lecture; 4 hrs. lab. Microbiological principles as applied to food and food products; emphasis on rapid detection of food borne microorganisms.

FDSC 4163 Industrial Microbiology (4)

Prereq.: BIOL 4110 or equivalent. 2 hrs. lecture; 4 hrs. lab. See BIOL 4163.

FDSC 7010 Food Toxicology (3)

Prereq.: FDSC 4060 or permission of instructor. Principles of risk assessment, food chemical safety and toxicology; mycotoxins, aquatic toxins; natural toxins; food additives; and other food toxins.

FDSC 7020 Food Packaging (3)

2 hrs. lecture; 3 hrs. lab. Food package systems related to specific products and processes. Product composition, problems and packaging solutions and shelf life considerations.

FDSC 7030 Advanced Food Research (1-6)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit. Individual problems in pertinent areas.

FDSC 7040 Flavor and Colors of Foods (3)

Prereq.: CHEM 2060 and FDSC 4060 or equivalent. 2 hrs. lecture; 3 hrs. lab. Methods of chemical, physical and instrumental analysis in food colors and flavors; natural and synthetic flavorings and colorings.

FDSC 7050 Food Protein Biotechnology (3)

Prereq.: FDSC 4060, FDSC 4050 or permission of instructor. Overview of contemporary principles and applications of protein and enzyme technology, genetic engineering and immunology for the production of safe foods and food ingredients; proteins as functional food ingredients; applications and regulations of protein biotechnology in the food industry as well as ethical and legal issues; career opportunities in protein and enzyme biotechnology.

FDSC 7060 Advanced Concepts in Food Science (3)

Prereq.: FDSC 4060 and BIOL 4087. Analysis of new and progressive concepts in food science.

FDSC 7071 Seminar in Food Science (1)

May be taken for a max. of 3 hrs. of credit. Selected topics in food science and technology.

FDSC 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

FDSC 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Finance

FIN 1060 Personal Money Management (1)

See HUEC 1060.

FIN 2060 Survey of Investing I (1)

Prereq.: credit or registration in FIN 1060. Introduction to historical and contemporary issues in personal investing, including stocks, bonds, insurance, real estate and banking.

FIN 3060 Fundamentals of Financial Planning (3)

Prereq.: ECON 2000 or ECON 2001 and ECON 2010 or ECON 2011; or ECON 2030 or ECON 2031. Development of bases for decision-making related to financial planning.

FIN 3351 Principles of Real Estate (3)

Prereq.: BLAW 3201 or FIN 3715 or FIN 3716. Purchasing, owning and operating real estate relative to interest in realty, liens, contracts, deeds, titles, leases, brokerage, management.

FIN 3352 Real Estate Valuation and Investment (3)

Prereq.: FIN 3351 or FIN 3715 or FIN 3716 or equivalent. Principles of valuation applied to single-family and income-producing real property; techniques for making investment decisions in alternative types of real property; cash flow analysis considering income tax effects, financial leverage, risk-return trade-offs and alternative methods of disposition.

FIN 3353 Real Estate Finance (3)

Prereq.: FIN 3351 or FIN 3715 or FIN 3716 or equivalent. Real estate financing decisions for residential and income-producing properties; risk-return analysis for varying conditions of financial leverage; decision making related to pricing, alternative financing methods, refinancing, mortgage portfolio management; financing methods; government involvement in mortgage market and housing finance.

FIN 3354 Topics in Real Estate (3)

Prereq.: FIN 3352 or FIN 3353 or consent of instructor. Topics vary.

FIN 3440 Risk and Insurance (3)

Prereq.: BLAW 3201. Nature of nonspeculative risks and possible alternative methods of treating them; specific application of

these methods to personal and business risks arising from life, health, property and liability contingencies; influence of public policy on risk treatment.

FIN 3460 Risk Management (3)

Prereq.: FIN 3715 or FIN 3716. Risk management from the business manager's viewpoint; insurance and financial market methods of pooling and managing risk; identification and evaluation of risk; hedging, self insurance, recontracting and organizational design.

FIN 3632 Bank Administration (3)

Prereq.: FIN 3715 or FIN 3716. For students interested in commercial banking careers or in the role of banks within the American enterprise system. Economic role and evolution of banks; structure of banking; lending and investment techniques; bank organization and regulation; asset and liability management; credit risk management; bank performance analysis.

FIN 3636 Financial Markets and Institutions (3)

Prereq.: FIN 3715 or FIN 3716 or equivalent. Characteristics and functions of financial markets and institutions; process of financial intermediation and allocation of financial resources; analysis of current developments in financial institutions and in money and capital markets; factors in interest rate determination; management of credit risk, interest rate risk and operating risk.

FIN 3715 Business Finance (3)

Prereq.: ECON 2000 and ECON 2010, or ECON 2030; and ACCT 2000 or ACCT 2001. Credit will not be given for this course and FIN 3716. Not open to students in the E. J. Ourso College of Business. Finance function within the business enterprise; techniques of financial management, concepts of capital structure and dividend policy, working capital management, capital budgeting, institutional and international environment of the firm.

FIN 3716 Financial Management (3)

Prereq.: ECON 2000 and ECON 2010 and ACCT 2001. Credit will not be given for both this course and FIN 3715. Intended primarily for students in the E. J. Ourso College of Business. Students minoring in business should enroll in FIN 3715. Principles and procedures of financial management; investment and financing decisions within the business enterprise.

FIN 3717 Advanced Business Finance (3)

Prereq.: FIN 3716. Open only to finance majors; open to others with permission of department. Material presented in real-world cases. Hands on applications of financial tools introduced in FIN 3716; financial analysis, forecasting, capital budgeting and business evaluation.

FIN 3718 Multinational Managerial Finance (3)

Prereq.: FIN 3715 or FIN 3716. Multinational financial management; nature of international finance system; financing, investment and risk management of the multinational corporation.

FIN 3826 Investments (3)

Prereq.: FIN 3716. Open only to finance majors; open to others with permission of the department. Characteristics and valuation of common stocks, bonds, options, function and efficiency of U.S. securities markets; theory and practice of portfolio selection.

FIN 3840 Fixed Income Securities (3)

Prereq.: FIN 3826. Mechanics of fixed-income markets and securities; valuation of fixed income securities and contingent claims; interest rate risk, term structure, product fundamentals and bond portfolio strategies.

FIN 3845 Student Managed Investment Fund (3)

Prereq.: FIN 3715 or FIN 3716 or equivalent and permission of instructor. Course may be repeated for a max. of 9 sem. hrs. of credit. Analysis of equity investment opportunities in conjunction with the management of the Student Managed Investment Fund; emphasis on valuation techniques and fundamental analysis; operation of investment reporting systems.

FIN 3900 Directed Study and Research (1-6)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Research under direction of faculty member; written proposal must be approved by faculty member and department chair prior to registration.

FIN 3910 Topics in Finance (1-3)

Prereq.: FIN 3826 or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Topics of current interest.

FIN 3930 Undergraduate Internship in Finance (3)

Prereq.: FIN 3715 or FIN 3716, junior or senior standing and consent of department. Pass/fail grading based on a written evaluation by the professional supervisor, a written report by the student and the faculty member's evaluation. May not be repeated for credit. At least 20 hours per week in regular semester or 35 hours per week in summer session of learning experience in finance under the general supervision of a faculty member and the direct supervision of a professional in finance. On-the-job experience in an approved finance or business law position.

FIN 4060 Survey of Investing II (1)

Prereq.: FIN 2060 and FIN 3715 or FIN 3716. Must be taken during the final semester of the coursework for the Personal Investing minor.

Capstone course in the Personal Investing minor.

FIN 4071 Retirement Planning and Employee Benefits for Financial Planning (3)

Prereq.: FIN 3060 or equivalent. Decision-making related to retirement planning and employee benefits.

FIN 4073 Estate Planning for Financial Planning (3)

Prereq.: FIN 3060 or equivalent. Decision-making related to estate planning.

FIN 4079 Financial Planning Capstone (3)

Prereq.: FIN 3060 or equivalent, FIN 3826, FIN 4071, and FIN 4073. Advanced financial topics and development of a comprehensive financial plan.

FIN 4828 Security Analysis and Portfolio Management (3)

Prereq.: FIN 3826 or equivalent. Open only to Finance majors; open to others with permission of department. Security selection

and portfolio diversification in an efficient market; portfolio theory and management; portfolio building and selection; portfolio performance evaluations.

FIN 4830 Analysis of Corporate Financial Statements (3)

Prereq.: FIN 3716 or equivalent. Open only to finance majors; open to others with permission of department. Evaluation of financial statements; emphasis on their use in credit analysis and in evaluation of security risks and returns; recent research in accounting and finance; predictive ability of financial statement data.

FIN 4850 Financial Derivatives (3)

Prereq.: FIN 3636, FIN 3717 or FIN 3826. Open only to Finance majors; open to others with permission of department. Options, forwards, futures, swaps and other derivative instruments; principles of pricing, valuation models, trading strategies and managing risk in domestic and global financial markets.

FIN 7300 Seminar in Real Estate (3)

Questions facing participants in the real estate market, including equity investors, lenders, tenants and government; purchasing, owning and operating real estate relative to interest in realty contracts; deeds, title, leases, brokerage and management.

FIN 7310 Real Estate Financial Decisions (3)

Questions concerning real estate finance and valuation; risk-return trade-offs under varying conditions of financial leverage; refinancing; selecting between alternative financing methods; mortgage design, sale-leaseback, construction lending, secondary mortgage markets and the pricing of financing instruments.

FIN 7400 Financial Risk Management (3)

Prereq.: BADM 7090 or equivalent. Risk management of corporations, financial institutions, governments and non-profit organizations; characteristics of financial contracts and markets and applications of these contracts to risk management problems; the value of risk management, measuring exposures, financial contracts for managing risk, the enterprise risk management industry and the accounting and regulatory framework; market and credit risks are the primary focus, but some attention is also given to operational and other sources of risk.

FIN 7520 Seminar in Financial Research Methods (3)

Primarily for doctoral students. Financial economics; empirical behavior of financial markets; topics including trading rules and the efficient market hypothesis; market microstructure; event studies.

FIN 7550 Theory of Finance (3)

Prereq.: ECON 7610 or equivalent. Theory of choice under certainty and uncertainty; time-state preference models of risk allocation; mean-variance asset pricing models; arbitrage pricing models; option pricing models; discrete and continuous time models.

FIN 7632 Seminar in Commercial Banking (3)

Commercial banking theory and history, quantitative techniques applied to bank asset and liability management, banking structure, markets and competition, capital adequacy and profitability.

FIN 7633 Financial Markets (3)

Prereq.: BADM 7020.

Theoretical and empirical exposition of financial markets and institutions; their role in the economy; determination of the general level, risk structure and the transaction structure of security returns; emphasis on U.S. financial markets.

FIN 7650 Seminar in Financial Markets and Intermediaries (3)

Prereq.: FIN 7550. Primarily for doctoral students. Markets and intermediaries as alternative institutional mechanisms for structuring financial transactions; transaction services provided by these institutions; benefits and costs of these transaction services as determinants of the structure and extent of the financial sector.

FIN 7710 Public Financial Management (3)

Cross-listed as PADM 7710.

FIN 7718 Multinational Financial Management (3)

Prereq.: BADM 7090 or equivalent. Cross border investment, investment analysis, capital planning, foreign currency exposure

and cash management; concepts of political risk assessment; techniques in transactional trade; alternative financial sources; issues in international financial controls.

FIN 7719 Advanced Financial Management (3)

Prereq.: BADM 7090. Theory of business finance and evaluation of its usefulness to financial managers; capital expenditure, capital structure and dividend decisions; legitimacy of alternative decision criteria; implications of uncertainty and imperfect capital markets on firm financial decisions.

FIN 7720 Topics in Business Finance (3)

Prereq.: BADM 7090 or equivalent. Detailed treatment of topics not covered in depth in BADM 7090 or FIN 7719; prospectus usually available before registration.

FIN 7740 Venture Capital and Investment Banking (3)

Prereq.: BADM 7090 or equivalent. The role of venture capitalists and investment banks in financing, advising and influencing companies through the initial public offering; the structure of venture capital funds; staging of investments; compensation; valuation; interactions between venture capital and economic activity, the legal environment and social and ethical norms.

FIN 7750 Seminar in Corporate Finance (3)

Prereq.: FIN 7550. Primarily for doctoral students. Theory of choice under certainty and uncertainty; investment and financing decisions of the firm; the agency problem and agency costs; capital structure and dividend models related to corporate control.

FIN 7826 Investment Analysis and Portfolio Theory (3)

Prereq.: BADM 7020 and BADM 7030. Institutional elements of capital markets, mechanics of securities trading; analytic techniques for evaluating investment management; behavior of security prices, efficient diversification, techniques for measuring performance of securities and portfolios, security valuation, portfolio selection.

FIN 7845 Student Managed Investment Fund (3)

Prereq.: BADM 7090 or equivalent and permission of instructor. Course may be repeated for max. of 9 sem. hrs. of credit. Management and operation of the Student Managed Investment Fund; calculation and monitoring of performance in an

institutional equity portfolio; establishment of investment objectives, including asset allocation and selection and assessment and management of risk; settlement, accounting and reporting of results.

FIN 7850 Seminar in Investments (3)

Prereq.: FIN 7550. Primarily for doctoral students. Speculative price as a stochastic process; information revelation in and through speculative price; normative and positive models of investment theory; applications of contingent-claims/derivative securities pricing; theory and empiricism of fixed income securities.

FIN 7855 Seminar in Options, Futures and Other Derivatives (3)

Prereq.: FIN 7826 and ECON 7610 or equivalent; consent of instructor; mathematical maturity required. Arbitrage and equilibrium models of derivative pricing; models derived via continuous time Ito processes; binomial, finite difference, Monte Carlo and other numerical approaches; review of mathematical statistics, stochastic processes and Ito calculus.

FIN 7900 Individual Study in Finance (3)

Masters and doctoral students may take the course for credit 3 and 6 times, respectively. For students who wish in-depth study of a selected finance problem. Proposal outlining nature and objectives of a research project must be approved by department faculty prior to registration; written report of semester's activities and findings required for credit.

FIN 7930 Graduate Internship in Finance (3)

Prereq.: consent of department. Pass/fail grading based on a written evaluation by the professional supervisor; a written report by the student and the faculty member's evaluation. At least 20 hrs. per week in regular semester or 35 hrs. per week in summer session of learning experience in finance under the general supervision of a faculty member and the direct supervision of a professional in finance. On-the-job experience in an approved finance position.

FIN 7950 Seminar in Research (1)

Required of all doctoral students in business administration concentrating in finance during each semester of full-time residence; only 3 sem. hrs. may be applied toward the degree. Advanced research in finance; current research of doctoral candidates, faculty and invited guests.

FIN 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

FIN 8900 Pre-dissertation Research (1-9)

Pass-fail grading. May be repeated for credit.

FIN 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Film and Media Arts

FMA 2001 Introduction to Film and Media Arts (3)

Study of film, television and video.

FMA 3001 Special Topics in Film and Media Arts (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Selected topics relevant to the study of the film and media arts.

FMA 3010 Art of Cinematography (3)

In-depth study of history, concepts, and methods of film and video cinematography; formal instruction and practice in filmmaking techniques such as framing, camera movement, depth of field, and other key ideas as they relate to the creation of film narrative, aesthetic communication, and rhetoric.

FMA 3011 Art of Editing (3)

In-depth study of the history, concepts, and skills involved in film and video editing techniques; formal instruction and practice in non-linear editing along with concepts such as montage, continuity editing, and narrative.

FMA 3020 Independent Study in Film and Media Arts (3)

Prereq.: consent of instructor. Program of study, research and work in areas concerned with film and media arts.

FMA 3502 Special Topics in Italian Cinema (3)

See ITAL 3502.

FMA 3503 Special Topics in Asian Cinema (3)

May be taken for 6 sem. hrs. of credit when topics vary. In-depth study of various aspects of Asian cinema.

FMA 4001 Advanced Topics in Film and Media Arts (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Advanced topics relevant to the study of film and media arts.

French

FREN 1001 Elementary French (4)

[LCCN: CFRN 1014, Elementary French I] This is a General Education course. *Students with previous study of French should take the French placement exam. Students who do not place in FREN 1002 or higher through the placement exam should enroll in FREN 1001. Students with no previous study of French should enroll in FREN 1001. Students completing FREN 1002 or equivalent or higher with a grade of "C" or higher may not enroll in FREN 1001 for credit without permission of department. Students completing FREN 2101 or higher or equivalent, with a grade of "C" or higher, may not enroll in FREN 1002 for credit without permission of department. Native speakers of French will not receive credit for this course.* Basic lexicon and structure of French; emphasis on communicative language use; supplementary work in language laboratory.

FREN 1002 Elementary French (4)

[LCCN: CFRN 1024, Elementary French II] This is a General Education course. *Prereq.: FREN 1001 or equivalent prior study is prerequisite for FREN 1002. Students with previous study of French should take the French placement exam. Students*

who do not place in FREN 1002 or higher through the placement exam should enroll in FREN 1001. Students with no previous study of French should enroll in FREN 1001. Students completing FREN 1002 or equivalent or higher with a grade of "C" or higher may not enroll in FREN 1001 for credit without permission of department. Students completing FREN 2101 or higher or equivalent, with a grade of "C" or higher, may not enroll in FREN 1002 for credit without permission of department. Native speakers of French will not receive credit for this course. Basic lexicon and structure of French; emphasis on communicative language use; supplementary work in language laboratory.

FREN 1020 French for Reading Knowledge (3)

Specialized course to satisfy departmental reading requirement for graduate students, but carrying no graduate credit. Undergraduates may enroll on pass-fail basis only. Does not count toward satisfying foreign language requirement for undergraduates, although hours may count toward baccalaureate. Credit will not be given for both this course and introductory French courses. Native speakers of French will not receive credit for this course.

FREN 1201 Elementary Cajun French (4)

This is a General Education course. *Credit will not be given for both FREN 1001 and FREN 1201 nor for both FREN 1002 and FREN 1202. Students with previous study of French should take the French placement exam. Student who do not place in FREN 1002 or higher through the placement exam should enroll in FREN 1201. Basic lexicon and structure of Cajun French; emphasis on communicative language use; supplementary work in language laboratory.*

FREN 1202 Elementary Cajun French (4)

This is a General Education course. *Prereq.: FREN 1001, FREN 1201 or equivalent prior study is prerequisite for FREN 1202. Credit will not be given for both FREN 1001 and FREN 1201 nor for both FREN 1002 and FREN 1202. Students with previous study of French should take the French placement exam. Student who do not place in FREN 1002 or higher through the placement exam should enroll in FREN 1201. Basic lexicon and structure of Cajun French; emphasis on communicative language use; supplementary work in language laboratory.*

FREN 2001 French for Travelers I (3)

Credit not applicable toward a major in French. Does not count toward satisfying foreign language requirement for undergraduates. Native speakers of French will not receive credit for this course. Basic communication patterns; practical everyday vocabulary, with exercises in comprehension and conversation.

FREN 2002 French for Travelers II (3)

Prereq.: FREN 2001. Credit not applicable toward a major in French. Does not count toward satisfying foreign language

requirement for undergraduates. Native speakers of French will not receive credit for this course. Intermediate level structures with emphasis on communication, comprehension and conversation.

FREN 2101 Intermediate French (3)

[LCCN: CFRN 2013, 2026, Intermediate French I] This is a General Education course. Credit will not be given for FREN 2102. FREN 1002 or equivalent prior study is prerequisite for FREN 2101. Students completing FREN 2102 or equivalent or higher, with a grade of "C" or higher, may not enroll in FREN 2101 for credit without permission of the Department. Students completing FREN 2155 or equivalent or higher, with a grade of "C" or higher, may not enroll in FREN 2102 for credit without permission of the Department. Continuation of elementary French. Native speakers of French will not receive credit for this course. Structures and lexicon of French; additional emphasis on reading and writing; supplementary work in language laboratory.

FREN 2102 Intermediate French (3)

[LCCN: CFRN 2023, 2026, Intermediate French II] This is a General Education course. Coreq.: FREN 2101 or equivalent. Credit will not be given for FREN 2101. Students completing 2102 or equivalent or higher, with a grade of "C" or higher, may not enroll in FREN 2101 for credit without permission of the Department. Students completing FREN 2155 or equivalent or higher, with a grade of "C" or higher, may not enroll in FREN 2102 for credit without permission of the Department. Continuation of elementary French. Structures and lexicon of French; additional emphasis on reading and writing; supplementary work in language laboratory.

FREN 2154 Intermediate Oral Communication (3)

Prereq.: FREN 2101, FREN 2201 or concurrent enrollment in FREN 2101 or FREN 2201. Native speakers of French will not receive credit for this course. Development of listening and speaking competency.

FREN 2155 Readings in French Literature (3)

This is a General Education course. *Prereq.:* FREN 2102 or equivalent. Native speakers of French will not receive credit for this course. Introduction to interpretive reading of French texts; development of competency in written French.

FREN 2201 Intermediate Cajun French (3)

This is a General Education course. *Prereq.:* FREN 1202, FREN 1002 or equivalent prior study is prerequisite for FREN 2201. Credit will not be given for both FREN 2101 and FREN 2201 nor for FREN 2102 and FREN 2202. Continuation of elementary Cajun French. Structures and lexicon of French as it is spoken in Louisiana. Emphasis on comprehension and production of extended discourse, both oral and written; supplementary work in language lab and one field work project required.

FREN 2202 Intermediate Cajun French (3)

This is a General Education course. *Prereq.: FREN 2201, FREN 2101 or equivalent prior study is a prerequisite for FREN 2202. Credit will not be given for both FREN 2101 and FREN 2201 nor for FREN 2102 and FREN 2202. Continuation of elementary Cajun French. Structures and lexicon of French as it is spoken in Louisiana. Emphasis on comprehension and production of extended discourse, both oral and written; supplementary work in language lab and one field work project required.*

FREN 2254 Intermediate Oral Communication in Cajun French (3)

Prereq.: FREN 2101, FREN 2201 or concurrent enrollment in FREN 2201 or FREN 2101. Development of listening and speaking competency.

FREN 2801 French Classics in Translation (3)

This is a General Education course. *For non-French majors. Introduction to the classics of French letters.*

FREN 3058 Advanced Oral Communication (3)

Native speakers of French will not receive credit for this course. Development of listening and speaking competency using video and text materials; special problems in spoken French including register and variation.

FREN 3060 Advanced French Grammar and Composition (3)

Prereq.: credit or registration in FREN 2155 or equivalent or permission of instructor. Special problems in French grammar and syntax; emphasis on the written language.

FREN 3071 Survey of French Literature (3)

Prereq.: FREN 2155 or equivalent; credit or registration in FREN 3060 or equivalent or permission of instructor. French majors are strongly urged to enroll in this course before their senior year. Development of French literature from its beginnings through the 18th century.

FREN 3072 Survey of French Literature (3)

Prereq.: FREN 2155 or equivalent; credit or registration in FREN 3060 or equivalent or permission of instructor. French majors are strongly urged to enroll in this course before their senior year. Continuation of FREN 3071. The main authors and literary movements from the 18th century to the present.

FREN 3076 Introduction to Francophone Cultures (3)

Prereq.: FREN 3060 or equivalent. An overview of the manifestations of Francophone cultures in Africa, the Caribbean, Southeast Asia and Canada.

FREN 3080 French Culture and Civilization (3)

Also offered as LING 3080. Prereq.: FREN 2155; credit or registration in FREN 3060 or equivalent or permission of instructor. Various aspects of French culture and civilization; emphasis on those factors necessary for understanding contemporary France and the Francophone world.

FREN 3090 Francophone Texts and Contexts (3)

May be taken for a max. of 6 sem. hrs. of credit when subject matter varies. Taught in French and English. Focus on specific aspects of Francophone literature, culture, history and thought.

FREN 3260 Structure of Louisiana French (3)

Also offered as LING 3260. Prereq.: FREN 2102 or FREN 2202 or equivalent fluency in French. Descriptive study of the structure and lexicon of Louisiana French dialects, with particular emphasis on the variety known as Cajun; emphasis on contrast with normed French, as well as comparison with other regional varieties.

FREN 3280 Cajun French Culture (3)

Also offered as LING 3280. Prereq.: FREN 2102 or equivalent. Taught in French. Various aspects of Cajun French culture in Louisiana; emphasis on both traditional folk culture and contemporary issues.

FREN 3295 Special Topics in Louisiana French (3)

Prereq.: FREN 2102 or FREN 2202 or equivalent fluency in French. May be taken for a max. of 6 sem. hrs. credit when topics vary.

FREN 3401 Tutoring Learners of French as a Second Language (1)

Prereq.: FREN 2155 or equivalent; EDCI 2001; concurrent enrollment in EDCI 3001. A carefully monitored and evaluated French tutoring experience in a local middle or high school under the guidance of the course instructor and a mentoring teacher.

FREN 3402 Developing Language Lessons for French as a Second Language (1)

Prereq.: EDCI 3001, FREN 3401 and concurrent enrollment in EDCI 3136. 3 hrs. lab/field experiences in multicultural settings. Under the supervision of a French faculty member and a teacher mentor, teacher candidates will prepare and deliver second language French language lessons that incorporate audio-visual materials and technology-enhanced language learning activities.

FREN 4000 Old French and Medieval Literature (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Major aspects of the language and literature of the period.

FREN 4001 History of the French Language (3)

Also offered as LING 4001. Prereq.: FREN 3060 or equivalent or permission of instructor. Development of French from its beginnings to the present; attention to formation of the modern language.

FREN 4003 Senior Seminar (3)

Prereq.: FREN 3060, FREN 3071 and FREN 3072 or equivalent and senior standing. Required of French majors. Research project on a topic in French or Francophone literature, language or civilization.

FREN 4005 Advanced French Syntax and Stylistics (3)

Prereq.: FREN 3060 or equivalent or permission of instructor. Syntactical structure of French, with attention to stylistic improvement of written and oral expression.

FREN 4010 French Literature of the 16th Century (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Major aspects of the literature of the period; topics will focus variously on an author, a theme or a genre.

FREN 4014 Introduction to French Linguistics (3)

Also offered as LING 4014. French phonology, morphology and syntax.

FREN 4015 Advanced French Phonetics (3)

Also offered as LING 4015. Theoretical principles of French phonetics and their application.

FREN 4020 French Literature of the 17th Century (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Major aspects of the literature of the period.

FREN 4030 French Literature of the 18th Century (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Major literary, philosophic and scientific currents of the period and their interrelations.

FREN 4031 The French Film (3)

Prereq.: FREN 3060 or equivalent or permission of instructor. Art of the French film from Louis Lumière to the present; its interrelations with French literature; screening and analyses of representative films.

FREN 4040 French Literature of the 19th Century (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents; or permission of instructor. Major aspects of the literature of the period.

FREN 4041 Translation Skills (3)

Prereq.: FREN 3060 or equivalent or permission of instructor. An analytic approach to the structures of English and French; strategies and techniques for their translation in literary, technical and scientific contexts.

FREN 4050 French Literature of the 20th Century (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents; or permission of instructor. Major aspects of the literature.

FREN 4051 French for Business (3)

Prereq.: FREN 3060 or equivalent; or permission of instructor. Language acquisition for students preparing for careers involving trade or business activities with French-speaking areas.

FREN 4060 French Literature of Quebec (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents; or permission of instructor. Major aspects of the literature of Quebec.

FREN 4070 Literature of Africa and the Caribbean (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Major aspects of francophone African and Caribbean literature.

FREN 4080 Special Topics in French/Francophone Cultures and Civilizations (3)

Prereq.: FREN 3060 or equivalent; or permission of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

FREN 4090 French and Francophone Women Writers (3)

Prereq.: FREN 3071 and FREN 3072 or equivalents or permission of instructor. Women's writing in France and in Francophone countries from the middle ages to the present.

FREN 4100 Special Topics in French Language and Literature (3)

Prereq.: FREN 3060 or equivalent; or permission of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

FREN 4403 Instructional Strategies for the Second Language French Classroom (1)

Prereq.: EDCI 3136, FREN 3402, and concurrent enrollment in EDCI 4003. Teacher candidates will study and participate in activities that incorporate different classroom interactional structures, including teacher-to-whole class, task-based group activities and student-to-student (pair work); candidates will design and conduct French language lessons using learner-centered activities.

FREN 4404 Critical Issues in Teaching French as Second Language: Capstone Course (3)

Prereq.: EDCI 4003, FREN 4403, and concurrent enrollment in EDCI 4004 and EDCI 4005. Teacher candidates should be in their last two semesters of completion of the requirements for a major in French. Taught in French. Focus on the consolidation of knowledge about the French language, literature and culture with respect to the teaching of subject content to middle or high school learners.

FREN 4915 Independent Work (1-3)

Prereq.: FREN 3060 or equivalent or permission of instructor. May be taken for a max. of 3 hrs. of credit. Readings in French literature directed by a senior faculty member.

FREN 7006 Studies in Medieval French Literature (3)

Prereq.: May be taken for a max. of 6 hrs. of credit with consent of department if content varies. Topics focus on an author, movement, or literary mode.

FREN 7013 Montaigne (3)

The Essais and their importance.

FREN 7022 Studies in 17th Century French Literature (3)

May be taken for a max. of 6 hrs. of credit with consent of department if content varies. Topics focus on an author, movement or literary mode.

FREN 7032 Studies in 18th Century French Literature (3)

May be taken for a max. of 6 hrs. of credit with consent of department, if content varies. Topics focus on an author, movement or literary mode.

FREN 7042 Studies in 19th Century French Literature (3)

May be taken for a max. of 6 hrs. of credit with consent of department, if content varies. Topics focus on an author, movement, or literary mode.

FREN 7051 The 20th Century Novel (3)

The works of such major novelists of the modern period as Gide, Proust, Malraux, Camus, Beckett and Robbe-Grillet.

FREN 7052 Studies in 20th Century French Literature (3)

May be taken for a max. of 6 hrs. of credit with consent of department, if content varies. Topics focus on an author, movement or literary mode.

FREN 7100 Studies in Sub Saharan Francophone Literature and Culture (3)

May be taken for a max. of 6 sem. hrs. credit with consent of department, if content varies. The major movements and authors of francophone literature in the cultural context of Sub Saharan Africa.

FREN 7102 Studies in North African Francophone Literature and Culture (3)

May be taken for a max. of 6 sem. hrs. credit with consent of department, if content varies. The major movements and authors of francophone literature in the cultural context of North Africa.

FREN 7120 Studies in Francophone Asian Literature and Culture (3)

May be taken for a max. of 6 sem. hrs. credit with consent of department, if content varies. The major movements and authors of francophone literature in the context of Francophone Asia.

FREN 7140 Studies in Caribbean Francophone Literature and Culture (3)

May be taken for a max. of 6 sem. hrs. credit with consent of department, if content varies. The major movements and authors of Francophone literature in the cultural context of the Caribbean.

FREN 7170 Studies in Belgian Francophone Literature and Culture (3)

May be taken for a maximum of 6 hrs. credit with approval of the department, if content of the course varies. Topics focus on major literary authors, movements, genres and/or forms of artistic expression such as the graphic novel, film or the visual arts which illustrate the specificity of Belgian Francophone Literature and Culture.

FREN 7206 Louisiana French and Bilingualism (3)

Some field work required. Sociolinguistic, psychological and linguistic aspects of bilingualism as they apply to Louisiana; analysis of language contact situations, language change and variation.

FREN 7300 Old Provençal (3)

Phonology and morphology of Old Provençal based on the study of literary texts.

FREN 7410 Studies in Contemporary French Theory (3)

May be taken for a max. of 6 sem. hrs. of credit with consent of department, when subject matter varies. Selected movements and thinkers of French theory after 1960.

FREN 7915 Independent Study (1-3)

May be taken for a max. of 3 hrs. credit in a master's program and 9 hrs. credit in a doctoral program. Directed individual readings guided by the graduate faculty.

FREN 7960 Special Topics in French Literature (3)

May be taken for a max. of 6 hrs. of credit for the master's degree and 9 hrs. of credit for the doctorate when topics vary. Topics to be announced.

FREN 7962 Special Topics in French Linguistics (3)

May be taken for 6 hrs. of credit for the master's degree and 9 hrs. of credit for the doctorate when topics vary. Topics to be announced.

FREN 7970 Seminar in French Literature (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Topics to be announced.

FREN 7980 Seminar in French Linguistics (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Topics to be announced.

FREN 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

FREN 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

General Business

GBUS 1000 Introduction to the Study of Business (1)

Enrollment in this course is limited to students admitted to the E. J. Ourso College of Business. Introduction to the E. J. Ourso College of Business policies and resources including academic advising, majors, career alternatives, college technology and student organizations.

GBUS 1001 Introduction to Business (3)

May not be taken by students in the E. J. Ourso College of Business. Operation of the business firm; function of the businessman; nature of economic system and private enterprise.

GBUS 4040 Entrepreneurship in China (3)

Characteristics of Chinese: entrepreneurs, new venture financing, innovation and creativity, franchising, family businesses, technological entrepreneurs, technological intrapreneurs, entrepreneurship education and incubators.

Geography: Core Curriculum

GEOG 1001 Human Geography: Americas and Europe (3)

This is a General Education course. *GEOG 1001 and GEOG 1003 need not be taken in numerical order.* Principal themes of human geography, including the spatial distributions and interactions of culture, history, economy, population and environment, with a regional emphasis on the Americas and Europe.

GEOG 1003 Human Geography: Africa and Asia (3)

This is a General Education course. *GEOG 1001 and 1003 need not be taken in numerical order.* Principal themes of human geography, including the spatial distributions and interactions of culture, history, economy, population and environment, with a regional emphasis on Africa and Asia.

GEOG 2050 Physical Geography: The Atmosphere (3)

This is a General Education course. *Credit will not be given for both this course and GEOG 2061. May be taken for elective geology credit.* Physical principles, processes and operations in the atmosphere; world climatic realms.

GEOG 2051 Physical Geography: Land and Water Surfaces, Plant and Animal Realms (3)

This is a General Education course. *Credit will not be given for both this course and GEOG 2061.* Surface elements of the earth's environment; relationships among these elements.

GEOG 2055 Map Reading (3)

2 hrs. lecture; 2 hrs. lab. Nature and interpretation of topographic maps.

Geography: Mapping Sciences: Cartography

GEOG 2039 Cartographic Drafting and Graphic Presentation (3)

2 hrs. lecture; 2 hrs. lab. Basic drafting instruments and techniques necessary for preparation of maps and scientific graphics.

GEOG 4044 Computer Cartography (3)

No programming knowledge necessary. Introduction to selected mapping packages.

Geography: Mapping Sciences: Remote Sensing

GEOG 4020 Aerial Photo Interpretation and Image Processing (3)

Prereq.: consent of instructor. Credit will not be given for both this course and ANTH 4024. *2 hrs. lecture; 2 hrs. lab.* Analysis and mapping of geological features, hydrological process, land forms, cultural features, natural resource, and environmental phenomena from aerial photographs and satellite images.

GEOG 4045 Environmental Remote Sensing (3)

Prereq.: consent of instructor. May be taken for elective geology credit. *2 hrs. lecture; 2 hrs. lab.* Basic energy and matter relationships; principles of primary remote sensors; environment studied via remote sensing techniques.

Geography: Mapping Sciences: GIS/Techniques

GEOG 4041 Field Methods in Geography (3)

Cannot be repeated for credit. Students must have Saturdays free. 1 hr. lecture; 4 hrs. lab. Fall semester emphasis on interpretation of the cultural landscape; spring semester emphasis on the physical landscape.

GEOG 4042 Enterprise Geographic Information Systems (3)

Also offered as ANTH 4042. Prereq.: permission of instructor. The use of vector-based GIS application software for the input, management, analysis and presentation of geospatial data. Emphasis is placed on how the GIS relates to database management systems as part of building an enterprise-wide GIS.

GEOG 4046 Webmapping (3)

The creation of websites for the presentation of geospatial data via the World Wide Web. Emphasis is placed on how the technologies of Internet Web servers, GIS application software and database management systems form a symbiotic relationship to make such websites possible.

GEOG 4047 Geographic Information Systems (3)

Prereq.: CSC 1250 or CSC 1253 or equivalent. Geographic information systems used in land resource management and planning; data structures and algorithms for automated retrieval and analysis of spatial data; structuring cartographic data into spatial data; integration of remotely sensed data into geographic information systems.

GEOG 4048 Methods of Spatial Analysis (3)

Mathematical, statistical and spatial analytical methods for handling and interpreting data related to geography.

Geography: Human Geography: Systematic

GEOG 2010 Human Geography (3)

[LCCN: CGRG 2013, Human Geography] Survey of patterns and processes of world's cultures and landscapes.

GEOG 4073 Urban Geography (3)

Internal arrangement, external relations and locational aspects of urban places, with emphasis on U.S.; urban places identified by presence of tertiary economic activities.

GEOG 4074 Place and Culture (3)

See ANTH 4074.

GEOG 4077 Economic Geography (3)

Location, characteristics and relationships of primary, secondary and tertiary economic activity; measurements and theories of location of economic endeavor.

GEOG 4078 Environment and Development (3)

Geographic theories and methods for analyzing relationship between environment and development.

GEOG 4079 Geography of Religion (3)

Also offered as REL 4079. Theory and methods of analyzing the culture and movement of religious rituals and traditions over space and time.

GEOG 4086 Human-Environment Interactions (3)

Also offered as ANTH 4086. Cultural adaptation to difficult and distinctive environments, including mountains and highlands, the arctic, deserts, the humid tropics and grasslands; subsistence strategies, local knowledge, household economies, land use practices and resource management institutions.

GEOG 4087 Gender, Place and Culture (3)

Also offered as ANTH 4087 and WGS 4087. The geographies of everyday life showing how notions of maleness and femaleness influence how we understand and relate to the world around us, from our built environment, to the places we invest with meaning, and the very ways we live, work, travel and explore

Geography: Human Geography: Regional

GEOG 3001 Geography of Louisiana (3)

Development and current distribution of physical and human geography of Louisiana.

GEOG 4002 South Asian Society, Polity and Culture (3)

See INTL 4002.

GEOG 4031 Latin America and the Caribbean (3)

Physical and cultural geography of Latin America and the Caribbean.

GEOG 4033 Geography of Central Asia and Afghanistan (3)

Also offered as INTL 4033. Survey of the geography of Central Asia and Afghanistan; emphasis on geographic elements of the history, ecology, environment, economy and strategic importance of the region.

GEOG 4037 Geography of China (3)

Geographic survey of natural environment, population and economy of China and its relationships to the rest of the world.

GEOG 4051 North Africa and the Middle East (3)

Also offered as INTL 4051. Survey of the geography of North Africa and the Middle East; emphasis on the geographic elements of the history, ecology, economy and politics of the region.

GEOG 4052 Geography of the United States and Canada (3)

Physical and cultural geography of the United States and Canada.

Geography: Physical Geography: Climatology

GEOG 4013 Meteorology (3)

Prereq.: GEOG 2050 or equivalent. May be taken for elective geology credit. Temporal and areal variations in composition and structure of the atmosphere; meteorological instruments and measurements.

GEOG 4014 Climatology (3)

Prereq.: GEOG 2050 or equivalent. Climatic phenomena; methods in development of regional climatology.

GEOG 4015 Physical Climatology (3)

Also offered as ENVS 4015. Prereq.: GEOG 4013 or GEOG 4014 or equivalent and MATH 1552 or equivalent. May be taken for elective geology credit. Exchanges of radiation, energy, matter and momentum between the earth's surface and the atmosphere that produce characteristic environmental conditions near the ground important to both rural and urban land uses.

GEOG 4016 Methods of Climatological Analysis (3)

Prereq.: GEOG 4013 or GEOG 4014 or equivalent. Analysis and interpretation of climatological data and application to physical and human problems.

GEOG 4018 Geographical Hydrology (3)

Prereq.: MATH 1021 or equivalent. 2 hrs. lecture; 2 hrs. lab. Analysis of basic hydrologic processes with geographical perspective; variability of runoff and groundwater; floods and droughts; climatic and land use impacts on local and global water resources.

GEOG 4221 The Tropical Atmosphere (3)

Prereq.: GEOG 4013 or GEOG 4014. Comparative analysis of the tropical and mid-latitude atmospheric circulation systems, including monsoon systems, tropical cyclones and easterly waves; elements of interannual tropical variability such as El Niño-Southern Oscillation.

Geography: Physical Geography: Geomorphology & Coastal

GEOG 4022 Geomorphology (3)

Prereq.: GEOL 1001, GEOL 1003. May be taken for elective geology credit. Basic principles underlying the study of land forms; emphasis on processes shaping the natural landscape.

GEOG 4024 Coastal Morphodynamics (3)

Prereq.: MATH 1021, MATH 1022, MATH 1023. See OCS 4024.

GEOG 4029 Coastal Resources and Management (3)

Introduction to coastal environments and contemporary global coastal and estuarine management.

Geography: Physical Geography: Biogeography & Environment

GEOG 2000 Hazards, Disasters and the Environment (3)

See DSM 2000.

GEOG 4070 Environmental Conservation (3)

Factors governing human use of the earth and its resources.

GEOG 4083 Environmental Change of the Ice Age (3)

Also offered as ANTH 4083. Prereq.: GEOG 2050 and GEOG 2051 or GEOL 1001 and GEOL 1003 or consent of the instructor.
Theory of climatic variability on orbital to inter-annual time scales and the methods of reconstructing ecological and climatic variability with biological, geological and historical archives.

Geography: Other Courses

GEOG 2061 Physical Geography (3)

Either GEOG 2050 or GEOG 2051 may be substituted for this course. Credit will not be given for both this course and GEOG 2050 or GEOG 2051. Analysis of landforms, hydrology, climate, vegetation and soil; emphasis on world regional patterns.

GEOG 4023 Coastal and Shallow-Marine Depositional Systems (3)

May be taken for elective geology credit. See GEOL 4023.

GEOG 4090 The History of Geography (3)

3 hrs. lecture and proseminar discussion. Development of geography since ancient times; emphasis on the 19th and 20th centuries.

GEOG 4164 Deltaic Geology (3)

See GEOL 4164.

GEOG 4997 Special Topics in Geography (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Permission of instructor.

GEOG 4998 Independent Study and Research in Geography (1-6)

An honors course, GEOG 4999, is also available. Credit will not be given for this course and GEOG 4999. Prereq.: written consent of instructor. May be taken for a max. of 9 sem. hrs. of credit.

Supervised study or research on topics selected by qualified advanced students.

GEOG 4999 HONORS: Independent Reading and Research in Geography (1-6)

Same as GEOG 4998, with special honors emphasis for qualified students. Permission of instructor. Credit will not be given for this course and GEOG 4998.

GEOG 7074 Poetics of Place (3)

Same as ANTH 7074.

GEOG 7901 Introduction to Graduate Study (1)

Same as ANTH 7901. Techniques and methods of their profession for incoming graduate students.

GEOG 7902 Introduction to Research Methods in Geography (3)

GEOG 7906 Settlement Geography: Exploration (3)

May be taken for a max. of 9 hrs. of credit with consent of department.

GEOG 7911 Selected Topics in Geography (3)

May be taken for a max. of 9 hrs. when topics vary. Permission of instructor.

GEOG 7917 Advanced Physical Geography (3)

May be taken for a max. of 9 hrs. of credit with consent of department.

GEOG 7921 Research and Field Work in Geography (3-6 each)

Each course may be repeated for credit. Permission of instructor.

GEOG 7922 Research and Field Work in Geography (3-6 each)

Each course may be repeated for credit. Permission of instructor.

GEOG 7923 Research and Field Work in Geography (3-6 each)

Each course may be repeated for credit. Permission of instructor.

GEOG 7935 Quantitative Methods for Geographical Analysis (3)

Prereq.: EXST 7003 or equivalent. Spatial analytical methods for handling and interpreting data related to geography.

GEOG 7936 Advanced Qualitative Research in Geography and Anthropology (3)

Also offered as ANTH 7936. Explores the varied tools, techniques and methodologies of qualitative inquiry. Students gain practical experience creating and working with multiple forms of qualitative data and engaging in qualitative analysis and interpretation.

GEOG 7937 Geographical Literature (3)

GEOG 7938 Culture History (3)

May be taken for a max. of 9 hrs. of credit with consent of department.

GEOG 7939 Seminar in Cultural Geography (3)

May be repeated for max. of 9 sem. hrs. credit when topics vary. Explores different theoretical, methodological and empirical approaches in cultural geography.

GEOG 7943 Paleoclimatology (3)

Also offered as ANTH 7943 and GEOL 7943. Prereq.: GEOG 2050 and GEOG 2051 or GEOL 1001 and GEOL 1003 or consent of instructor. Theory and methods of reconstructing climatic variability from biological and geological proxy records as well as historical archives.

GEOG 7945 Socioeconomic Applications of GIS (3)

Prereq.: GEOG 4047 or equivalent. Applications of Geographic Information Systems in business, social, economic, and public policy studies.

GEOG 7946 Coastal and Estuarine Resources (3)

Prereq.: GEOG 4029 or equivalent. Nature of coastal and estuarine resources and their perception, evaluation and exploitation.

GEOG 7973 Advanced Geographic Information Systems (3)

Prereq.: GEOG 4047 or equivalent. Theory and methods of design, development, implementation and applications of geographic information systems.

GEOG 7975 Advanced Remote Sensing Seminar (3)

Prereq.: GEOG 4045 or equivalent. May be taken for a max. of 9 sem. hrs. of credit when topics vary. Selected topics in remote sensing.

GEOG 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading. Permission of instructor.

GEOG 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading. Permission of instructor.

Geology

GEOL 1001 General Geology: Physical (3)

[LCCN: CGEO 1103, Physical Geology] This is a General Education course. *An honors course, GEOL 1002, is also available. Credit will not be given for both this course and GEOL 1002 or GEOL 1111. Earth materials and land forms; processes at work on and within the earth.*

GEOL 1002 HONORS: General Geology: Physical (3)

This is a General Education course. *Same as GEOL 1001, with special honors emphasis for qualified students. Credit will not be given for both this course and GEOL 1001 or GEOL 1111.*

GEOL 1003 General Geology: Historical (3)

[LCCN: CGEO 1113, Historical Geology] This is a General Education course. *An honors course, GEOL 1004, is also available. Prereq.: GEOL 1001 or GEOL 1111. Credit will not be given for this course and GEOL 1004. History of the earth and life on it, as deciphered from study of its rocks and fossils.*

GEOL 1004 HONORS: General Geology: Historical (3)

This is a General Education course. Same as GEOL 1003, with special honors emphasis for qualified students. Credit will not be given for this course and GEOL 1003.

GEOL 1066 Dinosaurs, Catastrophes and Extinctions (3)

This is a General Education course. Not for major credit for geology majors. History of dinosaur discoveries and methods of study; dinosaurs' relationship to birds and mammals; place of dinosaurs in earth's geological history; emphasis on catastrophes and patterns of extinction.

GEOL 1111 Geology of National Park Areas (3)

This is a General Education course. Credit will not be given for this course and either GEOL 1001 or GEOL 1002. Geological study of areas supervised by the National Park Service. Areas covered will include most of the National Parks and Monuments, and many other federally owned lands.

GEOL 1601 Physical Geology Laboratory (1)

[LCCN: CGEO 1101, Physical Geology Lab] This is a General Education course. Prereq.: credit or concurrent enrollment in GEOL 1001. Lab related to GEOL 1001. Properties of minerals and rocks; practical application of geological principles, using topographic and geological maps; geological factors relating to energy exploration and environmental problems, with emphasis on south Louisiana.

GEOL 1602 Historical Geology Laboratory (1)

[LCCN: CGEO 1111, Historical Geology Lab] This is a General Education course. Prereq.: GEOL 1601; credit or concurrent enrollment in GEOL 1003. Lab related to GEOL 1003. Sedimentary rocks and environments, geobiological sequences, fossils and the historical geological record as interpreted from maps.

GEOL 2020 Geology and the Environment (3)

This is a General Education course. Prereq.: GEOL 1001 or GEOL 1111. Interaction between human activities and geological processes, hazards and materials; emphasis on environmental geology of Louisiana and the Gulf Coast region.

GEOL 2061 History of the Biosphere (4)

Prereq.: GEOL 1003, GEOL 1602; BIOL 1201. One or two field trips required. 3 hrs. lecture; 3 hrs. lab. Characteristics and geologic history of selected taxa with significant fossil records; use of paleontologic data (paleobiologic, paleoenvironmental, geochemical and biostratigraphic) in geology and evolutionary studies; influence of the biosphere on Earth over geologic time.

