Prereq.: Cross-listed as FIN 7710. Financial management of public agencies, including sources of financing for different levels of governments, debt financing and capital budgeting, as well as other related topics.

PADM 7800 Independent Study in Public Administration (3)

Prereq.: at least 15 credit hours of graduate work; prior written approval of faculty supervising work. May be taken for a max. of 6 hrs. of credit. Independent study by MPA student.

PADM 7850 Public Administration Internship (3)

Prereq.: at least 15 credit hours of graduate work completed and approval of the Director of the MPA program. Required of all pre-service MPA students. Work within a federal, state or local government unit, nonprofit or private concern interfacing with the public sector; regular meetings with faculty; submission of a research report to the faculty member; internship is designed to connect academic and professional training to actual work experience.

PADM 7851 Public Administration Practicum (3)

Prereq.: at least 15 sem. hrs. of graduate course work completed and approval of the Director of the MPA Program. Required of all MPA students. In-service students will be determined by the MPA Director. Related academic and professional training to work experience associated with the student's present employment; regular meetings with faculty and preparation of research paper indicating relationship between principles of public management and work activities.

PADM 7900 Public Administration Colloquium (3)

Required of all MPA students in final semester of program; research project required. Legal, ethical, economic, political and management principles used in assessing public administration topics; policy and administration issues.

PADM 7902 Seminar in Public Policy (3)

Also offered as POLI 7902.

PADM 7904 Seminar in Policy Dilemmas and Decisions (3)

Exploring the difficulties of collective decision-making and the instruments and processes involved in reaching consensus; areas of focus include the structure of strong arguments, models and rationality, participation, and probabilistic reasoning using contemporaneous and historical case studies.

PADM 7910 Public Administration Theory and Practice (3)

Contents and boundaries of public administration as discipline; topics include historical development of public administration as a field of study; organizational theory; professional ethics; policy development; management techniques to enhance productivity and performance; leadership; diversity; and other relevant issues for public managers; case studies used intensively.

PADM 7911 Organizational Analysis for Public and Nonprofit Organizations (3)

Analyzing elements of effective organizational functioning in the public and nonprofit sectors, and the development of diagnostic skills to improve performance; incorporates organizational behavior and theory in the study of achieving effectiveness, efficiency and growth.

PADM 7912 Public Personnel Policy (3)

Explores human resource policy, including procedures and principles of personnel administration; traditional aspects of personnel administration including recruiting, job classification, evaluation, and compensation and dynamic topics include workforce diversity, drug abuse, whistle blowing, sexual discrimination, labor relations and other relevant issues.

PADM 7913 Advanced Topics in Human Resource Management in the Public and Non-Profit Sector (3)

Prereq.: PADM 7912 or permission of instructor. Advanced topics in human resource management including human resource management and organizational structure, workforce diversity, technology, legal and ethical issues, public policy issues, improving productivity and other special topics of interest. Topics will vary from semester to semester.

PADM 7914 Public Budgeting (3)

Introduction to public budgeting; study of budget techniques; importance of budgeting in policymaking; and understanding the budget process.

PADM 7916 State and Local Government Administration (3)

Examination and analysis of how state and local governments are structured and how they are managed; case studies will be used to illustrate state and local administration; current issues relating to financing, regulation, zoning, delivery systems of local.

PADM 7917 Program Evaluation (3)

Also offered as POLI 7917. Prereq.: PADM 5010 or equivalent course in statistics. Assessing whether programs designed to advance the public good are reaching their goals; examining program objectives, social context in which program operates, developing research designs to assess particular programs; use of statistical analysis in measuring program elements; and developing indicators to monitor public program.

PADM 7920 Ethics in the Public Service (3)

Examination and analysis of role that ethical behavior and moral reasoning play in the practice of public administration; overview of dominant schools of classical ethical thought, including works of Socrates, Plato, Aristotle, Kant, Rawls and Bentham, and leading ethical theories such as consequentialism, deontology, virtue ethics and ethical relativism; readings, case studies, and experiential exercises will be used to explore the role of ethics in public service.

PADM 7925 Seminar in Nonprofit Management (3)

Overview of principal management functions as applied to nonprofit organizations.

PADM 7970 Fundraising and Grantwriting (3)

Development of fundraising and grantwriting skills for nonprofit organizations. Class structure includes lectures, seminar discussions, experiences with professional fund raisers and hands-on applications.

PADM 7980 Crisis Management (3)

Explore complex challenges that crises pose, including noting causes of crises, short and long term effects of crisis, consequences of crises and disasters and public policy responses to crisis. Seminar will build on theoretical explanations and insights, real-life crisis management case studies and preparation of actionable alternatives to public authorities.

Pathobiological Sciences

PBS 7002 Pathobiological Sciences Research Techniques (1-4)

May be taken for a max. of 6 sem. hrs. of credit. Specialized research techniques related to a specific discipline of pathobiological sciences.

PBS 7003 Special Topics in Pathobiological Sciences (1-4)

Prereq.: consent of instructor. May be taken for a max. of 8 hrs. of credit. Topics of current interest in pathobiological sciences.

PBS 7004 Current Literature in Pathobiological Sciences (1)

Pass/fail grading. May be taken for a maximum of 6 hrs. of credit. Review of the literature in areas of pathobiological sciences presented in a discussion format.

PBS 7007 Seminar (1)

Pass-fail grading. May be taken for a max. of 4 hrs. of credit. Research presentations by visiting scientists. Presentations center around infectious disease research in the fields of bacteriology, virology, immunology, parasitology and pathology.

PBS 7310 Zoonotic Infectious and Parasitic Diseases (3)

Prereq.:

Epidemiology, ecology and control of major infectious and parasitic zoonoses.

PBS 7312 Epidemiological Study Design (4)

Introduction to the basic concepts of epidemiology with emphasis on the appropriate use and interpretation of epidemiological methods.

PBS 7413 Techniques in Flow Cytometry (1)

2 hrs. lab. Instruction and laboratory practices in principles and applications of flow cytometry; topics include cell processing and staining with fluorescent probes as a measurement of immunophenotyping, DNA and functional assays as well as computer generated data analysis.

PBS 7415 Current Experimental Methods in Parasitology (1-4)

Prereq.: a course in parasitology or equivalent. May be taken for a max. of 4 sem. hrs. when animal groups vary. 2-8 hrs. lab. Specialized laboratory methods used to produce experimental infections, diagnose parasitism and recover and identify protozoan and helminth parasites of ruminants, horses, pigs and companion animals.

PBS 7417 Pathogenesis of Infectious and Parasitic Agents (1-4)

Prereq.: introductory course in immunology. Introduction to the mechanisms of pathogenesis, pathology and host immune interactions of viral, bacterial and parasitic disease agents.

PBS 7419 Population Dynamics and Ecology of Parasitic and Vector-Borne Diseases (3)

Prereq.: course in parasitology or equivalent. Population regulation and distribution of parasitic and vector-borne diseases of veterinary and medical significance; disease risk in populations and control strategies based on population models, transmission dynamics, climate, nutrition, immunity, geographic information systems and herd health programs.

PBS 7424 Diseases of Aquatic Animals (3)

Same as RNR 7424. Prereq.: consent of instructor. Basic microbiology and/or parasitology strongly recommended. 2 hrs. lecture; 2 hrs. lab.

PBS 7501 Veterinary Cellular Pathology (3)

Prereq.: DVM degree or equivalent and consent of instructor. Basic mechanisms of pathogenesis and morphogenesis of disease at the cellular level; encompasses ultrastructural to functional pathologic changes in cells and extracellular matrix.

PBS 7502 Advanced Systemic Veterinary Pathology (5)

Prereq.: DVM degree or equivalent and credit or concurrent enrollment in PBS 7516. Study of diseases by organ systems, using electron and light microscopy; patho-genesis of specific diseases.

PBS 7508 Histopathology Slide Conference (1)

Prereq.: DVM degree or equivalent and consent of instructor. May be taken for a max. of 4 hrs. of credit when topics vary. Histopathological aspects of diseases in various animal species; direct student participation in morphological description and literature review.

PBS 7509 Surgical Pathology (1-2)

Prereq.: DVM degree or equivalent and PBS 7516. May be taken for a max. of 6 sem. hrs. credit when topics vary. Gross and microscopic examination of surgery-derived specimens of diseased tissues from various animals; clinical case interpretation, histopathological description, diagnosis, prognosis and consultation techniques.

PBS 7514 Laboratory Animal Pathology (2)

Prereq.: DVM degree or equivalent and consent of instructor. Macroscopic, microscopic and pathogenetic study of the infectious, nutritional, degenerate and toxic diseases that affect the commonly used species of laboratory rodents, rabbits and primates.

PBS 7515 Veterinary Dermatopathology (2)

Prereq.: DVM degree or equivalent and PBS 7516. 1 hr. lecture; 2 hrs. lab. Histopathological evaluation of integumentary system, tissue response and diseases of various animal species of veterinary importance.

PBS 7516 Advanced Diagnostic Pathology of Animals (1-2)

Prereq.: DVM degree or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Necropsy of various animals submitted for postmortem examination: gross, light and electron microscopy; and immunohistochemistry; correlation and synthesis of clinical information, anatomical findings and other ancillary laboratory results, for an accurate determination of disease diagnosis and pathogenesis.

PBS 7525 Advanced Veterinary Clinical Pathology (1-2)

Prereq.: DVM degree or equivalent. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Diagnosis and pathogenesis of hematological and clinical chemistry changes in blood from various animal species; understanding the applicable instrumentation and methodologies of assays and quality assurance; interpretation of cytological specimens (tissue and fluids) and correlation with clinical and histopathological findings.

PBS 7530 Laboratory Animal Science I (2)

Prereq.: DVM degree or equivalent and consent of instructor. Biology, husbandry, diseases, medical care, regulations and experimental uses of the commonly used laboratory animal species; courses need not be taken in sequence.

PBS 7531 Laboratory Animal Science II (2)

Prereq.: DVM degree or equivalent and consent of instructor. Biology, husbandry, diseases, medical care, regulations and experimental uses of the commonly used laboratory animal species; courses need not be taken in sequence.

Petroleum Engineering

PETE 1010 Introduction to Petroleum Engineering (2)

Prereq.: MATH 1021. Scientific bases of petroleum geology and chemistry, exploration, drilling, production, reservoir engineering and refining.

PETE 2031 Reservoir Rock Properties (3)

Prereq.: MATH 1552, GEOL 1001 and PHYS 2110. Physical properties of reservoir rock related to the production of oil and gas.

PETE 2032 Reservoir Fluid Properties (3)

Prereq.: credit or registration in PHYS 2112. Physical and chemical properties of petroleum reservoir fluids related to production of oil and gas.

PETE 2034 Rock and Fluid Properties Laboratory (1)

Prereq.: credit in PETE 2031 and/or PETE 2032 and registration in the other course. 3 hrs. lab.

PETE 2060 Computational Methods in Petroleum Engineering (2)

Prereq.: MATH 1552. 1 hr. lecture; 2 hrs. lab. Computing infrastructure, programming fundamentals, numerical methods and petroleum engineering commercial software.

PETE 3025 Economic Aspects of Petroleum Production (3)

Prereq.: ECON 2030, PETE 2060 and credit or registration in IE 3302. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Mineral ownership and leasing in Louisiana; production decline curve analysis; profitability analysis; risk analysis; evaluation of petroleum properties.

PETE 3036 Well Logging (3)

Prereq.: grade of "C" or better in PETE 2031 and either EE 2950 or PHYS 2113.

Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major or have senior status in Geology & Geophysics.

Qualitative and quantitative formation evaluation by means of electric, acoustic and radioactive well logs.

PETE 3037 Petroleum Field Operations (1)

Prereq.: CE 2200 and credit or registration in ME 3333.

Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. 3 hrs. lab. Field operations associated with production engineering; field equipment and operation; pneumatic and electronic safety systems; fluid flow measurements.

PETE 3050 Reservoir Dynamics (3)

Credit will not be given for this course and PETE 4050. Prereq.: PETE 2031, PETE 2032, MATH 2065, CE 2200, and credit or registration in ME 3333.

Fundamentals of reservoir flow; application to single-well performance; well testing, gas reservoir engineering; waterflooding fundamentals.

PETE 3053 Petroleum Engineering Aspects of Subsurface Geology (3)

Prereq.: PETE 3025 and PETE 3036 or senior status in geology. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Engineering aspects of petroleum geology; interpretation of subsurface data; reservoir mapping; determination of reservoir volume.

PETE 3085 Well Performance and Production (3)

Prereq.: PETE 3050. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Systems analysis applied to oil and gas wells; artificial lift design; fluid measurement; design of surface production equipment.

PETE 3990 Independent Research (1-2)

May be taken for a max. of 3 sem. hrs. of credit. Number of hours, outline of proposed work and name of faculty supervisor must be stated at time of registration. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Individual research or engineering studies with faculty supervision.

PETE 4045 Drilling Engineering (3)

Prereq.: PETE 4060, CE 2200 and credit or registration in CE 3400. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Drilling process, including equipment and performance; well pressure control and buoyancy; rheology, circulation pressure and optimum hydraulics of drilling fluids; oil well casing design and cementing techniques.

PETE 4046 Well Design-Production (3)

Prereq.: PETE 4045 and CE 3400. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Analysis and design of well production systems; rod pumping, gas lift.

PETE 4050 Reservoir Dynamics (3)

Credit will not given for this course and PETE 3050. Prereq.: PETE 2032, ME 3333 and MATH 2065. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Fundamentals of reservoir flow; application to single-well performance; well testing, gas reservoir engineering; waterflooding fundamentals.

PETE 4051 Reserve Estimation and Reservoir Management (3)

Prereq.: PETE 3025, PETE 3053, and IE 3302. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Quantitative study and behavior prediction of volumetric and water-drive reservoir systems by material balance.

PETE 4056 Numerical Simulation of Improved Recovery Processes (3)

Prereq.: MATH 2065 and PETE 3050 and PETE 4051. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Use of computer simulation to predict oil and gas reservoir performance and to design enhanced recovery processes.

PETE 4058 Reservoir Mechanics Laboratory (1)

Prereq.: PETE 4051. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. 3 hrs. lab. Simulation of reservoirs with physical models; fluid flow in porous media.

PETE 4059 Drilling Fluids Laboratory (1)

Prereq.: credit or registration in PETE 4045. Accompanies PETE 4045. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. 3 hrs. lab.

PETE 4060 Prevention of Oil and Gas Well Blowouts (1)

Prereq.: CE 2200. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. 3 hrs. lab. Causes and detection of well kicks and the proper handling of these kicks to prevent uncontrolled flow (blowout) from the well; methods and techniques currently used in the oil and gas industry.

PETE 4083 Secondary Recovery of Petroleum (3)

Prereq.: PETE 4050 and PETE 4051. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Reservoir mechanics and application of immiscible fluids displacement methods to secondary recovery of oil.

PETE 4084 Fluid Flow and Heat Transfer in Wellbores (3)

Prereq.: MATH 2065, CE 2200, ME 3333 or consent of instructor. Multiphase flow in pipes and wells; flow pattern description and mechanistic modeling; wellbore heat transfer; case studies.

PETE 4085 Surface Handling of Produced Fluids (3)

Prereq.: PETE 2032 and PETE 2034. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Operating principles and design criteria for equipment used in field processing of oil and gas, e.g., lean oil gasoline plants, gas dehydration units, gas sweetening units, cryogenic gasoline plants, separators, gas transmission and compression facilities.

PETE 4086 Well Design-Drilling (3)

Prereq.: PETE 4045. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Design of drilling operations; bit selection and evaluation; mathematical modeling of bitwear and penetration rate; determination of formation pore pressure and fracture pressure; selection of well casing and casing setting depths; directional drilling; special design considerations for horizontal wells.

PETE 4087 Environmental Control in Petroleum Engineering (3)

Prereq.: PETE 4045, PETE 4051 and PETE 4059. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Environmental impact and pollution mechanisms in petroleum engineering technologies; basic concepts regarding oilfield waste generation, toxicity and environmental regulatory process; synergy between process productivity and environmental performance.

PETE 4088 Formation Evaluation (3)

Prereq.: PETE 3036. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Use of different formation evaluation techniques to provide a comprehensive description of reservoir content producibility; drilling fluid and cutting analysis; core analysis; formation tester; drillstem test; analysis of openhole logs by overlay, crossplot and digital evaluation methods.

PETE 4089 Natural Gas Engineering (3)

Prereq.: PETE 4050. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. Application of reservoir engineering principles and practices to gas and gas-condensate reservoirs; prediction of gas well performance; management of all types of gas reservoirs; underground gas storage.

PETE 4090 Unconventional Reservoirs (3)

Prereq.: CE 3400 or consent of instructor. Drilling, completion, production and reservoir evaluation of unconventional reservoirs; case studies.

PETE 4241 Special Topics in Petroleum Engineering Design (3)

Prereq.: senior or graduate standing and permission of instructor. May be taken for a max. of 6 hrs. credit when topics vary. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major. One or more phases of current petroleum engineering design.

PETE 4998 Senior Project I (1)

Prereq.: ENGL 2000, PETE 3037 and credit or registration in either PETE 4045 or PETE 4051. Written and oral presentation required. First phase of theoretical and/or experimental investigations of an approved topic in petroleum engineering.

PETE 4999 Senior Project II (1)

Prereq.: PETE 4998 and senior standing in the College of Engineering. Written and oral presentation required. Registration in this course is restricted to students admitted to both the College of Engineering and the Petroleum Engineering major.
Theoretical and/or experimental investigation, including a literature review of an approved topic in petroleum engineering.

PETE 7195 Reservoir Characterization (3)

See GEOL 7195.

PETE 7201 Fluid Flow in Porous Media (3)

Prereq.: PETE 4050 and PETE 4056 or equivalent. General hydrodynamic equations for flow of fluids through porous media; two-dimensional flow problems and potential theory methods; gravity flow systems; two-fluid systems; systems of nonuniform permeability; multiple well systems using computerized streamline tracking methods.

PETE 7202 Advanced Well Testing Theory and Analysis (3)

Prereq.: PETE 4050 and PETE 4051 or equivalent. Unsteady-state flow of reservoir fluids in porous media; application of theory to pressure buildup analysis, well interference testing, pulse testing, pressure draw down analysis, drill stem testing and water influx prediction.

PETE 7211 Production System Analysis (3)

Prereq.: CE 2200, ME 3333, and PETE 4046 or equivalent. Use of multiphase flow correlations to determine flow rates and pressure traverses in flowing oil wells, gas-condensate wells, gathering systems and pipe lines; applications of correlations to the design of gas lift systems.

PETE 7212 Well Completion Design (3)

Prereq.: PETE 4046 or consent of instructor. Systems analysis for optimum production by designing best combination of tubing, flow lines, choke sizes, perforation density and separator pressure; inflow performance of reservoirs; well completion techniques; gravel packing; tubing effects.

PETE 7214 Petroleum Geomechanics (3)

Prereq.: permission of instructor. Fundamentals of rock mechanics; theory of elasticity and failure mechanics; borehole stresses and acoustic wave propagation; poroelasticity theory and applications including borehole stability, sand production, hydraulic fracturing, reservoir compaction and/or subsidence.

PETE 7231 Nonthermal Methods of Enhanced Oil Recovery (3)

Theory and field practice related to miscible displacement processes and chemical and polymer flooding techniques.

PETE 7232 Thermal Methods of Oil Recovery (3)

Theory of heat transfer and heat generation applied to the performance prediction of oil recovery by such field processes as forward and reverse in situ combustion, continuous and cyclic hot fluid injection, and production well heating.

PETE 7241 Selected Topics in Advanced Petroleum Engineering (3)

May be repeated for credit when topic varies; a total of 12 sem. hrs. of credit may be earned in this course.

PETE 7242 Selected Topics in Advanced Petroleum Engineering (3)

May be repeated for credit when topic varies; a total of 12 sem. hrs. of credit may be earned in this course.

PETE 7256 Special Problems in Petroleum Engineering (1-6)

May be taken for a max. of 6 sem. hrs. of credit. Individual study and research.

PETE 7280 Mathematical Simulation of Petroleum Reservoir Performance (3)

Prereq.: PETE 4056 or equivalent and PETE 4050 and PETE 4051. Development and application of mathematical models for predicting petroleum reservoir performance, including multiphase fluid flow in three dimensions.

PETE 7285 Statistical Reservoir Modeling (3)

Prereq.: permission of instructor. Theory and practice of modeling uncertainty; spatially variable rock properties for subsurface reservoirs; distributions, transforms, Bayesian updating, variograms/correlograms, estimation and coestimation with various kriging methods, conditional simulation.

PETE 7999 Seminar (1)

Pass/Fail grading. All graduate students are expected to attend this course every semester. Only 1 sem. hr. of credit will be allowed towards the degree.

PETE 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

PETE 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Philosophy

PHIL 1000 Introduction to Philosophy (3)

[LCCN: CPHL 1013, Introduction to Philosophy] This is a General Education course. *Credit will not be given for both this course and PHIL 1001.* Major works on such themes as appearance and reality, human nature, nature of knowledge, relation of mind and body, right and good, existence of God and freedom and determinism.

PHIL 1001 HONORS: Introduction to Philosophy (3)

This is a General Education course. *Same as PHIL 1000, with a special honors emphasis for qualified students. Credit will not be given for both this course and PHIL 1000.*

PHIL 1021 Introduction to Logic (3)

[LCCN: CPHL 2113, Introduction to Logic] This is a General Education course. *No special background presupposed.* Formal and informal reasoning; introduction to propositional logic; formal and informal fallacies; scientific reasoning.

PHIL 2000 Contemporary Moral Problems (3)

Philosophical study of contemporary moral problems such as capital punishment, preferential treatment, sexual equality, sexual liberation, terrorism, war and nuclear arms, animal rights, world hunger, environmental ethics and the morality of suicide.

PHIL 2010 Symbolic Logic I (3)

This is a General Education course. *Also offered as LING 2010.* Classical propositional and first-order predicate logic; syntax and semantics of formal languages; translation between formal languages and English; formal methods of proof.

PHIL 2018 Professional Ethics (3)

This is a General Education course. Special problems of obligation and valuation related to law, medicine, politics, and education, as well as business, engineering, and architecture; altruism, trust, vocation, codes of honor, professional privilege and responsibilities for others arising from differential abilities.

PHIL 2020 Ethics (3)

[LCCN: CPHL 2013, Introduction to Ethics] This is a General Education course. *Credit will not be given for this course and PHIL 2050.* Classical and recent theories of obligation and value, including works of philosophers such as Plato, Aristotle, Kant, Hume and Nietzsche; topics including freedom, rights, justification of moral judgments.

PHIL 2021 Environmental Ethics (3)

Ethical relations to other humans through the environment and to non-humans within the environment. Topics may include: animal rights, the intrinsic value of nature, deep ecology, climate change and pollution.

PHIL 2022 Philosophy and Popular Culture (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Philosophical themes in works of popular culture from television, film, science fiction, fantasy, comic books and/or music.

PHIL 2023 Philosophy of Art (3)

Philosophical theories of beauty, art and art criticism.

PHIL 2024 Philosophy in Literature (3)

This is a General Education course. Philosophical themes in world literature: fiction, poetry, drama and autobiography.

PHIL 2025 Bioethics (3)

Defining health and disease; deciding on rights, duties and obligations in the patient-physician relationship; abortion and the concept of a person; defining and determining death; euthanasia and the dignity of death; allocation of medical resources, both large-scale and small-scale; experimentation with fetuses, children, prisoners and animals; genetic testing, screening and interference.

PHIL 2028 Philosophy of Religion (3)

This is a General Education course. *See REL 2028.*

PHIL 2033 History of Ancient and Medieval Philosophy (3)

This is a General Education course. *An honors course, PHIL 2053, is also available. Credit will not be given for this course and PHIL 2053.* Introduction to philosophy through a study of some of the main writings of classical and medieval philosophy.

PHIL 2034 HONORS: Tutorial in Ancient and Medieval Philosophy (1)

To be taken concurrently with PHIL 2033. 1 hr. of tutorial instruction per week for honors students.

PHIL 2035 History of Modern Philosophy (3)

This is a General Education course. *An honors course, PHIL 2036, is also available.* Introduction to philosophy through a study of some of the main writings of modern philosophy.

PHIL 2036 HONORS: Tutorial in Modern Philosophy (1)

To be taken concurrently with PHIL 2035. 1 hr. of tutorial instruction per week for honors students.

PHIL 2050 HONORS: Ethics (3)

This is a General Education Course. *Same as PHIL 2020 with a special emphasis for qualified students. Credit will not be given for this course and PHIL 2020.* Supervised reading, discussion, research, and writing.

PHIL 2053 HONORS: History of Ancient and Medieval Philosophy (3)

This is a General Education course. *Same as PHIL 2033 with a special honors emphasis for qualified students. Prereq.: one general education course in philosophy or permission of instructor. Credit will not be given for this course and PHIL 2033.* Supervised reading, discussion, research and writing.

PHIL 2745 Knowledge and Reality (3)

Introduction to central epistemological and metaphysical questions: mind and matter; causation and free will; space and time; meaning and truth; the nature of knowledge and justified belief; perception, memory, reasoning and testimony as sources of knowledge and justified belief.

PHIL 2786 Logic, Science and Society (3)

Prereq.: completed analytical reasoning area of general education or consent of instructor. Logic, evidence, probability and induction; objectivity and relativism; technology and utopia.

PHIL 3001 Existentialism (3)

Basic themes of existentialist philosophy; the works of Kierkegaard, Nietzsche, Jaspers, Heidegger, Camus, Marcel and Sartre.

PHIL 3002 Philosophy and Film (3)

Films as philosophical texts.

PHIL 3003 French Existentialism (3)

Major themes, issues and theories of the French existentialist; existence, essence and the question of Being; death, nothingness and anxiety; freedom, responsibility and values; the ethical and the other; authors include Jean-Paul Sartre, Simone De Beauvoir, Maurice Merleau-Ponty; Albert Camus, Emmanuel Levinas, Jean Beaufret, Gabriel Marcel, Emmanuel Mounier.

PHIL 3015 Christian Philosophy (3)

Also offered as REL 3015. Prereq.: one course in either philosophy or religious studies or equivalent Applications of philosophy to such themes in Christianity as knowing God, the nature and structure of faith, revelation, incarnation, faith and science, Christianity and other faiths.

PHIL 3020 Special Topics in Philosophy (1-3)

May be taken twice for credit when topics vary.

PHIL 3052 Moral Philosophy (3)

May be taken twice when topics vary. Topics in ethics and meta-ethics: egoism, consequentialism, deontology, moral relativism, virtue ethics, values, ethics and religion; naturalistic fallacy, truth and justification, realism and objectivity, motivation and practical reasoning, autonomy and game theory.

PHIL 3062 Introduction to Political Philosophy (3)

Fundamental concepts and theories that deal with justice and liberties of individuals, entitlements and distributive justice, the role and limit of State power.

PHIL 3072 Philosophy of Rawls (3)

A close examination of some of the key texts in the political philosophy of John Rawls.

PHIL 3090 Friedrich Nietzsche (3)

See GERM 3090.

PHIL 3950 Introduction to Epistemology (3)

Survey of central issues in the theory of knowledge; knowledge as justified true belief; the Gettier problem; induction as a source of justification; a priori knowledge; fallibilist vs. infallibilist and internalist vs externalist conceptions of justification; structure of justification.

PHIL 4002 Philosophy of Film (3)

Theories of Film.

PHIL 4003 Contemporary French Philosophy (3)

Major contemporary French philosophers, including Bergson, Sartre, Merleau-Ponty, De Beauvoir, Levinas, Derrida, Foucault, Nancy Ricoeur, Marion, Janicaud; themes such as the rethinking of ethics, the question of humanism and political thought; intellectual movements such as structuralism and post-structuralism, phenomenology, hermetics and deconstruction, feminism and psychoanalysis.

PHIL 4010 Symbolic Logic II (3)

Also offered as LING 4010. Prereq.: PHIL 2010/LING 2010 or consent of instructor. Syntax and basic model theory of classical first order logic; soundness and completeness.

PHIL 4011 Topics in Advanced Logic (3)

Also offered as LING 4011. Prereq.: PHIL 4010/LING 4010 or consent of instructor. Topics may include advanced metatheory of symbolic languages, intensional logics and Montague grammar.

PHIL 4015 Philosophy of Male and Female (3)

Philosophical examination of the concepts of human nature that underlie a variety of theories about women and femininity.

PHIL 4098 Politics and Ethics (3)

See POLI 4098.

PHIL 4786 Selected Topics (3)

May be taken for a max. of 6 sem. hrs. when topics vary.

PHIL 4914 Philosophy of Language (3)

Also offered as LING 4914. Prereq.: one logic course or consent of instructor. Various theories of meaning, their implications and presuppositions and their relevance to issues in such areas as theory of perception, theory of truth, metaphysics, ethics, philosophy of mind and action.

PHIL 4920 Presocratic Philosophy (3)

Prereq.: PHIL 2033 or equivalent. Study of the major Presocratic philosophers from Thales up to and including the Sophists.

PHIL 4922 Plato (3)

Prereq.: PHIL 2033 or equivalent. Topics from Plato's epistemology and metaphysics.

PHIL 4924 Aristotle (3)

Prereq.: PHIL 2033 or equivalent. Topics from Aristotle's Metaphysics, Physics, De Anima and the logical treatises.

PHIL 4928 Medieval Philosophy (3)

Also offered as REL 4928. Analysis of key themes, traditions and figures in medieval philosophy.

PHIL 4931 Descartes, Spinoza and Leibniz (3)

Prereq.: 6 hrs. of philosophy or consent of instructor. 17th century rationalism, with emphasis on epistemology and metaphysics.

PHIL 4933 Locke, Berkeley, Hume (3)

Language, epistemology, ontology, self, God, causation, realism and idealism in the writings of these British empiricists.

PHIL 4935 Kant (3)

Prereq.: PHIL 2035 or equivalent. Basic topics and arguments of Kant's Critique of Pure Reason.

PHIL 4936 19th Century Philosophy (3)

Prereq.: PHIL 2033 and PHIL 2035 or equivalent. 19th century philosophy, with emphasis on German thought; readings in Fichte, Hegel, Marx, Nietzsche, Bergson and others.

PHIL 4939 Kierkegaard (3)

Also offered as REL 4939. Study of his works, such as, Either/Or, The Sickness Unto Death, Fear and Trembling, Concluding Unscientific Postscript, Stages on Life's Way and The Present Age.

PHIL 4940 Aesthetics (3)

Meaning and truth in the arts; artistic intention; critical canons.

PHIL 4941 Philosophy of Mind (3)

Prereq.: PHIL 2033 and PHIL 2035 or equivalent. Recent philosophical treatments of human nature; the mind-body problem; identity of the person in time; the person as rational and volitional; and relation of the person to the world.

PHIL 4942 Topics in Meta-Ethics (3)

Prereq.: two courses in philosophy or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary.
Naturalistic fallacy, truth and meaning, realism and objectivity, motivation and practical reasoning, autonomy and justification of ethical theory.

PHIL 4943 Problems in Ethical Theory (3)

Prereq.: two courses in philosophy or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary.
Egoism, utilitarianism, deontological systems, intuitionism, moral particularism, virtue ethics, relativism, weakness of will and value theory.

PHIL 4944 Philosophical Theology (3)

Also offered as REL 4944. Prereq.: two courses in philosophy and/or religious studies. Major themes and works in philosophical theology.

PHIL 4945 Problems in Political Philosophy (3)

Prereq.: PHIL 1000 or PHIL 2020 or PHIL 3052 or equivalent. Freedom, obligation, authority, justice, law, the state and revolution.

PHIL 4946 Philosophy of Law (3)

Core philosophical issues in legal theory and jurisprudence.

PHIL 4947 Topics in Philosophy of Law (3)

Applied issues in philosophy of law, including philosophical analysis of Supreme Court rulings.

PHIL 4948 Phenomenology (3)

Prereq.: PHIL 2035 or PHIL 4936 or equivalent. Contemporary phenomenology; readings in Husserl.

PHIL 4951 Philosophy of Science (3)

Prereq.: consent of instructor. Philosophical issues related to concept formation and theory construction in the natural, behavioral and social sciences.

PHIL 4952 Topics in Metaphysics (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Topics include ontology, modalities, universals, truth, causation, reductionism, identity (physical and personal), realism and the meaning of life.

PHIL 4953 Contemporary Analytic Philosophy (3)

Prereq.: one logic course and either PHIL 2035 or PHIL 4933. Topics from leading philosophers in such contemporary movements as logical empiricism, formalism and ordinary language analysis, including readings from Moore, Russell, Wittgenstein, Carnap, Goodman, Ryle, Strawson and Quine.

PHIL 4954 Recent Speculative Philosophy (3)

Prereq.: Two other philosophy courses or consent of instructor. Theories of being and knowing in recent absolute idealism, process philosophy and phenomenological existentialism.

PHIL 4972 Kant's Moral Philosophy (3)

Study of selected Kant's works in moral philosophy such as, *Groundwork of the Metaphysic of Morals*, *Metaphysics of Morals*, *Critique of Practical Reason* and *Anthropology From A Pragmatic Point of View*.

PHIL 4991 Independent Reading and Research (1-3)

Prereq.: written consent of instructor and department. May be taken for a max. of 6 hrs. of credit when topics vary. Total credit earned as a graduate student in PHIL 4991 and PHIL 7991 combined may not exceed 9 hrs.

PHIL 7901 Seminar in Contemporary Analytic Philosophy (3)

Philosophy of language, metaphysics, realism, anti-realism and philosophy of logic and mathematics.

PHIL 7903 Seminar in Continental Philosophy (3)

Major figures and/or movements in continental philosophy.

PHIL 7905 Seminar in History of Philosophy (3)

May be taken for a max. of 9 hrs. of credit when topics vary. Study of a major philosopher or school of philosophy.

PHIL 7910 Seminar (3)

Prereq.: May be offered as LING 7910 when topic is appropriate. May be taken for a max. of 6 hrs. of credit when topics vary.

PHIL 7991 Independent Reading and Research (1-6)

Prereq.: written consent of instructor and departmental director of graduate studies. Total credit earned as a graduate student in PHIL 4991 and PHIL 7991 combined may not exceed 9 sem. hrs.

PHIL 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

Physical Science

PHSC 1001 Physical Science (3)

[LCCN: CPHY 1023, Physical Science I] This is a General Education course. *Prereq.: MATH 1021. Credit will not be given for both this course and any other college-level physics course.* First half of a two-semester survey course in the physical sciences; topics in the first semester are taken primarily from the field of physics.

PHSC 1002 Physical Science (3)

[LCCN: CPHY 1033, Physical Science II] This is a General Education course. *Prereq.: PHSC 1001. Credit will not be given for both this course and any other college-level astronomy course.* Second half of a two-semester survey course in the physical sciences; topics in the second semester are taken primarily from the fields of astronomy, chemistry and geology.

PHSC 1021 Physical Science with Laboratory (3)

Prereq.: MATH 1021 or MATH 1029. Credit will not be given for this course and PHSC 1001. 2 hrs. lecture; 2 hrs. lab. Exposition of physical science concepts through laboratory investigations; topics such as nature of matter, forces and motion, electricity and magnetism and sound.

PHSC 1022 Physical Science with Laboratory (3)

Prereq.: MATH 1021 or MATH 1029. Credit will not be given for this course and PHSC 1001. 2 hrs. lecture; 2 hrs. lab. Exposition of physical science concepts through laboratory investigations; topics such as changes in matter, light and color, energy and observational astronomy.

Physics

PHYS 1100 Introduction to Physics (3)

Prereq.: credit or registration in MATH 1550. Measurement, vectors, kinematics, Newton's laws of motion, wave motion, temperature, the electric field, DC circuits and geometrical optics.

PHYS 1201 General Physics for Physics Majors (4)

This is a General Education course. *Prereq.: credit or registration in MATH 1550 or MATH 1551.* *Primarily for students intending to major in physics. Credit will not be given for this course and PHYS 2001, PHYS 2110, PHYS 2112. 4 hrs. lecture/demonstration.* Fundamentals of classical physics and some concepts of modern physics; calculus and vector analysis introduced and used in development of subject matter.

PHYS 1202 General Physics for Physics Majors (4)

This is a General Education course. *Prereq.: PHYS 1201 and credit or registration in MATH 1552 or MATH 1553. Primarily for students intending to major in physics. Credit will not be given for this course and PHYS 2002 or PHYS 2113. 4 hrs. lecture/demonstration.* Fundamentals of classical physics and some concepts of modern physics; calculus and vector analysis introduced and used in development of subject matter.

PHYS 1208 General Physics Laboratory for Physics Majors (1)

Prereq.: credit or registration in PHYS 1201. Credit will not be given for this course and PHYS 2108. Laboratory to accompany PHYS 1201. 3 hrs. lab.

PHYS 1209 General Physics Laboratory for Physics Majors (1)

Prereq.: credit or registration in PHYS 1202. Credit will not be given for this course and PHYS 2109. Laboratory to accompany PHYS 1202. 3 hrs. lab.

PHYS 2001 General Physics I (3)

[LCCN: CPHY 2113, 2114, Physics I (Algebra/Trig Based)] This is a General Education course. *Prereq.: MATH 1022 or MATH 1023 or MATH 1550 or MATH 1551. Credit will not be given for this course and PHYS 1201, PHYS 2110, PHYS 2112.* Mechanics, heat, sound, light, electricity and magnetism; topics in modern physics.

PHYS 2002 General Physics II (3)

[LCCN: CPHY 2123, 2124, Physics II (Algebra/Trig Based)] This is a General Education course. *Prereq.: PHYS 2001 and MATH 1022 or MATH 1023 or MATH 1550 or MATH 1551. Credit will not be given for this course and PHYS 1202 or PHYS 2112, PHYS 2113. 3 hrs. lecture/demonstration.* Mechanics, heat, sound, light, electricity and magnetism; topics in modern physics.

PHYS 2101 General Physics for Technical Students (3)

Prereq.: credit or registration in MATH 1552 or MATH 1553. Credit will not be given for both this course and PHYS 1201, PHYS 2001, PHYS 2110, PHYS 2112. Mechanics, wave motion, thermodynamics and kinetic theory.

PHYS 2102 General Physics for Technical Students (3)

Prereq.: PHYS 2101 and MATH 1552. Credit will not be given for both this course and PHYS 1202, PHYS 2002, or PHYS 2113. Electricity, magnetism, physical optics, and topics from modern physics.

PHYS 2108 Introductory Physics Laboratory (1)

[LCCN: CPHY 2111, 2114, 2131, Physics I Lab (Algebra/Trig Based), (Calculus Based)] *Prereq.: credit or registration in PHYS 2001 or PHYS 2110. Credit will not be given for both this course and PHYS 1208. Laboratory to accompany PHYS 2001 or PHYS 2110.*

PHYS 2109 General Physics Laboratory (1)

[LCCN: CPHY 2121, 2124, 2141, Physics II Lab (Algebra/Trig Based), (Calculus Based)] *Prereq.: PHYS 2108 and credit or registration in PHYS 2002 or PHYS 2113. Credit will not be given for both this course and PHYS 1209. Laboratory to accompany PHYS 2002 and PHYS 2113. Electricity, magnetism, geometrical and physical optics and other topics in modern physics.*

PHYS 2110 Particle Mechanics (3)

This is a General Education course. *Credit will not be given for this course and PHYS 2001 and PHYS 1201. Prereq.: grade of "C" or better in MATH 1550; credit or registration in MATH 1552 or MATH 1553. Vectors, forces and motion, Newton's Laws, conservation of energy and momentum, rotational kinematics and dynamics, equilibrium and elasticity, oscillations.*

PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

This is a General Education course. *Credit will not be given for this course and PHYS 2001 and PHYS 1201. Prereq.: grade of "C" or better in PHYS 2110 and MATH 1552 or MATH 1553. Fluids, oscillations and waves, thermodynamics, modern physics.*

PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)

This is a General Education course. *Credit will not be given for this course and PHYS 2002 and PHYS 1202. Prereq.: grade of "C" or better in PHYS 2110 and MATH 1552 or MATH 1553. Gravitation and electromagnetism, gravitational fields, electric and magnetic fields, currents and circuits, induction, Maxwell's Equations.*

PHYS 2203 Introductory Modern Physics (3)

Prereq.: PHYS 1202 or PHYS 2112, PHYS 2113. Elementary modern physics; special relativity, wave/particle duality, quantum mechanics, hydrogen atom, many-electron atoms, nuclear structure elementary particles, solid state, astrophysics and cosmology.

PHYS 2207 Introductory Modern Physics Laboratory (1)

Prereq.: PHYS 1209. *Coreq.:* PHYS 2203. *For physics majors only. Laboratory to accompany PHYS 2203. 3 hrs. lab.*

PHYS 2221 Introduction to Mechanics (3)

Prereq.: MATH 2057; PHYS 1202 or both PHYS 2112 and PHYS 2113. Basic concepts of mechanics with emphasis on corresponding mathematical techniques.