GEOL 2081 Mineralogy (4)

Prereq.: GEOL 1001, GEOL 1601, CHEM 1201 and credit or registration in CHEM 1202 or consent of instructor. Credit will not be given for this course and GEOL 3200. 3 hrs. lecture; 3 hrs. lab. Elementary crystallography; mineral identification; general chemical and physical properties of minerals; environments of minerals.

GEOL 3032 Introduction to Sedimentology and Depositional Environments (4)

Prereq.: GEOL 1001, GEOL 1003, GEOL 1601 or equivalent; GEOL 2081 or consent of instructor. Credit will not be given for this course and GEOL 3200. One field trip and one field exercise in nearby area. 3 hrs. lecture; 3 hrs. lab. Sediment types, textures, sedimentary structures and major minerals used to understand sedimentary processes leading to different depositional environments.

GEOL 3041 Igneous and Metamorphic Petrology (4)

Prereq.: GEOL 2081. Credit will not be given for this course and GEOL 3200. 3 hrs. lecture; 3 hrs. lab. Classification, theoretical background and tectonic processes related to development of igneous and metamorphic rocks; and optical petrographic methods.

GEOL 3071 Structural Geology (4)

Prereq.: GEOL 1003, GEOL 1602; credit in MATH 1550. 2 hrs. lecture; 3 hrs. lab and a one week field-based project. Geometric, kinematic and dynamic analysis of geologic structures and structural systems resulting from deformation; introduction to tectonics; introduction to field techniques and geologic maps; generation of geologic maps and cross-sections.

GEOL 3200 Earth Materials for Petroleum Engineers (3)

Prereq.: GEOL 1001 or GEOL 1002; GEOL 1601.
Credit will not be given for this course and GEOL 2081 or GEOL 3032 or GEOL 3041. May not be taken by geology majors for credit. Introduction to the classification, occurrence and origin of rocks and rock forming minerals.

GEOL 3666 Field Geology (6)

Su Prereq.: *GEOL 2061, GEOL 3032, GEOL 3041, and GEOL 3071 or equivalent. Students planning to take this course should apply to the camp director no later than March 15. Camp fee.* Six weeks of field-based projects in the Rocky Mountains of Colorado, New Mexico and Wyoming; fundamentals of the study of rocks and geologic features in their natural settings.

GEOL 3909 Geological Research (1-3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Primarily for geology majors. Directed reading, conference and field/laboratory investigations of geological problems.

GEOL 3999 Undergraduate Thesis in Geology (3)

Prereq.: *GEOL 3909; consent of department. Pass-fail grading. Defense committee of three faculty members must be approved by the department.* Individual research on problems in the geological sciences. Includes writing, public presentation and defense of a research thesis.

GEOL 4002 Special Topics in Geology and Geophysics (3)

Prereq.: *senior standing in geology or consent of instructor. May be taken for a max. of 9 sem. hrs. of credit when topics vary.* Advanced and/or emerging topics in the geosciences.

GEOL 4012 Introduction to Micropaleontology (3)

Prereq.: *GEOL 2061 or equivalent. 2 hrs. lecture; 3 hrs. lab.* Morphology, classification, stratigraphy, paleoecology and evolutionary patterns of common marine microfossils.

GEOL 4019 Geoarchaeology (4)

Also offered as ANTH 4019. Prereq.: *GEOL 1001 or ANTH 2015 or GEOG 2051 or permission of instructor. 3 hrs. lecture plus equivalent of 3 hrs of lab per week devoted to an applied fieldwork problem.* Geological, stratigraphical, geochemical and geophysical techniques employed in the study of archaeological sites and materials.

GEOL 4023 Coastal and Shallow-Marine Depositional Systems (3)

Also offered as GEOG 4023. Dynamics of sediment transport in coastal zones and on continental shelves; sea-level changes; morphological, sedimentary and stratigraphic attributes of coastal and shallow-marine lithosomes.

GEOL 4035 Advanced Sedimentology (3)

Prereq.: GEOL 3032. Field trip required. Physical sedimentary processes in nonmarine and marine depositional systems, including fluvial, alluvial fan, lacustrine, eolian and carbonate and clastic marine environments; influence of tectonics, climate and sea level on sedimentary architecture and sequences.

GEOL 4043 Earth Materials and the Environment (3)

Prereq.: CHEM 1202, GEOL 1001, GEOL 2081 or permission of instructor. Earth materials as problems and solutions in environmental issues; physiochemical behavior of asbestiform silicates, silica, zeolites and associated health hazards; potential geological repositories for hazardous waste.

GEOL 4044 Petroleum Geology (3)

Prereq.: GEOL 3032 or GEOL 3200 or permission of instructor. Modern concepts of the origin, migration, entrapment and production of hydrocarbons from sedimentary basins.

GEOL 4045 Stratigraphy (3)

Prereq.: GEOL 3032 or permission of instructor. The succession and age relationships of rock strata including their form, lithologic components, fossil content, geophysical and geochemical properties and their interpretation in terms of environment, mode of origin and geologic history.

GEOL 4062 Exploration and Environmental Geophysics (3)

Prereq.: GEOL 3071 and MATH 1552 or permission of instructor. 2 hrs. lecture; 3 hrs. lab. Principles and methods of acquisition, processing and interpretation of geophysical data used to investigate the shallow subsurface; seismic refraction, seismic reflection, gravity, magnetics, electrical resistivity, well logs and ground penetrating radar.

GEOL 4066 Plate Tectonics (3)

Prereq.: GEOL 3071. Contemporary concepts of plate tectonics; geophysical observations and geological implications.

GEOL 4068 Reflection Seismology (3)

Prereq.: MATH 1550 and PHYS 1202 or PHYS 2113 or PHYS 2002 or consent of instructor. 2 hrs. lecture; 3 hrs. lab. Seismic reflection techniques used to investigate shallow earth structure; waves in layered media, correlation, convolution, deconvolution and spectral analysis; interpretation of seismic record sections.

GEOL 4081 Chemical Oceanography (3)

Also offered as OCS 4126. Prereq.: consent of instructor. 3 hrs. lecture/seminar. Controls on the mass balance and distribution of major elements, trace elements, heavy metals, dissolved gases and nutrients in estuarine and open-ocean systems.

GEOL 4084 Geomicrobiology (3)

Also offered as BIOL 4084. Prereq.: GEOL 3032 or BIOL 2051 or consent of instructor. Microbial effects and controls on geologic, geochemical and ecological processes; biochemical tracers and fossils of microbially mediated processes through time; introduction to biogeochemical processes.

GEOL 4085 Geochemistry of Sediments and Natural Waters (3)

Prereq.: GEOL 2081 and MATH 1550. Controls on the composition of natural waters and the role of fluid-rock interactions in the geochemical evolution of sedimentary rocks, the ocean and the atmosphere; major geochemical cycles.

GEOL 4111 Vertebrate Paleontology (3)

Prereq.: consent of instructor. 2 hrs. lecture; 2 hrs. lab. Phylogenetic survey of fossil vertebrates; their origins and transitions; vertebrate taphonomy, biostratigraphy and fossil collection and preparation.

GEOL 4131 Basin Analysis (3)

Prereq.: GEOL 3032 or GEOL 3200 or permission of instructor.

Basic environment of sediment deposition; sedimentological models and their relationships within depositional basins; analysis of theoretical basin models and comparison with modern and ancient sedimentary basins.

GEOL 4164 Deltaic Geology (3)

Also offered as GEOG 4164. Prereq.: consent of instructor. 2 hrs. lecture; 2 hrs. lab. Processes of deltaic sedimentation and the nature of deltaic sediments; Mississippi River delta compared to other modern and ancient deltas.

GEOL 4165 Subsurface Geology (3)

Prereq.: GEOL 3032 or GEOL 3071 or GEOL 3200 or PETE 3036.

2 hrs. lecture; 3 hrs. lab. Principles and methods of exploration, analysis and interpretation using borehole data, electric logs and samples of rocks and fluids; construction of geological maps and sections showing sediment facies, geological structure, geotemperature, fluid pressure and water salinity; analysis of fluid migration, oil and gas accumulation and geothermal resources.

GEOL 4182 Physical Hydrogeology (3)

Prereq.: GEOL 3032 and MATH 1552 or permission of instructor. Subsurface fluid flow in geological materials; emphasis on geological controls of the origin and migration of pore water, including saline brines, in sedimentary basins; topics including crustal scale flow, petroleum migration, ore formation and subsurface flow regimes in Louisiana

GEOL 6001 Topics in Earth Sciences for Teachers (3)

Su *May be taken for a max. of 9 sem. hrs. when topics vary. Consent of instructor is required for the second and third times.* Various aspects of the earth sciences for elementary, middle and high school teachers of science.

GEOL 7044 Advanced Metamorphic Petrology (3)

Prereq.: GEOL 3041 or equivalent. 2 hrs. lecture; 3 hrs. lab. Facies concept, theoretical and field relations, textures and their significance.

GEOL 7061 Sequence Stratigraphy (3)

Prereq.: introductory course in sedimentology, GEOL 3032 or equivalent. One week field trip to the southern Rocky Mountains is required. Principles of physical stratigraphy with emphasis on contemporary concepts about the interaction of tectonics, sea level and sediment supply in generating a predictable architecture of sedimentary basin fills.

GEOL 7062 Seismic Stratigraphy (3)

Prereq.: GEOL 3071 or equivalent. Interpretation of seismic reflection data in terms of sedimentary facies, stratigraphic sequences and implications for local and eustatic sea-level fluctuations.

GEOL 7081 Isotope Geochemistry (3)

Prereq.: consent of instructor. Stable isotope fractionation in natural systems; emphasis on oxygen, hydrogen, and carbon isotope-ratio variation in natural waters, carbonates and silicates with application to the solution of petrologic problems.

GEOL 7111 Advanced Micropaleontology (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit. Advanced training in micropaleontology.

GEOL 7115 Paleoecology (3)

Prereq.: GEOL 2061 and GEOL 3032. 2 hrs. lecture; 2 hrs. lab field trip. Diversity, structure, taphonomy and evolution of fossil and modern marine assemblages; adaptations and functional morphology; organism-sediment relationships.

GEOL 7132 Dynamics of Sedimentation (3)

2 hrs. lecture; 3 hrs. lab. Fluid mechanics as applied to sedimentation, fluid-particle interactions, erosion, mechanics of sediment transport including fluid and sediment flows, deposition and the origin of primary structures, and hydrodynamic instability and soft-sediment deformation.

GEOL 7133 Sedimentary Petrography of Carbonates (3)

2 hrs. lecture; 3 hrs. lab. Principles governing formation, deposition and diagenesis of carbonate sediments and sedimentary rocks; lab stresses textural, fabric and mineral relationship and interpretation of depositional environments and mineral paragenesis of ancient carbonate sequences.

GEOL 7134 Clay Mineralogy (3)

2 hrs. lecture; 3 hrs. lab/discussion. Mineralogy; geochemistry and geology of clay minerals; argillaceous sediments and rocks.

GEOL 7183 Physical Geochemistry of Burial Diagenesis (3)

Prereq.: GEOL 4085 or equivalent. Quantitative techniques in thermodynamics, kinetics and mass transport applied to problems of burial diagenesis of sedimentary minerals and fluids.

GEOL 7195 Reservoir Characterization (3)

Also offered as PETE 7195. Prereq.: GEOL 4182 or PETE 4051 or consent of instructor. 2 hrs. lecture; 2 hrs. lab. Origin, description, exploration and development of oil and gas reservoirs; topics include accommodation space, reservoir occurrence, origin of petroleum, oil and gas properties, rock properties, drilling, exploration and appraisal, reservoir flow modeling and production engineering; emphasis on integration of geology, geophysics and petroleum engineering.

GEOL 7200 Scientific Communication and Visualization (3)

Methods for written, oral and visual communication with an emphasis on scientific approaches, analysis and presentation of scientific quantitative information.

GEOL 7900 Special Topics in Geology and Geophysics (3)

May be taken for a max. of 12 sem. hrs. of credit when topics vary. Advanced and/or emerging topics in geology and geophysics.

GEOL 7909 Directed Research in Geology and Geophysics (1-6)

May be taken for a max. of 10 sem. hrs. of credit when topics vary. General student-selected research topics and focused group research, including all topics in geology and geophysics.

GEOL 7911 Seminar in Geology: Paleontology (2)

May be repeated for credit.

GEOL 7931 Seminar in Geology: Sedimentology (2)

May be repeated for credit. Fall semester: carbonate sedimentology; spring semester: clastic sedimentology and sedimentary environments.

GEOL 7941 Seminar in Geology: Igneous and Metamorphic Petrology (2)

May be repeated for credit.

GEOL 7943 Paleoclimatology (3)

See GEOG 7943.

GEOL 7961 Seminar in Geology: Structural Geology (2)

May be repeated for credit.

GEOL 7966 Field Work (1-9)

GEOL 7971 Seminar in Tectonics (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Plate tectonics, diapirism, isostasy and the tectonics of specific areas.

GEOL 7972 Seminar in Geophysics (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Structure and composition of the mantle; physical processes at ridges, trenches and transform faults; dynamics of plate interiors; intraplate stress; and thermal histories of the earth and other terrestrial planets; physics of rock magnetism; and hydrodynamics of sedimentary basins.

GEOL 7981 Seminar in Geochemistry (2)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit. Mineralogy, paragenesis, geochemistry and natural occurrence of authigenic silica in sediments; other topics such as hydro geochemistry, isotope geochemistry and the geochemistry of carbonates.

GEOL 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

GEOL 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Greek

GREK 1001 Elementary Greek (4)

This is a General Education course. Introduction to the core vocabulary and grammar for reading and writing Ancient Greek; basic readings in Classical and Biblical Greek.

GREK 2051 Intermediate Greek (4)

This is a General Education course. *Prereq.: GREK 1001 or equivalent.* Completion of core vocabulary and grammar for reading and writing Ancient Greek; basic readings in Classical and Biblical Greek.

GREK 2103 Intermediate Greek Prose (3)

This is a General Education course. *Prereq.: GREK 2051 or equivalent.* Application of grammar, vocabulary and concepts from the first year of Greek. Readings in basic ancient Greek prose.

GREK 2153 Homer (3)

This is a General Education course. *Prereq.: GREK 2103 or equivalent.* Readings from the Iliad or Odyssey; selected passages from various books; some attention to aesthetic and historical problems.

GREK 2155 Greek Drama (3)

This is a General Education course. *Prereq.: GREK 2103.* Readings in Greek drama including a representative play of Sophocles or Euripides.

GREK 2156 New Testament (3)

This is a General Education course. *Prereq.: GREK 2103 or equivalent.* Selected readings from the New Testament.

GREK 2165 Plato's Dialogues (3)

This is a General Education course. *Prereq.: GREK 2103 or equivalent.* Readings from Plato's dialogues.

GREK 2166 Attic Oratory (3)

This is a General Education course. *Prereq.: GREK 2103 or equivalent.* Readings from Attic orators such as Demosthenes, Andocides, Antiphon, Lysias.

GREK 4023 Special Topics in Greek Poetry (3)

May be taken for a max. of 6 hrs. of credit. Readings and studies in one or more of the following: Homer, Hesiod, Pindar, Greek lyric poetry, Aeschylus, Sophocles, Euripides, Aristophanes.

GREK 4024 Special Topics in Greek Prose (3)

May be taken for a max. of 6 hrs. of credit. Readings and studies in one or more of the following: Herodotus, Thucydides, the Pre-Socratics, the orators, Plato, Aristotle.

GREK 4915 Independent Work (1-3)

May be taken for a max. of 6 sem. hrs. of credit. Permission of department required. Readings in Greek literature directed by a senior faculty member.

German

GERM 1101 Elementary German (4)

[LCCN: CGRM 1014, Elementary German I] This is a General Education course. *Native speakers of German will not receive credit for this course.* Basic lexicon and structures of German; emphasis on communicative language use; supplementary work in language and computer laboratories.

GERM 1102 Elementary German (4)

[LCCN: CGRM 1024, Elementary German II] This is a General Education course. *Prereq.: GERM 1101 or equivalent. Continuation of GERM 1101. Native speakers of German will not receive credit for this course.* Basic lexicon and structures of German; emphasis on communicative language use. Supplementary work in language and computer laboratories.

GERM 2001 German for Travelers (3)

German for travelers is not applicable towards a major or minor in German and does not fulfill foreign language requirements for undergraduates. The course introduces basic communication patterns, focuses on practical everyday vocabulary through exercises role-playing and situational activities.

GERM 2075 German Civilization (3)

This is a General Education course. *Also offered as HIST 2075. Knowledge of German not required.* Development of the modern German states from early Germanic times; art, literature, music and philosophy in an historical context.

GERM 2101 Intermediate German (3)

[LCCN: CGRM 2013, Intermediate German I] This is a General Education course. *Prereq.: GERM 1102 or equivalent. Native speakers of German will not receive credit for this course.* Reading, conversation, composition; review of lexicon and structure; supplementary work in language and computer laboratories.

GERM 2102 Intermediate German (3)

[LCCN: CGRM 2023, Intermediate German II] This is a General Education course. Prereq.: GERM 2101 or equivalent. Continuation of GERM 2101. Native speakers of German will not receive credit for this course. Reading, conversation, composition; emphasis on lexicon of spoken German; supplementary work in language and computer laboratories.

GERM 2155 Readings in German Literature (3)

This is a General Education course. Prereq.: GERM 2102 or equivalent. Native speakers of German will not receive credit for this course. Analysis of literary texts; expansion of lexicon, comprehension and composition skills.

GERM 3060 German for Business (3)

Prereq.: GERM 2102 or equivalent. Introduction to German in a business environment: focus on linguistic structures and vocabulary, forms of business communication, reading of business text and social customs.

GERM 3061 German Discourse (3)

Prereq.: GERM 2102. Intensive practice in listening comprehension, oral and written communication; special problems in German structure; thematic treatment of contemporary issues in German speaking countries.

GERM 3081 Survey of German Literature and Culture: Beginning to 1700 (3)

Prereq.: GERM 2155 or equivalent. Readings from, and an historical overview of, the Middle Ages, the Renaissance, the Reformation and the Baroque periods.

GERM 3082 Survey of German Literature and Culture: 1700-1830 (3)

Prereq.: GERM 2155 or equivalent. Readings from, and an overview of, the Enlightenment, Storm and Stress, Weimer Classicism and Romanticism.

GERM 3083 Survey of German Literature and Culture: 1830-1890 (3)

Prereq.: GERM 2155 or equivalent. Readings from, and a historical overview of, Biedermeier/Vormarz, Realism and Naturalism.

GERM 3084 Survey of German Literature and Culture: 1890-to the Present (3)

Prereq.: GERM 2155 or equivalent. Readings from, and a historical overview of, Expressionism, New Objectivity, the Group 47, GDR literature and Post-Modernism.

GERM 3090 Friedrich Nietzsche (3)

Also offered as PHIL 3090. Knowledge of German not required. Major works of Nietzsche studied in the context of the three periods of productivity and evolution of his thought.

GERM 3091 Special Topics in German Literature in Translation (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Knowledge of German not required.

GERM 4005 German for Reading Knowledge (5)

Undergraduates may enroll on a Pass-fail basis only. Specialized course intended to satisfy departmental foreign language reading requirement for graduate students. This course will not count toward a graduate degree. Does not count toward satisfying foreign language requirements for undergraduates, although hours may count toward baccalaureate. Credit will not be given for both this course and introductory German courses.

GERM 4030 German Drama (3)

Dramatic literature in German.

GERM 4031 German Poetry (3)

Study of German poetic expression.

GERM 4043 Special Topics in 19th Century German Literature and Culture (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

GERM 4044 Special Topics in 20th Century German Literature and Culture (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

GERM 4045 Special Topics in Contemporary German Literature and Culture (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

GERM 4046 German Film (3)

Knowledge of German not required. German film in its socio-historic contexts with some attention to cinematic technique.

GERM 4062 Advanced German Discourse (3)

Prereq.: GERM 3061 or equivalent. Continued intensive practice in complex grammar and structures. Analysis and synthesis of authentic German material with focus on reading and writing.

GERM 4915 Independent Work (1-3)

May be taken for a max. of 3 sem. hrs. credit. Permission of department required.

Hebrew

HEBR 1001 Beginning Hebrew (4)

This is a General Education course. Also offered as REL 1001. This course counts toward the fulfillment of a foreign language requirement only when taken under the HEBR rubric. The alphabet, basic grammar and vocabulary of classical Hebrew; simple prose passages from the Bible.

HEBR 1002 Beginning Hebrew (4)

This is a General Education course. Also offered as REL 1002. Prereq.: HEBR 1001/REL 1001 or equivalent. This course will count toward the fulfillment of a foreign language requirement only when taken under the HEBR rubric. Basic grammar and vocabulary of classical Hebrew; simple prose readings from the Bible.

HEBR 2003 Intermediate Hebrew (4)

This is a General Education course. Also offered as REL 2003. Prereq.: HEBR 1002/REL 1002 or equivalent. This course counts toward the fulfillment of a foreign language requirement only when taken under the HEBR rubric. Biblical narratives; details of syntax; development of vocabulary.

HEBR 2004 Intermediate Hebrew (4)

This is a General Education course. Also offered as REL 2004. Prereq.: HEBR 2003/REL 2003 or equivalent. This course counts toward the fulfillment of a foreign language requirement only when taken under the HEBR rubric. Biblical narratives and poetry; details of syntax; development of vocabulary; textual criticism.

History

HIST 1001 Western Civilization to 1500 (3)

[LCCN: CHIS 1013, Western Civilization I] **This is a General Education course.** An honors course, HIST 1002, is also available. Credit will not be given for this course and HIST 1002. Ideas, trends and institutions in western civilization from earliest times to the Reformation.

HIST 1002 HONORS: Western Civilization to 1500 (3)

This is a General Education course. Same as HIST 1001, with special honors emphasis for qualified students. Credit will not be given for this course and HIST 1001. Supervised reading, discussion, research and writing.

HIST 1003 Western Civilization Since 1500 (3)

[LCCN: CHIS 1023, Western Civilization II] This is a General Education course. *An honors course, HIST 1004, is also available. Credit will not be given for this course and HIST 1004, Development of western civilization from the Reformation to the present.*

HIST 1004 HONORS: Western Civilization Since 1500 (3)

This is a General Education course. *Same as HIST 1003, with special honors emphasis for qualified students. Credit will not be given for this course and HIST 1003. Supervised reading, discussion, research and writing.*

HIST 1005 World History to 1500 (3)

[LCCN: CHIS 1113, World Civilization I] This is a General Education course. Developments and interactions among Asian, African, European, American and Oceanian cultures in the pre-modern age.

HIST 1007 World History Since 1500 (3)

[LCCN: CHIS 1123, World Civilization II] This is a General Education course. Interactions among Asian, Middle Eastern, African, European and American cultures in the modern era.

HIST 2012 Britain from 1689 to the Present (3)

This is a General Education course.

HIST 2020 Medieval Europe (3)

This is a General Education course. Social, cultural, religious and political history of medieval Europe from the reign of Constantine in the fourth century to the fall of Constantinople in 1453.

HIST 2022 Modern Europe (3)

This is a General Education course. Political, economic and social developments and diplomacy from 1848 to the present.

HIST 2023 The World Since 1960 (3)

Major events since 1960 in the U.S., U.S.S.R., and selected nations of Europe, the Middle East, Latin America, Africa and Asia; emphasis on social, economic, political and national security issues.

HIST 2055 The United States to 1865 (3)

[LCCN: CHIS 2013, American History I] This is a General Education course.

HIST 2057 The United States from 1865 to the Present (3)

[LCCN: CHIS 2023, American History II] This is a General Education course.

HIST 2061 African American History (3)

This is a General Education course. Social, cultural and economic role of African Americans in the U.S. from 1619 to the present.

HIST 2075 German Civilization (3)

This is a General Education course. See GERM 2075.

HIST 2085 Colonial Latin America (3)

This is a General Education course. Colonial period emphasizing the European background, explorations, political and economic systems and wars of independence.

HIST 2096 East Asian Civilization Since 1800 (3)

This is a General Education course. Modern Asian civilization; emphasis on contact with the West and the rise of nationalism and communism.

HIST 2195 Topics in History (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

HIST 3001 History and the Social Sciences I (1)

Prereq.: EDCI 2001. Concurrent enrollment in EDCI 3001. Supervised tutorial experience in local middle or high schools. Introduction to the role of the social sciences in the study of history.

HIST 3002 History and the Social Sciences II (1)

Prereq.: EDCI 3001 and HIST 3001. Concurrent enrollment in EDCI 3136. 3 hrs. lab/field experiences in multicultural settings. The role of the social sciences in the study of history; course will assist student in the teaching of social studies to small groups in middle and high schools.

HIST 3071 Louisiana (3)

[LCCN: CHIS 2033, Louisiana History] Political, economic, social and cultural development.

HIST 3117 Undergraduate Proseminar in World History (3)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Open to students with at least 6 sem. hrs. of credit in history and with an overall 3.00 GPA. Supervised reading and research in an assigned field of historical study.

HIST 3118 Undergraduate Proseminar in European History (3)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Open to students with at least 6 sem. hrs. of credit in history and with an overall 3.00 GPA. Supervised reading and research in an assigned field of historical study.

HIST 3119 Undergraduate Proseminar in United States History (3)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Open to students with at least 6 sem. hrs. of credit in history and with an overall 3.00 GPA. Supervised reading and research in an assigned field of historical study.

HIST 4001 Greece of the City State (3)

Political, social and cultural evolution of the Greek world from the Bronze Age to the foundation of the Macedonian Empire of Alexander the Great; attention to growth of democratic institutions.

HIST 4003 The Roman Republic (3)

The Roman state, culture and society from the origin of the city to the dictatorship of Julius Caesar.

HIST 4004 Rome of the Caesars (3)

The growth of absolute government, spread of Christianity and other political, cultural, and social movements from the establishment of the Principate to the fall of the Western Empire.

HIST 4007 The Early Middle Ages, 300-1000 (3)

History of Europe from Constantine the Great to the end of the Carolingians; development of medieval society and institutions.

HIST 4008 The Later Middle Ages, 1000-1500 (3)

History of Europe from the Investiture Controversy to the voyages of Columbus; developments in social, cultural and political institutions.

HIST 4009 The Renaissance (3)

Italian society and thought from Dante to Machiavelli, with emphasis on the medieval foundations of Renaissance culture; northern Europe from the Hundred Years War to the Reformation, with emphasis on political and economic development.

HIST 4011 The Age of the Reformation (3)

Also offered as REL 4011. Sixteenth century Europe with emphasis on Protestant and Catholic reform movements.

HIST 4012 History of Modern Christian Thought (3)

See REL 4012.

HIST 4013 Women in Early Modern Europe (3)

Major problems in the history of women in Europe during the period 1400-1700 with particular emphasis on the Renaissance and Reformation.

HIST 4016 19th Century Europe (3)

The period 1815-1870.

HIST 4017 20th Century Europe (3)

Survey of 20th century European history; emphasis on the role of total war in social, political and cultural change and the impact of modern nationalist ideologies.

HIST 4022 France since 1770 (3)

Cultural, political, economic, social and intellectual survey of France from the pre-revolution to the present.

HIST 4023 Spain since 1469 (3)

Political, economic and social development from the marriage of Ferdinand and Isabella to the present.

HIST 4024 The Dutch Republic and Empire: 1500-1800 (3)

Political, economic, social and cultural history of one of the great powers of early modern Europe; emphasis on the Golden Age of Rembrandt and Vermeer.

HIST 4026 20th Century Germany (3)

The states that have existed in Germany since 1890; the Wilhelminian Empire; the Weimar Republic; the Third Reich; and the Germany of today.

HIST 4028 The First World War (3)

The First World War, 1914-1918, including controversies regarding its origin and aftermath.

HIST 4030 Eastern Europe: 1914-Present (3)

Emphasis on the independent nation-states after World War I, impact of totalitarianism and the current liberalization.

HIST 4031 The Balkans: 1453-1878 (3)

Origins of the Balkan peoples, development of the Ottoman Empire and rise of the autonomous Balkan nation-states.

HIST 4032 The Balkans: 1879-Present (3)

Events leading up to and including World War I, problems of the inter-war period, World War II and rise and decline of Communism in Southeastern Europe.

HIST 4034 Russia Since 1861 (3)

Reaction and reform from 1861 to 1905; failure of parliamentary democracy amid war and revolution; Leninism and Stalinism; relaxation of totalitarian rule since Stalin's death.

HIST 4043 Tudor England (3)

Political, economic and cultural history of 16th century England.

HIST 4044 Stuart England (3)

Period of transition from kings who would be absolutist, through the crisis of civil wars, to the beginnings of parliamentary dominance.

HIST 4046 19th Century Britain (3)

Emphasis on the acquisition of Empire, emergence of industrial society, and the rise of Victorianism between 1780 and 1900.

HIST 4047 20th Century Britain (3)

Intellectual, political, social, and economic developments since 1900, including the experience of total war, construction of the welfare state, imperial decline and the significance of Thatcherism.

HIST 4048 Modern Irish History: 1600-Present (3)

Development of communities and conflicts in Ireland from the Tudors to the European community; emphasis on cultural, political and military affairs.

HIST 4049 The British Empire and Commonwealth (3)

British Empire and development of the British Commonwealth of Nations.

HIST 4050 British Colonialism in South Asia (3)

Political, economic and cultural history of the British Empire in South Asia from the founding of the East India Company in 1600 to the end of the British imperial role in 1947.

HIST 4051 Colonial America: 1607-1763 (3)

Political, economic, cultural and military developments in the 13 colonies.

HIST 4052 The American Revolution, 1763-1789 (3)

Political, intellectual, economic and military developments in the formation of a permanent American union.

HIST 4053 The Age of Jefferson and Hamilton: 1789-1820 (3)

Implementation of the Constitution, adoption of the Bill of Rights, formation of a political party system and economic and social change.

HIST 4054 The Age of Jackson: 1820-1860 (3)

Examination of democratization, economic transformation, party development, the reform movement, slavery and the sectional crisis.

HIST 4055 Civil War (3)

Secession; social and economic conditions, principal military campaigns.

HIST 4059 The American Teens and Twenties (3)

From the inaugural of Woodrow Wilson to the Crash of 1929; Wilson and reform at home and revolution abroad; the Great War and its impact; the Jazz Age, its tension and its collapse.

HIST 4060 The Age of Roosevelt (3)

From the inaugural of FDR to the surrender of Japan: the Great Depression and the New Deal; the thirties' search for an American culture; the road to Pearl Harbor; America in World War II, at home and abroad.

HIST 4064 Diplomatic History of the United States, 1914 to the Present (3)

Interpretations of American foreign policy in the 20th century; emphasis on public opinion and relationship of business investment to foreign policy.

HIST 4065 History of Contemporary America (3)

History of America since 1945, focusing on domestic affairs.

HIST 4066 Military History of the United States (3)

Military policy and campaigns, war economy and organization of the armed forces.

HIST 4071 The Antebellum South (3)

Economic, social, intellectual and political development of the South to 1860.

HIST 4072 The New South (3)

Political, economic, social and intellectual history of the South since 1877.

HIST 4073 Louisiana to 1815 (3)

Political, economic and social-development of early Louisiana.

HIST 4075 American Economic History to 1860 (3)

Also offered as ECON 4075. American economic growth and development from the colonial period to 1860, including the railroad, slavery, technology and nature of the industrial revolution; findings and method of the "new" or quantitative economic history.

HIST 4076 American Economic History: 1860 to the Present (3)

Also offered as ECON 4076. American economic growth and development from 1860 to the present; economic impact of the Civil War, technological change, mechanization of agriculture, railroads, automobiles, war, the Great Depression and multinational corporations; findings and method of the "new" or quantitative economic history.

HIST 4077 American Popular Culture (3)

Examination of popular culture forms from 19th-century vaudeville to today's music videos; emphasis on development of mass media.

HIST 4078 Asian-American History (3)

History of Asian peoples in the United States; topics including immigration, community development, cultural conflict, racism and stereotypes.

HIST 4079 Women in American History (3)

Survey of political, social, economic and cultural development of American women from colonial times to present; topics include nineteenth century women's rights movement, woman suffrage, women in civil rights movement, birth control, the modern feminist movement and southern women.

HIST 4081 The Caribbean: 1492-1830 (3)

Nature of and changes in economic and political institutions after European colonization, international conflicts, and abolition of slavery, primarily in the Greater and Lesser Antilles.

HIST 4083 Mexico: The National Period (3)

Political, economic and social development since Independence.

HIST 4084 West Africa to 1800 (3)

The geography, ethnicity, social, economic and political development of West Africa from the prehistoric period to 1800.

HIST 4085 West Africa from 1800 (3)

The rise of Islamic orthodoxy, the role of imperialism, the rise of African nationalism and other themes in the history of West Africa since 1800.

HIST 4088 Atlantic History: ca. 1300-1888 (3)

Introduction to the historical relations between Europe, Africa and the Americas, 1300 to 1888, with particular attention to the roles of African peoples in the formation of the "Atlantic World."

HIST 4091 China to 1600 (3)

History and civilization, including a survey of religion and philosophy, language and literature, art and archaeology and popular culture.

HIST 4092 China since 1600 (3)

Western impact on civilization and the processes of revolution and modernization during the past century.

HIST 4093 Pre-Modern Japan (3)

Political and cultural history and civilization from the beginnings to the close of the Japanese middle ages.

HIST 4094 Modern Japan (3)

From 1600 to the present; emphasis on historical and cultural roots of Japan's modernization in the late 19th century and quest for empire in the 20th century; cultural and intellectual developments in modern Japan.

HIST 4096 The Modern Middle East (3)

Also offered as REL 4096 and INTL 4096. Major problems of the Middle East and North Africa in the modern period; internal Arab social, economic and intellectual developments; Muslim responses to European colonialism; modern Arab nationalism and political trends; Islamic reformist and revivalist movements; problem of Palestine.

HIST 4097 History of South Asia (3)

Social, political, economic and cultural evolution of South Asia from the Bronze Age to the creation of India and Pakistan in 1947.

HIST 4109 HONORS: Proseminar (3)

Open to qualified honors students having 12 hrs. credit in history and consent of instructor. Candidates for the honors degree in history will select an honors thesis before the end of the semester. Supervised reading in an assigned field of historical study; discussion of historical methods and research.

HIST 4112 Modern European Intellectual History: the Enlightenment to 1850 (3)

Modern thought in cultural, social, political contexts from Voltaire to Marx.

HIST 4113 Modern European Intellectual History Since 1850 (3)

European thought affecting society in the industrial age; realism, psychoanalysis, existentialism, the information explosion.

HIST 4125 History of Ancient Israel (3)

See REL 4125.

HIST 4130 World War II (3)

Global crisis of the 1930s; Axis and Allied strategies; major military campaigns; great power diplomacy; life on the home-fronts; the Holocaust; espionage and resistance; the experience of combat; social, political and scientific consequences.

HIST 4140 The Vietnam War (3)

French colonial rule and Vietnamese nationalism; Ho Chi Minh and the war against the French (1946-54); the National Liberation Front (Vietcong); process of American involvement and disengagement; counter-insurgency and the air war; anti-war movement in the United States; reasons for failure of American policy; Vietnam since 1975; lessons and legacies for the U.S.

HIST 4151 Historical Archaeology (3)

See ANTH 4018.

HIST 4161 Religion in the United States (3)

Also offered as REL 4161. From the colonial period to the present; relation between changing religious beliefs and behavior of Americans and political, social, economic and intellectual developments; Puritanism, revivalism, response to Darwinian evolution, social gospel and civil religion.

HIST 4191 Religions of China and Japan (3)

Also offered as REL 4191. Major religious traditions of East Asia; Confucianism, Taoism, Mahayana Buddhism, Shinto and Chinese and Japanese folk religion; religion in the context of Chinese and Japanese cultural history.

HIST 4195 Special Studies in World History (3)

Prereq.: consent of department. May be repeated for credit when topics vary.

HIST 4196 Special Studies in European History (3)

Prereq.: consent of department. May be repeated for credit when topics vary.

HIST 4197 Special Studies in United States History (3)

Prereq.: consent of department. May be repeated for credit when topics vary.

HIST 4403 History and the Social Sciences III (1)

Prereq.: HIST 3002 and EDCI 3136; concurrent enrollment in EDCI 4003. The role of social sciences in the study of history; course will assist students in the teaching of social studies to full classes of middle and high schools.

HIST 4404 Seminar in History and the Social Sciences (3)

Prereq.: EDCI 4003 and HIST 4403; concurrent enrollment in EDCI 4004 and EDCI 4005. How history and the social sciences view issues of importance in the contemporary world; course will assist students who are enrolled in student teaching.

HIST 4901 Independent Study (3)

Prereq.: open to advanced students of high academic standing by consent of department. Reading and research on selected topics.

HIST 4902 Independent Study (3)

Prereq.: open to advanced students of high academic standing by consent of department. Reading and research on selected topics.

HIST 7902 Independent Study in History (3)

May be taken for a max. of 9 sem. hrs. of credit.

HIST 7904 American Historiography and Criticism (3)

American historical writing from the colonial period to the present.

HIST 7908 Introduction to Historical Research (3)

General methods of and approaches to historical research and writing in European and American history, including theories, current approaches, problems and debates.

HIST 7909 Research Seminar in European History (3)

Sources, bibliography; reports on original research.

HIST 7917 Reading Seminar in Early Modern Europe (3)

HIST 7922 Reading Seminar in European History to 1650 (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

HIST 7923 Reading Seminar in European History from 1500 (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

HIST 7930 Reading Seminar in British History (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

HIST 7951 Reading Seminar in American History, 1607 to 1815 (3)

HIST 7952 Reading Seminar in American History, 1815-1890 (3)

Prereq.: HIST 7951.

HIST 7956 Reading Seminar in American History from 1890 to the Present (3)

HIST 7957 Research Seminar in American History (3)

Introduction to research methods, sources and bibliography; reports on original research.

HIST 7958 Research Seminar: Special Topics in American History (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Reports on original research.

HIST 7959 Reading Seminar: Special Topics in American History (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

HIST 7970 Reading Seminar in Comparative History (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Sources and bibliography; reports on original research.

HIST 7975 Seminar: Special Studies in History (3)

May be taken for a max. of 9 hrs. of credit when topics vary. A reading and research seminar. Topic and emphasis will vary.

HIST 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

HIST 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Honors

HNRS 1000 Honors Foundations (1)

Introduction to Honors at LSU. Orientation to four-year Honors program and Honors College community includes: service, research, leadership and cultural events; strategies for academic and personal success.

HNRS 1007 Introduction to Life Sciences (4)

This is a General Education course. Not open to students who have had BIOL 1001, BIOL 1002, BIOL 1201, BIOL 1202, BIOL

1207, BIOL 1208, BIOL 1209 or BIOL 1503. 3 hrs. lecture; 3 hrs. lab. A basic course, organized in accordance with the principle of organic evolution, emphasizing the chemical basis of life and cell biology.

HNRS 1008 Introduction to the Life Sciences (4)

This is a General Education course. *Not open to students who have had BIOL 1001, BIOL 1002, BIOL 1201, BIOL 1202, BIOL 1207, BIOL 1208, BIOL 1209 or BIOL 1503. Continuation of HNRS 1007. 3 hrs. lecture; 3 hrs. lab.* A basic course, organized in accordance with the principle of organic evolution, emphasizing phylogeny, morphology, function of multicellular organisms and people's relation to their environment.

HNRS 1035 Life Science Seminar (3)

This is a General Education course. *May be taken for a max. of 6 hrs. credit when topics vary. For non-science majors only.* Special topics in the Life Sciences.

HNRS 1036 Physical Science Seminar (3)

This is a General Education course. *May be taken for a max. of 6 hrs. credit when topics vary. For non-science majors only.* Special topics in the Physical Sciences.

HNRS 2000 Critical Analysis (3)

This is a General Education course. *Course for first-year Honors College students.* Introduction to various practices of academic discourse and research methods. Interdisciplinary approach to a specific topic.

HNRS 2012 The 19th Century (3)

This is a General Education course. Perspectives fundamental to 19th century culture; relevant works of literature, philosophy, art, science.

HNRS 2013 The 20th Century (3)

This is a General Education course. *May be taken for a max. of 6 hrs. of credit.* Selected themes in 20th century civilization.

HNRS 2020 Contemporary Studies (3)

This is a General Education course. *May be taken for a max. of 6 hrs. of credit.* Selected themes in contemporary civilization.

HNRS 2021 Colloquium in the Arts (3)

This is a General Education course. *May be taken for a max. of 6 hrs. of credit.* Art forms and their cultural significance; particular themes involving examination of art works.

HNRS 2030 Humanities Colloquium (3)

This is a General Education Course. *May be taken for a max. of 6 hrs. of credit when topics vary.* Selected themes and materials in literature, philosophy, history and art.

HNRS 2033 Social Science Colloquium (3)

This is a General Education Course. *May be taken for a max. of 6 hrs. of credit when topics vary.* Topics of significance from the standpoint of various social sciences.

HNRS 2041 Classical Traditions: The Mediterranean World (4)

This is a General Education course. *2 hrs. lecture, 2 hrs. seminar.* The civilizations of archaic and classical Greece, Rome, late antiquity and the Middle Ages. Includes literature, history, philosophy, religion, government and fine arts.

HNRS 2042 Modern Traditions: Europe and the West (4)

This is a General Education course. *2 hrs. lecture, 2 hrs. seminar.* European civilization from the Renaissance to the Modern. Includes literature, history, philosophy, religion, government and fine arts.

HNRS 3000 Research Methodologies (3)

Honors introduction to undergraduate research methods. Theory, ethics, networking, proposal preparation, data collection and presentation of findings specific to student's discipline; disciplinary emphasis varies by section.

HNRS 3010 Leaders and Scholarship (3)

Analysis of classical and modern foundations and principles of leadership. Practice in scholarship essay writing, interviewing, debate and critical thinking. Intended for national and international scholarship applicants.

HNRS 3025 Advanced Seminar in Social Science and Humanities (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Advanced topics of significance from the social sciences and humanities.

HNRS 3035 Advanced Seminar in Natural Science (3)

Prereq.: completion of one-year course in a physical science and one-year course in a biological science, at least one with laboratory; or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Selected topics illustrative of developing concepts of the natural and physical universe and of living organisms.

HNRS 3100 Internships, Field Work and Off-Campus Programs (1-6)

Prereq.: consent of dean of Honors College. May be taken for a max. of 6 sem. hrs. of credit. For special learning opportunities.

HNRS 3110 Experiential Leadership Workshop (3)

May be repeated for a max. of 6 sem. hrs. of credit. Honors students engage in academically-related leadership experiences.

HNRS 3500 Independent Study (1-6)

Prereq.: proposal for course of study, approved by supervising faculty member and with the consent of the Honors College. May be taken for a max. of 6 sem. hrs. of credit when topics vary.

HNRS 4000 Thesis (3)

Pass-fail grading. May be repeated for a max. of 6 sem. hrs. of credit. Independent research and writing toward the honors thesis.

HNRS 4813 Interdisciplinary Fluid Dynamics: Physical Concepts (3)

See ME 4813.

HNRS 4823 Interdisciplinary Fluid Dynamics: Computational Methods (3)

See ME 4823.

Horticulture

HORT 2010 Horticulture Technology (2)

Prereq.: MATH 1021. Introduction and overview of calculations and measurements used in applied horticulture.

HORT 2011 Analysis of Environmental Issues (3)

See EMS 2011.

HORT 2020 Installation and Maintenance of Ornamentals in the Landscape I (2)

1 hr. lecture; 2 hrs. lab. Introduction to soil analysis and preparation; installation and maintenance of landscape plants including trees, shrubs, perennials and annuals; irrigation installation and repair.

HORT 2022 Installation and Maintenance of Ornamentals in the Landscape II (2)

Prereq.: HORT 2020 or consent of instructor. *1 hr. lecture; 2 hrs. lab.* Introduction to the management of interior plants; pruning techniques for trees, shrubs, palms, and roses; evaluation of landscape documents, cost estimation and bidding.

HORT 2025 Introduction to the Green Industry (2)

Defining the general management structure and use of horticultural concepts specific to the “green agribusiness” sector; topics include entrepreneurial entry; specialized green industry labor; regulatory oversight; applied use of permits, waivers, and variances; cost effect of regulatory compliance; acquired use of patent and proprietary licensing.

HORT 2050 General Horticulture (3)

This is a General Education course. Science and art of modern horticultural plant production, including plant anatomy, growth, propagation, nutrition and pest management; review of the horticulture industry, including fruit, vegetable and ornamental crop production.

HORT 2061 Plant Propagation (3)

Prereq.: HORT 2050 or concurrent enrollment. Principles of sexual and clonal propagation of plants; commercial production of horticultural crops.

HORT 2070 Horticulture Lab (1)

Prereq.: HORT 2050 or concurrent enrollment. Required for all horticulture majors. 3 hrs. lab. Application of horticultural principles including propagation, greenhouse production, fertilization and pest management.

HORT 2086 Introduction to Turfgrass Management (3)

Also offered as AGRO 2086. Prereq.: BIOL 1202 or BIOL 1002; AGRO 2051 or equivalent. Required field trips. 2 hrs. lecture; 3 hrs. lab. Turfgrass identification and adaptation; establishment and maintenance of high quality turf areas; turfgrass pests and their control.

HORT 2122 Herbaceous Plant Materials (2)

1 hr. lecture; 2 hrs. lab. Identification and study of plant materials; production protocols, growth and development and visual characteristics of herbaceous plant materials used in ornamental horticulture and landscaping.

HORT 2124 Woody Plant Materials I (2)

1 hr. lecture; 2 hrs. lab. Identification and study of plant materials; ecological and visual characteristics of plants used in landscape design.

HORT 2125 Woody Plant Materials II (2)

Prereq.: HORT 2124 or consent of instructor. Continuation of HORT 2124. 1 hr. lecture; 3 hrs. lab. Introduction to the nursery industry including production, availability and marketing.

HORT 2130 Survey of Arboriculture (2)

1 hr. lecture; 2 hrs. lab. Review of the biology, growth, environment and management practices for trees in the landscape.

HORT 2525 Organic Gardening and Sustainable Crop Production (4)

3 hrs. lecture; 3 hrs. lab. Principles and practices of organic vegetable and sustainable crop production; encompasses the ecological, economic, and social components of organic and sustainable crop farming systems.

HORT 2860 Growth and Development of Agricultural Crops (3)

Prereq.: CHEM 1002 or CHEM 1202 and BIOL 1002 or BIOL 1202. This course is part of ACCEPtS. Physiology of agricultural plants, including water relations, respiration, photosynthesis and growth and development.

HORT 3000 Horticultural Internship (3)

Prereq.: HORT 2050 and written consent of instructor. May be taken for a max. of 6 sem. hrs. credit. Work experience in horticultural industries culminating in acceptable written reports and a seminar presentation.

HORT 3010 Research Problems (3)

May be taken for a max. of 6 sem. hrs. credit. Written consent of the instructor. Independent research under a faculty member culminating in an oral and written research report.

HORT 3015 Urban Landscape Management (3)

Prereq.: HORT 2050, HORT 2124 or equivalent. This course is part of ACCEPtS. Methods for sustainable management of the landscape through proper installation, soil management, plant care, pesticide management, employee management and cost accounting.

HORT 3040 Landscape Construction (2)

1 hr. lecture; 2 hrs. lab. Survey of construction techniques and materials used in landscape contracting including drainage systems, paving, retaining walls, decking and fencing.

HORT 3503 Sustainable Horticulture (3)

Prereq.: HORT 2050 or equivalent. This course is part of ACCEPtS. This course will provide base knowledge of the principles and practices of sustainable, organic and alternative horticulture management systems. The class will review and evaluate topics including soil biological processes (compost, humus and fertility), pest management, alternative farming systems and organic agriculture.

HORT 4010 Tropical/Subtropical Horticulture (3)

Prereq.: HORT 2050 or equivalent. Current status of cultivation throughout the world; production practices; postharvest handling; international trade of tropical/subtropical horticultural crops.

HORT 4012 Special Topics in Horticulture (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Lab/field trip may be required. Subject areas not covered in other horticulture courses.

HORT 4020 Greenhouse Management and Controlled Environment Agriculture (4)

Prereq.: HORT 2050 or equivalent. This course is part of ACCEPtS. 3 hrs. lecture; 2 hrs. lab. Operation and management of greenhouses and other controlled environments with emphasis on system design and construction, control of light intensity and photoperiod heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems.

HORT 4030 Plantation, Beverage and Tropical Nut Crops (3)

Prereq.: HORT 2050 or equivalent. World situations, production practices, pest management, harvesting, postharvest care, agro-processing and international trade of rubber, oil palm, cocoa, coconut, olive, coffee, tea, wine grapes, vanilla and various tropical/subtropical nut crops.