PHYS 2231 Electricity and Magnetism (3)

Prereq.: PHYS 2221 or CHEM 4581 and credit or registration in MATH 2065 or MATH 2090. Electricity and magnetism; static and quasistatic electromagnetic fields in vacua and in dielectric and magnetic media.

PHYS 2401 Introduction to Concepts in Physics (3)

[LCCN: CPHY 1013, Introduction to Concepts in Physics] This is a General Education course. *Prereq.:* MATH 1021 or an ACT math score of at least 25. *Primarily for students in liberal arts and education.* Historical evolution and underlying philosophy of principles of physics; provides appreciation of physics; does not develop technical skill.

PHYS 2411 Computational Science I (3)

Prereq.: CSC 1253 or equivalent and one of the following three choices: PHYS 2221; or MATH 2057 and PHYS 1202 or both PHYS 2112 and PHYS 2113; or CHEM 4581 and credit or registration in MATH 2065 (or MATH 2090). 2 hrs. lecture; 2 hrs. lab. Introduction to symbolic manipulation and numerical techniques used to analyze or simulate a broad range of physical systems.

PHYS 2995 Undergraduate Seminar (1)

Prereq.: consent of instructor and department chair. May be repeated for a max. of 6 hrs. of credit. Individual reading in current areas of physics, topics in professional development and presentation of undergraduate research.

PHYS 3098 Instrumentation Electronics for Scientists (3)

Prereq.: PHYS 1202 or both PHYS 2112 and PHYS 2113; PHYS 2207; CSC 1253 or equivalent. For physics majors only. 2 hrs. lecture; 3 hrs. lab. Basic electronic technology and circuits used in scientific instrumentation; circuit analysis, discrete components, operational amplifiers, digital electronics and microcontrollers.

PHYS 4005 Science Research Methods (3)

See BIOL 4005.

PHYS 4112 Intermediate Mathematical Physics (3)

Prereq.: PHYS 2221 or CHEM 4581 and credit or registration in MATH 2065 or MATH 2090. Mathematical methods of physics, with application to selected problems.

PHYS 4123 Intermediate Mechanics (3)

Prereq.: PHYS 2221 and MATH 2057. Lagrangian mechanics; central force motion; rigid body dynamics; small oscillations.

PHYS 4125 Thermodynamics and Statistical Mechanics (3)

Prereq.: PHYS 2203 or CHEM 3491; PHYS 2221 or CHEM 4581; credit or registration in MATH 2065 or MATH 2090. Basic physical concepts and methods appropriate for description of systems involving many particles; unified view point of thermodynamics, statistical mechanics and kinetic theory.

PHYS 4132 Electromagnetism and Electromagnetic Waves (3)

Prereq.: PHYS 2231. Continuation of PHYS 2231. Emphasis on electromagnetic waves and radiation.

PHYS 4135 Modern Optics (3)

Prereq.: PHYS 2221 and MATH 2065 or MATH 2090; or CHEM 4581 and MATH 2065 or MATH 2090. Review of geometrical optics and optical instruments, scalar diffraction theory, spatial filtering and holography, Gaussian beam optics, optical resonators, lasers and optical properties of materials.

PHYS 4141 Introduction to Quantum Mechanics (3)

Prereq.: PHYS 2221 and credit or registration in MATH 2065 or MATH 2090; or CHEM 4581 and credit or registration in MATH 2065 or MATH 2090. Elementary principles of quantum mechanics, including Schrodinger equation, one-dimensional problems, harmonic oscillator, angular momentum, perturbation theory, matrix mechanics and spin.

PHYS 4142 Introduction to Quantum Mechanics (3)

Prereq.: PHYS 4141. Elementary principles of quantum mechanics, including Schrodinger equation, one-dimensional problems, harmonic oscillator, angular momentum, perturbation theory, matrix mechanics and spin.

PHYS 4251 Atomic Physics (3)

Prereq.: PHYS 4142 and credit or registration in PHYS 4132. Modern theory of atomic structure, radiations, and processes.

PHYS 4261 Introduction to Solid-State Physics (3)

Prereq.: PHYS 2203 or PHYS 4141. Properties of the crystalline state and the free-electron; band theories of metals, insulators and semiconductors.

PHYS 4271 Subatomic Physics (3)

Prereq.: PHYS 2203 or PHYS 4141. Nuclear and particle properties, abundance and stability of nuclei, strong, weak and electromagnetic forces, nuclear instrumentation, particle accelerators and detectors, nuclear reactions and particle and nuclear astrophysics.

PHYS 4398 Undergraduate Research (1-3)

Prereq.: consent of instructor and department chair. May be taken for a max. of 6 sem. hrs. credit. Recommended for students who will take PHYS 4399. Research project conducted under supervision of individually selected faculty member.

PHYS 4399 Senior Thesis (3)

Prereq.: consent of instructor and department chair. Students should consider taking PHYS 4398 as preparation for this course. Individual research project conducted and reported under supervision of individually selected faculty member.

PHYS 4750 Special Topics in Physics (3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. credit if topics vary.

PHYS 4991 Special Problems in Physics (1-3)

Prereq.: thorough knowledge of the fundamentals of physics and mathematics, demonstrated ability in science and consent of instructor and department chair. May be taken for a max. of 6 sem. hrs. credit. Individual reading and theoretical and/or experimental work on advanced problems in physics.

PHYS 4995 Undergraduate Senior Seminar (1)

Prereq.: consent of instructor and department chair. For junior and senior students. May not be taken concurrently with PHYS 2995. May be repeated for a max. of 4 hrs. of credit. Individual reading in current topics, professional development, presentations of research articles and student research projects.

PHYS 6111 Mathematical Physics for Teachers (3)

Prereq.: PHYS 2002 or both PHYS 2112 and PHYS 2113. Not for degree credit for physics majors. Mathematical structure of physics.

PHYS 6121 Classical Physics for Teachers (3)

Prereq.: PHYS 2002 or both PHYS 2112 and PHYS 2113. For high school and junior college teachers; part of the MNS degree program. Application of conservation principles to development of classical physics.

PHYS 6198 Laboratory Methods for Teachers (3)

Prereq.: PHYS 2002 or both PHYS 2112 and PHYS 2113. May be taken for a max. of 9 hrs. of credit. For high school and junior college teachers; part of the MNS degree program. 1 hr. lecture; 6 hrs. lab. Analysis of laboratory experiments in current high school physics curricula; selected experiments in modern physics.

PHYS 6991 Seminar in Current Developments in Physics Curriculum Materials (1-3)

Prereq.: PHYS 2002 or both PHYS 2112 and PHYS 2113. For high school and junior college teachers; part of the MNS degree program. May be taken for a max. of 6 sem. hrs. credit.

PHYS 7211 Mathematical Methods of Theoretical Physics (3)

Prereq.: PHYS 4112 or equivalent. Advanced topics in mathematical methods of theoretical physics; mathematical foundations of quantum mechanics.

PHYS 7212 Mathematical Methods of Theoretical Physics (3)

Prereq.: PHYS 7211. Advanced topics in mathematical methods of theoretical physics; mathematical foundations of quantum mechanics.

PHYS 7221 Classical Mechanics (3)

Su Study of particle mechanics and rigid body mechanics using the methods of Lagrange's equations, Hamilton's equations, canonical transformations and Hamilton-Jacobi theory.

PHYS 7225 Statistical Mechanics (3)

Principles of classical and quantum statistics, with application to special problems.

PHYS 7231 Classical Electrodynamics (3)

Problems in electrostatics and magnetostatics; Maxwell's equations, electromagnetic waves, wave guides, and antennas; relativistic electrodynamics and radiation from moving charges.

PHYS 7232 Classical Electrodynamics (3)

Prereq.: PHYS 7231 is prerequisite for 7232. Problems in electrostatics and magnetostatics; Maxwell's equations, electromagnetic waves, wave guides, and antennas; relativistic electrodynamics and radiation from moving charges.

PHYS 7241 Quantum Mechanics (3)

Prereq.: PHYS 4142 or equivalent. Basic concepts of nonrelativistic quantum mechanics, operators and matrices, intrinsic and orbital angular momenta, perturbation theory, atomic structure, second quantization and scattering theory.

PHYS 7242 Quantum Mechanics (3)

Prereq.: PHYS 7241. Basic concepts of nonrelativistic quantum mechanics, operators and matrices, intrinsic and orbital angular momenta, perturbation theory, atomic structure, second quantization and scattering theory.

PHYS 7336 General Relativity (3)

General tensor analysis; postulates of general relativity, field equations, equations of motion, interior and exterior Schwarzschild solutions; cosmology.

PHYS 7343 Advanced Quantum Mechanics (3)

Prereq.: PHYS 7242. The Lorentz group, relativistic wave equations, introduction to quantum field theory.

PHYS 7353 Atomic and Optical Physics I (3)

Prereq.: PHYS 7242 Applications of quantum mechanics to atomic systems and their interaction with radiation; spectral levels, photo-absorption and collisions with charged particles.

PHYS 7354 Atomic and Optical Physics II (3)

Prereq.: PHYS 7353. Applications of quantum mechanics to atomic systems and their interaction with radiation; spectral levels, photo-absorption and collisions with charged particles.

PHYS 7360 Low-Temperature Physics (3)

Properties of matter at temperatures near absolute zero; methods of producing low temperatures; superfluidity of liquid helium, superconductivity, magnetic effects and adiabatic demagnetization.

PHYS 7363 Condensed Matter Physics (3)

Prereq.: PHYS 7225 and PHYS 7242. Application of quantum mechanics and statistical mechanics to condensed matter; lattice vibrations, energy bands in crystals, transport properties, collective excitations, ferromagnetism and superconductivity; theory of Fermi and Bose quantum fluids, phase transitions and critical phenomena.

PHYS 7364 Condensed Matter Physics (3)

Prereq.: PHYS 7363. Application of quantum mechanics and statistical mechanics to condensed matter; lattice vibrations, energy bands in crystals, transport properties, collective excitations, ferromagnetism and superconductivity; theory of Fermi and Bose quantum fluids, phase transitions and critical phenomena.

PHYS 7373 Nuclear Physics (3)

Prereq.: PHYS 4271 and PHYS 7241. Applications of quantum mechanics to the two-nucleon system, to a system of many nucleons and to nuclear reactions, with comparisons between theory and experimental results.

PHYS 7383 High Energy Particle Physics (3)

Prereq.: PHYS 7231 and PHYS 7242. Strong electromagnetic and weak interactions of hadrons and leptons, including symmetries and selection rules; quantum chromodynamics and electroweak theory; accelerator and nonaccelerator experiments including cosmic rays and high energy astrophysics.

PHYS 7398 Graduate Laboratory (3)

1 hr. lecture; 6 hrs. lab. Practical experience in modern experimental physics laboratory techniques.

PHYS 7411 Computational Physics (3)

Prereq.: PHYS 7211. Basic numerical techniques for solution of mathematical equations, including coupled linear algebraic and differential equations and numerical simulation techniques; emphasis on application to physical problems.

PHYS 7412 Computational Physics (3)

Prereq.: PHYS 7411. Basic numerical techniques for solution of mathematical equations, including coupled linear algebraic and differential equations and numerical simulation techniques; emphasis on application to physical problems.

PHYS 7463 Theoretical Condensed Matter Physics (3)

Prereq.: PHYS 7242. Density functional theory of electronic structure, mean field and renormalization group theory of phase transitions; linear response theory; quantum transport, Landau theory of Fermi liquids; systems of strongly interacting electrons, superconductivity.

PHYS 7464 Theoretical Condensed Matter Physics (3)

Prereq.: PHYS 7463. Density functional theory of electronic structure, mean field and renormalization group theory of phase transitions; linear response theory; quantum transport, Landau theory of Fermi liquids; systems of strongly interacting electrons, superconductivity.

PHYS 7537 Radiation Interactions and Transport (3)

Same as MEDP 7537. Prereq.: PHYS 2203 or equivalent, CSC 2262 or equivalent.

PHYS 7538 Monte Carlo Simulation of Radiation Transport (3)

Same as MEDP 7538.

PHYS 7741 Stellar Astrophysics (3)

See ASTR 7741.

PHYS 7742 Stellar Astrophysics (3)

Prereq.: PHYS 7741 is prerequisite for PHYS 7742. See ASTR 7742.

PHYS 7745 Advanced Quantum Theory of Particles and Fields (3)

May be taken for a max. of 9 hrs. of credit.

PHYS 7751 Galactic Astrophysics (3)

See ASTR 7751.

PHYS 7752 Galactic Astrophysics (3)

Prereq.: PHYS 7751 is prerequisite for PHYS 7752. See ASTR 7752.

PHYS 7777 Seminar in Astronomy and Astrophysics (1-6)

May be taken for a max. of 6 sem. hrs. of credit. See ASTR 7777.

PHYS 7783 Topics in Astronomy and Astrophysics (3)

May be taken for a max. of 6 hrs. of credit when topics vary. See ASTR 7783.

PHYS 7857 Graduate Student Seminar (1)

Pass-fail grading. May be repeated for credit. Introduction to research areas in the department; training for presentation of scientific talks; preparation of research proposals.

PHYS 7893 Many-Body Theory (3)

Prereq.: PHYS 7242. Pass-fail grading. May be taken for a max. of 6 hrs. of credit. Diagrammatic techniques, thermal Green's functions, transport theory, Fermi liquids, collective excitations, phase transitions.

PHYS 7895 Selected Topics in Advanced Physics (3)

Pass-fail grading. May be repeated for credit.

PHYS 7896 Current Developments (3)

Pass-fail grading. May be repeated for credit

PHYS 7996 Independent Research in Physics (3)

Prereq.: permission of department. An approved independent research project in experimental or theoretical physics; final written report and an oral presentation to a faculty committee is required.

PHYS 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

PHYS 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Plant Health

PLHL 3000 Pest Management Internship (3)

Su Also offered as ENTM 3000. Prereq.: written consent of advisor. May be taken for a max. of 6 sem. hrs. credit. Work experience in an agricultural or urban pest management industry or in a pest management research area culminating in acceptable written reports.

PLHL 3002 Pest Management Seminar (1)

Also offered as ENTM 3002. Prereq.: PLHL 3000 or ENTM 3000. Review and discussion of internship experiences including topics in agricultural pest management and urban entomology; development of professional skills.

PLHL 3060 Introductory Plant Physiology (4)

Also offered as BIOL 3060. Prereq.: BIOL 1202 and BIOL 1209; CHEM 2060, CHEM 2261 or CHEM 2461. 3 hrs. lecture; 3 hrs. lab. Life processes of plants.

PLHL 3900 Undergraduate Research in Plant Pathology (1-3)

Prereq.: PLHL 4000 or equivalent and consent of instructor. May not be repeated for credit. Research experience for students contemplating graduate study in plant pathology.

PLHL 3960 Undergraduate Research in Crop Physiology and Weed Science (1-3)

Prereq.: PLHL 3060 or equivalent and consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. Research experience for students contemplating graduate study in crop physiology or weed science.

PLHL 4000 General Plant Pathology (4)

Prereq.: BIOL 1201 and BIOL 1208 or equivalent. 3 hrs. lecture; 3 hrs. lab. Nature and cause of disease in plants; relation of environment and host-parasite interactions to development of disease symptoms caused by plant pathogenic fungi, bacteria, viruses, mycoplasmas and nematodes; abiotic causes of disease; methods of disease control; diseases affecting Louisiana crops and ornamentals.

PLHL 4001 Plant Disease Management and Control (3)

Prereq.: PLHL 4000 and either CHEM 2060 or CHEM 2261. 2 hrs. lecture; 2 hrs. demonstration/lab. Plant disease management and control using cultural practices, disease resistance, biological control, legislation, therapy, pesticides; identity, properties, chemistry, mode of action, toxicity and application of fungicides, bactericides and nematicides; evaluation of chemicals for plant disease control.

PLHL 4018 Forest Insects and Diseases (4)

See ENTM 4018.

PLHL 4054 Introductory Mycology (4)

Same as BIOL 4054. Prereq.: BIOL 1202 and BIOL 1209. 3 hrs. lecture; 3 hrs. lab.

PLHL 4444 Seed Physiology (3)

Also offered as BIOL 4444. Prereq.: BIOL 1201, BIOL 1208 and 1402 and either CHEM 2060 or CHEM 2261. BIOL 3060 recommended. Introduction to the life processes of Seeds: their development, germination, dormancy, ecology, vigor and viability.

PLHL 7000 Phytonematology (4)

Prereq.: PLHL 4000. 2 hrs. lecture; 4 hrs. lab. Taxonomy, identification and control of plant parasitic nematodes.

PLHL 7010 Plant Molecular Biology (3)

Also offered as BIOL 7010. Prereq.: BIOL 3060, BIOL 4093 and BIOL 4094; or equivalent. Molecular biology, biochemistry and genetics of higher plants and plant-associated microorganisms; genome organization and structure in nuclei, chloroplasts and mitochondria; structure and expression of plant genes under control of developmental and environmental signals; plant interactions with pathogenic and symbiotic microorganisms.

PLHL 7011 Phytobacteriology (4)

Prereq.: PLHL 4000, BIOL 2051. 3 hrs. lecture; 3 hrs. lab. Taxonomy, biology, mechanisms of pathogenesis; control of prokaryotic plant pathogens.

PLHL 7040 Plant Virology (4)

Prereq.: PLHL 4000 and PLHL 7063 or equivalent. 2 hrs. lecture; 4 hrs. lab. Viruses as causal agents of plant diseases; biological, chemical and physiological properties of plant viruses; methods of transmission; host-virus and vector-virus relationship.

PLHL 7051 Advanced Topics in Plant Pathology (1-4)

Prereq.: consent of instructor. May be taken for a max. of 8 sem. hrs. of credit.

PLHL 7052 Seminar (1)

May be taken for a max. of 3 hrs. of credit for each graduate degree. Topics announced prior to registration.

PLHL 7061 Plant Growth and Development (3)

Also offered as BIOL 7061. Prereq.: BIOL 3060 or PLHL 3060 and BIOL 4093; or equivalent. Effects of naturally occurring growth substances and environmental conditions on plant growth.

PLHL 7063 Plant Metabolism (3)

Also offered as BIOL 7063. Prereq.: PLHL 3060 or equivalent. Major metabolic systems of plants and their control.

PLHL 7067 Selected Topics in Plant Physiology (2)

Same as BIOL 7067. Prereq.: consent of instructor. May be repeated for credit. Mineral nutrition, metabolism, growth and development and herbicides.

PLHL 7080 Host-Parasite Interaction and Disease Resistance (3)

Prereq.: PLHL 4000 and PLHL 7063 or equivalent. 2 hrs. lecture; 2 hrs. lab. Genetics, physiology and biochemistry of disease development and disease resistance in plants; mechanisms of pathogenicity and infectivity, tumorigenesis, metabolic consequences of infection, nature of disease resistance and parasitism.

PLHL 7082 Soilborne Plant Pathogens (3)

Prereq.: PLHL 4000 or equivalent. Physiology, ecology and pathology of soilborne plant pathogens; control strategies including cultural, biological and genetic; disease suppressive soils.

PLHL 7083 Epidemiology and Crop Loss Assessment (3)

Prereq.: PLHL 4000 and PLHL 4001 or equivalent. Interactions between pathogen and host populations and the environment; measurement and prediction of disease spread and increase; disease management strategies; techniques to assess losses due to plant disease.

PLHL 8000 Thesis Research (1-12 per sem.)

“S”/“U”grading.

PLHL 8800 Practicum in Plant Pathology (2)

Prereq.: consent of instructor. Pass/fail grading. May be taken for a max. of 6 sem. hrs. credit. 1 hr. lecture; 4 hours clinic/practicum. Faculty-supervised experiences in plant pathology research, disease diagnosis and control.

PLHL 8900 Special Research Problems (1-5)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. credit. Faculty supervised, independent research other than thesis or dissertation.

PLHL 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading.

Political Science

POLI 1001 Fundamental Issues of Politics (3)

This is a General Education course. *Credit will not be given for this course and POLI 1002.* Central questions at issue in politics; their significance.

POLI 1002 Honors: Fundamental Issues of Politics (3)

Same as POLI 1001, with special honors emphasis for qualified students. Credit will not be given for this course and POLI 1001.

POLI 2030 Civic Engagement, Youth and Media (3)

This is a General Education course. See MC 2030.

POLI 2051 American Government (3)

[LCCN: CPOL 2013, Introduction to American Govt] This is a General Education course. *An honors course, POLI 2052, is also available. Credit will not be given for this course and POLI 2052.* Principles, structures, processes and functions; emphasis on national government.

POLI 2052 HONORS: American Government (3)

This is a General Education course. *Same as POLI 2051, with special honors emphasis for qualified students. Credit will not be given for this course and POLI 2051.*

POLI 2053 Introduction to Comparative Politics (3)

[LCCN: CPOL 2213, Introduction to Comparative Govt] This is a General Education course. Survey of politics in democratic, post-communist and developing societies; emphasis on major actors and institutions.

POLI 2056 Government of Louisiana (3)

Prereq.: POLI 2051 or equivalent. State and local government and politics in Louisiana.

POLI 2057 Introduction to International Politics (3)

This is a General Education course. Basic principles, problems and concepts of international politics; evolution and nature of the nation-state; concepts of sovereignty, power and national interest; patterns of conflict and cooperation; foreign policies of the major powers.

POLI 2060 Introduction to Political Theory (3)

This is a General Education course. Basic concepts of analysis of normative and empirical political thought.

POLI 2070 Public Policy Making: An Introduction (3)

Sequential process of policy making from problem identification through policy formulation, adoption, implementation and evaluation of impact; application to such areas as civil rights, welfare, urban affairs, taxation and government spending.

POLI 3000 HONORS: Thesis (3)

Culmination of political science honors program; details available from department.

POLI 3809 HONORS: Seminar (3)

Students not enrolled in the honors program may be admitted with consent of the instructor. Subject matter and instructor vary. Details available from the department during registration.

POLI 3896 HONORS: Readings Course (1-3)

Same as POLI 4996, with special honors emphasis for qualified students. Credit will not be given for this course and POLI 4996.

POLI 3897 HONORS: Readings Course (1-3)

Same as POLI 4997, with special honors emphasis for qualified students. Credit will not be given for this course and POLI 4997.

POLI 3901 Undergraduate Internship in Political Science (1-6)

Open to undergraduate students approved by the Department of Political Science. May be counted toward the total number of hours required for a major in political science but not toward fulfilling field requirements. Program of study, research and work in governmental or private agencies concerned with public policy.

POLI 3909 Contemporary Political Issues (3)

May be repeated for credit when topics vary. For undergraduate political science or other social sciences majors having a 2.70 overall average; also open to well-qualified students in other fields, by consent of department Course content depends on interests of instructor and class.

POLI 4000 Special Topics in American Politics (3)

Prereq.: consent of department. May be repeated for a max. of 6 sem. hrs. credit when topics vary.

POLI 4001 Research Methods in Political Science (3)

Basic components of the research process in political science, including design and structure of research, modes of observation and techniques of analyzing data.

POLI 4011 Bureaucracy, Politics and Public Policy (3)

Prereq.: POLI 2051. Interrelationships between bureaucracy and politics in formulation and execution of public policy; forces and forms affecting these relationships.

POLI 4015 American State Politics and Policy Making (3)

Prereq.: POLI 2051 or equivalent. Politics and policy making in the American states; legal, cultural, socio-economic, political and institutional factors affecting the formulation, implementation and evaluation of American state public policies.

POLI 4020 American Constitutional Law (3)

Prereq.: POLI 2051 or equivalent. Law of the Constitution and place of the Supreme Court in the American political system; separation of powers, judicial review, federalism and federal powers.

POLI 4021 The American Constitution and Civil Liberties (3)

Prereq.: POLI 2051 or equivalent. Political relevance of major federal constitutional limitations; property rights; First Amendment freedoms; rights of criminal defendants and ethnic minorities.

POLI 4023 Judicial Politics (3)

Prereq.: POLI 2051. Political role of U.S. state and federal courts; organization, staffing, financing; judicial policy making; public perception of the judicial process.

POLI 4026 Campaigns and Elections (3)

Prereq.: POLI 2051 or equivalent. Examination of campaigns and elections in the U.S. political system at the national, state and local levels.

POLI 4028 Gender and American Politics (3)

Also offered as WGS 4028. The role of gender in the political arena in the United States.

POLI 4030 Political Attitudes and Public Opinion (3)

Beliefs and attitudes among the mass public; emphasis on attitude formation and change.

POLI 4031 Political Parties in the United States (3)

Structure and function of political parties at local, state and national levels; voting studies of presidential elections.

POLI 4032 Interest Groups in American Politics (3)

Interest group politics; effect of voluntary organizations on political behavior.

POLI 4034 Political Participation (3)

Voting behavior, conventional participation and political protest and violence; political behavior and public policy.

POLI 4035 The Legislative Process (3)

Prereq.: POLI 2051 or equivalent. Legislative politics; emphasis on the U.S. Congress; effect of party, constituency and legislative institutions on legislative behavior and public policy; role of Congress in the American political system.

POLI 4036 The American Presidency (3)

Prereq.: POLI 2051 or equivalent. The presidency in the American political system; emphasis on process of presidential selection, evolving role of the president, politics of the executive apparatus of the presidency and presidential interaction with other political institutions and actors.

POLI 4039 Southern Politics (3)

Contemporary politics of the American South.

POLI 4040 Special Topics in International Relations (3)

Prereq.: consent of department. May be repeated for a max. of 6 sem. hrs. credit when topics vary.

POLI 4041 International Law (3)

Prereq.: POLI 2057 or equivalent. Development of international law; law of peace, war and neutrality; treaty law; recognition, war crimes, law enforcement, state responsibility and diplomatic immunities under the United Nations.

POLI 4042 International Organization (3)

Origins, development and future of international organization; emphasis on the United Nations.

POLI 4043 American Foreign Policy (3)

“National interest” as guiding consideration in development of American foreign policy from the beginning to the present; importance of the constitutional framework; presidential and congressional leadership; pressure groups and public opinion; changing world environment and American response.

POLI 4044 The Contemporary International System (3)

Prereq.: POLI 2057 or equivalent. Developments and trends in the international system since World War II; classical and modern versions of the balance of power; bipolarity, multipolarity and other elements of systems theory; concept of deterrence and game theory; decision-making theory; integration theory; conflict and conflict-resolution theory.

POLI 4046 International Political Economy (3)

Prereq.: POLI 2057 or equivalent. Theories of international interdependence, dependence and integration; politics of decision making on protectionism and international finance; role of multinational corporations in world political economy; North-South debate; economic issues and national security.

POLI 4047 Political Psychology in International Relations (3)

Cognitive personality and group psychology in international relations.

POLI 4048 International Conflict and Cooperation (3)

Theories of international conflict, war and conflict resolution.

POLI 4050 Globalization and Politics (3)

Prereq.: POLI 2057 or equivalent. Overview of the concepts, theories and empirical evidence associated with the emerging phenomenon known as globalization, with particular emphasis on its political, economic and cultural dimensions.

POLI 4059 International Politics of the Middle East (3)

International relations among Middle Eastern countries, with special emphasis on the Arab-Israeli conflict, international terrorism and U.S. policy toward the region.

POLI 4060 Special Topics in Comparative Politics (3)

Prereq.: consent of department. May be taken for a max. of 6 sem. hrs. of credit when topics vary.

POLI 4061 Comparative Politics of the Middle East (3)

Government and politics of Middle Eastern countries, with special emphasis on political institutions and processes, the role of Islam and women's conditions.

POLI 4062 Comparative Political Economy (3)

Credit will not be given for both this course and POLI 7976. Cross-regional comparison on the interaction between politics and economics; topics include electoral business cycles, foreign trade, foreign investment, industrial policy and the environment.

POLI 4063 Comparative Political Institutions (3)

Credit will not be given for both this course and POLI 7972. Comparative analysis of political institutions; emphasis on constitutional design, electoral and party systems, legislatures, cabinets and parliamentary and presidential structures.

POLI 4064 Comparative Politics of Developing Areas (3)

Problems of development confronted by contemporary states and societies of the Third World; emphasis on role of ethnic pluralism, political parties, bureaucracies and the military.

POLI 4065 Latin American Governments and Politics (3)

Governmental and political processes of Latin America; their contributions to modern government.

POLI 4067 The Politics of Asia (3)

Governments and politics of modern Asia, with a focus on China; contemporary nationalism, political development, revolution and impact of communism, democracy and capitalism on Asian states.

POLI 4070 Russian Politics and Government (3)

Contemporary political institutions and policies of Russia; influence of internal forces, such as culture, ideology and social structure; political economic and social problems and policies.

POLI 4072 Politics and Government of East Central Europe (3)

Political systems of the former communist states of Eastern Europe; domestic institutions and policies; legacies of communism; political parties and elections.

POLI 4074 Politics of the European Union (3)

The political, social, legal and economic unification of Europe.

POLI 4075 Politics of Western Europe (3)

National political systems of Western Europe.

POLI 4076 The Politics of France and Francophone Areas (3)

The political development, institution and culture of the French Republic and selected Francophone areas.

POLI 4078 African Government and Politics (3)

Governmental and political processes of Africa; factors affecting governmental performance in modern Africa.

POLI 4079 State, Society and Citizenship in Contemporary China (3)

Political events in contemporary China; emphasis on the state and the citizen in the Reform Era.

POLI 4080 American Political Thought (3)

Development of the American liberal-democratic tradition and dissent to that tradition.

POLI 4081 History of Political Theory from Plato to More (3)

Ancient and medieval political thought.

POLI 4082 History of Political Theory from Machiavelli to Nietzsche (3)

Early modern European political thought.

POLI 4090 Special Topics in Political Theory (3)

Prereq.: consent of department. May be repeated for a max. of 6 sem. hrs. credit when topics vary.

POLI 4096 Contemporary Political Theory (3)

Political thought from Nietzsche to present.

POLI 4097 Political Theology (3)

Also offered as REL 4097. An exploration of the relationship between theology and politics, from the ancient Greeks and Hebrews to contemporary political theologians; emphasis on the Judeo-Christian tradition, but the political theology of other religious traditions, such as Islam, Hinduism and Confucianism may be included.

POLI 4098 Politics and Ethics (3)

Also offered as PHIL 4098. Ethical theory and its application to politics, domestic and international; ethical issues of public policy and conduct will be examined.

POLI 4234 Studies in Literature and Politics (3)

See ENGL 4234

POLI 4996 Readings Course (1-3)

Prereq.: consent of department. Honors courses, POLI 3896 and POLI 3897, are also available. For junior, senior and graduate students in the social sciences with a 3.00 average. Credit will not be given for these courses and POLI 3896, POLI 3897. Individual reading in a specified field of political science.

POLI 4997 Readings Course (1-3)

Prereq.: consent of department. Honors courses, POLI 3896 and POLI 3897, are also available. For junior, senior and graduate students in the social sciences with a 3.00 average. Credit will not be given for these courses and POLI 3896, POLI 3897. Individual reading in a specified field of political science.

POLI 7000 Professional Development (1)

Pass-fail grading. Political scientist as teacher, researcher, citizen.

POLI 7900 Seminar in American Politics (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7902 Seminar in Public Policy (3)

Also offered as PADM 7902.

POLI 7903 Special Topics in American Politics (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

POLI 7915 Seminar in State Politics and Policy Making (3)

POLI 7917 Program Evaluation (3)

See PADM 7917.

POLI 7920 Seminar in Public Law (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7930 Seminar in Political Behavior (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7935 Seminar in Legislative Politics (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7940 Seminar in International Politics (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7941 Special Topics in International Politics

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

POLI 7942 Seminar in Political Psychology in International Relations (3)

Advanced study of cognitive, personality, group and identity psychology in international relations.

POLI 7946 Seminar in the Politics of International Economic Relations (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7947 International Conflict (3)

Democratic peace, international terrorism, civil war, diversionary war and enduring rivalries, as well as current debates in the literature.

POLI 7961 Approaches to the Study of Politics (3)

POLI 7962 Seminar in Research Design and Quantitative Techniques (3)

POLI 7963 Advanced Research Methods in Social Science (3)

See SOCL 7203

POLI 7964 Specialized Topics in Social Science Methods (2-3)

See SOCL 7213.

POLI 7970 Seminar in Comparative Politics (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

POLI 7971 Special Topics in Comparative Politics (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary.

POLI 7972 Seminar in Comparative Political Institutions (3)

Credit will not be given for both this course and POLI 4063. Advanced analysis of comparative political institutions, emphasis on constitutional design, electoral and party systems, legislatures and cabinets and parliamentary and presidential structures.

POLI 7974 Seminar on the State and Society (3)

Focus on relations between the state and society; effects of social structure and social change on politics and the factors affecting political regimes and state capacity.

POLI 7975 Seminar in Comparative Political Behavior (3)

Focus on individual level political phenomena and the relations to political institutions and social systems; topics include political culture and socialization, participation and protest, revolution and regime support, voting and voting behavior.

POLI 7976 Seminar in Comparative Political Economy (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Credit will not be given for both this course and POLI 4062. Focus on the interaction between politics and economics; topics include models of development, economic performance and the impact of global economic forces on regional and domestic politics.

POLI 7980 Seminar in American Political Thought (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7981 Seminar in Classical and Medieval Political Theory (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7982 Seminar in Early Modern Political Theory (3)

POLI 7990 Political Theory: Interpretation and Analysis (3)

POLI 7991 Special Topics in Political Theory (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

POLI 7995 Seminar in Contemporary Political Theory (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7998 Readings Course (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 7999 Readings Course (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

POLI 8000 Thesis Research (1-12 per sem.)

“S”/“U”grading.

POLI 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Psychology

PSYC 2000 Introduction to Psychology (3)

[LCCN: CPSY 2013, Introduction to Psychology] This is a General Education course. *An honors course, PSYC 2001, is also available. Credit will not be given for this course and PSYC 2001.* Understanding, prediction and control of human behavior.

PSYC 2001 HONORS: Introduction to Psychology (3)

This is a General Education course. *Same as PSYC 2000, with special honors emphasis for qualified students. Credit will not be given for this course and PSYC 2000.*

PSYC 2005 Introduction to the Psychology Major (1)

Prereq.: Credit or registration in PSYC 2000 or PSYC 2001 or equivalent. Pass/fail grading. This course is only offered online. Introduction and orientation to the psychology major, including information about the psychology curriculum, selecting a career path, and graduate school options.

PSYC 2016 Statistics for the Behavioral Sciences (4)

Prereq.: credit or registration in MATH 1021 or equivalent. Open to Psychology majors; open to other with permission of instructor. 3 hrs. lecture; 2 hrs. lab. Computation and elementary theory relating to basic statistical techniques; normal distribution, descriptive statistics, statistical inference, product moment correlations, simple rank order correlations, *t*-test, and simple analysis of variance.

PSYC 2017 Research Methods in Psychology (4)

Prereq.: PSYC 2016 or equivalent and PSYC 2005. *PSYC 2017 may not be taken concurrently with PSYC 2016. Senior college standing required. LSU and overall GPA of at least 2.50. Open to psychology majors; open to others with permission of instructor.*

3 hrs. lecture; 2 hrs. lab. Techniques and logic underlying standard research methodology in psychology, with special emphasis on experimentation, literature research and writing empirical reports.

PSYC 2040 Social Psychology (3)

[LCCN: CPSY 2413, Social Psychology] *Prereq.: 3 sem. hrs. of psychology or sociology.* Cultural forces affecting attitudes, social learning, perception and communication of individuals and groups.

PSYC 2060 Educational Psychology (3)

Principles of learning, motivation, development and evaluation as related to the educative process.

PSYC 2070 Developmental Psychology of the Life Span (3)

[LCCN: CPSY 2113, Developmental Psychology] *Prereq.: PSYC 2000 or equivalent.* Survey of developmental processes across the life span.

PSYC 2076 Child Psychology (3)

[ICCN: CPSY 2313, Child Psychology] *Prereq.: PSYC 2000 or PSYC 2060 or equivalent.* Psychological and social development of the child.

PSYC 2078 Adolescent Psychology (3)

[LCCN: CPSY 2213, Adolescent Psychology] *Prereq.: PSYC 2000 or PSYC 2060 or equivalent.* Adolescent behavior considered in terms of psychological, social and physical development.

PSYC 2999 Undergraduate Practicum in Psychology (1-3)

Prereq.: PSYC 2000 or PSYC 2060, and consent of instructor; LSU and overall GPA of at least 2.50. May be taken for a max. of 3 sem. hrs. of credit. Student responsible for registering with a faculty member. Individually supervised experience in psychological laboratories and community agencies.

PSYC 3020 Psychological Tests and Measurements (3)

Prereq.: PSYC 2000 or PSYC 2001 and a first course in statistics. Test construction, standardization, validation; intelligence, clerical, mechanical, spatial aptitude tests; interest and personality tests; test batteries.

PSYC 3030 Cognitive Psychology (3)

Prereq.: PSYC 2000 or PSYC 2001. A survey of the psychological approaches to understanding cognition. Topics include the processes and brain mechanisms involved in perception and attention, imagery, memory, language, creativity, problem solving, reasoning and decision-making.

PSYC 3050 Introduction to Personnel and Industrial Psychology (3)

Prereq.: PSYC 2000 or PSYC 2001. Organizational psychology, leadership, job satisfaction, motivation; human relations psychology; human engineering psychology; personnel psychology; industrial, military and governmental selection, testing and inter-viewing; consumer psychology.

PSYC 3081 Personality (3)

Prereq.: PSYC 2000 or PSYC 2060 or equivalent. Determinants and dynamics of personality; theory and research.

PSYC 3082 Introduction to Abnormal Psychology (3)

Prereq.: PSYC 2000 or PSYC 2060 or equivalent. Abnormal personality and behavior disorders.

PSYC 3083 Psychological Counseling (3)

Prereq.: PSYC 2000 or PSYC 2060. Concepts of psychological treatment in adjustment problems.

PSYC 3140 Advanced Social Psychology (3)

Prereq.: PSYC 2040 or equivalent. Current theories of socialization; existing methodologies and interdisciplinary influences.

PSYC 4008 History of Modern Psychology (3)

Prereq.: PSYC 2000 or PSYC 2001 and 6 additional hrs. of psychology; LSU and overall GPA of at least 2.50. Open to psychology majors; open to other matriculated students with permission of instructor. Historical survey of psychology, with reference to schools of psychology.

PSYC 4030 Psychology of Thinking and Decision-Making (3)

Prereq.: PSYC 2000 or PSYC 2060. Experimental methods and research findings on human thinking, decision-making, comprehension, choice behavior and problem solving.

PSYC 4031 Sensory and Perceptual Processes (3)

Prereq.: PSYC 2000 and PSYC 2017; or equivalent. Theories, data and procedures in sensation and perception.

PSYC 4032 Psychology of Learning (3)

Prereq.: PSYC 2000 or PSYC 2001. Behavior from the standpoint of learning; recent experimental literature in the learning area; major theories of learning.

PSYC 4033 Psychology of Memory and Forgetting (3)

Prereq.: PSYC 2000 or PSYC 2001. Major theoretical concepts; review of experimental literature in the field of memory and forgetting.

PSYC 4034 Physiological Psychology (3)

Prereq.: PSYC 2000 or PSYC 2060 or equivalent. Functioning of the nervous system with respect to sensation, perception, learning and motivation.

PSYC 4035 Drugs, the Brain and Behavior (3)

Prereq.: PSYC 2000 or consent of instructor. Modes of action of drugs on the brain and behavioral effects of therapeutic drugs and drugs of abuse.

PSYC 4037 Neuropharmacology (3)

Prereq.: PSYC 2000 or PSYC 2001. Primarily for students in psychology and basic sciences. Basic pharmacology; neurochemical and physiological mechanisms of drug actions on the nervous system; pharmacology of drugs of abuse and psychiatric medications.

PSYC 4039 Madness and Medicine (3)

Prereq.: PSYC 2000 or PSYC 2001. The history of medical treatments for mental disorders.

PSYC 4040 Research and Theory in Sexuality (3)

Prereq.: PSYC 2000 or PSYC 2060 and one additional course in psychology or KIN 2600. Sexual behavior viewed from different theoretical perspectives; emphasis on empirical sexual research literature.

PSYC 4042 Psychology of Emotion (3)

Prereq.: PSYC 2000 or PSYC 2001 or equivalent. Exploring the nature and function of human emotion by inquiring into the composition, purpose, and import of emotion in our daily lives.

PSYC 4070 Developmental Psychology (3)

Prereq.: PSYC 2000 or PSYC 2001. Theories of development, contemporary issues and research findings at successive ages of human development; psychological changes throughout the lifespan.

PSYC 4072 Developmental Psychology of Adulthood and Aging (3)

Prereq.: PSYC 2000 or PSYC 2060. Theories, issues, and research findings on psychological changes occurring throughout adulthood and later life.

PSYC 4080 Applied Behavior Analysis (3)

Prereq.: PSYC 2000. Methods, analysis and intervention in the application of basic learning principles; emphasis on school applications.

PSYC 4111 Intermediate Statistics (3)

Prereq.: PSYC 2000 or PSYC 2001 and EXST 2201 or equivalent. LSU and overall GPA of at least 2.50. Preparatory for graduate study in statistics and research design in psychology. Open to psychology majors; open to other students with permission of instructor. Emphasis on inferential statistics and hypothesis testing; familiarization with common statistical analysis software and interpretation of output; major topics include simple and factorial analysis of variance, linear and multiple correlation and regression.

PSYC 4176 Advanced Child Psychology (3)

Prereq.: PSYC 2000 or PSYC 2001 and 3 additional hrs. of psychology. Psychological theories of child development, child behavior and research methodology.

PSYC 4999 Independent Reading and Research in Psychology (1-6)

Prereq.: LSU and overall GPA of at least 2.50 and consent of instructor. May be taken for a max. of 6 sem. hrs. credit. Open to seniors and graduate students. Student responsible for registering with a faculty member and selecting an area of reading or research.

PSYC 7020 Measurement of Behavior (3)

Prereq.: PSYC 4111 or equivalent; graduate standing in psychology or consent of instructor. Techniques and theories of behavior measurement; problems of data collection; reliability, validity, design and analysis of measurement instruments for the psychological sciences.

PSYC 7030 Cognitive Basis of Behavior (3)

Prereq.: graduate standing in psychology or other matriculated graduate students with consent of instructor. Cognitive processes involved in memory, language, decision-making; role of cognitive variables in controlling behavior.

PSYC 7034 Biological Basis of Behavior (3)

Prereq.: graduate standing in psychology or other matriculated graduate students with consent of instructor. Selected biological systems involved in mediation of behavior.

PSYC 7040 Social Basis of Behavior (3)

Prereq.: graduate standing in psychology or other matriculated graduate students with consent of instructor. Social, organizational and cultural influences on human behavior; research in social and organizational psychology.

PSYC 7060 Ethical, Legal and Professional Issues in School Psychology (3)

Prereq.: graduate standing in psychology or consent of instructor. Roles and functions of the school psychologist; ethical considerations across diverse roles and settings; legal bases for the practice of school psychology and students' rights; currently accepted standards for the credentialing of school psychologists and standards for practice.

PSYC 7111 Advanced Statistics (3)

Prereq.: PSYC 4111 or equivalent; graduate standing in psychology or consent of instructor. Machine calculation, coding, measures of centrality and variation, regression, correlation, prediction, probability, statistical inference, analysis of variance, multi-variate techniques for the psychological sciences.

PSYC 7117 Methodology and Research Design (3)

Prereq.: PSYC 4111 or PSYC 7111; graduate standing in psychology or consent of instructor. Scientific approach to psychological questions, research, design and methodology; logic and philosophy underlying psychological theory and research; social psychology of the psychological experiment; experimental and quasi-experimental designs; problems in observation and measurement of behavioral variables; methodological and philosophical considerations in analysis of data.

PSYC 7125 Psychological Assessment I (3)

Prereq.: graduate standing in clinical or school psychology or consent of instructor. Clinical assessment techniques including individual tests of intelligence, mental status examination, interviewing and behavioral assessment; procedures for both children and adults.

PSYC 7165 Psychoeducational Assessment (3)

Prereq.: graduate standing in clinical or school psychology or consent of instructor. Instruction and practicum in administration and interpretation of individually administered intellectual assessment measures and diagnostic achievement techniques.

PSYC 7171 Developmental Disorders and Psychopathology of Children (3)

Prereq.: graduate standing in clinical or school psychology or consent of instructor. Theories, research and contemporary issues related to normal and problem behaviors of children.

PSYC 7185 Behavior Therapy (3)

Prereq.: graduate standing in clinical or school psychology or consent of instructor. Modern treatment and assessment procedures based on learning theories; behavioral analysis and theoretical orientations as applied to a wide variety of clinical disorders.

PSYC 7660 School Psychological Consultation (3)

Prereq.: graduate standing in psychology or consent of instructor. Instruction and practicum that provide psychological consultation on short-term behavior and academic problems for teachers and other school personnel.

PSYC 7668 Practicum in School Psychology (1-6)

Prereq.: admission to doctoral program in school psychology. Pass-fail grading. May be taken for a max. of 6 sem. hrs. of credit. Closely supervised experience in schools in which students perform psychoeducational assessments, consult with teachers and function as members of multidisciplinary teams; cases include children with specific learning disabilities, behavior disorders and mental retardation.

PSYC 7669 Practicum in School Psychology (1-6)

Prereq.: admission to doctoral program in school psychology. Pass-fail grading. May be taken for a max. of 6 sem. hrs. of credit. Closely supervised experience in schools in which students perform psychoeducational assessments, consult with teachers and function as members of multidisciplinary teams; cases include children with specific learning disabilities, behavior disorders and mental retardation.

PSYC 7688 Practicum in Clinical Psychology (1-3)

Prereq.: consent of instructor and enrollment in clinical psychology training program. 12 sem. hrs. are required. Supervised experience in the application of clinical psycho-logical assessment and intervention techniques with behaviorally disordered populations (adult, child, medical).

PSYC 7689 Practicum in Clinical Psychology (1-3)

Prereq.: consent of instructor and enrollment in clinical psychology training program. 12 sem. hrs. are required. Supervised experience in the application of clinical psycho-logical assessment and intervention techniques with behaviorally disordered populations (adult, child, medical).

PSYC 7690 Teaching of Psychology Practicum (1-3)

Prereq.: PSYC 7990. Course May be taken for a max. of 4 sem. hrs. of credit. Closely supervised experience in teaching in which students will function as the instructor of record for an undergraduate course in the Psychology department; objectives include enhanced teaching skills and the development of a philosophy of teaching.

PSYC 7754 Psycholinguistics: Linguistic Perspectives (3)

Also offered as LING 7754. Prereq.: ENGL 4010. See COMD 7754.

PSYC 7925 Psychological Assessment II (3)

Prereq.: PSYC 7125 or equivalent; graduate standing in clinical psychology or consent of instructor. Administration and interpretation of objective and projective tests of personality and psychopathology; neuropsychological assessment techniques.

PSYC 7927 Psychotherapy and Behavior Change (3)

Prereq.: graduate standing in clinical psychology or consent of instructor. Theoretical and empirical considerations relevant to psychoanalytic, humanistic, behavioral and cognitive-behavioral approaches for treating disordered behavior.

PSYC 7929 Cultural Diversity Issues in Counseling and Therapy (3)

Prereq.: graduate standing in clinical psychology or consent of instructor. Issues of individual and cultural diversity training

including definitions of multicultural counseling, historical perspectives, various theories and critical/ethical issues regarding counseling of diverse populations. Practical strategies of service delivery and current research will be reviewed.

PSYC 7938 Seminar in Experimental Psychology (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

PSYC 7939 Seminar in Experimental Psychology (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

PSYC 7946 Theories and Concepts of Behavior Analysis (3)

Prereq.: graduate standing in psychology or consent of instructor. This seminar is designed to provide a survey of the theoretical and experimental foundations of the practice of applied behavior analysis. Readings are selected to enhance students' understanding of the basic principles of learning and behavior, to highlight areas of basic-oriented research which have been useful in the development of applied practices and to identify areas which may be capable of informing applied practice, but for which research has not yet bridged the gap.

PSYC 7948 Research Methodology and Application in Behavior Analysis (3)

Prereq.: graduate standing in psychology or consent of instructor. Examination of the methods and procedures used in applied behavior analytic practice and research with a focus on direct observation of behavior, behavioral assessment and intervention. Emphasis on clinical and school applications.

PSYC 7949 Behavioral Perspectives on Child and Adolescent Development (3)

Prereq.: graduate standing in psychology or consent of instructor. Examination of the behavioral processes and environmental influences associated with typical and atypical child development. Emphasis on verbal, motor, social, perceptual and cognitive development from the behavior analytic perspective.

PSYC 7950 Industrial/Organizational Psychology Internship (3 or 6)

Prereq.: completion of general examination. Pass-fail grading. May be taken for a max. of 12 sem. hrs. of credit. Open only to

graduate students nominated by the Department of Psychology and accepted by an approved internship organization. Supervised experience in an organization in the application of personnel and organizational psychology principles.

PSYC 7958 Current Problems in Industrial Psychology (3)

Prereq.: consent of instructor. May be taken for a max. of 12 hrs. of credit when topics vary.

PSYC 7959 Current Problems in Industrial Psychology (3)

Prereq.: consent of instructor. May be taken for a max. of 12 hrs. of credit when topics vary.

PSYC 7968 Current Problems in School Psychology (3)

Prereq.: graduate standing in school psychology program or consent of instructor. Research and methodological issues in school psychology; topics vary.

PSYC 7969 Internship in School Psychology (1-6)

Prereq.: satisfactory completion of the general and language examinations and faculty approval. Pass-fail grading. May be taken for a max. of 12 sem. hrs. of credit. One full academic year of supervised internship that is no less than 1,200 hours, half of which must be in a school setting; internship requirement may be fulfilled by completing one full academic year or two years of one-half time internship experience; at least one hour per week is devoted to direct supervision of each intern.

PSYC 7972 Child Behavior Therapy (3)

Prereq.: PSYC 7171 or equivalent; graduate standing in clinical or school psychology or consent of instructor. Behavioral treatment of children's behavior problems.

PSYC 7973 School-Based Psychological Interventions (3)

Prereq.: graduate standing in psychology. Survey of intervention strategies for various disorders and behavior problems displayed by children in school settings.

PSYC 7982 Advanced Psychopathology (3)

Prereq.: Graduate standing in clinical or school psychology or consent of instructor. Theories of psychopathology, specific etiological hypotheses and pertinent research evidence.

PSYC 7990 Teaching of Psychology (3)

Prereq.: graduate standing in psychology. Required of all doctoral candidates to become instructor of record in the department. Philosophy, theory and practice in higher education with application to undergraduate instruction in psychology.

PSYC 7997 Clinical Psychology Internship (3 or 6)

Prereq.: completion of course work and general examination. May be taken for a max. of 15 sem. hrs. of credit. Open only to graduate students nominated by the Department of Psychology and accepted by an approved internship program. Supervised evaluation and treatment of individuals manifesting mental disorders.

PSYC 7999 Professional Considerations in Psychology (3)

Prereq.: graduate standing in psychology. Required of all clinical and school doctoral candidates. Professional ethics, practice and responsibility.

PSYC 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

PSYC 8939 Independent Research: Experimental Psychology (1-6)

Prereq.: consent of instructor. Pass-fail grading. This course may be repeated for credit; a max. of 15 sem. hrs. in this series is allowed toward doctoral requirements.

PSYC 8959 Independent Research: Industrial Psychology (1-6)

Prereq.: consent of instructor. Pass-fail grading. This course may be repeated for credit; a max. of 15 sem. hrs. in this series is allowed toward doctoral requirements.

PSYC 8979 Independent Research: Developmental Psychology (1-6)

Prereq.: consent of instructor. Pass-fail grading. This course may be repeated for credit; a max. of 15 sem. hrs. in this series is allowed toward doctoral requirements.

PSYC 8989 Independent Research: Clinical Psychology (1-6)

Prereq.: consent of instructor. Pass-fail grading. This course may be repeated for credit; a max. of 15 sem. hrs. in this series is allowed toward doctoral requirements.

PSYC 9000 Dissertation Research (1-12 per sem.)

“S”/“U”grading.

Religious Studies

REL 1000 Religions of the World (3)

[LCCN: CPHL 2213, World Religions] This is a General Education course. *Primarily for non-majors.*

Survey of the religions of the world such as Hinduism, Buddhism, Judaism, Christianity, Islam and indigenous religious traditions.

REL 1001 Beginning Hebrew (4)

See HEBR 1001.

REL 1002 Beginning Hebrew (4)

See HEBR 1002.

REL 1004 Old Testament (3)

This is a General Education course. *Credit will not be given for this course and REL 1007.* Scholarly study of the Hebrew Bible (Old Testament) against the background of the history and religious life of ancient Israel.

REL 1005 New Testament (3)

This is a General Education course. Introduction to the history, religion and literature of early Christianity from about 30 to 150 CE; emphasis on the writings of the New Testament and the methods by which scholars study them.

REL 1007 HONORS: Old Testament (3)

Same as REL 1004, with special honors emphasis for qualified students. Credit will not be given for this course and REL 1004.

REL 2000 Introduction to the Study of Religion (3)

This is a General Education course. Thematic introduction to the academic study of religion; ways of being religious; forms of religious literature; beliefs and rituals; the place of religion in human life.

REL 2001 Faith and Doubt (3)

This is a General Education course. How religious faith is challenged or supported by various factors, such as reason, morality, organized religion, and the experience of suffering.

REL 2003 Intermediate Hebrew (4)

This is a General Education course. See HEBR 2003.

REL 2004 Intermediate Hebrew (4)

This is a General Education course. See HEBR 2004.

REL 2006 HONORS: Jesus in History and Tradition (3)

Primarily for honors students and students concentrating in religious studies. Ideas about Jesus from antiquity to the present, including the modern quest for the historical Jesus.

REL 2025 African American Religion (3)

This is a General Education course. *Also offered as AAAS 2025.* This course will examine black religious experience in the United States from the colonial period to the present.

REL 2027 Asian Religions (3)

This is a General Education course. *Credit will not be given for this course and REL 2031.* Survey of the history, beliefs and practices of the major religions of Southern and Eastern Asia, focusing on Hinduism, Buddhism and the religions of China and Japan.

REL 2028 Philosophy of Religion (3)

This is a General Education course. *Same as PHIL 2028.* Meaning of religion as a pervasive phenomenon in human societies; faith and reason, nature of divinity, arguments for and against God's existence, religious knowledge and experience, morality and cult, the problem of evil.

REL 2029 Judaism, Christianity and Islam (3)

This is a General Education course. *Credit will not be given for this course and REL 2030.* Survey of the history, beliefs and practices of these three related religions.

REL 2030 HONORS: Judaism, Christianity and Islam (3)

This is a General Education course. *Same as REL 2029, with special honors emphasis for qualified students. Credit will not be given for this course and REL 2029.*

REL 2031 HONORS: Asian Religions (3)

This is a General Education course. Same as REL 2027, with special honors emphasis for qualified students. Credit will not be given for this course and REL 2027.

REL 2033 American Religions (3)

This is a General Education course. Introduction to religions in America.

REL 2034 Indigenous Religions (3)

Introduction to the religions of the indigenous peoples or “First Nations” of the Americas, Africa and Australia.

REL 2120 The Holocaust (3)

Responses of Judaism and the Christian church to Nazi Germany's killing of the Jews; issues about God, human morality, Western civilization and modernity.

REL 3000 Christianity (2)

Advanced survey of the global history of Christianity, with in-depth analysis of the diversity of Christian beliefs and practices throughout the world.

REL 3004 Archaeology and the Bible (3)

Also offered as ANTH 3004. Major figures and discoveries influencing the historical study of the Bible; emphasis on results of excavations and discovery of written documents and inscriptions.

REL 3010 Special Topics in Religious Studies (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

REL 3015 Christian Philosophy (3)

See PHIL 3015.

REL 3030 Topics in Mysticism (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Studies of the literature and practices of particular mystical traditions, such as Christian, Kabbalistic, Sufi, Hindu, Buddhist, Taoist, Afro-Caribbean or the shamanistic traditions of the Americas, or Tibet and Central Asia.

REL 3033 Native American Religions (3)

Survey of native North American religious traditions from prehistory to the present; including issues of conversion and Christianization, freedom of religion and gender.

REL 3051 Apocalypse: Then and Now (3)

Ideas about the end of the world from antiquity to the present; emphasis on the book of Revelation and its continuing influence.

REL 3090 Comparative Mythology (3)

See CLST 3090.

REL 3092 Fundamentalisms and Religious Nationalism (3)

Also offered as INTL 3092. Investigates how the phenomenon of fundamentalism manifests itself in combinations of religion and politics in various countries around the world as a response to “modernity.”

REL 3100 Judaism (3)

Religious texts, faith and practice in Judaism, from antiquity to the present.

REL 3101 American Judaism (3)

American Jewish history; Judaism as a cultural entity and religious faith.

REL 3102 American Catholic History (3)

Roman Catholicism in its North American context: the European heritage; immigration; political, intellectual and devotional life.

REL 3104 Ancient Hebrew Prophets (3)

Prophetic movement in ancient Israel; different modern interpretations of prophecy.

REL 3124 The Literature of the English Bible (3)

Also offered as ENGL 3124.

REL 3203 Religion and Parapsychology (3)

Extraordinary human experiences such as faith healing, death and dying, exorcism, apparitions and witchcraft, examined from the perspective of religious phenomenology, philosophy and psychology.

REL 3300 Women and Religion (3)

Role of women in the religions of the world.

REL 3786 The Religion of Islam (3)

Also offered as INTL 3786. Introduction to the major religious and cultural dimensions of the Islamic world, both those that express its diversity and those that express its continuity; emphasis on the development of classical Islamic institutions and ideas, the diverse forms of Islamic religious and cultural life over the past fourteen centuries as the Islamicate tradition has spread around the world.

REL 4001 South Asian Society, Polity and Culture (3)

See INTL 4002.

REL 4010 Selected Topics in Religious Studies (3)

May be taken for a max. of 12 hrs. of credit when topics vary.

REL 4011 The Age of Reformation (3)

See HIST 4011.

REL 4012 History of Modern Christian Thought (3)

Also offered as HIST 4012. Prereq.: one religious studies course. Major figures in the history of Christian thought from the Reformation through the 19th century.

REL 4018 Religion and Healing (3)

Analysis of cultural and religious influences on the concepts of illness and health and the relationship of body and mind in cross-cultural perspective, including bio-medicine and a range of Asian healing paradigms.

REL 4031 Comparative Religions (3)

See ANTH 4031.

REL 4032 Religion, Gender and Society (3)

Also offered as ANTH 4032. Examination of the link between religious ideas and gender formulations within simple and complex societies and certain religious communities.

REL 4035 Women & Buddhism (3)

Buddhist concepts of women in comparative socio-historical contexts. Critical analyses of practices, teachings, and interpretive frames.

REL 4050 A History of God (3)

Traces the development of the concept of God from antiquity to the present.

REL 4079 Geography of Religion (3)

See GEOG 4079.

REL 4096 The Modern Middle East (3)

See HIST 4096.

REL 4097 Political Theology (3)

See POLI 4097.

REL 4124 Studies in African Diaspora Religions (3)

Also offered as AAAS 4124. May be taken for a max. of 6 hrs. of credit when topics vary. Analysis of religious beliefs, rituals and practices and their roles in the lives of African Diaspora peoples.

REL 4125 History of Ancient Israel (3)

Also offered as HIST 4125. Israelite history from its beginnings to the Christian era; readings from biblical and other ancient Near Eastern texts.

REL 4161 History of Religion in the United States (3)

See HIST 4161.

REL 4171 Religion in Southern Culture (3)

Religion as a component of Southern history and culture; emphasis on the religious culture of Louisiana.

REL 4191 Religions of China and Japan (3)

See HIST 4191.

REL 4200 Special Topics in American Religion (3)

Advanced examination of special topics in American religion.

REL 4227 Contemporary Christian Thought (3)

Major theologians and theological movements of the 20th century.

REL 4236 Studies in Literature and Religion (3)

See ENGL 4236.

REL 4301 Theories of Religion (3)

Theories about the origin, nature and function of religion from the social sciences and other disciplines.

REL 4400 Religious Thought of Martin Luther King, Jr. & Malcolm X (3)

Also offered as AAAS 4400. This course explores the religious thought of Martin Luther King, Jr. and Malcolm X through a close examination of their most significant writings and speeches.

REL 4500 Seminar in Biblical Studies (3)

Prereq.: one course in Biblical studies. May be taken for a max. of 6 hrs. of credit when topics vary.

REL 4600 Hinduism (3)

Prereq.: REL 2027 or consent of instructor. A survey of Hinduism from its origins to the present.

REL 4800 Buddhism (3)

Prereq.: REL 2027 or consent of the instructor. A survey of Buddhism from its origins to the present.

REL 4850 Buddhist Psychology (3)

Buddhist conceptions of mind, self, psyche and personhood in comparison to Western views of the same.

REL 4928 Medieval Philosophy (3)

See PHIL 4928.

REL 4939 Kierkegaard (3)

See PHIL 4939.

REL 4944 Philosophical Theology (3)

See PHIL 4944.

REL 4990 Independent Reading and Research (1-3)

May be taken for a max. of 6 hrs. of credit when topics vary. Open to advanced students with prior approval of faculty member who will direct the course. Student is responsible for selecting area of reading and research and gaining agreement of faculty member to direct the course.

REL 7990 Independent Study (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

Renewable Natural Resources

RNR 1001 Natural Resource Conservation (3)

This is a General Education course. *An honors course, RNR 1070, is also available. Credit will not be given for this course and RNR 1070.* Relationship of humans to the natural environment; ecology and conservation of soil, water, forest, range, wildlife and fisheries resources.

RNR 1002 Issues in Natural Resource Management (1)

Prereq.: for RNR majors only; credit or registration in RNR 1001 or RNR 1070. Discussions of the ecological, economic, sociocultural and political factors that affect human relationships with the natural environment and the exploitation and conservation of water, forest, range, wildlife, wetland and fisheries resources.

RNR 1004 Conservation of Forest Resources (2)

Resources of forest and range land, including wood, wildlife, recreation forage and water; techniques of multiple-use management of forest lands.

RNR 1070 HONORS: Natural Resource Conservation (4)

Same as RNR 1001, with special honors emphasis for qualified students. Prereq.: admission to the Honors College and credit or registration in BIOL 1207. Credit will not be given for this course and RNR 1001. Emphasis on the effects of factors such as climate change and human population growth on resource productivity, and the development and implementation of strategies for sustainable resource use.

RNR 2001 Trees and Woody Plants of the Southeast (2)

Students are responsible for paying for travel expenses associated with this course. 1 hr. lecture; 3 hrs. lab. Principal trees of the southeastern U.S.; their identification, classification, nomenclature and distribution. Emphasis on southern timber species; common shrubs, ornamentals, woody vines and some herbaceous plants will also be covered.

RNR 2002 Introduction to Fisheries and Aquaculture (3)

Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 3 hrs. lab. History and scope of fisheries and aquaculture; production and harvest of economically important aquatic vertebrates and invertebrates; role of fisheries and aquaculture professionals in society.

RNR 2003 Trees and Woody Plants of the Eastern and Western United States (1)

Prereq.: RNR 2001 or consent of instructor. Students are responsible for paying for travel expenses associated with this course. 3 hr. lab. Important trees of the eastern and western U.S.; their identification, distribution and value. Emphasis on important timber species and a limited number of common woody shrubs.

RNR 2031 Principles of Wildlife Management (3)

An honors course, RNR 2072, is Also offered. Prereq.: RNR 2101 or RNR 2070 or concurrent enrollment. Credit will not be given for this course and RNR 2072. Wildlife conservation and management; ecology and management of wildlife in relation to the objectives of consumptive and nonconsumptive interest groups.

RNR 2039 Introduction to Renewable Natural Resource Policy (3)

An honors course, RNR 2071, is also offered. Credit will not be given for this course and RNR 2071. Development and implementation of policies in renewable natural resources; current environmental issues.

RNR 2043 Wood Science and Forest Products (3)

2 hrs. lecture; 3 hrs. lab. Structural components of wood and identifying characteristics; basic physical properties; manufacture and uses of forest products.

RNR 2061 Problems in Natural Resource Management (1-4)

Prereq.: permission of instructor. May be taken for a max. of 4 sem. hrs. of credit. Topics covered vary with the needs of the student and availability of faculty.

RNR 2070 HONORS: Ecology of Renewable Natural Resources (4)

Same as RNR 2101, with special honors emphasis for qualified students. Prereq.: BIOL 1503 and RNR 1070. Credit will not be given for this course and RNR 2101. Ecological principles and population dynamics; emphasis on interactions between populations in communities, ecosystems and landscapes.

RNR 2071 HONORS: Introduction to Renewable Natural Resources Policy (4)

Same as RNR 2039, with special honors emphasis for qualified students. Prereq.: credit or enrollment in RNR 2070 or permission of instructor. Credit will not be given for this course and RNR 2039. Development and implementation of policies in renewable natural resources; current environmental issues.

RNR 2072 HONORS: Principles of Wildlife Management (4)

Same as RNR 2031, with special honors emphasis for qualified students. Prereq.: RNR 2071 or permission of instructor. Credit will not be given for this course and RNR 2031. Population management, habitat management and policy associated with wildlife management. Sustainability of hunting and of endangered wildlife species. Indirect effects of toxins, eutrophication, human infrastructure and climate change on wildlife habitat and wildlife populations.

RNR 2101 Ecology of Renewable Natural Resources (3)

An honors course, RNR 2070, is also available. Prereq.: BIOL 1202, BIOL 1209, RNR 1001 or RNR 1070, RNR 1002. Credit will not be given for this course and RNR 2070. General ecological principles tied to the conservation and management of plant and animal populations; emphasis on how populations interact in communities and ecosystems.

RNR 2102 Natural Resource Measurements and GIS (3)

Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 3 hrs. lab. Introduction to sampling techniques in measuring renewable natural resources, such as trees, wood products, forest stands, wildlife and fisheries populations and water quality. Introduction to use of global information systems (GIS) and global positioning systems (GPS) applications in natural resource management.

RNR 3002 Silviculture (2)

Prereq.: RNR 2101. Basic knowledge of personal computers and e-mail is assumed. A generalized approach to forest stand establishment and culture based on the ecological principles of regeneration and the identification of stand conditions that will satisfy specific goals and objectives for the forest.

RNR 3004 Photogrammetry, GPS and GIS (3)

Prereq.: permission of department. Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture, 3 hrs. lab. Principles, interpretation and use of aerial photos, Global Positioning Systems (GPS) and Geographic Information Systems (GIS) in stand measurements and forest management applications.

RNR 3005 Field Studies in Wildlife Habitat and Management (2)

Intersession only. *Prereq.: RNR 2001. Class meets 8 hrs. per day for 2 weeks at off-campus sites. Students are responsible for paying for travel expenses associated with this course. Identification of woody and herbaceous plants important to wildlife species and techniques used to manage and quantify wildlife habitat; emphasis on collecting field data and plant identification in field setting to assess habitat quality and management options for wildlife.*

RNR 3018 Ecology and Management of Southeastern Wildlife (4)

Prereq.: RNR 2031 or RNR 2072. Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 6 hrs. lab. Habitat selection, food habits and reproductive biology of selected species of amphibians, reptiles, birds, mammals and fishes; emphasis on the diversity of niche exploitation strategies among these groups.

RNR 3034 Field Studies in Dendrology (1)

Prereq.: RNR 2001. One week of field practice. Students are responsible for paying for travel expenses associated with this course. Review of species studied in RNR 2001; 60 to 70 more species of trees, shrubs and woody vines indigenous to the southeastern U.S. studied; herbarium collection required.

RNR 3036 Field Studies in Mensuration (2)

Prereq.: RNR 3103. Two weeks of field practice. Students are responsible for paying for travel expenses associated with this

course. Exercises in designing and conducting timber and multipurpose cruises; boundary location and other types of land surveying associated with forest resource management.

RNR 3037 Field Studies in Silviculture (1)

Prereq.: RNR 2001, RNR 3002 and RNR 3103. One week of field practice. Students are responsible for paying for travel expenses associated with this course. Field tours of a range of forestry practices and field experiences in various silviculture practices.

RNR 3038 Field Studies in Timber Harvesting (1)

Prereq.: RNR 3002 and RNR 3103. One week of field practice. Students are responsible for paying for travel expenses associated with this course. On-site studies of harvesting systems used in southern forestry; participation in timber harvesting; exercises in time and production.

RNR 3039 Field Studies in Wood Utilization (1)

Prereq.: RNR 2043, RNR 3002 and RNR 3103. One week of field practice. Students are responsible for paying for travel expenses associated with this course. On-site studies of wood manufacturing facilities; exercises in product/raw material relationships.

RNR 3040 Silvicultural Prescriptions (1)

Prereq.: RNR 3002 and RNR 3103. One week of field practice. Students are responsible for paying for travel expenses associated with this course. Practical development of silvicultural prescriptions incorporating elementary economic analysis and silvicultural principles.

RNR 3041 Forest Practicum (1-4)

May be taken for a max. of 4 sem. hrs. of credit. 1-4 weeks practicum. Students are responsible for paying for travel expenses associated with this course. Field exposure to various aspects of forestry practices; intended for off-campus field, lab, workshop or other intensive training in the field of forestry.

RNR 3044 Renewable Natural Resources Field Studies (1)

Prereq.: RNR 3002, RNR 3103. One-week field trip. Students are responsible for paying for travel expenses associated with this course. Insight into management objectives and issues in forested ecosystems not found in the West Gulf Coastal Plain; experience gained through on-site tours and discussions with various natural resource professionals.

RNR 3103 Forest Biometrics (2)

Prereq.: RNR 2102, EXST 2201 and MATH 1431. Principles in measuring trees, stands, wood products and other forest resources; sampling and inventory techniques; statistical inference.

RNR 3105 Forest Biology (2)

Prereq.: RNR 2101 or RNR 2070. This is an 8-week course. The general university drop/add dates do not apply. The instructor will provide students with the drop/add dates established by the Office of the University Registrar. Topics include: tree anatomy, tree growth, tree physiology, forest genetics and ecological principles specific to the understanding of forest ecosystems and sustainable management of forests.

RNR 3106 Timber Harvesting (2)

Students are responsible for paying for travel expenses associated with this course. This is an 8-week course, the general university drop/add dates do not apply. The instructor will provide students with the drop/add dates established by the Office of the University Registrar. 1 hr. lecture; 3 hrs. lab. Methods of harvesting timber crops; logging equipment, planning, road layout, legal and social issues, environmental concerns, financial analysis of logging operations and contracts; field trips and practical exercises included.

RNR 3107 Wood Procurement (2)

Students are responsible for paying for travel expenses associated with this course. This is an 8-week course. The general university drop/add dates do not apply. The instructor will provide students with the drop/add dates established by the Office of the University Registrar. 1 hr. lecture; 3 hrs. lab. Methods of purchasing and marketing timber crops; practicum of timber and pulpwood purchasing systems; value assessments, wood specifications, human relations, negotiations, ethics, competitive bidding; legal and social issues; contracts; records; wood storage; and global aspects; field trips and practical exercises included.

RNR 3108 Case Studies in Habitat Restoration (2)

Prereq.: RNR 2101 or RNR 2070; 2 weekend field trips. Students are responsible for paying for travel expenses associated with this course. The general university drop/add dates do not apply because this is an 8-week course. The instructor will provide students with the drop/add dates established by the University Registrar. 1 hr. lecture, 3 hrs. lab Principles related to the context,

planning, design and implementation of habitat restoration and mitigation; evaluation of habitat restoration efforts using the case study method.

RNR 4001 Silviculture Lab (1)

Prereq.: credit or registration in RNR 3002. Students are responsible for paying for travel expenses associated with this course. Working knowledge of a word processor, spreadsheet and email is assumed. 3 hrs. lab. Basic office and field techniques for assessing forest structure and controlling stand development.

RNR 4011 Wildlife Management Techniques (4)

Prereq.: RNR 2031 or RNR 2072 and EXST 2201. Weekend field trips. Students are responsible for paying for travel expenses associated with this course. 3 hrs. lecture; 3 hrs. lab. Wildlife science and the scientific method, generating and testing hypotheses and predictions, statistical analysis of class generated data and scientific writing. Population inventories and analysis; harvest management; methods to capture animals and determine age and sex. Immobilization methods, marking methods, radio telemetry and assessment of nutrition and condition. Use of GPS and GIS in wildlife ecology.

RNR 4013 Ecology and Management of Wetland Wildlife (4)

Students are responsible for paying for travel expenses associated with this course. 3 hrs. lecture; 3 hrs. lab. History and value of wetlands, waterfowl, fur animals, alligators, wetland habitat management.

RNR 4020 Taxonomy and Ecology of Wetland Plants (4)

See BIOL 4020.

RNR 4022 Principles of Aquaculture (4)

Prereq.: 8 sem. hrs. of introductory chemistry and 8 sem. hrs. of introductory zoology and/or biology; or equivalent. Students are responsible for paying for travel expenses associated with this course. 3 hrs. lecture; 3 hrs. lab with occasional extended field trips. Principles underlying aquaculture of fish, crustaceans and mollusks.

RNR 4023 Marine Fisheries Resources (3)

Survey of the biology, harvest and management of commercially important marine organisms throughout the world; emphasis on stock trends and the effects of biological and socio- economic factors on development of management programs.

RNR 4025 Limnology (3)

Prereq.: BIOL 1201, BIOL 1208 and CHEM 1201, CHEM 1202, CHEM 1212 or equivalent. Geomorphology, physiochemistry, biology and ecology of inland waters.

RNR 4032 Forest Fire Protection and Use (2)

Students are responsible for paying for travel expenses associated with this course. 8-week course. The general university drop/add dates do not apply. The instructor will provide students with drop/add dates established by the Office of the University Registrar. 1 hr. lecture; 3 hrs. lab. Forest fire control and use; emphasis on southern forests.

RNR 4033 Silviculture and Management of Hardwoods (4)

Prereq.: RNR 3002 or consent of instructor. Students are responsible for paying for travel expenses associated with this course. Extended field trips, one weekend field trip. 3 hrs. lecture; 3 hrs. lab. Ecology, silviculture and management of hardwood forest ecosystems; improvement, conservation, and use for forest products, wildlife habitats and other amenities.

RNR 4036 Forest Management (4)

Prereq.: ECON 2030 or AGECE 2003 or equivalent, RNR 3036, RNR 3037 and RNR 3040. 3 hrs. lecture; 3 hrs. lab. Compounding and discounting; management of a single stand, even-aged and uneven-aged management, decision criteria and decision variables, management of an existing stand; forest taxation and valuation; management of many stands; harvest scheduling.

RNR 4037 Biology of Fishes (3)

Prereq.: RNR 4145 or consent of instructor. Morphological, physiological and behavioral adaptations of fishes to their environments; relationships between fish biology and fisheries management.

RNR 4038 Forest Resource Economics (3)

Prereq.: ECON 2030 or AGECE 2003 or equivalent. Economic theory applied to forest resources and their utilization; structure of the forest products market, demand of forest products, timber supply and stumpage price; resource conservation and endangered species protection; taxation and government programs; international trade of forest products; demand for non-timber resources.

RNR 4040 Fisheries Management (3)

Characteristics of fisheries; dynamics of exploited stocks; socioeconomic aspects of fisheries; fisheries management and research techniques; managing wild fisheries stocks.

RNR 4061 Problems in Natural Resource Management (1-4)

May be taken for a max. of 6 sem. hrs. credit. Independent or directed study.

RNR 4101 Integrating Natural Resources Management, Policy and Human Dimensions (4)

Prereq.: RNR 2039 or RNR 2071, RNR 3004 and senior status in School of Renewable Natural Resources. Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 4 hrs. lab. Development of problem-solving skills for the management of renewable natural resources; application and integration of renewable natural resource management theory, policy, practices and human dimensions; analysis of management and policy decisions.

RNR 4103 Conservation Genetics (3)

Prereq.: BIOL 1201 and BIOL 1202. Application of genetic theory to the management of renewable natural resources; emphasis on fragmented populations, endangered species, maintenance of genetic variation.

RNR 4106 Techniques in Limnology and Fisheries (2)

Prereq.: junior, senior or graduate standing and permission of instructor. Students are responsible for paying for travel expenses associated with this course. 1 hr. lecture; 1 hr. lab. Quantitative techniques in habitat, water quality and fish population assessment in freshwater ecosystems.

RNR 4107 Human Dimensions in Natural Resources (3)

Prereq.: RNR 2039 or RNR 2072, 6 hrs. social science general education electives. Human behavior as related to management and use of natural resources.

RNR 4145 Ichthyology (4)

See BIOL 4145.

RNR 4150 Forest Hydrology and Soils (3)

Prereq.: AGRO 2051 or consent of instructor. 2 hrs. lecture; 3 hrs. lab. Principles of hydrology and soils with emphasis on forest environments. Forest soil development, role of forests in the hydrologic cycle, and the role of soil and water in natural resource management.

RNR 4600 Topics in Marine Zoology (2-6)

See BIOL 4600.

RNR 4900 Watershed Hydrology (3)

See ENVS 4900.

RNR 7001 Research Methodology (3)

Planning, conducting and reporting of research in the renewable natural resources.

RNR 7006 Behavioral Ecology (3)

Behavioral ecology of plants and animals; evolution of behavior; behavioral strategies for survival and reproduction; importance of behavior to management and conservation strategies.

RNR 7007 Policy Considerations for the Management of Natural Resources (3)

Review of the history of U.S. natural resource policy to include the policy process and policy conflicts. Development of skills needed to evaluate natural resources policy. Focus on agricultural policy and public policy concerning land, endangered species, environmental regulations and incentive programs.

RNR 7008 Green Energy in Renewable Natural Resources (3)

Energy derived from green sources, including wood and agronomic biomass, wind, solar, conversion technologies, gasification, ethanol, biodiesel, synthetic gas, landfill gas, manures, economic considerations, and carbon credits.

RNR 7011 Mammalian Ecology and Management (3)

Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 3 hrs. lab. Management, ecology and conservation of selected mammals of North America.

RNR 7012 Ecology and Management of Waterfowl (3)

Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture; 3 hrs. lab. Behavioral and physiological adaptations of waterfowl throughout the annual cycle; population dynamics and habitat management; political and economic aspects of harvest management in North America.

RNR 7013 Wildlife Population Dynamics (3)

Prereq.: EXST 7005 or equivalent. 2 hrs. lecture; 2 hrs. lab. Theories of population growth and regulation, population interaction, life tables, mortality rate calculation; band data analysis; population modeling.

RNR 7016 Current Topics and Techniques in Conservation Science (3)

2 hrs. lecture; 3 hrs. lab. Scientific basis for the preservation of biodiversity; conservation strategies of government and non-government organizations; current status of biodiversity around the world; new techniques applicable to conservation biology; quantitative exercise with predictive demography (PVA), biodiversity at the population and community levels, fragmentation and other landscape effects and genetics of small populations.

RNR 7017 Restoration and Management of Wetland Functions (4)

Two weekend field trips; one five-day field trip. Students are responsible for paying for travel expenses associated with this course. 2 hrs. lecture, 6 hrs. lab. Wetland Ecology with a focus on functions valued by society; natural history of commonly managed wetland types; fundamentals of restoration ecology; wetland restoration programs in theory and in practice.

RNR 7020 Ecology of Fishes (3)

Prereq.: BIOL 4253 or equivalent. Ecology of fish populations; interactions of fishes and their environment; behavioral adaptations of fishes.

RNR 7027 Genetics and Culture of Finfish (4)

Prereq.: RNR 4022 and BIOL 2153 or equivalent. 3 hrs. lecture; 3 hrs. lab. Practical culture techniques and methods of breeding for genetic improvement of commercially important finfish.

RNR 7029 Advanced Topics in Renewable Natural Resources (1-4)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

RNR 7030 Aquatic Entomology (4)

See ENTM 7030.

RNR 7036 Advanced Topics in Natural Resources Biometrics and Management (3)

Prereq.: EXST 7014 or equivalent. Theory and practice of modeling in natural resources applications, including populations, communities, habitats and related biological, physical and chemical processes.

RNR 7041 Advanced Wood Science (4)

Prereq.: RNR 2043. 3 hrs. lecture; 3 hrs. lab. Topics in wood science, including review of selected literature; anatomical, physical and chemical properties of wood, with emphasis on wood products.

RNR 7061 Water Quality Management and Policy (3)

See ENVS 7061.

RNR 7070 Graduate Seminar in Fisheries (1)

May be taken for a max. of 4 sem. hrs. of credit when topics vary.

RNR 7071 Graduate Seminar in Forestry (1)

Pass-fail grading. May be taken for a max. of 3 hrs. of credit.

RNR 7072 Graduate Seminar in Wildlife (1)

May be taken for a max. of 4 sem. hrs. credit when topics vary. Topics of current interest in wildlife science and management.

RNR 7073 Graduate Seminar in Watershed and Water Resources (1)

May be taken for a max. of 4 sem. hrs. credit when topics vary; consent of instructor. Critical reading and discussion of current literature and major topics in watershed and water resources relating to natural resources.

RNR 7151 Watershed Hydrology and Floodplain Analysis (3)

Also offered as ENVS 7151. Prereq.: AGRO 2051 or consent of instructor. 2 hrs. lecture; 3 hrs. lab. Hydrologic processes and principles on watersheds and floodplains; interactions among water resources, water quality, land use and management practices; hydrologic modeling of natural landscapes.