HORT 4040 International Horticulture (3)

Prereq.: HORT 2050 or equivalent. This course is part of ACCEPtS. This course will provide an overview of the horticulture industry worldwide. Export, marketing and international trade issues will be covered in a global horticultural context.

HORT 4051 Processing of Fruits and Vegetables (3)

Prereq.: FDSC 1049 or HORT 2050 or equivalent. 2 hrs. lecture; 2hrs. lab. Methods of processing horticultural crops; includes canning, freezing, dehydration and fermentation.

HORT 4064 Principles of Plant Breeding (4)

See AGRO 4064.

HORT 4071 Nursery Management (3)

Prereq.: BIOL 3060 or equivalent. Required field trips. 2 hrs. lecture; 2 hrs. lab. Principles and practices involved in commercial production, management and marketing of nursery crops.

HORT 4072 Sustainable Ornamental Production (3)

Prereq.: HORT 2050 and HORT 2061. This course is part of ACCEPtS. This course addresses a variety of topics including, sustainable practices in locating a nursery, nursery layout, plant nutrition, plant water relations and irrigation needs, shipping and managing people and resources to produce the crop.

HORT 4083 Principles and Practices in Olericulture (4)

Prereq.: AGRO 2051 and HORT 2050. Required field trips. 3 hrs. lecture; 2 hrs. lab. Review of U.S. commercial vegetable industry; seed handling, field microclimate modification, transplant handling, stand establishment, influence of soil chemical and physical properties and greenhouse vegetable production.

HORT 4085 Principles and Practices in Fruit and Nut Production (4)

Prereq.: HORT 2050 or equivalent. Required field trips. 3 hrs. lecture; 2 hrs. lab. Physiological principles involved in growing pomological crops; overview of state, U.S., and worldwide fruit and nut industry; marketing and production strategies.

HORT 4090 Golf Course Operations (4)

Prereq.:

3 hrs. lecture; 2 hrs. lab. Golf course management; construction; cultural practices; environmental concerns.

HORT 4096 Postharvest Physiology (4)

Prereq.: PLHL 3060. 3 hrs. lecture; 2 hrs. lab. Physiological changes associated with storage and handling of fruits and vegetables; current practices used in extending shelf-life; basic and applied laboratory analysis techniques.

HORT 6011 Topics in Plant, Environmental and Soil Sciences for Teachers (3)

See EMS 6011.

HORT 7071 Advanced Plant Genetics (3)

See also AGRO 7071. Prereq.: ANSC 2072 or equivalent.

Theory and practical application of cytogenetics in plant improvement, extrachromosomal inheritance, and gene expression.

HORT 7074 Quantitative Genetics in Plant Improvement (3)

See AGRO 7074.

HORT 8000 Thesis Research (1-12 per sem.)

“S”/“U”grading.

HORT 8900 Research Problems in Horticulture (3)

Prereq.: consent of department head. Pass-fail grading. May be taken for a max. of 6 hrs. of credit when topics vary. Students minoring in horticulture may take this course only once.

HORT 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading.

Human Resource Education

HRE 2723 Introduction to Leadership Development (3)

An honors course, HRE 2724, is also available. Credit will not be given for this course and HRE 2724. Introduction to leadership and leadership development; emphasis on students understanding their personal traits, values, characteristics and development tasks as a foundation for leadership development.

HRE 2724 HONORS: Introduction to Leadership Development (3)

Same as HRE 2723 with special honors emphasis. Prereq.: Honors College students only. Credit will not be given for this course and HRE 2723.

HRE 3000 Word Processing (3)

2 hrs. lecture; 2 hrs. lab. Word processing concepts and skills, systems, procedures, equipment and careers.

HRE 3071 Principles of Human Resource Development (3)

A comprehensive introduction to the field, principles, profession and practice of Human Resource Development (HRD) Training and Development.

HRE 3171 Instructional Design for Training (3)

Prereq.: HRE 3071. Principles and practices of instructional design for developing effective training; course, unit and lesson development.

HRE 3271 Leading Learning in Human Resource Development (3)

Prereq.: HRE 3071. Introduction to the principles and practices of instructional delivery strategies to facilitate learning in training and development; methods for leading learning in traditional classroom training; on-the-job training; small group learning; and individual learning.

HRE 3331 Strategic Career Development/Planning (3)

Prereq.: Sophomore standing or higher or consent of instructor. Career development and planning through career decision-making, networking and linking personal competencies to organizations. Applying skills required for a successful job search and making the transition from college to work.

HRE 3571 Needs Analysis in Human Resource Development (3)

Comprehensive introduction to the principles and practice of needs assessment and performance analysis for Human Resource Development (HRD) Training and Development and Adult Education.

HRE 3723 Leadership Concepts and Principles (3)

An honors course, HRE 3724, is also available. Credit will not be given for this course and HRE 3724. Survey of leadership theory, concepts and research; emphasis on understanding the foundational concepts of modern leadership.

HRE 3724 HONORS: Leadership Concepts and Principles (3)

Same as HRE 3723 with special honors emphasis. Prereq.: Honors College students only. Credit will not be given for this course and HRE 3723.

HRE 4003 Independent Reading and Research in Home Economics Education (1-3)

Prereq.: consent of director and instructor. May be taken for a max. of 3 sem. hrs. of credit. Students are responsible for registering with a faculty member with whom they will select the area of reading and research. Faculty-directed individual study.

HRE 4025 Principles of Adult Education (3)

Nature and importance of adult education; social and psychological factors affecting adult motivation and learning; techniques for providing adult learning experiences.

HRE 4079 Foundations of Human Resource Development (3)

Comprehensive introduction and overview to the field, profession, theoretical foundations and practice of Human Resource Development (HRD).

HRE 4252 Instruction and Information Technology (3)

2 hrs. lecture; 2 hrs. lab. Broad introduction to the vast array of information technologies as well as a survey of the global, ethical, political, cultural, social and environmental issues raised by information technology; building skills in integrating information technologies into a workforce curriculum.

HRE 4281 Foundations of Distance Learning (3)

Prereq.: AEA 3101 or HRE 3171. Overview of the theories, models and systems of distance learning; focus on understanding the foundations of distance learning, the design and delivery methodologies, and the role of the instructor and learner.

HRE 4301 Assessment, Career Development and Productivity (3)

Assessing present and future needs of the human resource education student; procedures used to evaluate student preferences, career potential and occupational placement.

HRE 4573 Managing the Human Resource Development Function (3)

Su Study of human resource development (HRD) in organizations with employees on practical application of principles for effective leadership, management and administration of the HRD function.

HRE 4579 Training in Global Organizations (3)

Introduction to the problems, practices and models of cross-cultural competence and cross-cultural training; focus on the nature, content and function of cross-cultural training in organizations.

HRE 4581 Advanced Organizational Psychology & Work Behavior (3)

Topics in organizational science derived from research in organizational psychology, management, human resources, organizational communication, and sociology; basic understanding of the conceptual and empirical knowledge that describes and defines human behavior within organizational systems, with a particular focus on workplace organizations.

HRE 4585 Consulting in Organizations (3)

Practical look at the skills to be an effective internal or external consultant in organizations; emphasis on consulting process rather than any specific area of consulting expertise.

HRE 4603 Evaluation in Human Resource Development (3)

Prereq.: HRE 3071. Comprehensive introduction to the principles and practice of training program evaluation.

HRE 4705 Education, Business and Entrepreneurship (3)

Principles and strategies involved in establishing and operating small businesses; emphasis on resources available to aid the educator in bridging the gap between business and entrepreneurship.

HRE 4723 Advanced Leadership Development (3)

An honors course, HRE 4724, is also available. Prereq.: HRE 2723 and HRE 3723 or graduate status.

Credit will not be given for this course and HRE 4724. Focus on developing the leadership skills students need to effectively lead organizations and communities to achieve their vision and goals.

HRE 4724 HONORS: Advanced Leadership Development (3)

Same as HRE 4723 with special honors emphasis. Prereq.: HRE 2724 and HRE 3724; Honors College students only. Credit will not be given for this course and HRE 4723.

HRE 4801 Teaching Internship: Professional (3)

Prereq.: concurrent registration in HRE 4802 and HRE 4803. Permission of instructor. Not for graduate credit. Professional responsibilities; teacher association work; teacher, parent and student organization activities; school visits and certification.

HRE 4802 Internship: Preparation (3)

Prereq.: concurrent enrollment in HRE 4801 and HRE 4803. Permission of instructor. Not for graduate credit. Evaluation of student's ability to operate and maintain an instructional laboratory; development of curriculum materials for organizing and evaluating the teaching environment.

HRE 4803 Internship: Delivery (3)

Prereq.: concurrent enrollment in HRE 4801 and HRE 4802. Permission of instructor. Not for graduate credit. Evaluation of the student's lesson preparation, demonstration ability; laboratory organization, participation in class activities and evaluating teaching environment.

HRE 4804 Professional Development Internship (3-12)

May be taken for a max. of 12 sem. hrs. of credit. Not for graduate credit. Permission of instructor. Students are mentored in the business community as they learn various skills that would make them highly employable.

HRE 4805 Making the Transition from College to Work (1)

Course is taken in conjunction with an internship, practicum or other work experience. Introduction to the skills needed to successfully make the transition from college to career life; emphasis on the skills needed to quickly learn how to be a top performing new employee and avoid typical mistakes college graduates make as new employees.

HRE 4809 Advanced Problems in Human Resource Education (1-3)

May be taken for a max. of 6 sem. hrs. credit. Permission of instructor. Individual and group problems.

HRE 4849 Special Topics in Industrial Education (1-3)

May be taken for a max. of 6 sem. hrs. credit. Permission of instructor. Current practices and technological advances in industrial education; individual or group study under the direction of a faculty member.

HRE 4859 Special Topics in Business Education (1-3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Permission of instructor. Individual and group study of selected topics under the direction of a faculty member.

HRE 4869 Special Topics in Home Economics Education (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Current practices and technological advances in vocational home economics.

HRE 7001 Principles of Human Resource Education (3)

Principles of workforce education and development programs conducted by business, industry, government and educational institutions at all levels; relationships to adult education, career/technical education, human resource development, career development, general education and society.

HRE 7003 Philosophy of Human Resource Education (3)

Major philosophies that have influenced human resource education; philosophical approaches to problems in human resource education.

HRE 7025 Advanced Adult Learning Theory and Practice (3)

Advanced study of adult learning theory and research; emphasis on learning theory and research in adult learning with implications for adult learning practice.

HRE 7122 Program Development (3)

Concepts relating educational planning, planned change and social change to development of effective extension education programs.

HRE 7171 Instructional Design for Human Resource Development (3)

Comprehensive introduction to the theory, principles, research and practices of instructional systems design (ISD) in human resource education (HRD) and training.

HRE 7202 Systems of Teaching and Learning Styles (3)

Analyzing how individuals perceive and process information; interrelationships with personality, leadership, management, supervision, administration; applications in education, business, industry, formal and nonformal settings.

HRE 7205 Teaching in Higher Education (3)

Methodology for effective college teaching; student motivation; planning for instruction, delivery and evaluation.

HRE 7271 Leading Learning in Human Resource Development (3)

Principles, research, and practices of facilitating learning in human resource development (HRD) including facilitation skills for traditional classroom training, as well as informal work-based learning strategies.

HRE 7304 Human Resource Education for Special-Needs Students (3)

Su Regulations, issues, assessment, instruction and special problems in human resource education for learners with special needs.

HRE 7334 Vocational Counseling (3)

See ELRC 7334.

HRE 7571 Performance and Needs Analysis in Human Resources Development (3)

Theory and principles used in the analysis of performance problems in organizations; emphasis on the application of performance theory and use of tools and techniques for analyzing organizational, process and individual level performance problems.

HRE 7575 Managing Change in Organizational Systems (3)

Introduction to the theory, methods and practice of organization change and development; emphasis on the role of the HRD practitioner as change agent and the interventions used to lead and manage organization change.

HRE 7577 Training and Development in Organizations (3)

Survey of the training and development function in modern organizations. Particular focus is given to learning theory and strategies, program design, and evaluation in applied (field) settings. A multidisciplinary perspective is encouraged.

HRE 7602 Program Evaluation Design (3)

Systematic application of social research procedures for evaluating the conceptualization, design, implementation and utility of vocational educational programs.

HRE 7622 Evaluation Methods (3)

Concepts and principles of evaluation applied to programs in extension education.

HRE 7722 Facilitation Skills in Human Resource Education (3)

Understanding group dynamics, models of decision-making, and intervention strategies; basic and advanced facilitation skills required to lead groups through numerous group processes, including developing mission, vision, and values statements; strategic planning; focus groups and structured learning experiences.

HRE 7723 Leadership and Organization (3)

Application of relevant principles from leadership theory, group dynamics, social organization and organizational administration to problems of organizing extension education programs.

HRE 7724 Determinant Leadership & Individual Development (3)

Prereq.: HRE 7723 or permission of instructor. Identification and development of an individual's leadership strengths, traits, and skills through research-based assessments.

HRE 7725 Leadership Development Strategies in Organizations (3)

Introduction to the major strategies used for developing leaders in organizations; emphasis on learning theories for leadership development, formal training strategies, development through job experience, feedback intensive programs and skill-building programs.

HRE 7727 Advanced Leadership Theory and Practice (3)

A study of theory, research, and managerial applications of leadership; in-depth examination of leadership styles and approaches, including taxonomies, personal attributes of leadership, diversity, and cultural dimensions.

HRE 7731 Current Topics in Leadership Development (3)

Prereq.: nine hours from HRE 7723, HRE 7724, HRE 7725, HRE 7575, or HRE 7727. Analysis and evaluation of contemporary examples of leadership in human resource education, including current trends and models.

HRE 7733 Practicum in Leadership Development (1-6)

Prereq.: twelve hours from HRE 7723, HRE 7724, HRE 7725, HRE 7575, HRE 7727, or HRE 7731. Practical experience in leadership development under the guidance of in-service practitioners.

HRE 7801 Current Problems and Issues in Human Resource Education (1-3)

Prereq.: permission of instructor. Legislative, societal and educational concerns affecting workforce education.

HRE 7803 Independent Study in Human Resource Education (1-3)

May be taken for a max. of 3 sem. hrs. credit when topics vary. Permission of instructor. Faculty directed study of relevant topics in workforce education.

HRE 7805 Seminar in Human Resource Education (1-6)

May be taken for a max. of 6 sem. hrs. credit when topics vary. Selected topics of interest to human resource education.

HRE 7809 Practicum for the Human Resource Educator (3-9)

Prereq.: permission of instructor. Practical experience under the guidance of practicing vocational educators in various educational settings.

HRE 7822 Advanced Extension Education (3)

Integration of relevant concepts, principles and research findings in program development, leadership and organization, learning and teaching and evaluation.

HRE 7824 Independent Study in Extension Education (3)

May be taken for a max. of 6 hrs. of credit. Permission of instructor. Independent study under the guidance of the graduate faculty.

HRE 7848 Special Topics in Industrial Education (1-3)

May be taken for a max. of 6 sem. hrs. Permission of instructor. Independent or group study under the direction of the graduate faculty.

HRE 7862 Current Problems in Home Economics Education (3)

Study of social, legislative and educational problems.

HRE 7871 Research and Theory in Human Resource Development (3)

Doctoral seminar. The role of theory in human resource development practice and research, theory-building methodologies and key foundational theory and research in human resource development.

HRE 7901 Scientific Methods in Human Resource Education (3)

Principles involved in formulating educational problems, hypotheses, research strategies; historical, descriptive, experimental and research methodologies.

HRE 7903 Survey Research Design and Implementation (3)

Su Prereq.: *HRE 7901 or equivalent.* Survey and correlational research in vocational education; emphasis on selection and/or development of appropriate measuring devices.

HRE 7905 Advanced Research Design (3)

Prereq.: *HRE 7901 or equivalent.* Research design; emphasis on research concepts and procedures and their application to extension education.

HRE 7909 Application, Interpretation and Reporting of Research Results (3)

Prereq.: *HRE 7901, HRE 7903 or HRE 7905 or equivalent.* Selection of appropriate statistical techniques and interpretation of results.

HRE 7921 Applied Qualitative Research Methods (3)

Expanding graduate students' research skills to include knowledge of theories and methods associated with qualitative research designs.

HRE 7923 Advanced Mixed Methods Research (3)

Prereq.: *ELRC 7006, HRE 7901, HRE 7905, and HRE 7921, or equivalent coursework.* Systematic application of social research procedures for evaluating the conceptualization, design, implementation, and utility of human resource education and workforce development programs.

HRE 7973 Data Collection and Analysis in Organizations (3)

Introduction to the principles and fundamental methods of collecting, analyzing, and interpreting data in organizations for the purpose of informing actions and decisions related to human resource development.

HRE 8000 Thesis Research (1-12 per sem.)

“S”/“U”grading. Permission of instructor.

HRE 8900 Research Problems (1-6)

Prereq.: HRE 7622 and a basic graduate-level statistics course. May be taken for a max. of 6 sem. hrs. of credit. Permission of instructor. Research problems in programming, teaching, leadership, organization or evaluation of extension programs.

HRE 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading. Permission of instructor.

Human Ecology: Family, Child and Consumer Sciences

HUEC 1060 Personal Money Management (1)

Also offered as FIN 1060. Goal setting, budgeting, credit managing, saving and investing and retirement planning.

HUEC 4062 Families and Consumer Law (3)

Advanced study of federal and state "consumer bills," one's legal status as a family member; effectiveness of warranties and the judicial process regarding consumers' rights; responsibilities delegated to consumers.

HUEC 7050 Research Seminar in Family, Child & Consumer Sciences (1)

May be taken for a max. of 2 hrs. of credit when topics vary. Reports and discussion of current literature and research.

HUEC 7843 Early Childhood Education (3)

See EDCI 7843.

Human Ecology: General Human Ecology

HUEC 1000 Human Ecology as a Profession (3)

Attributes that identify human ecology as a profession; historical and philosophical view of its mission, interrelationship of its various specializations and competencies and commitments necessary in the various specializations.

HUEC 2091 Special Topics in Human Ecology (1-3)

Prereq.: consent of director for majors in human ecology. May be taken for a max. of 6 hrs. of credit when topics vary.
Contemporary issues in human ecology of interest to special professional and business groups.

HUEC 3091 Reading and Research in Human Ecology (1-6)

May be taken for a max. of 6 hrs. of credit. Open to advanced students of high academic standing by consent of director. Students are responsible for registering with a faculty member with whom they will select the area of reading and research.

HUEC 7090 Research Methods in Human Ecology (3)

Philosophy of human ecology research; issues and trends; design and methodology.

HUEC 7091 Independent Reading and Research in Human Ecology (1-6)

Prereq.: permission of department. May be taken for a max. of 6 hrs. of credit. Directed individual reading and research in a selected area of human ecology.

HUEC 7092 Human Ecology Research Seminar (1)

"P"/"F" grading. May be taken for a max. of 3 sem. hrs. of credit. 2 sem. hr. required of all doctoral students in human ecology. Research reports and discussion of current topics and issues in human ecology.

HUEC 7093 Advanced Research Methods in Human Ecology (3)

Prereq.: HUEC 7090 or equivalent and EXST 7013 or EXST 7014 or EXST 7015 or equivalent. 2 hrs. lecture; 2 hrs. lab. Research methods and applications in human ecology.

HUEC 7900 Research and Project Development in Human Ecology (1-12)

Prereq.: permission of department. "S"/"U" grading. May be repeated for a max. of 15 sem. hrs. credit. Credit will not be given for this course and HUEC 8000. Directed research and focused project development under the supervision of the major professor.

HUEC 8000 Thesis Research (1-12 per sem.)

Prereq.: permission of department. "S"/"U"grading. Credit will not be given for this course and HUEC 7900.

HUEC 9000 Dissertation Research (1-12 per sem.)

Prereq.: permission of department. "S"/"U"grading.

HUEC 9091 Independent Research for Doctoral Students (1-6 per sem.)

Prereq.: must be a doctoral student and have consent of instructor and approval of the student's full doctoral committee for each repetition of the course. This course may be repeated for credit; a max. of 15 sem. hrs. is allowed toward doctoral requirements. Credit in HUEC 7091 is included in the 15 sem. hrs.

Human Ecology: Human Nutrition and Food

HUEC 1014 Food Theory and Skills (4)

Prereq.: Credit or registration in HUEC 1110. For Majors and Minors only. 3 hrs. lecture; 3 hrs. lab. Principles of food theory, selection, preparation and management.

HUEC 1110 Introduction to Nutritional Sciences (3)

This is a General Education course. Principles of nutrition and their application in promoting health; guidelines for assessing nutritional status; emphasis on the adult.

HUEC 2110 Methods of Nutritional Assessment (3)

Prereq.: HUEC 1110. For Majors and Minors only. Assessment of nutritional status including dietary intake, body composition, risks of chronic diseases and laboratory analysis using appropriate software, including interpretations of nutritional status indicators and practice of nutritional counseling for general risk reduction of chronic diseases.

HUEC 2112 Human Lifecycle Nutrition (3)

Prereq.: HUEC 1110. For Majors and Minors only. Nutritional needs during pregnancy, infancy, early childhood, adolescence, adulthood and later years.

HUEC 3010 Nutrition and Wellness (3)

Prereq.: HUEC 1110 and BIOL 1202 or BIOL 2160 or KIN 2500 or equivalent. Relationship of lifestyle and wellness; consumer issues and their impact on health; counseling for change.

HUEC 3110 Nutrition Counseling and Education (3)

Prereq.: HUEC 2110. For Majors and Minors only. Not for teacher certification. Nutrition education and counseling skills needed for serving ethnically diverse individuals and groups.

HUEC 3114 Food and Culture (3)

Prereq.: HUEC 1014; and credit or registration in HUEC 3110. Majors and Minors only. Cultural, religious\ and historical influences on food, as it relates to nutrition, health and diet counseling.

HUEC 3115 Human Nutrition and Metabolism (3)

Prereq.: HUEC 1110 and BIOL 2083 or BIOL 4087 Majors and Minors only. Energy metabolism and the functions, requirements, food sources of nutrients and nutrigenomics.

HUEC 3116 Community Nutrition (3)

Prereq.: HUEC 3110; Majors and Minors only. Public health policies and programs; assessing communities to be able to design, implement and evaluate community nutrition programs.

HUEC 3119 Fundamentals of Quantity Food Production (4)

Prereq.: HUEC 1014; Credit or registration in BIOL 1011. For Majors only 3 hrs. lecture; 3 hrs. lab.. Principles and practical application of quantity food procurement, production, distribution and service; menu development; sanitation and safety; materials and resource management and development.

HUEC 4021 Contemporary Topics in Nutrition (1)

Prereq.: BIOL 2083 or BIOL 4087 and credit or registration in HUEC 3116 and permission of department. May be taken for a max. of 2 hrs. credit when topics vary. Oral presentations of independent library or other research on selected contemporary issues in food, nutrition, dietetics or food systems.

HUEC 4023 Management in Dietetics (3)

Prereq.: HUEC 3119; MGT 3200 and registration or credit in ACCT 2000 and HUEC 3116. Majors only. Management applications to food service systems, clinical dietetics and community programs.

HUEC 4027 Practicum in Dietetics (1-3)

Prereq.: dietetics majors only; 60 hrs. in dietetics curriculum; overall GPA of 2.50; and permission of instructor. Each hour of credit requires 60 hours of supervised experience. May be taken for a max. of 3 hrs. of credit. Supervised professional experience designed to integrate academic learning with practice in dietetics.

HUEC 4110 Capstone in Nutritional Sciences (3)

Prereq.: HUEC 4111 and credit or registration in HUEC 3116 and EXST 2201. This course is limited to Nutrition and Food Sciences Majors only. 2 hrs. lecture; 3 hrs. lab/field work. Research methods used in nutritional sciences; research project is included.

HUEC 4111 Nutrition and Disease I (4)

Prereq.: BIOL 2153 or BIOL 2160; HUEC 2112, HUEC 3110 and HUEC 3115. Majors and Minors only. Nutrition assessment and interpretation; drug /nutrient interactions; biochemical and physiological changes that occur in dental, gastrointestinal and absorption abnormalities that require clinical diet modification.

HUEC 4114 Nutrition and Disease II (4)

Prereq.: HUEC 4111; Majors and Minors only. Biochemical and physiological changes that occur in immunological disorders, weight abnormalities, diabetes, cancer and disorders of the heart or kidney, that require clinical diet modification; nutritional needs of hypermetabolic states and inborn errors of metabolism.

HUEC 7001 Macronutrients (3)

Nutritional aspects of protein, lipids and carbohydrates; deficiencies, interrelationships, requirements and metabolic pathways.

HUEC 7002 Topics in Micronutrients (2)

May be taken for a max. of 8 sem. hrs. of credit when the topic varies. An integrated system approach to the importance and functions of vitamins and minerals in nutrition. Epidemiological to molecular aspects discussed.

HUEC 7004 Molecular and Clinical Nutrition I (2)

Prereq.: BIOL 4087 or BIOL 4094 or permission of the coordinator. The development of current concepts of nutritional effects on health and disease through the use of cellular/molecular tools.

HUEC 7005 Molecular and Clinical Nutrition II (2)

Prereq.: HUEC 7004. The development of current concepts of nutritional effects on health and disease through the use of cellular, molecular, genetic and epidemiologic tools.

HUEC 7010 Food and Nutrition Seminar (1)

May be taken for a max. of 6 hrs. of credit when topics vary. Reports and discussion of current literature and research.

HUEC 7011 Current Advances in Food and Nutrition (1-4)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Recent research and developments in food, nutrition, dietetics or food systems.

HUEC 7012 Food, Nutrition, and Health Promotion (3)

Individual factors and the role of the environment, sectors of influence, and social and cultural norms impacting dietary habits and food consumption; nutrition policy and dietary intake to promote health and wellness.

HUEC 7017 Advanced Human Nutrition (3)

Prereq.: BIOL 4087 or BIOL 4093 or consent of instructor. Human requirements, evaluation of nutritional status and problems related to kind and amount of food consumed.

Human Ecology: Textiles, Apparel and Merchandising

HUEC 2032 Introductory Apparel Design (4)

Prereq.: for students in the Apparel Design concentration only.
2 hrs. lecture; 4 hrs. lab. The design process; art elements and principles applied to aesthetic, functional and structural design of textile and apparel products; introduction to fashion illustration and design.

HUEC 2037 Apparel Structure and Fit (4)

Prereq.: for students in the Apparel Design concentration only or consent of instructor; credit for or registration in HUEC 2041. 2 hrs. lecture; 4 hrs. lab. Fundamental principles of garment assembly and the relationships between garment design, fabric characteristics and production processes; analysis of fit; alterations.

HUEC 2040 Textile Science (3)

Basic physical, biological and chemical characteristics of fibers, yarns and fabrics; selection, maintenance and performance of textiles.

HUEC 2041 Textile Science Laboratory (1)

Prereq.: credit or registration in HUEC 2040. 3 hrs. lab. Introduction to basic physical and chemical testing of textiles.

HUEC 2045 The Fashion Industry (3)

Interrelationships of design, production and distribution; historical aspects and cyclical nature of fashion.

HUEC 3030 Field Study in Textiles, Apparel and Retailing (3)

May be taken for a max. of 6 hrs. of credit when field site varies. Offered through Continuing Education. 28 hrs. of on-campus seminars. Fee to cover expenses. 2 hrs. lecture; 3 hrs. lab. Structured educational experiences in major industry centers in the U.S. and abroad.

HUEC 3032 Textile and Apparel Product Development (3)

Prereq.: HUEC 2040, HUEC 2045. Processes and issues related to development of textiles and apparel products for consumers.

HUEC 3037 Intermediate Apparel Product Design (4)

Prereq.: HUEC 2037. 2 hrs. lecture; 4 hrs. lab. Principles and application of two-dimensional or flat pattern design; development of foundation blocks for use in designing various garment styles and details; conceptualization and execution of original garment design.

HUEC 3042 Apparel Merchandise Buying and Management (3)

Prereq.: majors only; HUEC 2045 and MATH 1022, MATH 1431 or EXST 2201. Concepts and theories in retailing, consumer behavior, apparel buying and management; role and responsibilities of merchandise buyers; domestic and foreign merchandise resources and negotiation.

HUEC 3043 Apparel Merchandising Strategies and Assortment Planning (3)

Prereq.: majors only; HUEC 3042 and computer literacy; 2 hrs. lecture; 2 hrs. lab. Assortment planning and sales strategies; advanced quantitative concepts and procedures used in apparel buying; management and interpretation of data related to merchandising and sales.

HUEC 3045 Visual Merchandising and Promotion Strategies (3)

Prereq.: majors only; HUEC 2045. Display elements and techniques; visual merchandising; special events strategies; public relations; Internet promotions.

HUEC 3230 Pattern Design with Computer Application (4)

Prereq.: HUEC 3037. 2 hr. lecture; 4 hrs. lab. Application of two-dimensional pattern making principles to varied garment styles and details; design and execution of original garment design; introduction to proprietary computer software.

HUEC 3232 Apparel Design Studio (3)

Prereq.: HUEC 2032. 1 hr. lecture; 4 hrs. studio. Fashion illustration techniques; adaptation of inspirational themes to designs for diversified apparel markets; pre-portfolio development.

HUEC 4034 Textile and Apparel Product Evaluation (3)

Prereq.: HUEC 2041. 2 hrs. lecture; 2 hrs. lab. Fabric and apparel structure and their relationships to performance and end-use characteristics; textile and apparel product standards and specifications; standard test methods for evaluating physical, aesthetic comfort, performance and functional aspects.

HUEC 4037 Advanced Apparel Product Design (4)

Prereq.: HUEC 3230. 2 hrs. lecture; 4 hrs. lab. Principles and application of three-dimensional pattern design.

HUEC 4041 History of Textiles (3)

Cultural, functional and technological developments of textiles by selected periods and countries.

HUEC 4043 Advanced Textiles (3)

Prereq.: HUEC 2041. 2 hrs. lecture; 2 hrs. lab. Characteristics of natural and manufactured textile fibers; physical and chemical modifications to meet consumer needs; textile dyes and finishes; methods of fiber identification and chemical testing of textiles.

HUEC 4044 Global Textile and Apparel Economics (3)

Prereq.: HUEC 3032, ECON 2030. Application and analysis of economic concepts and principles associated with the textiles and apparel industry; overview of global economics and contemporary trade policy.

HUEC 4045 Synthesis: Textile and Apparel Product Processes (3)

Prereq.: HUEC 4037. 1 hr. lecture; 4 hrs. lab. Multi-functional team approach to creative problem solving; apparel product design, development, evaluation and presentation using advanced pattern making techniques and technology.

HUEC 4046 Advanced Topics in Apparel Merchandising (3)

Prereq.: HUEC 3032 and HUEC 3043. Application of principles of product development, buying and management of apparel merchandise; current industry issues and trends; emphasis on theory and policy related strategies.

HUEC 4047 Internship in Textiles, Apparel and Merchandising (3 or 6)

Su *Prereq.: GPA of at least 2.30 on all HUEC classes taken at LSU and permission of department; participation in orientation workshop prior to enrollment. MKT 3401. Merchandising concentration: credit in HUEC 3043 and HUEC 3045; apparel design concentration: credit in HUEC 3045, HUEC 3230, and HUEC 3232,; textile science concentration: HUEC 4043. May be taken for a max. of 9 sem. hrs. of credit. Each hour of credit requires 40 hrs. of supervised experience. Not for graduate credit. Supervised professional experience designed to integrate academic learning with professional practice.*

HUEC 4070 Entrepreneurship in Human Ecology (3)

Prereq.: MKT 3401. Application of principles of entrepreneurship with an emphasis on home-based and/or micro-businesses; case studies of successful entrepreneurs.

HUEC 4071 History of Dress and Adornment Prior to 1800 (3)

Emphasis on styles of western civilization; how dress functions for individuals within culture and society; relationships of gender, environment, technology, economics, religion and aesthetics to dress.

HUEC 4072 History of Dress and Adornment After 1800 (3)

Emphasis on styles of western civilization; how dress functions for individuals within culture and society; relationships of gender, environment, technology, economics, religion and aesthetics to dress.

HUEC 4091 Special Topics in Human Ecology (1-3)

Prereq.: consent of director. May be taken for credit for a max. of 6 sem. hrs. when topics vary. Lectures and/or laboratories on selected topics not covered in other human ecology courses.

HUEC 4232 CAD for Textiles and Apparel (3)

Prereq.: HUEC 3232. 1 hr. lecture; 4 hrs. lab. Application of computer-aided design technology to the design and presentation of textile and apparel collections.

HUEC 7030 Creativity in Product Development (3)

Prereq.: permission of instructor. 1 hr. lecture; 4 hrs. lab. Examination, enhancement and application of creativity in the product development process with interdisciplinary application. Exploration of creative innovators and their design processes resulting in design, development and execution of original product.

HUEC 7031 Social-Psychological Theories of Dress, Appearance and Fashion (3)

Examination and analysis of interdisciplinary and theoretical approaches to dress, appearance and fashion as a social and economic force.

HUEC 7032 Comparative Studies in Dress and Culture (3)

Also offered as ANTH 7032. Relationship between people and dress in different cultural settings, e.g., environment, religion, ethnicity, gender and aesthetics; impact of cultural change and western culture on world dress, ethnic and folk traditions in dress.

HUEC 7036 Apparel Merchandising and Global Expansion (3)

Internationalization of apparel merchandising; examination of theoretical foundations, principles and applications within select international settings; development of international apparel merchandising strategies; assessment of global issues that affect apparel merchandising.

HUEC 7037 Consumer Behavior in the Apparel Merchandising Environment (3)

Examination of consumer behavior theories and their applications to apparel purchase and patronage decisions and merchandising research.

HUEC 7041 Introduction to Research in Textiles, Apparel Design and Merchandising (3)

Introduction to research and literature in textiles, apparel design and merchandising.

HUEC 7043 Seminar: Textiles, Apparel Design and Merchandising (1)

“S/U” grading. May be taken for a max. of 3 hrs. of credit if topics vary. Reports and discussion of current literature and research.

HUEC 7044 Selected Topics in Textiles, Apparel Design and Merchandising (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Analysis and discussion of selected research and creative topics.

HUEC 7046 Microscopy of Fibers and Polymers (3)

Analysis and characterization of fibers and polymers using microscopical techniques; emphasis on textile fibers and fabrics, including modern, historic and archaeological specimens.

HUEC 7047 Modern Fiber Science and Technology (3)

2 hrs. lecture; 2 hrs. lab. New techniques for obtaining fiber forming polymers derived from renewable resources, such as lyocell and plant derived polyesters; examination of polymeric materials used for the development of high performance fibers for space and other industrial applications.

HUEC 7048 Thermal Characterization of Fibers and Polymers (3)

2 hrs. lecture; 2 hrs. lab. Analysis and characterization of fibers and polymers using thermal, thermo-electrical and thermo-mechanical techniques; examination of textile fibers and fabrics including bio-derived materials and classical specimens.

HUEC 7049 Advanced Individual Field Experience In Textiles, Apparel Design and Merchandising (3)

Prereq.: or coreq.: HUEC 7091 or consent of instructor. May be taken for a max. of 6 hrs. of credit. Advanced individual, supervised, field-based study in selected areas of textiles, apparel design and merchandising; emphasis on analysis, synthesis and application of research data and contemporary practices within selected businesses, industries, agencies and institutions.

Interior Design

ID 1051 Introduction to Interior Design (3)

This is a General Education course. Contemporary practice of interior design as a profession; responsibilities of the interior designer.

ID 1711 Basic Design Foundation (3)

Prereq.: controlled admission to program in interior design at first year entry level or permission of department. Credit will not be given for this course and ART 1011. 6 hrs. studio. Basic design problems with an emphasis on two-dimensional principles and elements; foundation for the graphic exploration of interior space.

ID 1780 Interior Design Technical Drawing (3)

Prereq.: controlled admission to program in interior design at first year entry or permission of department. 1 hr. lecture; 4 hrs. studio. Introduction to the graphic tools, techniques and conventions designers use to communicate architectural ideas; an immersion in the graphic language of drawing.

ID 2750 Interior Design Studio I (4)

Prereq.: admission to professional program in interior design or permission of department. Concurrent enrollment in ID 2781. 8 hrs. studio. Basic design problems in the built environment; emphasis on design process, form and principles of spatial organization.

ID 2751 Interior Design Studio II (4)

Prereq.: ID 2750 or equivalent. 8 hrs. studio. Exploration and analysis of design decisions related to interior space.

ID 2770 Color and Illumination I (3)

Prereq.: sophomore standing in the major; nonmajors by consent of instructor only. 1 hr. lecture; 4 hrs. studio. Nature, theory and art of color and light applied to two- and three-dimensional basic design projects.

ID 2774 Interior Construction and Systems (3)

Prereq.: admission to professional program. Building systems and construction methods; code requirements for interiors.

ID 2775 Interior Materials, Finishes and Furnishings (3)

Prereq.: ID 2774 or equivalent. Types and sources of materials; finishes and furnishings used in interior spaces.

ID 2781 Interior Design Graphics (3)

Prereq.: admission to professional program. Concurrent enrollment in ID 2750. 6 hrs. studio. Graphic representation methods used to illustrate and investigate form, spatial order and the design process.

ID 2785 Computer Visualization (3)

Prereq.: admission to professional program or consent of instructor. 1 hr. lecture; 4 hrs. lab. Computer drafting and three-dimensional modeling for spatial designers.

ID 3752 Interior Design Studio III (4)

Prereq.: ID 2751 and ID 2775 or equivalent. 8 hrs. studio. Formulation of design concept/image; design implications of function, space and scale.

ID 3753 Interior Design Studio IV (4)

Prereq.: ID 3752 or equivalent. 8 hrs. studio. Design development of interior environments.

ID 3759 Special Studies in Interior Design (1-6)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Advanced studio work in predetermined areas of specialization.

ID 3761 Interior Design Internship (3)

Prereq.: completion of all 2000-level interior design courses and consent of instructor. Pass-fail grading. At least 20 hours of work per week (35 hours per week in summer session) supervised by an interior design faculty member and a professional designer in an approved firm.

ID 3770 Color and Illumination II (3)

Prereq.: junior standing in major; nonmajors by consent of instructor only. 1 hr. lecture; 4 hrs. studio. Quantitative and qualitative aspects of color/light; application to interior design.

ID 3782 Interior Design Construction Documents (3)

Prereq.: ID 2751 or equivalent. 1 hr. lecture; 4 hrs. studio. Development of construction documents for interior projects; design and documentation of interior architectural details.

ID 4555 Interior Design Studio (4)

Prereq.: ID 3753 or equivalent and consent of department. 8 hrs. studio. Special topics studio developed around faculty expertise or opportunities in the profession.

ID 4720 Seminar in Interior Design (3)

Prereq.: ID 3752 or equivalent. Research, discussions and presentations related to contemporary issues in interior design.

ID 4741 History of Interior Design (3)

Development of interior design; decoration and furnishings throughout history; examining design as an expression of cultural values and its social, industrial and technological influences.

ID 4742 Interior Design Contemporary Issues and Theory (3)

Research, discussions and presentations related to the contemporary issues in interior design.

ID 4751 Interior Component Design (3)

Prereq.: ID 2751 or equivalent. 1 hr. lecture; 4 hrs. studio. Design, materials and construction techniques of interior components; scale, model and computer-simulated design prototypes.

ID 4754 Interior Design Studio V (4)

Prereq.: ID 3753 or equivalent. 8 hrs. studio. Advanced application of the design process; development of comprehensive solutions to complex interior design problems.

ID 4755 Interior Design Studio VI (4)

Prereq.: ID 4754 or equivalent. Concurrent enrollment in ID 4756. 8 hrs. studio. Design synthesis in a comprehensive capstone project.

ID 4756 Independent Study Project (3)

Prereq.: ID 4720. Concurrent enrollment in ID 4755. 6 hrs. studio. Execution of a project selected by the advanced student with guidance from an advisory committee.

ID 4758 Advanced Studies in Interior Design (1-6)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Advanced studio work in a predetermined area of specialization at upper level status.

ID 4761 Professional Practice (3)

Prereq.: senior standing in the major or consent of instructor. Entering the profession; interior design business practices; ethics and project management.

ID 4765 Interior Design Professional Residency (6)

Prereq.: completion of all 2000-level interior design courses and consent of instructor. Pass-fail grading. At least 320 hours of work per semester (or semester and summer session) supervised by an interior design faculty member and a professional designer in an approved firm.

ID 4772 Sustainable Issues (3)

Credit will not be given for this course and CM 4302. Prereq.: consent of instructor. Sustainable issues in the built environment for applications pertinent to interiors; new construction and adaptive reuse of existing buildings.

ID 4786 Advanced Computer Visualization (3)

Prereq.: admission to professional program or permission of instructor. 1 hr. lecture; 4 hrs. lab. Advanced topics in computer drafting and three-dimensional modeling for spatial designers.

Industrial Engineering

IE 1002 Industrial Engineering Fundamentals (3)

Introduction to industrial engineering design process and concepts.

IE 2060 Introduction to the Use of Computers (3)

Prereq.: eligibility to take MATH 1550 or equivalent and credit or registration in IE 1002. 2 hrs. lecture; 3 hrs. lab. Principles of digital programming; application of subroutines; application of electronic computers to typical engineering problems; OS operation, Microsoft Office, and Groupware.

IE 2400 Methods and Systems Engineering (3)

Prereq.: Credit or registration in IE 1002. 2 hrs. lecture; 3 hrs. lab. System and work design concepts; time studies; performance rating and allowances; standard and pre-determined times; work methods improvement; design of manual work, equipment and tools and work environments; line balancing; manpower determinations, job analysis and incentives; business systems analysis, lean and value analysis.

IE 3201 Principles of Engineering Economy (3)

Planning economy studies for decision-making, including considerations of rate of return, cost and yield studies, depreciation and tax relationships, increment costs, replacement and introduction to multivariate alternative studies.

IE 3302 Engineering Statistics (3)

Prereq.: grade of C or better required in MATH 1552 and PHYS 2112 or CSC 2259. Probability, discrete and continuous distributions, functions of random variables, estimation theory, tests of hypotheses including goodness-of-fit and independence.

IE 3520 Supply Chain Logistics I (3)

Prereq.: IE 2400, MATH 2090; credit or registration in IE 3302. Introduction to resources and systems; Logistics resource optimization: linear programming; Logistics network and flow problems: transportation problems, shortest path and vehicle routing, maximum flow problems; project and resources management and operations sequencing and resource scheduling.

IE 3699 Engineering Practice (3)

Prereq.: consent of instructor. Pass-fail grading. A minimum of 6 weeks of full-time employment in industry on Industrial Engineering related design problems. Selected engineering problems in an industrial environment.

IE 4113 Information Technology Project Management (3)

See ISDS 4113.

IE 4362 Advanced Engineering Statistics (3)

Prereq.: grade of C or better in IE 3302. Linear regression and correlation, curvilinear regression, analysis of variance and factorial experiments.

IE 4425 Information Systems Engineering (3)

Prereq.: credit or registration in IE 2060. 2 hrs. lecture; 3 hrs. lab. Analysis and design of information systems; projects relating comprehensive computer systems to typical industrial and service applications; ethics and professionalism.

IE 4426 Distributed Information Systems Engineering (3)

Prereq.: IE 4425 or equivalent. 2 hrs. lecture; 3 hrs. lab. Interfacing programs to databases; analysis and development of client-server applications in industrial and business settings; interfacing databases and industrial applications to the Internet; analysis, design and implementation of industrial and business networks.

IE 4453 Quality Control & Six Sigma (3)

Prereq.: grade of C or better in IE 3302. Principles and practice of quality assurance and control; theory of statistical sampling and control and related economic analysis; Quality Systems; Six Sigma principles and practice.

IE 4461 Human Factors Engineering (3)

Prereq.: credit or registration in IE 2400. 2 hrs. lecture; 3 hrs. lab. Human performance in human-machine systems, including information processing, display and control design, workplace design and environmental effects on worker performance.

IE 4462 Safety Engineering (3)

Occupational safety and health and accident prevention management; design and implementation of safety programs; cost analysis; control of hazardous physical and environmental conditions.

IE 4465 Biomechanics for Engineers (3)

See BE 4323.

IE 4466 Human Computer Interaction (3)

Prereq.: IE 2060 or equivalent. Systems approach to the identification, design, analysis and development of human-operated information processing systems; applications to practical problems in industry, military, health systems and education.

IE 4485 Systems Integration in Manufacturing (3)

Prereq.: IE 2060; EE 2950. 2 hrs. lecture; 3 hrs. lab. Principles and application of information technologies to monitoring, control and integration of manufacturing operations at all levels within the organization.

IE 4490 Engineering Maintenance Management (3)

Prereq.: IE 1002, IE 3302 and credit or registration in IE 4425. Design, operation and monitoring of a system to efficiently control maintenance costs; maintenance organization and systems, preventive maintenance, maintenance planning and scheduling, maintenance work measurement, labor performance measures and spare parts.

IE 4516 Plant and Systems Design (3)

Prereq.: IE 3201 and credit or registration in IE 3520 and IE 4113/ISDS 4113.

Machine loading, assembly balancing techniques, design of physical-manufacturing systems, integrating materials-handling systems into the plant, design of plant service systems, site and plant location and projects involving plant design using optimization techniques; ethics and professionalism.

IE 4520 Supply Chain Logistics II (3)

Prereq.: grade of C or better in IE 3520. Production logistics: forecasting, aggregate production, inventory systems and materials requirement planning; lean supply system and supply chain management; warehousing and distribution systems; supply chain information technologies and government policies/regulations.

IE 4530 Lean Manufacturing Systems (3)

Prereq.: IE 2060 and credit or registration in IE 3520 and IE 4362. 2 hrs. lecture; 3 hrs. lab. Principles of Lean Manufacturing Systems; Queuing Theory and Analysis; Measurement and Assessment-Industrial Process Mapping, Workflow Analysis; Improvement Activities-Process and Operational Variability Reduction, Resource Reduction, Work-in-Process Reduction, Waste Reduction, Zero Inventory and Just-in-time Production Systems; Design for Lean Manufacturing; Material and Shop Floor Flow Control; Simulation Modeling and Analysis of Lean Systems.

IE 4540 Reliability Engineering (3)

Prereq.: IE 3302. Reliability in design; reliability models; reliability assessment during pre-production development and testing; and special problems in maintenance, spare parts and Markov processes.

IE 4597 Industrial Engineering Capstone Design I (2)

Prereq.: IE 4425, IE 4453, IE 4461, IE 4520, ME 3633, senior standing in College of Engineering and credit or registration in IE 4516 and IE 4530. 1 hr. lecture; 3 hrs. lab. Senior design projects.

IE 4598 Industrial Engineering Capstone Design II (2)

Prereq.: IE 4597. 6 hrs. lab. Continuation of senior design projects from IE 4597.

IE 4785 Special Topics in Industrial Engineering (1-3)

Prereq.: senior standing and consent of department. May be taken for a max. of 6 hrs. of credit when topics vary. Two sections may be taken concurrently if topics vary. Topics in industrial engineering not sufficiently covered in other undergraduate courses.

IE 7211 Project Engineering (3)

Prereq.: IE 3201 or equivalent. Large-scale engineering construction or development projects from schematic to online condition.

IE 7425 Advanced Information Systems Engineering (3)

Prereq.: IE 4425 or equivalent. 2 hrs. lecture; 3 hrs. lab. Advanced concepts of information systems engineering with emphasis on middleware architectures/technologies for integrating databases; design issues and methodology for developing and implementing distributed information systems; and design and implementation of data-warehouses and online analytical processing (OLAP) systems.

IE 7428 Semantic Analysis (3)

Prereq.: IE 3302 and IE 4362 or equivalent. Automated determination of semantic content (a.k.a. meaning) of text and speech and applications to human-computer and human-machine interfaces and task automation.

IE 7455 Lean Process Improvement (3)

Philosophy and concepts of quality and process improvement, organization for quality, quality improvement (QI) tools and techniques, advanced QI techniques and quality improvement systems. Application of advanced Six Sigma and Lean tools and techniques to case studies related to the construction industry. Investigation, learning and application of current research related to the course topics.

IE 7464 Work Physiology (3)

Prereq.: IE 4461 or equivalent. Study of worker's physiological responses (cardiovascular, pulmonary, muscular) to work applicable to task design and evaluation, employee selection and placement and work-rest scheduling.

IE 7465 Occupational Biomechanics (3)

Prereq.: IE 4461 or equivalent. 2 hrs. lecture; 3 hrs. lab. Principles of biomechanics applied to human movement; applications to work systems such as manual materials handling and tool design.

IE 7466 Human Interaction with Computers (3)

Prereq.: IE 4461 or IE 4466 or equivalent. Ergonomics of the use of interactive computer systems; general characteristics and requirements of people-oriented computer systems from the perspective of different disciplines and tasks, e.g., text editing.