RNR 7424 Diseases of Aquatic Animals (3)

Same as PBS 7424. Prereq.: consent of instructor. Basic microbiology and/or parasitology strongly recommended. 2 hrs. lecture; 2 hrs. lab. Identification, pathogenesis and control of viral, bacterial and parasitic agents causing diseases in aquatic animals.

RNR 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

RNR 8900 Research Problems in Natural Resources (1-3)

Pass-fail grading. May be taken for a max. of 6 sem. hrs. of credit.

RNR 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

Sociology

SOCL 2001 Introductory Sociology (3)

[LCCN: CSOC 2013, Introduction to Sociology] This is a General Education course. *Credit will not be given for this course and SOCL 2002. Major subject areas and principles of sociology.*

SOCL 2002 HONORS: Introductory Sociology (3)

This is a General Education course. *Same as SOCL 2001 with a special honors emphasis for qualified students. Credit will not be given for this course and SOCL 2001.*

SOCL 2201 Introduction to Statistical Analysis (4)

Prereq.: MATH 1021 or equivalent. Open to sociology majors; open to others with permission of instructor. 3 hrs. lecture; 2 hrs. lab Descriptive statistics; inferential statistical methods including confidence interval estimation and hypothesis testing for one and two population means and proportions; one-way analysis of variance; simple linear regression and correlation; analysis of categorical data.

SOCL 2211 Methods of Sociological Research (3)

Prereq.: SOCL 2001 and SOCL 2201 or equivalent. Open to sociology majors; open to others with permission of instructor.
Scientific methods and their application in sociological research, including problem selection, research design, measurement, data sources and evaluation of data.

SOCL 2411 Industrial Sociology (3)

Social organization in industry; relation of industry to community and society.

SOCL 2501 Current Social Problems (3)

[LCCN: CSOC 2113, Social Problems] Sociological analysis of major social problems in contemporary society; focus on both the institutional and personal causes and consequences.

SOCL 2505 Marriage and Family (3)

[LCCN: CSOC 2213, Marriage and Family] Current issues and trends regarding marriage and family.

SOCL 2511 Race Relations (3)

Also offered as AAAS 2511. Examines relations among persons of different racial groups in an interdisciplinary setting that includes sociological, psychological, political, anthropological and historical viewpoints.

SOCL 3101 Sociological Theory (3)

Prereq.: SOCL 2001 or equivalent. Open to sociology majors; open to others with permission of instructor. Dominant theorists and schools of thought in sociology.

SOCL 3371 Sociology of the Criminal Justice System (3)

Prereq.: SOCL 2001 or equivalent. The criminal justice system and its organizational components.

SOCL 3401 Sociology of Culture (3)

Prereq.: SOCL 2001 or equivalent. Current theoretical perspectives, methodological issues and empirical work in the sociological study of culture.

SOCL 3501 Sociology of Deviance (3)

Prereq.: SOCL 2001 or equivalent. Sociological theories of deviant behavior; supporting research on mental illness, crime, sexual deviance, drug abuse and suicide.

SOCL 3505 Poverty in the United States (3)

Prereq.: SOCL 2001 or SOCL 2501 or equivalent. Definition of poverty, its meaning, measurement, causes, correlates and consequences; strategies for its amelioration and elimination.

SOCL 3510 Criminal Violence (3)

Prereq.: SOCL 2001 or equivalent. An in-depth study of criminal violence, including its forms, myths and facts regarding victims and offenders, and the causes, consequences and control of violence.

SOCL 3601 Social Interaction (3)

Prereq.: SOCL 2001 or PSYC 2000 or equivalent. Human behavior as social interaction.

SOCL 3900 Sociology Internship (1-3)

Prereq.: 75 hours of course work completed, 2.50 overall GPA, written consent of department head and supervising faculty member. May be taken for a max. of 3 hrs. of credit. Faculty supervised field study/research with an agency or organization whose mission is considered relevant to the student's curriculum.

SOCL 3901 Directed Reading and Research in Sociology (1-3)

Prereq.: SOCL 2001 or equivalent. May be taken for a max. of 3 sem. hrs. credit. Student registers with a faculty member before registration to select the area of reading or research. Topic must not substitute for regularly offered courses unless reading goes beyond a standard course's offerings.

SOCL 3905 HONORS: Senior Thesis Research (3)

Prereq.: SOCL 3901; Open to seniors who are candidates for a bachelor's degree with honors in sociology. Supervised research and preparation of a senior thesis.

SOCL 3911 Research Practicum in Rural Sociology (1-3)

Prereq.: SOCL 2211 and SOCL 3101. May be taken for a max. of 3 sem. hrs. credit. Student registers with a faculty member and, in consultation, selects a research problem. Supervised research experience in rural sociology, including design, execution and reporting.

SOCL 4091 Topics in Sociology (3)

Prereq.: SOCL 2001 or equivalent. May be taken for a max. of 9 sem. hrs. of credit when topics vary.

SOCL 4321 The Community (3)

Prereq.: SOCL 2001 or equivalent. Classical and contemporary perspectives on the community; theoretical and methodological issues associated with community studies.

SOCL 4331 Social Stratification (3)

Prereq.: SOCL 2001 or equivalent. Class and rank structure in society; determinants of social class, mobility, and changes in class position of both individuals and groups; attitudinal and behavioral consequences of class position.

SOCL 4401 The Family (3)

Prereq.: SOCL 2001 or equivalent. The family as a social institution.

SOCL 4402 Modeling Communication Within Marital and Family Relationships (3)

See CMST 4118.

SOCL 4421 Political Sociology (3)

Prereq.: SOCL 2001 or equivalent. Social structure and politics.

SOCL 4431 Sociology of Education (3)

Prereq.: SOCL 2001 or equivalent. Theoretical approaches to understanding the roles of the institution of education, socialization processes, the linkages between education and stratification and educational change.

SOCL 4441 Sociology of Religion (3)

Prereq.: SOCL 2001 or equivalent. Nature of religion; societal and cultural factors in religion; role of religion in social change and in contemporary society.

SOCL 4451 Sociology of Medicine (3)

Prereq.: SOCL 2001 or equivalent. Sociological analysis of the structure and function of health agencies and occupations; social and cultural factors in the cause and treatment of illness.

SOCL 4461 Criminology (3)

Prereq.: SOCL 2001 or equivalent. Crime, the criminal justice system and penology.

SOCL 4462 Sociology of Youth & Crime (3)

Prereq.: SOCL 2001 or equivalent. The sociological study of adolescent deviance and crime; the socio-demographic correlates and social psychological causes of youthful offending and the juvenile justice system.

SOCL 4463 Gender and Crime (3)

Prereq.: SOCL 2001 or equivalent. Examination of gender as a socially, culturally and historically situated accomplishment and its relationship to criminal offending and victimization.

SOCL 4464 Rural Crime (3)

Prereq.: SOCL 2001 or equivalent. Focuses on the nature, extent, causes, consequences and control of crime in rural America; topics include violence, property crime, fear of crime and agricultural and wildlife crime.

SOCL 4465 Drugs and Society (3)

Prereq.: SOCL 2001 or equivalent. An exploration of the net of social relations in which drugs, drug users, drug dealers and drug laws are embedded; involves critical analysis of popular claims about drugs and the development of a sociological understanding of substance use and abuse in the modern U.S.

SOCL 4471 Sociology of Law (3)

Prereq.: SOCL 2001 or equivalent. Law and social change; evolution of legal institutions; group conflict and law; influence of legal controls and sanctions on human behavior.

SOCL 4521 Sociology of Gender (3)

Prereq.: SOCL 2001 or equivalent. Gender differences in families, education, the workplace and the state; understanding the social, economic and cultural factors that shape the lives of men and women; theoretical analysis of how different women and men experience the social world.

SOCL 4531 The Aged in Contemporary Society (3)

Prereq.: SOCL 2001 or equivalent. Social, demographic, psychological, cultural and health factors related to the aging process in contemporary society.

SOCL 4551 Global Society (3)

Prereq.: SOCL 2001 or equivalent. Presents central concepts and major perspectives on international development, globalization and world poverty and income inequality.

SOCL 4601 Personality and Social Structure (3)

Prereq.: SOCL 3601 or PSYC 3140 or equivalent. Interaction of social structures, such as the family, peer group and school, with the personalities of individuals; processes by which each affects the other.

SOCL 4621 Small Groups (3)

Prereq.: SOCL 2001 or equivalent. Analysis of groups, their structure and functions.

SOCL 4701 Population (3)

Prereq.: SOCL 2001 or equivalent. Processes that influence size and composition of human populations; determinants and consequences of demographic trends.

SOCL 7121 Seminar: Classical Sociological Theory (3)

Prereq.: consent of instructor. Historical survey of sociology with primary emphasis on European (Marx, Weber and Durkheim) and early American (Mead and Park) sociologists.

SOCL 7131 Seminar: Contemporary Sociological Theory (3)

Prereq.: SOCL 7121 or equivalent. Current theoretical arguments in sociology.

SOCL 7201 Fundamental Statistics in Sociology (3)

Prereq.: SOCL 2201 or equivalent. Introduction to inferential methods in sociological research; emphasis on interpretation and current research.

SOCL 7203 Advanced Research Methods in Social Science (3)

Also offered as POLI 7963. Prereq.: SOCL 7201 or equivalent. Survey of advanced methodology in the social sciences; emphasis on general linear model and causal models.

SOCL 7211 Seminar: Methods of Social Investigation (3)

Prereq.: EXST 7003 or equivalent. Research methods in the social sciences; interplay of theory and methods of research; formulation of research problems and design; measurement and scaling; sampling; ethics in research; and critiques of social science research.

SOCL 7213 Specialized Topics in Social Science Methods (2-3)

Also offered as POLI 7964. Prereq.: SOCL 7203 or POLI 7963 or equivalent. May be taken for a max. of 12 sem. hrs. of credit when topics vary.

SOCL 7351 Seminar: Topics in Rural Sociology (3)

Prereq.: consent of instructor May be taken for a max. of 9 sem. hrs. credit if topics vary. Specialized areas in rural sociology.

SOCL 7391 Seminar: Topics in Social Organization (3)

Prereq.: consent of instructor. May be taken for a max. of 12 sem. hrs. credit if topics vary. Specialized areas in social organization.

SOCL 7491 Seminar: Topics in Social Institutions (3)

Prereq.: consent of instructor May be taken for a max. of 12 sem. hrs. credit if topics vary. Specialized areas in social institutions.

SOCL 7591 Seminar: Topics in Social Issues (3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. credit if topics vary. Specialized areas in social issues.

SOCL 7691 Seminar: Topics in Social Interaction (3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. credit if topics vary. Specialized areas in social interaction.

SOCL 7901 Independent Reading and Research (3)

Prereq.: successful completion of at least one year of graduate work.

SOCL 7902 Independent Reading and Research (3)

Prereq.: successful completion of at least one year of graduate work.

SOCL 7903 Proseminar in Sociology (1)

Pass-fail grading Required twice of both master's and PhD candidates. Contemporary research and critical issues in sociology.

SOCL 8000 Thesis Research (1-12 per sem.)

"S"/"U"grading.

SOCL 8900 Research in Sociology (1-6)

Open only to students engaged in a specific, organized research project under faculty supervision. Student must be engaged in design and implementation of research and analysis and interpretation of data.

SOCL 9000 Dissertation Research (1-12 per sem.)

"S"/"U"grading.

Spanish

SPAN 1050 Elementary Spanish (4)

For students with previous study of Spanish who did not place into SPAN 1102 through the Spanish Placement Examination. Credit will not be given for this course and SPAN 1101. Material covered in SPAN 1101 is covered in 1050. Supplementary work in language laboratory. Native speakers of Spanish will not receive credit for this course. Basic lexicon and structure of Spanish; emphasis on communicative language use.

SPAN 1101 Elementary Spanish (4)

[LCCN: CSPN 1014, 1026, Elementary Spanish I] This is a General Education course. *For students with no previous study of Spanish. Students with previous study of Spanish should enroll in SPAN 1050. Credit will not be given for this course and SPAN 1050. Supplementary work in language laboratory.*

Native speakers of Spanish will not receive credit for this course. Basic lexicon and structure of Spanish; emphasis on communicative language use.

SPAN 1102 Elementary Spanish (4)

[LCCN: CSPN 1024, 1026, Elementary Spanish II] This is a General Education course. *Prereq.: SPAN 1050 or SPAN 1101 or equivalent. Credit will not be given for this course and SPAN 1152. Supplementary work in the language laboratory. Native speakers of Spanish will not receive credit for this course.* Basic lexicon and structure of Spanish; emphasis on communicative language use.

SPAN 1152 Intensive Beginning Spanish (4)

This is a General Education course. *Prereq.: two years of high school Spanish. Credit will not be given for this course and SPAN 1102. Credit will be awarded for SPAN 1101 upon successful completion of this course with a "C" or better. Native speakers of Spanish will not receive credit for this course.* Review of basic Spanish vocabulary and grammar with emphasis on communicative language use.

SPAN 2101 Intermediate Spanish (3)

[LCCN: CSPN 2013, 2026, Intermediate Spanish I] This is a General Education course. *Prereq.: SPAN 1102 or equivalent. Continuation of elementary Spanish. Native speakers of Spanish will not receive credit for this course.* Additional emphasis on reading and writing.

SPAN 2102 Intermediate Spanish (3)

[LCCN: CSPN 2023, 2026, Intermediate Spanish II] This is a General Education course. *An honors course, SPAN 2104, is also available. Prereq.: SPAN 2101 or equivalent. Continuation of SPAN 2101. Credit will not be given for this course and SPAN 2104. Native speakers of Spanish will not receive credit for this course.*

SPAN 2104 HONORS: Intermediate Spanish (3)

Same as SPAN 2102, with special honors emphasis for qualified students. Credit will not be given for this course and SPAN 2102. Native speakers of Spanish will not receive credit for this course.

SPAN 2155 Spanish Textual Commentary (3)

This is a General Education course. *Prereq.: SPAN 2102 or equivalent. Native speakers of Spanish will not receive credit for this course. Oral and written commentary on a variety of genres and nonprint media in Spanish.*

SPAN 2156 Advanced Oral Communication (3)

Prereq.: Permission of department and credit or registration in SPAN 2155. Native speakers of Spanish will not receive credit for this course.

SPAN 3001 Tutoring Learners of Spanish as a Second Language (1)

Prereq.: SPAN 2155 or equivalent, EDCI 2001 and concurrent enrollment in EDCI 3001. A carefully monitored and evaluated Spanish tutoring experience in a local middle or high school under the guidance of the course instructor and a mentoring teacher.

SPAN 3002 Developing Language Lessons for Spanish as a Second Language (1)

Prereq.: EDCI 3001, SPAN 3001 and concurrent enrollment in EDCI 3136. 3 hrs. lab/field experiences in multicultural settings. Under the supervision of a Spanish faculty member and a teacher mentor, teacher candidates in this course will prepare and deliver second language Spanish language lessons that incorporate audio-visual materials and technology-enhanced language learning activities.

SPAN 3010 Advanced Spanish Grammar and Composition (3)

Prereq.: permission of department and credit or registration in SPAN 2155.

SPAN 3015 Advanced Oral Communication II (3)

Prereq.: SPAN 2155 and SPAN 2156 or permission of the department. Development of listening and speaking competency at the advanced level.

SPAN 3020 Literary Analysis (3)

Prereq.: SPAN 2155, SPAN 2156 and SPAN 3010. Literary genres and their characteristics; critical reading and commentary of Spanish texts.

SPAN 3043 Introduction to Latin American Literature I (3)

Prereq.: SPAN 3020. Reading and analysis of representative selections from pre-Columbian period through independence.

SPAN 3044 Introduction to Latin American Literature II (3)

Prereq.: SPAN 3020. Reading and analysis of representative literature from independence to the present.

SPAN 3070 Spanish for Professionals (3)

Prereq.: SPAN 2155 or equivalent and consent of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. Development of language skills for functioning in various professional contexts such as business, medicine or law.

SPAN 3071 Survey of Spanish Literature (3)

Prereq.: SPAN 3020. Spanish literature from its beginning to the 18th century.

SPAN 3072 Survey of Spanish Literature (3)

Prereq.: SPAN 3020. Main authors and literary movements from the 18th century to the present.

SPAN 3073 Advanced Readings on Spanish Civilization (3)

Prereq.: SPAN 3010. Ethnological, geographical, historical, political, economic and sociological factors necessary for understanding Spanish culture.

SPAN 3074 Advanced Readings on Hispanic-American Civilization (3)

Prereq.: SPAN 3010. Parallels SPAN 3073 but focuses on the Hispanic-American countries.

SPAN 3980 Special Topics in Spanish (3)

Prereq.: either SPAN 3043 or SPAN 3044 or SPAN 3071 or SPAN 3072. May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 4003 Instructional Strategies for the Second Language Spanish Classroom (1)

Prereq.: EDCI 3136, SPAN 3002 and concurrent enrollment in EDCI 4003. Teacher candidates will study and participate in activities that incorporate different classroom interactional structures, including teacher-to-whole class, task-based group activities and student-to-student (pair work); candidates will design and conduct Spanish language lessons using learner-centered activities.

SPAN 4004 Critical Issues in Teaching Spanish as a Second Language: Capstone Course (3)

Prereq.: EDCI 4003, SPAN 4003 and concurrent enrollment in EDCI 4004 and EDCI 4005.

Teacher candidates should be in the last two semesters in completion of the requirement for a major in Spanish. Taught in Spanish. Focus on the consolidation of knowledge about the Spanish language, literature and culture with respect to the teaching of subject content to middle or high school learners.

SPAN 4005 Structure of the Spanish Language (3)

Also offered as LING 4005. Prereq.: SPAN 3010 or equivalent. Spanish morphology and syntax; structuralist, sociolinguistic and generative-transformational analyses and applications.

SPAN 4034 Special Topics in 18th and 19th Century Literature (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary.

SPAN 4053 Special Topics in Golden Age Prose (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Spanish Renaissance and Baroque prose.

SPAN 4063 Spanish Literature from 1898 to 1936 (3)

Prereq.: SPAN 3071 or SPAN 3072. May be taken for a max. of 6 hrs. of credit when topics vary. Literature in all genres from the early Modernists to the Avant Garde.

SPAN 4064 Spanish Literature Since 1936 (3)

Prereq.: SPAN 3071 or SPAN 3072. May be taken for a max. of 6 hrs. of credit when topics vary. Literature in all genres since the Spanish Civil War.

SPAN 4100 Women Writers in the Hispanic World (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Examination of selected periods, themes and genres.

SPAN 4144 Latin American Literature: 1492-1810 (3)

Prereq.: one literature course in Spanish at the 3000-level or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Topics in colonial Latin American literature from 1492-1810.

SPAN 4145 Latin American Literature: 1810-1915 (3)

Prereq.: one literature course in Spanish at the 3000 level or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Topics in Latin American literature from independence through modernismo (1810-1915).

SPAN 4146 Latin American Literature: 1915-1960 (3)

Prereq.: one literature course in Spanish at the 3000 level or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Topics in Latin American literature from the historical avante garde to 1960.

SPAN 4147 Latin American Literature: 1960-Present (3)

Prereq.: one literature course in Spanish at the 3000 level and permission of department. May be taken for a max. of 6 hrs. of credit when topics vary. Topics in Latin American literature from 1960 to the present.

SPAN 4200 Literature and Culture of Hispanics in the United States (3)

Texts may be in English or Spanish. Selected periods, themes and genres; related cultural topics.

SPAN 4201 Cinema in Spanish (3)

Prereq.: consent of instructor. Screening and analysis of representative films from Spain and Latin America and their interrelations with literature.

SPAN 4400 Introduction to Hispanic Cultural Studies (3)

Prereq.: Graduate level standing or permission of instructor. Overview of cultural studies theory on topics such as race, gender, nation, sexuality and mass media as applied to Hispanic cultural texts, including literature, music, art, television and cinema.

SPAN 4500 Special Topics in Transatlantic Studies (3)

Prereq.: one literature course at the 3000 level or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 4602 Spanish Phonetics (3)

Also offered as LING 4602. Spanish phonetic systems; corrective and fluency drills in the language laboratory; problems of teaching Spanish pronunciation to English-speaking students.

SPAN 4603 Applied Spanish Linguistics (3)

Also offered as LING 4603. Prereq.: SPAN 3010. Structures and communicative functions of Spanish; classroom applications.

SPAN 4915 Independent Research in Spanish or Spanish-American Literature (1-3)

May be taken for a max. of 3 sem. hrs. credit. Permission of department required. Readings in Spanish or Spanish-American literature directed by a senior faculty member.

SPAN 4917 Independent Research in Spanish or Spanish-American Linguistics (1-3)

May be taken for a max. of 3 sem. hrs. credit. Permission of department required. Readings in Spanish or Spanish-American linguistics.

SPAN 7940 Topics in Spanish American Literature: Beginnings to 19th Century (3)

With consent of department, May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 7946 Topics in Spanish American Literature: 19th Century to the Present (3)

With consent of department, May be taken for a max. of 12 hrs. of credit when topics vary.

SPAN 7950 Special Topics in Golden Age Spanish Literature (3)

With consent of department, May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 7961 Special Topics in Modern Spanish Literature (3)

With consent of department, May be taken for a max. of 12 hrs. of credit when topics vary.

SPAN 7970 Comparative Studies in Hispanic Literature (3)

With consent of department, May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 7980 Special Topics in Hispanic Linguistics (3)

When topics vary, May be taken for a max. of 6 hrs. of credit for the master's degree and 9 hrs. of credit for the doctorate. Topics to be announced.

SPAN 7982 Spanish Language Variation (3)

May be taken for a max. of six sem. hrs. with consent of department. Socio-linguistic perspectives and methodology in the analysis of Spanish language variation.

SPAN 7983 Spanish Language Acquisition (3)

Theories and discourse perspectives in second language acquisition.

SPAN 7984 Spanish in the United States (3)

Spanish in contact with English language use, variation and change; social and individual bilingualism.

SPAN 7985 Research in Hispanic Linguistics (3)

May be taken for a max. of 6 sem. hrs. of credit with consent of department. Scholarly investigation guided by departmental graduate faculty.

SPAN 7990 Special Topics in Hispanic Criticism (3)

With consent of department, May be taken for a max. of 6 hrs. of credit when topics vary.

SPAN 7991 Literature and Politics in the Modern Hispanic World (3)

Study of Spanish and Spanish-American cultural politics through its literary manifestations.

SPAN 7994 Seminar in Hispanic Cultural Studies (3)

With consent of department, May be taken for a maximum of 6 hrs. of credit when topics vary.

SPAN 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

Social Work

SW 2000 Introduction to Social Work (3)

The profession of social work; history, description of programs in contemporary American society; role of the social worker in meeting social needs.

SW 2500 Introduction to LGBTQ Studies (3)

Surveys the lesbian, gay, bisexual, transgender, and queer (LGBTQ) experience, existence and influence, in areas of culture, theory, and research.

SW 3002 The Child and the Community (3)

Common and particular needs of children in the community; social welfare services developed by communities for care and training of children.

SW 3003 Skills in Working with People (3)

Basic skills in working with people; understanding attitudes; use of community resources.

SW 3007 Juvenile Delinquency (3)

Nature and extent; socio-logical and psychological factors in causation and treatment of delinquent children; how communities are organized to help troubled youth and to prevent inception and spread of juvenile problems.

SW 3011 Community Services and the Aged (3)

The aged population and their needs; available resources and services in the community; assisting the aged in obtaining services; implications for the future.

SW 4070 Special Topics in Social Work (3)

May be taken for a max. of 9 sem. hrs. of credit when topics vary. Selected topics on social work practice and social welfare services.

SW 4099 Individual Readings in Corrections (3)

Prereq.: 2.50 GPA, 60 hrs. of course work, consent of instructor. May be taken for a max. of 6 hrs. of credit.

SW 4500 Crisis Intervention (3)

Introduction to major theories and research that describes and explains the range and complexity of problems that may emerge from natural or other disaster scenarios.

SW 7001 Human Behavior and the Social Environment I (3)

Prereq.: majors only. Socio-behavioral science base of social work practice; interrelationship of biological, psychological, social and cultural determinants of human behavior; major biopsychosocial developmental achievements and adaptations of human beings from conception through death.

SW 7002 Human Behavior and the Social Environment II (3)

Prereq.: SW 7001; majors only. Social science base of social work practice; social systems in which human beings develop and live; focus on research related to social interaction.

SW 7003 Social Welfare History and Policy (3)

Prereq.: majors only. Development of social work as a profession; evolution of social welfare policies and programs; nature of social policy and policy formulation.

SW 7004 Human Diversity and Oppression (3)

Prereq.: majors only. Social dynamics of human oppression; effects of institutional discrimination, inequality, stigma and prejudice stemming from racism, sexism, ageism and classism; implications of human oppression and multiculturalism for human behavior, social work practice and social policy.

SW 7005 Social Work Practice I (3)

Prereq.: majors only. Introduction to social work theory, principles and intervention skills common to social work practice with individuals and families; psychosocial perspectives in intervention.

SW 7006 Social Work Practice II (3)

Prereq.: SW 7005. Majors only. Techniques of working with various types of groups including treatment groups and planning action groups; community organization techniques.

SW 7007 Foundation Field Internship I (3)

Prereq.: majors only and credit for or concurrent registration in SW 7005. Pass-fail grading. \$100 internship fee. Application of foundation knowledge, skills, values and ethics to practice in an approved internship agency. 240 clock hours.

SW 7008 Foundation Field Internship II (3)

Prereq.: majors only and credit for or concurrent registration in SW 7006 & SW 7007. Pass-fail grading. \$100 internship fee. Continuation of SW 7007. Application of knowledge, skills, values, and ethics to practice in an approved internship agency. 240 clock hours.

SW 7009 Social Work Research I (3)

Prereq.: majors only. Standards and methods of scientific inquiry applied in social work research; concept formulation; research design; sources, collection and presentation of data.

SW 7010 Differential Diagnosis (3)

Prereq.: majors only. Diagnostic and treatment tools for examining the functionality of human behavior in the context of diverse social systems.

SW 7200 Integrative Colloquium in Social Work I (3)

Prereq.: admission to the PhD program in social work or consent of instructor. Broad-ranging analysis and discussion of problems and issues in the social work profession.

SW 7201 Integrative Colloquium in Social Work II (3)

Prereq.: admission to the PhD program in social work or consent of instructor. Broad-ranging analysis and discussion of problems and issues in the social work profession.

SW 7202 Issues and Research Problems in Social Policy (3)

Prereq.: admission to the PhD program in social work or consent of instructor. Issues and problems in social welfare policy; research focus on policy formulation.

SW 7204 Issues and Research Problems in Social Work Intervention (3)

Prereq.: admission to the PhD program in social work or consent of instructor. Social work intervention with individuals, families, groups and communities; formulation and development of problem-solving research agendas.

SW 7205 Pedagogical Issues in Social Work Education (3)

Prereq.: admission to the PhD program in social work or consent of instructor. Enhancement of pedagogical knowledge, skills and values; emphasis on teaching for the social work profession.

SW 7206 Research Practicum (3-9)

Prereq.: admission to the PhD program in social work or consent of instructor; and at least one of EXST 7003, EXST 7013 or SW 7435. No more than 6 hrs. May be taken in one semester. Hands-on supervised research experience; demonstration of collaborative and/or independent research.

SW 7207 Integrative Seminar (3)

Prereq.: foundation courses in PhD program and at least one research methods course, plus consent of instructor. Development of research questions and hypotheses, and initial drafts of the dissertation proposal, including introduction, literature review and methodology sections.

SW 7305 Grief & Bereavement (3)

Contemporary theories of grief and loss; cultural, ethnic, and religious differences in beliefs and practices surrounding grief and dying; ethical issues related to social work practice with end-of life issues.

SW 7306 Advanced Social Work Treatment of Individuals (3)

Prereq.: SW 7006. Differential diagnostic assessment and treatment of individuals with complex intrapersonal problems.

SW 7307 Direct Practice with Children and Adolescents (3)

Prereq.: completion of all foundation courses. Maladaptive patterns of behavior in children and adolescents; intervention strategies with children, parents, families and groups.

SW 7309 Advanced Methods of Group Treatment (3)

Prereq.: consent of instructor. Diagnostic and treatment procedures used in intensive group therapy.

SW 7402 Social Work in Corrections (3)

Social work processes in corrections; population served; existing and needed delivery systems for rehabilitative services; influence of the host setting.

SW 7403 Social Work and Aging (3)

Demographic characteristics of the aging population; aging as a developmental process with economic, biological, psychological and socialization aspects; impact of legislative and social service systems.

SW 7404 Social Work Practice in Schools (3)

Implementation of social work values, purposes and methods in a school setting.

SW 7405 Marital and Family Treatment in Social Work (3)

Prereq.: completion of all foundation courses. Identification and modification of dysfunctional transactional patterns; facilitating communication; improving the quality of marriage and family relations.

SW 7406 Social Work with Lesbian, Gay, Bisexual and Transgender People (3)

Prereq.: SW 7004 and SW 7005. Development of students' professional competence with lesbian, gay, bisexual, and transgender (LGBT) people. Exploration of social work practices at the micro, mezzo and macro levels and across social, political and economic realms.

SW 7412 Social Work in Medical Care (3)

Nature of social work practice in the field of medical care; medical care system and consumer problems; role of medical social workers.

SW 7415 Child/Family I (3)

Theories and skills of assessment and communication with children and families.

SW 7416 Child/Family II (3)

Prereq.: completion of all foundation courses. Legal and administrative functions in working with children and families.

SW 7435 Data Analysis for Social Work Research II (3)

Prereq.: consent of instructor. Advanced data analysis for social work doctoral students with emphasis on multivariate techniques.

SW 7455 Management in Human Services (3)

Prereq.: completion of all foundation courses. Management used in the effective provision of social services; techniques of modern management; interdisciplinary and practical approaches; unique aspects of human service management; development of critical attitudes and management skills.

SW 7501 Social Work Research II (3)

Prereq.: completion of all foundation courses; majors only. Types of research, designs and instruments used in social work; research processes from specification to hypotheses and collection of data.

SW 7502 Advanced Field Internship I (3)

Prereq.: completion of all foundation courses; majors only and credit for or concurrent registration in SW 7505. Pass-fail grading. \$100 internship fee. Supervised internship in an approved agency setting where advanced knowledge, skills, values and ethics are applied in the practice setting. 240 clock hours.

SW 7503 Advanced Field Internship II (3)

Prereq.: completion of all foundation courses; majors only and credit for or concurrent registration in SW 7502 & SW 7505. Pass-fail grading. \$100 internship fee. Continuation of SW 7502. Supervised internship in an approved agency setting where advanced knowledge, skills, values and ethics are applied in the practice setting. 240 clock hours.

SW 7504 Advanced Social Policy (3)

Prereq.: completion of all foundation courses; majors only. Dimensions and patterns of social policy; evolution and design of provisions and services; current issues, problems and trends.

SW 7505 Advanced Direct Practice (3)

Prereq.: completion of all foundation courses. Majors only. Advanced methods of effective individual, family and group treatment of systemic issues in a holistic perspective.

SW 7506 Community and Agency Contexts for Direct Practice (3)

Prereq.: completion of all foundation courses. Majors only. Community, organizational and social aspects of social work practice; indirect practice skills associated with effective social work practice in multiple service environments.

SW 7801 Family Violence (3)

Topics in family violence; their relevance to social work practice; program development and interventive approaches and issues.

SW 7803 Grant and Proposal Writing for Human Service Organizations (3)

Prereq.: completion of all foundation courses. Methods of accessing federal, state and private funds; developing grant and contract proposals.

SW 7804 Addictive Disorders in Contemporary Society (3)

Topics related to addictive disorders in contemporary society; their relevance to social work practice.

SW 7805 Co-occurring Substance Use and Mental Disorders: Assessment and Intervention (3)

Co-occurring substance use and mental disorders and their prevalence and relevance to social work practice, policy and program development and research.

SW 7807 Special Topics in Social Work (3)

Prereq.: consent of instructor. May be taken for a max. of 12 sem. hrs. of credit when topics vary. Selected topics on social work and social welfare theory, practice and policy.

SW 7905 Independent Reading and Research in Social Work Practice (3)

Prereq.: consent of instructor. May be repeated once by PhD students if topics vary.

SW 7906 Independent Reading and Research in Social Welfare Policy (3)

Prereq.: consent of instructor. May be repeated once by PhD students if topics vary.

SW 7999 Research Project: Nonthesis (3)

Prereq.: completion of foundation courses and consent of instructor. Pass-fail grading. Research project, state of knowledge paper or position paper.

SW 8000 Thesis Research (1-12 per sem.)

Prereq.: completion of all foundation courses and consent of instructor. "S"/"U"grading.

SW 9000 Dissertation Research (1-12 per sem.)

Prereq.: successful completion of the General Examination "S"/"U"grading.

Systems Science

SYSC 7090 Systems Science Design Project (1-9)

Prereq.: minimum of 12 sem. hrs. earned toward the systems science degree. Individual design, development, implementation, and documentation of a project applying systems techniques, possibly involving computing, to a problem in the student's specialization.

SYSC 8000 Systems Science Thesis Research (1-12 per sem.)

"S"/"U"grading.

Theatre

THTR 1000 Theatre Forum (0)

Pass-fail grading May be repeated. Weekly student performance and masterclass forum.

THTR 1001 Practical Elements of Stagecraft (3)

[LCCN: CTHE 2303, Stagecraft] Introduction to the skills and techniques used by artists and craftsmen in realization of the technological elements of all areas of live production, including training sessions in each of the main areas and departmental productions.

THTR 1020 Introduction to Theatre (3)

[LCCN: CTHE 1013, Introduction to Theatre] **This is a General Education course.** *Credit will not be given for this course and THTR 1021.* The arts of the theatre and its artists; acting, directing, costume and scenic design; playwriting, architecture.

THTR 1021 HONORS: Introduction to Theatre (3)

This is a General Education course. *Same as THTR 1020, with special emphasis for qualified student Credit will not be given for this course and THTR 1020.*

THTR 1025 Acting I: Introduction to Acting (3)

[LCCN: CTHE 2103, Acting I] Exploration, through theatre games and movement training, of the actor's problems of intention, listening, physical expression of emotion, concentration and mime.

THTR 1029 Stage Movement I (3)

2 hrs. lecture; 2 hrs. lab. Beginning stage movement for the actor, including flexibility, realignment, spatial awareness, gesture and body com-position and physical characterization.

THTR 1127 Beginning Modern Dance (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1131 Beginning Ballet (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1153 Beginning Jazz Dance (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1227 Intermediate Modern Dance (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1231 Intermediate Ballet (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1253 Intermediate Jazz Dance (1)

May be taken for a max. of 2 hrs. of credit. 3 hrs. lab.

THTR 1800 Introduction to Dance (3)

[LCCN: CDNC 1013, Dance Appreciation] This is a General Education course. Dance as a performing art.

THTR 1804 Dance Theatre (2)

May be taken for a max. of 4 hrs. of credit. Admission by audition. 6 hrs. lab. Participation in dance theatre.

THTR 2001 Portfolio Preparation for the Theatre (3)

Developing the materials and skills necessary to present students' education and experience in theatre to employers in the most effective manner.

THTR 2008 Introduction to Writing Drama (3)

See ENGL 2008.

THTR 2020 Stage Management (3)

Prereq.: THTR 1001. Introduction to the duties and responsibilities of the theatrical stage manager; emphasis on the stage manager's place in the theatrical organization and how he/she interacts with other members of the production team.

THTR 2021 Directing I (3)

Basic principles of script analysis, characterization and scene visualization.

THTR 2022 Introduction to Theatrical Design (3)

This is a General Education course. Basic principles in designing lighting, costumes, scenery and sound.

THTR 2023 Stage Makeup (3)

Fundamentals of straight and character makeup; laws governing line, color, light and shade.

THTR 2024 Live Entertainment Technology (3)

This is a General Education course. Introduction to all areas of theatre technology and how they affect production; areas to be covered include: production/stage management, scenery, costumes, stage properties, lighting and sound.

THTR 2025 Acting II: Fundamentals of Acting (3)

[LCCN: CTHE 2113, Acting II] *Prereq.: THTR 1025.* Principles involved in a workable theory of acting and their application through development of technical skill.

THTR 2026 Theatre Practicum I (1)

May be taken for a max. of 3 sem. hrs. of credit. Participation in an approved technical position in the production of a play produced by the Department of Theatre.

THTR 2027 Stage Voice: Basic Techniques (3)

[LCCN: CTHE 2203, Voice for the Stage] *Open to Theatre majors only.* Development of the speaking voice through physical awareness, breath release, phonation, resonance and articulation to meet theatre performance standards.

THTR 2028 Introduction to Dramatic Literature (3)

This is a General Education course. *Credit will not be given for this course and THTR 2128. Not open to Theatre majors.* A study of representative plays from the Greek era to the present.

THTR 2031 Aerial Practice I (1)

Prereq.: permission of instructor. May be repeated once for credit Methods and practice of beginning techniques used on aerial apparatus.

THTR 2032 Survey of International Performing Arts (3)

Prereq.: permission of instructor. Offered during the Academic Program Abroad to an International Performing Arts Festival such as Edinburgh Festival Fringe or the Avignon Theatre Festival. Research, observation and comparison of a variety of international performances and reporting the analysis in multimedia.

THTR 2128 HONORS: Introduction to Dramatic Literature (3)

Same as THTR 2028, with special emphasis for qualified students. Credit will not be given for this course and THTR 2028. Not open to Theatre majors.

THTR 2130 Script Analysis (3)

Methods of studying playscripts in preparation for their productions on stage.

THTR 2830 Technical Drafting for the Theatre (3)

Prereq.: THTR 1001. 2 hrs. lecture; 2 hrs. lab. Drafting conventions and techniques used for depicting common theatrical elements.

THTR 3025 Acting III (3)

Prereq.: THTR 1029; THTR 2025 and THTR 2027. Open only to theatre performance majors. 2 hrs. lecture; 3 hrs. lab. Characterization and scene work.

THTR 3026 Introduction to Acting for the Camera (3)

Prereq.: THTR 2025. Open only to Theatre Majors with a concentration in Performance or Film and Television. 1 hr. lecture; 5 hrs. lab. Introduction to theory and techniques used when acting on camera and the similarities and differences between on camera and on stage performance.

THTR 3027 Stage Voice: Advanced Techniques (3)

Prereq.: THTR 2027. Continued development of the actor's vocal craft.

THTR 3029 Stage Movement II (3)

Prereq.: THTR 1029. Continuation of THTR 1029. Specialized activities in character types, rhythm and tempo, mask work and basic stage combat.

THTR 3032 Viewpoints and Ensemble (3)

Prereq.: permission of instructor. Method and practice in Viewpoints and other ensemble techniques as it relates to performer training and the creation of physical theatre.

THTR 3120 Theatre History and Literature I: Ancient Greece through Renaissance (3)

Survey of theatre history and literature from Ancient Greece through the Renaissance.

THTR 3121 Theatre History and Literature II: Renaissance through Nineteenth Century (3)

Survey of theatre history and literature from the Renaissance to the late nineteenth century.

THTR 3122 Theatre History and Literature III: 1875 to the Present (3)

Survey of theatre history and literature from the late nineteenth century to present.

THTR 3123 Costume Construction Techniques for the Stage (3)

6 hrs. lab. Study of the skills and techniques unique to the construction of costumes for the stage; emphasis on historical construction, cutting, finishing, design analysis and adaptation for stage performance.

THTR 3124 Costume Crafts (3)

Prereq.: THTR 3123; 2 hrs. lecture; 2 hrs. lab. Skills used in construction/modification of costume craft items; includes leatherwork, wig styling, hat making, shoe alteration and construction of costume props.

THTR 3125 Tutus and Dancewear Construction (3)

6 hrs. lab. Skills and techniques unique to the construction of costumes for dance; methods of working with stretch fabric and tutu construction; includes construction, cutting, fitting, design analysis and adaptations necessary for dance performance.

THTR 3126 Theatrical Rendering (3)

Prereq.: THTR 2022 or permission of instructor. 2 hrs. lecture; 2 hrs. lab. Drawing and painting scenery and costumes for the theatre; emphasis in color, pattern, texture, scale and proportion.

THTR 3134 Scenery and Properties Construction (3)

Prereq.: THTR 1001 or permission of instructor. 2 hrs. lecture; 2 hrs. lab. Examination and application of construction techniques and methodology as they apply to theatrical scenery and properties.

THTR 3320 Introduction to Arts Management (3)

Overview of the organizational structure and operations of arts and cultural institutions.

THTR 3340 Arts Marketing (3)

Lecture, discussion and case analysis of marketing concepts for arts and other creative industries.

THTR 3435 Scene Painting I (3)

Prereq.: THTR 1001 or permission of instructor, 2 hrs. lecture, 2 hrs. lab. Contemporary scene painting for the stage; emphasis on tools, materials, basic techniques and color theory.

THTR 3530 Sound Technology (3)

Prereq.: THTR 1001 or permission of instructor. Introduction to the fundamentals and operational principles involved in theatrical sound.

THTR 3531 Stage Lighting Technology (3)

Prereq.: THTR 1001 or permission of instructor. Introduction to the technical and mechanical elements of stage lighting technology in both analog and digital formats.

THTR 3800 Theatre or Film Internship (3)

Prereq.: consent of instructor. Pass-fail grading May be repeated for a max. of 6 sem. hrs. credit. Study with an approved theatre or film company; emphasis may be in one or all of the following areas: performance, directing, design, technology, dramaturgy, stage management, administration, box office or casting.

THTR 3802 Dance Composition (3)

Fundamental elements and principles of choreography.

THTR 3803 Improvisation (3)

Prereq.: permission of instructor. Methods and practice of improvisation in dance and theatre.

THTR 3900 Selected Topics in Theatre (3)

Prereq.: consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. Consult Schedule of Classes for current offering.

THTR 4008 Writing Drama (3)

See ENGL 4008.

THTR 4021 Gender and Sexuality in Performance (3)

Survey of theories, artists, movements and texts involved with staging issues of sexuality and gender.

THTR 4023 Advanced Costume Construction Techniques for the Stage (3)

Prereq.: THTR 3123. 6 hrs. lab. A continuation of THTR 3123. Skills and techniques unique to the construction of costumes for the stage; methods of planning and construction of costumes for the theatre with emphasis on the differences between theatrical costume construction and clothing construction for the consumer market; historical construction, patterning, cutting, fitting, design analysis and adaptations for stage performance.

THTR 4025 Acting IV: Advanced Acting (3)

Prereq.: THTR 3025; THTR 3027; THTR 3029. Open only to Theatre performance majors. 2 hrs. lecture; 3 hrs. lab. Technique of developing an actor's score for a role.

THTR 4026 Acting for the Camera II (3)

Prereq.: THTR 3026. Open only to Theatre Majors with a concentration in Performance or Film and Television. 1 hr. lecture; 5 hrs. lab. Builds on acting principles and techniques introduced in THTR 3026. Extensive on camera scene and audition work as well as industry awareness, career tools and strategies for the actor.

THTR 4029 Special Topics in Stage Movement (3)

Prereq.: permission of instructor. May be taken for a max. of 6 sem. hrs. of credit when topics vary. 2 hrs. lecture; 2 hrs. lab. Special topics related to physical practices in theatre for training, research and creation.

THTR 4031 Aerial Practice II (1)

Prereq.: permission of instructor. May be repeated once for credit. Methods and practice of research and choreography used on aerial apparatus for public performance.

THTR 4032 Composition for Physical Theatre (3)

Prereq.: permission of instructor. Methods and practice of composition in the creation of physical theatre.

THTR 4033 Devising for Physical Theatre (3)

Prereq.: permission of instructor. Methods and practice of devising for the creation of a new work of physical theatre.

THTR 4123 Costume Design (3)

Prereq.: THTR 3126 or permission of instructor. Principles of design related to stage costumes; design research, creative interpretation; adapting costumes to theatrical styles of production; inspiration from designs of the past.

THTR 4124 Scenic Design (3)

Prereq.: THTR 2022 and THTR 2830 or permission of instructor. Basic principles of scenic design for the theatre; form, style, color and lighting; sketches, renderings and models.

THTR 4125 Directing II (3)

Prereq.: THTR 2021 or equivalent. Principles of play selection, concept formulation, casting, rehearsal and directing plays and scenes in workshop performance.

THTR 4126 Advanced Costume Design (3)

Prereq.: THTR 3126 and THTR 4123. Continuation of THTR 4123 concentrating on the development of a body of costume design research, conceptual choices and advanced costume design techniques.

THTR 4128 Mask Making (3)

2 hrs. lecture; 2 hrs. lab. Skills used in basic mask construction for theatre; includes life casting and four common mask-making techniques with their distinct properties.

THTR 4130 Approaches to the Stage (3)

Survey of modern theoretical approaches to the stage and critical issues of performance.

THTR 4131 Seminar: Contemporary Theatre and Drama (3)

May be taken for a max. of 6 hrs. of credit when topics vary. Selected topics in the contemporary theatre.

THTR 4132 Advanced Stage Makeup (3)

Prereq.: THTR 2023 or permission of instructor. 6 hrs. lab. Advanced principles of makeup for stage and film. Including prosthetic makeup techniques and airbrush makeup; study and execution of period makeup and hairstyles, including basic wig and facial hair construction and wig styling.

THTR 4134 Advanced Scenery Construction (3)

Prereq.: THTR 3134 or equivalent. 2 hrs. lecture; 2 hrs. lab. An advanced examination into the construction of both theatrical and nontheatrical scenery.

THTR 4136 Theatre Practicum II (1)

May be taken for a max. of 3 sem. hrs. of credit. Participation in an approved capacity for the performance or production of a play produced by the Department of Theatre.

THTR 4138 Film Practicum (2)

May be taken for a max. of 4 sem. hrs. of credit. Open only to Theatre Majors with a concentration in Film and Television or by permission of instructor 2 hrs. lab. Technical participation in Department of Theatre Film/TV performance classes or productions.

THTR 4144 Performance Art (3)

See CMST 4144.

THTR 4220 Drama of Africa and African Diaspora (3)

Also offered as ENGL 4220. Study of the form and characteristic features as expressed in the works of dramatists in Africa and African Diaspora.

THTR 4300 Special Topics in Arts Administration (3)

Prereq.: consent of instructor. May be taken for a max. of 9 sem. hrs. of credit when topics vary.

THTR 4320 Advanced Arts Management (3)

Continued study of the principles of arts management including the economics of arts industries, financial management, constituent development and arts advocacy.

THTR 4350 Fundraising for the Arts (3)

Principles of fundraising for the not-for-profit organization including grant writing, individual and corporate giving, planned giving, capital campaigns and special events.

THTR 4435 Scene Painting II (3)

Prereq.: THTR 3435 or equivalent. 1 hr. lecture; 4 hrs. lab. (IA) Contemporary scene painting for the stage; emphasis on advanced projects.

THTR 4436 History of Theatrical Period Styles and Ornament (3)

Historical survey of period styles and adornment with emphasis on the development of clothing, makeup and hair as well as architecture and furnishings from the Greek period to the present.

THTR 4530 Sound Design (3)

Prereq.: THTR 2022 or permission of instructor. 2 hrs. lecture; 2 hrs. lab. Principles and basic techniques of sound design and its influence on staged productions.

THTR 4531 Lighting Design I (3)

Prereq.: THTR 2830 and THTR 3531 or permission of instructor. Lighting design for the theatre; emphasis on script analysis, production concepts and visual ideas.

THTR 4540 Advanced Sound Design (3)

Prereq.: THTR 4530. Explore the artistic and technical aspects of advanced sound design for a theatrical production with a focus on how to identify design choices via working on various styles and genres of theatre design and technical sound elements.

THTR 4541 Advanced Sound Technology (3)

Prereq.: THTR 3530. Advanced study on creating sound systems with various production types and continued development of skills for troubleshooting an audio system for technical production.

THTR 4801 Dance History (3)

Prereq.: THTR 1800 or consent of instructor. Development of dance from primitive cultures to the present.

THTR 4804 Dance Theatre (2)

May be repeated for credit every semester. Admission by audition 6 hrs. lab. Experienced modern dancers participate in modern dance theatre as lead dancers and as choreographers.

THTR 4820 Advanced Stage Management (3)

Prereq.: THTR 2020 or equivalent. Advanced training in stage management techniques, including professional experience component with departmental approval.

THTR 4831 Selected Topics in CAD Drafting for the Theatre (3)

Prereq.: THTR 2830 or equivalent or permission of instructor. Course may be repeated for up to 6 hrs. of credit with a change in platform. Introduction to the fundamentals of CAD drafting and its use in the theatre industry.

THTR 4832 Selected Topics in Advanced CAD for the Theatre (3)

Prereq.: THTR 4831 or equivalent or permission of instructor. Course may be repeated for up to 6 sem. hrs. of credit with a change in platform (AutoCAD, VectorWorks, etc.) Continuation of THTR 4831, concentrating on the organic (non-rectilinear) drafting as well as virtual modeling and visualization and its use in the theatre industry.

THTR 4900 Senior Capstone Seminar in Theatre (3)

Majors only. Survey of issues and career options in theatre, focus on professional preparation; required of graduating senior Theatre majors.

THTR 4901 Special Projects in Theatrical Design (1-3)

Prereq.: consent of instructor. May be repeated twice for a max. of 6 sem. hrs. of credit. 2-6 hrs. lab. Mentored special projects to include advanced area of study or the execution of practical production projects in theatrical design.

THTR 4902 Special Projects in Theatrical Technology (1-3)

Prereq.: consent of instructor May be repeated twice for a max. of 6 sem. hrs. of credit. 2-6 hrs. lab. Mentored special projects to include advanced area of study or the execution of practical production projects in theatrical technology.

THTR 7000 MFA Daily Practice (0)

Prereq.: Admission to the MFA Program in Theatre or consent of instructor. 2 hrs. lab. Daily warm-up for actors using such techniques as T'ai Chi, Yoga, Pilates and other techniques at the discretion of the instructor.

THTR 7001 Independent Projects in Performance Training (1-6)

Prereq.: consent of instructor. May be repeated for a max. of 6 sem. hrs. of credit. Individual projects in performance training with close faculty supervision; emphasis may be in one or all of the following areas: acting, movement, voice, directing or dance.

THTR 7008 Drama Writing (3-6)

See ENGL 7008.

THTR 7130 Script Analysis and Dramaturgy (3)

Methods of studying playscripts in preparation for their production on stage, through Aristotelian, modern and postmodern approaches.

THTR 7220 MFA Acting Studio I (3)

Prereq.: admission to MFA acting program. 2 hrs. lecture; 2 hrs. lab. Intensive work in actor's basic process and tools; text analysis; introduction to contemporary realism; introduction to Shakespeare.

THTR 7221 MFA Acting Studio II (3)

Prereq.: THTR 7220 or equivalent. 2 hrs. lecture; 2 hrs. lab. Applied basic process and text analysis; realism to lyric realism; Ibsen, Chekhov, Williams; scene work with selected texts.

THTR 7222 MFA Acting Studio III (3)

Prereq.: THTR 7221 or equivalent. 2 hrs. lecture; 2 hrs. lab. The Tragic Impulse. Applied basic process and text analysis explored in Greek, Shakespearean and Jacobean tragedy; scene work with selected texts.

THTR 7223 MFA Acting Studio IV (3)

Prereq.: THTR 7222 or equivalent. 2 hrs. lecture; 2 hrs. lab. The Comic Impulse. Basic process and text analysis explored in Commedia, Shakespeare, Moliere, Restoration, Sheridan and Shaw; scene work with selected texts.

THTR 7224 MFA Acting Studio V (3)

Prereq.: THTR 7223 or equivalent. 2 hrs. lecture; 2 hrs. lab. New plays and devised drama. The Solo Performance.

THTR 7225 MFA Acting Studio VI (1)

Prereq.: THTR 7224 or equivalent 2 hrs. lab. Audition/interview techniques and professional issues.

THTR 7226 MFA Camera Studio I (3)

Prereq.: admission to MFA Acting Program. 2 hrs. lecture; 2 hrs. lab. An active, in-front-of-the-camera, studio class designed to introduce the committed actor to the skills and techniques needed to be truthful, interesting and affecting when acting in television and film. An elemental comprehension of film and television terminology, technology and process.

THTR 7227 MFA Voice Studio I (3)

Prereq.: admission to the MFA program. 2 hrs. lecture; 2 hrs. lab. Getting to know your vocal instrument; release & relaxation; basic articulatory work; vocal hygiene; resonance work using techniques from Chuck Jones, Kristin Linklater & Patsy Rodenburg; introduction to Fitzmaurice deconstructing explorations; textual discoveries via contemporary monologue work.

THTR 7228 MFA Voice Studio II (3)

Prereq.: THTR 7227. 2 hrs. lecture; 2 hrs. lab. Introduction to the International Phonetic Alphabet; introduction to Baseline American Dialect via Dudley Knight/Gillian Lane-Plescia; Fitzmaurice restructuring explorations; acting scene work crossover.

THTR 7229 MFA Voice Studio III (3)

Prereq.: THTR 7228 or equivalent. 2 hrs. lecture; 2 hrs. lab. Baseline American & IPA review; Advanced Fitzmaurice Explorations; epic monologue (Greek or Shakespearean); acting scene work crossover.

THTR 7230 MFA Voice Studio IV (3)

Prereq.: THTR 7229 or equivalent. 2 hrs. lecture; 2 hrs. lab. Intro to Dialects; extreme voice usage; Roy Hart explorations; acting scene work crossover.

THTR 7231 MFA Voice Studio V (3)

Prereq.: THTR 7230 or equivalent. 2 hrs. lecture; 2 hrs. lab. Advanced dialect work; character voice explorations; voice over techniques; radio plays; scene work crossover.

THTR 7233 MFA Movement Studio I (3)

Prereq.: admission to MFA program or consent of instructor. The Diagnostic Body. An intensive examination of the habits of physical use of the body through principles of Tai Chi, Alexander Technique, Yoga and Sports Fitness.

THTR 7234 MFA Movement Studio II (3)

Prereq.: THTR 7233 or consent of instructor. The Expressive Body. Neutral and character masks used to enhance the actor's awareness of body language and non-verbal communication while expanding approaches to character through external physical choices.

THTR 7235 MFA Movement Studio III (3)

Prereq.: THTR 7234 or equivalent. The Combative Body. Basic stage combat in unarmed and rapier. Foundation in conditioning through stretching and tumbling with rolls, dives and falls. Scene presentations used to apply techniques to performance.

THTR 7236 MFA Movement Studio IV (3)

Prereq.: THTR 7235 or consent of instructor. The Inventive Body. Physical approaches to the creative impulse in interpretive and generative work.

THTR 7237 MFA Movement Studio V (3)

Prereq.: THTR 7236 or consent of instructor. The Athletic Body. This class focuses on the actor's need to stay physically fit and active as they approach the return to the freelance professional world.

THTR 7238 MFA Movement Studio VI (3)

Prereq.: THTR 7237 or equivalent. Exposure to major trends in movement as performance material.

THTR 7239 MFA Camera Studio II (3)

Prereq.: THTR 7226. 2 hrs. lecture; 2 hrs. lab. Further development of skills and principles introduced in Camera Studio I; exercises and scene work focused on special acting challenges, characterizations and more demanding texts; creation and production of final DV/film project.

THTR 7420 Director/Designer Communication (3)

Prereq.: admission to MFA program or consent of instructor. Methods of communication between directors and designers explored through a series of pre-production projects.

THTR 7421 Advanced Scene Design I (3)

Prereq.: admission to MFA design technology program or consent of instructor. Preparation and presentation of scene design projects; emphasis on script analysis, developing the ground plan and elevations.

THTR 7422 Advanced Scene Design IIA (4)

Prereq.: THTR 7421. (IIA) Preparation and presentation of scene design projects; emphasis on period and style.

THTR 7431 Rendering for the Theatre IA (3)

Prereq.: admission to MFA design technology program or consent of instructor. 1 hr. lecture; 4 hrs. lab. Drawing and rendering techniques for scenic, costume, and lighting designers; emphasis on basic design elements and use of various media.

THTR 7436 Period Styles and Costume (3)

Historical survey of theatre with emphasis on the development of visual design from the Greeks to the present with particular focus on the work of the actor in relationship to costume, movement and space.

THTR 7441 Computer Techniques for the Theatre (3)

Prereq.: admission to MFA in Theatre program or consent of instructor. Examines the various ways the computer is used in theatre, specifically in the area of stage properties. Printing, plotting, and various computer programs are included in the curriculum.

THTR 7521 Advanced Costume Design I (4)

Prereq.: admission to MFA design technology program or consent of instructor. 3 hrs. lecture; 2 hrs. lab. (I) Preparation of advanced costume design projects; emphasis on script analysis, characterization, and problem solving.

THTR 7522 Advanced Costume Design II (4)

Prereq.: admission to MFA design technology program or consent of instructor. 3 hrs. lecture; 2 hrs. lab. (II) Emphasis on designing entire production projects to achieve unity, coherence and style.

THTR 7523 Advanced Costume Design III (4)

Prereq.: admission to MFA design technology program or consent of instructor. 3 hrs. lecture; 2 hrs. lab. (III) Emphasis on ballet, opera, musical theatre.

THTR 7524 Advanced Costume Technology I (3)

Prereq.: admission to MFA design/technology program or consent of instructor. 6 hrs. lab. Advanced problems in the planning and construction of historical costumes for the theatre, with emphasis on pattern drafting and draping.

THTR 7525 Advanced Costume Technology II (3)

Prereq.: admission to MFA design technology program or consent of instructor. Advanced planning and construction of costumes for the theatre; emphasis on historical construction, cutting and tailoring.

THTR 7526 Advanced Costume Technology III (3)

Prereq.: admission to MFA design technology program or consent of instructor. (III) Emphasis on selection, modification and preparation of fabrics for stage costumes.

THTR 7527 Advanced Costume Technology IV (3)

Prereq.: admission to MFA design technology program or consent of instructor. (IV) Emphasis on costume accessories including millinery, footwear, armor and jewelry.

THTR 7601 Scene Shop Technologies and Theatre Safety I: Woodworking (3)

Introduction to traditional and modern materials (primarily wood and plastic products); construction tools; techniques for executing theatrical constructs; shop organization and management; theatre safety; and occupational health.

THTR 7602 Scene Shop Technologies and Theatre Safety II: Metalworking (3)

Introduction to traditional and modern materials (primarily metal products); construction tools; techniques for executing theatrical constructs; shop organization and management; theatre safety; and occupational health are covered.

THTR 7610 Structural Design for the Stage I (3)

Develops student understanding and skills for analyzing loading conditions on scenic elements and engineering a structural design for executing these elements.

THTR 7611 Structural Design for the Stage II (3)

Prereq.: THTR 7610. Continuation of the concepts presented in THTR 7610 .

THTR 7615 Theatrical Production Planning (3)

The management of the theatrical production process. Investigation of the labor and material cost budgeting for each of the production areas.

THTR 7618 Entertainment Rigging (3)

Introduction to traditional rigging techniques for the stage, arena and outdoor venues.

THTR 7620 Stage Machinery Physics (3)

Examination of Newtonian dynamics to aid in determining the behavior of moving scenery. Understanding how the components of a stage machine system are specified to withstand the forces encountered.

THTR 7622 Scenery Automation (3)

Prereq.: THTR 7620. 2 hrs. lecture; 2 hrs. lab. Examination of scenery control systems, including PLC programming, positioning control, software and all in-one control systems.

THTR 7623 Theatre Technology Seminar IA (3)

Prereq.: admission to MFA design technology program. Advanced techniques used on stage and in the scene shop.

THTR 7626 Theatre Technology Seminar IIB (3)

Prereq.: admission to MFA design technology program. Emphasis on roles and responsibilities of the technical director and on preparation to enter the professional world.

THTR 7630 Directed Professional Internship (1-12)

Prereq.: third-year status in theatre MFA program. Pass-fail grading. 2-24 hrs. lab. A theatre-related internship with a professional organization or business (lighting manufacturer, professional theatre, computer company).

THTR 7801 Properties I (3)

Prereq.: admission to MFA in Theatre program or consent of instructor. 1 hr. lecture; 4 hrs. lab. A detailed examination of basic materials, techniques and procedures used by the designer and technician in the construction of stage properties.

THTR 7802 Properties II (3)

Prereq.: THTR 7801, admission to MFA in Theatre program or consent of instructor. 1 hr. lecture; 4 hrs. lab. A continuation of the concepts presented in THTR 7801.

THTR 7821 Furniture and Woodworking I (3)

Prereq.: admission to MFA in Theatre program or consent of instructor. 1 hr. lecture; 4 hrs. lab. Advanced studies in woodworking technologies including materials, construction techniques and styles. Care and repair of furniture is included in the curriculum.

THTR 7822 Furniture and Woodworking II (3)

Prereq.: THTR 7821, admission to MFA in Theatre program or consent of instructor. 1 hr. lecture; 4 hrs. lab. Continuation of the concepts presented in THTR 7821.

THTR 7831 Advanced Properties I (3)

Prereq.: THTR 7801 and THTR 7802. Engagement in projects that occur in productions under construction.

THTR 7832 Advanced Properties II (3)

Prereq.: THTR 7831. Continuation of concepts covered in THTR 7831.

THTR 7900 Introduction to Graduate Study in Theatre (3)

Prereq.: admission to the MA/PhD program in theatre. Research and bibliographic skills for students of theatre history, dramatic literature, theory and criticism.

THTR 7901 Issues in Ancient Theatre and Performance (3)

Survey of issues related to history, dramatic literature and theatre criticism of the Ancient World, including Greece, Rome and Asia.

THTR 7902 Issues in Medieval and Renaissance Theatre and Performance (3)

Survey of issues related to history, dramatic literature and theatre criticism found in Medieval and Renaissance Europe, Asia and Americas.

THTR 7903 Issues in 17th and 18th Century Theatre and Performance (3)

Survey of issues related to history, dramatic literature and theatre criticism founded in 17th and 18th century Europe, America and Asia.

THTR 7904 Issues in 19th Century Theatre and Performance (3)

Survey of issues related to history, dramatic literature and theatre criticism found in 19th century Europe, America and Asia.

THTR 7912 20th Century First-Wave Avant-Garde Drama and Performance (3)

Survey of dramatic and performance practices in the first half of the twentieth century with emphasis on European and American first-wave avant-garde.

THTR 7913 Seminar in American Drama: 18th Century to the Present (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

THTR 7914 Drama and Performance: World War II to the Millennium (3)

Survey of world performance and drama traditions from the end of World War II to the end of the twentieth century.

THTR 7920 Seminar in Drama of the African Diaspora (3)

May be taken for a max. of 6 hrs. credit when topics vary. Contextualizing forms and expressions of drama in the black cultures of the African diaspora in the New World.

THTR 7922 Seminar: Performance Theories and Criticism (3)

May be taken for a max. of 6 hrs. of credit when topics vary.

THTR 7923 Seminar in Gender, Sexuality and Performance (3)

Survey of practical and theoretical approaches, attitudes, and debates regarding issues of gender and sexuality as they relate to performance.

THTR 7924 Seminar: Evolution of Dramatic Theory (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Major concepts of dramatic theory and practice in classical, medieval and Renaissance periods.

THTR 7925 Seminar: Evolution of Dramatic Theory (3)

May be taken for a max. of 6 sem. hrs. of credit when topics vary. Major concepts of dramatic theory and practice in the European and American modern period.

THTR 7926 Seminar in African Drama and Theatre (3)

May be taken for a max. of 6 credit hours when topics vary. Comparative study of the form and expressions of drama among the various cultures of Africa.

THTR 7929 Independent Research: Theatre (1-3)

Prereq.: consent of instructor. May be taken for a max. of 6 sem. hrs. credit. For advanced graduate students who wish to pursue research on special problems exclusive of thesis or dissertation.

THTR 7930 Theatre Production (1-12)

Prereq.: admission to MFA theatre program. 2-24 hrs. lab. Major acting, directing, design or technical responsibility for one or more LSU productions.

THTR 8000 Thesis Research (1-12 per sem.)

“S”/“U” grading.

THTR 9000 Dissertation Research (1-12 per sem.)

“S”/“U” grading.

University College

UC 0006 Study Skills (2)

Pass-no credit grading For students in Student Support Services Program only. Not for degree credit. Permission of instructor. Basic learning principles; includes time management, goal setting, note-taking, listening skills, reading, theme and report writing, memory and analyzing study problems.

UC 0050 Introduction to Mentoring, Education and Research (2)

Pass-no credit grading. May be taken for a maximum of 4 semester hours of credit. For first-year students in HHMI Professors Program or LA-STEM Research Scholars Program only. Not for degree credit. Students will be mentored as they prepare to become mentors and researchers. Introduction to college success tools, including learning strategies, time management and organization.

UC 0060 Pursuing Mentoring, Education and Research (2)

Prereq.: UC 0050 or permission of instructor. Pass-no credit grading. May be taken for a maximum of 4 semester hours of credit. For second-year students in the HHMI Professors Program or LA-STEM Research Scholars Program only. Not for degree credit. Students continue to implement the college success tools gained in UC 0050 and will gain skills needed to obtain research. Students will assess various applications of terminal degrees in their chosen discipline and will engage in peer mentoring.

UC 0070 Success in Mentoring, Education and Research (2)

Prereq.: UC 0060 or permission of instructor. Pass-no credit grading. May be taken for a maximum of 4 semester hours of credit. For third-year students in HHMI Professors Program or LA-STEM Research Scholars Program only. Not for degree credit. Students will gain skills needed for graduate school marketability and preparation and will expand their mentoring projects and community involvement, engaging in peer mentoring.

UC 0080 Advancing in Mentoring, Education and Research (1)

Prereq.: UC 0070 or permission of instructor. Pass-no credit grading. May be taken for a maximum of 4 semester hours of credit. For fourth or fifth year students in HHMI Professors Program or LA-STEM Research Scholars Program. Not for degree credit. Students will serve as leaders within the program and in the community. They will enhance presentation skills, finalize graduate school preparation and engage in peer mentoring.

University

UNIV 0000 University courses

Unique courses of timely and general interest are offered periodically as “University” courses. These courses are interdisciplinary, broad in scope and centered on topics of current concern. Permission to offer a UNIV course must be obtained from the Office of Academic Affairs and the course must be approved by the Faculty Senate Courses and Curricula Committee. University courses may not be offered more than twice (with the exception of The Boyd Professor Lecture Series). Each course carries undergraduate credit of one to three semester hours. Acceptance of such credit toward fulfillment of degree requirements is decided by the faculty of each college or school within the university. The topic, credit and class time of each university course are announced by the Office of Academic Affairs prior to the beginning of the semester in which the course is to be taught. University courses have been offered on such topics as The Constitution: Then and Now (1987), The Age of the French Revolution (1989), Diversity in America (1990), The Holocaust (1992), Political Communication (1993), Race Relations (1995) and The Boyd Professor Lecture Series (2000).

University Studies

UNST 3900 Interdisciplinarity (3)

Prereq.: Senior standing in the College of Humanities & Social Sciences as a interdisciplinary studies major. Study of interdisciplinary approaches in the sciences, social sciences, arts and humanities; analysis of combinations of disciplinary approaches.

Veterinary Clinical Sciences

VCS 7001 Seminar: Veterinary Clinical Sciences (1)

Prereq.: DVM or equivalent degree or consent of instructor. May be taken for a max. of 8 hrs. of credit when topics vary. New developments in veterinary internal medicine, surgery, dermatology, ophthalmology, cardiology, neurology, theriogenology and laboratory/exotic animal medicine.

VCS 7002 Research Techniques in Veterinary Clinical Sciences (1-4)

Prereq.: appropriate 4000- or 5000- level course in selected topic or equivalent and consent of instructor. May be taken for a max. of 6 sem. hrs. when topics vary. Specialized research techniques related to a specific discipline of veterinary clinical sciences.

VCS 7003 Special Topics in Veterinary Clinical Sciences (1-4)

Prereq.: appropriate 4000- and 5000- level course in selected topic or equivalent and consent of instructor. May be taken for a max. of 8 sem. hrs. of credit when topics vary. Aspects of the biochemical, physiological, pathophysiological, epidemiological and economic basis of clinical veterinary medicine.

VCS 7201 Veterinary Gastroenterology (2)

Prereq.: DVM or equivalent degree or consent of instructor. Gastrointestinal diseases and related conditions; emphasis on diagnostics, pathophysiology and management options.

VCS 7202 Veterinary Surgical Techniques (1)

Prereq.: DVM or equivalent degree or consent of instructor. May be taken for a max. of 6 hrs. of credit when topics vary. 3 hrs. lab. Advanced surgical and experimental techniques related to an organ system.

VCS 7204 Advanced Veterinary Orthopedics (2)

Prereq.: DVM or equivalent degree or consent of instructor. Bone, muscle, tendon, and ligament diseases with emphasis on pathophysiology, diagnostics and management options.

VCS 7205 Advanced Veterinary Clinical Neurology (2)

Prereq.: DVM or equivalent degree or consent of instructor. Diseases of the central and peripheral nervous system with emphasis on pathophysiology, diagnostics, neurosurgery and other management options.

VCS 7206 Advanced Veterinary Urogenital Disease (2)

Prereq.: DVM or equivalent degree or consent of instructor. Urinary and reproductive tract diseases and related conditions with emphasis on pathophysiology, diagnostic and management options.

VCS 7208 Advanced Veterinary Cardiovascular Disease (2)

Prereq.: DVM or equivalent degree or consent of instructor. Cardiovascular diseases and related conditions with emphasis on pathophysiology, diagnostic and management options.

VCS 7209 Advanced Veterinary Respiratory Disease (2)

Prereq.: DVM or equivalent degree or consent of instructor. Respiratory diseases and related conditions with emphasis on pathophysiology, diagnostic and management options.

VCS 7210 Veterinary Scientific Journal Review (1)

Prereq.: DVM or equivalent degree or consent of instructor. May be taken for a max. of 6 sem. hrs. of credit. In depth critique of current veterinary journals with emphasis on appraising experimental design and analysis; and interpretation and application of results.

VCS 7211 Advanced Veterinary Cardiorespiratory Disease (3)

Prereq.: DVM or equivalent degree or consent of instructor. Cardiovascular and respiratory diseases and related conditions with emphasis on pathophysiology, diagnostic and management options.

VCS 7212 Biomechanics of Fractures and Fracture Fixation (3)

Prereq.: permission of instructor. Principles of biomechanics as applied to fractures and fracture fixation, including design and biomechanical testing devices for fixation of bone fractures arising in veterinary orthopedic surgery.

VCS 7213 Advanced Veterinary Diagnostic Imaging Interpretation: Small Animal (3)

Prereq.: DVM or equivalent degree or consent of instructor. Advanced training in radiographic, ultrasonographic, computed tomographic and magnetic resonance imaging examination interpretation in common small animal diseases.

VCS 7214 Advanced Veterinary Diagnostic Imaging Interpretation: Large Animal (3)

Prereq.: DVM or equivalent degree or consent of instructor. Advanced diagnostic imaging interpretation of radiographic, computed tomography, ultrasonographic, scintigraphic and magnetic resonance imaging examinations in large animals.

VCS 7215 Advanced Veterinary Diagnostic Imaging: Interventional Techniques Laboratory (2)

Prereq.: DVM or equivalent degree or consent of instructor. Interventional tissue sampling and therapeutic guided procedures performed with fluoroscopy, computed tomography (CT), and ultrasonography (US) in animals.

Veterinary Science

VETS 2000 Anatomy and Physiology of Farm Animals (3)

Anatomy and physiology of farm animals; important species differences.

VETS 2020 Herd Health and Disease Management of Domestic Farm Animals (3)

Herd health program of preventive medicine for farm livestock; disease processes, epidemiology and rational approaches to therapeutic principles and control of diseases.

Veterinary Medicine

VMED 5001 Problem Based Learning I (2)

Small group problem-based learning using clinical veterinary cases, with emphasis on the problem-oriented approach to veterinary problem solving.

VMED 5002 Problem Based Learning II (2)

Continuation of VMED 5001. Small group problem-based learning using clinical veterinary cases, with emphasis on the problem-oriented approach to veterinary problem solving.

VMED 5010 Special Topics in Veterinary Medicine (0.5-2.5)

Pass/fail grading.

VMED 5011 Advanced Veterinary Anesthesiology and Surgery (1.5)

Advanced veterinary surgery and anesthesiology.

VMED 5100 Introduction to Veterinary Medicine (0.5)

Pass/fail grading. Survey of career opportunities in the veterinary profession.

VMED 5102 Introduction to Veterinary Medicine II (0.5)

Pass/fail grading. Continuation of VMED 5100. Survey of career opportunities and other issues in the veterinary profession.

VMED 5103 Principles of Problem Solving (1)

Introduction to problem solving methodology, clinical problem solving, problem-based learning, problem-oriented approach, and information management.

VMED 5104 Principles of Diagnostic Imaging (1)

Basic principles of radiation physics, radiography, radiation safety, radiology, ultrasonography, computed tomography, and magnetic resonance imaging in veterinary medicine; emphasis on the normal radiographic anatomy of the canine, feline, equine, and bovine using selected case examples.

VMED 5105 Principles of Diagnostic Imaging II (0.5)

Continuation of VMED 5104.

VMED 5109 Veterinary Physiology I (3.5)

Physiology of the endocrine, reproductive, and muscular systems in veterinary species.

VMED 5111 Veterinary Physiology II (3)

Basic cardiovascular and gastrointestinal system dynamics in veterinary species.

VMED 5112 Veterinary Physiology III (3)

Basic respiratory and renal system dynamics in veterinary species.

VMED 5123 Basic and Applied Anatomy I (3.5)

Principles of macroscopic anatomy, basic structure, and applied anatomy of the bones, muscles, and joints of the thoracic limb, pelvic limb, and trunk; dissection of the dog, with relevant comparisons to the horse and domestic ruminants.

VMED 5124 Basic and Applied Anatomy II (3)

Introduction to the nervous system; anatomy of the blood vessels and nerves of the thoracic and pelvic limb, the equine digit; comparative anatomy of the head, including the skull and mandible, nasal cavity and paranasal sinuses, ear, oral cavity, teeth, larynx, cranial nerves, surface of the brain and its coverings, and blood supply.

VMED 5125 Basic and Applied Anatomy III (4)

Anatomy of the neck and trunk, thoracic and pleural cavities, thoracic viscera; introduction to the autonomic nervous system; the abdominal wall, abdominal viscera, pelvic cavity, and viscera of the urinary and reproductive systems of domestic animals.

VMED 5126 Cell Biology and Histology (3)

Basic cell and tissue biology; glandular and nonglandular epithelia, connective tissue, muscle, hematopoietic tissue, and the cardiovascular, pulmonary, and immune systems of veterinary species.

VMED 5127 System Histology and Developmental Anatomy (4)

Continuation of VMED 5126. Cell and tissue biology of the digestive, endocrine, reproductive, integumentary, urinary, visual, and auditory systems; early embryonic development of veterinary species.

VMED 5130 Veterinary Bacteriology and Mycology (4)

Comparative biology of medically significant bacteria and fungi, emphasis on principles of pathogenesis and resistance to host responses, laboratory diagnosis, microbial sensitivity determination, resistance to chemotherapeutics, and intervention outcomes.

VMED 5171 Neuroscience (3)

Anatomy of the nervous system of domestic mammals; development and internal organization of the spinal cord and brain; physiology of the neuron and synapse; spinal functions, reflexes, and motor systems; proprioceptive, somatosensory, auditory, vestibular, visual, olfactory, and gustatory systems; autonomic nervous system; higher CNS functions and disease; basis for neurological examination.

VMED 5172 Veterinary Immunology (1.5)

Introduction to the concepts and principles of modern veterinary immunology, with emphasis on understanding the underlying mechanisms responsible for both protective and pathologic immune responses; understanding of the basic principles of immunological effector functions and immune regulation.

VMED 5173 Veterinary Pathology (3)

Concepts, pathogenesis, and gross, microscopic, and ultrastructural changes associated with general pathology: cell injury and death, tissue mineralization, tissue pigmentation, disturbances of tissue growth, disturbances of circulation, and inflammation; recognition of gross, microscopic, and ultrastructural tissue changes and pathogenesis.

VMED 5202 Animals in Society I (0.5)

Pass/fail grading. Human-animal relationships, human-animal bond, pet facilitated therapy, animal welfare, and animal rights.

VMED 5203 Animals in Society II (0.5)

Issues in companion animal, equine, farm animal, and captive, exotic animal behavior.

VMED 5223 Veterinary Pharmacology (4.5)

Fundamental principles of drug actions; drug disposition, pharmacokinetics and mechanisms of action; major classes of drugs used in veterinary practice; emphasis on fundamentals of drug action and clinical application.

VMED 5235 Veterinary Parasitology (4)

Morphology, physiology, and taxonomy of arthropods, protozoa, and helminths of veterinary importance; aggressive mechanisms of helminths, arthropods, and protozoa as well as defense mechanisms of the host; host-parasite relationships; diagnostic methods; mechanisms and factors influencing effectiveness of antiparasitic compounds and other control methods.

VMED 5236 Veterinary Virology (2)

Comparative morphology, biochemistry, and classification of animal viruses; viral multiplication and pathogenesis; virus-host cell interactions and host responses to viral infections; rationale behind viral diagnostics and viral vaccines.

VMED 5241 Systemic Pathology I (4.5)

Diseases, disease processes, and disease mechanisms in selected organ systems; emphasis on species of interest in veterinary medicine.

VMED 5242 Systemic Pathology II (1.5)

Diseases, disease processes, and disease mechanisms in selected organ systems; emphasis on species of interest in veterinary medicine.

VMED 5253 Epidemiology and Public Health (3)

Basics of veterinary epidemiology and public health; including regulatory medicine, environmental issues, food safety, foreign animal disease, food- and water-borne diseases of humans, agro- and bioterrorism, and zoonotic diseases.

VMED 5260 Principles of Veterinary Surgery (1.5)

Principles and fundamental techniques of veterinary surgery.

VMED 5261 Diseases of the Cardiovascular System (2)

Principles of the diagnosis and treatment of acquired and congenital cardiovascular diseases of domestic animals.

VMED 5262 Small Animal Orthopedics (1.5)

Common orthopedic problems encountered in small animal practice; developmental and traumatic abnormalities affecting the musculoskeletal system of the dog and cat.

VMED 5263 Urinary System Diseases (2)

Clinical applications of renal physiology; characterization, diagnosis, and treatment of diseases of the urinary system of domestic animals.

VMED 5264 Diseases of Dogs and Cats (3.5)

Basic principles, diagnosis, and treatment of common diseases/conditions involving small animals.

VMED 5265 Avian, Zoo, and Exotic Animal Diseases (3)

Principles of diagnosis, treatment, medicine, surgery, and control of diseases of companion birds and rodents, raptors, ferrets, rabbits, zoo, exotic, and marine animals.

VMED 5266 Diseases of Farm Animals (4)

Principles of diagnosis, treatment, prevention, and control of diseases/conditions of cattle, goats, sheep, and swine.

VMED 5267 Veterinary Anesthesia (1.5)

An introduction to the principles and practices of veterinary anesthesiology.

VMED 5270 Clinical Pathology and Diseases of the Hemolymphatic System (4)

Introduction and application of principles and techniques of hematology; clinical chemistry; exfoliative cytology; and body fluid analysis; diagnosis, management, and treatment of diseases of the hemolymphatic system in equine, farm animal, and companion animal species.

VMED 5272 Veterinary Clinical Oncology (2)

Fundamentals of oncology, including the basics of mutagenesis, oncogenesis, tumor immunology, tumor epidemiology, diagnosis, and therapy in animals.

VMED 5273 Endocrine and Metabolic Diseases (2.5)

Introduction to the normal structure and function of the endocrinologic and metabolic systems; overview of important endocrine diseases of veterinary species.

VMED 5310 Clinical Skills Laboratory (0.5)

Basic clinical skills necessary in the practice of companion animal veterinary medicine including restraint, physical examination, advanced diagnostic and therapeutic techniques, techniques used to evaluate the eyes and skin, clinical nutrition, and client communication and medical history taking.

VMED 5320 Large Animal Clinical Nutrition (1)

Nutrition of horses, swine, dairy cattle, beef cattle, and small ruminants; feed ingredients, commercial feeds, and feed labels; diet formulation and evaluation; nutrient requirements and feeding practices for the healthy animal; nutrient deficiencies; nutritional prevention and/or management of specific disease conditions.

VMED 5325 Small Animal Clinical Nutrition (1)

Nutrition of dogs, cats, pet birds, and exotic species; nutrient requirements and feeding practices for the healthy animal; nutrient deficiencies; nutritional prevention and/or management of specific disease conditions.

VMED 5351 Veterinary Neurology (1.5)

Clinical and comparative anatomy, physiology, pharmacology, diagnosis, and therapy of diseases of the nervous system in domestic animals.

VMED 5352 Veterinary Ophthalmology (1.5)

Clinical and comparative anatomy, physiology, pharmacology, diagnosis, and therapy of diseases of the eye in domestic animals.

VMED 5361 Comparative Theriogenology (4)

Reproductive anatomy, endocrinology, and physiology; breeding, diagnosis, therapy, and control methods; assisted reproductive technologies in theriogenology for domestic animals (animal reproduction).

VMED 5362 Diseases of Horses (4)

Diagnosis and management of diseases in horses; emphasis on recognition of disorders; diagnostic techniques; medical and surgical management.

VMED 5363 Critical Care (1)

Basic principles of emergency and critical care medicine, including triage of the trauma patient, fluid therapy in multiple species, CPR, and monitoring of the critically ill patient.