IE 7467 Cognitive Ergonomics and Work Environments (3)

Prereq.: IE 3302 and IE 4461 or equivalent. Topics in cognitive ergonomics relating to information processing, visual and auditory displays and aspects of the work environment such as noise, socio-technical systems and psychosocial factors. Application to various work settings including construction, healthcare and the service sector.

IE 7470 Artificial Intelligence Manufacturing Systems (3)

Prereq.: IE 4425 or equivalent. Application of artificial intelligence tools and techniques to computer integrated manufacturing systems including maintenance, product design, process planning, factory scheduling and control, robotics and intelligent warehouse systems.

IE 7541 Linear Programming Algorithms (3)

Prereq.: IE 3520 or equivalent. Optimization of linear objective functions subject to linear constraints; vector spaces, convex analysis, polyhedral sets; matrix versions of simplex, revised simplex, bounded variables; duality theory and primal-dual simplex algorithms; postoptimal and parametric analysis; decomposition and cutting plane algorithms.

IE 7561 Programming Methods in Operations Research (3)

Prereq.: IE 3520 or equivalent. Aspects of advanced programming methods for unconstrained and constrained problems; development of goal, zero-one, gert and multiple objective programming with application to industrial processes and planning.

IE 7565 Metaheuristics (3)

Prereq.: IE 3520 or equivalent. Introduction of the principles, algorithms and real world applications of metaheuristic algorithms

including projection based methods such as simulated annealing, tabu search, variable neighborhood search, guided local search, iterated local search and population based methods such as particle swarm optimization, differential evolution, ant colony optimization, genetic algorithm and evolutionary programming.

IE 7722 Special Topics in Industrial Engineering (3)

May be taken for a max. of 12 sem. Hrs. when topics vary. Special topic courses in specialized areas such as design and analysis of complex production systems, supply-chain control, maintenance, quality control, reliability, ergonomics and human-computer interaction, information systems, safety and construction management.

IE 7724 Independent Study in Industrial Engineering (1-3)

Prereq.: consent of department. May be taken for a max. of 6 sem. hrs. of credit. Independent study in specialized areas such as design and analysis of complex production systems, supply-chain control, maintenance, quality control, reliability, ergonomics and human-computer interaction, information systems, safety and construction management.

IE 7762 Supply Chain Systems (3)

Prereq.: IE 3520 or IE 4520 or equivalent. Components in supply chain systems; product life-cycle modeling, rotational production and supply, integrated component supply systems, multi-source supplier and buyer systems, just-in-time supply chain systems, warehousing and distribution systems, supply transportation system and information technology for supply chain systems.

IE 7764 Logistics & Distribution Systems (3)

Prereq.: IE 3520 and IE 4520 or equivalent. Concept of logistics and distribution, large scale operational logistics, materials refurbishing logistics, warehousing logistics, designing logistics network and distribution systems, convoy movements, long- and short-haul freight transportation and industrial practices.

IE 7765 Lean Production Systems (3)

Prereq.: IE 3520 or IE 4520 or equivalent. Principles and components of lean production systems; industrial process mapping, workflow analysis; resource reduction; market characterization, logistics information and error propagation; reduction of work-in-process, waster reduction, zero inventory and just-in-time production systems; material flow control; process and operational variability reduction; role of buffers and process stabilization.

IE 7768 Sequencing and Scheduling (3)

Prereq.: IE 3520 or IE 4520 or equivalent. Measures of scheduling; deterministic models for single and parallel machines, job shops, flow shops, and open shops; stochastic scheduling models for machines, job shops, flow shops and open shops; computational complexity and industrial applications.

IE 7771 Design of Manufacturing Systems (3)

Prereq.: IE 3520 or IE 4520 or equivalent. Principles in modeling, analysis, design and operations; mass production, cellular manufacturing, machine location and layout, job routing and loading strategy; material handling and storage/retrieval systems.

IE 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

International Studies

INTL 2000 Contemporary Global Issues (3)

This is a General Education course. Survey of current world issues from an interdisciplinary perspective.

INTL 3001 Gateway to International Studies (3)

Prereq.: ANTH 1003 or ANTH 2051, ECON 2030, GEOG 1001 or GEOG 1003, HIST 1007, POLI 2053 or POLI 2057. Required for all international studies majors. Modernity, colonialism and globalization in regional perspective.

INTL 3002 Independent Study in International Studies (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Independent study relevant to the field of international studies.

INTL 3092 Fundamentalisms and Religious Nationalism (3)

See REL 3092.

INTL 3099 Undergraduate Internship in International Studies (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Open to undergraduate students approved by the International Studies Program. May be counted toward the total number of hours required for a major in International Studies but not toward fulfilling field requirements. Program of study, research and work in governmental or private agencies concerned with international policy.

INTL 3786 Religion of Islam (3)

See REL 3786.

INTL 3991 Study Abroad in Africa (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of Africa.

INTL 3992 Study Abroad in the Middle East (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of the Middle East.

INTL 3993 Study Abroad in Asia (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of Asia.

INTL 3994 Study Abroad in Europe (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of Europe.

INTL 3995 Study Abroad in Latin America (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of Latin America.

INTL 3996 Study Abroad in Russia and Central Asia (1-6)

May be repeated for up to 12 hours credit when topics vary. Studies in the history, culture, economics, politics or geography of Russia and/or Central Asia.

INTL 4002 South Asian Society, Polity and Culture (3)

Cross-listed with ANTH 4002, GEOG 4002, and REL 4001. Historical anthropology of South Asia examining the four major cultural traditions (Hindu/Buddhist, Islamic, British and nationalist) which currently shape the politics of nationalism, development, ethnicity, caste and gender in the region.

INTL 4003 International Studies Senior Seminar (3)

Prereq.: INTL 3001 and 9 hrs. of additional upper level courses in an area of concentration. Required for all international studies majors, seniors only. Advanced theory and case studies of globalization in an interdisciplinary perspective.

INTL 4033 Geography of Central Asia and Afghanistan (3)

See GEOG 4033.

INTL 4051 North Africa and the Middle East (3)

See GEOG 4051.

INTL 4096 The Modern Middle East (3)

See HIST 4096.

INTL 4100 Migration, Diasporas and Identity (3)

An interdisciplinary survey of global migration in the modern era and the resultant subnational and transnational forms of community, identity, and subjectivity: colonists, exiles, immigrants, refugees and transients.

INTL 4997 Special Topics in International Studies (3)

May be repeated for a max. of 6 hrs. of credit when topics vary.

Information Systems & Decision Sciences

ISDS 1100 Introduction to Management Information Systems (3)

[LCCN: CBUS 2203, Computer Applications] *An honors course, ISDS 1101, is also available. Credit will not be given for both this course and ISDS 1101, ISDS 1102, CSC 1100, LIS 2001, EXST 2000. 1 hr. lecture; 4 hrs. lab.* Examine the expanding role of information technology in organizations including the development and use of information systems, hardware and software, the strategic impact of IT and the nature of the IT career; utilization of management information systems to improve managerial decision-making.

ISDS 1101 HONORS: Introduction to Management Information Systems (3)

Same as ISDS 1100 or ISDS 1102, with special honors emphasis for qualified students. Credit will not be given for both this course and ISDS 1100 or ISDS 1102.

ISDS 1102 Introduction to Management Information Systems for Business Majors (3)

An honors course, ISDS 1101, is also available. Credit will not be given for both this course and ISDS 1100 and ISDS 1101. Role of information technology in business including the development and use of information systems, hardware and software, the strategic impact of IT for businesses and the nature of the IT career; utilization of management information systems to improve managerial decision-making.

ISDS 2000 Introduction to Business Statistics (3)

[LCCN: CMAT 1303, CBUS 2303, Introductory Statistics, Business Statistical Methods I] *An honors course, ISDS 2010, is*

also available. Prereq.: MATH 1431 or equivalent. Credit will not be given for both this course and ISDS 2010. Statistical description and inference; descriptive statistics, sampling, basic probability theory; probability distributions, including normal and binomial; sampling distributions; inferential statistics including estimation, one- and two-sample hypothesis tests for means and chi-square test of independence.

ISDS 2001 Statistical Methods and Models (3)

[LCCN: CBUS 2313, Business Statistical Methods II] *An honors course, ISDS 2011, is also available. Prereq.: ISDS 2000 or equivalent. Continuation of ISDS 2000. Credit will not be given for both this and ISDS 2011. Advanced statistical methods and decision models including ANOVA and linear regression analysis; management science models such as utility functions, decision analysis, math programming, waiting line models and simulation.*

ISDS 2010 HONORS: Introduction to Business Statistics (3)

Same as ISDS 2000, with special honors emphasis for qualified students. Credit will not be given for this course and ISDS 2000.

ISDS 2011 HONORS: Statistical Methods and Models (3)

Same as ISDS 2001, with special honors emphasis for qualified students. Credit will not be given for this course and ISDS 2001.

ISDS 3070 Independent Reading and Research in Information Systems and Decision Sciences (1-6)

Prereq.: ISDS 3100 and consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Student is responsible for registering with a faculty member and selecting an area of reading and/or research.

ISDS 3075 Internship in Information Systems and Decision Sciences (3)

Prereq.: permission of instructor and department chair required. Pass/fail grading. At least the equivalent of 144 hours per semester (3 credits) of learning experience in information systems under the general supervision of an ISDS faculty member and direct supervision of an information systems or decision sciences professional. Grading based on the faculty member's evaluation, a written report by the professional supervisor and a written report by the student.

ISDS 3100 Management of Information Resources (3)

Prereq.: ISDS 1100 or ISDS 1101 or ISDS 1102. Information as a resource; issues in information resource management; elements of information systems; development and maintenance of information systems; controlling information resources.

ISDS 3105 Internet Development Tools (3)

Prereq.: ISDS 1100 or equivalent. Understanding of the Internet and its structure for use in business; technologies employed to develop Internet applications; development of business applications for the Internet.

ISDS 3107 Beginning Programming (3)

Prereq.: ISDS 1100 or ISDS 1101 or ISDS 1102. Fundamentals of programming, program design, application development interfaces, debugging, testing and implementation.

ISDS 3110 Database Processing for Management (3)

Prereq.: ISDS 4113 or concurrent enrollment. Structure and function of managerial databases; design options and implementation of database management systems in the firm; laboratory practice includes use of a particular soft-ware system.

ISDS 3115 Introduction to Operations Management (3)

[LCCN: CMGM 3213, Production & Operations (Upper Level)] *An honors course, ISDS 3117, is also available. Prereq.: ISDS 2001 or equivalent. Credit will not be given for both this course and ISDS 3117.* Principles and methodologies concerning productivity and quality of manufacturing and service organizations; production and service systems design; process and capacity design; total quality management; systems for just-in-time and purchasing management; inventory and materials management.

ISDS 3117 HONORS: Introduction to Operations Management (3)

Same as ISDS 3115, with special honors emphasis for qualified students. Credit will not be given for this course and ISDS 3115.

ISDS 3120 Management of the IT Function (3)

Issues in managing the Information Technology (IT) function, including the discussion of how technology has underpinned the “new Economy,” formulating an IT strategy, structuring and managing the IT function and emerging trends in IT.

ISDS 3200 Advanced Business Programming (3)

Prereq.: ISDS 3107 and ISDS 3110. Computer programming methods for business systems emphasizing contemporary programming environments and applications development interfaces.

ISDS 4112 Data Warehousing (3)

Prereq.: ISDS 3110. Data warehouses for business; topics include: business intelligence, data charts, multidimensional data, data mining, Web-enabled data warehouse, knowledge management.

ISDS 4113 Information Technology Project Management (3)

Prereq.: credit or registration in ISDS 3100 or consent of instructor. Also offered as IE 4113. Credit will not be given for this course and IE 4113. Topics on effectively managing information technology projects including: setting goals and objectives; work breakdown structures; project scheduling; managing project resources; evaluation and review; incentives and qualitative analysis; project accounting; extensive use of cases involving hands-on computer analyses with state-of-the-art project management software.

ISDS 4117 Management of E-Commerce and Internet Information Systems (3)

Management of e-commerce and Internet systems including: business models and strategies; performance and evaluation; navigation and content; security, trust and legal issues; integration of managerial, technical, and legal perspectives for intra-business systems, B2B systems, e-supply chains, portals, B2C systems, electronic markets and e-government.

ISDS 4118 Web Analytics (3)

Prereq.: ISDS 3100. Principles of web analytics; key performance indicators, benchmarks, A/B testing, personalized content, customer-centric website design, process flow analysis, usability, research design and statistical methods.

ISDS 4120 Business Data Communications (3)

Prereq.: ISDS 3100 or CSC 1350. Telecommunications in business, including both voice and data communication, technical details (hardware, software, protocols, network configurations), network management and security issues.

ISDS 4123 Computer and Networking Security (3)

Prereq.: ISDS 4120. Security management, corporate risk assessment, access control, authentication, transmission control protocol and Internet protocol packet content analysis, firewall hardware and software, types of encryption, cryptographic systems, application security issues and laws governing security and privacy.

ISDS 4125 Analysis and Design of Management Information Systems (3)

Prereq.: ISDS 3110, ISDS 3200. Design philosophies and techniques for the creation of information systems for management decision-making; conceptual design of actual information systems.

ISDS 4141 Introduction to Data Mining (3)

Prereq.: ISDS 3100. Fundamental methodology and techniques used in data mining, with particular emphasis on business applications; topics include market basket analysis, memory-based reasoning, cluster detection, link analysis, decision trees and rule induction, neural networks and genetic algorithms.

ISDS 4160 Sourcing in China (3)

Network clusters; cost competitiveness; choosing strategic partners and suppliers; negotiation style; brand, design and manufacturing; factory and supply chain audits; protecting intellectual property; vulnerability assessments; global sourcing repositioning; sourcing practices and cases in industries.

ISDS 4168 Supply Chain Management (3)

Planning, implementing, and controlling the efficient, cost-effective flow and storage of raw material, in-process products, finished products and related information in a supply channel; resource/material management; supplier strategy; inventory planning and control; just-in-time systems; customer service; logistics and interfaces with other functional areas; emphasis on concepts, model development and analysis.

ISDS 4180 Business Analysis in Practice (3)

Prereq.: ISDS 4112 and ISDS 4141. Contemporary problems encountered by the business analysis professional; emphasis on case analysis and use of business analysis skills and computer technology to solve business problems.

ISDS 4244 Information Systems Auditing (3)

Credit will not be given for this course and ACCT 4244 or ACCT 7244. The class will focus on the IS Audit process, IT Governance, Systems and Infrastructure Life Cycle Management, Service Delivery and Support, Protection of Information Assets and Business Continuity and Disaster Recovery. Emphasis will be placed on current practices and technologies used in today's IT Audit environment.

ISDS 5010 Statistical Methods for Public Administration (3)

Also offered as PADM 5010. Prereq.: college algebra. Open only to students in the MPA program. 2 hrs. lecture; 2 hrs. lab.

ISDS 7024 Advanced Statistical Analysis for Research I (3)

Prereq.: proficiency in calculus, linear algebra, basic statistical methods and computer programming. Methods of statistical inference; statistical estimation; testing hypotheses about single and multiple means and proportions; simple and multiple linear regression; design of simple random, stratified, and cluster samples; extensive use of statistical computer programs.

ISDS 7025 Advanced Statistical Analysis for Research II (3)

Prereq.: ISDS 7024 or equivalent. Continuation of ISDS 7024. Advanced regression analysis; experimental design and analysis of variance; nonparametric methods; multivariate techniques; extensive use of statistical computer programs.

ISDS 7070 Seminar in Advanced Business Problems (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Special topics in statistics and quantitative methods.

ISDS 7080 Survey of Information Systems Research (3)

Prereq.: advanced PhD standing or consent of instructor. Exploration of current research streams in information systems; relationships of IS to other disciplines; historical overview of the field.

ISDS 7081 Critical Analysis of Information Systems Research (3)

Prereq.: advanced PhD standing or consent of instructor. Development of skills in theory building, research design, writing research papers and evaluating research in the field of information systems.

ISDS 7103 Survey of Operations Research: Stochastic Methods (3)

Extensions of decision theory, game theory, dynamic programming, Markovian decision processes, reliability models and queuing models; probabilistic methods in operations research.

ISDS 7150 Emerging Markets Supply Chain Management (3)

Prereq.: BADM 7120 or permission of instructor. Emerging markets, global supply chain, entrepreneurial opportunities, retail global supply chain opportunities, product life cycle and global supply chain opportunities, supplier clusters and emerging markets opportunities, information technology and global supply chain opportunities, life-saving supply chain and disaster management, greening the global supply chain, industry studies, opportunities for growing Louisiana economy.

ISDS 7220 Supply Chain Management (3)

Prereq.: BADM 7120 or equivalent. Supply chain process analysis and control; critical issues in revolutionizing management of the entire supply chain; system productivity analysis, demand management, inventory management, distribution planning, integration in supply chain; emphasis on case study, spreadsheets and software applications; network design, warehouse location, outsourcing, global supply chain and information, EDI and DSS technologies in supply chain management; case study and SCM software.

ISDS 7230 Project Management (3)

Prereq.: BADM 7120 or equivalent. Topics of effectively managing projects including setting goals and objectives, project planning, evaluation and review; incentives and qualitative analysis and project accounting; extensive use of cases involving hands-on computer analyses with state-of-the-art project management software.

ISDS 7501 Information Systems (3)

Prereq.: ISDS 1100 or equivalent. Contemporary topics in information systems; survey of information system analysis and design; introduction to business data communication; database management systems and knowledge based systems; enterprise-wide systems and information systems control.

ISDS 7510 Database Management (3)

Prereq.: BADM 7050. Analysis, design and implementation of databases based on the relational database model; data modeling using entity-relationship (E-R) diagramming; logical and physical database design; SQL; hardware/software architecture considerations; data and database administration; emerging database technologies and advanced database applications.

ISDS 7511 Advanced Database Management (3)

Prereq.: ISDS 7510 or equivalent. Decision support systems, online analytical processing, multidimensional data modeling, web-enabled data warehousing, data marts, data mining, knowledge management, Internet business intelligence.

ISDS 7520 Network Information Systems (3)

Prereq.: BADM 7050. Broad overview of network technologies including protocols, network operating systems and network management; LAN, WAN design; Internet technology; network security.

ISDS 7530 Information Systems Analysis and Design (3)

Prereq.: BADM 7050; ISDS 7510. Both courses may be taken concurrently. Analysis and design of information systems from a management perspective; software development methodology; topics include requirements determination; feasibility determination; project management; evaluation of a software development strategy and application design; modeling using ER diagrams and DFDs; systems implementation.

ISDS 7535 Information Technology Management (3)

Prereq.: BADM 7050. Management of the organization's information technology (IT) resources; planning and management of IT strategy, applications; hardware/software infrastructure, information resources, and IT professionals; organization and governance of the IT function, IT policies and standards, measurement of IT investments and returns and deployment of new information technologies.

ISDS 7540 Electronic Commerce (3)

Prereq.: BADM 7050. Use of information technology and the Internet in creating new forms of business organization; creating a marketspace; disintermediation/ reintermediation; and virtual organization.

ISDS 7550 Enterprise Systems (3)

Prereq.: BADM 7050. Study of the broad area of Integrated Enterprise-wide Systems; emphasis on features and capabilities of enterprise systems and their related technologies, the methodologies used to implement these systems in organizations and the implications of their deployment in organizations.

ISDS 7560 Social and Organizational Issues in MIS (3)

Prereq.: BADM 7050. Impact of electronic communities on organizations; implications of design choices on business; ethical considerations.

ISDS 7910 Contemporary Issues in Production/Operations Management (3)

Prereq.: advanced PhD standing or consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Philosophical foundations and con-temporary issues in production/operations management.

ISDS 7920 Contemporary Issues in Management Information Systems (3)

Prereq.: advanced PhD standing or consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Philosophical foundations and contemporary issues in management information systems.

ISDS 7950 Research Seminar in Information Systems Topics (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Required for all PhD students. Contemporary research and critical issues in information systems.

ISDS 7990 Project (3-6)

Prereq.: permission of instructor. Pass-fail grading. May be taken for a max. of 6 hrs. of credit.

ISDS 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

ISDS 8900 Pre-dissertation Research (1-9)

May be repeated for credit.

ISDS 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading.

Italian

ITAL 1001 Elementary Italian (4)

This is a General Education course. *Supplementary work in language laboratory. Native speakers of Italian will not receive credit for this course.* Basic lexicon and structure of Italian; emphasis on communicative language use.

ITAL 1002 Elementary Italian (4)

This is a General Education course. *Prereq.: ITAL 1001. Supplementary work in language laboratory. Native speakers of Italian will not receive credit for this course.*

Basic lexicon and structure of Italian; emphasis on communicative language use.

ITAL 2002 Italian for Travelers (3)

Does not count toward satisfying the foreign language requirement for undergraduates. Basic communication patterns; practical everyday vocabulary; exercises in comprehension and conversation.

ITAL 2101 Intermediate Italian (3)

This is a General Education course. *Prereq.: ITAL 1002. Supplementary work in language laboratory. Native speakers of Italian will not receive credit for this course.* Basic lexicon and structure of Italian; emphasis on communicative language use.

ITAL 2102 Intermediate Italian (3)

This is a General Education course. *Prereq.: ITAL 2101. Supplementary work in language laboratory. Native speakers of Italian will not receive credit for this course.*

Basic lexicon and structure of Italian; emphasis on communicative language use.

ITAL 2155 Readings in Italian Literature (3)

This is a General Education course. *Prereq.: ITAL 2102. Native speakers of Italian will not receive credit for this course.* Readings in contemporary and older literature of Italy; emphasis on comprehension as well as oral and written expression.

ITAL 3001 Italian Culture and Civilization (3)

Taught in English. Italian culture and civilization from the medieval era to present.

ITAL 3058 Advanced Oral Communication (3)

Prereq.: ITAL 2102. Enhancement of oral communication skills through debating contemporary issues.

ITAL 3071 Survey of Italian Literature (3)

Prereq.: ITAL 2155. Development of Italian literature from the beginnings to the Renaissance.

ITAL 3072 Survey of Italian Literature (3)

Prereq.: Prereq: ITAL 2155. Continuation of ITAL 3071. Principal authors and literary movements from the Renaissance to the present.

ITAL 3502 Special Topics in Italian Cinema (3)

Also offered as FMA 3502. May be taken for 6 sem. hrs. of credit when topics vary. In-depth study of various aspects of Italian cinema from different periods.

ITAL 4051 Dante (3)

Dante, with emphasis on the Inferno.

ITAL 4100 Special Topics in Italian Studies (3)

Prereq.: 3000-level Italian course or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Study of various aspects of Italian culture and literature from different periods.

ITAL 4915 Independent Work (1-3)

May be taken for a max. of 3 sem. hrs. credit. Permission of department required. Readings in Italian literature directed by a senior faculty member.

Japanese

JAPN 3801 Traditional East Asian Literature (3)

See CHIN 3801.

Kinesiology: Basic Activity Courses

KIN 1124 Tennis (1 sem. hr.)

Pass/fail grading.

KIN 1125 Golf (1 sem. hr.)

Pass/fail grading.

KIN 1129 Badminton (1 sem. hr.)

Pass/fail grading.

KIN 1132 Ballroom Dance (1 sem. hr.)

Pass/fail grading.

KIN 1135 Golf for Business and Life (1 sem. hr.)

Pass/fail grading.

KIN 1142 Conditioning Exercises (1 sem. hr.)

Pass/fail grading.

KIN 1144 Aerobic Dance (1 sem. hr.)

Pass/fail grading.

KIN 1146 Weight Training (1 sem. hr.)

Pass/fail grading.

KIN 1151 Racquetball (1 sem. hr.)

Pass/fail grading.

KIN 1152 Tai Chi I (1 sem. hr.)

Pass/fail grading.

KIN 1155 Jogging (1 sem. hr.)

Pass/fail grading.

KIN 1156 Outdoor Living Skills (1 sem. hr.)

Pass/fail grading. American Red Cross Standard First Aid Certificate recommended.

KIN 1157 Aerobic Swimming (1 sem. hr.)

Prereq.: intermediate swimming skills. Pass/fail grading.

KIN 1158 Canoeing (1 sem. hr.)

Prereq.: must be able to swim 50 yards with a personal flotation device; tread water for one minute and swim 50 yards without a personal flotation device. Pass/fail grading.

KIN 1224 Tennis (1 sem. hr.)

Pass/fail grading.

KIN 1244 Aerobic Dance (1 sem. hr.)

Pass/fail grading.

KIN 1246 Weightlifting (1 sem. hr.)

Pass/fail grading.

KIN 1251 Racquetball (1 sem. hr.)

Pass/fail grading.

KIN 1255 Jogging (1 sem. hr.)

Pass/fail grading.

KIN 1257 Aerobic Swimming (1 sem. hr.)

Pass/fail grading.

KIN 1336 Swimming (1 sem. hr.)

Pass/fail grading.

KIN 1338 Water Safety Instructor's Course (1 sem. hr.)

Prereq.: valid Advanced Lifesaving Certificate. Pass/fail grading.

Kinesiology: Professional Courses

KIN 1405 Track and Field (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1406 Basketball (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1407 Softball (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1408 Volleyball (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1409 Flag Football (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1410 Field Sports (1)

For kinesiology majors or minors. 3 hrs. lab.

KIN 1600 Individual Wellness and Public Health (3)

This is a General Education course. Content and theory related to basic health information; critical health issues; economic, political and cultural influences on health and wellness; improving and maintaining optimal health and wellness.

KIN 1801 Movement Fundamentals for Physical Activity (2)

For kinesiology majors. 1 hr. lecture; 2 hrs. lab. Movement concepts associated with space and time and how these concepts can be organized into a learning environment.

KIN 1802 Individual/Lifetime Activities (2)

For kinesiology majors and minors. 1 hr. lecture; 2 hrs. lab. Identification, analysis and practice of skills, techniques and fundamental concepts associated with lifetime activities.

KIN 1803 Team Activities (2)

For kinesiology majors and minors. 1 hr. lecture; 2 hrs. lab. Identification, analysis and practice of skills, techniques and fundamental concepts associated with team activities.

KIN 1804 Aerobic and Strength Activities (2)

For kinesiology majors and minors. 1 hr. lecture; 2 hrs. lab. Major concepts of aerobic and strength training including safety, technique, age appropriate activities and training principles.

KIN 1999 Special Topics (1)

May be taken for a max. of 4 sem. hrs. credit when topics vary. 3 hrs. lab. Identification, analysis and practice of skills and techniques fundamental to sports; rules, strategies and appropriate safety procedures.

KIN 2500 Human Anatomy (3)

Micro and macroscopic study of the human body.

KIN 2501 History and Philosophy of Kinesiology (3)

Developments in kinesiology and health from ancient times to the present.

KIN 2502 Practicum in Sports Studies (3)

Prereq.: For students minoring in sports studies. Pass-fail grading. Credit will not be given for both this course, KIN 2513, and KIN 2999. Observation and practical application in a sport or sport-related setting. Students work in a professional capacity under the guidance of an on-site coordinator.

KIN 2503 Basic Athletic Training (2)

1 hr. lecture; 2 hrs. lab. Athletic training room procedure; first aid treatment of injuries; use of athletic training room equipment; protective strapping; padding for all sports.

KIN 2504 Principles of Conditioning (3)

2 hrs. lecture; 2 hrs. lab. Methods and concepts of training and conditioning; physical fitness activities and current trends; participation in a fitness training lab including fitness assessments and training methods designed to promote fitness; planning physical fitness programs for community and commercial organizations, education institutions and social agencies.

KIN 2505 Orthopedic Injury Evaluation Techniques I (3)

Prereq.: BIOL 1201, BIOL 1208; KIN 2503 or permission of instructor.

2 hrs. lecture; 2 hrs. lab. Specialized course in the initial on-field and clinical evaluation of orthopedic injuries and conditions of the lower extremities and the spine, including emergency care procedures and signs/symptoms/treatment of various injuries/conditions.

KIN 2506 Orthopedic Injury Evaluation Techniques II (3)

Prereq.: BIOL 1202, BIOL 1209; KIN 2503, KIN 2505 or permission of instructor.

Specialized course in the initial on-field and clinical evaluation of orthopedic injuries and conditions of the upper extremities, cervical spine, head and face; including emergency care procedures and signs/symptoms/treatment of various injuries/conditions.

KIN 2509 Medical Terminology for Kinesiology (3)

Majors only or permission of instructor. In-depth introduction to medical terminology, with a focus on body systems, medical specialties and medical communication.

KIN 2510 Introduction to Sport and Leisure Administration (3)

Introduction to the academic and professional field of sport administration.

KIN 2511 Sports Officiating (2)

Prereq.: proficiency in sports indicated. 1 hr. lecture; 2 hrs. lab. Rules interpretation and techniques of officiating basketball, volleyball and softball.

KIN 2512 Classroom Culture and Organization (3)

2 hrs. lecture; 2 hrs. lab. The social learning environment and organization of the physical education classroom. Emphasis on behavior management, individual and group motivation and integration of technology.

KIN 2513 Professional Development in Sport Administration (3)

Credit will not be given for this course and KIN 2502. Designed to provide an opportunity for the student to grow professionally; to enhance the educational learning process through hands-on opportunities; and to gain an appreciation of the role, duties, responsibilities, and nature of the work in the sport industry.

KIN 2516 The Coaching of Basketball (2)

1 hr. lecture; 2 hrs. lab. Principles and techniques of coaching basketball; organization and administration of practice and various levels of competition.

KIN 2518 The Coaching of Volleyball (2)

1 hr. lecture; 2 hrs. lab. Techniques of coaching volleyball; organization and administration of practice and various levels of competition.

KIN 2525 Practicum in the Coaching of Individual and Team Sports (1-3)

May be taken for credit when sports vary. 3-9 hrs. lab.

KIN 2526 Psychology of Coaching (3)

Psychological perspectives applied to the athletic situation; coaching personalities, athletic personalities, psychological injuries, motivation, mental preparation, relaxation techniques and stereotypes in athletics.

KIN 2530 Sport in Society (3)

Interdisciplinary study of sport as a mirror of society reflecting the dynamics of human social existence; emphasizes process through which individuals formulate their identity from youth to old age.

KIN 2540 Introducing Physical Education for Individuals with Disabilities (3)

Principles and practices of physical activity opportunities for people with disabilities; laws affecting those with disabilities; motor abilities of individuals with disabilities; adjusting programs to suit the needs and interests of these individuals.

KIN 2577 Health and Physical Education for the Elementary School (3)

2 hrs. lecture; 2 hrs. lab. Basic principles and concepts of a healthy lifestyle; nutrition, fitness, exercise; study and analysis of movement.

KIN 2600 Human Sexuality (3)

Historical, semantic, religious, social, medical and comparative cultural aspects of human sexuality from childhood to senility.

KIN 2601 First Aid (1)

1 hr. lecture; 1 hr. lab.

KIN 2602 Methods, Materials and Content in Health Education for the Elementary School (3)

Theoretical foundations, essential content and pedagogical practices for K-8 Health Education.

KIN 2603 Consumer Health (3)

Major consumer health problems; selecting, purchasing and financing health services and products.

KIN 2604 Issues in Mental Health (3)

Issues in mental health; stress, depression, alienation, family violence, suicide, death and dying.

KIN 2900 Independent Study (1-3)

Prereq.: Permission of instructor. May be taken for a max. of 6 sem. hrs. of credit. Reading, research or field work on selected topics.

KIN 2999 Internship in Leisure, Recreation and Sport (6)

Prereq.: Permission of instructor and concurrent enrollment in KIN 2900. Pass/fail grading. Credit will not be given for both this course and KIN 2502. Gaining first-hand knowledge and practical hands-on experience in recreational or sport settings.

KIN 3500 Human Anatomy Laboratory (1)

Prereq.: KIN 2500 or consent of instructor. Computer based study. 2 hrs. lab. Interactive software of the human body; gross anatomy with emphasis on muscle, bone, nerve and blood vessels.

KIN 3501 Advanced Athletic Training (3)

Prereq.: KIN 2503. 2 hrs. lecture; 2 hrs. lab. Advanced topics in athletic training; advanced taping techniques; emergency care protocols including spine boarding, crutch fitting; and splintings; proper use and indications of therapeutic modalities.

KIN 3502 Tests and Measurements in Kinesiology (3)

2 hrs. lecture; 2 hrs. lab. Principles of measurement and evaluation in kinesiology and health; emphasis on criteria for selection and evaluation of tests and techniques of testing; analyzing and interpreting motor performance and cognitive test scores.

KIN 3505 Practicum in Athletic Training (1)

Prereq.: KIN 2503. May be taken for a max. of 6 sem. hrs. credit. 2 hrs. clinic/practicum.

KIN 3507 The Olympic Games: Ancient and Modern (3)

Origins, growth, politicalization and governance of the games.

KIN 3508 Organization and Administration in Athletic Training (3)

Organization and administration of an Athletic Training Program including budget, facilities, equipment, insurance, legal aspects, records, employment, personnel and structure of the National Athletic Trainer's Association.

KIN 3509 Therapeutic Exercise and Rehabilitation in Athletic Training (3)

Prereq.: KIN 2505, KIN 2506 or permission of instructor.

2 hrs. lecture; 2 hrs. lab. Basic components of designing and implementing physical rehabilitation programs; rationale use and application of therapeutic exercise techniques in injury rehabilitation.

KIN 3512 Therapeutic Modalities (3)

permission of instructor. Cognitive, psychomotor and affective skills for therapeutic modalities in treatment of athletic injuries; topics include principles of tissue trauma, wound healing, pain mechanism, thermal modalities, mechanical modalities and electromagnetic modalities.

KIN 3513 Introduction to Motor Learning (3)

Motor skills learning principles that can be applied to instructional and rehabilitation situations; psychological and physiological characteristics that influence skill learning; behavioral changes related to the stages of skill learning; the influence of various types of practice conditions on skill learning.

KIN 3514 Biomechanical Basis of Kinesiology (3)

Prereq.: MATH 1022, KIN 2500, PHYS 2001 or equivalent. Education majors only. Anatomical and mechanical analysis of human movement; emphasis on structure and function of bone and muscle, statics, dynamics, kinematics, kinetics and projectile motion.

KIN 3515 The Physiological Basis of Activity (3)

Prereq.: KIN 2500, KIN 2504; BIOL 2160. Basic physiological concepts of the muscular, metabolic, cardiovascular and circulorespiratory systems; behavior of each system in relation to exercise; determination of normal and abnormal physical responses to exercise; development of a philosophy of scientific inquiry.

KIN 3519 Cadaver Prosection (1)

Prereq.: KIN 2500, for Kinesiology majors or consent of instructor. Active review of human anatomical structures using cadaveric tissues.

KIN 3525 Laboratory Techniques in Exercise Physiology (1)

Prereq.: credit or registration in KIN 3515. 2 hrs. lab. Laboratory sessions examining the physiological effect of different types of exercise on the functions of the human body.

KIN 3534 Scientific Basis for Exercise (3)

Prereq.: KIN 3515. 2 hrs. lecture; 2 hrs. lab. Historical development of chronic disease risk factors; contraindications and valid uses of exercise prescription.

KIN 3535 Exercise Testing and Prescription (3)

Prereq.: KIN 3525 and credit or concurrent enrollment in KIN 3534. For students in the fitness studies concentration. 2 hrs. lecture; 2 hrs. lab. Theory and practice of fitness testing, exercise prescription, health promotion and related concerns.

KIN 3541 Severe Disabilities and Physical Activity (3)

Prereq.: EDCI 2700 and KIN 2540. Substantial observations in schools required. Focus on individuals with severe intellectual, behavioral, physical and sensory disabilities.

KIN 3605 Health and the Aging Process (3)

Health conservation of human resources; emphasis on understanding attitudes and practices related to health in the aging process.

KIN 3608 Communicable and Noncommunicable Diseases (3)

Etiology, prophylaxis and control of communicable and noncommunicable diseases and impairments; cancer, diabetes, and cardiovascular, respiratory and sexually transmitted diseases.

KIN 3609 Methods of Teaching Wellness Education (3)

Prereq.: KIN 2512. 2 hrs. lecture; 2 hrs. lab. Requisite knowledge and skills for successful teaching of wellness education in K-12 settings.

KIN 3660 The Holistic Health Approach to Stress (3)

Sources of stress; evaluation of stress-related diseases; techniques for promoting stress reduction; prevention of stress-related diseases.

KIN 3800 Ethical and Legal Issues in Sport (3)

Introduction to basic ethical and legal principles required to successfully address managerial situations that arise in sport industry settings; ethical concepts and theories that provide the foundation for the rendering of comprehensive decisions, including but not limited to issues involving Title IX, the use of drugs, antitrust, labor, intellectual property and religion.

KIN 3801 Sport Strategies and Planning (3)

Prereq.: KIN 2513. Principles and procedures involved with strategies and planning of professional and intercollegiate athletics.

KIN 3802 Program and Event Management (3)

Prereq.: KIN 2513. Basic concepts pertaining to the production of amateur, professional and recreational sporting events.

KIN 3804 Financial Issues in Sport (3)

Prereq.: ACCT 2000. Application of sound financial concepts in sport management and sport operation.

KIN 3805 Sales and Sponsorship in Sport (3)

Focuses on the sales and sponsorship aspect of sport management through an introduction to the basic core concepts, presented with actual models relevant to working in sales and sponsorship in the competitive sport environment, and actual sales and sponsorship experience working with a sport organization.

KIN 4290 Sports Economics (3)

See ECON 4290.

KIN 4501 Special Topics in Kinesiology (3)

May be repeated for a max. of 6 sem. hrs. of credit when topics vary. For students interested in additional study in specific aspects of kinesiology.

KIN 4505 Practicum in Human Movement Science (3)

Prereq.: enrollment in the College of Human Sciences & Education; senior standing; KIN 2500, KIN 3513, KIN 3514. Pass/fail grading. May be taken for a max. of 6 sem. hrs. of credit. 6 hrs. lab. Observation and practice of skills, techniques and protocols of patient care within local clinics, hospitals, skill nursing facilities, development disability centers and private practices.

KIN 4509 Sports Supplements (3)

Introduction to federal regulations which enable supplements to be marketed; methods used to evaluate the benefits of supplements and processes used to analyze specific supplements used in sports.

KIN 4511 Techniques and Methods of Teaching Physical Education (3)

Prereq.: KIN 2504 and competency in four activities. Concurrent enrollment in KIN 4516. Education Majors only. 2 hrs. lecture; 3 hrs. lab. Microteaching and field experience required. Current teaching methods and materials in physical education, teaching styles, aids and formulation of lesson and unit plans.

KIN 4512 Lifespan Motor Development (3)

Analysis of changes in motor behavior from infancy to older adulthood; current theoretical perspectives; current issues; correlates of motor development.

KIN 4513 Facilities Management (3)

Preventive maintenance, facility planning, event administration, box office management, house and ground management, systems management, marketing, finance and personnel administration.

KIN 4515 Sports Seminar (3)

Trends and issues related to the development and maintenance of athletic abilities in a variety of sports.

KIN 4516 Curriculum Construction in Physical Education (3)

Concurrent enrollment in KIN 4511. Education Majors only. Curriculum construction and program content for elementary and secondary schools.

KIN 4517 Sports Administration (3)

Policies and practices in the administration of athletic programs in academic settings.

KIN 4518 Governance and Policy Development in Sport (3)

Analysis of governance structures of sport organizations and implications for policy development.

KIN 4519 Cadaver Dissection (3)

Prereq.: KIN 2500, for Kinesiology majors or consent of instructor. Active dissection of human cadavers.

KIN 4520 Psychosocial Aspects of Physical Activity (3)

Prereq.: senior or graduate standing. Psychological and sociological perspectives of physical activity; theories and research related to sport and exercise behavior; and psychological factors that influence involvement and performance in physical activity settings.

KIN 4525 Human Anatomy and Functional Impairment (3)

Prereq.: KIN 2500, KIN 3500 or consent of instructor. Anatomy of selected systems and the mechanisms and effects of impairment.

KIN 4526 The Physiology of Endurance Training (3)

Prereq.: by permission of instructor. 2 hrs. lec., 2 hrs. lab. Exploration of the physiological responses to endurance training. Application of physiological principles in a laboratory setting by performing standard tests and training for an endurance event.

KIN 4538 Practicum in Applied Fitness (6)

Prereq.: KIN 3534, KIN 3535. Pass-fail grading. For kinesiology majors. 12 hrs. lab. Practical application of exercise testing, exercise prescription and leadership.

KIN 4540 The Physical Education Curriculum for Children with Disabilities (3)

Prereq.: KIN 3541. Curriculum needs, implementation and evaluation, using the Louisiana State Regulations and P. E. Needs Assessment.

KIN 4571 Neuromotor Control of Human Movement (3)

Prereq.: KIN 2500, senior standing or permission of instructor. Muscle dynamics; sensory and motor neural pathways; subcortical reflexes; supraspinal mechanisms; behavioral issues.

KIN 4575 Addressing Diversity and Cultural Issues in Physical Activity (3)

Concurrent enrollment in EDCI 4630. Critical theoretical perspectives of sport and physical education in American society.

KIN 4601 Community Health Issues (3)

Community health aspects and implications of tobacco, alcohol, drugs, venereal disease and other communicable diseases; other community health problems.

KIN 4602 Community Safety Education (3)

Covers all grade levels in the school health program; community programs; home, traffic and recreational safety; emphasis on organization and administration of these programs.

KIN 4605 Habituating and Addictive Drugs in Our Culture (3)

Prereq.: KIN 1600 and senior or graduate standing. Harmless, harmful, useful and useless chemical substances that affect physiological well-being and behavior or mood; interaction of psychological, sociological and physiological components.

KIN 4606 Introduction to Health Promotion (3)

Prereq.: PSYC 2000, junior standing. *Recommended:* PSYC 3083. Psychological and behavioral perspectives of health promotion; theories and research related to health behavior change; analysis of effective interventions designed to promote health behavior change.

KIN 4800 African Americans in Sport (3)

African American experiences in sport, including a survey of the history of African Americans in sport and its larger effect on African American culture in general; introduction to the historical, sociological, economic, psychological, anatomical and physiological aspects of sport unique to African Americans.

KIN 4835 Practicum in Sport and Leisure Administration (6)

Prereq.: Sport Administration majors only; students should be within two semesters of completing degree requirements or obtain permission of the department. *Pass-fail grading.* Practical applications of administrative techniques in a sport, leisure or sport-related setting.

KIN 4900 Independent Study (1-3)

May be taken for a max. of 6 sem. hrs. of credit. Open to advanced undergraduate or graduate students. Reading, research and/or field work on selected topics.

KIN 7500 Practicum in Sport Management (3,6,9)

Prereq.: a minimum of 21 sem. hrs. from the sport management MS program, a letter of agreement from prospective on-site supervisor and consent of faculty advisor. Practical application of management techniques in a sport or sport-related setting; students work in a professional capacity for 10-30 hrs. per week during the semester under the guidance of the on-site supervisor.

KIN 7501 Advanced Research Methods (3)

Analysis of multivariate research methods and statistical analysis used in kinesiology research.

KIN 7502 Curriculum Construction in Physical Education (3)

Contemporary educational trends in curriculum theory, issues, philosophical orientation and models derived from research and experience.

KIN 7503 Dimensions of Aging (3)

Focus on physical, cognitive and emotional aspects of biological aging; role of physical activity and lifestyle issues and their interaction with chronological aging and functional ability.

KIN 7504 Tests and Measurements in Kinesiology (3)

Measurement theory applied to testing in educational, fitness and other kinesiology settings.

KIN 7505 Problems in Kinesiology (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Consent of instructor.

KIN 7506 Practicum in Pedagogy (3,6,9)

Pass-fail grading. Practical application of pedagogical techniques and methods in a physical education or physical education-related setting; students work in a professional capacity for 10-30 hours per week during the semester under the guidance of an on-site supervisor and/or faculty member.

KIN 7508 Analysis of Human Movement (3)

Mechanisms involved in the production of human movement and the techniques available for scientific analysis of such movement.

KIN 7510 Motor Learning (3)

Cognitive and motor processes influencing the learning of motor skills; emphasis on assessing learning, changes during learning, attention, augmented feedback, transfer of learning and practice conditions, with implications for a variety of skill instruction and rehabilitation contexts.

KIN 7511 Administrative Problems in Kinesiology (3)

Organization and management theory and techniques for administration of programs in educational and fitness settings.

KIN 7512 Motor Control (3)

Prereq.: consent of instructor. Neurophysiological and behavioral issues in control of human movement; emphasis on contrast between ecological and constructionist approaches.

KIN 7513 Seminar in Physical Education Professional Preparation (3)

Issues and trends in physical education; emphasis on undergraduate and graduate professional preparation.

KIN 7514 Pedagogy in Physical Education (3)

Prereq.: KIN 7502 and admission to the doctoral program. Theory and research relating to systematized instruction in physical education.

KIN 7515 Theories of Achievement Motivation in Physical Activity (3)

Theories of achievement motivation as they apply in a variety of physical activity settings including motor skill acquisition, sport, exercise behavior and rehabilitation.

KIN 7516 Organizational Behavior and Development in Sport (3)

Prereq.: KIN 4517 or permission of instructor. Analysis of organizations in the sport industry using theoretical and practical applications; examining the cultural and environment within which the sport organization operates.

KIN 7517 Advanced Topics in Motor Control (3)

Prereq.: KIN 7512 or consent of instructor. May be repeated for a max. of 6 sem. hrs. when topics vary. Selected topics linking advanced motor control topics across disciplines, medicine and research.

KIN 7518 Social Issues in Sport (3)

Examination of the social construction of sport and the systemic issues connected to contemporary sport.

KIN 7519 Financial Issues in Sport (3)

An in-depth examination of public and private financing options for professional, intercollegiate, interscholastic and recreational/commercial sport.

KIN 7520 Motor Development (3)

2 hrs. lecture; 2 hrs. lab. Psychomotor development of children; implications for skill learning; analyzing and planning motor development research; motor development in special children; research on youth sports; evaluation and assessment; and perceptual-motor development.

KIN 7523 Theories of Motor Skill Acquisition (3)

Prereq.: KIN 7510 and KIN 7520. For PhD students in motor learning or motor development. Issues in motor control and learning, i.e., central and peripheral mechanisms, theories of motor learning, motor programs and short-term memory.

KIN 7524 Sport Law (3)

A study of legal issues affecting the delivery of sport services and liability in sport-related activities.

KIN 7525 Children and Sport (3)

Open to graduate students from any area. Children's involvement in organized sports; understanding of the present structure of youth sports; research in child development, training, injuries, social psychology, skill acquisition and coaching behavior; implications for children in sport.

KIN 7526 Advanced Topics in Biomechanics (3)

Prereq.: consent of instructor. May be repeated for a max. of 6 sem. hrs. when topics vary. Selected topics linking advanced biomechanics topics across disciplines, rehabilitation and research.

KIN 7528 Sport Psychology (3)

Problems of several areas of social psychology related to sport; research methodology and theories.

KIN 7530 Exercise Physiology (3)

Physical, chemical and environmental factors influencing physical performance; bioenergetics, cardiovascular and respiratory adjustments to exercise; research relevant to conditioning and physiological responses to exercise.

KIN 7532 Advanced Topics in Motor Learning (3)

Prereq.: consent of instructor. May be repeated for a max. of 6 sem. hrs. when topics vary. Selected topics linking motor learning concepts across different disciplines in academic and applied settings.

KIN 7534 Exercise in Health and Disease (3)

Contraindications and valid uses of exercise in mediating risk factors.

KIN 7535 Neuromuscular Aspects of Exercise (3)

Prereq.: KIN 7530. Effects of exercise on muscle cell structure and function; neuromuscular integration and neural function in exercise.

KIN 7536 Cardiovascular and Respiratory Function in Exercise (3)

Prereq.: KIN 7530. 2 hrs. lecture; 2 hrs. lab. Mechanics of cardiovascular and respiratory function related to exercise.

KIN 7537 Exercise and Environment (3)

Prereq.: KIN 7530. 2 hrs. lecture; 2 hrs. lab. Effects of environmental conditions on performance of various types of exercise.

KIN 7538 Practicum in Cardiac Rehabilitation (6)

Prereq.: KIN 7530, KIN 7534. Pass-fail grading. Minimum on-site requirement is 20 hours per week. Important for exercise specialist, exercise leader or graded exercise technician certification. Involvement in the practical application of exercise testing, exercise prescription and exercise leadership for cardiac patients.

KIN 7539 Laboratory Techniques in Exercise Physiology (3)

Prereq.: KIN 7530 exercise physiology and college chemistry recommended. 1 hr. lecture, 4 hrs. lab Laboratory techniques in exercise physiology; principles of metabolic measurement and assay procedures for quantification of dynamic changes in blood chemistry during exercise.

KIN 7544 Current Topics in Sport Management (3)

An examination of the current topics and issues within the sporting environment from a variety of perspectives, including but not limited to, sociological, historical, economic, and managerial.

KIN 7545 Economic Issues in Sports (3)

In-depth examination focusing on the economic issues of professional, intercollegiate, and recreational sport around the world; examining specific areas such as competitive balance of sports leagues, discrimination, and the demand for sport.

KIN 7546 Exercise Metabolism (3)

Prereq.: KIN 7530. The study of the interactions between metabolism and substrate utilization, and how these factors impact work and exercise performance.

KIN 7547 Advanced Topics in Exercise Physiology (3)

Prereq.: consent of instructor. May be repeated for a max. of 6 semester hours of credit when topics vary. Selected topics linking advanced exercise physiology topics across disciplines, rehabilitation, and research.

KIN 7550 Advanced Exercise Physiology (3)

Prereq.: KIN 7530 2 hrs. lecture; 2 hrs. lab; college chemistry, mathematics, physics recommended. Quantitative approach to both systematic and cellular control during exercise.

KIN 7574 Qualitative Research in Kinesiology (3)

Introduction to qualitative methodologies and research in Kinesiology.

KIN 7601 Changing Health Behavior (3)

Motivation and determinants of health behavior; behavior change strategies designed for utilization in individual and group health education programs; promoting innovative health education programs in schools and the community.

KIN 7602 Social-Ecological Influences on Physical Activity and Health (3)

Application of the social-ecological framework to physical activity and health behaviors.

KIN 7603 Stress Management and Emotional Health (3)

Principles, theories and coping/relaxation techniques related to stress management and the promotion of emotional health.

KIN 7900 Introduction to Research Methods (3)

An introduction to the basic aspects of reading, evaluating and writing research. Topics include problem selection, literature review, instrumentation, methodology and types of research in physical activity.

KIN 7999 Seminar in Selected Topics in Kinesiology (1-3)

May be taken for a max. of 6 sem. hrs. credit. Topics vary.

KIN 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

KIN 8900 Independent Research (1-9)

Pass-fail grading. May be taken for a max. of 9 sem. hrs. credit.

KIN 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Landscape Architecture

LA 1101 Landscape Representation I (3)

6 hrs. studio. Freehand and mechanical representation and observational skills used in design conceptualization; emphasis on the development of a vocabulary, basic skills and techniques of landscape architecture representation.

LA 1102 Landscape Representation II (3)

Prereq.: LA 1101. 6 hrs. studio. Developing skills in computer-aided visualization and illustrative documentation of landscapes; introduction to digital imaging, drafting and photo manipulation.

LA 1201 Introduction to Landscape Architecture (3)

This is a General Education course. Introduction to the profession of landscape architecture for non-majors; overview of professional concerns and responsibilities; awareness of natural and planned landscapes, as well as, the importance of using land in an efficient and attractive manner.

LA 1202 World Landscape Architecture (3)

Exploration of contemporary landscape design from around the world, including historic landscapes and gardens; urban plazas, and pedestrian areas; parks and infrastructure.

LA 1203 Views of the American Landscape (3)

This is a General Education course. Concepts, patterns and themes that shape human attitudes and activities concerning the American landscape; natural systems as links between managed landscapes and built environments; environmental and conservation ethics.

LA 1204 Cities of the World (3)

Exploration of the physical, social and environmental factors which contribute to the development of cities from historical to contemporary perspective.

LA 1206 Gardens of the World (3)

Exploration of the physical, social and environmental factors which contribute to the development of gardens from historical to contemporary perspectives.

LA 2001 Landscape Design I (6)

Prereq.: LA 1102. Consent of school director. 12 hrs. studio. Introduction to two-and three-dimensional design; spatial sequence, meaning and dynamic change; application to a simple design.

LA 2002 Landscape Design II: Site Design (6)

Prereq.: LA 2001 or equivalent. 12 hrs. studio. Development of landscape design processes as applied to small-scale projects; introduction of earth structures, construction materials and plants.

LA 2101 Landscape Representation III (3)

Prereq.: LA 1101 and LA 1102. 6 hrs. studio. Advanced representation techniques developing skills of visualization and representation using freehand, mechanical and digital imaging in design projects.

LA 2201 Landscape History I (3)

Development of earliest landscape traditions; relationship of humans to landscape in major cultural areas of the ancient world; development of landscape traditions in western Europe and America from the 15th to 19th centuries.

LA 2301 Landscape Technology I: Land Design (3)

Prereq.: MATH 1021 and MATH 1022 or equivalent; and LA 1102 or equivalent; consent of instructor. 2 hrs. lecture; 2 hrs. studio. Introduction to basic surveying for landscape architects; surveying systems and legal land descriptions; introduction to landscape architectural construction systems and the relationship among landform/earth, plants, and structures, topographic mapping conventions, grading design, drainage and water management, roadway design and alignment.

LA 2401 Landscape Ecology (3)

Prereq.: GEOG 2051 and RNR 1001 or equivalent. Class includes field trips. Application of ecological principles and relationships to resource, recreation and landscape planning, with attention to conservation ethics and legal regulations leading to sustainability of the landscape.

LA 3001 Landscape Design III: Site Planning and Design (6)

Prereq.: LA 2002 and LA 2101 and LA 2201 or equivalent. Required field trip. Students are responsible for paying travel expenses associated with the course. 12 hrs. studio. Arrangement of buildings, circulation and other landscape design elements; emphasis on earthwork and drainage.

LA 3002 Landscape Design IV: Community Design (6)

Prereq.: LA 2101 and LA 3001. *12 hrs. studio.* Landscape planning and design at the community and neighborhood scale; emphasis on relationships of uses, transportation infrastructure, green infrastructure, public services and a mix of housing and commercial types.

LA 3201 Landscape History II (3)

Prereq.: LA 2201. Major landscape movements in the 19th and 20th centuries; theory and aspects of contemporary practice of landscape architecture.

LA 3301 Landscape Technology II: Grading, Drainage and Roads (3)

Prereq.: LA 2301 or equivalent; consent of instructor. *2 hrs. lecture; 2 hrs. studio.* Advanced grading and drainage with emphasis on aesthetic aspects of grading and best management practices and sustainability, landscape architectural systems and infrastructures including advanced roadway design and alignment.

LA 3302 Landscape Technology III: Design Detailing (3)

Prereq.: LA 3301 or equivalent; consent of instructor. *2 hrs. lecture; 2 hrs. studio.* Relationship between design and implementation through construction processes, detailing as an extension of design, landscape architectural materials, basic structural theory, detailing and structures, technical specifications as a means of enuring design intent.

LA 3401 Plant Materials I (3)

Prereq.: LA 2401 for undergraduate students. *1 hr. lecture; 4 hrs. lab.* Identification and study of plant materials with specific recognition of the visual and ecological characteristics of plants used in landscape design.

LA 3402 Plant Materials II (3)

Prereq.: LA 3401. *1 hr. lecture; 4 hrs. lab.* Continuation of LA 3401 with the inclusion of basic principles of planting design.

LA 4001 Landscape Design: Landscape Planning and Development V (6)

Prereq.: LA 3002 and LA 3302. Required field trip. Students are responsible for paying travel expenses associated with the course. 12 hrs. studio. Landscape planning and design from the regional to the site development scale; emphasis on generating planning and design strategies for urbanization and development that are informed by an understanding of the ecology and culture of the region and based on principles of sustainability.

LA 4002 Landscape Design VI: Specialization (6)

Prereq.: LA 4001 Credit will not be given for this course and LA 4003. 12 hrs. studio. Studio projects addressing various aspects of landscape architecture.

LA 4003 Landscape Architecture Internship (6)

Prereq.: Completion of all 3000-level Landscape Architecture courses and consent of School. Pass-fail grading. Credit will not be given for both this course and LA 4002. At least 35 hours of work per week supervised by a licensed landscape architect or professional in an approved firm or agency.

LA 4008 Advanced Topics Studio (6)

Prereq.: LA 3002, LA 7004 or consent of instructor. Required field trip. Students are responsible for paying travel expenses related to the course. Advanced topics in landscape architecture addressing research and projects in the profession.

LA 4101 Advanced Digital Representation (3)

Prereq.: LA 1102, LA 2101 or equivalent. Advanced techniques in digital representation, such as 3-D modeling, terrain modeling, animation, advanced imaging and rendering.

LA 4201 Theory and Methods of Landscape Planning (3)

2 hrs. lecture; 2 hrs. lab. Principal theoretical literature in landscape analysis and planning; application of theories and methods; basic skills in the use of GIS, global positioning systems (GPS) and remote sensing/image processing technology.

LA 4301 Landscape Technology IV: Specialization (3)

Prereq.: LA 3302 or equivalent. 2 hrs. lecture; 2 hrs. studio. Specialty topics in landscape architecture construction and design implementation.

LA 4501 Field Studies in Landscape Architecture (3)

Pass-fail grading. May be taken for a max. of 6 hrs. of credit. Elective field trip. Students are responsible for paying travel expenses associated with this course. Field trip to landscape architectural office, projects, historic sites and schools throughout the U.S. and abroad.

LA 4502 Independent Study in Landscape Architecture (3)

Prereq.: consent of School director. Independent study proposals must be pre-approved by the supervising faculty member. Program of individual study under faculty guidance, including auditing lectures, reading and exercises as needed to develop skills in methods of inquiry related to the area of specialty.

LA 4503 Advanced Projects in Landscape Architecture (3)

Prereq.: consent of instructor. Faculty directed projects for small groups of students investigating specific areas of research and practice.

LA 4504 Advanced Elective in Landscape Architecture (3)

Prereq.: permission of instructor. Research practice and application in landscape architecture; small groups will use lectures, discussions, presentations and other formats to explore advanced topics.

LA 4505 Special Studies in Landscape Architecture (1-2)

Prereq.: consent of School director. Program of study under faculty guidance. Independent study proposals must be pre-approved by supervising faculty member and the School director.

LA 5001 Landscape Design VII: Urban Landscape Design (6)

Prereq.: LA 4002, LA 4201, LA 4301. Required field trip. Students are responsible for paying travel expenses associated with the course. 12 hrs. studio. Investigation of urban structures and systems and design of urban landscapes and elements.

LA 5002 Landscape Design VIII: Capstone Project (6)

Prereq.: LA 4008 or LA 5001, LA 5201. 12 hrs. studio. Intensive development of a comprehensive landscape design and/or independent design project.

LA 5201 Research Seminar (3)

Prereq.: LA 3201, LA 4201. Intensive and critical review of major landscape theories and issues; identification and preparation for a comprehensive final project.

LA 5301 The Practice of Landscape Architecture (3)

Prereq.: LA 3302 or consent of instructor. Professional practice for landscape architects including issues associated with licensure, practice types, professional services, business developments, contracts and project management.

LA 7000 Pre-Studio (6)

Su *Prereq.:* consent of School. 12 hrs. studio. Basic design vocabulary, toolset, and framework focusing on those skills and ideas that form the fundamental design core of landscape architecture. An eight-week summer session course that provides an introduction for students unfamiliar with landscape architecture studio experience, focusing on representation skills, design theory, and critical thinking skills.

LA 7001 Graduate Landscape Design I: Basic Design (6)

Prereq.: consent of the school. 12 hrs. studio. Introduction to two- and three-dimensional design; spatial sequence, meaning and dynamic change; application to simple landscape designs.

LA 7002 Graduate Landscape Design II: Site Design (6)

Prereq.: LA 7001. 12 hrs. studio. Arrangement of buildings, circulation and other landscape design elements; emphasis on earthwork and drainage.

LA 7003 Graduate Landscape Design III: Community Design (6)

Prereq.: LA 7002 and LA 7101 or consent of the school. 12 hrs. studio. Landscape planning and design at the community and neighborhood scale; emphasis on relationships of uses, transportation infrastructure, green infrastructure, public services and a mix of housing and commercial types.

LA 7004 Graduate Landscape Design IV: Landscape Planning and Development (6)

Prereq.: consent of the school. 12 hrs. studio. Landscape planning and design from the regional to the site development scale; emphasis on generating planning and design strategies for urbanization and development that are informed by an understanding of ecology and culture of the region and based on principles of sustainability.

LA 7005 Graduate Landscape Design V: Urban Landscape Design (6)

Prereq.: LA 7004. 12 hrs. studio. Investigation of urban structures and systems and design of urban landscapes and elements.

LA 7006 Graduate Landscape Design VI: Final Project (6)

Prereq.: LA 4008 or LA 7005 and LA 7201. 12 hrs. studio. Intensive development of a comprehensive landscape design and/or independent design project.

LA 7013 History and Theory I (3)

Prereq.: consent of School. Overview of landscape movements throughout history.

LA 7014 Ecology and Technology I (3)

Prereq.: consent of School. Field course on basic concepts of ecological systems including principles in plant communities, soils, landforms, and basic hydrology through on-site reading and documentation; introduces soils as an ecological building block capable of organizing plant communities, topography, and hydrology; explores basic soil types and their associated site design issues.

LA 7023 History and Theory II (3)

Prereq.: LA 7013 or consent of School. Major historical influences from China, Japan, Mughals, Moors, Italy, France, England, and others up to contemporary practice.

LA 7024 Ecology and Technology II (3)

Prereq.: LA 7014 or consent of School. Field course introduces plants as a central component of organizing ecological communities, in relationship to topography and hydrology. Basic principles in plant communities, soils, landforms, and basic hydrology through on-site reading and documentation; introduces landscape architecture as a practice, focusing on site systems and the representation of plant materials and ecosystems and green infrastructures.

LA 7032 Special Topics in Landscape Architecture Media (3)

Prereq.: consent of instructor. Course may be taken for 6 hours of credit when topics vary. 6 hrs. studio. Mapping water and natural resources in conjunction with studio work; exploring design alternatives using related software.

LA 7033 History and Theory III (3)

Prereq.: LA 7023 or consent of School. History of open space in the urban environment and related planning issues. The role of urban parks in the planning and design of cities.

LA 7034 Ecology and Technology III (3)

Prereq.: LA 7024 or consent of School. Introduces stormwater management techniques and the calculations required to determine stormwater runoff and the reduction of stormwater pollution; using hydrological software to do parametric modeling of a stormwater design.

LA 7042 History and Theory IV (3)

Prereq.: LA 7033 or consent of School. Course includes travel and field research. Students are responsible for paying travel expenses associated with the course. Contemporary landscape architecture practice from the 1960's to the present, focusing on a series of detailed case studies showing the evolution of contemporary projects and their relationship to contemporary theory.

LA 7043 Professional Practice (3)

Prereq.: consent of School. Professional landscape architecture practice in a design office. Contracts, management, professional ethics and the business issues facing planning and design professionals including explorations of non-traditional careers for landscape architects.

LA 7044 Ecology and Technology IV (3)

Prereq.: LA 7034 or consent of School. Construction practices in landscape architecture, focusing on the primary components of built environments: materials, assemblies, and technique; the principles of sustainability as it relates to construction and materials; advanced materials and emerging technologies.

LA 7052 Thesis Preparation (3)

Prereq.: consent of School. Preparation for landscape architecture thesis on design, technology, history, or professional principles working closely with the instructor on research methods and developing an individual thesis proposal for a written or design thesis.

LA 7101 Graduate Landscape Representation I (3)

6 hrs. studio. Freehand and mechanical representation techniques, tools and media used in designing and illustrating landscape architectural projects; emphasis on the development of a vocabulary, basic skills and theory of landscape architectural representation.

LA 7102 Graduate Landscape Representation II (3)

Prereq.: LA 1102 and LA 7101. *6 hrs. studio.* Advanced representation techniques developing skills of visualization and representation using freehand, mechanical and digital imaging design projects.

LA 7201 Research Methods (3)

Concepts of qualitative research; skills in finding and using research material; landscape architectural research trends; evaluation of research; application of research to landscape design.

LA 7401 Graduate Landscape Ecology (3)

Required field trips for which a deposit is required at registration. Basic principles of ecology and environmental systems; application of ecological principles and relationships to resource, recreation and landscape planning, with attention to conservation ethics and legal regulations leading to sustainability of the landscape.

LA 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

Latin

LATN 1001 Elementary Latin (4)

[LCCN: CLTN 1014, 1026, Elementary Latin I] This is a General Education course. Nonlaboratory reading course in classical Latin; emphasis on comprehension rather than grammar; repetition of controlled vocabulary and contextual clues used to read extensive passages of simple Latin.

LATN 2051 Intermediate Latin (4)

[LCCN: CLTN 1023, 1026, Elementary Latin II] This is a General Education course. *Prereq.: LATN 1001 or equivalent.* Reading comprehension approach to language continued in extensive passages of moderate difficulty; vocabulary building and basic Latin grammatical constructions.

LATN 2053 Intermediate Latin (3)

[LCCN: CLTN 2013, Intermediate Latin I] This is a General Education course. *Prereq.: LATN 2051 or equivalent.* Nonlaboratory comprehension approach includes material of the difficulty of 1st century Latin poetry and prose.

LATN 2065 Golden Age Narrative Poetry (3)

[LCCN: CLTN 2023, Intermediate Latin II] This is a General Education course. *Prereq.: LATN 2053 or equivalent.* Readings from the narrative poets, including selections from Vergil's Aeneid and/or from Ovid's Metamorphoses.

LATN 2066 Golden Age Prose (3)

[LCCN: CLTN 2023, Intermediate Latin II] This is a General Education course. *Prereq.: LATN 2053 or equivalent.* Readings from Roman prose writers (excluding the historians); the major speeches, letters, and/or philosophical works of Cicero.

LATN 2073 Roman Historians (3)

[LCCN: CLTN 2023, Intermediate Latin II] This is a General Education course. Prereq.: LATN 2053 or equivalent.
Readings from Roman historians; selections from Livy and/or Tacitus; prose style and philosophy of history of the author(s).

LATN 2074 Golden Age Lyric Poetry (3)

[LCCN: CLTN 2023, Intermediate Latin II] This is a General Education course. Prereq.: LATN 2053 or equivalent.
Readings from the lyric poets; selections from the Carmina of Catullus and/or the Odes of Horace, with attention to emotional content.

LATN 4001 Intensive Latin Language (3)

A specialized course intended to provide a reading knowledge of Latin. For graduate students and advanced undergraduates for whom a familiarity with another foreign language is strongly recommended. Successful completion of this course will be regarded as sufficient preparation for LATN 4006. Does not count toward satisfying foreign language requirement for undergraduates, although hours may count toward baccalaureate. Credit will not be given for both this course and introductory Latin courses.

Syntax, grammar and lexicology of Latin; graduated readings from representative authors.

LATN 4002 Roman Satire (3)

Readings from Petronius' Satyricon, Martial and Juvenal for their humor, with attention to evidence of the lives and language of ordinary Roman people.

LATN 4003 Readings in the History of Livy (3)

Selections from the History of Livy; literary and historical significance.

LATN 4004 Roman Comedy (3)

Reading of representative plays of Plautus and Terence, with attention to dramatic techniques and comic situations.

LATN 4006 Medieval and Renaissance Latin (3)

Readings from the time of the medieval Latin writers to Milton.

LATN 4023 Special Topics in Latin Poetry (3)

May be taken for a max. of 6 sem. hrs. of credit. Readings and studies in the works of one or more major poets of the Roman Republic or Roman Empire.

LATN 4024 Special Topics in Latin Prose (3)

May be taken for a max. of 6 sem. hrs. of credit. Readings and studies in the works of one or more of the major prose writers of the Roman Republic or Roman Empire.

LATN 4120 Roman Elegy (3)

Readings in the major Latin elegiac poets such as Ovid, Propertius and Tibullus; attention to poetic technique and to Roman attitudes toward love and women.

LATN 4915 Independent Work (1-3)

May be taken for a max. of 6 sem. hrs. of credit. Permission of department required. Readings in Latin literature directed by a senior faculty member.

Life Course and Aging

LCA 2000 Interdisciplinary Seminar in Aging (1)

Contemporary issues in aging; preparation for the study of aging in contemporary society.

Liberal Arts

LIBA 7000 Liberal Arts: Methods of Inquiry (3)

Liberal Arts 7000 is required. Interdisciplinary study in the liberal arts; modes of inquiry in different disciplines, common themes in the humanities and means of integrating these into the whole.

LIBA 7900 Liberal Arts: Themes and Commonalities (3)

Liberal Arts 7900 is required. Major ideas in the liberal arts as reflected in exemplary published studies and student research; the cultural function of the humanities.

LIBA 7950 Special Topics in the Liberal Arts (3)

Prereq.: credit in LIBA 7000 or consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary.
Interdisciplinary studies in the liberal arts, with attention to major periods, movements, themes or problems in Western culture.

LIBA 7990 Independent Study (1-3)

Prereq.: credit or concurrent enrollment in LIBA 7000. May be taken for a max. of 6 sem. hrs. of credit.
Directed individual readings by the graduate faculty.

LIBA 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading

Linguistics

LING 1051 Spoken American English (3)

Prereq.: consent of instructor or international student counselor. Undergraduates only. Weekly individual work in the Speech laboratory. Theoretical and practical treatment of pronunciation of American English for students of other languages; phonology, stress, intonation and rhythm through drills, exercise and public speaking.

LING 2010 Symbolic Logic (3)

See PHIL 2010.

LING 2050 Introduction to Language (3)

See COMD 2050.

LING 2710 Descriptive Grammar of English (3)

See ENGL 2710.

LING 3060 Introduction to Anthropological Linguistics (3)

See ANTH 3060.

LING 3080 French Culture and Civilization (3)

See FREN 3080.

LING 3260 Structure of Louisiana French (3)

See FREN 3260.

LING 3280 Cajun French Culture (3)

See FREN 3280.

LING 3310 Historical Perspectives on Language Issues (3)

See ENGL 3310.

LING 3341 African American English (3)

See AAAS 3341.

LING 3716 Dialects of English (3)

See ENGL 3716.

LING 3720 Methods for Teaching English as a Second Language (3)

See ENGL 3720.

LING 4001 History of the French Language (3)

See FREN 4001.

LING 4004 The North American Indians (3)

See ANTH 4004.

LING 4005 Structure of the Spanish Language (3)

See SPAN 4005.

LING 4010 Symbolic Logic II (3)

See PHIL 4010.

LING 4011 Topics in Advanced Logic (3)

Prereq.: PHIL 4010/LING 4010.
See PHIL 4011.

LING 4014 Introduction to French Linguistics (3)

See FREN 4014.

LING 4015 Advanced French Phonetics (3)

See FREN 4015.

LING 4060 Language and Culture (3)

See ANTH 4060.

See PHIL 7910.

LING 7962 Field Methods in Linguistics (3)

See ANTH 7962.

LING 7999 Research in Anthropology (1-6)

See ANTH 7999.

LING 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

LING 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Library & Information Science

LIS 1001 Library Research Methods and Materials (1)

Fundamentals of college-level research; location, evaluation and use of information for research needs; introduction to the library and to the organization, access and retrieval of information; hands-on experience in a variety of printed and electronic resources.

LIS 2001 Introduction to Information Technologies (3)

Credit will not be given for this course and CSC 1100, EXST 2000 and ISDS 1100. Introduction to hardware, software, networking and telecommunications issues; use of application software, electronic databases and search engines.

LIS 4001 Advanced Library Research Methods and Materials (3)

Advanced information literacy for college-level research; location, evaluation and use of information for research needs; the organization, access and retrieval of information; practical experience with resources in multiple formats.

LIS 7002 Information Services (3)

Prereq.: major or permission of department. Preparation for reference and bibliographic services; selection and use of general, scholarly and specialized reference resources in various subject fields.

LIS 7004 Principles of Management for Librarians and Information Specialists (3)

Prereq.: major or permission of department. Basic functions of management and their application to the operations of libraries and information service agencies.

LIS 7005 Foundations of Library and Information Science (3)

Prereq.: major or permission of department. All students pursuing the Archives or Library Specializations should take prior to the tenth hour of course work to be counted for the MLIS degree. History, theory, practice, philosophy and current organization of the information service professions.

LIS 7008 Information Technologies (3)

Prereq.: major or permission of department. Hardware, software, networking and telecommunications issues relating to technologies used in libraries and information settings; experience with appropriate software packages and search systems.

LIS 7011 Information Needs Analysis (3)

Prereq.: major or permission of department. User-centered approaches to meeting information needs of individuals and communities; community analysis, user studies and reference interview.

LIS 7012 Bibliographic Organization and Resource Development (3)

Prereq.: major or permission of department. Conceptual foundations of bibliographic organization and resource development; basic principles and methods of description, organization and access; bibliographical lists; principles, methods, issues and trends of resource selection for user populations.

LIS 7013 Evaluation of Information Systems (3)

Prereq.: major or permission of department. Evaluation of information system performance; systems analysis techniques; development and use of performance measures; strategies for improving system performance.

LIS 7101 Media and Services for Children (3)

Developmentally appropriate library and information services for children, ages birth to eleven; emphasis on literature and uses of literature in schools and libraries.

LIS 7102 Media and Services for Young Adults (3)

Developmentally appropriate library and information services for young adults, ages 12 to 18; emphasis on literature and uses of literature in schools and libraries.

LIS 7104 Non-Fiction for Children and Teens (3)

Prereq.: LIS 7101, LIS 7102, or permission of instructor. Designing, planning, and providing developmentally appropriate library and information services for children and adolescents, aged birth to eighteen, with an emphasis on informational literature and the uses of such literature in public and school libraries.

LIS 7105 Graphic Novels in Libraries (3)

Prereq.: LIS 7101, LIS 7102, or permission of instructor. Explores the history of the graphic novel; collection, acquisition and management issues related to literature; and its uses in public and school libraries, with an emphasis on working with children and young adults.

LIS 7107 Use of Media in Libraries (3)

Examination of media as translated into a variety of library settings and as related to various library patron groups; problems and trends with types of media, software and hardware.

LIS 7202 Resources for Science and Technology (3)

Information resources in major areas of pure and applied sciences.

LIS 7203 Sources of Government Information (3)

Government publications as products of government activity and as sources of information.

LIS 7205 Business Information Resources (3)

Information resources in major areas of business and economics.

LIS 7400 School Media Centers (3)

Philosophy and objectives of library media centers and information services in schools; emphasis on the roles and responsibilities of the library media specialist.

LIS 7401 Academic Libraries (3)

Study of libraries in higher education; their development, organization, financing and administration; human resources; collections; services; and futures.

LIS 7402 Cooperatives, Consortia and Networks (3)

Major types of local, state, regional and national cooperation among all types of libraries, including organization, governance, services and uses of technology.

LIS 7403 Special Libraries and Information Centers (3)

Major types of special libraries; their purpose and function in business, government and other organizations; principles of administration; technical processing; reference services; special methods, routines and records.

LIS 7404 Health Sciences Information Centers (3)

Administration, organization, function and services of health sciences libraries; collection development and reference emphasis on major print and electronic information resources.

LIS 7405 Public Libraries (3)

Role of the public library in past and present American society; its relationship to the social and political communities.

LIS 7406 Resources and Methods for Integrated Advisory Services (3)

Value and role of leisure reading and other media in libraries; recognition of the connections between formats and genres; interview techniques, support processes, and resources for providing integrated advisory services to library users.

LIS 7408 Principles of Archives Management (3)

Identification, collection, arrangement, description, preservation and use of the full range of historical documents in both institutional and private repositories.

LIS 7409 Human Computer Interaction (3)

Study of interactions between humans and information systems, leading to more effective system design and evaluation; human cognition, user modeling, system design approaches, evaluation methods.

LIS 7410 Digital Libraries (3)

Prereq.: LIS 7008 or consent of instructor. Current activities, models, methods and tools for digital library creation and support; theoretical and practical aspects of digital library creation, using a variety of formats and approaches.

LIS 7501 Management of Information Systems (3)

Management of the selection, acquisition and implementation of computer systems within the context of library and information service agencies.

LIS 7502 Networks for Information Centers (3)

Prereq.: LIS 7008 or permission of instructor. Standards, policy, theory and technical issues related to electronic networks; impact on information transfer and organizations.

LIS 7503 Information Technology and Public Policy (3)

Examines the impact of information technology and public policies on economic, social and political systems; focuses on major public policies related to information technologies within the United States and selected countries.

LIS 7504 Preservation Management of Physical Records (3)

Prereq.: LIS 7408 or consent of instructor. Study of preservation as a management function, highlighting causes of deterioration of print and non-print collections, as well as policies and practices that ensure their maximum usable life.

LIS 7505 Introduction to Digital Curation (3)

Introduction to archiving digital materials and the technological, ethical, and legal issues they routinely present to the archivist; includes characteristics of “good” digital materials and the role of metadata in creating and maintaining them, as well as the configuration of a trustworthy digital archival repository, and the tools and policies needed to create and maintain one.

LIS 7508 Management of Knowledge-Based Assets in Organizations (3)

Analysis of the nature and uses of knowledge-based assets in organizations; systems for managing knowledge-based assets will be considered in the context of institutions' overall information ecology; examination of the role of librarians and information professionals in organizing and providing knowledge-based assets.

LIS 7509 Oral History (3)

Prereq.: LIS 7408 or consent of instructor. Introduction to oral history methods and theory; construction and administration of oral history projects; conducting interviews; preservation of interviews in archives and libraries.

LIS 7510 Website Design and Management (3)

Prereq.: LIS 7008 or permission of instructor. Design, produce, and manage effective websites; understanding of the World Wide Web environment and related technologies.

LIS 7603 Electronic Description of Archival Materials (3)

Prereq.: LIS 7408 or consent of instructor. Applying archival descriptive standards to create contextual and content records expressed as EAC, EAD, and MARC records.

LIS 7604 Principles of Records Management (3)

Prereq.: LIS 7408 or consent of instructor. Application of systematic and scientific controls to recorded information; life-cycle concept, legal requirements and implications of technology, as well as records inventory, appraisal, classification, retention and protection.

LIS 7605 Information Science (3)

All students pursuing the Information Management Specialization should take prior to the tenth hour of course work to be counted for the MLIS degree. History and philosophy of information science and information retrieval; survey of current research.

LIS 7606 Abstracting and Indexing (3)

Principles of abstracting and indexing for print and electronic environments; controlled vocabulary and thesaurus development; manual and computerized abstracting and indexing techniques; effectiveness of abstracting and indexing methods.

LIS 7607 Electronic Information Resources (3)

Prereq.: LIS 7002 or permission of instructor. Use of electronic information resources and systems; analysis and comparison of various search mechanisms.

LIS 7608 Introduction to Cataloging and Classification (3)

Principles underlying description, subject analysis, classification of library resources and authority control; current national standard cataloging rules, Library of Congress Subject Headings, Dewey Decimal Classification, Library of Congress Classification, and MARC (machine readable cataloging) formats are emphasized.

LIS 7609 Advanced Cataloging and Classification (3)

Prereq.: LIS 7608 or consent of instructor. Detailed analysis of cataloging and classification of special resources, including serials, electronic and cartographic resources, kits, music, manuscripts, realia, including formatting of bibliographic representations; intensive survey of conceptual foundations of descriptive and subject metadata.

LIS 7610 Information Retrieval Systems (3)

See CSC 7481.

LIS 7611 Management of Electronic Records (3)

Prereq.: LIS 7408 or consent of instructor. Study and evaluation of the impact of automation on archival theory and practice. Analysis of models and strategies developed by archivists to manage electronic records.

LIS 7700 History of Books and Libraries (3)

History and cultural relationships of the book and libraries; rise of the library as a formal institution within society.

LIS 7701 Seminar in History of Archives and Record Keeping (3)

Prereq.: LIS 7408 or consent of instructor. Origins, organization and development of records, record keeping systems and archival institutions, from the ancient world through the 21st century.

LIS 7702 Seminar in Advanced Archival Appraisal (3)

Prereq.: LIS 7408 or consent of instructor. Appraisal and selection of archival materials from both a theoretical and a practical perspective. Extensive reading in the archival literature to form familiarity with the evolution of appraisal theory and current practices in the field.

LIS 7703 Seminar in Advanced Archival Access (3)

Prereq.: LIS 7408 or consent of instructor. In-depth investigation of the issues arising around access to archival materials in the digital age.

LIS 7800 The Art and Practice of Library Storytelling (3)

Role of storytelling as a form of communication; preparation and presentation of stories for all age groups; planning story programs.

LIS 7801 The Illustrator as Storyteller (3)

Elements of illustrations and book design; recognition and evaluation of illustrated media for youth; the use of illustrated media in libraries; and the work of noted illustrators.

LIS 7807 Information Literacy Instruction (3)

Theories, techniques, strategies and current practice for teaching the effective and efficient use of academic, school, public and special library resources.

LIS 7809 Research Methodologies in Library and Information Science (3)

Prereq.: LIS 7013 or permission of instructor. Research methodologies applicable to library and information phenomena; definition of research problems, selection of inquiry tools and data collection; emphasis on evaluation of research.

LIS 7810 Sources of Music Study & Research (3)

See MUS 7600.

LIS 7811 Publishing for Librarians and Information Professionals (3)

Explores pre-publications market research, writing, peer-review and editorial processes of library and information science literature.

LIS 7900 Field Experience in Library and Information Services (3)

Prereq.: completion of 24 hrs. of LIS courses and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in management of library and information services, such as cataloging, reference, technical services or automation.

LIS 7901 Issues in Archives, Library, and Information Science (1)

Prereq.: major or permission of department. Pass-fail grading. All graduating students are expected to participate in discussions of contemporary professional issues.

LIS 7902 Field Experience in School Media Centers (3)

Prereq.: completion of 24 hrs. of LIS courses, including LIS 7101, LIS 7102 and LIS 7400 and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of school libraries.

LIS 7903 Field Experience in Special Libraries and Information Centers (3)

Prereq.: completion of 24 hrs. of LIS courses, including LIS 7403 and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of special libraries.

LIS 7904 Field Experience in Academic Libraries (3)

Prereq.: completion of 24 hrs. of LIS courses, including LIS 7401 and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of academic libraries.

LIS 7905 Field Experience in Public Libraries (3)

Prereq.: completion of 24 hrs. of LIS courses, including LIS 7405 and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of public libraries.

LIS 7906 Field Experience in Health Sciences Information Centers (3)

Prereq.: completion 24 hrs. of LIS courses, including LIS 7404 and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of health sciences libraries.

LIS 7907 Field Experience in Information Management (3)

Prereq.: completion of 24 hours of LIS courses, including LIS 7605 and permission of instructor. Preparation for course begins semester prior to registration. 120 hours per semester at field site. Experience in management and/or development of information systems such as databases, websites or knowledge organization systems.

LIS 7909 Directed Independent Study (1-3)

Prereq.: completion of 9 hours of LIS courses. May be taken for a max. of 6 sem. hrs. credit.

LIS 7910 Special Topics in Archival Science (1-3)

Prereq.: LIS 7408 or permission of instructor. May be taken for a max. of 18 sem. hrs. of credit when topics vary.

LIS 7911 Special Topics in Information Science (1-3)

May be taken for a max. of 18 sem. hrs. of credit when topics vary.

LIS 7912 Special Topics in Library Science (1-3)

May be taken for a max. of 18 sem. hrs. of credit when topics vary.

LIS 7913 Field Experience in Archives (3)

Prereq.: completion of 24 hrs. of LIS courses and permission of instructor. Preparation for course begins semester prior to registration. 120 hrs. per semester at field site. Experience in administration and management of archives.

Louisiana State University

LSU 1001 Freshman Seminar (1)

Open to freshmen only. Integration into the academic life of the campus, including orientation to the University's policies and resources, its history and traditions; development of essential academic skills, personal growth/self-awareness, and career exploration; instill a sense of community on campus and beyond.

Mathematics

MATH 1009 Mathematics for Prospective Elementary School Teachers I (3)

Offered by Independent and Distance Learning only. Logic; counting numbers, integers, rational numbers, real numbers; emphasis on field properties; set nomenclature and some number theory; units of measurement.

MATH 1010 Mathematics for Prospective Elementary School Teachers II (3)

Prereq.: MATH 1009. Offered by Independent and Distance Learning only. Continuation of MATH 1009. Measurement, informal geometry, systems of equations, introduction to probability and statistics.

MATH 1015 Basic Mathematics and Applications (3)

This course does not serve as a prerequisite for calculus. Credit will not be given for both this course and MATH 1021, MATH 1022, or MATH 1023. Offered by Independent and Distance Learning only. Basic mathematical skills of graphing, formulas for geometric measurement, systems of linear equations and inequalities, review of quadratic equations, logarithms and application to exponential growth and decay, triangle trigonometry and its application to geometry and measurements.

MATH 1021 College Algebra (3)

[LCCN: CMAT 1213, College Algebra] This is a General Education course. *Prereq.: placement by department. Credit will not be given for both this course and MATH 1015 or MATH 1023.* Solving equations and inequalities; function properties and graphs with transformations; inverse functions; linear, quadratic, polynomial, rational, exponential and logarithmic functions with applications; systems of equations.

MATH 1022 Plane Trigonometry (3)

[LCCN: CMAT 1223, Trigonometry] This is a General Education course. *Prereq.: MATH 1021 or placement by department. Credit will not be given for both this course and MATH 1015 or MATH 1023.* Trigonometric functions with applications; graphs with transformations; inverse functions; fundamental identities and angle formulas; solving equations; solving triangles with applications; polar coordinate system; vectors.

MATH 1023 College Algebra and Trigonometry (5)

[LCCN: CMAT 1235 Algebra and Trigonometry] This is a General Education course. *Prereq.: placement by department. Credit will not be given for both this course and MATH 1015, MATH 1021, or MATH 1022. This course fulfills 5 hrs. of the 6 hour General Education Analytical Reasoning requirement; a second Analytical Reasoning course will be required.* Function properties and graphs; inverse functions; linear, quadratic, polynomial, rational, exponential and logarithmic functions; with applications systems of equations; partial fraction decomposition; conics; trigonometric functions and graphs; inverse trigonometric functions; fundamental identities and angle formulas; solving equations and triangles with applications; polar coordinate system; vectors.

MATH 1025 Mathematics of Commerce (3)

Prereq.: MATH 1015 or MATH 1021. Offered by Independent and Distance Learning only. Interest, discount, annuities, depreciation and insurance.

MATH 1029 Introduction to Contemporary Mathematics (3)

[LCCN: CMAT 1103, Contemporary Math] This is a General Education course. *Primarily for students in liberal arts and social sciences.* Mathematical approaches to contemporary problems, handling of data and optimization using basic concepts from algebra, geometry and discrete mathematics.

MATH 1100 The Nature of Mathematics (3)

[LCCN: CMAT 1103, 1313, Contemporary Math, Finite Math] This is a General Education course. *Not for science, engineering or mathematics majors. For students who desire an exposure to mathematics as part of a liberal education.* Logic; the algebra of logic, computers and number systems; networks and combinations; probability and statistics.

MATH 1201 Number Sense and Open-Ended Problem Solving (3)

Prereq.: MATH 1021. Primarily for students in the early childhood education PK-3 teacher certification curriculum or the elementary grades education curriculum. Cardinality and integers; decimal representation and the number line; number sense; open ended problem solving strategies; expressions and equation solving; primes, factors, and proofs; ratio and proportion; written communication of mathematics.

MATH 1202 Geometry, Reasoning and Measurement (3)

Prereq.: MATH 1201. Primarily for students in the early childhood education PK-3 teacher certification curriculum or the elementary grades education curriculum. Geometry and measurement in two and three dimensions; similarity; congruence; Pythagorean Theorem; written communication of mathematics.

MATH 1431 Calculus with Business and Economic Applications (3)

[LCCN: CMAT 2103, Applied Calculus] This is a General Education course. *Prereq.: MATH 1021 or equivalent. Credit will be given for only one of the following: MATH 1431, MATH 1550, MATH 1551. 3 hrs. lecture; 1 hr. lab.* Differential and integral calculus of algebraic, logarithmic and exponential functions; applications to business and economics such as maximum-minimum problems, marginal analysis and exponential growth models.

MATH 1435 Mathematics for Business Analysis (3)

Prereq.: MATH 1431 or equivalent. Offered by Independent and Distance Learning only. Sets and counting; probability, including conditional probability, discrete and continuous random variables, variance and normal distributions; matrices and echelon method for solving systems of equations; functions of several variables and partial derivatives.

MATH 1550 Analytic Geometry and Calculus I (5)

[LCCN: CMAT 2115, Calculus I] This is a General Education course. *An honors course, MATH 1551, is also available. Prereq.: An appropriate ALEKS placement score. Credit will be given for only one of the following: MATH 1431, MATH 1550, MATH 1551. Analytic geometry, limits, derivatives, integrals.*

MATH 1551 HONORS: Analytic Geometry and Calculus I (5)

This is a General Education course. *Same as MATH 1550, with special honors emphasis for qualified students. Prereq.: An appropriate ALEKS honors placement score. Credit will not be given for this course and MATH 1431 or MATH 1550.*

MATH 1552 Analytic Geometry and Calculus II (4)

[LCCN: CMAT 2124, Calculus II] This is a General Education course. *An honors course, MATH 1553, is also available. Prereq.: MATH 1550 or MATH 1551. Credit will not be given for both this course and MATH 1553 or MATH 1554. Techniques of integration, parameter equations, polar coordinates, infinite series, vectors in low dimensions; introduction to differential equations and partial derivatives.*

MATH 1553 HONORS: Analytic Geometry and Calculus II (4)

This is a General Education course. *Same as MATH 1552 with special honors emphasis for qualified students. Credit will not be given for both this course and MATH 1552 or MATH 1554.*

MATH 1554 Calculus II for Life Sciences (4)

[LCCN: CMAT 2124, Calculus II] This is a General Education course. *Prereq.: MATH 1550. Credit will not be given for this course and either MATH 1552 or MATH 1553. Does not satisfy prerequisite requirement for higher level Math courses. Designed for biological science majors. Techniques of integration, introduction to differential equations, stability of equilibrium points, elementary linear algebra, elements of multivariable calculus, systems of differential equations.*

MATH 2020 Solving Discrete Problems (3)

Prereq.: MATH 1550. Logic, counting, discrete probability, graph theory and number theory.

MATH 2025 Integral Transforms and Their Applications (3)

Prereq.: MATH 1552. Introduction to mathematical proofs and structures using selected topics from analysis; series of functions, Fourier series, Fourier integrals and introduction to wavelets; applications in differential equations and signal processing.

MATH 2030 Discrete Dynamical Systems (3)

Prereq.: MATH 1552 or permission of instructor. Dynamical systems with discrete time and in one spatial dimension; hyperbolicity; quadratic maps; chaos; structural stability; bifurcation theory; and higher dimensional systems.

MATH 2057 Multidimensional Calculus (3)

An honors course, MATH 2058, is also available. Prereq.: MATH 1552. Credit will not be given for both this course and MATH 2058. Three-dimensional analytic geometry, partial derivatives, multiple integrals.

MATH 2058 HONORS: Multidimensional Calculus (3)

Same as MATH 2057, with special honors emphasis for qualified students. Credit will not be given for both this course and MATH 2057.

MATH 2060 Technology Lab (1)

Prereq.: credit or concurrent enrollment in MATH 2057. Students are encouraged to enroll in MATH 2057 and MATH 2060 concurrently. Use of computers for investigating, solving and documenting mathematical problems; numerical, symbolic and graphical manipulation of mathematical constructs discussed in MATH 1550, MATH 1552 and MATH 2057.

MATH 2065 Elementary Differential Equations (3)

Prereq.: MATH 1552. Credit will be given for only one of the following: MATH 2065, MATH 2070, MATH 2090. Ordinary differential equations; emphasis on solving linear differential equations.

MATH 2070 Mathematical Methods in Engineering (4)

Prereq.: MATH 1552. Credit will be given for only one of the following: MATH 2065, MATH 2070, MATH 2090. Ordinary differential equations, Laplace transforms, linear algebra and Fourier series; physical applications stressed.

MATH 2085 Linear Algebra (3)

Prereq.: MATH 1552 or equivalent. Credit will not be given for both this course and MATH 2090. Systems of linear equations, vector spaces, linear transformations, matrices, determinants.

MATH 2090 Elementary Differential Equations and Linear Algebra (4)

Prereq.: MATH 1552. Credit will not be given for both this course and MATH 2065, MATH 2070, or MATH 2085. Introduction to first order differential equations, linear differential equations with constant coefficients, and systems of differential equations; vector spaces, linear transformations, matrices, determinants, linear dependence, bases, systems of equations, eigenvalues, eigenvectors, and Laplace transforms.

MATH 2203 Measurement: Proportional and Algebraic Reasoning (3)

Prereq.: Professional Practice I Block, 12 sem. hrs. of mathematics including MATH 1201 and MATH 1202, and concurrent enrollment in EDCI 3125.

Mathematics content course designed to be integrated in Praxis II with the principles and structures of mathematical reasoning applied to the grades 1-6 classroom. 2 hrs. lecture; 2 hrs. lab/field experience (as part of Professional Practice II Block). Development of a connected, balanced view of mathematics; interrelationship of patterns, relations, and functions; applications of algebraic reasoning in mathematical situations and structures using contextual, numeric, graphic, and symbolic representations; written communication of mathematics.

MATH 3002 Mathematics Classroom Presentations (1)

Prereq.: BASC 2010 and BASC 2011. Under the supervision of a mathematics faculty member and a master teacher, students will prepare and deliver middle and/or high school mathematics lessons that incorporate appropriate use of technology.

MATH 3003 Functions & Modeling (2)

Prereq.: BASC 2011. Using problem-based learning, technology and exploring in depth relationships between various areas of mathematics, students strengthen mathematical understandings of core concepts taught at the secondary level. In addition, connections between secondary and college mathematics are investigated.

MATH 3355 Probability (3)

Prereq.: MATH 2057. Credit will not be given for this course and EE 3150. Suggested for preparation for actuarial exams. Introduction to probability, emphasizing concrete problems and applications; random variables, expectation, conditional probability, law of large numbers, central limit theorem and stochastic processes.

MATH 3903 Methods of Problem Solving (2)

Prereq.: MATH 1552 and MATH 2070, MATH 2085 or MATH 2090 or consent of the department.
Pass-fail grading. May be taken for a max. of 6 hrs. of credit when topics vary. Instruction and practice in solving a wide variety of mathematical and logical problems as seen in the Putnam competition.

MATH 4005 Geometry (3)

Prereq.: MATH 2020. The foundation of geometry, including work in Euclidean and non-Euclidean geometries.

MATH 4019 Calculus Internship Capstone (1)

Prereq.: MATH 3003. Provides opportunities for students to consolidate their mathematical knowledge and to obtain a perspective on the meaning and significance of that knowledge. Students will be paired with experienced graduate students and/or master teachers to participate in the planning and instruction of a recitation section for a calculus course.

MATH 4020 Capstone Course (3)

Prereq.: Students should be within two semesters of completing the requirements for a mathematics major and must have completed a 4000-level mathematics course with a grade of "C" or better, or obtain permission of the department. Provides opportunities for students to consolidate their mathematical knowledge and to obtain a perspective on the meaning and significance of that knowledge. Course work will emphasize communication skills, including reading, writing and speaking mathematics.

MATH 4023 Applied Algebra (3)

Prereq.: MATH 2085 or equivalent. Credit will not be given for both this course and MATH 4200. Finite algebraic structures relevant to computers: groups, graphs, groups and computer design, group codes, semigroups, finite-state machines.

MATH 4024 Mathematical Models (3)

Prereq.: MATH 1552 and credit or registration in MATH 2085 or equivalents. Construction, development and study of mathematical models for real situations; basic examples, model construction, Markov chain models, models for linear optimization, selected case studies.

MATH 4025 Optimization Theory and Applications (3)

Prereq.: MATH 2057 and credit or registration in MATH 2085 or equivalent. Basic methods and techniques for solving optimization problems; n-dimensional geometry and convex sets; classical and search optimization of functions of one and several variables; linear, nonlinear and integer programming.

MATH 4027 Differential Equations (3)

Prereq.: MATH 2057 and MATH 2085. Ordinary differential equations, with attention to theory.

MATH 4031 Advanced Calculus I (3)

Prereq.: MATH 2085, and either MATH 2057 or MATH 2058. Completeness of the real line, Bolzano-Weierstrass theorem and Heine-Borel theorem; continuous functions including uniform convergence and completeness of $C[a,b]$; Riemann integration and the Darboux Criterion.

MATH 4032 Advanced Calculus II (3)

Prereq.: MATH 4031 or equivalent. Derivative, including uniform convergence, the mean value theorem and Taylor's Theorem; absolute and uniform convergence of series, completeness of sequence spaces, dual spaces; real analytic functions; functions of bounded variation, the Stieltjes integral and the dual of $C[a,b]$.