VMED 5365 Integumentary System (2.5)

Diagnosis, treatment, and surgery of important skin and ear diseases and skin wound management in domestic animals.

VMED 5366 Population Medicine (2.5)

Overview of disease control and prevention as it applies to animal populations; food and fiber production units and the equine industry are stressed.

VMED 5370 Ethics and Jurisprudence (1)

Introduction to veterinary ethics and the law; their relationship to the veterinary profession.

VMED 5371 Business Management (1)

20 contact hours. Principles of analysis and decision making related to operating a professional, client-oriented practice as a business; concepts in communication, practice promotion, finance, and personnel management for optimum efficiency and return on investment.

VMED 5372 Clinical Immunology and Infectious Diseases (2.5)

Principles of diagnosis, treatment, and control of infectious diseases.

VMED 5373 Toxicology (2.5)

Toxicology of various natural and synthetic toxicants in relation to the prevention, diagnosis, and treatment of common intoxications in domestic animals.

VMED 5441 Diagnostic Microbiology (1)

Clinical application of laboratory services for the diagnosis of immunological and infectious diseases.

VMED 5442 Diagnostic Parasitology (1)

Clinical application of laboratory services for the diagnosis of parasitic diseases.

VMED 5443 Anesthesiology (2)

May be taken for a max. of 4 hrs. of credit. Practice of anesthesia, including technical skills, monitoring tools, and pain management in a variety of species.

VMED 5452 Diagnostic Pathology (4)

May be taken for a max. of 12 hrs. of credit. Necropsy of various vertebrate animal species, with emphasis on domesticated animals; application of diagnostic procedures and techniques in anatomic and clinical pathology; case-based, problem-oriented approach to diagnostic problem solving utilizing current teaching hospital and referral cases and prepared materials that illustrate the aspects of disease mechanisms, pathogenesis, tissue changes, and factors needed for accurate diagnoses.

VMED 5454 Radiology and Diagnostic Imaging (4)

Applications of procedures, methods, and techniques in veterinary radiography, radiology, and diagnostic ultrasound.

VMED 5455 Avian, Zoo, Exotic, and Marine Animal Medicine (1-4)

Avian, zoo, exotic, and marine animal care and management; clinical application of diagnostic, treatment, and control methods for avian, zoo, exotic, and marine animal diseases; client interaction related to didactic information learned in preclinical course; primary and intensive care medicine, client education, practice management review.

VMED 5456 Canine and Feline Medicine and Preventive Health (4)

Application of diagnostic, therapeutic, and control methods for canine and feline diseases; primary and intensive care medicine; preventive health care; medical techniques; problem-oriented approach, client education, practice management; case studies in small animal clinic.

VMED 5457 Companion Animal Surgery (4)

Diagnostic, treatment, and surgical techniques and procedures in companion animals; surgical problems, preoperative and postoperative patient care; anesthetic techniques; client education and practice management; case studies in the small animal clinic.

VMED 5458 Equine Medicine and Surgery (4)

Diagnostic, treatment, and control methods for equine diseases; surgical procedures, methods, and techniques in horses; study of medical and surgical cases in the large animal clinic.

VMED 5460 Applied Veterinary Dermatology (2)

May be taken for a max. of 4 hrs. of credit. Diagnostic, treatment, and control methods for skin diseases of domestic animals; history taking; physical and dermatological examination; technical, problem-solving, and communication skills; participation in rounds, with emphasis on improving clinical proficiency; dermatological knowledge base and patient management; emphasis on responsibility and interpersonal relationships.

VMED 5462 Externship (2-5)

Pass/fail grading. May be repeated for credit. Registration for this optional program must be approved by the director of Veterinary Clinics. Two- to five-week training period for fourth-year students with a private practitioner of veterinary medicine or with a qualified veterinary specialist.

VMED 5463 Special Training (1-5)

May be repeated for credit. Registration for this course must be approved by the instructor and the department head involved. Training for veterinary medical students or advanced studies students in one or more clinical specialty areas of basic science disciplines.

VMED 5465 Theriogenology (1-4)

Diagnostic, treatment, and control methods in theriogenology; emphasis on economics of reproductive herd health of domestic livestock and breeding management of horses and companion animals; fertility assessment of the male and female animal; obstetrics; artificial insemination and embryo transfer techniques.

VMED 5467 Applied Veterinary Ophthalmology (1-4)

Special training in diseases and surgery of the eye; clinical experience in ophthalmic diagnostics, therapeutics, and surgery.

VMED 5468 Farm Animal Health Management (4)

Diagnostic, medical, surgical treatments, and herd health management of medical and surgical cases in the large animal clinic and in field services; health programs and outreach disease problem solving.

VMED 7004 Introduction to Research (2)

Prereq.: consent of instructor. Concepts and methodology in developing research programs; selection of a research problem; planning, execution and publication of original research.

VMED 8000 Thesis Research (1-12 per sem.)

"S"/"U" grading.

VMED 8900 Pre-dissertation Research (1-9)

May be taken for a max. of 9 sem. hrs. of credit.

VMED 9000 Dissertation Research (1-12 per sem.)

"S"/"U" grading.

Women's & Gender Studies

WGS 1001 Evolution of Sex and Gender (3)

This is a General Education course. *Interdisciplinary course, team-taught by faculty in the physical and social sciences.* Covers evolution as differential reproduction; reproduction-related earth history highlights; genetics of sex; animal reproduction strategies; anatomy and physiology of human reproductive systems; evolutionary trajectories in primates; sex and gender in human prehistory and in culture.

WGS 2200 Gender and Popular Culture (3)

Popular culture forms from a women's and gender studies perspective. Analyzes the intersections of gender, race, class, sexual orientation and age in media such as popular literature, film, television, advertisements, digital media and the Internet.

WGS 2300 Gender and Health (3)

Health concerns that are also related to gender, including disparities and differences in health needs and responses, historical and contemporary ideas about health and gender and how gender and health intersect with class, ethnicity, age and place.

WGS 2500 Introduction to Women's & Gender Studies (3)

This is a General Education course. *Credit will not be given for this course and WGS 2501.* Interdisciplinary study of women's lives: work, family, sexuality, economic development, political and social change; variance in sex roles among cultural groups and in different historical periods.

WGS 2501 HONORS: Introduction to Women's & Gender Studies (3)

Same as WGS 2500, with special honors emphasis for qualified students. Credit will not be given for this course and WGS 2500.

WGS 2900 Gender, Race and Nation (3)

This is a General Education course. The constructs of gender and sexuality across diverse racial, ethnic, cultural and class boundaries.

WGS 3150 Survey of Feminist Theory (3)

Interdisciplinary study of a range of feminist theories through which to consider the roles of women, gender and sexuality.

WGS 3600 Women, Gender, and Leadership (3)

Also offered as ELRC 3600. Interdisciplinary study of gender and leadership; with emphasis on women as leaders in a range of settings in education and society.

WGS 4028 Gender and American Politics (3)

See POLI 4028.

WGS 4087 Gender, Place and Culture (3)

See GEOG 4087.

WGS 4500 Special Topics in Women's & Gender Studies (3)

Prereq.: WGS 2500 May be taken for a max. of 6 sem. hrs. of credit when topics vary. Issues central to contemporary feminist inquiry.

WGS 4900 Independent Reading and Research in Women's & Gender Studies (3)

Prereq.: WGS 2500 and permission of instructor and department. May be taken for a max. of 6 sem. hrs. when topics vary. Reading and research on selected topics that emphasize feminist interdisciplinary approaches.

WGS 7150 Seminar in Feminist and Gender Theory (3)

Topics in recent and contemporary theory in a range of disciplines including the humanities, social sciences, natural and physical sciences, design and education; students are encouraged to develop research projects relevant to their primary disciplines and to their research interests.

WGS 7900 Independent Reading and Research in Women's & Gender Studies (3)

Prereq.: permission of instructor and department. May be taken for a max. of 6 sem. hrs. of credit.

The Center for Advising & Counseling serves both traditional and nontraditional students and allows them the opportunity to meet their individual academic goals. Within the framework of university regulations, students may be admitted to the Center for Advising & Counseling according to the following:

Students admitted from the Center for Freshman Year must have earned a minimum of 30 credit hours and meet the university's requirements for continued enrollment. Students exiting the Center for Freshman Year who are in good academic standing, on University Scholastic Warning, or on University Scholastic Probation are admissible.

Transfer students, re-entry students, and students from other divisions of the university may be admitted for a limited time in an effort to meet the admissions requirements to a senior college. These students will be considered for enrollment based on their potential for success in a particular degree program.

All admitted students will meet with an academic counselor to develop a plan outlining conditions and duration of enrollment in the Center for Advising & Counseling. Plans may be revised based on student performance, and continued enrollment may be denied if students fail to progress as defined in the individualized enrollment plan. Students are generally allowed a maximum of four regular semesters of enrollment in UCAC. In some instances, it is appropriate to limit enrollment to less than four regular semesters.

Enrollment Options

Pre-degree - Students with a declared major that are not eligible for enrollment in the freshman college but do not meet the admission criteria for a senior college.

Pre-professional - Allied health or nursing students who are not pursuing an undergraduate degree at LSU and have the potential to pursue one of the pre-professional programs at the LSU Health Sciences Center in New Orleans or Shreveport.

Not Regularly Admitted Students - Students pursuing a degree at another college or university and taking courses at LSU with the intent to transfer all credit to their home institutions.

Non-matriculating Students - Students who have completed a degree at a four-year institution and wish to take undergraduate courses with no specific degree path or who are in need of meeting admission requirements to a senior college that will offer a second degree.

International students who are in the U.S. on student visas are not eligible for admission to pursue their studies as non-matriculating or non-degree seeking students in the Center for Advising & Counseling according to the regulations of the United States Citizenship and Immigration Services.

Restricted Admit - Students who have been previously enrolled in a senior college and are petitioning enrollment in UCAC as a condition of College Scholastic Probation or for students who are exiting a senior college to attempt admission to another senior college offering a newly declared major. Enrollment in this category is generally limited to one semester.

Southern University Cross Enrollment - Students regularly enrolled at Southern University and taking a course or courses at LSU through the cooperative agreement between the two institutions.

A University College appeals committee will exercise discretion in considering other variables important to the admission decision of students being considered for enrollment in UCAC.

WEBSITE www.lsu.edu/mcnair

Ronald E. McNair Research Scholars, a U.S. Department of Education (ED) TRIO program, promotes a cohort of scholars that more accurately reflects the emergent diversity in life experiences, cultures, and perspectives represented in academia by preparing students who are first generation, low-income, and underrepresented in graduate education for doctoral studies. We connect undergraduate students with faculty-directed research experiences, provide individualized advisement, and foster knowledge of the graduate school application process. McNair Research Scholars conduct research under the mentorship of some of the most distinguished faculty in their country and communicate the results of their work through publications and workshops.

Student Support Services (SSS) is a federally funded TRIO program providing services to help participants achieve academic success. The goal of the program is to increase retention and graduation rates of participating students. Individuals who are first-generation college students, who have a documented disability, or who meet the income eligibility established by the U.S. Census Bureau and have a need for academic support are encouraged to apply. The Student Support Services program offers a class, free tutoring, personalized counseling and academic advising, career decision-making assistance, opportunities for cultural enrichment, a computer lab solely for SSS students, and much more. Additional information can be obtained from Student Support Services Assistant Director, 136 Allen Hall, online, or by calling 225-578-2869.

Center for Freshman Year

Center for Freshman Year

OFFICE 150 Allen Hall

FAX 225-578-5762
E-MAIL ucinfo@lsu.edu
WEBSITE www.lsu.edu/freshman

Every freshman student has access to the full-time counseling/advising staff. Students may obtain assistance in curriculum selection, career guidance, college study skills, and personal issues that may interfere with academic progress.

Freshmen who have decided on a field of study and who want to graduate in a minimum time should follow the freshman year curriculum suggested by the college offering the degree in their interested field of study. These curricula guides are found in the

various senior college sections of this catalog. Advising assistance is available to guide students through the curricula requirements for all majors.

Students who have not decided on a field of study will initially enroll in one of the following three undecided/exploratory categories:

UNAH – Undecided with an interest in the arts or humanities

UNSE – Undecided with an interest in the sciences or engineering

UNSS – Undecided with an interest in the social sciences.

Students enrolled in these exploratory categories are expected to participate in academic and career counseling sessions during their first semester by making an appointment with a Center for Freshman Year counselor. A major should be declared by the end of the freshman year.

Other Programs

Undecided - Arts & Humanities

The Undecided – Arts & Humanities program should be selected by the student who enters the university and has not yet selected a major, however has a primary interest in programs such as, music, theater, history, religion, philosophy, English, foreign language or communication studies.

Note: This is not a degree program. Students will be expected to declare a specific degree program no later than the end of the second semester of enrollment.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the degree program selected.

Semester 1: Gen. Ed. Analytical Reasoning MATH Course; “C” or better in ENGL 1001.

Semester 2: Gen. Ed. Natural Sciences*; Gen. Ed. Social Sciences or Gen. Ed. Arts; Declare a Degree Program.

Semester 3: Gen. Ed. Analytical Reasoning** or Gen. Ed. Arts; 2.0 LSU and cumulative GPA***.

*Students interested in Landscape Architecture as a possible major should take GEOG 2050.

**Students interested in Landscape Architecture and Architecture as possible majors should take MATH 1022.

***It is strongly recommended that students see an advisor or counselor for specific GPA requirements, since some majors require above a 2.0 GPA.

Undecided - Science & Engineering

The Undecided – Science & Engineering should be selected by a student who may be primarily interested in majors such as computer science, engineering, construction management, agriculture, pre-Nursing, Allied Health, or Pre-Medicine.

This program is for the student who enters the university and has not chosen a major. This is not a degree program. Students will be expected to declare a specific major no later than the end of the second semester of enrollment. Until that time, general courses are to be selected based on the Recommended Path outlined below to prevent taking courses that may not apply for degree credit in the eventual major.

Critical Requirements

The following outline of Critical Requirements must be met by the indicated semester to be considered making minimal progress at the university.

Semester 1: "C" or better in ENGL 1001; MATH 1021 or MATH 1023; 2.0 LSU and Cumulative GPA.

Semester 2: MATH 1022; Gen. Ed. Natural Sciences*; 2.0 LSU and Cumulative GPA; Declare a Degree Program.

Semester 3: "C" or better in MATH 1550 or MATH 1551; Gen. Ed. Natural Sciences*; 2.0 LSU and Cumulative GPA.

*Students interested in programs offered through the College of Science or the College of Engineering should consult the recommended paths from the respective college to determine the General Education Natural Science course requirements for specific majors.

Undecided - Social Sciences

The Undecided – Social Sciences program should be selected by the student who enters the university and has not yet selected a major, however has a primary interest in areas such as anthropology, geography, political science, psychology, or sociology.

NOTE: This is not a degree program. Students will be expected to declare a specific degree program no later than the end of the second semester of enrollment.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the degree program selected.

Semester 1: Gen. Ed. Analytical Reasoning MATH Course; "C" or better in ENGL 1001.

Semester 2: Gen. Ed. Social Sciences; Gen. Ed. Arts Course; Declare a Degree Program.

Semester 3: Gen. Ed. Natural Sciences; First course in Foreign Language Sequence; 2.0 LSU and cumulative GPA*.

*It is strongly recommended that students see an advisor or counselor for specific GPA requirements, since some majors require above a 2.0 GPA.

Division of Pre-Professional Programs

Enrollment in the pre-professional health programs in University College does not constitute admission to the professional health programs at the LSU Health Sciences Center.

Allied Health Programs

OFFICE 150 Himes Hall

TELEPHONE 225-578-8281

FAX 225-578-8268

University College offers pre-professional programs that prepare students to enter the professional curricula leading to the bachelor's degree in one of the various allied health fields at either LSU Health New Orleans, LSU Health Shreveport, or at the LSU Dental School in New Orleans.

A 2+2 program which provides the final two years of clinical and professional training for the Bachelor of Science degree programs in Cardiopulmonary Science (respiratory therapy and cardiopulmonary sonography) and Clinical Laboratory Sciences (medical technology).

The LSU School of Dentistry offers programs in Dental Hygiene and Dental Laboratory Technology. A Bachelor of Science program is available in each discipline in addition to an Associate of Science degree in dental laboratory technology. Admission

to these programs is on a competitive basis. Applications for admission must be submitted well in advance of the date of matriculation at LSU Health or School of Dentistry.

The LSU School of Allied Health Professions also offers graduate degrees in Audiology, Speech-Language Pathology, Health Sciences, Occupational Therapy, Rehabilitation Counseling, Physician Assistant, and Physical Therapy. Admission to these programs is competitive and requires that students first complete an undergraduate degree in addition to other prerequisite criteria. Preference for admission is given to Louisiana residents. Further information regarding any of the programs may be obtained from the allied health advisor in the Center for Advising & Counseling or from the appropriate institutions.

The programs of study are appropriate for the professional curricula indicated.

Distance Program Credit

University College students may enroll in distance program courses with the approval of the University College executive director's office. For guidance in the selection and enrollment of these courses, students should consult the "Continuing Education" section of this catalog as well as the distance program guidelines located in the catalog chapter of the senior college in which they expect to eventually enroll. These policies will be used to determine approval for enrollment.

Students may request an extension of time to complete a distance program course if they: 1) have not exceeded the maximum number of hours for enrollment for a regular semester or summer term, including distance program courses; 2) remain eligible to enroll at the university; and 3) continue their enrollment in University College.

Pre-Professional

Cardiopulmonary Science (Respiratory Therapy and Cardiopulmonary Sonography))

The following program is designed for students planning to apply to the Bachelor of Science in Cardiopulmonary Science at the LSU Health School of Allied Health Professions in New Orleans and Shreveport. Students should check the LSU Health's website for any additional updates or changes to the prerequisite curricula in cardiopulmonary science. Visit <http://lsuhsc.edu> or www.lsuhschshreveport.edu for more information.

Approval of course selections must be obtained from the Pre-Allied Health advisor in the Center for Advising & Counseling or from the head of the appropriate professional department at the LSU Health School of Allied Health Professions. A copy of this approval must be placed in the student's file in the Center for Advising & Counseling.

Military science or physical education skills courses are not acceptable as electives in fulfilling the 60 semester hour pre-allied health credit requirement.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: "C" or better in ENGL 1001 and MATH 1021.

Semester 2: "C" or better in CHEM 1201.

Semester 3: "C" or better in BIOL 1001 or BIOL 1201.

Semester 4: "C" or better in ENGL 2000.

Prerequisite Courses:

English (Composition) (6)

General Education Humanities (9)

General Chemistry & Labs (8)

Algebra & Trigonometry (6)

General Biology & Lab (8)

Human Physiology (3)

Science Elective (3)

Psychology (general) (3)

General Physics & Lab (4)

General Microbiology & Lab (4)

General Education Arts Electives (3)

Sociology (3)

60 Total Sem. Hrs.

Clinical Laboratory Science (Medical Technology)

The LSU Health offers a “3 plus 1” program in Clinical Laboratory Science (Medical Technology). Please contact the Pre-Allied Health advisor in the Center for Advising & Counseling for more information.

The following program is designed for students planning to apply to the Bachelor of Science in Clinical Laboratory Sciences at LSU Health in New Orleans and Shreveport. Students should check the LSU Health Sciences Center website for any additional updates or changes to the prerequisite curricula in medical technology. Visit www.lsuhs.edu or www.lsuhschreveport.edu for more information.

Approval of course selections must be obtained from the allied health counselor in the Center for Advising & Counseling or from the head of the appropriate professional department at the LSU Health School of Allied Health Professions. Students are required to meet with the Pre-Allied Health advisor each semester to review their schedule and discuss any possible changes in prerequisites and entrance requirements to this program. A copy of this approval must be placed in the student’s file in the Center for Advising & Counseling.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: “C” or better in ENGL 1001 and MATH 1021.

Semester 2: “C” or better in CHEM 1201 and MATH 1022.

Semester 3: "C" or better in BIOL 1201.

Semester 4: "C" or better in ENGL 2000.

Prerequisite Courses:

English (composition) (6)

General Chemistry & Lab (8)

Organic Chemistry (3) *

Analytical Reasoning (6) **

General Biology & Lab (8)

General Microbiology & Lab (4)

Science Elective (3) ***

General Elective (9) ****

General Education Humanities (9)

General Education Social Sciences (6) *****

General Education Arts Electives (3) *****

65 Total Sem. Hrs.

* Survey of Organic Chemistry will not be accepted for this requirement.

** Algebra and statistics recommended.

*** Upper-level biological sciences or molecular biology, chemistry, anatomy or physiology, pathogenic microbiology, or biochemistry recommended.

**** Management, communications, technical writing, or education recommended.

***** At least 3 hours must be taken at the 2000 level or higher.

***** Art, dance, theater, or fine arts recommended.

Dental Hygiene

The LSU Dental School in New Orleans offers two professional programs, Dental Hygiene and Dental Laboratory Technology. Bachelor's degrees are available in each discipline in addition to an associate's degree in dental laboratory technology. Students should check the LSU School of Dentistry website for any additional updates or changes to the prerequisite curricula in dental hygiene. Visit <http://www.lsusd.lsuhs.edu> for more information.

Approval of course selections must be obtained from the Pre-Allied Health advisor in the Center for Advising & Counseling or from the head of the appropriate professional department at the LSU School of Dentistry. Students are required to meet with the Pre-Allied Health advisor each semester to review their schedule and discuss any possible changes in prerequisites and entrance requirements to this program. A copy of this approval must be placed in the student's file in the Center for Advising & Counseling.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: "C" or better in ENGL 1001 and MATH 1021.

Semester 2: "C" or better in CHEM 1001 or CHEM 1201.

Semester 3: "C" or better in BIOL 1001 or BIOL 1201.

Semester 4: "C" or better in ENGL 2000.

Prerequisite Courses:

General Biology & Lab (7)

Human Physiology or Anatomy (3)

General Microbiology (3)

English Composition (6)

English Literature (3) *

Introductory Sociology (3)

Speech (3)

General Education Art (3) **

General Chemistry (6)

Analytical Reasoning (6) ***

General Psychology (3)

General Education Humanities (9)

Computer Literacy (3)

General Electives (3)

61 Total Sem. Hrs.

* Should be at the 2000 level or higher.

** Art, music, or theatre recommended.

*** Algebra and higher.

Dental Laboratory Technology

The LSU Dental School in New Orleans offers two professional programs, Dental Hygiene and Dental Laboratory Technology. Bachelor's degrees are available in each discipline in addition to an associate's degree in dental laboratory technology. Students should check the LSU School of Dentistry website for any additional updates or changes to the prerequisite curricula in dental laboratory technology. Visit <http://www.lsusd.lsuhsd.edu> for more information.

Approval of course selections must be obtained from the Pre-Allied Health advisor in the Center for Advising & Counseling or from the head of the appropriate professional department at the LSU School of Dentistry. Students are required to meet with the Pre-Allied Health advisor each semester to review their schedule and discuss any possible changes in prerequisites and entrance requirements to this program. A copy of this approval must be placed in the student's file in the Center for Advising & Counseling.

Critical Requirements

nursing.lsuhscc.edu/default.aspx

The following program is designed for students planning to apply to the Bachelor of Science in Nursing ONLY at the LSU Health Sciences Center School of Nursing in New Orleans.

LSU offers a pre-professional nursing program that prepares students to enter the professional nursing curriculum leading to the Bachelor of Science in Nursing at the LSU Health Sciences Center School of Nursing (LSUHSC SON) in New Orleans.

Admission to the LSUHSC SON is on a competitive basis. Applications for admission to the sophomore year at the LSUHSC SON must be submitted the semester prior to the semester anticipated acceptance to complete the three-year study. Students should consult LSUHSC SON directly for assistance with the application process.

Pre-nursing requirements are subject to change. Students may access the current pre-nursing curriculum online at nursing.lsuhscc.edu/default.aspx

Pre-nursing requirements vary with each professional school of nursing, and entrance to each school is competitive. Prospective nursing students seeking admission to institutions other than the LSU Health Sciences Center School of Nursing should obtain the entrance requirements from these schools directly.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: "C" or better in ENGL 1001 and MATH 1021.

Semester 2: "C" or better in CHEM 1201.

Semester 3: "C" or better in BIOL 1201.

Semester 4: "C" or better in BIOL 1011 or BIOL 2051.

Prerequisite Courses:

Arts Elective (3) *

College Algebra (3)

English Composition (6)

General Biology and Laboratory (4)

General Chemistry (3)

General Psychology (3)

Introductory Sociology (3)

Microbiology (3)

Humanities (6) *

34 Total Sem. Hrs.

* See approved list of courses at nursing.lsuhscc.edu/default.aspx or in 150 Allen Hall.

Required For Bachelor's Degree:

The following courses are required for the bachelor's degree in nursing and may be earned at LSU while students are pending approval for admission to the School of Nursing.

Humanities course (3)

Statistics (3)

Abnormal Psychology (3)

9 Total Sem. Hrs.

Pharmacy and Optometry

The LSU System does not offer a degree program in pharmacy or optometry. Students are encouraged to contact pharmacy and optometry schools where they intend to apply for information about the appropriate course work.

For students wishing to apply for the pharmacy programs at the University of Louisiana–Monroe, and Xavier University of New Orleans, advising assistance is available from the University College counselors in 150 Allen Hall and 150 Himes Hall.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: "C" or better in ENGL 1001 and MATH 1021.

Semester 2: "C" or better in MATH 1022 and CHEM 1201.

Semester 3: "C" or better in BIOL 1201.

Semester 4: "C" or better in ENGL 2000.

Physician's Assistant

The Pre-Allied Health advisor is also available to prepare LSU students for the admission process to the School of Allied Health Professions programs in Physical Therapy, Physician Assistant, Rehabilitation Counseling, and Occupational Therapy at LSU Health. The admission requirements for these graduate programs include a bachelor's degree, completion of specific prerequisite courses, and other selective admission criteria. A complete list of these requirements can be obtained from the Pre-Allied Health advisor in 150 Himes Hall or by visiting the School of Allied Health Professions website at www.alliedhealth.lsuhs.edu.

Students may apply online for the master's programs approximately nine months prior to the anticipated date of entry. Applications can be obtained from the School of Allied Health Professions website.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

Semester 1: "C" or better in ENGL 1001 and MATH 1021.

Semester 2: "C" or better in MATH 1022 and CHEM 1201.

Semester 3: "C" or better in BIOL 1201.

Semester 4: "C" or better in ENGL 2000.

Pre-Occupational Therapy

The Pre-Allied Health advisor is also available to prepare LSU students for the admission process to the School of Allied Health Professions programs in Physical Therapy, Physician Assistant, Rehabilitation Counseling, and Occupational Therapy at the LSU Health. The admission requirements for these graduate programs include a bachelor's degree, completion of specific prerequisite courses, and other selective admission criteria. A complete list of these requirements can be obtained from the Pre-Allied Health advisor in 150 Himes Hall or by visiting the School of Allied Health Professions website at www.alliedhealth.lsuhs.edu.

Students may apply online for the master's programs approximately nine months prior to the anticipated date of entry. Applications can be obtained from the School of Allied Health Professions website.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

- Semester 1: "C" or better in ENGL 1001 and MATH 1021.
- Semester 2: "C" or better in MATH 1022 and CHEM 1201.
- Semester 3: "C" or better in SOCL 2001 or PSYC 2000.
- Semester 4: "C" or better in ENGL 2000.

Pre-Physical Therapy

The Pre-Allied Health advisor is also available to prepare LSU students for the admission process to the School of Allied Health Professions programs in Physical Therapy, Physician Assistant, Rehabilitation Counseling, and Occupational Therapy at the LSU Health. The admission requirements for these graduate programs include a bachelor's degree, completion of specific prerequisite courses, and other selective admission criteria. A complete list of these requirements can be obtained from the Pre-Allied Health advisor in 150 Himes Hall or by visiting the School of Allied Health Professions website at www.alliedhealth.lsuhs.edu.

Students may apply online for the master's programs approximately nine months prior to the anticipated date of entry. Applications can be obtained from the School of Allied Health Professions website.

Critical Requirements

The following outline of Critical Requirements must be met by the semester indicated to ensure that minimal progress will be made in the program selected.

- Semester 1: "C" or better in ENGL 1001 and MATH 1021.
- Semester 2: "C" or better in MATH 1022 and CHEM 1201.
- Semester 3: "C" or better in BIOL 1201.
- Semester 4: "C" or better in ENGL 2000.

Rehabilitation Counseling

The Pre-Allied Health advisor is also available to prepare LSU students for the admission process to the School of Allied Health Professions programs in Physical Therapy, Physician Assistant, Rehabilitation Counseling, and Occupational Therapy at the LSU Health. The admission requirements for these graduate programs include a bachelor's degree, completion of specific prerequisite courses, and other selective admission criteria. A complete list of these requirements can be obtained from the Pre-Allied Health advisor in 150 Himes Hall or by visiting the School of Allied Health Professions website at www.alliedhealth.lsuhs.edu.

Students may apply online for the master's programs approximately nine months prior to the anticipated date of entry. Applications can be obtained from the School of Allied Health Professions website.

Departments, Schools, and Curricula

The dean, directors of schools, heads of departments, and members of the faculty of the college will consult with students on their choices of curricula. Requests for substitutions for required courses in any curricula in the college must have approval of the dean, upon recommendation of the head of the department or school. A maximum of six semester hours of basic ROTC and eight semester hours of advanced ROTC may be allowed for elective credit in any curriculum.

Department of Agricultural Economics & Agribusiness	Department of Entomology	Department of Experimental Statistics
Department of Plant Pathology & Crop Physiology	Department of Textiles, Apparel Design & Merchandising	School of Animal Sciences
School of Nutrition & Food Sciences	School of Plant, Environmental & Soil Sciences	School of Renewable Natural Resources
Agricultural Education (Intercollegiate Program)		

The College of Agriculture was established at LSU in 1908; however, its roots go back to the first graduation class that had, as one of its five graduates, a planter. The mission of today's College of Agriculture is one rooted in business, science, and technology. The application of knowledge to meeting the world's food and fiber needs remains the common thread that binds the college's past to its future.

The college's land-grant mission dates to 1862 and consists of three emphases: learning, discovery, and active engagement in our community. The discovery and engagement components of the college's mission are often conducted in concert with the LSU Agricultural Center. Many faculty hold joint appointments with the Louisiana Agricultural Experimental Station or the Louisiana Cooperative Extension Service—the research and education units of the LSU Agricultural Center. The interlinking of learning, discovery, and engagement are hallmarks of the land-grant system and are likewise the cornerstones of the College of Agriculture's strategic agenda for the future.

The College of Agriculture is home to more than 40 majors and areas of concentration within 9 academic departments and schools. All of the programs provide an interdisciplinary educational experience that reflects the latest in science and technology and is built on the five focus areas that are core to the college's strategic agenda.

Degree Programs

All undergraduate degrees in the College of Agriculture are Bachelor of Science degrees. The following programs are offered by the College of Agriculture:

Agricultural Business

Agricultural Education, Grades 6-12

Plant & Soil Systems*

Animal, Dairy & Poultry Sciences

Nutrition & Food Sciences

Textiles, Apparel & Merchandising

Environmental Management Systems

Natural Resource Ecology & Management

** The curriculum in plant and soil systems consolidates the curricula in the areas of agronomy, entomology, horticulture, plant pathology, and crop physiology. Students in this curriculum take core courses that provide a basic knowledge required for specialization in one of the ten areas of concentration: agricultural pest management (entomology emphasis), agricultural pest management (plant pathology emphasis), crop science, environmental horticulture, horticultural science, landscape management, soil science, sustainable production systems, turfgrass management, and urban entomology. Each area is further individualized by the addition of approved and free electives.*

Vision

To be a leading college of agriculture, taking undergraduate and graduate students to the highest levels of intellectual and personal development in the milieu of a competitive research, service, and teaching land-grant university.

Mission

To provide programs of excellence to educate undergraduate and graduate students of agriculture, environmental sciences, renewable natural resource sciences, human resource sciences, quantitative sciences, and human sciences; to support and encourage research, public service, and other scholarly pursuits; to further the purposes of the land-grant college system for the benefit of the citizens of Louisiana, the nation, and the global community.

Strategic Agenda

To achieve our mission, the College of Agriculture has developed a strategic agenda focused on five interdisciplinary areas. These areas encompass broad fields of work and are, by their content, interdisciplinary and cross many administrative lines both within the college and in other administrative units. In particular, these areas coincide with and closely follow the research and development agenda of the LSU Agricultural Center.

Environmental quality and renewable resource management

Bioscience and technology in agriculture

Processes and products for added value

Agribusiness, consumer science, and global competitiveness

Food quality, nutrition, and health

Coordination with the LSU Agricultural Center

The College of Agriculture, in coordination with the LSU Agricultural Center, offers students unique and unparalleled educational opportunities. The Louisiana Agricultural Experimental Station maintains research programs in Baton Rouge and at branch stations throughout Louisiana. The Louisiana Cooperative Extension Service disseminates knowledge throughout Louisiana through its network of specialists in Baton Rouge, county agents, and family and consumer sciences in every parish. A compressed video system that links all areas of the state greatly facilitates the delivery of educational programming.

Close cooperation between the college and the Agricultural Center provides an instructional program of exceptional quality, combining knowledge and the latest in technology and application. Because many faculty members in the college also hold appointments in the Agricultural Center, students are exposed to the latest in cutting-edge research and how that knowledge is disseminated to the field through the extension service.

The College of Agriculture and the Agricultural Center are actively involved in disseminating new knowledge and methods throughout the world. Internationally experienced faculty and staff bring their insights and experiences into the classroom to further enhance the learning experience. An active international program provides opportunities for students to gain valuable international experience that can assist them in future employment or study. The college and the Agricultural Center are currently active in Central and South America, Southeast Asia, West Africa, Europe, and countries of the former Soviet Union.

Facilities

Facilities for instructional purposes include more than 4,500 acres of farm and timber land and buildings for the care and study of crops and plants, livestock and poultry, and wildlife and forests.

Computer facilities, laboratories, and related research facilities are used for teaching purposes. Land and facilities at branch research stations throughout Louisiana also play a part in the teaching program, particularly at the graduate level. The state's land and water resources; plant, animal, and aquatic life: and its communities and people strengthen instruction through a constantly changing complex of hundreds of research projects throughout the state that are coordinated with the teaching program. Similarly, research, teaching, and extension activities in foreign countries are made an active part of the classroom instruction.

Livestock include purebred herds of Angus, Brahman, and Hereford cattle that are used in teaching and research studies. Artificial insemination and embryo transfer are used to incorporate current genetics from leading herds in Louisiana and throughout the U.S. Other herds of beef cattle near the campus include breeds and crosses representative of the Southern beef cattle industry. Brahman-British cow herds are bred to either British or heavy muscled terminal sire breeds such as Charolais or Braford bulls to produce a broad range of cattle types for research and teaching purposes. The dairy herd is composed of the Holstein breed.

A number of Quarter Horses and grade mares are maintained for research and instruction. The Dairy Improvement Center cooperates with Genex in the operation of a commercial artificial breeding program. Commercial strains of poultry are used in instruction and research. Research and teaching with poultry are conducted at a modern state-of-the-art facility. Totally enclosed tunnel-ventilated houses are designed to conduct research with broilers, layers, and broiler-breeders.

Admission Requirements

Within the framework of university regulations, students may be admitted to the college according to the following policies:

Entering freshmen who meet the university admissions standards and have a declared major within the College of Agriculture will be directly admitted to the College of Agriculture.

Students transferring from another academic unit on the LSU campus will be admitted to the College of Agriculture after they have earned at least a 2.00 cumulative and in major (all courses accepted towards degree requirements) grade-point average, and a "C" or better in MATH 1021 or higher and ENGL 1001 (ENGL 1004 for international students).

Students transferring from another institution must also meet university transfer admission requirements as detailed in this catalog under "Undergraduate Admissions".

On recommendation of the appropriate department head/school director and the dean of the college, probationary admission may be granted in special cases.

Students not meeting requirements may appeal their admission by contacting the College of Agriculture's Office of Student Services.

Degree Requirements of the College

The baccalaureate degree is conferred on students who fulfill the following requirements:

Students must complete their curricula with at least a 2.00 grade point average on all work taken not resulting in grades of "P," "W," or "I." Students must have a 2.00 average on work taken at this university, as well as a 2.00 average on the entire college record.

Teacher Education Program only: Minimum grade point average of 2.50, cumulative and LSU; passage of all state-required sections of the PRAXIS II Series; minimum grade of "C" in course work as specified by the Louisiana Board of Elementary and Secondary Education.

The last 30 semester hours of the degree program must be taken in residence in the College of Agriculture. Independent and Distance Learning courses taken in the last 30 hours will not be considered residence credit without prior approval of the department head concerned and the dean of the college.

Graduation check-out must be completed and approved by the Dean's Office during the semester prior to graduation.

Enrollment in Two Degree Programs

With the dean's approval, a student may be enrolled in two degree programs concurrently. A student can enroll as a dual registrant using one of the following procedures:

Dual Enrollment within the College of Agriculture—By completing residence and academic requirements for two degree programs, a student may earn one bachelor of science degree with two majors. By completing residence and academic requirements and earning 30 hours over the degree requiring the fewer number of hours, a student may earn two separate bachelor's degrees.

Dual Enrollment in the College of Agriculture and a Second Academic College—By completing residence and academic requirements for two degree programs and earning 30 hours more than the degree requiring the fewer number of hours, a student may earn two bachelor's degrees. The student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

Scholastic Requirements

In addition to university requirements, the College of Agriculture has additional scholastic requirements:

Students must complete at least one general education English composition course and one general education analytical reasoning course with a "C" or better within the first 30 hours of study.

Students who fail to earn a 2.00 average in each of two consecutive regular semesters and whose LSU or cumulative grade point average is below a 2.00 will be declared ineligible to continue in the College of Agriculture for one regular semester.

Seniors who have completed the first semester of the senior year, are degree candidates, and are under scholastic suspension from the university may be placed on probation for one additional semester at the discretion of the dean of the College of Agriculture.

Readmission to the College

Students who have completed terms of scholastic suspension from the university may apply for readmission through the Office of Enrollment Management. They may be readmitted only with the approval of the head of the appropriate department/school and the dean of the College of Agriculture. Readmission is not guaranteed.

Distance Program Courses

Up to one-fourth of the number of hours required for the baccalaureate degree may be taken through distance program courses. Before scheduling such work, however, students should obtain approval from the dean of the college.

Graduate Programs

Through the Graduate School, the college offers master's and doctoral degrees in the fields of agricultural economics, animal and dairy sciences, entomology, food science, human ecology, plant, environmental management, and soil sciences, plant health, and renewable natural resources. In addition, a master's degree is offered in applied statistics. For further details, consult "The Graduate School" section of this catalog.

Louisiana Consortium of Public Agricultural Colleges (LCPAC)

Louisiana State University is a member of the Louisiana Consortium of Public Agricultural Colleges (LCPAC). The consortium has developed a 60-hour, two-year core curriculum to facilitate the transfer of agricultural students among Louisiana public colleges and universities. The articulation policy for the LSU College of Agriculture is shown below.

[Click here to view the LSU Course Equivalencies for the LCPAC Core.](#)

Minor Field Requirements (Optional)

Students in the College of Agriculture are not required to pursue a minor. They may choose to do so by the guidelines outlined below:

A minor is the student's field of secondary academic emphasis. A minor consists of a minimum of 18 hours of related course work designed to provide breadth and depth in a student's undergraduate program

At least nine hours must be taken at the 3000- and/or 4000-level on this campus

A minimum GPA of 2.00 is required in the minor field on all work taken in the LSU System and on all work taken

Minors inside the College of Agriculture must be initiated by the department or school administering the majority of the courses constituting the minor. When submitting a minor for approval, the department or school should specify whether its students may elect that minor. All minors must be approved by the college committee on courses and curricula

Students may not minor and major in the same degree program.

The degree program of a student outside the College of Business may not consist of more than 30 hours of degree credit earned in courses offered by the College of Business.

Minor in Agriculture

The College of Agriculture also offers a *minor in Agriculture*. To graduate with a minor in agriculture: Choose nine hours from the following: AGECE 2003; AGRI 1005; AGRO 1001; ANSC 1011 or ANSC 1049; EMS 1011; ENTM 2001; FDSC 1049; HORT 2050; AEA 2001; HUEC 1110; HUEC 2045; RNR 1001.

Choose nine hours from any course (3000/4000-level) within the College of Agriculture.

For a list of all other minors within the College of Agriculture, please see the individual departmental links above.

Pre-Veterinary Medicine

The pre-veterinary program involves three or more years of training—at least 66 semester hours—prior to application to the LSU School of Veterinary Medicine. Students interested in attending veterinary school can pursue a degree program in one of two areas listed below and enter the LSU School of Veterinary Medicine after completion of the first three years of the chosen curriculum. The pre-veterinary program will allow you to pursue an undergraduate degree in either of the following areas: animal, dairy, and poultry sciences or natural resource ecology and management. After successful completion of the first year of work at the LSU School of Veterinary Medicine, you will be awarded a Bachelor of Science degree in your chosen undergraduate field of study. You will then complete the remainder of the professional curriculum in veterinary science required for a Doctorate of Veterinary Medicine.

Pre-Medicine and Pre-Dental

The College of Agriculture at LSU provides unique opportunities that prepare students to enter careers in medicine, dentistry, and allied health fields. Programs within the School of Animal Sciences and the School of Nutrition and Food Sciences offer appealing options for students; however, students in the college's departments and schools can fulfill pre-medical or pre-dental course requirements while pursuing a major in an area that matches their own career interest. The College of Agriculture not only provides students with an exceptional academic basis for professional careers in medicine or dentistry, but also enhances their education with communication, leadership skills, and opportunities in community service and research. Alumni of these programs

have been accepted at prestigious medical schools such as Columbia, Emory, Johns Hopkins, and the LSU Health Sciences Centers in New Orleans and Shreveport.

Gamma Sigma Delta

Gamma Sigma Delta is an honor society that promotes the advancement of all disciplines associated with agriculture and their contributions to mankind. We encourage high standards of scholarship and worthy achievements as well as excellence in practice in all branches of agricultural and related sciences.

Members of the LSU chapter include graduate and undergraduate students, faculty members, and administrators representing research, teaching, and outreach. We represent a diversity of disciplines including textiles, renewable natural resources economics, business, nutrition and food science, human resources, workforce development, veterinary medicine, horticulture, and traditional agricultural animals and crops.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

General Minor

Agriculture Minor

To graduate with a *minor in agriculture*: Choose nine hours from the following: AGEC 2003; AGRI 1005; AGRO 1001; ANSC 1011 or ANSC 1049; EMS 1011; ENTM 2001; FDSC 1049; HORT 2050; AEA 2001; HUEC 1110; HUEC 2045; RNR 1001. Choose nine hours from any course (3000/4000 level) within the College of Agriculture.

CURRICULUM:

Agricultural Business

The agricultural business curriculum offered by the Department of Agricultural Economics & Agribusiness provides training for a wide variety of careers in the agribusiness industry. The program integrates the disciplines of business and agricultural business, economics, quantitative methods, and agricultural sciences. Course offerings include courses in agribusiness management, marketing, credit and finance, agricultural production economics, natural resource economics, agricultural policy and law, price analysis, statistics, quantitative methods, and computer applications.

The curriculum in agricultural business emphasizes use of management, marketing, finance, law, and other business principles in the solution of problems in the agribusiness industry. This curriculum provides students excellent preparation for careers in farm management, agricultural law, commodity trading, sales, marketing, real estate, international trade, insurance, agricultural processing, management, communications, public relations, finance, and appraisal.

Students majoring in curricula offered through other departments in the College of Agriculture may minor in agricultural business. See the listing of the College of Agriculture minors for details.

Major

Agricultural Business, B.S.

Agricultural Business

CRITICAL REQUIREMENTS:

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1431/MATH 1550.

SEMESTER 3: "C" or better in AGEC 2003/ECON 2000 (see footnote 2).

SEMESTER 4: "C" or better in ECON 2030/ECON 2010 (see footnote 2).

SEMESTER 5: "C" or better in ACCT 2000/ACCT 2001; AGEC 3003.

General Education Course Requirements • Arts, humanities, and social sciences—select from approved general education courses listed in a separate section of this catalog.

Semester 1

CRITICAL: MATH 1021.

AGEC 1003 Introduction to Agricultural Business (3)

General Education course - Humanities (3)

General Education course- Natural Sciences (3) ¹

ENGL 1001 English Composition (3)

MATH 1021 College Algebra (3)

Total Semester Hours: 15

Semester 6

ACCT 2101 Introductory Managerial Accounting (3)

AGEC 3203 Agricultural Commodity Marketing and Risk Management (3)

AGEC 3503 Natural Resource Economics (3) or

AGEC 4613 Agricultural Trade (3)

MGT 3200 Principles of Management (3)

MKT 3401 Principles of Marketing (3)

Total Semester Hours: 15

Semester 7

AGEC 4403 Agricultural Finance (3)

AGEC 4603 Agricultural Policy (3)

General Education course - Humanities (3)

AGEC 3303 Farm Management (3)

AGEC 4443 Farm and Rural Land Appraisal (3)

Total Semester Hours: 15

Semester 8

AGEC 4273 Agricultural Price Analysis (3)

AGEC 4433 Agricultural Business Planning, Management and Policy (3)

Finance Electives (6)³

AGEC Elective (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - For General Education Natural Science, both physical and life sciences must be taken: six hours in a physical/life science sequence; three hours in an area (physical/life) not previously selected.

² - Option: Must take either ECON 2000 and ECON 2010 or AGECE 2003 and ECON 2030.

³ - Six hours to be selected from the following areas (1) Real Estate-FIN 3351, FIN 3352, FIN 3353 OR (2) Investment -FIN 3440, FIN 3632, FIN 3715, FIN 3717, FIN 3826.

⁴ - Select one course from the following: ENGL 2001, ENGL 2002, ENGL 2005, ENGL 2007, ENGL 2008, ENGL 2009, ENGL 2012, ENGL 2024, ENGL 3003, ENGL 3004, or ENGL 3101.

⁵ - Students electing to take ISDS 2001 must take an additional hour of general electives or ROTC.

Food Industry Management

CRITICAL REQUIREMENTS:

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1431/MATH 1550.

SEMESTER 3: "C" or better in AGECE 2003/ECON 2000 (see footnote 2).

SEMESTER 4: "C" or better in ECON 2030/ECON 2010 (see footnote 2).

SEMESTER 5: "C" or better in ACCT 2000/ACCT 2001; AGECE 3003.

Semester 1

CRITICAL: MATH 1021.

AGEC 1003 Introduction to Agricultural Business (3)

General Education course - Humanities (3)

General Education course - Natural Sciences (3)¹

ENGL 1001 English Composition (3)

MATH 1021 College Algebra (3)

Total Semester Hours: 15

Semester 2

CRITICAL: MATH 1431/MATH 1550.

⁵ - Students electing to take ISDS 2001 must take an additional hour of general electives or ROTC.

Minor

Agricultural Business Minor

To graduate with a *minor in agricultural business* (18 hrs.), students must complete:

AGEC 2003 and ECON 2030, or ECON 2000 and ECON 2010;

at least six credit hours of approved electives chosen from AGECE 3003, AGECE 3203, AGECE 3303, AGECE 3413, AGECE 3503, and AGECE 3803;*

at least six credit hours of approved electives chosen from AGECE 4203, AGECE 4243, AGECE 4273, AGECE 4403, AGECE 4443, AGECE 4603, AGECE 4613, and AGECE 4623.*

The minor in agricultural business is not available to students majoring in agricultural business.

*Students should be aware that some 3000 and 4000 level AGECE classes have prerequisites beyond the required courses for the minor in Agricultural Business (AGECE 2003 and ECON 2030, or ECON 2000 and ECON 2010).

CURRICULUM:

Plant and Soil Systems (Agricultural Pest Management Area; Urban Entomology Area)

Plant & Soil Systems

The curriculum in plant and soil systems consolidates the curricula in the areas of agronomy, entomology, horticulture, and plant pathology and crop physiology. Students in this curriculum take core courses that provide a basic knowledge required for specialization in one of the nine areas of concentration: agricultural pest management, crop science, environmental horticulture, horticultural science, landscape management, soil science, sustainable production systems, turf grass management, and urban entomology. Each area is further individualized by the addition of approved and free electives.

The Department of Plant Pathology & Crop Physiology and the Department of Entomology offer an area of concentration in agricultural pest management and the Department of Entomology offers an additional area of concentration in urban entomology. The agricultural pest management concentration is an interdisciplinary program of study in weed science, plant pathology, and entomology. Effective management of pest problems in agriculture requires a broad base of knowledge in the pest disciplines and practical field experience. The agricultural pest management concentration features a strong core of courses in the three pest management disciplines; a strong background in agriculture, life and physical sciences; and practical training through an internship work experience. The urban entomology concentration is well suited for students who are interested in urban pest control, mosquito control, public health insect management, and forensic entomology for criminal justice.

In both concentrations, a range of restricted and non-restricted electives allows students to personalize their degree program for employment with agricultural industries such as chemical, seed, or biotechnology companies; state and federal research, extension, and regulatory agencies; private agricultural consulting firms; farmer cooperatives; nurseries, home, and garden centers; golf courses; greenhouse plant production; corporate farms; urban pest control; public health insect management; and

forensic entomology. Both concentrations require students to complete an internship providing practical experience in agricultural or urban pest management areas.

CURRICULUM:

No undergraduate program is available. See "The Graduate School" section for a description of the graduate program.

The Department of Experimental Statistics offers an undergraduate minor in applied statistics. Students take a 12-hour core of statistical methods and theory courses and an additional six hours chosen from a variety of more specialized courses that would best meet individual academic goals. (See the section "Minor Field Requirements" in this chapter for more information.) A minor in applied statistics provides valuable experience in quantitative applications that enhance employment opportunities in a variety of fields as well as preparation for graduate study. Students interested in pursuing a minor in applied statistics are encouraged to declare and contact the department as early in the academic program as possible.

The Master of Applied Statistics offered by this department is designed to acquaint graduate students with the techniques of statistical methods and their application to various fields of specialization. For additional information concerning this program, consult "The Graduate School" section.

Minor

Applied Statistics Minor

To graduate with a *minor in applied statistics*, students must complete a minimum of 18 hours of course work consisting of:

EXST 2201, EXST 3201, EXST 4050; and

Six hours from EXST 3999, EXST 4012, EXST 4025, and EXST 4087.

CURRICULUM:

Plant and Soil Systems (Agricultural Pest Management Area)

Plant & Soil Systems

The curriculum in plant and soil systems consolidates the curricula in the areas of agronomy, entomology, horticulture, and plant pathology and crop physiology. Students in this curriculum take core courses that provide a basic knowledge required for specialization in one of the nine areas of concentration: agricultural pest management, crop science, environmental horticulture, horticultural science, landscape management, soil science, sustainable production systems, turf grass management, and urban entomology. Each area is further individualized by the addition of approved and free electives.

The Department of Plant Pathology & Crop Physiology and the Department of Entomology offer an area of concentration in agricultural pest management and the Department of Entomology offers an additional area of concentration in urban entomology. The agricultural pest management concentration is an interdisciplinary program of study in weed science, plant pathology, and entomology. Effective management of pest problems in agriculture requires a broad base of knowledge in the pest disciplines and practical field experience. The agricultural pest management concentration features a strong core of courses in the three pest management disciplines; a strong background in agriculture, life and physical sciences; and practical training through an internship work experience. The urban entomology concentration is well suited for students who are interested in urban pest control, mosquito control, public health insect management, and forensic entomology for criminal justice.

In both concentrations, a range of restricted and non-restricted electives allows students to personalize their degree program for employment with agricultural industries such as chemical, seed, or biotechnology companies; state and federal research, extension, and regulatory agencies; private agricultural consulting firms; farmer cooperatives; nurseries, home, and garden centers; golf courses; greenhouse plant production; corporate farms; urban pest control; public health insect management; and forensic entomology. Both concentrations require students to complete an internship providing practical experience in agricultural or urban pest management areas.

Major

Plant & Soil Systems, B.S.

Area of Concentration

Agricultural Pest Management (Plant Pathology Emphasis)

CRITICAL REQUIREMENTS

Semester 1: ENGL 1001; MATH 1021.

Semester 2: CHEM 1201.

Semester 3: BIOL 1201; CHEM 1202.

Semester 4: AGRO 2051; BIOL 1202.

Semester 5: CHEM 2060/CHEM 2261.

Semester 1

CRITICAL: ENGL 1001; MATH 1021.

ENGL 1001 English Composition (3)

BIOL 1201 Biology for Science Majors I (3)

CURRICULUM:

Textiles, Apparel & Merchandising

To prepare students for professional careers in the textile and apparel industries, which are interconnected and global in nature, this curriculum provides an integrated, multi-functional academic experience. Students focus on design, development, and marketing of textile and apparel products and are encouraged to develop a broad based problem solving perspective through synthesis of concepts, course work, and work experiences. Students concentrate on a component of the textile/apparel industry complex by selecting textile science, apparel design, or merchandising as a program area. Graduates pursue careers with textile and apparel manufacturers, retailers, testing laboratories, government agencies, media firms, or they may open their own businesses.

Major

Textiles, Apparel & Merchandising, B.S.

Areas of Concentration

Apparel Design

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; MATH 1021.

SEMESTER 2: MATH 1022/MATH 1431 or EXST 2201.

Minor

Textiles, Merchandising & Apparel Minor

This minor is not available to students majoring in textiles, apparel, and merchandising.

To graduate with a *minor in textiles, merchandising, and apparel*, students must complete 10 hours consisting of HUEC 2040, HUEC 2041, HUEC 2045, HUEC 3032; and nine additional hours chosen from HUEC 3030, HUEC 4041, HUEC 4043, HUEC 4044, HUEC 4070, HUEC 4071, or HUEC 4072. Students must comply with all prerequisites and must achieve a minimum grade of "C" in every course taken in the minor field.

School of Animal Sciences

OFFICE	105 J. B. Francioni Hall
TELEPHONE	225-578-3241
FAX	225-578-3279
E-MAIL	ghay@agcenter.lsu.edu

For information regarding the GRADUATE PROGRAM, [click here](#).

CURRICULUM:

Animal, Dairy, and Poultry Sciences (Animal Science Area, Dairy Production Area, Dairy Foods Technology Area, Poultry Science Area, Science and Technology Area, and Pre-veterinary Medicine)

The School of Animal Sciences offers programs in animal, dairy, and poultry sciences that provide individuals with a broad educational background tailored to meet their needs and aptitudes. Such preparation provides graduates with employment opportunities in all phases of animal, dairy and poultry production, processing, distribution, marketing, research and teaching. Preparatory curricula also are provided for subsequent training at the graduate level or in veterinary medicine.

Qualified undergraduate students have the opportunity to participate in the Summer Internship Program with well-paid stipends. This program integrates academic experience on campus with work experience off campus, providing a total educational experience that prepares the student for responsible participation in industry following graduation.

Animal, Dairy & Poultry Sciences

Students take basic courses during the first two years and follow a selected area of concentration during the junior and senior years. Within each area of concentration, students select approved and free electives. Students interested in choosing an approved minor can take the suggested courses for the minor as part of approved and free electives. See the listing of College of Agriculture minors for details.

Prior to entering the program, students are encouraged to consult a counselor for guidance in scheduling courses. Those students interested in entering the School of Veterinary Medicine must take BIOL 1201 and BIOL 1208, BIOL 1202 and BIOL 1209, BIOL 2051, BIOL 2083 or BIOL 4087; CHEM 2060 or CHEM 2261, MATH 1021 and MATH 1022 or MATH 1023 or MATH 1550; PHYS 2001 and PHYS 2002; and CMST 1061, CMST 2010, or CMST 2060 to meet admission requirements.

Graduates of the animal, dairy, and poultry sciences curriculum find career opportunities in a variety of production enterprises and animal-related agribusinesses, such as commercial livestock, dairy, and poultry enterprises; feed, pharmaceutical, and supply

companies; commodity processing and food product industries; and various state and federal agencies including the cooperative extension service. Students selecting the science-directed electives are prepared to enter graduate school.

Major

Animal, Dairy & Poultry Sciences, B.S.

Students entering the School of Veterinary Medicine after completion of the first three years of the animal, dairy and poultry sciences curriculum (90 hours) may receive the BS degree following successful completion of the first year of the professional curriculum in veterinary medicine. (See the School of Veterinary Medicine Bulletin for details of the first years of the professional curriculum.) Students pursuing this program will be required to establish residence in the College of Agriculture for 30 semester hours prior to entering the School of Veterinary Medicine. They also must make application for the degree through the dean's office in the College of Agriculture no later than 15 days after classes begin in the semester in which the degree is to be awarded.

Minor

Animal, Dairy, and Poultry Sciences Minor

To graduate with a *minor in animal, dairy, and poultry sciences*, students must complete a minimum of 18 hours of course work in animal, dairy, or poultry sciences with at least nine hours at the 4000 level and maintain a 2.00 average on all work taken. Students majoring in animal, dairy, and poultry sciences may not also minor in this curriculum.

CURRICULUM:

Nutrition and Food Sciences

The School of Nutrition and Food Sciences offers undergraduate and graduate programs to prepare students for professional careers in specialty areas. The undergraduate curriculum in Nutrition and Food Sciences consolidates the curricula in the areas of Nutritional Sciences and Food Science and Technology. Students in this curriculum take core courses that provide basic knowledge required for specialization in one of four areas of concentration: Dietetics; Nutritional Sciences/Pre-Medical; Nutrition, Health and Society; and Food Science and Technology (with a Pre-Medical option). Each concentration provides the student with a professional sequence in an area of specialization, the necessary supporting courses in basic sciences and a broad general education. Students who enter this major should give special attention to the mathematics and science courses they select

and should consult with an advisor when registering for these courses. Students must be ready for the required courses when they enter the program. Graduates are prepared to pursue professional careers in dietetics, medicine, public health, cooperative extension service, business, education, research, and all aspects of the food industry.

The concentrations in Dietetics, Nutritional Sciences/Pre-Medical, and Nutrition, Health, and Society in the Nutrition and Food Sciences Curriculum prepare students for careers in the health professions specifically in dietetics, medicine, dentistry, or related fields. The Dietetics concentration is currently accredited as a Didactic Program in Dietetics (DPD) by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, a specialized accrediting body recognized by the U.S. Department of Education. Students successfully completing this program will receive a verification statement that allows them to apply for an ACEND accredited dietetic internship. This internship is required before students are eligible to sit for the registry examination to become a registered dietitian (RD). Registered dietitians provide expertise in nutrition and food service management in a variety of settings, including public and private schools, universities, hospitals, clinics, care centers, the armed services, research laboratories, commercial and industrial establishments, and local, state and federal health programs. Students who successfully complete the knowledge requirements of the dietetics concentration, as outlined by ACEND, but do not enter and complete a dietetic internship are qualified to sit the examination to become a dietetic technician, registered (DTR). Information about both the RD and DTR programs are available through the Commission on Dietetic Registration. The Nutritional Sciences/Pre-Medical concentration provides students with a strong grounding in nutritional sciences while meeting the course work requirements for students planning to apply to medical, dental or graduate school. Since nutrition plays a role in many chronic and acute disease processes, understanding the role of nutrients in the body provides premedical students with a strong basis for building their medical careers. The concentration in Nutrition, Health, and Society prepares students for a variety of careers in nutrition, including, but not limited to nutrition education, the food industry or scientific writing. Neither the Nutritional Sciences/Pre-Medical concentration nor the concentration in Nutrition, Health, and Society prepares students to enter a dietetic internship with the ultimate goal of sitting the exam to become an RD or to sit the examination to become a DTR or to obtain other professional credentials in dietetics.

Students in the Food Science and Technology concentration take courses in food chemistry, analysis, microbiology, engineering and business to learn the techniques and basic information about research, development, processing, evaluation, packaging, and distribution of foods. The primary food properties of safety, taste, acceptability, quality, and nutrition are studied extensively. Opportunities are also available to interact with culinary programs in the preparation and presentation of food. Elective courses allow students to gain practical experience in research or product development. Internships with many various food companies are also available.

Students in the Food Science and Technology concentration can take electives related to food safety and applied microbiology which will enhance students' knowledge in the critical area of quality control and government regulation of food manufacturing. Students may also take electives related to food processing and technology which provide students background knowledge in product development, processing plant supervision, food engineering principles, and quality parameters of foods. In addition, students may take electives related to food chemistry and analysis which prepare students for careers in food quality assurance and technical services. Electives related to food business and marketing are also available and lead to knowledge or careers in management, technical sales, or marketing.

There is a strong relationship between food science, nutrition and the health field in prevention of disease, slowing aging and finding solutions to problems like inflammation, cancer, and obesity such as development of nutritional or medical foods. Students aspiring to go to medical school can take the Pre-Medical option which allows students to take core courses required for consideration for admission to medical school.

Food science has been ranked as one of the most enjoyable careers available to college graduates. Food science and technology encompasses everything in regards to food. Food scientists interface with the production practices and harvesting of raw food materials, processing of food, and marketing and merchandising of food while having main interests in providing safe, wholesome, healthy, and high quality food to customers. The Food Science and Technology concentration in the curriculum in Nutrition and Food Sciences follows the Institute of Food Technologists national guidelines to provide a strong basic foundation for the study of post-production properties and processing of food products. For students taking the Food Science and Technology area of concentration, there are several job areas available in the food industry related to food quality and safety, applied microbiology, food engineering, processing and technology, food chemistry and analysis, food business and marketing research, and product development. Students are also prepared to pursue graduate study or pursue professional programs such as medical, dental and pharmacy school.

Requirements for Graduation

In addition to the graduation requirements outlined by the College of Agriculture, students in the Dietetics concentration of the Nutrition and Food Sciences curriculum must earn a grade of "C" or better in all required HUEC courses, as well as in BIOL 2160 and BIOL 2083.

Minor

Human Nutrition Minor

To graduate with a *minor in human nutrition*, students must complete at least 18-23 hours including HUEC 1110, HUEC 2110, HUEC 2112, HUEC 3110 and HUEC 3115. In addition, students must choose one of the two areas of study options listed below:

Community Nutrition—choose one from HUEC 3114 or HUEC 3116

Nutrition—HUEC 4111 and HUEC 4114.

CURRICULA:

Environmental Management Systems (Environmental Analysis and Risk Management; Policy Analysis; Resource Conservation)

Plant & Soil Systems (Crop Science; Environmental Horticulture; Horticultural Science; Landscape Management; Soil Science; Sustainable Production Systems; Turfgrass Management)

The School of Plant, Environmental & Soil Sciences offers degree programs in environmental management systems and plant and soil systems curricula. These curricula provide students with excellent preparation for careers in management, consulting, regulatory and public relations, or sales and services in agricultural, natural resources, or environmental industries. Some students use these science-based curricula as foundations to pursue graduate studies in agronomic, horticultural or environmental sciences, or professional degrees in medicine or law.

Students are given opportunities to gain valuable experience through internships in the agronomic, horticultural or environmental business communities, special research projects with faculty members, and/or part-time student employee positions.

Environmental Management Systems

Louisiana is blessed with abundant natural resources. To protect public and ecological health, and restore air, soil, and water quality, Louisiana has developed one of the strongest professional environmental communities in the world. The environmental management systems curriculum provides students with the knowledge and skills to work as part of this environmental community in a variety of areas of specialization, including air permitting, environmental enforcement, soil conservation, water quality, wetland delineation, environmental compliance, coastal restoration, and risk assessment and management. Environmental management systems graduates are well-qualified for a variety of careers because of their solid training in sciences, problem-solving, and written and oral communication, all of which will be critical for the fast paced, ever-changing future job market that will favor workers who are well-trained and demonstrate flexibility and adaptability.

The environmental management systems curriculum is partitioned into three areas of concentration: (1) environmental analysis and risk management, (2) policy analysis, and (3) resource conservation. Each concentration includes a variety of elective courses that allow students to gain expertise in specific areas that interest them. Particularly in their junior and senior year, students interact with a wide range of accomplished environmental professionals to refine their program of study and career goal, and focus on specific career paths within the broad environmental management field. However, the environmental management systems curriculum is designed to be sufficiently flexible to allow students to prepare for positions in the public or private sectors working in the office, laboratory, or field.

Graduates with a concentration in *environmental analysis and risk management* will have a knowledge and practical understanding of: chemistry (analytical, organic, and quantitative analysis, instrumentation, soil and water chemistry); environmental microbiology; environmental fate and transport geology (hydrology); land use planning (including GIS/GPS); site investigation principles and collection methods; human and ecological risk assessment; and federal and local regulations governing site assessment, site evaluation, and site remediation.

Graduates with a concentration in *policy analysis* will have a knowledge and practical understanding of: role and scope of state and federal regulatory agencies; environmental laws and regulations; mechanisms for implementation of regulations, compliance with regulations, permits, audits, etc.; environmental auditing systems; environmental permitting; the role of risk assessment in decision-making; and land use planning.

Graduates with a concentration in *resource conservation* will have a knowledge and practical understanding of: chemical, physical, and biological properties of soil; soil and water conservation and associated federal programs; coastal restoration; soil-plant relationships; fundamentals of forestry, wildlife, and agricultural management; land use planning (including GIS/GPS); soil and water assessment and remediation principles; and ecological risk assessment.

Environmental management systems students vary widely in their interests and career goals, but they all share a commitment to a professional career and a passion to preserve our natural resources and protect environmental quality.

Students who complete the Associates of Science in General Science with a concentration in Environmental Management Systems at Baton Rouge Community College and who have been admitted to LSU with a declared major in Environmental Management Systems in the College of Agriculture, can enter the Environmental Management Systems program at junior-level standing.

Plant & Soil Systems

Plant & Soil Systems is an interdepartmental curriculum in areas of agronomy, entomology, horticulture, plant pathology, and crop physiology. All students in this curriculum take core courses that provide a basic knowledge required for specialization in one of nine areas of concentration: agricultural pest management, crop science, environmental horticulture, horticultural science, landscape management, soil science, sustainable production systems, turf grass management, and urban entomology. Each area is further individualized by the addition of approved and free electives.

The sustainable cropping systems concentration is a blend of applied agronomy and horticulture, with less emphasis on science and more focus on economics than the other concentrations. It prepares students for careers in management, consulting, agricultural sales, and other production-related occupations.

Students pursuing agronomic interests can concentrate their studies in the areas of crop science, soil science, or agricultural pest management. In addition to the basic curriculum outlined for plant and soil systems majors, students selecting the crop management area of concentration take courses in agronomy, biological sciences, economics, entomology, experimental statistics, genetics, and plant health.

The agricultural pest management area of concentration is an interdisciplinary program of study in weed science, plant pathology, and physical sciences, and practical training through an internship work experience. A range of restricted and non-restricted electives allow students to personalize their degree program.

Four areas of horticultural concentration (environmental horticulture; landscape management; turfgrass management; and horticultural science) are designed to prepare students for various career opportunities.

Students selecting the environmental horticulture area of concentration will be prepared for careers in ornamental crop production, landscape horticulture, or the production and processing of fruits, nuts, and vegetables. Students will become familiar with essential aspects of landscape and interiorscape installation and maintenance. Careers include interior and exterior landscape managers, horticulture educators, wholesale production of horticulture plants, retail managers and owners, arboreta, botanical gardens, and tissue culture propagation. Career opportunities in vegetable and fruit science include jobs as field representatives and farm consultants, food processors, agricultural chemical suppliers, and produce brokers.

Students selecting the landscape management area of concentration are prepared to construct landscape sites, as well as plant and maintain woody and herbaceous plants, turfgrass ornamental bulbs, and related crops. Careers are centered on owning and operating landscape management companies.

Students selecting the turfgrass management area of concentration pursue careers as sports field managers; golf course superintendents; or professionals employed by the urban agricultural products industry. In addition to the basic core courses in the curriculum, students study turf and ornamental management, pest identification and control, pesticide application techniques, and landscape design. Twelve hours of business electives provide additional experience in financial and personal management.

Students selecting the horticultural science area of concentration are prepared to pursue graduate studies in horticulture and related sciences. Horticultural scientists conduct research in areas such as crop culture and management; molecular biology; plant breeding and genetics; plant growth and development; plant metabolism and nutrition; propagation; post harvest and stress physiology; and tissue culture.

Minor

Agricultural Pest Management Minor

To graduate with a *minor in agricultural pest management*, students must complete a minimum of 18 hours of course work in pest management. Specific requirements include: ENTM 2001; PLHL 4000; AGRO 4070; and seven additional hours chosen from ENTM 4005, ENTM 4006, ENTM 4012, ENTM 4018/PLHL 4018, PLHL 4001, AGRO 4071. Of the seven elective hours, at least one course must be from entomology.

Agronomy Minor

To graduate with a *minor in agronomy*, students must complete AGRO 2051 and 14 additional hours in agronomy. At least six hours of the 14 must be at the 3000 or 4000 level. The minor in agronomy is not available to students in plant and soil systems.

Environmental Management Systems Minor

To graduate with a *minor in environmental management systems*, students must complete 18 hours consisting of EMS 1011, EMS 2011, EMS 3040, and EMS 3050, and 5 hours chosen from EMS 3045, EMS 4010, EMS 4020, EMS 4055, or EMS 4056.

Note: Some courses require prerequisites.

Horticulture Minor

To graduate with a *minor in horticulture*, students must complete seven hours consisting of HORT 2050, HORT 2061, and HORT 2070; and 11 additional hours in HORT. This minor is not available to students majoring in plant and soil systems.

CURRICULA:

Natural Resource Ecology & Management

The School of Renewable Natural Resources offers undergraduate and graduate education to students who wish to discover the natural world and ways to improve the management and conservation of wildlife, fisheries, wetlands, forests, and other renewable resources, protect biodiversity, and promote conservation of diverse ecosystems. One undergraduate curriculum with a diversity of concentrations is available that provides students with professional education in natural resource ecology and management.

The curriculum in natural resource ecology and management consists of a set of core courses taken by all students in the School of Renewable Natural Resources to assure the broad understanding of natural resource ecology, sustainability, policy, and management. The natural resource ecology and management curriculum has an additional set of required courses specific to concentrations within the curriculum. There is considerable flexibility within the degree program because areas of concentration target professional specialties, yet allow individual flexibility in course selection. Emphasis on hands-on problem-based learning, critical thinking, communication skills, and multidisciplinary team activities put students in "real-world" situations with current and anticipated problems that will better prepare students for successful careers.

Bachelor of Science in Natural Resource Ecology & Management

This degree program teaches students about the ecology and natural history of plant and animal populations and communities, specifically wildlife, wild and propagated fish (aquaculture), forests, and wetlands, to enable enhanced management and conservation of biotic resources following the latest developments in research and management practices. Students receive broad-based training in identification, natural history, population ecology, conservation biology, and policy and regulatory issues that will affect living natural resources. The curriculum is designed to prepare students for careers as professionals in a broad range of natural resource management disciplines. Students in natural resource ecology and management tailor their coursework to their career goals by choosing one of the nine areas of concentration: conservation biology, ecological restoration, fisheries and aquaculture, forest resource management, forest enterprise, wetland science, wildlife ecology, wildlife habitat conservation and management, and pre-veterinary wildlife.

Career opportunities for graduates of the natural resource ecology and management curriculum are available in state and federal agencies, non-governmental conservation organizations, private environmental consulting firms, forest and other natural resource industries, environmental law, and academic careers. Students often will pursue advanced degrees in the sciences, veterinary school, or law school before entering their career positions. Students pursuing the Bachelor of Science degree in natural resource ecology and management typically complete the educational requirements for graduates to be certified by The Wildlife Society, American Fisheries Society, Society of American Foresters, or Society of Wetland Scientists.

The conservation biology area of concentration is designed to educate students concerning ways to protect biodiversity, enhance the conservation of species of ecological concern, and improve the prospects for species considered threatened and endangered. This includes a broad base of training in ecology, taxonomy, the genetics of small populations, human dimensions of resource management, and the principles of population biology. Many students in this area of concentration will pursue advanced degrees prior to employment.

The ecological restoration area of concentration builds on this foundation for students planning a career with state, federal, or private entities in environmental and ecological monitoring, ecological restoration, or remediation work. Interest in the restoration of ecosystems disturbed by anthropogenic and natural causes is increasing. Coursework follows recommendations of the Society for Ecological Restoration including knowledge of plant and animal taxonomy, geographic information systems, and wetlands. Many students in this area of concentration will pursue advanced degrees prior to employment.

The fisheries and aquaculture area of concentration focuses on the ecology and management of aquatic resources in freshwater and marine ecosystems, as well as the production of economically and ecologically important species under controlled conditions. With numerous opportunities to gain research experience, students are well prepared to pursue graduate studies or careers in aquatic resource management in private industry, agencies, consulting firms, and aquatic resource advocacy groups. Coursework follows guidelines for professional certification by the American Fisheries Society upon graduation. Many students in this area of concentration will pursue advanced degrees prior to employment.

The forest enterprise area of concentration provides skills and theory to students planning to work in forestry consulting/engineering firms and the timber and wood products industry. Considerable forestry and timber production currently occurs on private lands and involves contracting among various harvesting, processing, and land management entities. Additionally, non-timber revenues, including wildlife leases and mitigative credits and incentive programs, require different experiences of students than traditional management. Knowledge of legal precedents, business planning, contracting, and ethical best management practices is in demand among environmental consulting/engineering firms and the timber and wood products industry.

The forest resource management area of concentration is intended for students primarily interested in managing forests as a sustainable natural resource. It is designed to provide students with an appreciation of numerous aspects of forest resource management including timber and non-timber resources and prepare them for employment with public or private entities in forest resource management. Coursework follows guidelines for professional certification by the Society of American Foresters upon graduation. The forest resource management area of concentration is accredited by the Society of American Foresters, which is the accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation as the accrediting agency for forestry in the U.S.

The pre-veterinary wildlife and fisheries area of concentration for students interested in applying to the LSU School of Veterinary Medicine, and who are interested in careers that focus on exotic animals and wildlife rather than the more traditional small and large animal practices. Health issues continue to be problems for state and federal resource agencies, and zoos and animal parks constantly deal with veterinary issues; all of these problems require people with both veterinary skills and a familiarity with a diversity of wildlife and the habitats that support them. Students may pursue a 3+1 program, in which the 4th year of the B.S. is completed during the 1st year of veterinary school. Students who do not enter veterinary school after their 3rd year will graduate in another area of concentration within the School. Students may apply again to veterinary school following graduation.

The wetland science area of concentration is designed for students who wish to specialize in wetlands, valued as wildlife and fish habitats, for maintaining water quality, contributions to wildlife and fisheries productivity in marine and freshwaters, and for other recreational, economic, and ecosystem benefits. Graduates can anticipate working for private or government agencies that manage, restore and/or regulate wetlands, for businesses that delineate wetlands, plan and manage mitigation banks, or plan and construct restoration projects. Coursework follows guidelines for professional certification by the Society of Wetland Scientists upon graduation. Many students in this area of concentration will pursue advanced degrees prior to employment.

The wildlife ecology area of concentration covers traditional management that focuses on wildlife populations, especially recreationally important game animals and socio-culturally important charismatic species of concern to the public. Recreational hunting is an important social and economic driver in Louisiana and throughout the United States. Scientifically based and principled management of wildlife on public and private lands continues to be a need. Students study the principles of population growth, theory, and practices concerning population exploitation, habitat requirements and methods of management, and the way that public policy influences wildlife resources. Coursework follows guidelines for professional certification by The Wildlife Society upon graduation. Many students in this area of concentration will pursue advanced degrees prior to employment.

The wildlife habitat conservation and management area of concentration is designed for students interested in conserving, managing, and restoring habitats to promote wildlife, fish, and habitat enhancement and increase biodiversity. Students will receive additional exposure into the theories and practice of forest land use and wetland classification and learn more about habitat manipulation and conservation strategies than in other areas of concentration in natural resource ecology and management. Students also will have the opportunity to take off-campus courses at Lee Memorial Forest and the Louisiana University Marine Consortium (LUMCON) through this area of concentration. Students in wildlife habitat conservation and management may anticipate employment with state or federal agencies that regulate and/or directly manage land and land uses, governmental agencies involved in restoration, and private environmental consulting firms that provide technical assistance to public and private landowners. Depending on coursework choices, student may qualify for professional certification by the Wildlife Society or the Society of American Foresters. Many students in this area of concentration will pursue advanced degrees prior to employment

Transportation for field trips is provided by the university but is financed by students. Field fees vary in amount, based on the cost of transportation, and are paid at the time of other university fees through the advanced billing system.

Conservation Biology

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022/MATH 1431.

SEMESTER 3: CHEM 1201.

SEMESTER 4: RNR 1001/RNR 1070; BIOL 1201.

SEMESTER 5: RNR 2101/RNR 2001.

BASIC SCHOLASTIC EXPECTATIONS

*Complete ENGL 1001 and one General Education Analytical Reasoning course within the first 30 hours of study.

*Maintain a cumulative and LSU GPA of 2.0.

*Students entering the program with 30 or more semester hours will take one more elective in place of AGRI 1001.

Semester 1

CRITICAL: MATH 1021.

AGRI 1001 Introduction to Agriculture (1)

ENGL 1001 English Composition (3)

MATH 1021 College Algebra (3)

BIOL 1201 Biology for Science Majors I (3)

BIOL 1208 Biology Laboratory for Science Majors I (1) ¹

RNR 1001 Natural Resource Conservation (3) or

RNR 1070 HONORS: Natural Resource Conservation (4)

RNR 1002 Issues in Natural Resource Management (1)

Total Semester Hours: 15

Semester 2

CRITICAL: MATH 1022/MATH 1431.

BIOL 1202 Biology for Science Majors II (3)

BIOL 1209 Biology Laboratory for Science Majors II (1) ¹

MATH 1022 Plane Trigonometry (3) or

MATH 1431 Calculus with Business and Economic Applications (3) ²

CHEM 1201 General Chemistry I (3)

General Education course - Arts (3)

General Education course - Humanities (3)

Total Semester Hours: 16

Semester 3

CRITICAL: CHEM 1201.

RNR 2039 Introduction to Renewable Natural Resource Policy (3) or

RNR 2071 HONORS: Introduction to Renewable Natural Resources Policy (4)

RNR 2101 Ecology of Renewable Natural Resources (3) or

RNR 2070 HONORS: Ecology of Renewable Natural Resources (4)

RNR 2102 Natural Resource Measurements and GIS (3)

CHEM 1202 General Chemistry (3)

Minor

Aquaculture Minor

This minor is open to all majors and areas of concentration except the natural resource ecology and management *fisheries and aquaculture* area of concentration.

To graduate with a minor in aquaculture (20-22 hrs.), students must complete the following: required courses (13 hrs.)—RNR 2002, RNR 4022, RNR 4025, and RNR 4037; *fisheries*—4-5 hours selected from the following course or course pairs: RNR 4023

and RNR 4106, RNR 4040 and RNR 4106, or RNR 4145; *plant taxonomy and ecology*—select one from: RNR 4020/BIOL 4020 or OCS 4308/BIOL 4308.

Fisheries Minor

This minor is open to all majors and areas of concentration except the natural resource ecology and management *fisheries and aquaculture* area of concentration.

To graduate with a *minor in fisheries* (24-25 hrs.), students must complete the following courses: *fisheries*—RNR 2002, RNR 4023, RNR 4025, RNR 4037, RNR 4040, RNR 4106, and RNR 4145; *plant taxonomy and ecology*—select one from RNR 4020/BIOL 4020 or OCS 4308/BIOL 4308.

Forestry Minor

This minor is open to all majors and areas of concentration except natural resource ecology and management areas of concentration in *forest enterprise, forest resource management, and wildlife habitat conservation and management*.

To graduate with a *minor in forestry*, students must complete the following: *forest biology*—RNR 2001, RNR 2003, RNR 2101; *silviculture*—RNR 3002, RNR 4001; *measurements*—RNR 2102, RNR 3103; *forestry electives*—select five hours from ENTM 4018/PLHL 4018; RNR 3105, RNR 4032, RNR 4033, RNR 4036, or RNR 4038.

Wildlife Ecology Minor

This minor is open to all majors and areas of concentration except the natural resource ecology and management *conservation biology and wildlife ecology* areas of concentration.

To graduate with a *minor in wildlife ecology* (19-21 hrs.), students must complete the following: (1) *required courses*—RNR 2101, RNR 2031, RNR 2039; (2) *area courses*—one course selected from the following: RNR 2102, RNR 3004, RNR 4011, RNR 4103, or RNR 4107; (3) *plant taxonomy*—one course or course pair selected from the following: RNR 2001 and RNR 2003, RNR 4020; BIOL 4041 or BIOL 4055; (4) *animal taxonomy*—one course selected from the following: RNR 3018, BIOL 4145 or BIOL 4141, BIOL 4142, BIOL 4146.

Agricultural Education (Intercollegiate Program)

CURRICULUM:

Agricultural Education

The major in Agricultural Education provides coursework in various areas of agriculture, including plant and animal sciences and agricultural economics. Professional education is offered through courses in methods and techniques for training youths and adults. Concentrations are available in Leadership and Communication as well as Teaching and Learning.

Students interested in the Agricultural Education major should contact the School of Human Resource Education & Workforce Development for deadlines and specific details about each concentration. Students interested in a teacher certification program other than agricultural education should contact the College of Human Sciences and Education.

Students who anticipate entering the Teaching and Learning concentration should inform the faculty advisor at the time the undergraduate program of study is being developed.

Admission Requirements

Leadership and Communication Concentration

Students meeting admissions requirements for the College of Agriculture are eligible for admission to the Leadership and Communication concentration. This concentration prepares students for working in agricultural business, for serving as county extension agents, for employee training in agricultural business and industry, and other professional positions in agriculture.

Teaching and Learning Concentration

The Teaching and Learning concentration in Agricultural Education is administered jointly by the College of Agriculture and the College of Human Sciences and Education. This teacher certification program prepares students specifically for teaching agricultural education in secondary schools (grades 6-12); however, teacher education graduates are also in demand for working in agricultural business, for serving as county extension agents, and other professional positions in agriculture. Students are admitted to the agricultural education teaching and learning concentration according to the following criteria.

Students must have a 2.50 cumulative and LSU grade point average and passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030. *Students from other LSU senior colleges who have completed a minimum of 24 semester hours with a 2.20 grade point average on all work taken are considered for provisional admission to the agricultural education teaching and learning concentration.*

Transfer students from accredited colleges and universities who have met the entrance requirements of the university, who are eligible for admission to a senior college, and who meet the requirements listed above will be considered for admission to the teacher education program.

A minimum grade point average of 2.50, cumulative and LSU, is required for entry into and continuation in upper (3000/4000) level human resource education courses, including student teaching.

Students on university warning or probation will not be admitted to the Teaching and Learning concentration.

Departments, Schools, and Curricula

School of Architecture

School of Art

Department of Interior Design

Robert Reich School of Landscape Architecture

The College of Art & Design is a community of engaged students and faculty committed to speculative endeavors in all aspects of the visual arts and design disciplines.

The college community's core is fundamental practices while recognizing the challenge of creative activity are met by mining the core of traditional disciplines and exploring the interstices between disciplines.

The college recognizes that critical investigations in art and design occur in a context of regional, national, and global concerns. These contexts are meaningful only when referenced to a framework of one's immediate cultural and physical context. The college faculty constructs these frames of reference through general education, discipline specific education, interdisciplinary investigations, creative activities, colloquia, and community outreach.

The college's student and faculty collaborators value inquiry-based learning, encourage a spirit of risk taking, excite an appetite for thinking and making, nurture a capacity to create, and passionately pursue the means to capitalize on the opportunities thereby presented.

As a key component of the arts and cultural community, the college advances the role of the artist/designer in the broader community through distinctive public education and exhibition programs that serve the citizens of Louisiana with an enriched appreciation of culture.

Degree Programs

The following undergraduate programs are offered by the College of Art & Design:

Architecture, BAR

Studio Art, BFA

Interior Design, BID

Landscape Architecture, BLA

Accreditation

The college has nationally accredited degree programs in architecture, art, interior design, and landscape architecture. The School of Architecture offers both a bachelor of architecture and a master of architecture accredited by the National Architectural Accrediting Board (NAAB). The School of Art's seven areas of concentration are accredited by the National Association of Schools of Art and Design (NASAD). The School of Art offers a Bachelor of Fine Art, a Master of Fine Art, and a Master of Art in Art History. The Department of Interior Design offers a Bachelor of Interior Design degree that is accredited by the Council of Interior Design Accreditation (CIDA). The Robert Reich School of Landscape Architecture offers both a Bachelor of Landscape Architecture and a Master of Landscape Architecture accredited by the Landscape Architecture Accreditation Board (LAAB).

Admission Requirements

Entering freshmen who meet the university's admissions standards and have a declared major in the College of Art & Design will be directly admitted to the College of Art & Design.

Units within the College of Art & Design have selective admission and retention policies that apply to degree programs in architecture, interior design, landscape architecture, and studio art. Students planning to apply to one of these programs should carefully review this catalog for special requirements and application deadlines. Entering freshmen admitted to the college but not to a specific program due to selective admissions will be advised on what courses to take to be competitive for future selective admissions. For students not directly admitted as freshmen, general requirements for entering the college are as follows:

From University College, other division of LSU, or by transfer from another college or institution • Students must have earned a minimum of 24 semester hours, with a 2.00 cumulative GPA, and they must be admitted to an Art & Design degree program.

Students transferring from another institution must also meet university transfer admission requirements.

Applicants will be required to submit a portfolio for admission to some degree programs. The extent to which transfer credits acceptable for admission to the university fulfill degree requirements will be determined by the college.

Readmission

Students who were not registered at LSU for the preceding regular semester must file a formal application for readmission.

Degree Requirements of the College

It is the student's responsibility to qualify for a bachelor's degree by meeting these requirements:

Complete 39 hours of general education courses as specified in a separate section of this catalog.

Complete one of the established curricula offered by this college. Any substitutions submitted for the curricula as published must have written approval of the department chair or school director and the dean's office.

Achieve a minimum GPA of 2.00 on all work taken in the LSU System and on all work taken at other institutions.

Complete a minimum of 30 semester hours in residence in the college. Independent and Distance Learning courses taken in the last 30 hours will not be considered for residence credit.

Complete the last 30 semester hours while in residence in this college on the LSU campus. Independent and Distance Learning courses taken in the last 30 hours will not be considered residence credit without prior approval of the department head and the dean of the college.

Initiate the graduation check-out procedure with the dean's office during the semester *prior* to the semester in which the degree is to be awarded.

Requirements for a Second Bachelor's Degree

Second degrees may be awarded at the bachelor's level in architecture, art, interior design, and landscape architecture. The program of study for the second degree must include a minimum of 30 semester hours of work beyond requirements for the first degree, including any degree requirements not previously met.

Enrollment in Two Degree Programs

With the dean's approval, a student may be enrolled in two degree programs concurrently. A student can enroll as a dual registrant using one of the following procedures.

Dual Enrollment Within the College of Art & Design—By completing residence and academic requirements, and earning 30 hours more than the degree requiring the fewer number of hours, a student will earn two separate bachelor's degrees.

Dual Enrollment in the College of Art & Design and in a Second Academic College—By completing residence and academic requirements for two degree programs and earning 30 hours over the degree requiring the fewer number of hours, a student can earn two bachelor's degrees.

The student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files will be maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

College Probation

In addition to university requirements, the College of Art & Design has these additional academic requirements:

Students who fail to earn a minimum 2.00 grade point average for any semester will be placed on college academic probation.

Students on academic probation for two consecutive semesters will not be permitted to continue their academic program and will be administratively dropped from the College of Art & Design. Students who have been dropped from the college may apply for readmission to the college and their academic program on a probationary basis once a 2.00 semester GPA and a cumulative 2.00 GPA is achieved. (Students should check individual programs for probation, separation, and readmission criteria.)

Special Provisions of the College

The pass-fail grading option is limited to courses that are electives in the degree programs.

Independent and Distance Learning Credit

Special restrictions apply to Independent and Distance Learning (IDL) credit used toward degree credit. Students who wish to have IDL credits accepted by this college must have approval from the dean's office prior to scheduling the courses.

Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL credit during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL credit during the summer term.

No more than 15 semester hours of IDL credit may be applied toward the degree requirements of the college. No more than six semester hours of IDL credit may be applied to a student's general education requirement.

Students may not be enrolled in IDL credit during the semester they plan to graduate.

Graduate Programs

The Master of Architecture, Master of Fine Arts, Master of Arts in Art History, and Master of Landscape Architecture are offered through the Graduate School. Consult "The Graduate School" section.

Minor Field Requirements (Optional)

Students in the College of Art & Design may pursue a minor field under the following guidelines:

Earn a minimum of 15-18 semester hours in the minor field, of which at least six semester hours must be in courses taken on this campus at the 3000- and/or 4000-level. See the individual curricula for specific courses.

Earn a minimum GPA of 2.00 in the minor field.

Courses used to satisfy minor requirements may not be taken on a pass-fail basis.

A minor field may be selected from any major field currently offered by the college in which appropriate requirements for a minor have been established.

Minors outside the college can be established, provided that the minor conforms to the guidelines noted above for minors in the college and the minor meets the guidelines established by the department, school, or college concerned.

Students who major in one of the studio art concentrations or students from other colleges may pursue an undergraduate minor in art history, ceramics, digital media AVATAR arts, fine art, printmaking, or sculpture. Minors in photography and painting are only open to art majors. Students from other colleges are not restricted from minors offered by the other disciplines within the College of Art & Design. Please check prerequisites for all courses.

Tau Sigma Delta

Tau Sigma Delta (ΤΣΔ) was founded in 1913 to recognize excellence in art and design education. It is a scholastic honor society open to students enrolled in accredited degree programs in architecture, landscape architecture, interior design, or art who have a minimum GPA of 3.00 and who rank in the upper 20 percent of the cohort in their discipline. The Alpha Zeta chapter at LSU performs service for the university and for the community at large through the creative work of its members. New members are initiated and honored in the spring semester, and wear identifying ΤΣΔ stoles on their academic gowns at commencement exercises.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

CURRICULUM:

Architecture

The School of Architecture, a member of the Association of Collegiate Schools of Architecture, offers professional degree programs at both the undergraduate and the graduate levels. Preparation for the profession of architecture requires both formal education and practical experience followed by a professional examination and registration.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U. S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Undergraduate Admission Requirements

Admission to the beginning design course in the NAAB accredited Bachelor of Architecture program (ARCH 1001) is selective and is based on high school academic GPA and ACT or SAT scores. Individuals who believe there are additional factors that should be considered in evaluating their applications are encouraged to contact the School of Architecture in writing and/or schedule an on-campus interview. High school students are strongly encouraged to apply prior to February 15 for admission into the following fall semester.

Students who have been approved for admission will be notified in writing. Students not admitted to the beginning design course will not be allowed to register for architecture courses other than those listed as general education courses.

Transfer students will be considered for admission to the architecture program and the beginning design course on a space-available basis. Admission is competitive. Transfer students are expected to have earned a minimum 2.75 GPA (on a 4-point scale, based on 30 hours or more). The review of transfer students will include a select number of students already enrolled at LSU who have applied to transfer into the architecture program. Transfer students are strongly encouraged to apply prior to February 15 for admission into the following fall semester.

Transfer credit for architecture courses as substitutions for required courses in the school's curriculum will be considered only if these courses have been taken as part of an architecture program accredited by the NAAB. Transfer students desiring credit for design studio courses will also be required to submit a portfolio for faculty evaluation.

Admission Requirements to the Third Year

There will be, prior to admission to the third year of study (upper division), a scholastic and portfolio review. No more than 36 students will be approved for advancement to the upper division each year. The School of Architecture reserves the right to deny admission to the third year of study based on this review.

Admission Requirements for the Fifth Year

Entrance to the fifth year will be granted only to those students who have successfully completed all required course work in years one through four. Admission to the fifth year will be in the fall semester only.

Graduate Program

Information on the Master of Architecture program, including admissions requirements, is available by contacting the school directly.

Personal Computer Requirement

Students are required to have their own personal computer upon entering the second year studio course. Contact the School of Architecture for information regarding type, specifications, and software.

Major

Architecture, B.Arch.

Architecture

CRITICAL REQUIREMENTS

SEMESTER 1: ARCH 1001.

SEMESTER 2: ARCH 1002; MATH 1022.

SEMESTER 3: ARCH 2001; ARCH 2003.

SEMESTER 4: ARCH 2002; ARCH 2006; PHYS 2001.

SEMESTER 5: ARCH 3001; ARCH 3003.

Recommendation: Take Summer School or Intersession classes to reduce semester loads.

In the architecture curriculum, normal course progress is imperative. A student failing to complete any required course more than one year later than the time designated in the curriculum is prohibited from advancement in the design studio sequence until the deficiency is corrected. All required courses listed through the senior year must be completed before a student is allowed to enroll in the designated fifth-year courses. Courses listed below are to be scheduled in the sequence in which they are listed.

Thirty-nine hours of general education courses must be completed as required by the university.

Semester 1

CRITICAL: ARCH 1001.

ARCH 1001 Architectural Design I (6)

ARCH 2401 Appreciation of Architecture (3)

ENGL 1001 English Composition (3)

General Education course - Natural Sciences (3)

Total Semester Hours: 15

Semester 2

CRITICAL: ARCH 1002; MATH 1022.

ARCH 1002 Architectural Design II (6) or

ARCH 1102 Honors: Architectural Design II (6)

MATH 1022 Plane Trigonometry (3)

General Education course - Social Sciences (3)

General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 3

CRITICAL: ARCH 2001; ARCH 2003.

ARCH 2001 Architectural Design III (6) or

ARCH 2101 Honors: Architectural Design III (6)

ARCH 2003 Architectural Techniques (3)

ARCH 2007 History of Architecture I (3)

PHYS 2001 General Physics I (3)

General Education course - Analytical Reasoning (3)

Total Semester Hours: 18

Semester 4

CRITICAL: ARCH 2002; ARCH 2006; PHYS 2001.

ARCH 2002 Architectural Design IV (6) or

ARCH 2102 Honors: Architectural Design IV (6)

ARCH 2006 Architectural Topics (3)

ARCH 2008 History of Architecture II (3)

ENGL 2000 English Composition (3)

General Education course - Social Sciences (3)

Total Semester Hours: 18

Semester 5

CRITICAL: ARCH 3001; ARCH 3003.

ARCH 3001 Architectural Design V (6) or

ARCH 3101 Honors: Architectural Design V (6)

ARCH 3003 Architectural Structures I (3)

ARCH 3007 Architectural Systems (3)

General Education course - Humanities (3)

Professional Elective (3)²

Total Semester Hours: 18

Semester 6

ARCH 3002 Architectural Design VI (6) or

ARCH 3102 Honors: Architectural Design VI (6)

ARCH 4007 History of Architecture III (3)

ARCH 3004 Architectural Structures II (3)

ARCH 3008 Environmental Control Systems (3)

Professional Elective (3)²

Total Semester Hours: 18

Semester 7

ARCH 4001 Architectural Design VII (6) or

ARCH 4101 Honors: Architectural Design VII (6)

ARCH 4031 Architectural Structures III (3)

ARCH 4062 Urban Design and Planning (3)

Professional Elective (3)²

Total Semester Hours: 15

Semester 8

ARCH 4002 Architectural Design VIII (6) or

ARCH 4102 Honors: Architectural Design VIII (6) or

ARCH 4202 Architectural Design VIII Off-Campus (6)

ARCH 5006 Professional Practice (3)

Professional Elective (3)²

Approved Elective (3)³

Total Semester Hours: 15

Semester 9

ARCH 5002 Architectural Design Concentration (6) or

ARCH 5102 Honors: Architectural Design Concentration (6) or

ARCH 5202 Architectural Design Concentration Off-Campus (6)

Approved Electives (6)³

Professional Elective (3)²

Total Semester Hours: 15

Semester 10

ARCH 5001 Comprehensive Architectural Design (6) or

ARCH 5101 Honors: Comprehensive Architectural Design (6)

ARCH 5005 Advanced Architectural Techniques (3)

Approved Electives (6)³

Total Semester Hours: 15

162 Total Sem. Hrs.

¹ - For General Education - Natural Sciences, both physical & life sciences must be taken: six hours in a physical/life science sequence; three hours in an area (phys/life) not previously selected. PHYS 2001 (required in the curriculum) is a General Education Natural Sciences course.

² - Professional Electives must be selected in consultation with a faculty advisor.

³ - Approved Electives must be selected in consultation with a faculty advisor.

Minor

Architectural History Minor

To graduate with a *minor in architectural history*, students must complete at least 18 hours of designated courses. To complete the minor, students are required to take ARCH 2401, ARCH 2007, ARCH 2008, ARCH 4007. In addition, to complete the required number of credits, students may select additional courses from the following list: ARCH 4051, ARCH 4440, ARCH 4155, ARCH 4062, ANTH 4440; ARTH 4404, ARTH 4405, ARTH 4406, ARTH 4412, ARTH 4422, LA 2201, LA 3201, ID 4741.

Community Design Minor

To graduate with a *minor in community design*, students must complete 18 hours of designated courses. Students are required to take ARCH 4062, ARCH 4072, ARCH 4700, ARCH 5008, and one elective selected from ARCH 4041, ARCH 4353, or ARCH 4440.

Heritage Conservation Minor

To graduate with a *minor in heritage conservation*, students must complete 18 hours of credit chosen from the following courses: ARCH 2401, ARCH 3000, ARCH 2007, ARCH 2008, ARCH 4090, ARCH 4155, and ARCH 4440. Of these, nine hours of credit must be chosen from the following courses: ARCH 4090, ARCH 4155, ARCH 4440.

School of Art

OFFICE 123 Art Building

CURRICULUM:

Studio Art

LSU is an accredited institutional member of the National Association of Schools of Art & Design. Through the College of Art & Design, the School of Art offers the professional BFA degree in Studio Art with concentrations in ceramics, digital art, graphic design, painting and drawing, photography, printmaking, and sculpture. In addition, students concentrating in these areas may minor in art history, ceramics, painting and drawing, photography, printmaking, sculpture, and visual communications. All studio art classes meet for two class hours per semester hour of credit. Outside of regular class time, students are expected to engage in a minimum of one additional hour of studio work per hour of credit.

Certain courses offered by the school require fees to defray the cost of consumable materials used by students. This information is included in the individual course syllabus.

Enrollment in certain required art courses may be restricted to "majors and minors only" early in the registration process.

Registration for all multiple credit courses taken for more than three credits in a given semester will require prior permission of the instructor.

Personal Computer Requirement

Students accepted into the Digital Art and Graphic Design curricula are required to have their own wireless Internet access laptop computer prior to entering the second year of study. Likewise, students admitted to the Visual Communications Minor are required to have their own laptop computer. Information regarding the type, specifications, and software may be obtained in room 123 Art Building or on the School of Art website.

Bachelor of Fine Arts Degree

The Bachelor of Fine Arts degree provides the liberal education and specialized instruction needed for a professional career in the visual arts.

Admission Requirements

Admission into the program for the Bachelor of Fine Arts in Studio Art is a selective two-part process. The first phase occurs when a student who is admitted by the Office of Undergraduate Admissions indicates a preference for studio art, where the primary tools for selecting candidates are high school academic GPA and ACT or SAT scores. However, students who think they would be better represented with an existing portfolio should contact the School of Art office to schedule an on-campus interview.

Students who are approved for admission into the Foundations Program will be notified in writing. Students who are not approved may choose to pursue a Minor in Fine Art.

The second phase of the admission process takes place upon conclusion of the first year with the completion of: ART 1011, ART 1012, ART 1847, and a course from the student's intended concentration, listed below. Students will submit a portfolio of creative work specified by their prospective area of concentration, based on art work produced in the required first-year foundation courses. The remaining foundation courses must be completed in the fourth semester. Students who pass the portfolio review may pursue their concentration and any studio art minor listed in the LSU General Catalog.

The Foundations Program

The Foundations Program is comprised of a total of eight courses (24 credits). Four of these courses are required for all students in the School of Art: ART 1011, ART 1012, ART 1360, and ART 1847. Another four courses should be selected from the following, with the student's future concentration in mind: ART 1661¹⁺³, ART 1762³⁺⁴, ART 1848^{1,2,3,4+ 6}, ART 1849⁴, ART 2050^{1,2,5+ 6}, ART 2655, ART 2995^{1,2,5+ 6}. Please find course descriptions in the *General Catalog* under ****COURSE SEARCH**** – *Art*; and review the degree path for each concentration you are considering.

¹ Required for the printmaking concentration.

² Required for the graphic design concentration.

³ Required for the ceramics and sculpture concentrations.

⁴ Required for the painting and drawing concentration.

⁵ Required for the photography concentration.

⁶ Required for the digital art concentration.

Transfer Students

Transfer students from other institutions will be considered for admission to the Studio Art program and/or Foundations Program on a space-available basis. The same applies to students already enrolled at LSU who wish to transfer into the Studio Art program. Transfer students are strongly encouraged to apply for admission by February 15 for entry in the fall semester.

Substitution credit for art courses taken elsewhere will be considered if they are equivalent to courses required for the curriculum in Studio Art. Consideration will also be given to courses taken through an art program accredited by NASAD. Additionally, transferring students are expected to submit a portfolio of work completed in relevant courses for evaluation by faculty within the chosen concentration.

"D" Grades and Repetition of Courses

Studio Art majors must pass all required art and art history courses with a grade of "C" or better. A student who earns a "D" or "F" must retake the course.

Studio Art Foundations (24 credits) • ART 1011, ART 1012, ART 1360, ART 1847. Completion of four of the following seven courses: ART 1661¹⁺³, ART 1762³⁺⁴, ART 1848^{1,2,3,4+6}, ART 1849⁴, ART 2050^{1,2,5+6}, ART 2655, and/or ART 2995^{1,2,5+6}

¹ Required for the printmaking concentration.

² Required for the graphic design concentration.

³ Required for both the ceramics and sculpture concentrations.

⁴ Required for the painting and drawing concentration.

⁵ Required for the photography concentration.

⁶ Required for the digital art concentration.

Studio Electives (6-15 credits)

Art History Requirements (15 credits) • ARTH 1440, ARTH 1441, three credit hours above 2000, and six credit hours above 4000

General Electives (0-6 credits)

General Education Requirements • See "Degree Requirements of the College." Thirty-nine hours of general education courses must be completed as required by the university.

Art Curricula Outside the School of Art

Other undergraduate degree programs in art are offered by academic divisions outside the College of Art & Design. The College of Humanities & Social Sciences offers a *Bachelor of Arts in Liberal Arts degree with a concentration in art history*. General

requirements for this degree may be found in the sections, "Degree Requirements of the College," and "Liberal Arts," in the "College of Humanities & Social Sciences" section of this catalog.

Students interested in pursuing this degree should confer with a counselor in the School of Art and the College of Humanities & Social Sciences. The art history area offers a wide range of courses in all major historical eras. Students graduating from the program are prepared to continue their education in graduate school or to enter a variety of related fields without additional training beyond the college level.

¹ - Recommended that ART 1012 be completed by the end of first year, second semester.

² - For Sculpture concentrations: nine hours required from Intermediate-level.

³ - For General Education Natural Sciences, both physical & life sciences must be taken: six hours in a physical/life science sequence; three hours in an area (phys/life) not previously selected.

⁴ - Recommended that at least six hours of Sculpture Electives be ART 4761.

Minor

Ceramics Minor

To graduate with a *minor in ceramics*, students must complete ART 1661, ART 1662, ART 2661 (repeated for six hours of credit), and six semester hours of ceramics courses at the 4000-level.

Digital Media AVATAR Arts Minor

To earn a *digital media AVATAR arts minor* a student must complete 21 credit hours of course work. These must include: CSC 1253 or CSC 1350; one course from ART 1001, ART 1011, ARTH 2470, MUS 1751, MUS 1799, ENGL 2009; nine credit hours of approved arts electives; three credit hours of approved engineering and/or science electives; and the three credit hour Art AVATAR capstone course, ART 4059.

Fine Art Minor

To graduate with a *minor in fine art*, students must complete ART 1001, ART 1008¹, ART 1009², ART 1010³; ARTH 1440 or ARTH 1441; and two of the following courses: ART 1360, ART 1551, ART 1661, ART 1762, ART 1848, ART 1849, ART 2050, ART 2655 and ART 2995.

¹ART 1008 is a prerequisite for ART 1360, ART 1551, ART 2050, and ART 2995.

²ART 1009 is a prerequisite for ART 1661, ART 1762, and ART 2655.

³ART 1010 is a prerequisite for ART 1360, ART 1848, and ART 1849.

Note: additional prerequisites may be required for the above courses. Please refer to the list of course descriptions in the "***COURSE SEARCH**" section to determine the proper sequence in which these courses must be completed.

Painting and Drawing Minor

To graduate with a *minor in painting and drawing*, students must complete ART 2879, ART 2881, ART 4880, ART 4881, ART 4889; and three credit hours from: ART 4882, ART 4884 or ART 4886.

Photography Minor

To graduate with a minor in photography, students must complete ART 2995, ART 2996, ART 3992, ART 3994, ART 4941, and three credit hours from: ART 4992, ART 4994, or ART 4997.

Printmaking Minor

To graduate with a *minor in printmaking*, students must complete ART 1360 and ART 2360, three additional credit hours of printmaking at the 2000 level, ART 4360 and six additional credit hours of printmaking courses at the 4000 level.

Sculpture Minor

To graduate with a *minor in sculpture*, students must complete ART 2761 and ART 4761 (repeated for nine credit hours each).

Visual Communications Minor

(only for students enrolled in the School of Mass Communication)

To graduate with a *minor in visual communications*, students must complete ART 1008, ART 1010, ART 2050, ART 2551, ART 4561, and three credit hours from: ART 1551, ART 2210, ART 2220, ART 2995, ART 2554, or ART 4020. Laptop computer required. Continuation in the visual communications minor is subject to portfolio review of work from ART 1008 and ART 1010.

CURRICULUM:

Interior Design

Bachelor of Interior Design Degree

The Bachelor of Interior Design curriculum at LSU is accredited by the Council for Interior Design Accreditation (CIDA, formerly FIDER).

Interior design involves shaping, planning, and furnishing interior spaces ranging in scale from single family residences to large commercial and institutional projects. Designers work with architects, developers, or private clients to create distinctive spaces that enhance the quality of life, increase productivity, and protect the health, safety, and welfare of the public. Specific requirements addressing education, practical experience, and professional examination regulate the practice of interior design in Louisiana and many other states. Opportunity exists within the profession to focus on specializations such as lighting, furniture and exhibition design, historic restoration, and set design.

Within the curriculum, creative problem solving, research and analysis, and graphic skills are emphasized. The design studios form the core of the educational experience. Complementing this strong emphasis on design are liberal arts, technical, professional, and communication course requirements. A required internship offers additional preparation and insight into the profession. Service learning and study abroad opportunities are promoted. An intensive senior capstone project is completed in the fourth year. Interdisciplinary work with other disciplines in the College of Art & Design is encouraged.

Admission Requirements

First-Year Admission • Entry into the first-year interior design foundation courses is selective. Incoming freshmen intending to major in interior design must apply for admission into the interior design foundation level. High school academic GPA and SAT or ACT scores are the determinants for entrance. Applicants with portfolios or other factors for consideration are encouraged to contact the Department of Interior Design and/or schedule an on-campus interview. Students should apply early as admission is competitive.

Students with the highest qualifications will be approved for pre-interior design admission and allowed to take the beginning design foundation courses. Students who have been selected for pre-interior design admission will be notified in writing. Transfer students and LSU students with a minimum 2.75 GPA will be considered for admission on a space available basis in the fall and spring semesters.

Admission for the Second Year • Admission into the professional program (years two through four) is competitive for the limited positions available. Admission is selective and is based on a scholastic and portfolio review. Applications are accepted only in the spring semester and must meet the following requirements:

Completion or enrollment in the first-year foundation courses (ID 1051, ID 1780, ART 1011, ART 1847)

Earned cumulative GPA of at least 2.75 at time of application

Portfolio of art and design work representative of required first-year foundation studio courses

Application forms, deadlines, instructions, and portfolio submission guidelines may be obtained in February in Room 402 Design Building, or on the Department of Interior Design's website (www.id.lsu.edu).

Qualified transfer students from CIDA-accredited interior design programs may be considered for upper level placement. Transfer students seeking credit for design courses must submit a portfolio for evaluation and are expected to have earned a cumulative GPA of at least 2.75. Students from two and three-year pre-professional programs are normally required to participate in the selective admission procedure. Credit earned from non-accredited programs may be accepted if it is determined to be equivalent. All transfer students are accepted on a space-available basis.

Personal Computer Requirement • After acceptance into the professional program (or the beginning of year two), students are required to have their own personal computer. Information may be obtained in Room 402 Design Building.

"D" Grades and Repetition of Courses • Interior design majors must pass the following courses with a grade of "C" or better: (1) all required College of Art & Design courses and approved professional electives; and (2) ENGL 2000.

Major

Interior Design, B.I.D.

Interior Design

CRITICAL REQUIREMENTS

SEMESTER 1: ART 1011 and ID 1780; 2.75 Cumulative GPA.

SEMESTER 2: ART 1847 and ID 1051; 2.75 Cumulative GPA; Admission to the professional program.

SEMESTER 3: ID 2750, ID 2774, ID 2781 and ID 2785.

SEMESTER 4: ID 2751, ID 2770 and ID 2775.

SEMESTER 5: ID 3752.

Recommend taking Summer Term classes to reduce semester loads.

* ECON 2000, ECON 2010, ECON 2030, or ECON 2031 is specified as a social science requirement.

*ARTH 1440 required in the Interior Design major also fulfills the general education arts requirement.

Semester 1

CRITICAL: ART 1011 and ID 1780; 2.75 Cumulative GPA.

ART 1011 Two-Dimensional Design (3)

ARTH 1440 Historical Survey of the Arts (3)

ENGL 1001 English Composition (3)

ID 1780 Interior Design Technical Drawing (3)

MATH 1021 College Algebra (3) or

MATH 1029 Introduction to Contemporary Mathematics (3)

General Education course - Natural Sciences (3)¹

Total Semester Hours: 18

Semester 2

CRITICAL: ART 1847 and ID 1051; 2.75 Cumulative GPA; Admission to the professional program.

ARTH 1441 Historical Survey of the Arts (3)

ART 1847 Drawing and Composition (3)

ID 1051 Introduction to Interior Design (3)

General Education course - Analytical Reasoning (3)

General Education course - Natural Sciences (3)¹

General Education course - Humanities (3)²

Total Semester Hours: 18

Semester 3

CRITICAL: ID 2750, ID 2774, ID 2781 and ID 2785. Due to the rigorous nature of design studios, recommend taking ID 2785 in the SUMMER prior to the third semester.

ARCH 2007 History of Architecture I (3)

ID 2750 Interior Design Studio I (4)

ID 2774 Interior Construction and Systems (3)

ID 2781 Interior Design Graphics (3)

ID 2785 Computer Visualization (3)

General Education course - Humanities (3)²

Total Semester Hours: 19

Semester 4

CRITICAL: ID 2751, ID 2770 and ID 2775.

ARCH 2008 History of Architecture II (3)

ENGL 2000 English Composition (3)

ID 2751 Interior Design Studio II (4)

ID 2770 Color and Illumination I (3)

ID 2775 Interior Materials, Finishes and Furnishings (3)

Total Semester Hours: 16

Semester 5

CRITICAL: ID 3752.

ID 3752 Interior Design Studio III (4)

ID 3761 Interior Design Internship (3) or

ID 4765 Interior Design Professional Residency (6)³

ID 3770 Color and Illumination II (3)

ID 4741 History of Interior Design (3)

ID 4761 Professional Practice (3)

General Education course - Natural Sciences (3)¹

Total Semester Hours: 19

Semester 6

Consult with faculty advisor to schedule ID focus electives.

ID 3782 Interior Design Construction Documents (3)

ID 3753 Interior Design Studio IV (4)

ID 4742 Interior Design Contemporary Issues and Theory (3)

General Education course - Social Sciences (2000-level) (3)

Approved Elective (3)⁵

Total Semester Hours: 16

Semester 7

ID 4720 Seminar in Interior Design (3)

ID 4754 Interior Design Studio V (4)

Interior Design Focus Elective (3)⁴

Approved Electives (6)⁵

Total Semester Hours: 16

Semester 8

ID 4755 Interior Design Studio VI (4)

ID 4756 Independent Study Project (3)

General Education course - Humanities (3)

General Education course - Social Sciences (3)

Total Semester Hours: 13

135 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be from the life sciences, and vice versa.

² - A communication studies course is specified as three hours of the humanities requirement. An English course is specified as three hours of the humanities requirement.

³ - MANDATORY INTERNSHIP: ID 3761 or ID 4765 - May be taken after Semester 4 but no later than the summer prior to Semester 7.

⁴ - INTERIOR DESIGN FOCUS ELECTIVE: Choose three hours from ID 4751, ID 4786, or ID 4772.

⁵ - APPROVED ART & DESIGN ELECTIVE: select from courses in ARCH, ART, ARTH, ID, and LA or with prior approval from the department. SIX SEMESTER HOURS MUST BE IN STUDIO COURSES. ART 1001 may not be used for degree credit.

CURRICULUM:

Landscape Architecture

Landscape architecture offers accredited professional degree programs at both the undergraduate and graduate levels. Preparation for the profession of landscape architecture requires both formal education and practical experience followed by professional examination and registration. LSU is the only school in Louisiana with an accredited program in landscape architecture, attracting students from the U.S. and overseas.

Landscape architecture is a discipline that combines the arts and sciences in a field involving the shaping of the landscape through design. It offers opportunities to students interested in art and design, the natural environment, construction technology, sustainability, cities, and urbanism. The five-year curriculum offers a well-rounded course of study based on standards set by the Landscape Architecture Accreditation Board. The program is a rich educational experience that provides students with a design education supported by studies in history and theory, representation, technology, and the natural sciences. Students may also complete the degree in a four-year accelerated program.

The Robert Reich School of Landscape Architecture offers many opportunities for students to travel and study abroad. Extensive field trips within the United States are part of the core curriculum and students are required to secure an internship or to take advantage of exchange programs, in their fourth year, either in the U.S. or abroad.

Graduates of this program find employment within Louisiana, throughout the United States, and abroad. Upon satisfactory completion of the undergraduate program, the degree Bachelor of Landscape Architecture is awarded.

Each year more than 30 students are selected to receive scholarships or other financial awards. Students interested in applying for aid offered by the Robert Reich School of Landscape Architecture should contact the school office.

Undergraduate Admission Requirements • A student will be admitted to the curriculum in landscape architecture subject to GPA, courses completed, and space availability.

Upper Division (3000-level courses). Admission into the third year of study is competitive, based on a scholastic and portfolio review. No more than 36 students will be approved for advancement to the upper division each year based on this review. Applicants must meet the following requirements to be considered for admission:

A 2.50 GPA on all courses completed and on all landscape architecture courses completed

Completion of required courses or their equivalents: ENGL 2000; GEOG 2050, GEOG 2051; LA 2002, LA 2101, LA 2201, LA 2301, LA 2401; MATH 1022.

Professional Courses (5000-level). Students must have successfully completed all required 1000-4000-level courses before they may enroll in 5000-level courses.

Transfer Students • Students seeking to transfer into the landscape architecture major may be admitted only after having been interviewed by the program coordinator. For credit in design studio courses, students must submit a portfolio for faculty evaluation. Credit for landscape architecture courses will be considered only if they were taken as part of an accredited landscape architecture program. Transfer students are strongly encouraged to apply prior to March 1 for admission in the following fall semester.

Personal Computer Requirement • Students are required to have their own personal computer upon entering the spring semester of first-year courses. Contact the Robert Reich School of Landscape Architecture for information regarding the type, specifications, and software.

"C" Grades • Landscape Architecture majors must pass all required College of Art & Design courses, all approved electives, and ENGL 2000 with a grade of "C" or better. A student who earns less than a "C" in one of these courses must repeat the course in the next regular semester in which the student is enrolled and the course is offered.

Major

Landscape Architecture, B.L.A.

Landscape Architecture

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in LA 1101; GEOG 2050 or GEOG 2051.

SEMESTER 2: "C" or better in LA 1102; GEOG 2050 or GEOG 2051.

SEMESTER 3: "C" or better in LA 2001; RNR 1001.

SEMESTER 4: "C" or better in LA 2002, LA 2301; 2.5 Cumulative GPA.

SEMESTER 5: "C" or better in LA 3001.

In this curriculum, sequential course progress is imperative. A student failing to complete any required course more than one year later than the time designated in the curriculum is prohibited from advancement in the design studio sequence until the deficiency is corrected. All required courses listed in the fourth year must be completed before a student will be allowed to enroll in the designated 5000-level courses. Students should complete these requirements by the end of their third year.

All elective courses must be approved by the school director or designated advisor.

Semester 1

CRITICAL: "C" or better in LA 1101; GEOG 2050 or GEOG 2051.

ENGL 1001 English Composition (3)

MATH 1021 College Algebra (3)

LA 1101 Landscape Representation I (3)

LA 1203 Views of the American Landscape (3)

GEOG 2050 Physical Geography: The Atmosphere (3) or

GEOG 2051 Physical Geography: Land and Water Surfaces, Plant and Animal Realms (3)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in LA 1102; GEOG 2050 or GEOG 2051.

GEOG 2050 Physical Geography: The Atmosphere (3) or

GEOG 2051 Physical Geography: Land and Water Surfaces, Plant and Animal Realms (3)

LA 1102 Landscape Representation II (3)

MATH 1022 Plane Trigonometry (3)

General Education course - Social Sciences (3)

General Education course - Humanities (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in LA 2001; RNR 1001.

LA 2001 Landscape Design I (6)

LA 2101 Landscape Representation III (3)

LA 2201 Landscape History I (3)

RNR 1001 Natural Resource Conservation (3)

General Education course - Social Sciences (3)

Total Semester Hours: 18

Semester 4

CRITICAL: "C" or better in LA 2002, LA 2301; 2.5 Cumulative GPA.

LA 2002 Landscape Design II: Site Design (6)

LA 2301 Landscape Technology I: Land Design (3)

LA 2401 Landscape Ecology (3)

ENGL 2000 English Composition (3)

General Education course - Arts (LA 1201, ARCH 2401, or other) (3)

Total Semester Hours: 18

Semester 5

CRITICAL: "C" or better in LA 3001. Note: Restricted admission to 3000-level studios based on 2.5 GPA; completion of required 1000- and 2000-level courses; and portfolio review.

LA 3001 Landscape Design III: Site Planning and Design (6)

LA 3301 Landscape Technology II: Grading, Drainage and Roads (3)

LA 3401 Plant Materials I (3)

Approved Elective (3)

Total Semester Hours: 15

Semester 6

LA 3002 Landscape Design IV: Community Design (6)

LA 3201 Landscape History II (3)

LA 3302 Landscape Technology III: Design Detailing (3)

Departments and Curricula

Department of Accounting	Department of Economics	Department of Finance	General Business (Interdepartmental Program)
Department of Information Systems & Decision Sciences	William W. and Catherine M. Rucks Department of Management	Department of Marketing	Public Administration Institute

Undergraduate Programs

The E. J. Ourso College of Business is Louisiana's premier public business school, committed to excellence in fostering learning and pursuing discovery in an intellectually diverse, global business environment. It serves its constituents in the following ways:

Making significant contributions to the advancement of knowledge in related business disciplines;

Delivering high quality degree programs that produce graduates who will excel in their respective fields of business;

Providing programs that strengthen the business skill sets of firms and institutions;

Making valuable contributions to the practice of business in related business disciplines; and

Engaging in other academic or applied programs and activities that advance business development in the State of Louisiana, the nation, and worldwide.

The E. J. Ourso College of Business offers specialized professional training in several areas of business in addition to a program of general business. All undergraduate degrees in the E.J. Ourso College of Business are Bachelor of Science degrees. The following programs are offered by the E.J. Ourso College of Business:

Accounting

Economics

Finance

General Business

Information Systems & Decision Sciences

International Trade & Finance

Management

Marketing

Each curriculum is constructed to ensure that students receive a broad general education and a sound foundation in the basic areas of business knowledge. At the same time, students may obtain limited specialization in a particular area of business. The objective of the college is to provide training in the functional fields of business so students will be qualified to hold positions of leadership, trust, and responsibility in business and industry.

The E. J. Ourso College of Business is a member school of the Association to Advance Collegiate Schools of Business (AACSB). Its undergraduate programs have been accredited continuously by the AACSB since 1931.

Graduate Programs

Master's and doctoral degrees are offered through the Graduate School by the various departments within the college. In addition, the following specialized master's degrees are offered. For information about these degrees consult "The Graduate School" section.

James C. & Cherie H. Flores Master of Business Administration Program

The combination of a general or a technical undergraduate education with a graduate-level Master of Business Administration degree is a widely recognized avenue to opportunity and success in the business world. To this end, the college offers an MBA program for students who aspire to management careers in business and industry. The program is open to those who hold degrees in humanities and social sciences or specialized fields such as engineering, geology, chemistry, physics, or agriculture, as well as to students with undergraduate degrees in business.

Master of Public Administration

The Master of Public Administration is a professional program for students interested in public management and/or public policy issues. The MPA program provides students with the management and financial skills to work in public agencies, non-profit organizations, private consulting and research organizations, and private companies in governmental relations. This program is administered by the Public Administration Institute. MPA students take 33 credit hours of core courses and nine credit hours in an area of specialization.

Undergraduate Admission Requirements

Students in good standing may apply for admission to the E.J. Ourso College of Business. Students transferring from another institution must also meet university transfer admission requirements. Application forms are available in Room 1053 Business Education Complex or online (www.business.lsu.edu). Students who are denied admission may reapply for admission in a subsequent semester.

Students are eligible for admission to the E.J. Ourso College of Business once they have successfully completed the following requirements:

Complete a minimum of 30 hours of university course work.

Complete the Pre-Business Core classes (ENGL 1001, MATH 1021 and MATH 1431, ECON 2000, ISDS 1102, and ACCT 2001) with a "C" or better. Students who place or test out of any of the Pre-Business