MATH 4035 Advanced Calculus of Several Variables (3)

Prereq.: MATH 4031 or equivalent.
Topology in n-dimensional space, differential calculus in n-dimensional space, inverse and implicit function theorems.

MATH 4036 Complex Variables (3)

Prereq.: MATH 2057. Analytic functions, integration, power series, residues and conformal mapping.

MATH 4038 Mathematical Methods in Engineering (3)

Also offered as ME 4563. Prereq.: MATH 2065 or MATH 2070 or MATH 2090 and MATH 2057. Vector analysis; solution of partial differential equations by the method of separation of variables; introduction to orthogonal functions including Bessel functions.

MATH 4039 Introduction to Topology (3)

Prereq.: MATH 4031 or equivalent. Examples and classification of two-dimensional manifolds, covering spaces, the Brouwer theorem and other selected topics.

MATH 4050 Interest Theory (5)

Prereq.: MATH 3355. Measurement of interest (including accumulated and present value factors), annuities certain, yield rates, amortization schedules and sinking funds, bonds and related securities, derivative instruments and hedging and investment strategies.

MATH 4056 Mathematical Statistics (3)

Prereq.: MATH 3355. Suggested for preparation for actuarial exams. Experimental design, sampling methods, nonparametric methods, hypothesis testing and regression.

MATH 4058 Elementary Stochastic Processes (3)

Prereq.: MATH 2085 and MATH 3355. Markov chains, Poisson process and Brownian motion.

MATH 4064 Numerical Linear Algebra (3)

Prereq.: MATH 1552 or MATH 1553 and one of MATH 2057 or MATH 2058 or MATH 2085 or MATH 2090. Gaussian elimination and LU factorization, tridiagonal systems, vector and matrix norms, singular value decomposition, condition number, least squares problem, QR factorization, iterative methods, power methods for eigenvalues and eigenvectors, applications.

MATH 4065 Numerical Analysis (3)

Prereq.: MATH 2057. An introduction to numerical methods in basic analysis, including root-finding, polynomial interpolation, numerical integration and differentiation, splines and wavelets.

MATH 4066 Numerical Differential Equations (3)

Prereq.: MATH 4065 and either MATH 2070 or MATH 2090 or MATH 2085 with MATH 2065 or MATH 4027. Numerical solutions of initial value problems and boundary value problems for ordinary and partial differential equations.

MATH 4153 Finite Dimensional Vector Spaces (3)

Prereq.: MATH 2057 or MATH 2085. Vector spaces, linear transformations, determinants, eigenvalues, vectors and topics such as inner product space and canonical forms.

MATH 4158 Foundations of Mathematics (3)

Prereq.: MATH 2057 or equivalent. Rigorous development of the real numbers, sets, relations, product spaces, order and cardinality.

MATH 4171 Theory of Graphs (3)

Prereq.: MATH 2085 or consent of department. Fundamental concepts of undirected and directed graphs, trees, connectivity and traversability, planarity, colorability, network flows, matching theory and applications.

MATH 4172 Combinatorics (3)

Prereq.: MATH 2085 or equivalent. Topics selected from permutations and combinations, generating functions, principle of inclusion and exclusion, configurations and designs, matching theory, existence problems, applications.

MATH 4181 Elementary Number Theory (3)

Prereq.: MATH 2057 or MATH 2085. Divisibility, Euclidean algorithm, prime numbers, congruences and topics such as Chinese remainder theorem and sums of integral squares.

MATH 4200 Abstract Algebra I (3)

Prereq.: MATH 2085 or equivalent. Credit will not be given for both this course and MATH 4023. Elementary properties of sets, relations, mappings, integers; groups, subgroups, normal subgroups, quotient groups, homomorphisms, automorphisms and permutation groups; elementary properties of rings.

MATH 4201 Abstract Algebra II (3)

Prereq.: MATH 4200 or equivalent. Ideals in rings, factorization in polynomial rings; unique factorization and Euclidean domains, field extensions, splitting fields, finite fields, Galois theory.

MATH 4325 Fourier Transforms (3)

Prereq.: MATH 1552 and at least one from MATH 2057, MATH 2065, MATH 2070, MATH 2085, MATH 2090. For students majoring in mathematics, physics and engineering. Fourier analysis on the real line, the integers and finite cyclic groups; the fast Fourier transform; generalized functions; attention to modern applications and computational methods.

MATH 4340 Partial Differential Equations (3)

Prereq.: either MATH 2057, MATH 2090 and knowledge of Laplace transforms; or MATH 2057, MATH 2065 or MATH 2070 and MATH 2085. First-order partial differential equations and systems, canonical second-order linear equations, Green's functions, method of characteristics, properties of solutions and applications.

MATH 4345 Special Functions (3)

Prereq.: either MATH 2057 and MATH 2090 or MATH 2057, MATH 2065 or MATH 2070 and MATH 2085. Sturm-Liouville problems, orthogonal functions (Bessel, Laguerre, Legendre, Hermite), orthogonal expansions including Fourier series, recurrence relations and generating functions, gamma and beta functions, Chebychev polynomials and other topics.

MATH 4700 History of Mathematics (3)

Prereq.: MATH 2057 and MATH 2085 and MATH 2020 or equivalent; students entering the course should have a firm sense of what constitutes a proof. This course will have substantial mathematical content; topics such as early Greek mathematics, from Euclid to Archimedes; algebra and number theory from Diophantus to the present; the calculus of Newton and Leibniz; the renewed emphasis on rigor and axiomatic foundations in the 19th and 20th centuries; interactions of mathematics with technology and the natural sciences; biographies of significant mathematicians.

MATH 4997 Vertically Integrated Research (3)

May be taken for a maximum of 24 hours with consent of instructor. This course is intended to provide opportunities for students to learn about mathematical research and to engage in mathematical research in a vertically integrated learning and research community. Undergraduate students, graduate students, postdoctoral researchers and faculty may work together as a unit to learn and create new mathematics. Possible formats include group reading and exposition, group research projects, written and oral presentations. Undergraduate students may have a research capstone experience or write an honors thesis as part of this course.

MATH 4999 Selected Readings in Mathematics (1-3)

Prereq.: consent of department. May be taken for a max. of 9 sem. hrs. credit.

MATH 6301 Implementing Curriculum Standards for Mathematics in the Elementary Grades (1-3)

May be repeated for up to 9 sem. hrs. of credit if department certifies that topics do not overlap. This course is intended primarily for participants in teacher-training programs. Mathematics selected from nationally recognized curriculum standards for the elementary grades, treated with attention to depth and the specific needs of teachers.

MATH 6302 Implementing Curriculum Standards for Mathematics in the Middle Grades (1-3)

May be repeated for up to 9 sem. hrs. of credit if department certifies that topics do not overlap. This course is intended primarily for participants in teacher-training programs. Mathematics selected from nationally recognized curriculum standards for the middle grades, treated with attention to depth and the specific needs of teachers.

MATH 6303 Implementing Curriculum Standards for Mathematics in High School (1-3)

May be repeated for up to 9 sem. hrs. of credit if department certifies that topics do not overlap. This course is intended primarily for participants in teacher-training programs. Mathematics selected from nationally recognized curriculum standards for high school, treated with attention to depth and the specific needs of teachers.

MATH 6893 Seminar in Mathematics for Secondary Teachers (1-3)

Prereq.: consent of department. May be repeated for a max. of 6 sem. hrs. when topics vary. Topics of interest to teachers of secondary school mathematics.

MATH 7001 Communicating Mathematics I (1)

Prereq.: consent of department. Practical training in the teaching of undergraduate mathematics; how to write mathematics for publication; other issues relating to mathematical exposition.

MATH 7002 Communicating Mathematics II (1)

Prereq.: consent of department. Practical training in the written and oral presentation of mathematical papers; the teaching of mathematics and the uses of technology in the mathematics classroom.

MATH 7210 Algebra I (3)

Prereq.: MATH 4200 or equivalent. Groups: Group actions and Sylow Theorems, finitely generated abelian groups; rings and modules: PIDs, UFDs, finitely generated modules over a PID, applications to Jordan canonical form, exact sequences.

MATH 7211 Algebra II (3)

Prereq.: MATH 7210 or equivalent. Fields: algebraic, transcendental, normal, separable field extensions; Galois theory, simple and semisimple algebras, Wedderburn theorem, group representations, Maschke's theorem, multilinear algebra.

MATH 7220 Commutative Algebra (3)

Prereq.: MATH 7211. Commutative rings and modules, prime ideals, localization, noetherian rings, primary decomposition, integral extensions and Noether normalization, the Nullstellensatz, dimension, flatness, graded rings, Hilbert polynomial, valuations, regular rings, homological dimension, depth, completion, Cohen-Macaulay modules.

MATH 7230 Topics in Number Theory (3)

Prereq.: MATH 7211. May be repeated for credit with consent of department for a maximum of 9 credit hours. Topics in number

theory such as algebraic integers, ideal class group, Galois theory of prime ideals, cyclotomic fields, class field theory, Gauss sums, quadratic fields, local fields, elliptic curves, L-functions and Dirichlet series, modular forms, Dirichlet's theorem and Prime Number theorem, Diophantine equations, Circle method.

MATH 7240 Topics in Algebraic Geometry (3)

Prereq.: MATH 7211. May be repeated for credit with consent of department for a maximum of 9 credit hours. Topics in algebraic geometry such as affine and projective varieties, morphisms and rational mappings, nonsingular varieties, sheaves and schemes, sheaf cohomology, algebraic curves and surfaces, elliptic curves, toric varieties, real algebraic geometry.

MATH 7250 Representation Theory (3)

Prereq.: MATH 7211. Representations of finite groups, group algebras, character theory, induced representations, Frobenius reciprocity, Lie algebras and their structure theory, classification of semi-simple Lie algebras, universal enveloping algebras and the PBW theorem, highest weight representations, Verma modules, and finite-dimensional representations.

MATH 7260 Homological Algebra (3)

Prereq.: MATH 7211. Modules over a ring, projective and injective modules and resolutions, abelian categories, functors and derived functors, Tor and Ext, homological dimension of rings and modules, spectral sequences, and derived categories.

MATH 7280 Seminar in Commutative Algebra (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department. Advanced topics such as commutative rings, homological algebra, algebraic curves or algebraic geometry.

MATH 7290 Seminar in Algebra and Number Theory (1-3)

Prereq.: consent of department. May be repeated for credit with the consent of the department. Advanced topics such as algebraic number theory, algebraic semigroups, quadratic forms or algebraic K-theory.

MATH 7311 Real Analysis I (3)

Prereq.: MATH 4032 or equivalent. Abstract measure and integration theory with application to Lebesgue measure on the real line and Euclidean space.

MATH 7320 Ordinary Differential Equations (3)

Prereq.: MATH 2085 and MATH 4031 or equivalent. Existence and uniqueness theorems, approximation methods, linear equations, linear systems, stability theory; other topics such as boundary value problems.

MATH 7325 Numerical Analysis and Applications (3)

Prereq.: MATH 4065 or equivalent. Finite difference methods; finite element methods; iterative methods; methods of parallel computing; applications to the sciences and engineering.

MATH 7330 Functional Analysis (3)

Banach spaces and their generalizations; Baire category, Banach-Steinhaus, open mapping, closed graph, and Hahn-Banach theorems; duality in Banach spaces, weak topologies; other topics such as commutative Banach algebras, spectral theory, distributions, and Fourier transforms.

MATH 7350 Complex Analysis (3)

Prereq.: MATH 7311 or equivalent. Theory of holomorphic functions of one complex variable; path integrals, power series, singularities, mapping properties, normal families, other topics.

MATH 7360 Probability Theory (3)

Prereq.: MATH 7311 or equivalent. Probability spaces, random variables and expectations, independence, convergence concepts, laws of large numbers, convergence of series, law of iterated logarithm, characteristic functions, central limit theorem, limiting distributions, martingales.

MATH 7365 Applied Stochastic Analysis (3)

Prereq.: MATH 7360. Brownian motion, basic stochastic calculus, applications to finance.

MATH 7366 Stochastic Analysis (3)

Prereq.: MATH 7360. Wiener process, stochastic integrals, stochastic differential equations.

MATH 7370 Lie Groups and Representation Theory (3)

Prereq.: MATH 7311, MATH 7210, and MATH 7510 or equivalent. Lie groups, Lie algebras, subgroups, homomorphisms, the exponential map. Also topics in finite and infinite dimensional representation theory.

MATH 7375 Wavelets (3)

Prereq.: MATH 7311 or equivalent. Fourier series; Fourier transform; windowed Fourier transform or short-time Fourier transform; the continuous wavelet transform; discrete wavelet transform; multiresolution analysis; construction of wavelets.

MATH 7380 Seminar in Functional Analysis (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department. Advanced topics such as topological vector spaces, Banach algebras, operator theory or nonlinear functional analysis.

MATH 7384 Topics in the Mathematics of Material Science (3)

Prereq.: consent of department. May be repeated for credit with consent of department for a max. of 9 credit hrs. Advanced topics in the mathematics of material science, including mathematical techniques for the design of optimal structural materials, solution of problems in fracture mechanics, design of photonic band gap materials and solution of basic problems in the theory of superconductivity.

MATH 7386 Theory of Partial Differential Equations (3)

Prereq.: MATH 7330. Sobolev spaces. Theory of second order scalar elliptic equations: existence, uniqueness and regularity. Additional topics such as: direct methods of the calculus of variations, parabolic equations, eigenvalue problems.

MATH 7390 Seminar in Analysis (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department. Advanced topics such as harmonic analysis, partial differential equations, Lie group representation theory, several complex variables or probability theory.

MATH 7400 Combinatorial Theory (3)

Problems of existence and enumeration in the study of arrangements of elements into sets; combinations and permutations; other topics such as generating functions, recurrence relations, inclusion-exclusion, Polya's theorem, graphs and digraphs, combinatorial designs, incidence matrices, partially ordered sets, matroids, finite geometries, Latin squares, difference sets, matching theory.

MATH 7410 Graph Theory (3)

Prereq.: MATH 2085 and MATH 4039, or equivalent. Matchings and coverings, connectivity, planar graphs, colorings, flows, Hamilton graphs, Ramsey theory, topological graph theory, graph minors.

MATH 7490 Seminar in Combinatorics, Graph Theory and Discrete Structures (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department. Advanced topics such as combinatorics, graph theory, automata theory or optimization.

MATH 7510 Topology I (3)

Prereq.: MATH 2057 or equivalent. Basic notions of general topology, with emphasis on Euclidean and metric spaces, continuous and differentiable functions, inverse function theorem and its consequences.

MATH 7512 Topology II (3)

Prereq.: MATH 7510. Theory of the fundamental group and covering spaces including the Seifert-Van Kampen theorem; universal covering space; classification of covering spaces; selected areas from algebraic or general topology.

MATH 7520 Algebraic Topology (3)

Prereq.: MATH 7210 and MATH 7510 or equivalent. Basic concepts of homology, cohomology and homotopy theory.

MATH 7550 Differential Geometry and Topology (3)

Prereq.: MATH 7210 and MATH 7510 or equivalent. Manifolds, vector fields, vector bundles, transversality, Riemannian geometry, other topics.

MATH 7590 Seminar in Geometry and Algebraic Topology (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department. Advanced topics such as advanced algebraic topology, transformation groups, surgery theory, sheaf theory or fiber bundles.

MATH 7710 Advanced Numerical Linear Algebra (3)

Prereq.: MATH 4032 or equivalent; MATH 4153 or equivalent. Gaussian elimination: LU and Cholesky factorizations; Least squares problem: QR factorization and Householder algorithm, backward stability, singular value decomposition and conditioning; Iterative methods: Jacobi, Gauss-Seidel and conjugate gradient; Eigenproblems: power methods and QR algorithm.

MATH 7999 Selected Readings in Mathematics (1-3)

Prereq.: consent of department. May be repeated for credit with consent of department.

MATH 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

MATH 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Mass Communication: Digital Advertising

MC 2040 The Advertising Industry in Society (3)

Introduction to advertising as both a cultural project and producer; emphasis on a strong theoretical foundation for how

advertising campaigns are planned and executed; how audiences make meaning from them; historical context for advertising from traditional media through social/digital media.

MC 3031 Digital Advertising Creative Strategies (3)

Prereq.: MC 2010, MC 2015, MC 2035. *Majors only.*

2 hrs. lecture; 2 hrs. lab. Introduction to advertising creative strategy development and principles of design across media; emphasis on techniques for the creation and production of digital advertising messages.

MC 3035 Quantitative Audience Analysis (3)

Prereq.: MC 2035 or MKT 3401, MC 2040. *Coreq.:* to be taken concurrently with MC 3036. *Majors only.* Practical, quantitative analysis of audiences. Introduction to the role of research in the advertising planning process with a focus on evaluating the quality of secondary data sources and to using data to make strategic advertising decisions.

MC 3036 Qualitative Audience Analysis (3)

Prereq.: MC 2035 or MKT 3401, MC 2040. *Coreq.:* to be taken concurrently with MC 3035. *Majors only.* Basic skills needed to conduct primary research aimed at developing deeper insights into consumer behaviors and attitudes, focusing on qualitative and projective techniques common to the advertising industry.

MC 4031 Advertising Design (3)

Prereq.: MC 2010, MC 2015, MC 2035, and MC 3031. *Majors only.* *2 hrs. lecture; 2 hrs. lab.* Advertising design techniques for print and electronic media, using computerized desktop publishing procedures; development of layouts and storyboards; emphasis on creative approaches to advertising problems.

MC 4032 Advertising Media Sales (3)

2 hrs. lecture; 2 hrs. lab. Analysis of various media types and vehicles to deliver advertising messages, with emphasis on audience measurement techniques, concepts and services.

MC 4040 Advertising Problems (3)

Prereq.: MC 3031, MC 3035, and MC 3036.

Majors only. Seminar in advertising problems and related readings.

MC 4045 Advertising Campaigns (3)

Prereq.: MC 2035, MC 3031, MC 4031 or MC 4040. Majors only. 2 hrs. lecture; 2 hrs. lab. Team development of advertising campaigns on a competitive basis (simulated advertising agency operations); emphasis on research, marketing and advertising problems; budgetary planning, media strategy and creative design.

Mass Communication: General Courses

MC 2000 Introduction to the Mass Media (3)

This is a General Education course. *Credit will not be given for this course and MC 2001. Required of all mass communication majors.* The role of media in a free society with a focus on public affairs. Examines how journalism and persuasive communication (advertising and public relations) affect political and economic democracy.

MC 2001 HONORS: Introduction to Mass Media (3)

This is a General Education course. *Same as MC 2000, with special honors emphasis for qualified students. Credit will not be given for this course and MC 2000.*

MC 2002 Media, Sport and Culture: Amplifying the Sporting-Ism (3)

Examines how sports media function to define and shape the national, ethnic, and gender identities of athletes and fans.

MC 2010 Media Writing (3)

Majors and minors only or permission of department. A grade of "B" or better required for entry into the Manship School of Mass Communication. Credit will not be given for this course and MC 2011. Required of all mass communication majors. 2 hrs. lecture; 2 hrs. lab. Beginning writing course for mass communication. Introduces skills associated with writing, grammar, style and information gathering for mass media

MC 2011 HONORS: Media Writing (3)

Same as MC 2010, with special honors emphasis for qualified students. Credit will not be given for this course and MC 2010.

MC 2015 Visual Communication (3)

Majors and minors only or permission of department. Credit will not be given for this course and MC 2016. Required of all mass communication majors. Strategies for the design, development and production of media programs using advanced computer and video systems. 2 hrs. lecture; 2 hrs. lab

MC 2016 HONORS: Visual Communication (3)

Same as MC 2015, with special honors emphasis for qualified students. Credit will not be given for this course and MC 2015.

MC 2025 The Business of Entertainment Media (3)

This is a General Education course. Examination of the creative, economic and legal factors that drive and constrain American popular media to provide students with the informative and strategic tools to become critical consumers of these media.

MC 2030 Civic Engagement, Youth and Media (3)

This is a General Education course. *Also offered as POLI 2030.* Introduction to models of and skills for citizenship, with emphasis on mass media and political influences on how young Americans engage with civic life.

MC 2035 Digital Brands (3)

Prereq.: majors and minors only or permission of department. Introduction to digital, mobile and social media; personal branding within the digital landscape; theoretical and practical foundations of digital media and its impact on and challenges to society.

MC 2700 Production and Performance (3)

Prereq.: majors only. 2 hrs. lecture; 2 hrs. lab. Production and performance techniques for use in video and audio programming of electronic media.

MC 3019 HONORS: Foundations of Media Research (3)

MC 3080 Mass Media Law (3)

Prereq.: majors and minors only or permission of department. Credit will not be given for this course and MC 3081. Required of all mass communication majors. Legal rights of and restraints on the mass media; emphasis on First Amendment considerations.

MC 3081 HONORS: Mass Media Law (3)

Same as MC 3080, with special honors emphasis for qualified students. Credit will not be given for this course and MC 3080.

MC 3333 Multiculturalism and the Media (3)

Past and present media portrayals of minorities, cultures, and communities that are historically marginalized.

MC 3650 Electronic Media and Society (3)

Organizational and economic foundations of electronic mass media; history, regulation, social significance and responsibility.

MC 3998 Internship (3)

Prereq.: 3.0 GPA in 12 or more hrs. of mass communication and consent of internship faculty supervisor and school dean. Pass-fail grading. May be taken for a max. of 6 hrs. of credit; only 3 hrs. may be counted toward a degree in Mass Communication. At least 15 hours of work per week (28 hrs. in a summer term) under general supervision of a faculty member and direct supervision of a professional in some field of mass communication.

MC 4000 Media and the Military (3)

Consent of instructor; \$50 field fee. 2 hrs. lecture; 2 hrs. lab In depth study of the modern relationship between the media and the military.

MC 4015 Advanced Visual Communication & Multimedia Web Design (3)

Prereq.: MC 2010 and MC 2015. 2 hr. lecture; 2 hrs. lab. Developing multimedia content for the Web; includes photo, audio and video editing.

MC 4042 Mass Media, Sports, and Society (3)

News coverage of the political, economic, and cultural roles of sports institutions and the social roles of professional athletes.

MC 4050 Media Management (3)

Prereq.: Majors only. Concepts and principles of management, entrepreneurial leadership, organizational behavior and strategic planning applicable to media organization; study of social, political, ethical, technological and legal issues confronting media companies.

MC 4090 Media Ethics and Social Responsibility (3)

Prereq.: majors or minors only or permission of department. Credit will not be given for this course and MC 4091. Required of all mass communication majors. Role of the media as socially responsible institutions; ethical issues, policies and practices in gathering, processing and disseminating content.

MC 4091 HONORS: Media Ethics and Social Responsibility (3)

Same as MC 4090, with special honors emphasis for qualified students. Credit will not be given for this course and MC 4090.

MC 4095 American Media History (3)

Credit will not be given for this course and MC 4096. Themes and trends in the historical development of media, including journalism, advertising and public relations.

MC 4096 HONORS: American Media History (3)

Same as MC 4095, with special honors emphasis for qualified students. Credit will not be given for this course and MC 4095.

MC 4111 Mass Media Practices (3)

Prereq.: consent of Manship School of Mass Communication; 1 hr. lecture; 3 hrs. lab. Open to LSU undergraduates who qualify for entry into the University's Accelerated Master's Degree Program. Required of all students who enter the mass communication graduate program without a degree or professional experience in mass communication. May not be counted for undergraduate or graduate degree credit by Mass Communication majors. An intensive course in laboratory practice in the professional skills required of all media practitioners.

MC 4151 Field Experience (3)

Prereq.: permission of instructor. 1 hr. lecture, 4 hrs. lab. Individually arranged assignments and hours for the gathering, writing and producing media content in real-time situations with professional supervision, for regional newspapers, magazines, television stations or other professional media organizations.

MC 4720 Television Creative Projects (3)

Prereq.: majors only. Grade of "B" or better in MC 2010, and one of the following: MC 2005, MC 2040, MC 3010, MC 3504, and permission of the department. Masters students with projects requiring broadcast skills are encouraged to take this course. 1 hr. lecture; 4 hrs. lab. Techniques of television production for non-journalism projects; includes field production, nonlinear video editing, graphics and studio production.

MC 4971 Special Topics in Mass Communication (3)

Also offered as CMST 4971. Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Analysis and discussion of a selected topic that goes beyond present advanced course offerings.

MC 4999 Independent Study (3)

Prereq.: GPA of at least 3.00 and consent of school. Pass-fail grading. Approval of written proposal required before enrolling. Readings, projects, conferences and reports under faculty direction.

MC 7000 Proseminar in Mass Communication and Public Affairs (1)

Pass-fail grading. Open to graduate students of mass communication only. Introduction to graduate study in mass communication; topics include faculty research areas, survey of the field and professional and academic career preparation.

MC 7001 Research Methods in Mass Communication (3)

Quantitative and qualitative methods for investigating critical issues in mass communication; may include surveys, content analysis, experiments, focus groups, interviews and other methods.

MC 7002 Mass Communication Philosophy and Principles (3)

Examination of the most influential principles, philosophies and ideas underlying the development of the mass media in the Western world.

MC 7010 Seminar in Communication Literature (3)

Basic issues and problems in mass communication as highlighted in relevant journals and books; journal articles and books of a catalytic nature.

MC 7012 Survey Research Methods in Mass Communications (3)

Design, development, execution, and analysis of public opinion surveys as related to mass communication problems; practical issues related to survey sampling, questionnaire construction and design, modes in interviewing, interviewer training and interviewer effects and data preparation and analysis.

MC 7014 Qualitative Research Methods in Mass Communication (3)

Application of qualitative methods to mass communication research, creation of qualitative research design; exploration of the philosophy of science, theory construction and the core issues involved in conducting qualitative research.

MC 7015 Mass Communication and Society (3)

Roles of the mass media; responsibilities and rights of the communicator; interaction of mass media and society; media effects.

MC 7018 Legal Problems of the Mass Media (3)

Specific current legal problems affecting the mass media; basic principles of legal research methods.

MC 7019 Media Systems: Policy and Technology (3)

The impact of changing technologies and public policies for entrepreneurship in media enterprises, especially new and emerging media systems.

MC 7021 Mass Communication Theory (3)

Survey and exploration of origins, basic concepts, debates and applications of major theories of mass communication; nature and utility of theoretical understanding of mass media ideologies, industries, content and reception.

MC 7022 Doctoral Seminar in Mass Communication Theory (3)

In-depth examination of key mass communication theories and their research origins.

MC 7023 Critical Cultural Theory (3)

History, evolution and key contributions to critical/cultural theories in mass communication research.

MC 7024 Seminar in First Amendment Law (3)

Prereq.: MC 7018, an equivalent graduate-level mass media law course or permission of the instructor. Principles and theories underlying First Amendment jurisprudence as it relates to the press and speech; an examination of significant cases and legal issues through original research projects.

MC 7031 Media Effects (3)

Major theoretical perspectives pertaining to the social and psychological effects that media have on views and the ways that viewers understand, interpret and react to media messages.

MC 7032 Health and Science Communication (3)

Examination of the structure, meanings and implications of communication about health and science; the contexts in which health and science communication occur; health and science communication theories, terminology and concepts.

MC 7042 Foundations of Strategic Communication (3)

Overview of strategic communication, concentrating on theory, research, planning, implementation and evaluation; how advertising, public relations, social media and marketing are used to develop integrated messages for a variety of audiences.

MC 7043 Strategic Communication Campaigns (3)

Prereq.: MC 7042. Conceptualization and practice of strategic communication in a variety of settings; principles and contemporary practices used to develop and implement campaigns aimed at aligning and advancing organizational and stakeholder goals.

MC 7044 Visual Communication (3)

Discussion and application of visual communication research and theory; usability and aesthetics of web design; applications for journalism, strategic communication and political communication.

MC 7095 Media History: Research and Writing (3)

American mass media history from a public policy perspective; mass media research, writing and the canon of media history scholarship.

MC 7201 Advanced Research Methods in Mass Communication and Public Affairs (3)

Prereq.: MC 7001 or equivalent. Open to graduate students of mass communication and other fields of social sciences. Advanced study of research methods, research designs and analysis applicable to mass communication and public affairs.

MC 7202 Experimental Applications in Mass Communication Research (3)

Evaluation and application of experimental methods and design in mass communication research.

MC 7971 Independent Research: Mass Communication (1-3)

Prereq.: consent of instructor and the associate dean for graduate studies. May be repeated for 6 sem. hrs. of credit. For advanced graduate students who wish to pursue research on special problems, exclusive of thesis or dissertation, for which there is no organized course.

MC 7999 Special Topics in Mass Communication (3)

Prereq.: consent of instructor. May be taken for a max. of 9 hrs. of credit when topics vary. Intensive advanced study with reading and discussion of topics in mass communication.

MC 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

MC 8001 Professional Internship (3)

Prereq.: skills and professional courses as specified in Manship Policy Statement 304; contractual agreement with outside organization's practicum supervisor; consent of faculty intern coordinator; and permission from the school's associate dean for graduate studies. Written report containing a graduate research component is required. Pass-fail grading.

The student works in a professional capacity for at least 15 hours a week (28 hours in summer term) under the general supervision of a faculty member and direct supervision of a management-level practitioner in some field of mass communication (advertising, journalism, electronic media, political communication, public relations or other appropriate organizational position).

MC 8002 Professional Project (1-6)

A research component is required. A project, approved by the student's advisory committee, related to the student's area of professional interest.

MC 8009 Public Affairs Externship (9)

Prereq.: consent of Manship School of Mass Communication. Pass-fail grading. A research component is required. Students may be placed in one of a variety of management settings where the extern will be meaningfully engaged in public affairs planning and execution. An advanced full time field practicum in a professional public affairs context.

MC 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Mass Communication: Journalism

MC 2005 Introduction to Journalism (3)

Prereq.: MC 2010. *2 hrs. lecture; 2 hrs. lab.* Introduction to basic journalism practices, values and ethics including foundational reporting and writing skills needed for creating content across digital platforms.

MC 3002 Feature Writing (3)

Prereq.: MC 2005 and MC 2010 or permission of department. *Credit will not be given for this course and MC 3003. 1 hr. lecture; 4 hrs. lab.* Developing and writing feature stories, vignettes, and other human-interest material.

MC 3003 HONORS: Feature Writing (3)

Same as MC 3002, with special honors emphasis for qualified students. Credit will not be given for this course and MC 3002.

MC 3004 Business Journalism (3)

Prereq.: MC 2010. The fundamentals of reporting as it relates to relevant businesses through examining and reporting on the economy, stock and bond markets, business decisions, regulator's roles, and the effects on consumers.

MC 3005 In-depth Reporting (3)

Prereq.: MC 2005 and either MC 3103 or MC 3104. *Majors only.* Strategies for gathering and analyzing information and data that include traditional and digital public records, databases, and government documents to produce in-depth and investigative reporting projects.

MC 3101 Print Newsgathering and Editing (3)

Prereq.: MC 3102. *Majors only. 2 hrs. lecture; 2 hrs. lab.* Basic skills of reporting and news writing and primary editing process for accuracy, proper grammar and consistency of style.

MC 3102 Broadcast Newsgathering and Producing (3)

Prereq.: MC 2010. *Majors only. 2 hrs. lecture; 2 hrs. lab.* Development of skills to report, write and produce a weekly television newscast and public affairs show.

MC 3103 Advanced Print Newsgathering (3)

Prereq.: MC 2005. *Majors only. 2 hrs. lecture; 2 hrs. lab.* Specific application of newsgathering techniques; covering courts, law enforcement agencies, government, business; using polls and other statistical methods; relational databases.

MC 3104 Advanced Broadcast Newsgathering (3)

Prereq.: MC 2005. *Majors only. 2 hrs. lecture; 2 hrs. lab.* Development of advanced broadcast reporting and presentation skills; newsgathering focus on depth, context and presentation of information.

MC 4250 Public Affairs Reporting (3)

Prereq.: MC 2000; MC 3103 or MC 3104 or *permission of instructor. Majors only. 2 hrs. lecture; 2 hrs. lab.* Using public records to document fraud, abuse or interesting and significant social change.

MC 4260 Long-Format Video Production (3)

Prereq.: MC 3104 or *permission of instructor. Majors only. 2 hrs. lecture; 2 hrs. lab.* Strategies in producing video programs to inform mass electronic media audiences.

MC 4280 Television News Producing (3)

Prereq.: MC 2005, MC 3104. *Majors only. 2 hrs. lecture; 2 hrs. lab.* Instruction in the planning, assembling, producing, and performing of live television newscasts.

MC 4500 Advanced Journalism (3)

Prereq.: MC 2005, MC 3005, and either MC 3103 or MC 3104 or permission of instructor. Majors only. 1 hr. lecture; 3 hrs. lab. Techniques of newspaper editing and production; application of advanced reporting techniques; production of laboratory newspaper; techniques of producing all aspects of a television news program, including videography, nonlinear video editing, producing a newscast and on-set news performance.

MC 7011 News Workers and Their Organizations (3)

The impact of individuals and organizations on the selection and processing of news; examination of the influence of public affairs research on communicators and their organizations.

MC 7040 Crisis Communication (3)

Prereq.: permission of the instructor. Theoretical and practical understanding of the news media's role in a crisis situation and the complexity of covering crisis. Students will understand the principles and problems associated with crisis coverage and management and will implement techniques to tell effective and ethical stories across disaster scenarios.

MC 7220 Issues and Public Affairs Reporting (3)

Prereq.: permission of the instructor. Focuses on democracy and journalism, by exploring the meaning of democratic life and how elements of democratic life are captured as news. Course also examines the role of journalism and politics in a complex society, the role of citizens in public life, new issues coverage within social networks that allow for reporting depth and context and the impact of journalistic work in communities covered.

Mass Communication: Public Relations

MC 3010 Introduction to Public Relations (3)

Prereq.: MC 2010.

Majors and minors only. History, theory and current communication strategies in public relations.

MC 3020 Public Relations Research (3)

Prereq.: MC 2035, MC 3010. *Majors only.* Introduction to the role of research in public relations; utilizing qualitative and quantitative methods and research tools necessary to conduct research that informs the public relations planning process and aides in the assessment/evaluation of PR activities.

MC 4001 Public Relations Writing & Applications (3)

Prereq.: MC 2015, MC 2035, MC 3010. *Majors only.* 2 hrs. lecture; 2 hrs. lab. Development of strategies and technologies used in creating messages to strategically communicate with media, businesses, nonprofits, government and other diverse internal and external audiences.

MC 4002 Strategic Social Media (3)

Prereq.: MC 2035, MC 3010, MC 3020. *Majors only.* Exploration of strategic communication cases that use both traditional and emerging media; emphasis on ethical and practical use of social media tools to complement or supplement traditional communication strategies and tactics.

MC 4004 Case Studies in Public Relations (3)

Prereq.: MC 3010. *Majors only.* Theoretical concepts of public relations practice applied to solution of strategic business, institutional, and organizational problems.

MC 4005 Public Relations Campaigns (3)

Prereq.: MC 3020, MC 4001, and MC 4002.

Majors only. 2 hrs. lecture; 2 hrs. lab. Developing and implementing public relations communication campaigns; hands-on experience in designing and producing print and audio-visual materials for campaigns; emphasis on use of planning and evaluation techniques.

MC 7209 Public Communication Practices (3)

The role mediated communication plays in defining/influencing/altering relationships among various stakeholders and interest groups, with emphasis on mass communication strategies used to formulate and execute public affairs programs.

MC 7210 Public Communication Administration (3)

Principles of public affairs, issues management, and political communication; application of research techniques in communication campaigns, strategies of campaign settings; planning, organizing, staffing, leading and controlling communication campaigns in corporate and governmental settings.

Mass Communication: Political Communication

MC 3504 Introduction to Political Communication (3)

Prereq.: majors and minors only. Introduction to theory and practice of political communication; role of media in political campaigns, press-government relations and policymaking; implications for media, politicians and the public.

MC 3505 Media and Policy Processes (3)

Prereq.: MC 3504. Majors and minors only. Impact of the media on American politics through their interactions with political actors and involvement in the policymaking process; use of strategic political communication in government, and the media's role in spotlighting policy problems and suggesting policy solutions.

MC 3510 Political Communication Research (3)

Prereq.: MC 2010, MC 2015, MC 3504. Majors and minors only. Measurement of public opinion through polls, focus groups, and other forms of communication; use and interpretation of public opinion by policymakers.

MC 3520 Political Communication Writing (3)

Prereq.: MC 2010, MC 2015, MC 3504. 2 hrs. lecture; 2 hrs. lab. Theory and practice of writing for political and public affairs campaigns; research to write strategic messages.

MC 4515 Case Studies in Media and Political Campaigns (3)

Prereq.: majors and minors only. Examination of political campaigns involving American media; the media client and message; developing media messages for political campaigns.

MC 4520 Advanced Seminar in Political Communication (3)

Prereq.: MC 3504 and MC 3505 or consent of instructor. Majors and minors only. Lectures, discussions and research on topics relevant to all aspects of political communication. Includes discussion of theoretical foundations, empirical effects and normative and ethical implications of political communication processes in democratic governance.

MC 4900 Propaganda and Mass Communication (3)

Theory, development and impact of propaganda as a controversial mass communication strategy for influencing public opinion.

MC 7004 The News Media and Governance (3)

News media influence on political actors, processes, and outcomes in American politics; public policy towards the news, strategic political communication, and influences of public officials and other political actors on the framing and structure of content.

MC 7005 Public Opinion and Public Affairs (3)

Formation and development of public opinion; interaction of media organizations and public communication practitioners in building public support for ideas and policies.

MC 7033 Race & Gender in Political Communication (3)

Exploration of the role of race and gender in political communication; the role of political communication in reinforcing or challenging prevailing stereotypes and attitudes about race and gender.

MC 7034 Breaux Symposium Research (3)

Prereq.: MC 7001 and MC 7021. Original research connected to topics raised at the annual Breaux Symposium.

MC 7036 Seminar in Media and Public Affairs Theory (3)

Advanced studies in the application of mass communication theory to public affairs and public policy cases, problems and issues.

MC 7041 Political Communications Writing (3)

Prereq.: permission of the instructor. The study of political and public affairs writing and message development. Students will learn how to research and develop various forms of messages for different audiences and situations.

Mechanical Engineering

ME 2212 Introduction to Mechanical Engineering Design (2)

Prereq.: ENGL 1001, CM 1020 or CM 1030, PHYS 2110.

1 hr. lecture; 2 hrs. lab. Art and science of Mechanical Engineering design; reverse engineering; design methodologies; product realization; professional ethics; professional development.

ME 2334 Thermodynamics (4)

Prereq.: grade of "C" or better in CHEM 1202, MATH 1552, PHYS 2110. Thermodynamic systems and control volumes; thermodynamic properties of simple substances, work and heat; 1st and 2nd law; power and refrigeration cycles; ideal gas mixtures, water-vapor mixtures and psychrometric chart; combustion.

ME 2533 Introduction to Engineering Computation (3)

2 hrs. lecture; 3 hrs. lab. See CSC 2533.

ME 2543 Simulation Methods for Mechanical Engineers (3)

Prereq.: credit or registration in MATH 2070 or MATH 2090. Computer-based problem solving techniques for mechanical engineering; numeric linear algebra and solution of ordinary differential equations; use of computers in simulations of mechanical engineering systems.

ME 2723 Materials of Engineering for Mechanical Engineers (3)

Prereq.: CHEM 1202 and credit or registration in PHYS 2113. Credit will not be given for both this course and ME 2733.

Classification and study of engineering materials, their structure, properties and behavior; typical metals and alloys, plastics and rubber and ceramic materials; phase equilibria and manipulation of properties and behavior by adjustment of composition and

processing variables; responses of engineering materials to stress and environmental variables; emphasis on Mechanical Engineering applications such as fracture and heat treatment processes.

ME 2733 Materials of Engineering (3)

Prereq.: CHEM 1201 and credit or registration in PHYS 2113. Not open to Mechanical Engineering majors. Credit will not be given for both ME 2723 and ME 2733. Classification and study of engineering materials, their structure, properties and behavior; typical metals and alloys, plastics and rubber and ceramic materials; phase equilibria and manipulation of properties and behavior by adjustment of composition and processing variables; responses of engineering materials to stress and environmental variables.

ME 3133 Dynamics (3)

Prereq.: grade of "C" or better in CE 2450 and MATH 1552, credit or registration in CHEM 1212 or PHYS 2108. 2 hrs. lecture; 2 hrs. recitation. Vectorial treatment of kinematics and kinetics of particles and rigid bodies; force, mass, acceleration; impulse and momentum; work and energy.

ME 3143 System Dynamics and Modeling (3)

Prereq.: ME 3133, grade of "C" or better in MATH 2070 or MATH 2090 and credit or registration in ME 3834. Bond graph and lumped-parameter techniques for deriving dynamic equations of physical systems; time and frequency domain analyses, numerical simulation of mechanical systems.

ME 3249 Engineering Practice (1-3)

Su Prereq.: ME 2334 and consent of instructor. Pass-fail grading. A minimum of 6 weeks of full-time employment by an industry participating in the summer program. Selected engineering problems in an industrial environment.

ME 3333 Thermodynamics (3)

Prereq.: PHYS 2110 and MATH 1552 or equivalent. Not open to mechanical engineering majors. Basic laws of thermodynamics, availability, perfect gases and pure substances, fluid flow and basic heat transfer.

ME 3603 Instrumentation and Measurement (3)

Prereq.: EE 3950, ME 3143 and proficiency in English as required by the College of Engineering. 2 hrs. lecture; 3 hrs. lab.

Basic science and technology of instrumentation and measurement systems; fundamental measurement theory; statistical error estimation; error propagation; instrumentation specifications; analog and digital instrumentation fundamentals; data acquisition and analysis; extensive technical report writing.

ME 3633 Manufacturing Processes & Methods (3)

Prereq.: CM 1020 or CM 1030 and ME 2723 or ME 2733. 2 hrs. lecture; 3 hrs. lab. Modern manufacturing processes integrated into total manufacturing systems; CAD/CAM flexible manufacturing operations; metal casting, forming, removal; welding processes and machinery; fine measurement, inspection and quality assurance.

ME 3701 Materials of Engineering Laboratory (1)

Prereq.: grade of "C" or better in ENGL 1001 or equivalent; ME 2723 or ME 2733; and credit or registration in CE 3400. Demonstrative and participative experiments to develop better understanding of characteristics of metals, ceramics and plastics.

ME 3752 Material Selection for Mechanical Engineers (2)

Prereq.: ME 3701 or equivalent; credit or registration in CE 3400. Analysis of mechanical and other properties of engineering materials required for material selection; advanced engineering materials in mechanical engineering; applications and problems in processing and shaping; materials in selected mechanical systems.

ME 3834 Fluid Mechanics (4)

Prereq.: ME 2334, ME 2543, ME 3133; MATH 2057 and a grade of "C" or better in MATH 2070 or MATH 2090. Statics, kinematics and dynamics of continuum liquids and gases; conservation laws (mass, momentum, energy); integral analysis; differential analysis and similarity; internal and external viscous flows; compressible flows.

ME 4133 Machine Design I: Kinematics of Machinery (3)

Prereq.: ME 2543, ME 3133 or equivalent. Kinematic and dynamic analysis and synthesis of mechanisms.

ME 4143 Mechanical Vibrations (3)

Prereq.: CE 3400, ME 3143, ME 4133 and a grade of "C" or better in MATH 2090 or equivalent. Basic principles of oscillating

mechanical systems; single and multiple degrees of freedom; dynamic balancing; applications to mechanical systems; continuous systems vibrations.

ME 4183 Theory and Design of Mechanical Control Systems (3)

Prereq.: grade of "C" or better in MATH 2070 or MATH 2090; ME 3143 and credit or registration in ME 3603. Basic principles, concepts, characteristics and performance of linear feedback control systems; stability of linear systems; frequency response methods; compensator design in the frequency domain.

ME 4193 Vehicle Dynamics (3)

Prereq.: ME 3143. Analysis and performance of wheeled vehicles, including tire mechanics, handling and ride.

ME 4201 Mechanical Engineering Design Laboratory (1)

Prereq.: credit or registration in ME 4183 or equivalent. 3 hrs. lab. Experiments involving basic concepts in machine design.

ME 4202 Mechanical Engineering Capstone Design II (2)

Prereq.: ME 3633, ME 3752, ME 4243, ME 4433, ME 4183. 6 hrs. lab. Principles from heat transfer, thermodynamics, design, fluids and materials courses utilized to complete the project set forth in the preliminary design outline submitted in ME 4243.

ME 4213 Welding Engineering I (3)

Prereq.: ME 2723 or ME 2733; ME 3633; grade of "C" or better in ENGL 1001. Fundamentals of welding and joining; introduction to nondestructive evaluation; basics of welding technology and welded structures; GMAW and GTAW; shielded metal arc welding processes.

ME 4223 Welding Engineering II (3)

Prereq.: ME 2723 or ME 2733; ME 3633; ME 4213 or consent of instructor; grade of "C" or better in ENGL 1001. Fundamentals and intermediate level welding and joining; intermediate nondestructive evaluation emphasizing phased-array-ultrasonics; design calculations of welded structures; advanced welding processes.

ME 4243 Mechanical Engineering Capstone Design I (3)

Prereq.: ECON 2030, ME 2212, ME 4244, senior standing in the College of Engineering and credit or registration in ME 3633, ME 3752, ME 4183 and ME 4433 or equivalent. 2 hrs. lecture; 2 hrs. lab. Design project will be selected and approved (to be completed in ME 4202); project feasibility study and outline of the design project will be completed; design methodology, optimization, product reliability and liability, economics, use of ASME codes and professional ethics.

ME 4244 Machine Design II: Strength Considerations and Component Design (4)

Prereq.: CE 3400 and credit or registration in ME 4133. Design, three-dimensional stress analysis; deflection and stiffness; static and dynamic loading; failure theories and fatigue; fasteners; welded joints; mechanical springs; bearing; gears; shafts; clutches; brakes and couplings; belts and pulleys.

ME 4273 Stress Analysis in Mechanical Engineering (3)

Prereq.: CE 3400. Finite element solutions of 1D and 2D elasticity problems with emphasis on computing accurate stresses using commercial finite element software for a variety of physical configurations and load states.

ME 4293 Introduction to Microsystem Fabrication and Design (3)

Prereq.: ME 3752. Microfabrication techniques; design issues for fabrication systems containing microelectric and micromechanical elements.

ME 4353 Advanced Engineering Thermodynamics (3)

Prereq.: ME 2334 or equivalent. Postulational treatment of laws of thermodynamics; equilibrium and maximum entropy postulates; development of formal relationships; principles and application to general systems.

ME 4383 Thermal System Design (3)

Prereq.: ECON 2030, ME 2334 and ME 4433. Principles and practices concerning the design and optimization of thermal systems.

ME 4433 Heat Transfer (3)

Prereq.: ME 2334 or ME 3333, ME 3834; a grade of "C" or better in MATH 2070 or MATH 2090 or equivalent. Principles of heat transfer by conduction, radiation and convection.

ME 4443 Introduction to Combustion (3)

Prereq.: ME 4433. Basic principles of combustion and their application in solving engineering problems.

ME 4563 Mathematical Methods in Engineering (3)

See MATH 4038.

ME 4573 Interactive Computer Graphics (3)

Also offered as CSC 4356. Prereq.: experience in mathematics and computer programming. Analytical treatment of graphics using the digital computer; graphical display and input devices; computer graphics systems and standards; two- and three-dimensional transformations; geometric modeling; interactive techniques; basic data structures; realism in 3-D graphics; future trends.

ME 4583 Applied Computer Graphics (3)

Also offered as CSC 4357. Prereq.: CSC 4356 or ME 4573 or equivalent. Application of computer graphics techniques to solve specific problems in engineering design, scientific visualization, and digital media.

ME 4611 Thermal System Laboratory (1)

Prereq.: ME 2334 or equivalent and credit or registration in ME 4433 and ME 3603. 3 hrs. lab. Oral presentations required. Thermal system analysis and independent experimentation.

ME 4621 Thermal Science Laboratory (1)

Prereq.: ME 3603, ME 3834, ME 4433, or equivalent. Laboratory demonstrations and experimentation in fluid mechanics, thermodynamics and heat transfer concepts.

ME 4633 Internal Combustion Engines (3)

Prereq.: ME 2334 or ME 3333 or equivalent. Classification of internal combustion engines, gas turbines, cycles with different components, spark-ignition gasoline engines, detonation, carburetion, compression-ignition engines, combustion and diesel knock, fuel atomization and atomizers, combustion chambers, two- and four-stroke cycle engines and supercharging.

ME 4643 Thermal Environmental Engineering (3)

Prereq.: ME 2334 and credit or registration in ME 4433 or equivalent. Design of thermal environment for humans, animals, processes, and inanimate objects; the means of control.

ME 4663 Renewable and Nuclear Power Plant Engineering (3)

Prereq.: ME 2334 and ME 4433 or equivalent. Power plants for industrial and central-station use; emphasis on cycles, design, capabilities and economics of the plant as a whole; components used in various types of plants.

ME 4673 Introduction to Modern Control Theory (3)

Prereq.: ME 4183 or equivalent. State space modeling, controllability, observability and stability, pole placement, optimal control laws via minimum principle and dynamic programming.

ME 4683 Sensors and Actuators (3)

Prereq.: EE 3950, ME 3143. Basic knowledge and operational principles of various transduction (sensing and actuating) methods, especially electro mechanical sensors and actuators; actual designing, building and testing transducers.

ME 4723 Advanced Materials Analysis (3)

Prereq.: ME 2723 or ME 2733, ME 3701 or equivalent. 1 hr. lecture; 6 hrs. lab. Concepts and operation of modern analytical instruments using photon or electron beams and X-rays; macroscopic and microscopic examination of materials coupled with separate and combined testing of mechanical, tribological and corrosion properties.

ME 4733 Deformation and Fracture of Engineering Materials (3)

Prereq.: CE 3400 and either ME 2723 or ME 2733 or equivalent. Effect of temperature, strain rate, corrosion, and microstructure on stress-strain behavior and fracture of engineering materials, including metals, ceramics and plastics.

ME 4743 Kinetics in Materials Processes (3)

Prereq.: ME 2334, ME 2723 or ME 2733 or equivalent. Applications of the principles of diffusion, phase transformation and thermodynamics to describe the kinetics of microstructural evolution in engineering materials.

ME 4763 Fundamentals of Corrosion Science and Engineering (3)

Prereq.: ME 2723 or ME 2733 or equivalent and any first course in thermodynamics. Corrosion principles; polarization, passivation, inhibition and other phenomena; principal methods used in corrosion prevention.

ME 4783 Composite Materials: Manufacturing, Properties and Design (3)

Prereq.: ME 2723 or ME 2733 and CE 3400 or equivalent. Constituent materials, micro- and macromechanics, mechanical behavior, fracture, manufacturing and design of components made of composite materials, including polymer, ceramic and metal matrix materials.

ME 4813 Interdisciplinary Fluid Dynamics: Physical Concepts (3)

Also offered as HNRS 4813. Prereq.: Diff. Equations and Introductory Physics. An introduction to fluid dynamics from a multi-disciplinary perspective, emphasizing theoretical, mathematical and physical concepts of fluid flows and their application to a range of physical scales and disciplines.

ME 4823 Interdisciplinary Fluid Dynamics: Computational Methods (3)

Also offered as HNRS 4823. Prereq.: Diff. Equations, Linear Algebra and Computer Programming. Numerical solution strategies for differential equations relevant to fluid flow and transport processes. Finite-difference, finite-volume and finite-element methods. Parallel computations.

ME 4843 Gas Dynamics (3)

Prereq.: ME 2334; a grade of "C" or better in MATH 2070 or MATH 2090 or equivalent. Derivation and review of basic

equations of compressible fluid flow; reduction of the general problem to 1-D flow; 1-D flow in nozzles with and without friction; 1-D flow with heat addition; normal shock wave, Prandtl-Myer turn and oblique shock waves.

ME 4853 Turbomachinery (3)

Prereq.: ME 2334, ME 3834 and ME 4433. Preliminary design of axial- and radial-flow pumps, compressors and turbines; determination of optimum flow angles and dimensions, blade design, blade selection and performance prediction.

ME 4863 Fluid Power Systems (3)

Prereq.: ME 3834 or equivalent and CE 2450. Theory of hydraulic power components and systems. Analysis and design of fluid power components and systems.

ME 4903 Special Projects for Undergraduates (3)

Prereq.: 3.00 cumulative GPA or consent of instructor, ME 3143, ME 3834, and ME 4133. May be taken for a max. 9 hours of credit, but no more than three hours can count as a Tech A elective. Comprehensive design problems and research investigations.

ME 4913 Aerodynamics (3)

Prereq.: ME 2334, ME 3834, or graduate standing. Fundamental principles and concepts of aerodynamics; inviscid incompressible and compressible flow; and viscous flow phenomena.

ME 4923 Jet and Rocket Propulsion (3)

Prereq.: ME 2334 and ME 3834. Propulsive systems; aerothermochemistry; air-breathing propulsion; rocket propulsion.

ME 4933 Advanced Topics in Mechanical Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Two sections may be taken concurrently.

ME 4943 Special Problems in Aerospace Engineering (3)

Prereq.: senior standing in mechanical engineering or related discipline. May be taken for a max. of 12 sem. hrs. of credit when topics vary. Aerodynamic problems of special interest in the analysis and design of water, land, air and space transportation systems.

ME 4953 Nuclear Reactor Engineering Design (3)

Prereq.: PHYS 2110 and PHYS 2113 or equivalent and credit or registration in ME 4433.

Characteristics of radioactive materials, neutron interactions, the fission process; static criticality, time-dependent behavior of cores and design of nuclear power reactors.

ME 4963 Nuclear Reactor Systems Engineering (3)

Prereq.: ME 4953 or equivalent. Engineering aspects of reactor systems; nuclear fuel cycles, isotope separation, mechanical and thermal design, selection of materials and environmental impact of nuclear facilities.

ME 4973 Space Systems (3)

Prereq.: ME 3133 and credit or registration in ME 4143. Design of spacecraft for orbital operations, space exploration, and human spaceflight; includes mission requirements; astrodynamics; atmospheric entry; top-level design of power; propulsion; altitude determination and control; communications; thermal management; life support; reliability; cost and scheduling; political, commercial, and national security aspects of spaceflight.

ME 7153 Advanced Vibrations (3)

Prereq.: ME 4143 or equivalent. Modeling and response of continuous vibratory systems; inverse problems in vibration; active vibration control; dynamic absorption; wave propagation and reflection; numerical methods for continuous systems.

ME 7163 Advanced Dynamics (3)

Prereq.: a first course in engineering dynamics, and a course in differential equations. Rotating reference frames, rigid body kinetics in three dimensions, central force motion, orbital mechanics, variable mass problems, and Lagrange's equations.

ME 7273 Advanced Stress Analysis in Mechanical Engineering (3)

Prereq.: ME 4273. The nature and limitations of the underlying theory in stress analysis. Computation of verified stresses for properly posed problems using finite element analysis.

ME 7313 Advanced Fluid Dynamics I (3)

Prereq.: credit or registration in MATH 4038 or equivalent. Cartesian tensors; kinematics of fluid motion; mass and momentum conservation equations for Newtonian fluids; vorticity dynamics; irrotational incompressible flow; dynamic similarity and scaling analysis; laminar flow; compressible flow.

ME 7323 Advanced Fluid Dynamics II (3)

Prereq.: ME 7313 or equivalent. General conservation laws and Navier-Stokes equations; incompressible laminar boundary theory; regular and singular perturbation methods; gravity waves; stability of laminar flows; transition and turbulent boundary layers; dynamics and statistical description of turbulence; compressible boundary layer flow.

ME 7333 Hydrodynamic Stability (3)

Prereq.: ME 7323 or equivalent. Linear stability analysis; weakly nonlinear stability analysis; chaos.

ME 7343 Computation of Fluid Flow and Heat Transfer (3)

Prereq.: ME 3834, ME 4433 or equivalent. Finite-difference methods for solving equations of fluid motions and energy; computer program use to solve complex problems involving fluid flow; heat transfer and chemical reaction; mathematical models for turbulence; radiation and combustion; their computing implications; application of prediction procedures for practical situations.

ME 7433 Advanced Heat Transfer I (3)

Steady and transient heat conduction; fundamentals of radiation heat transfer.

ME 7443 Advanced Heat Transfer II (3)

Prereq.: ME 7323 or equivalent. Convection heat transfer.

ME 7533 Numerical Methods in Applied Mechanics (3)

Computer methods used to solve engineering problems; advanced numerical methods.

ME 7633 Advanced Engineering System Dynamics (3)

Prereq.: ME 4183 or equivalent. Dynamic system modeling; bond graphs; state-determined systems; simulation; controllability/observability.

ME 7643 Advanced System Modeling (3)

Prereq.: ME 7633 or equivalent. Mathematical models and dynamic behaviors of engineering systems in multi-energy domains; bond-graph modeling methods, simulations using contemporary software.

ME 7673 Advanced Mechanical Systems Control (3)

Prereq.: ME 4183 or equivalent. Design and analysis of nonlinear control systems; adaptive and robust control techniques; state estimation; stability theory; control and stability of distributed parameter systems.

ME 7743 Defects, Diffusion and Transformations in Solids (3)

Prereq.: ME 2723 or ME 2733 or equivalent. Defects and atomistic mechanisms, dislocation theory, quantitative description of diffusion processes and phase transformations in materials.

ME 7753 Thermodynamics of Solid Materials (3)

Prereq.: ME 2723 or ME 2733 and any first level course in thermodynamics. Review of first and second laws of thermodynamics; material property relationships; chemical equilibrium in reactions; solid solutions and phase diagram enunciations; reaction kinetics and nonequilibrium thermodynamics.

ME 7901 Seminar (1)

Pass-fail grading. All graduate students are expected to attend this course every semester; only 1 sem. hr. of credit in this course allowed toward degree.

ME 7903 Independent Study in Mechanical Engineering (3)

May be taken for a max. of 6 hrs. of credit. Directed independent study for graduate students.

ME 7933 Mechanical Engineering Problems (3)

ME 7953 Advanced Topics in Mechanical Engineering (3)

May be taken for a max. of 6 hrs. of credit when topics vary, with consent of department. Mechanical engineering treatment of various areas of interest.

ME 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

ME 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Medical Physics

MEDP 2051 Radiation Science with Applications (3)

This is a General Education course. *Prereq.: MATH 1021 or MATH 1023.* Matter and energy; structure of the atom and nucleus; radioactivity; types of radiation; radiation interactions and detection; dose and biological effects; radiation safety; background radiation; applications of nuclear science in industry and medicine.

MEDP 4111 Introduction to Medical Imaging (3)

Prereq.: PHYS 2002 or equivalent; MATH 1550 or equivalent. Physics and engineering aspects of medical imaging systems: X-ray imaging, computed tomography, magnetic resonance imaging, ultrasound and nuclear medicine; clinical applications and limitations of the modalities.

MEDP 4331 Radiation Protection and Exposure Evaluation (3)

Prereq.: PHYS 1202 or both PHYS 2112 and PHYS 2113. Control and evaluation of radiation exposure, including external and internal dosimetry, techniques of dose reduction and consequences of radiation exposure.

MEDP 4351 Radiation Detection and Instrumentation (2)

Prereq.: PHYS 3098 or equivalent; consent of instructor. Introduction to the physics of detection, instrumentation and data analysis used to measure ionizing radiation (gamma rays, x-rays, neutrons and charged particles) using scintillation crystal, solid state, film and gas detectors. Provides understanding of underlying principles of detection systems used in radiation therapy, radiological imaging and health physics.

MEDP 4352 Radiation Detection Laboratory (1)

Prereq.: credit or registration in MEDP 4351. 3 hrs. lab. laboratory exercises covering fundamental principles of radiation detection systems and data analysis techniques used for radiation measurements in radiation therapy, radiological imaging and medical health physics.

MEDP 4991 Special Problems in Medical Physics and Health Physics (1-4)

Prereq.: thorough knowledge of mathematics, science and engineering related to the topic or proposed problem and consent of instructor. May be taken for a max. of 12 sem. hrs. of credit when topics vary. Theoretical or experimental problems involving the application of medical physics and health physics technology.

MEDP 4995 Seminar (1)

Course may be repeated on audit basis only. Elective seminar especially for undergraduate minors in nuclear science and undergraduate majors in physics and astronomy with a concentration in medical physics.

MEDP 7111 Advanced Medical Imaging Physics (3)

Prereq.: MEDP 4111, MATH 1552. Topics related to advanced research and clinical imaging physics; theory of image formation; quantitative analysis of imaging systems by Fourier methods and QC/acceptance testing; Radon transform and theory of image reconstruction; tracer methodology for quantitative imaging.

MEDP 7121 Radiobiology (3)

Prereq.: MEDP 4331 or consent of instructor. 2 hrs. lecture; 3 hrs. lab. Effects of ionizing radiation on cellular, molecular and organ systems levels of biological organization; study of x-rays, gamma rays, accelerator beams and neutrons in interaction with living systems; cohesive treatment of radiation biophysics with applications in medical physics and radiation oncology.

MEDP 7210 Clinical Principles of Radiation Therapy (3)

Prereq.: MEDP 7121, MEDP 7331. Open only to students currently enrolled in the Master of Science in Medical Physics and Health Physics program or the PhD in Physics (Medical Physics concentration) program. Introduction by practicing radiation oncologists to the evolution of radiation therapy, general oncology considerations, tumor radiobiology, non-intentional effects of radiation and altered fractionation. Discussion of tumor biopsy and behavior, normal tissue effects and treatment planning and delivery techniques for specific organ systems.

MEDP 7260 Clinical Medical Physics Rotation (4)

Prereq.: credit in MEDP 4111 and MEDP 7331. Open only for students currently enrolled in the Master of Science in Medical Physics and Health Physics program or the PhD in Physics (Medical Physics concentration) program. 12 hrs. clinic. Under the direction of clinical staff, introduction to clinical duties of the medical physicist in radiation therapy and radiology. Radiation therapy physics topics include treatment planning, delivery techniques and dosimetry for brachytherapy and external beam therapy. Radiological imaging physics topics include operation and quality assurance for CT, MRI, and PET imaging systems and radiation safety.

MEDP 7270 Advanced Radiation Therapy Physics (3)

Prereq.: MEDP 7331. Basic principles of clinical indications, radiation delivery, treatment planning, dose calculations, dose measurements and quality assurance for advanced treatment techniques used in radiation therapy (external beam electron, proton and photon therapy and internal brachytherapy).

MEDP 7280 Advanced Clinical Radiation Therapy Physics Rotation (2)

Prereq.: MEDP 7260, MEDP 7270. Open only for students currently enrolled in the Master of Science in Medical Physics and Health Physics program. Under the supervision of clinical medical physics staff, introduction to the planning, delivery and dosimetric aspects of advanced radiation therapy treatments such as brachytherapy, stereotactic radiosurgery, total skin electron therapy, intensity modulated radiotherapy and image guided radiotherapy and to the advanced physical practices of accelerator quality assurance and radiation therapy shielding design.

MEDP 7331 Radiation Therapy Physics (3)

Prereq.: MEDP 4331. Fundamental physical principles, operation of delivery equipment, treatment planning principles, methods of dose calculations, determination of irradiation time from dose prescription, dose measurements and quality assurance for external beam therapy (photons and electrons) and internal brachytherapy.

MEDP 7530 Radiation Shielding (2)

Prereq.: MEDP 4331, MEDP 7537. Calculation of source term, geometric transformations and attenuating factors associated with photon, neutron and charged particle shielding; calculation of dose and dose equivalents; current governmental regulations and professional recommendations for shielding; shielding design for medical radiation facilities.

MEDP 7537 Radiation Interactions and Transport (3)

Also offered as PHYS 7537. Prereq.: PHYS 2203 or equivalent, CSC 2262 or equivalent experience in computer programming. Photon, neutron and electron interactions and energy deposition, the Boltzmann equation, elementary analytical solutions; deterministic computational methods including spherical harmonics and discrete ordinates techniques; continuous slowing down and Fokker-Planck approximations.

MEDP 7538 Monte Carlo Simulation of Radiation Transport (3)

Also offered as PHYS 7538. Prereq.: MEDP 7537 or consent of instructor, CSC 2262 or equivalent experience in computer programming. Radiation transport simulation by the Monte Carlo method; phase-space tracking; dose response estimators, biasing methods; integral form of the Boltzmann equation; condensed-history method for charged particles; neutron, photon and electron transport calculations for shielding and medical physics applications.

MEDP 7991 Advanced Projects in Medical Physics and Health Physics (1-3)

Prereq.: MEDP 4111 or MEDP 7331 and consent of instructor. May be taken for a max. of 6 sem. hrs. credit. Medical physics or health physics projects that study particular aspects of radiation therapy, medical imaging or medical health physics.

MEDP 7992 Advanced Topics in Medical Physics and Health Physics (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Advanced treatment of a specific area of medical physics or health physics technology of current interest.

MEDP 7995 Seminar (1)

Required every semester for degree candidates in medical physics and health physics. Only 1 sem. hr. of credit may be counted toward degree.

MEDP 7999 Report Investigation (1-6)

Prereq.: MEDP 4111 or MEDP 7331 and consent of instructor. May be taken for a max. of 12 sem. hrs credit. Detailed investigation of a research problem or a technical design project.

MEDP 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

Management

MGT 2000 Innovation and Creativity (3)

Prereq.: admitted into the College of Business and Entrepreneurship Concentration or permission of instructor. Focuses on the role of creativity and innovation in product, service or idea generation that may eventually lead to business formation and commercialization; barriers to creativity and innovation; alternative problem-solving approaches.

MGT 3111 Entrepreneurship (3)

Prereq.: ISDS 2000, FIN 3715 or FIN 3716, MKT 3401 (credit or concurrent enrollment) or permission of instructor. Principles of entrepreneurship; feasibility studies; financial and location analysis; marketing; promotion; management; venture capitalism; legal considerations.

MGT 3200 Principles of Management (3)

[LCCN: CMGM 3103, 3313, Principles of Management (Upper Level), Human Resource Management (Upper Level)]
Management functions, including planning, organizing, staffing/human resource management, leading/interpersonal influence and controlling in both domestic and international spheres.

MGT 3203 Independent Study: Advanced Management Topics (1-6)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Independent research under direction of a faculty member.

MGT 3211 Business and Society (3)

Prereq.: senior standing. Open only to College of Business students; open to others with permission of department. Social roles of organizations whose primary function is the accumulation of profits; emphasis on current issues; historical development of business-society relationships.

MGT 3280 Management Internship (3)

Prereq.: junior or senior standing. Pass-fail grading. May be taken for a max. of 6 sem. hrs. of credit. Students, supervised by a management faculty member and an approved business executive, will follow a predetermined schedule of activities while working for a business firm. Hands-on experience in the fields of management, human resource management, organizational behavior, small business management, entrepreneurship and administrative practices.

MGT 3320 Human Resource Management (3)

Prereq.: MGT 3200. Human resource functions, including planning, recruitment, selection, development, maintenance and reward of employees; relationships with environment and employee associations.

MGT 3500 Introduction to Labor Relations (3)

Prereq.: open only to College of Business students; open to others with permission of department. Management's response to organized labor in the workplace; emphasis on U.S. unionization development; government regulation of labor-management relations; union structure, political activity, collective bargaining and contract administration.

MGT 3513 Labor-Management Conflict and Cooperation (3)

Prereq.: open only to College of Business students; open to others with permission of department. In-depth examination of issues important to workplace conflict resolution; topics include, but are not limited to, negotiation strategies and tactics, alternative dispute resolution procedures, employee-management cooperation and/or collective bargaining.

MGT 3830 Strategically Managing Organizations (3)

An honors course, MGT 3831, is also available. Prereq.: FIN 3716, MGT 3200 and MKT 3401 or MKT 3402. Open only to E. J. Ourso College of Business students. Credit will not be given for both this course and MGT 3831. May be taken only during the final 30 hours of course work. Analyzing strategic situations and decision making based on these analyses to ensure the success of for-profit and non-profit organizations.

MGT 3831 HONORS: Strategically Managing Organizations (3)

Same as MGT 3830, with special honors emphasis for qualified students. Credit will not be given for this course and MGT 3830.

MGT 4020 Internship in Entrepreneurship (3)

Prereq.: MGT 3111 or permission of instructor. Pass-fail grading. May be repeated for a max. of 6 sem. hrs. Gaining first-hand knowledge of the business start-up process: practical hands-on experience in business-plan formation.

MGT 4030 Independent Study in Entrepreneurship (3)

Prereq.: MGT 3111 or permission of instructor. May be repeated for a max. of 6 sem. hrs. credit when topics vary. Detailed study of a specific aspect of entrepreneurship.

MGT 4100 Consulting Field Project (3)

Prereq.: MGT 3111; Senior standing or permission of instructor. Strategic focused field based project learning experiences and opportunities in public and private organizations. Team-based approach to offering consulting advice to organizations with the goal of improving their performance. Emphasis on experiential approaches that provide a participative type of learning about the crucial issues faced by organizations.

MGT 4113 Small Business Management (3)

[LCCN: CMGM 3413, Small Business Management (Upper Level)] *Prereq.: senior standing.* A multidisciplinary approach to small business; business start-ups, accounting, finance, marketing, management, promotion, layout, retail management, location analysis and international small business.

MGT 4114 Franchising Management (3)

Prereq.: senior standing for undergraduates or permission of instructor. Understanding the franchising process; becoming a franchiser or franchisee; franchiser start-up, venture capital, finance, legal compliance, disclosure documents, franchise agreements, franchisee start-ups, franchiser-franchisee relationships, anti-trust laws and international franchising.

MGT 4120 Social Entrepreneurship (3)

Prereq.: MGT 3111 or permission of instructor. The course provides a broad theoretical perspective and practical framework for understanding social entrepreneurs and the social ventures they create ranging from local social organizations to large international social ventures leading global change. Introduction to the possibilities of social entrepreneurship and an introduction to the entire social venture creation process and life cycle.

MGT 4322 Employee Selection and Placement (3)

Prereq.: ISDS 2000 or equivalent and MGT 3320. Staffing requirements, recruitment strategies, development and validation of selection procedures, classification and placement of employees; problems associated with person-job matching; socialization of new employees.

MGT 4323 Compensation Administration (3)

Prereq.: MGT 3320. Quantitative and nonquantitative methods of job evaluation; wage level, wage structure, incentive plans; issues of employee compensation.

MGT 4420 Multinational Management (3)

Prereq.: MGT 3200 or equivalent. Management concepts and philosophical bases for international management operations; environmental dynamics, multinational business organizations, cultural constraints, organizational structures and processes and conceptual systems of international operations.

MGT 4523 Legal Issues in Human Resource Management (3)

Prereq.: MGT 3320. An examination of the most significant laws and court rulings influencing companies' employment practices; topics include: anti-discrimination statutes, affirmative action, commonly committed workplace torts, occupational safety and health laws, workers' compensation and wrongful termination.

MGT 4600 Crisis Management (3)

See DSM 4600.

MGT 4620 Human Behavior in Organizations (3)

Prereq.: MGT 3200. Open only to College of Business students; open to others with permission of department. Behavioral sciences applied to understanding human dynamics in organizations; focus on individual, interpersonal, group and intergroup behavior; impact of human behavior on organizational effectiveness.

MGT 4702 Managing Technology Transfer (3)

Models of technological transfer; mechanisms and barriers to technological transfer; technological transfer and industrial innovation; domestic and international aspects of technology transfer.

MGT 7111 Entrepreneurship Management (3)

Investigation, analysis and development of entrepreneurial feasibility studies and business plans.

MGT 7203 Development of Management Thought (3)

Origin and growth of managerial concepts; contributions of leaders associated with major schools of management thought, including: scientific management, management process, empirical, human behavior, social system, decision theory and quantitative methods.

MGT 7212 Seminar in Contemporary Management Topics (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

MGT 7301 Seminar in Human Resources (3)

Role of human resource managers; their relationships with employees, the external environment and top management.

MGT 7600 Organizational Behavior (3)

Behavior of people within organizations; the environment within which organizations function; components of the behavioral unit; processes, interactions and outputs of organizational behavior.

MGT 7620 Strategic Management of Health Care Organizations (3)

Prereq.: Cross-listed with PADM 7620.

MGT 7800 Current Issues in Strategic Management (3)

Contemporary issues in strategic management theory and practice; emphasis on field projects that provide top-management problem-solving experience.

MGT 7811 Research Issues in Strategic Management (3)

Prereq.: MGT 7800 or equivalent. Strategic planning; issues including environmental scanning, goal formulation, strategic implementation, control and evaluation in successful organizations.

MGT 9000 Dissertation Research (3)

"S"/"U" grading.

MGT 9201 Research Methods in Management (3)

Theory building; measurement reliability and validity; significance testing and statistical power; sampling strategies and missing data; multi-level and cross-level issues; research ethics.

MGT 9202 Pre-dissertation Research (1-9)

Pass-fail grading. May be repeated for credit.

MGT 9204 Proseminar in Management (1)

Pass-fail grading. May be taken for a max. of 3 sem. hrs. when topics vary. Required of all inresident PhD students.
Contemporary research and critical issues in management.

MGT 9800 Seminar in Advanced Business Problems (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Directed work in advanced topics.

Military Science

MILS 1010 Rifle and Pistol Marksmanship (1)

Non-immigrant aliens require approval from their governments prior to enrollment. 1 hr. lecture; 1 hr. lab. Restricted to freshmen and sophomores or permission of instructor. Rifle and pistol safety; breathing techniques; zeroing; physical and mental conditioning; sighting and aiming; standard firing positions; practical application on indoor firing range.

MILS 1011 Leadership and Personal Development (1)

Non-immigrant aliens require approval from their governments prior to enrollment. 1 hr. lecture; 1.5 hrs. lab. Introduction to the personal challenges and competencies critical for effective leadership. Focus on developing basic knowledge and comprehension of Army leadership dimensions while gaining an understanding of the ROTC program, its purpose in the Army and its advantages for students.

MILS 1012 Intro to Tactical Leadership (1)

Prereq.: MILS 1011 or permission of instructor. Non-immigrant aliens require approval from their governments prior to

enrollment. 1 hr. lecture; 1.5 hrs. lab. Overview of leadership fundamentals, including setting direction, problem-solving, listening, presenting briefs, providing feedback and effective writing skills.

MILS 1015 Army Physical Fitness Training (1)

May be taken for a max. of 8 sem. hrs. of credit. Open to all LSU students. Non-immigrant aliens require approval from their governments prior to enrollment.

3 hrs. lab. Development of strength, stamina, agility, coordination and flexibility through a combined program of group and individual exercise.

MILS 2161 Innovative Team Leadership (2)

Prereq.: MILS 1011 and MILS 1012 or permission of instructor; Non-immigrant aliens require approval from their governments prior to enrollment. 2 hrs. lecture; 1.5 hrs. lab. Explores the dimensions of creative and innovative tactical leadership strategies and styles by studying historical case studies and engaging in interactive student exercises.

MILS 2162 Foundations of Tactical Leadership (2)

Prereq.: MILS 2161 or permission of instructor; Non-immigrant aliens require approval from their governments prior to enrollment. 2 hrs. lecture; 1.5 hrs. lab. Examines the challenges of leading tactical teams in the complex contemporary operating environment (COE). Continued study of the theoretical basis of the Army leadership framework explores the dynamics of adaptive leadership in the context of military operations.

MILS 3011 Adaptive Tactical Leadership (4)

Prereq.: MILS 2161 and MILS 2162 or equivalent. Non-immigrant aliens require approval from their governments prior to enrollment. 3 hrs. lecture; 3 hrs. lab. Study, practice and evaluation of adaptive team leadership skills as presented with the demands of the ROTC Leader Development and Assessment Course (LDAC). Challenging scenarios related to small unit tactical operations are used to develop self awareness and critical thinking skills.

MILS 3012 Leadership in Changing Environments (4)

Prereq.: MILS 3011. Non-immigrant aliens require approval from their governments prior to enrollment. 3 hrs. lecture; 3 hrs. lab. Integrates the principles and practices of effective leadership, military operations and personal development, in order to adequately prepare for the summer Leadership Development Advanced Course (LDAC).

MILS 3013 ROTC Advanced Camp (3)

Su Prereq.: MILS 3011 and MILS 3012. Non-immigrant aliens require approval from their governments prior to enrollment. To receive academic credit, student must enroll in summer session prior to departure for Advanced Camp. Five week course conducted at an Army post with instructors and cadets representing ROTC programs from the United States, Puerto Rico and Guam. Intense leadership application and training in military skills; oral and written orders, light infantry tactics, weapons systems and confidence building events.

MILS 4011 Developing Adaptive Leaders (4)

Prereq.: MILS 3012. Not for graduate credit. Senior standing required. Non-immigrant aliens require approval from their governments prior to enrollment.

3 hrs. lecture; 3 hrs. lab. Development of proficiency in planning, executing and assessing complex operations, functioning as a member of a staff and providing performance feedback to subordinates. Lessons on military justice and personnel processes prepare students to make the transition to becoming an Army officer.

MILS 4012 Leadership in a Complex World (4)

Prereq.: MILS 4011. Not for graduate credit. Senior standing required. Non-immigrant aliens require approval from their governments prior to enrollment.

3 hrs. lecture; 3 hrs. lab. Explores the dynamics of leading in the complex situations of current military operations in the Contemporary Operating Environment (COE). Case studies, scenarios and exercises are also used to prepare students to face the complex ethical and practical demand of leading as a commissioned officer in the U.S. Army.

MILS 4995 Special Topics in Military History (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Non-immigrant aliens require approval from their governments prior to enrollment.

Marketing

MKT 3401 Principles of Marketing (3)

[LCCN: CMKT 3003, Principles of Marketing (Upper Level)] *An honors course, MKT 3402, is also available. Credit will not be given for both this course and MKT 3402. Lecture-discussion, case analysis, marketing-simulation game; the field of marketing; marketing environment, functions, and institutional structure at a macro level; marketing strategy and policies at a micro level; problems of cost and productivity; view points of society, consumer and marketing manager.*

MKT 3402 HONORS: Principles of Marketing (3)

Same as MKT 3401, with special emphasis for honors students and marketing majors. Credit will not be given for this course and MKT 3401.

MKT 3410 Sports Marketing (3)

Application of marketing concepts to sports and leisure activities; emphasis on planning and strategy development.

MKT 3411 Consumer Analysis and Behavior (3)

Prereq.: MKT 3401. Open only to marketing majors; open to others with permission of the department. Dynamics of consumer markets; their significance to marketing executives; identification and measurement of market segments; analysis of their behavioral patterns as a basis for marketing strategy.

MKT 3413 Marketing Research (3)

Prereq.: MKT 3401 or equivalent and ISDS 2000. Open only to College of Business students; open to others with permission of department. Formulation of marketing policies; theories, concepts, and methodology involved in applying research to marketing problems.

MKT 3421 Marketing Communication: Promotion (3)

Prereq.: MKT 3401. Nature and contributions of personal selling and advertising to the firm's problems of demand stimulation; concepts related to integration and organization of promotional effort to facilitate communication programs for products and/or services.

MKT 3427 Professional Selling (3)

[LCCN: CMKT 3203, Personal/Professional Selling (Upper Level)] *Prereq.: MKT 3401.* Communication theory and sales principles needed for successful sales career; buyer behavior and sales tactics; sales strategies; communication in buyer-seller relationships.

MKT 3431 Retailing Management (3)

[LCCN: CMKT 3103, Retail Management] *Prereq.: MKT 3411.* Store organization, operation and management; retail method of inventory; problems connected with retail buying and selling.

MKT 3500 Marketing Tools Fundamentals (3)

Prereq.: credit or registration in MKT 3401 and permission of department. Coverage of current and emerging computer-based and other tools used by marketing practitioners.

MKT 4423 Sales Management (3)

Prereq.: MKT 3401. Principles of sales planning and control; organizing sales departments, developing territories, motivating sales persons and controlling sales operations.

MKT 4440 Marketing on the Internet (3)

Prereq.: MKT 3401 and permission of department. Appreciation of marketing principles and practices pertaining to the use of the Internet by organizations.

MKT 4443 International Marketing (3)

Prereq.: MKT 3401. Global marketing environment and analytical processes; global marketing as all-encompassing (import-export, joint ventures, foreign subsidiaries, licensing, management contracts); marketing systems in various countries; strategies for international and multinational operations.

MKT 4445 Internship in Marketing (1-6)

Prereq.: senior standing or permission of department. Pass-fail grading. May be repeated for a max. of 6 sem. hrs. credit. Primarily for seniors in marketing. On-the-job experience in approved marketing positions.

MKT 4451 Marketing Management (3)

Prereq.: MKT 3413 and senior standing. Open only to College of Business students; open to others with permission of

department. Analytical principles used in development of strategies for solving marketing problems; policy areas of product, price, channels and promotion integrated in development of the firm's total marketing effort.

MKT 4477 Independent Study: Advanced Marketing Problems (1-6)

Prereq.: permission of department. Pass-fail grading. May be repeated for a max. of 6 sem. hrs. credit when topics vary. For undergraduate students in the E. J. Ourso College of Business with a GPA of 3.00 or above. Independent research under direction of a faculty member.

MKT 4478 Professional Sales Practicum (3)

Credit will not be given for this course and MKT 4479. Prereq.: MKT 3401, MKT 3427, and permission of department. Pass/fail grading. Designed for students who want to gain real-world sales experience by preparing students for professional sales competitions.

MKT 4479 Professional Sales Internship (3)

Credit will not be given for this course and MKT 4478. Prereq.: MKT 3401, MKT 3427, and permission of department. Pass/fail grading. The internship requires departmental approval of the sales content of the internship. Designed for students who want to gain real-world sales experience through a sales internship.

MKT 4490 Services Marketing (3)

Prereq.: MKT 3401. Developing, pricing, distributing and promoting the service; control of quality of customer encounters through service automation and/or employee selection and training; place of marketing in service organization structure; strategic implications of structure of service industries.

MKT 4500 Entrepreneurial Marketing and Sales (3)

Prereq.: MGT 3111 and MKT 3401 and Entrepreneurship Minor or Entrepreneurship Concentration or permission of instructor. This course will look at the role of marketing in entrepreneurial ventures and the role of entrepreneurship in marketing efforts of all firms. Attention will be devoted to understanding the common mistakes entrepreneurs make when it comes to marketing and how to sell an idea/product in an entrepreneurship environment.

MKT 7110 Marketing Tools Foundations and Applications (3)

Prereq.: credit or registration in BADM 7100 or equivalent. Coverage of current and emerging tools used by marketing practitioners, including customer tracking systems, market segmentation tools, market share analysis, competitive intelligence, applications to real and/or simulated market situations.

MKT 7120 Customer Decision-Making and Brand Marketing Strategy (3)

Prereq.: BADM 7100 or equivalent. Treatment of key elements of consumer decision-making with emphasis on formulation of brand marketing strategy based on consumer behavior models, constructs and information.

MKT 7130 Marketing Research and Brand Analysis (3)

Applications of marketing research methods such as qualitative research techniques, marketing surveys, marketing experiments and brand analysis techniques.

MKT 7150 Global Marketing Issues and Strategies (1.5)

Prereq.: BADM 7100 or equivalent. Examination of marketing strategies and tactics available to organizations Seeking to compete with global markets.

MKT 7300 Brand Marketing Strategy (3)

Prereq.: MKT 7120 and MKT 7130. Coverage of brand marketing strategy formulation, including market and competitor analysis, plus resource allocation; emphasis on issues involved in marketing strategy formulation and implementation.

MKT 7450 Topics in Advanced Marketing Management (3)

Prereq.: BADM 7100 or permission of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Survey of marketing management areas such as distribution channels, pricing and product management.

MKT 7471 Marketing Strategy (3)

Design, implementation and evaluation; corporate marketing models; demand forecasting; marketing programming; product, price, promotion and distribution policies; information systems; marketing audit; application of economic, quantitative, and

behavioral tools as strategic aids to marketing management; model-building approach used to demonstrate tool applications in product, price, promotion and distribution strategies.

MKT 7477 Seminar in Advanced Marketing Problems (3)

Prereq.: permission of department. May be taken for a max. of 9 hrs. of credit when topics vary.

MKT 7486 Applications of Marketing Theory (3)

Marketing theory development and testing; theory operationalization and refinement.

MKT 7488 Marketing Models (3)

Prereq.: BADM 7100 or consent of instructor. Synthesis of theory, content area and methodology in marketing through the study of modeling; modeling phenomena, functional forms and analytical techniques of path analysis, simultaneous equation systems, and structural equation modeling.

MKT 7716 Advanced Marketing Research Techniques (3)

Prereq.: BADM 7100. Advanced designs and techniques applied to marketing research; theory and assumptions of analytical methods; marketing applications; use of computer programs; marketing strategy; interpretations of empirical results.

MKT 7717 Advanced Seminar in Consumer Behavior (3)

Prereq.: MKT 4451 or BADM 7100. Open only to doctoral students. Theoretical, conceptual and methodological issues for selected topics in this area.

MKT 7720 Seminar in Marketing Theory and Experimental Methods (3)

Prereq.: BADM 7100 or equivalent. Nature and importance of theory in marketing, interplay of theory and research methods; validity and implications in marketing and consumer research; experimental and quasi-experimental design; pluralism in marketing and consumer research.

MKT 8900 Pre-dissertation Research (1-9)

May be repeated for credit.

MKT 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Music: Ensemble Courses

MUS 4220 Piano Ensemble (1)

May be repeated for a max. of 2 sem. hrs. for degree credit.

MUS 4222 Woodwind Chamber Music (1)

MUS 4223 Brass Chamber Music (1)

MUS 4224 String (or Piano and Strings) Chamber Music (1)

MUS 4225 Collegium Musicum (1)

MUS 4226 Percussion Ensemble (1)

MUS 4227 Marimba Ensemble (1)

MUS 4229 Harp Ensemble (1)

MUS 4230 Gospel Choir (1)

MUS 4232 Men's Chorus (1)

Satisfies the major ensemble requirement.

MUS 4233 Women's Chorus (1)

Satisfies the major ensemble requirement.

MUS 4234 University Chorus (0-1)

Satisfies the major ensemble requirement.

MUS 4235 Chamber Choir (1)

Satisfies the major ensemble requirement.

MUS 4236 A Cappella Choir (1)

Satisfies the major ensemble requirement.

MUS 4240 Opera Chorus (1)

MUS 4250 Tiger Marching Band (1)

Satisfies the major ensemble requirement.

MUS 4251 Wind Ensemble (0-1)

Satisfies the major ensemble requirement.

MUS 4252 Symphonic Band (0-1)

Satisfies the major ensemble requirement.

MUS 4253 Jazz Band (1)

Satisfies the major ensemble requirement.

MUS 4254 Symphonic Winds (0-1)

Satisfies the major ensemble requirement.

MUS 4255 Chamber Jazz (1)

MUS 4260 Philharmonia (1)

MUS 4261 Symphony Orchestra (0-1)

Satisfies the major ensemble requirement.

Music: General Courses

MUS 1001 Voice Class (2)

Open to nonmusic majors with consent of instructor. Group instruction in voice production.

MUS 1002 Voice Class (2)

Open to nonmusic majors with consent of instructor. Group instruction in voice production.

MUS 1010 In Concert (1)

May be taken for a max. of 3 hrs. of credit. 2 hrs. lab. An elective course open to all university students; designed to develop proper audience etiquette and to expose students to a wide variety of music performances.

MUS 1018 Diction for Singers I (1)

2 hr. lab. Entry level course covering pronunciation of Latin and Italian for singing. Utilizing the International Phonetic Alphabet, pronunciation concepts will be supported by recitation and performance of representative song repertoire. Required of all vocal music education and voice performance majors.

MUS 1019 Diction for Singers II (1)

2 hr. lab. Entry level course covering pronunciation of German and French for singing. Utilizing the International Phonetic Alphabet, pronunciation concepts will be supported by recitation and performance of representative song repertoire. Required of all vocal music education majors.

MUS 1020 Performance Craft for Singers (1)

May be taken for a max. of 2 hrs. of credit. Preparatory for MUS 4240. Required of all voice performance majors. Workshop exploring performing artistry for the singer through individual coaching and class exercises such as movement, dance and improvisation; stage terms, stage deportment and stage etiquette; performance anxiety.

MUS 1108 Piano Class (2)

Open only to nonmusic majors. Instruction for the beginner and lower intermediate student.

MUS 1130 Group Piano I (1 each)

Open only to music majors. Required of all non-keyboard music majors who do not meet proficiency requirements. Functional use of the piano.

MUS 1131 Group Piano II (1 each)

Open only to music majors. Required of all non-keyboard music majors who do not meet proficiency requirements. Functional use of the piano.

MUS 1132 Group Piano III (1 each)

Open only to music majors. Required of all non-keyboard music majors who do not meet proficiency requirements. Functional use of the piano.

MUS 1133 Group Piano IV (1 each)

Open only to music majors. Required of all non-keyboard music majors who do not meet proficiency requirements. Functional use of the piano.

MUS 1700 Recital Hour (0)

Pass-fail grading. May be repeated. Weekly student recital and music seminar.

MUS 1701 Foundations of Music Study (3)

A concise survey of the elements of aural and written music theory, musicianship and related skills. Intended to prepare majors and minors in the School of Music for Theory I and subsequent courses.

MUS 1740 Introduction to Music History I (2)

Prereq.: grade of "C" or better in MUS 1740 is prerequisite for MUS 1741. Fundamental elements of music from historical and cultural perspectives; introduction to historical trends, musical genres, major composers and score reading; cultivation of studying and writing skills.

MUS 1741 Introduction to Music History II (2)

Prereq.: grade of "C" or better in MUS 1740 is prerequisite for MUS 1741. Fundamental elements of music from historical and cultural perspectives; introduction to historical trends, musical genres, major composers and score reading; cultivation of studying and writing skills.

MUS 1751 Music Appreciation (3)

[LCCN: CMUS 1013, Music Appreciation] This is a General Education course. *Primarily for nonmusic majors. Credit will not be given for this course and MUS 1755.* The art of music, with emphasis on listening skills; a nontechnical approach to understanding vocabulary and materials of music; correlation of musical literature with other disciplines in the humanities.

MUS 1755 HONORS: Music Appreciation (3)

This is a General Education course. *Primarily for qualified students not majoring in music. Credit will not be given for this course and MUS 1751.* Study of the musical art emphasizing the development of critical listening skills and a non-technical, but thorough musical vocabulary; additional emphasis placed on the historical correlation of both vernacular and art music to corresponding developments in the other fine arts disciplines.

MUS 1799 Rudiments of Music (3)

This is a General Education course. *Not open to music majors.* The grammar of music, including basic notation and elementary construction leading to a study of tonal harmony.

MUS 1800 Technology in Music Education (2)

Music majors only. Introduction to the uses of technology in school music programs; includes discussion of the role and application of technology in K-12 school music settings.

MUS 2000 History of Jazz (3)

[LCCN: CMUS 1023, Jazz Appreciation] **This is a General Education course.** *Open to nonmusic majors.* Survey of the evolution of jazz and jazz styles.

MUS 2018 Diction for Singers III (1)

Required of all voice performance majors. 2 hr. lab. Advanced study of phonetics and pronunciation for German songs; utilizing the International Phonetic Alphabet; pronunciation concepts supported by recitation and performance of representative song repertoire.

MUS 2019 Diction for Singers IV (1)

Required of all voice performance majors. 2 hr. lab. Advanced study of phonetics and pronunciation for French songs; utilizing the International Phonetic Alphabet; pronunciation concepts supported by recitation and performance of representative song repertoire.

MUS 2053 Survey of Music History I (3)

Prereq.: grade of "C" or better in MUS 1741. Music of Western civilization to ca. 1750.

MUS 2054 Survey of Music History II (3)

Prereq.: grade of "C" or better in MUS 2053. Music of Western civilization from ca. 1750 to the present.

MUS 2175 Beginning Folk Guitar (3)

Beginning level performance class; emphasis on literature and techniques used in the performance of folk music; basic music theory analysis.

MUS 2300 Instrumental and Vocal Techniques (1-2)

May be repeated for credit. For prospective secondary school teachers of music. Woodwind and brass techniques for instrumental majors, and instrumental and choral techniques for vocal majors may be taken for 2 hrs. of credit; percussion, strings and voice for instrumental major may be taken for 1 hr. of credit only.
2 hrs. lecture; 1 hr. lab. Development of fundamental skills in wind, string and percussion instruments and voice.

MUS 2400 Jazz Fundamentals for Teachers (1)

For music education majors only. Basic jazz techniques and concepts necessary for jazz ensemble and jazz combo instruction in secondary school settings.

MUS 2731 Music Theory I (4)

Prereq.: Passage of placement exam or grade of "C" or better in MUS 1701. Credit will not be given for this course and MUS 2733. 3 hrs. lecture; 2 hrs. lab. Basic tonal harmony and voice leading, phrase structure, analysis of musical form and genre; sight-singing and keyboard harmony skills, melodic and harmonic dictation.

MUS 2732 Music Theory II (4)

Prereq.: Grade of "C" or better in MUS 2731. Credit will not be given for this course and MUS 2734. 3 hrs. lecture; 2 hrs. lab. Basic tonal harmony and voice leading, phrase structure, analysis of musical form and genre; sight-singing and keyboard harmony skills, melodic and harmonic dictation.

MUS 2733 HONORS: Music Theory I (4)

Same as MUS 2731, with special honors emphasis for qualified students. Credit will not be given for this course and MUS 2731.

MUS 2734 HONORS: Music Theory II (4)

Same as MUS 2732, with special honors emphasis for qualified students. Credit will not be given for this course and MUS 2732.

MUS 2751 Jazz Improvisation I (2)

Prereq.: MUS 2732 or equivalent. Introductory performance course in jazz improvisation; emphasis on its theoretical basis.

MUS 2752 Jazz Improvisation II (2)

Prereq.: MUS 2751 or sight-reading. Continuation of MUS 2751.

MUS 3018 Vocal Pedagogy (3)

Prereq.: 12 sem. hrs. of applied voice study. Principles and processes of voice production; psychology of teaching and studying singing; beginning comparative pedagogy; vocal repertoire for the beginning singer.

MUS 3334 Group Piano V (1)

2 hrs. lab. Functional keyboard skills for rehearsing and accompanying vocal ensembles and soloists; includes sight-reading, score reading, accompanying, playing vocal warm-ups and coaching piano/vocal ensembles.

MUS 3335 Group Piano VI (1)

2 hrs. lab. Functional keyboard skills for rehearsing and accompanying vocal ensembles and soloists; includes sight-reading, score reading, accompanying, playing vocal warm-ups and coaching piano/vocal ensembles.

MUS 3703 Theory Survey (3)

Admission by placement examination. Written and aural aspects of theory.

MUS 3710 Overview of Western Music History (3)

Survey of Western classical music from the Middle Ages to the present day.

MUS 3731 Music Theory III (4)

Prereq.: grade of "C" or better in MUS 2732 is prerequisite for MUS 3731. Credit will not be given for this course and MUS 3733. Advanced tonal harmony; continued form and genre study; post-tonal compositional techniques; basic scoring and score reading; continued mastery of relevant musicianship skills.

MUS 3732 Music Theory IV (4)

Prereq.: grade of "C" or better in MUS 3731 is prerequisite for MUS 3732. Credit will not be given for this course and MUS 3734. Advanced tonal harmony; continued form and genre study; post-tonal compositional techniques; basic scoring and score reading; continued mastery of relevant musicianship skills.

MUS 3733 HONORS: Music Theory III (4)

Same as MUS 3731, with special honors emphasis for qualified students. Credit will not be given for this course and MUS 3731.

MUS 3734 HONORS: Music Theory IV (4)

Same as MUS 3732, with special honors emphasis for qualified students. Credit will not be given for this course and MUS 3732.

MUS 3745 Introduction to Computer Music (3)

Introduction to techniques and technologies in computer music; principles of digital audio, sound design, music synthesis, signal processing and sound art composition.

MUS 3749 Choral Literature and Conducting I (2)

1 hr. lecture, 2 hrs. lab. Elements of conducting choral groups.

MUS 3750 Choral Literature and Conducting II (2)

Prereq.: MUS 3749 or equivalent. Continuation of MUS 3749. 1 hr. lecture, 2 hrs. lab.

MUS 3757 Organ Literature, History and Design (3)

Evolution and development of the organ and its literature; development of keyboard (organ) forms, techniques and idiomatic styles; organ mechanism and action; tonal structure; design problems.

MUS 3758 Organ Literature, History and Design (3)

Prereq.: MUS 3757 is prerequisite for 3758. Evolution and development of the organ and its literature; development of keyboard (organ) forms, techniques and idiomatic styles; organ mechanism and action; tonal structure; design problems.

MUS 3771 Instrumental Conducting I (2)

Elements of conducting instrumental groups.

MUS 3772 Instrumental Conducting II (2)

Prereq.: MUS 3771 or equivalent. Continuation of MUS 3771. 1 hr. lecture; 2 hrs. lab.

MUS 3997 Directed Studies in Music (1-3)

Prereq.: consent of departmental faculty concerned and dean of the School of Music. May be taken for a max. of 6 sem. hrs. of credit. MUS 3997 cannot be used in lieu of a required course in any School of Music curriculum.

MUS 4005 Fundamentals of Musical Theatre Singing: Technique and Repertoire (1)

Prereq.: permission of instructor. May be taken for a max. of 2 hrs. of credit. Fundamentals of musical theatre style singing and repertoire; emphasis on vocal and stage performance of literature appropriate to the singer.

MUS 4020 Introduction to the Alexander Technique (1)

2 hrs. lab. Employing the basic principles of the Alexander Technique; students will begin the process of psycho-physical re-education through experimental movement exercises and hands-on work with the instructor.

MUS 4101 Piano Accompanying (1)

Course may be repeated for a max. of 4 sem. hrs. of credit. Open to pianists by permission of instructor. Individual projects in principles and practical applications of accompanying.

MUS 4120 Reed Making for Double Reed Majors (1)

May be taken for a max. of 8 sem. hrs. but with a max. of 2 hrs. credit towards any degree. Recommended for all oboe and bassoon majors. 1 hr. lab. Principles of double-reed making with development of individual skill and application of reed making and finishing.

MUS 4124 String Literature (1)

Prereq.: 12 sem. hrs. of applied string instrument study or consent of instructor. May be repeated once. Independent study in solo and ensemble literature for stringed instruments.

MUS 4126 Woodwind Literature (1)

Prereq.: 12 sem. hrs. of applied wind instrument study or consent of the instructor. May be repeated once. Independent study in solo and ensemble literature for woodwind instruments.

MUS 4128 Brass Literature and Pedagogy (2)

Prereq.: 12 sem. hrs. of applied brass instrument study or consent of instructor. May be repeated once. Independent study in solo and ensemble literature and methods and materials for instruction in brass instruments.

MUS 4130 Percussion Literature and Pedagogy (2)

Prereq.: 12 sem. hrs. of applied percussion instrument study or consent of instructor. May be repeated once. Independent study in solo and ensemble literature and methods and materials for instruction in percussion instruments.

MUS 4173 Woodwind Instrument Pedagogy (1)

Prereq.: 12 sem. hrs. of applied wind instrument study or consent of instructor. Independent studies in methods and materials for instruction in woodwind instruments.

MUS 4215 Music Technology I (3)

For majors only or by consent of instructor. 3 hrs. lab. Fundamentals of computer applications for educational uses in music; historical and social contexts of computer development; fundamentals in computer systems; configuring hardware; survey of commercial music software; and use of software applications.

MUS 4216 Music Technology II (3)

Prereq.: MUS 4215 or equivalent. 3 hrs. lab. Application of hardware and software unique to music applications: notation, sequencing, technological applications of digital audio, video and acoustical sound specifically applied to the music education environment.

MUS 4241 Opera Theater (2)

May be taken for a max. of 8 hrs. of credit toward the master's degree. Admission by audition. May not be taken concurrently with MUS 9007. Students must schedule this course both fall and spring semesters, unless permission to schedule only one semester is granted by the instructor. 4 hrs. lab plus individual coaching. Techniques of the musical theater; preparation and performance of operatic scenes and complete operas.

MUS 4242 Acting for Opera (1-2)

Prereq.: permission of instructor. May be taken for a max. of 4 sem. hrs. of credit. Techniques of acting for opera; training in audition skills, stage movement, state makeup and vocal and dramatic techniques for operatic roles.

MUS 4351 Song Literature I (2)

The art song repertoire from the classical songs of Haydn and Mozart to the Romantic period.

MUS 4352 Song Literature II (2)

The art song repertoire from the French *mélodie* to contemporary English and American song.

MUS 4400 Orchestral Repertoire for Instrumentalists (1)

Prereq.: permission of instructor. May be taken for a max. of 3 sem. hrs. of credit. Standard orchestral excerpt repertoire for instrumentalists, including: preparation; score study and analysis; specialized practice techniques; and audition strategies. Emphasis on the performance of orchestral excerpts.

MUS 4701 Organ Practicum (2)

Prereq.: consent of instructor.
Techniques of service playing; techniques and materials of organ pedagogy.

MUS 4702 Organ Practicum (2)

Prereq.: consent of instructor. MUS 4701 is prerequisite for 4702. Techniques of service playing; techniques and materials of organ pedagogy.

MUS 4710 Advanced Aural Skills (3)

Prereq.: a grade of "C" or better in MUS 3731. Concentrated work in sight singing with a special emphasis upon skills needed for professional activity in performance, conducting and composition.

MUS 4712 Advanced Form and Analysis (3)

Prereq.: a grade of "C" or better in MUS 3732. Complex forms and harmonic techniques of the 19th century to the present.

MUS 4718 Styles and Practices of Beethoven and the Romantics (3)

Prereq.: a grade of "C" or better in MUS 3732. Tonality, harmony and form in music of the Romantic period; analysis of selected literature and creative writing in the Romantic style.

MUS 4720 Post-Tonal Styles and Practices (3)

Prereq.: a grade of "C" or better in MUS 3732. Study of principal currents of musical composition in the modern era; analysis of selected works and creative application of techniques, procedures and formal schemes studied.

MUS 4721 Modal Counterpoint (3)

Prereq.: grade of "C" or better in MUS 2732 or equivalent. Writing and analysis of contrapuntal music with modal bases.

MUS 4723 Tonal Counterpoint (3)

Prereq.: grade of "C" or better in MUS 2732 or equivalent. Writing of counterpoint in two and three parts to a given cantus firmus; imitative contrapuntal forms such as the invention and the fugue.

MUS 4730 Elementary Orchestration (2)

Prereq.: grade of "C" or better in MUS 2732. Traditional scoring practices.

MUS 4735 Jazz Arranging (2)

Prereq.: MUS 3732 or consent of instructor. Jazz arranging styles and techniques, from Dixieland to modern jazz.

MUS 4745 Computer Music (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Digital sound design, sound synthesis and signal processing; electroacoustic music composition using computers and computer music techniques.

MUS 4746 Seminar in Computer Music and Digital Media (3)

Prereq.: MUS 4745 or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Focused study of various topics in computer music and digital media such as computer music programming, sound diffusion techniques, interactive computer music and digital media systems, intermedia applications, analysis of computer music.

MUS 4749 Seminar in Music History (3)

Prereq.: grade of "C" or better in MUS 2054 or equivalent or permission of instructor. May be taken for a max. of 6 sem. hrs. credit when topics vary.

MUS 4757 Piano Literature I (3)

A survey of the keyboard repertoire from the late renaissance through Haydn and Mozart.

MUS 4758 Piano Literature II (3)

A survey of piano literature from Beethoven to the present.

MUS 4759 History of Jazz Styles (3)

Survey and analysis of the American Jazz idiom from the perspective of historical jazz periods and specific artists.

MUS 4761 The Care and Repair of Band and Orchestral Instruments (1)

Prereq.: MUS 2300 or equivalent. For students with experience in instrumental music and a practical knowledge of the problems in instrumental upkeep. 2 hrs. lab.

MUS 4763 Piano Methods and Materials (3)

Materials and techniques for the piano teacher.

MUS 4764 Piano Methods and Materials (3)

Materials and techniques for the piano teacher.

MUS 4766 Marching Band Techniques (3)

Charting techniques for marching band; emphasis on contemporary drill design, practical projects in charting drill.

MUS 4767 Piano Design, Construction and the Theory of Tuning and Temperament (2)

Open only to music majors. Piano and harpsichord design, construction, regulation, voicing, and tunings; knowledge important to pianists; laboratory experience in regulation, tuning and voicing.

MUS 4769 Supervised Studio Instruction (2)

Program tailored to needs of each student by the major applied teacher who supervised the student's studio teaching program.

MUS 4770 Supervised Studio Instruction (2)

Program tailored to needs of each student by the major applied teacher who supervised the student's studio teaching program.

MUS 4772 Harp Technology and Maintenance (2)

Required of all harp majors. Individual projects and study of harp history and development, design and regulation.

MUS 4773 Orchestral Repertoire for Harp (1)

May be taken for a max. of 8 hrs. of credit. Required of all harp majors. Independent study of major orchestral excerpts; includes audition preparation.

MUS 4774 Harp Pedagogy (2)

Required of all harp majors. Independent studies in materials and methods for the harp teacher.

MUS 4797 Senior Recital (1)

MUS 4798 Senior Composition Recital (1)

Pass-fail grading. Concert of solo and chamber works.

MUS 4799 Coaching in Applied Music (2)

May be repeated for credit. Open to music students with the recommendation of the appropriate applied music faculty. Max. amount of credit applicable toward a degree is 6 sem. hrs.

MUS 4901 Basic Techniques of Audio Recording (3)

Basic properties of audio and various forms of sound energy; analysis of complete audio systems for recording and sound reinforcement and individual system components; aspects of stereo concert recording; emphasis on microphone placement techniques; professional music production techniques, including editing and tape duplication.

MUS 7011 Keyboard Skills for Pianists (1)

Techniques of accompanying, including sight-reading, score reading, transposition and harmonization.

MUS 7018 Advanced German Diction for Singers (1)

1 hr. lecture; 1 hr. lab. The rules of pronunciation utilizing the International Phonetic Alphabet; coaching in the Lied and operatic literature including spoken dialogue.

MUS 7019 Advanced French Diction for Singers (1)

1 hr. lecture; 1 hr. lab. The rules of pronunciation utilizing the International Phonetic Alphabet; coaching in the French art song and operatic literature.

MUS 7020 Advanced Italian Diction for Singers (1)

1 hr. lecture; 1 hr. lab. The rules of pronunciation utilizing the International Phonetic Alphabet; coaching in operatic and song literature; some outside research expected.

MUS 7124 Seminar in String Literature (2)

Methods, solos and chamber music for strings.

MUS 7126 Seminar in Woodwind Literature I (2)

Methods, solos and ensemble literature for woodwinds.

MUS 7127 Seminar in Woodwind Literature II (2)

Methods, solos and ensemble literature for woodwinds.

MUS 7128 Seminar in Brass Literature (3)

Methods, solos and ensemble literature for brass instruments.

MUS 7160 Survey of Jazz Styles (3)

In-depth investigation of the American Jazz idiom from the perspective of historical jazz periods and specific artists.

MUS 7170 Advanced Vocal Pedagogy (2)

Fundamentals of anatomy, physiology and acoustics of voice production; emphasis on vocal registers, breath management and articulation; pedagogical philosophies used to train the classical singing voice in the Western tradition of art song and opera.

MUS 7172 Stringed Instrument Pedagogy (2)

Methods and materials for instruction in string instruments.

MUS 7173 Woodwind Instrument Pedagogy (2)

May be taken for a max. of 2 hrs. of credit for the MM and 2 hrs. of credit for the DMA or PhD. Independent studies in the methods and materials for instruction in woodwind instruments.

MUS 7174 Brass Instrument Pedagogy (2)

Methods and materials for instruction in brass instruments.

MUS 7175 Percussion Instrument Pedagogy (2)

Methods and materials for instruction in percussion instruments.

MUS 7176 Jazz Pedagogy (3)

Pedagogical issues in jazz idiom including effective jazz ensemble directing, selection of appropriate repertoire, improvisational performance practices, effective jazz practice habits and concepts designed to foster creativity.

MUS 7217 Music Technology III (3)

Prereq.: MUS 4215, MUS 4216 or equivalent. Production of technological products for music education; theoretical foundations and research; implementation and evaluation of products in an educational setting.

MUS 7221 Solo Literature for the Voice (3)

Prereq.: MUS 4351 and MUS 4352 or equivalent. Solo vocal literature in German and French; emphasis on styles of performance.

MUS 7222 Solo Literature for the Voice (3)

Prereq.: MUS 4351 and MUS 4352 or equivalent. Solo vocal literature by English, American, Italian, Scandinavian, Eastern European, Russian, Spanish and Latin American composers; emphasis on styles of performance.

MUS 7270 Historical Perspectives of Voice (3)

Development of vocal technique and pedagogical thought from the late 17th century to the present; definition of the bel canto style; historical schools of vocal training; examination of historical writings by Tosi, Mancini, Garcia, Marchesi, Vennard and other individuals of primary historical eminence.

MUS 7271 Principles of Voice Production (3)

Prereq.: COMD 4250 and COMD 4153. Anatomy and physiology of the respiratory, phonatory and articulatory systems used in the production of the human voice; theories of phonation; acoustics of the vocal tract; laryngeal biomechanics; control of fundamental frequency and loudness; study of life-span changes of the voice and care of the human voice.

MUS 7272 Comparative Vocal Pedagogy (2)

Prereq.: MUS 7170 or equivalent. Techniques for teaching collegiate level applied voice; studio structure and management.

MUS 7500 Advanced Teaching Practicum (1-2)

Prereq.: MUS 4769 and MUS 4770 or equivalent. May be repeated for credit. A total of 3 sem. hrs. is applicable to the MM degree. Supervised teaching internship of instrumental and/or vocal instruction in private and/or group settings.

MUS 7501 Piano Pedagogy and Literature I (2)

Prereq.: MUS 4763 and MUS 4764 or equivalent. Piano methods and literature at the elementary and intermediate levels.

MUS 7502 Piano Pedagogy and Literature II (2)

Prereq.: MUS 4763 and MUS 4764; or equivalent. Piano methods and literature at the intermediate and advanced levels.

MUS 7521 Instrumental Accompanying (2)

May be repeated for a max. of 4 sem. hrs. of credit. Repertoire and techniques of accompanying for instrumental genres.

MUS 7522 Vocal Accompanying (2)

May be repeated for a max. of 4 sem. hrs. of credit. Repertoire and techniques of accompanying for vocal genres.

MUS 7570 College Teaching in Music (3)

History of music in higher education; current issues, problems and techniques of college teaching in music; development of effective college-level teaching skills.

MUS 7600 Sources of Music Study & Research (3)

Also offered as LIS 7810. Focuses on finding, evaluating, using and citing materials in print, online and recorded sources for music research.

MUS 7700 Survey of Analytical Techniques (3)

Prereq.: MUS 3703 or passing of the Music Theory Diagnostic Examination. Survey of analytical tools and concepts for common practice and post-tonal practice.

MUS 7701 Pedagogy of Music Theory (3)

Prereq.: MUS 3703 or successful passing of the Music Theory Diagnostic Examination. Techniques for teaching undergraduate music theory and aural skills courses; comparisons of principal philosophies and textbooks.

MUS 7703 Contemporary Musical Practices (3)

6 sem. hrs. applicable to the MM degree when topics vary; 6 additional sem. hrs. applicable to the DMA degree when topics vary. Compositional trends in contemporary music; discussion of books on composition; analysis of major compositions.

MUS 7704 Studies in Schenkerian Analysis (3)

Prereq.: MUS 3703 or successful passing of the Music Theory Diagnostic Examination. May be taken for a max. of 6 sem. hrs. of

credit: 3 sem. hrs. applicable to MM degree; 3 additional hrs. applicable to PhD or DMA degrees. Ideas and practices of tonal theorist Heinrich Schenker; their effect on musical thought and performance in this century.

MUS 7710 Theory and Analysis of Tonal Music (3)

Prereq.: MUS 3703 or successful passing of the Music Theory Diagnostic Examination. Readings and practice in various approaches to the analysis of music of the tonal era (ca. 1600-1900).

MUS 7711 Seminar in Post-Tonal Musical Analysis (3)

Prereq.: MUS 3703 or successful passing of the Music Theory Diagnostic Examination. May be taken for a max. of 6 hrs. of credit when topics vary. Analytical study of specific composers, works or styles.

MUS 7721 Survey of Choral Literature I (3)

A survey of choral literature beginning with Gregorian Chant and ending with the Baroque period of music, with emphasis on preparation for performance.

MUS 7722 Survey of Choral Literature II (3)

A survey of choral literature beginning with the Classical period and ending with contemporary music for chorus, with emphasis on preparation for performance.

MUS 7723 Survey of Wind Literature I (2)

A survey of chamber wind literature (6 to 20 performers) from the late Renaissance to the present.

MUS 7724 Survey of Wind Literature II (2)

A survey of orchestra, large wind ensemble and large wind band literature (more than 20 performers) from the French Revolution to the present.

MUS 7725 Survey of Symphonic Literature I (2)

A survey of orchestral works beginning with the Baroque period of music and ending with the early Romantic; emphasis on preparation for performance.

MUS 7726 Survey of Symphonic Literature II (2)

A survey of orchestral works beginning with the Romantic period and ending with 20th century music for orchestra, with emphasis on preparation for performance.

MUS 7741 History of Music Theory I (3)

Prereq.: MUS 3703 and MUS 3710 or successful passing of the Music Theory and Music History Diagnostic Examinations. History of technical writings on music, ca. 500-1600; acoustics, notes and scales, intervals, tuning systems, modes, counterpoint, mensuration, musical poetics, speculative theory.

MUS 7742 History of Music Theory II (3)

Prereq.: MUS 3703 and MUS 3710 or successful passing of the Music Theory and Music History Diagnostic Examinations. Music theory from ca. 1600 to 1900; development of species counter-point and figured bass theory; the rise of harmonic theory and rhythmic/phrase analysis; 19th-century expansions of harmonic theory and formal analysis.

MUS 7745 Advanced Computer Music (3)

Prereq.: MUS 4745 or consent of instructor. Advanced techniques in digital sound synthesis and composition; analysis/resynthesis techniques, granular synthesis, physical modeling, interactive computer music performance and algorithmic composition using computers; survey of representative music from the genre.

MUS 7746 Graduate Seminar in Experimental Music and Digital Media (3)

Prereq.: MUS 7745 or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Focused study of various topics in experimental music and digital media such as development of new computer music systems, interactive computer music, multimedia composition, alternative human-computer interfaces for music, experimental music performance, sound installations and advanced analysis of computer music.

MUS 7747 History of Electroacoustic Music (3)

The history of electroacoustic music; developments in technology, aesthetics and style since ca. 1900 to present; survey and analysis of representative music from the genre.

MUS 7749 Special Studies in Piano Literature (3)

Each course may be taken for a max. of 6 hrs. of credit when topics vary. Total amount of credit applicable to MM degree limited by student's advisory committee. Works of certain composers for the keyboard, such as selected concertos.

MUS 7750 Special Studies in Piano Literature (3)

Each course may be taken for a max. of 6 hrs. of credit when topics vary. Total amount of credit applicable to MM degree limited by student's advisory committee. Works of certain composers for the keyboard, such as selected concertos.

MUS 7751 Ancient and Medieval Music (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination. History of music from ancient Greeks and Hebrews through the 14th century.

MUS 7752 Music of the Renaissance (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination. Music of the 15th and 16th centuries.

MUS 7753 Music in the Baroque Era (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination.

MUS 7754 Music in the Classical Era (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination.

MUS 7755 Music in the Romantic Era (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination.

MUS 7756 Music in the Modern Era (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination.

MUS 7757 American Music (3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination. The most important phases in development of music in the U.S.

MUS 7762 Measurement and Evaluation in Music (3)

Teacher-designed and standardized tests in music; learning theories.

MUS 7764 Comparative Methods in Music Education (3)

Techniques in teaching music; functional projects; approaches and texts evaluated with emphasis on curriculum construction.

MUS 7765 Philosophical Bases for Music Education (3)

Various philosophical bases for music education including their origin, function, development and implementation.

MUS 7766 Current Issues in Music Education (3)

Develop broad perspectives from a multi-faceted review of issues affecting music education practice. Examine important contexts from which effective teachers make informed decisions.

MUS 7767 Experimental Research in Music (3)

Prereq.: ELRC 4006 and MUS 7905. Primarily for doctoral students in music. Systematic investigation of musical behavior and music learning; collection, quantification and treatment of data; current research.

MUS 7771 Advanced Choral Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of choral music with emphasis on score analysis and performance practices.

MUS 7772 Advanced Choral Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of choral music with emphasis on score analysis and performance practices.

MUS 7773 Advanced Band Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of wind music with emphasis on score analysis and performance function.

MUS 7774 Advanced Band Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of wind music with emphasis on score analysis and performance function.

MUS 7775 Advanced Orchestral Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of symphonic music, with emphasis on score analysis and performance practices.

MUS 7776 Advanced Orchestral Conducting (3)

Prereq.: previous study of conducting. Each course may be taken once for the MM and once for the DMA or PhD. Independent study of the techniques required to conduct all styles of symphonic music, with emphasis on score analysis and performance practices.

MUS 7777 Advanced Keyboard Literature I (3)

Prereq.: MUS 4757, MUS 4758 or equivalent. Each course may be taken twice; once for the MM and once for the DMA. Genres and styles from earliest examples of keyboard literature through the most recent trends.

MUS 7778 Advanced Keyboard Literature II (3)

Prereq.: MUS 4757, MUS 4758 or equivalent. Each course may be taken twice; once for the MM and once for the DMA. Genres and styles from earliest examples of keyboard literature through the most recent trends.

MUS 7797 Master's Pedagogy Project (2)

Pass-fail grading. Completion of a 45-minute oral presentation and short supporting paper on a pedagogical topic.

MUS 7798 Master's Recital (1-3)

Prereq.: MUS 4797 or equivalent. May be taken for a max. of 3 sem. hrs. of credit.

MUS 7799 Advanced Coaching in Applied Music (2)

May be repeated for credit. Max. amount of credit applicable toward a degree is 4 sem. hrs.

MUS 7800 Introduction to Research in Music (3)

Required of all doctoral students; recommended for master's students who will write theses. Development of music research skills including knowledge of research resources and materials; use of library facilities; practice in a clear and logical writing style; and use of wide variety of methodologies and modes of inquiry.

MUS 7801 Psychology of Music (3)

Physical and psychological bases of musical phenomena including physical properties of sound production, transmission,

reception and perception; affective, physiological and cognitive responses to musical stimuli; and learning theories as related to musical development, ability and preference.

MUS 7903 Seminar in Music History (2-3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination. Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MM degree; only 12 additional sem. hrs. applicable to the PhD; maximum for MM and PhD combined is 18 sem. hrs.

MUS 7904 Seminar in Music History (2-3)

Prereq.: MUS 3710 or successful passing of the Music History Diagnostic Examination. Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MM degree; only 12 additional sem. hrs. applicable to the PhD; maximum for MM and PhD combined is 18 sem. hrs.

MUS 7905 Seminar in Music Education (2-6)

Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MMEd degree; only 12 additional sem. hrs. applicable to the PhD; maximum for MMEd and PhD combined is 18 sem. hrs.

MUS 7906 Seminar in Music Education (2-6)

Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MMEd degree; only 12 additional sem. hrs. applicable to the PhD; maximum for MMEd and PhD combined is 18 sem. hrs.

MUS 7921 Seminar in Music Theory (3)

Prereq.: MUS 3703 or successful passing of the Music Theory Diagnostic Examination. May be taken for a max. of 6 sem. hrs. of credit applicable to the MM degree when topics vary and only 12 additional sem. hrs. of credit applicable to the PhD when topics vary. Maximum for MM and PhD combined is 18 sem. hrs. of credit.

MUS 7928 Seminar in Choral Repertoire (3)

Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MM degree; only 12 additional sem. hrs. applicable to the DMA; maximum for MM and DMA combined is 18 sem. hrs .

MUS 7929 Seminar in Choral Repertoire (3)

Each course may be taken 3 times for credit when topics vary. Only 6 sem. hrs. applicable to the MM degree; only 12 additional sem. hrs. applicable to the DMA; maximum for MM and DMA combined is 18 sem. hrs .

MUS 7997 Individual Projects in Music (1-3)

Prereq.: consent of departmental faculty concerned and dean of the School of Music. May be repeated for credit as follows: for master's degree, 3 sem. hrs.; for doctoral degree, 6 sem. hrs. beyond the master's or a total of 9 sem. hrs. if both master's and doctoral totals included.

MUS 7998 Special Topics in Music (2-3)

May be taken for a max. of 9 hrs. of credit when topics vary. Advanced studies in individual subject areas of music.

MUS 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

MUS 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

MUS 9001 Doctoral Solo Recital (1-3)

May be repeated twice (max. of 6 sem. hrs. of credit). Students specializing in organ may repeat four times (max. of 12 sem. hrs. of credit).

MUS 9002 Second Doctoral Solo Recital (1-3)

MUS 9003 Doctoral Lecture Recital (1-3)

Does not fulfill final project requirement for DMA (MUS 9010).

MUS 9005 Concerto with Orchestra (1-2)

MUS 9006 Major Solo Part in an Oratorio or a Cantata (1)

MUS 9007 Doctor of Musical Arts Role in Opera (1-3)

May be repeated for credit. May not be taken concurrently with MUS 4241. A max. of 4 hrs. of credit may be applied toward the DMA degree.

MUS 9008 Doctor of Musical Arts Chamber Music Recital (2)

May be repeated for credit.

MUS 9009 Research and Monograph (1-12)

“S/U” grading. May be repeated until monograph is completed. For DMA candidates in performance only.

MUS 9010 Lecture Recital with Written Document (1-9)

Pass-fail grading. May be repeated. Research, preparation, and presentation of a lecture recital and corollary written document.

MUS 9758 Repertoire (3)

May be taken for a max. of 9 hrs. of credit; however, amount of credit applicable to a degree is determined by student's advisory committee.

MUS 9759 Repertoire (3)

May be taken for a max. of 9 hrs. of credit; however, amount of credit applicable to a degree is determined by student's advisory committee.

MUS 9901 Doctoral Seminar in Musical Composition (1-3)

May be repeated for credit; max. amount of credit applicable to a degree is 12 sem. hrs. Participation in the Composer's Forum is part of course work.

MUS 9925 Seminar in Literature and Style in Performance: Voice (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9926 Seminar in Literature and Style in Performance: Voice (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9929 Seminar in Literature and Style in Performance: Organ (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9930 Seminar in Literature and Style in Performance: Organ (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9931 Seminar in Literature and Style in Performance: Strings (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9935 Seminar in Literature and Style in Performance: Brass (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9936 Seminar in Literature and Style in Performance: Brass (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

MUS 9937 Seminar in Literature and Style in Performance: Percussion (3)

Historical developments of the various performance areas with concentration on their literature, important pedagogical principles, and stylistic problems related to each medium.

Music: Graduate Applied Music Courses

MUS 7030 Graduate Voice (2-6)

MUS 7031 Graduate Piano (2-6)

MUS 7033 Graduate Organ (2-6)

MUS 7034 Graduate Harp (2-6)

MUS 7035 Graduate Violin (2-6)

MUS 7036 Graduate Viola (2-6)

MUS 7037 Graduate Cello (2-6)

MUS 7038 Graduate String Bass (2-6)

MUS 7039 Graduate Flute (2-6)

MUS 7040 Graduate Oboe (2-6)

MUS 7041 Graduate Clarinet (2-6)

MUS 7042 Graduate Saxophone (2-6)

MUS 7043 Graduate Bassoon (2-6)

MUS 7044 Graduate Trumpet (2-6)

MUS 7045 Graduate French Horn (2-6)

MUS 7046 Graduate Euphonium (2-6)

MUS 7047 Graduate Trombone (2-6)

MUS 7048 Graduate Tuba (2-6)

MUS 7049 Graduate Percussion (2-6)

MUS 7051 Graduate Composition (2-6)

MUS 7053 Graduate Electroacoustic Composition (2-6)

MUS 7054 Graduate Jazz Study (2-6)

MUS 7055 Graduate Collaborative Keyboard (2-6)

Music: Primary Applied Music Courses

MUS 3130 Primary Voice (2-3)

MUS 3131 Primary Piano (2-3)

MUS 3133 Primary Organ (2-3)

MUS 3134 Primary Harp (2-3)

MUS 3135 Primary Violin (2-3)

MUS 3136 Primary Viola (2-3)

MUS 3137 Primary Cello (2-3)

MUS 3138 Primary String Bass (2-3)

MUS 3139 Primary Flute (2-3)

MUS 3140 Primary Oboe (2-3)

MUS 3141 Primary Clarinet (2-3)

MUS 3142 Primary Saxophone (2-3)

MUS 3143 Primary Bassoon (2-3)

MUS 3144 Primary Trumpet (2-3)

MUS 3145 Primary French Horn (2-3)

MUS 3146 Primary Euphonium (2-3)

MUS 3147 Primary Trombone (2-3)

MUS 3148 Primary Tuba (2-3)

MUS 3149 Primary Percussion (2-3)

MUS 3151 Primary Composition (2-3)

MUS 3153 Primary Electroacoustic Composition (2-3)

MUS 3154 Primary Jazz (2-3)

Music: Secondary Applied Music Courses

MUS 2130 Secondary Voice (2-3)

MUS 2131 Secondary Piano (2-3)

MUS 2133 Secondary Organ (2-3)

MUS 2134 Secondary Harp (2-3)

MUS 2135 Secondary Violin (2-3)

MUS 2136 Secondary Viola (2-3)

MUS 2137 Secondary Cello (2-3)

MUS 2138 Secondary String Bass (2-3)

MUS 2139 Secondary Flute (2-3)

MUS 2140 Secondary Oboe (2-3)

MUS 2141 Secondary Clarinet (2-3)

MUS 2142 Secondary Saxophone (2-3)

MUS 2143 Secondary Bassoon (2-3)

MUS 2144 Secondary Trumpet (2-3)

MUS 2145 Secondary French Horn (2-3)

MUS 2146 Secondary Euphonium (2-3)

MUS 2147 Secondary Trombone (2-3)

MUS 2148 Secondary Tuba (2-3)

MUS 2149 Secondary Percussion (2-3)

MUS 2151 Secondary Composition (2-3)

MUS 2152 Secondary Guitar (2-3)

MUS 2154 Secondary Jazz Study (2-3)

Music Education

MUED 1000 Foundations of Music Education (3)

Credit will not be given for both this course and EDCI 1000. Course is for music majors only. 2 hrs. lecture; 1 hr. lab. Field observations in music at the elementary and secondary levels; historical and philosophical foundations, introduction to instructional strategies, professional organizations, legal aspects and national standards of music education.

MUED 1700 Orientation to Music Education (1)

Course may be repeated for a max. of 2 sem. hrs. of credit. An overview of the music education profession; orientation to collegiate music study; and initial field experiences in the schools.

MUED 2045 Teaching Music in Diverse Settings (3)

Prereq.: MUED 1000. Credit will not be given for both this course and EDCI 2045. Site-based teaching practica. 2 hrs. lecture; 2 hr. teaching practicum each week. Managerial aspects of instruction; application of research in music teaching and learning principles to the classroom and rehearsal setting.

MUED 3170 Principles of Teaching Elementary School Music (3)

Prereq.: MUED 1000 and MUED 2045. Materials, methods and current trends in music teaching at the elementary level; curriculum development.

MUED 3171 Principles of Teaching Secondary School Music (3)

Prereq.: MUED 1000 and MUED 2045. Materials, methods and current trends in music teaching at the secondary level; rehearsal techniques.

MUED 3630 Student Teaching in Music (9)

Prereq.: see "Requirements for Student Teaching" in the School of Music section of this catalog. Pass-fail grading. 1 hr. lecture; 30 hrs. lab.

Nuclear Science

NS 4352 Environmental Radiological Evaluation and Remediation (3)

Prereq.: MEDP 2051. Natural radiation environment with respect to primordial radionuclides; cosmic radiation and cosmogenic radionuclides; body burdens and radiation doses from the natural environment; man-made environmental radioactivity and radiation; environmental concerns in radioactive waste management; environmental contamination from radiation incidents.

NS 4411 Fundamentals of Nuclear Radiation Science (3)

Prereq.: MATH 2065 or MATH 2090; PHYS 1202 or both PHYS 2112 and PHYS 2113.

Concepts of atomic and nuclear structure, transmutations and decay. Interactions of charged particles, neutral particles and photons with matter; radiation attenuation and energy deposition. Introduction to nuclear fission and fusion; application to nuclear power. Biological effects of radiation.

NS 4570 Nuclear Facility Safety (3)

Prereq.: PHYS 1202 or both PHYS 2112 and PHYS 2113. Safety analysis of facilities that utilize radiation sources including hospitals and industrial sites; accident sequences; dispersal of radionuclides; estimation of dose and dose commitments; and engineered safeguards.

Oceanography & Coastal Sciences

OCS 1005 Introduction to Oceanography (3)

This is a General Education course. *An honors course, OCS 1006, is also available. Credit will not be given for this course and OCS 1006.* The world's oceans, their origin and evolution; interactions between physical, geological, chemical and biological processes in the marine environment; use and abuse of oceans.

OCS 1006 HONORS: Introduction to Oceanography (3)

This is a General Education course. *Similar to OCS 1005 with special honors emphasis for qualified students. Credit will not be given for this course and OCS 1005.* Interaction of physical, geological, chemical and biological processes of the ocean; effect of human activities.

OCS 2007 Introduction to Marine Sciences: Geological and Physical (4)

Lab fee and fieldtrip required. 3 hrs. lecture; 3 hrs. lab. Geological and physical processes in marine and aquatic environments; including their influence on coastal Louisiana.

OCS 2008 Introduction to Marine Sciences: Life Processes (4)

Also offered as BIOL 208 at Southern University in Baton Rouge. Laboratory and fieldtrip fees and two fieldtrips are required for this course. 3 hrs. lecture; 3 hrs. lab. Ecological processes in marine and aquatic settings; their influence on coastal Louisiana.

OCS 2011 Introduction to MATLAB for Coastal Sciences (3)

Prereq.: OCS 2007 and OCS 2008. Credit will not be given for both this course and CSC 1240 or CSC 2533. Introduction to MATLAB with emphasis on coastal and oceanographic data visualization and manipulation. Importing large datasets into MATLAB, 2D and 3D plotting, mapping and overlaying quantitative data on maps, manipulating color bars, animating data and exporting images for presentations and publications.

OCS 3103 Global Environmental Cycles (3)

Prereq.: CHEM 1201 and MATH 1550; credit or registration in BIOL 1201.

Major hydrologic and elemental cycles on the planet, global change and processes, energy balance, including problems associated with climate, pollution, population and resources.

OCS 3200 Hurricanes and Typhoons (3)

Comprehensive introduction to hurricanes as a multi-faceted phenomenon; hurricane meteorology and climate variability, oceanographic response and coastal impacts, storm deposition, ecological effects, geological and historical records and societal impacts and response.

OCS 3999 Undergraduate Research in Coastal Sciences (1-6)

Prereq.: permission of Department. May be taken for a max. of 6 sem. hrs. of credit. Individual research problems in the oceanographic and coastal sciences.

OCS 4001 Special Topics in Oceanography and Coastal Sciences (1-6)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

OCS 4005 Special Field Topics in Oceanography and Coastal Sciences (1-6)

Su *May be taken for a max. of 9 sem. hrs. of credit when topics vary.* Variable number of weeks at Louisiana Universities' Marine Consortium (LUMCON) or Gulf Coast Research Laboratory (GCRL).

OCS 4012 Biology of Marine Vertebrates (3)

Prereq.: 8 sem. hrs. of introductory zoology or biology with laboratory. Evolution, life history, ecology and management of marine fishes, reptiles, birds and mammals.

OCS 4015 Oceans to Estuaries I: Geology and Physics (5)

Prereq.: Two semester introductory courses in physics and geology, MATH 1550 and MATH 1552. Major geological and physical processes and products within the world's oceans, including the open ocean, continental margins, estuaries and intertidal areas.

OCS 4016 Oceans to Estuaries II: Chemistry and Biology (5)

Prereq.: CHEM 1201 and CHEM 1202, BIOL 1201 and BIOL 1202, MATH 1550 and MATH 1552. Major chemical and biological processes within the world's oceans, including the open ocean, continental margins, estuaries and intertidal marshes.

OCS 4021 Weather Analysis and Satellite Meteorology (3)

Diagnostic studies of surface and upper-air observational data using isoplething charts and satellite images to represent the state of the atmosphere over both land and sea; the use of satellite technology in weather forecasting including cloud identification, wind direction, storm development and air quality.

OCS 4024 Coastal Morphodynamics (3)

Also offered as GEOG 4024. Prereq.: MATH 1021, MATH 1022 or MATH 1023. Basic morphodynamic processes operative along coasts; emphasis on modern coastal process response systems.

OCS 4030 Techniques of Research Presentation (1)

Pass-fail grading. May be taken for a max. of 2 hrs. of credit when topics vary. Guidelines for effective scientific seminar presentations.

OCS 4038 Scientific Writing and Collaboration (2)

Credit will not be given for this course and ENGL 4002. Provide experience in writing for scientific publications; practical advice on ethical behavior and working collaboratively with others; topics include grammar, organization of manuscripts, preparation of figures and tables, organization of journals, submission process, reviewing other's manuscripts, formal and informal models of group dynamics, personality types, practical tips for working with others and time management.

OCS 4060 Introductory Estuarine Dynamics (3)

Prereq.: MATH 1552 or consent of instructor. Classification of estuaries, description of coastal and estuary flow regimes, tides, hydrodynamic measurements, mixing, stratification, dispersion, river discharge and weather influence and dynamical processes in Louisiana estuaries and bays.

OCS 4061 Introductory Oceanographic Data Analysis (3)

Prereq.: MATH 1550 and EXST 2201. 2 hrs. lecture; 2 hrs. lab. Targeting time series and space series from the ocean and coastal waters using techniques of data analysis such as digital sampling, filtering and spectrum analysis. These techniques are applicable to different types of data, including wind, water level, currents, DO, nutrients, optical parameters, etc. from moorings or moving platforms.

OCS 4090 Marine and Environmental Microbiology (3)

Also offered as BIOL 4090. Prereq.: BIOL 2051 or equivalent. Characterization and ecology of estuarine, open-ocean and terrestrial microorganisms and the role these microbes play in cycling organic and inorganic compounds; microbial activity in biogeochemical cycles extreme environments and organic pollutants; indicator species; pathogenic bacteria and their transmission in the environment and seafood-related contamination.

OCS 4126 Chemical Oceanography (3)

See GEOL 4081.

OCS 4128 Wetland Hydrology and Hydrodynamics (3)

Prereq.: MATH 1550, MATH 1552, GEOL 1001 or equivalent. Basic surface water and ground water hydrology in wetland environments with an emphasis on hydrologic principles, application of hydrologic techniques to wetlands and understanding of hydrodynamics in these ecosystems.

OCS 4165 Environmental Chemistry of Wetlands (3)

Prereq.: CHEM 2060 or equivalent. Transformations of pollutants and toxic substances that affect the solubility, bioavailability, fixation and degradation of organic and inorganic substances in wetlands; emphasis on biological and physiochemical properties of wetlands that enhance this degradation and fixation.

OCS 4170 Physical Oceanography (3)

Prereq.: two semester course in Physics and MATH 1552 or MATH 1554; or consent of instructor. Physics of the ocean; with emphasis on dynamical problems; general circulation of the ocean; physical properties of sea water; flow dynamics in the earth's rotating coordinate system, estuarine and coastal ocean dynamics.

OCS 4210 Geological Oceanography (3)

Prereq.: two-semester introductory course in geology. Principles of marine geology; sediments and sedimentation in the marine environment from the near shore zone to the abyssal plain; geological effects of bottom currents; sea-level history; geophysical techniques; continental drift and sea-floor spreading; tectonic history of the oceanic crust.

OCS 4308 Plants in Coastal Environments (3)

Also offered as BIOL 4308. Prereq.: one-semester course in biology or ecology or consent of instructor. Weekend field trips as needed. Ecology of Louisiana's major coastal plant communities; emphasis on influence of environmental factors controlling plant distribution and productivity; physiological, morphological and anatomical mechanisms aiding plant survival; man's impact on Louisiana's coastal plant communities.

OCS 4372 Estuarine Ecology (4)

Prereq.: graduate standing or consent of instructor. Preparation of field trips; synthesis and presentation of data collected on field trips to coastal areas. 3 hrs. lecture; 2 hrs. lab. Ecological processes in estuaries, shallow coastal waters and associated coastal environments; training and field use of equipment required for estuarine research.

OCS 4410 Ecosystem Modeling and Analysis (3)

Prereq.: MATH 1552 and consent of instructor. Mathematical description and analysis of ecological systems; emphasis on systems approach using matter and energy flow models for quantifying and analyzing interdependence and dynamics in ecosystems; linear flow models, dynamic nonlinear models, optimization models, stochastic models and computer techniques for modeling, validation, sensitivity analysis and parameter optimization.

OCS 4465 Coastal Zone Management (3)

Non-law students encouraged to participate. Written and oral presentation required; special projects relating to the primary field of interest permitted. Resources allocation and environmental quality issues in coastal and estuarine zones of the U.S.; evaluating alternative solutions to topical coastal zone issues; preparing legal devices for meeting the issues, such as legislation, regulations, contract provisions and deed restrictions; traditional law courses in water law, environmental law, natural-resources law and land-use planning.

OCS 4550 Biological Oceanography (3)

Prereq.: two-course undergraduate science sequence above 2000 level or graduate student status in science department. Participation in oceanographic cruise is generally required. Biology of open oceans, continental shelves and large river deltas.

OCS 4560 Wetland Loss, Restoration and Management (3)

Prereq.: two-course sequence in science above the 2000 level. Participation in field trips to local wetlands and management agencies is required. Coastal wetland loss, restoration and management; wetland values, use and potential management issues.

OCS 4565 Restoration Ecology/Ecological Restoration (3)

Prereq.: permission of instructor. Field trips. Students are responsible for paying some expenses for field work. 2 hrs. lecture; 1 hr. lab. The science of restoration ecology and the practice of ecological restoration.

OCS 4600 Global Environmental Change: Past, Present and Future (3)

Also offered as ENVS 4600. Patterns and processes of global climate changes during the Quaternary and their links to the biosphere, cryosphere and ocean; proxies and archives; climate forcing and biotic responses; current warming and future impacts; human ecology of climate change; energy supply and human health; sustainability and policy.

OCS 4999 Capstone in Coastal Environmental Science (1)

See ENVS 4999.

OCS 7001 Advanced Topics in Marine Sciences (1-6)

May be taken for a max. of 9 sem. hrs. when topics vary.

OCS 7028 Numerical Modeling of Ocean Circulation (3)

Prereq.: OCS 4170 and ME 4563 or equivalent. Numerical modeling of ocean dynamics; numerical methods; parameterization schemes; review of state-of-art models.

OCS 7029 Case Studies in Coastal Ecosystem Modeling (3)

Coastal ecosystem modeling in the northern Gulf of Mexico region. Modeling theory; case studies; overview of existing ecosystem models.

OCS 7110 Toxicology of Aquatic Environments (3)

See ENVS 7110.

OCS 7112 Concepts in Marine Ecotoxicology (3)

Prereq.: ENVS 7110. See ENVS 7112.

OCS 7120 Dynamical Oceanography (3)

Prereq.: consent of instructor. Dynamics of rotating, stratified, incompressible fluids with particular application to the oceans; conservations equations and boundary conditions, surface and internal gravity waves, vorticity, geostrophic adjustment, coastal trapped waves, Rossby waves, wind-driven ocean circulation.

OCS 7121 Ecology and Management of Tropical Estuaries (3)

Su *Prereq.:* 6 hrs. in marine ecology and consent of instructor. Two-week field trip/lecture at the Centro de Investigaciones y Estudios Avanzados in Merida, Mexico. 20 hrs. per week. Intensive field course concerning aspects of ecology and management of tropical estuaries; plankton systems, sea grasses, mangroves, benthos, nekton and macroalgae; emphasis on human impact and management, global change issues and use of modeling.

OCS 7123 Oceanographic Data Analysis (3,3)

Prereq.: MATH 1550 or equivalent. Statistical techniques for analysis of oceanographic time and space series data; spectrum analysis; objective analysis; empirical orthogonal functions and Kalman filters.

OCS 7129 Global Climate Change and Wetlands (3)

Prereq.: consent of instructor. Impact of projected global climate change on stability and functioning of coastal and interior wetland ecosystems; feedback of biogeochemical changes in wetlands caused by climate change.

OCS 7130 Marine Isotope Biogeochemistry (3)

Prereq.: graduate standing or consent of instructor. Concepts and laboratory principles for stable and radioactive isotopes, first-hand experience interpreting isotopic data, modern applications in oceanography and biogeochemistry.

OCS 7131 Marine Geochemistry (3)

Geochemical processes in the marine environment, including water column geochemistry, pore water processes and interactions across the sediment-water interface and early diagenesis; emphasis uranium-thorium decay series radionuclide applications in marine geochemistry.

OCS 7132 Coastal Physical/Chemical Systems: Analytical Methods (3)

Prereq.: consent of instructor. 2 hrs. lecture; 3 hrs. lab. Sampling techniques; proper handling and preservation of samples; sample processing for analysis; application of spectroscopy and chromatography analytical instrumentation for the determination on nutrients, trace and toxic metals, synthetic organics (pesticides and industrial organics), and petroleum hydrocarbons in water, soil and sediment samples; techniques presented in terms of application of analytical chemistry to environmental and natural systems.

OCS 7165 Biogeochemistry of Wetland Soils and Sediments (3)

Same as AGRO 7165. Microbial and redox chemistry processes in fresh water, brackish water and estuarine-flooded soils and sediments affecting the trans-formations of nutrients and toxic materials.

OCS 7170 Satellite Oceanography (3)

Prereq.: OCS 4170 or equivalent. Oceanographic measurements and observations using satellite-borne sensor systems; radiation-ocean-atmosphere interactions, satellite systems, sensor design and data types; analysis of infrared, visible and microwave data for deep ocean, coastal and estuarine phenomena.

OCS 7175 Environmental Optics (3)

Nature of light, solar radiation and its transmission through the atmosphere and the aquatic medium and interactions in the medium; optical instrumentation and applications.

OCS 7310 Harmful Algal Blooms (3)

Harmful algal species and associated syndromes; ecophysiological processes for bloom initiation and development; eutrophication; grazing impact; impacts on marine life and human health; identification, enumeration of algae and toxin detection techniques; HAB management.

OCS 7317 Marine Ecology (3)

See BIOL 7120.

OCS 7330 Preparing for Studies of Fish and Other Aquatic Resources (3)

A detailed, semi-quantitative introduction to current biological and technological methodologies for studying fishes and aquatic habitats, with emphasis on reducing bias introduced by study design and choice of sampling gears.

OCS 7335 Marine Fisheries Recruitment (3)

Examining the relationship between fish life history, recruitment dynamics and harvest potential, and local-, meso-, and global-scale oceanographic processes.

OCS 7340 Population Dynamics Modeling (3)

Broad survey of the quantitative modeling methods used for simulating animal and plant population dynamics; use of these models in both theoretical analyses and management decision-making.

OCS 7431 Stock Assessment Analysis of Marine Fish Populations (3)

Prereq.: OCS 7340. Quantitative methods used in management of fish populations through analytical approaches used to model populations and statistically estimate the status of the resources used in management decision-making.

OCS 7432 Marine Fisheries Policy and Management (3)

Policies used in managing marine fisheries in the U.S. and internationally with emphasis on scientific role. Survey and analysis of domestic and international legislation and treaties.

OCS 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

OCS 8900 Advanced Reading and Literature Research (1-6)

May be taken for a max. of 6 sem. hrs. of credit.

OCS 8901 Advanced Field Research (1-6)

May be taken for a max. of 6 sem. hrs. of credit.

OCS 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Public Administration

PADM 5010 Statistical Methods for Public Administration (3)

Also offered as ISDS 5010. Prereq.: college algebra. Open only to students in the MPA program. 2 hrs. lecture; 2 hrs. lab.
Descriptive measures for populations and samples; basic probability theory; distributions of discrete and continuous random variables; hypothesis testing and estimation for means, variances, and proportions; measures of association; regression analysis; index numbers; applications in public administration.

PADM 5600 Microeconomic Theory for Policy Analysis (3)

Also offered as ECON 5600. Open only to students in the MPA program or by consent of instructor. Concepts and analytical tools of microeconomics; their relevance for decision and policy making in public and nonprofit sectors; theories of demand, production, cost, market structures and distribution; analysis of economic problems and policies, efficiency criteria, social impacts and limitations of the market system.

PADM 7610 Healthcare Organization and Finance (3)

Overview of effective management of healthcare organizations, including understanding of their historical development and future opportunities; current issues relating to financing, regulation, reimbursement, managed care systems and system integration.

PADM 7620 Strategic Management of Healthcare Organizations (3)

Prereq.: Cross-listed with MGT 7620. Strategic planning and development of healthcare organizations focusing on long-term viability; integration of financial decisions with organizational goals and consumer health.

PADM 7640 Legal and Ethical Issues in Health Care Management (3)

Legal and ethical issues in the delivery of health care including patients' rights, organizational responsibilities, malpractice issues, relationships among patient, providers and insurers, governmental influence in health care management, patient-provider relationships, advancing technology and medical alternatives, working with limited resources and organizational efforts to deal with ethical issues.

PADM 7710 Public Financial Management (3)
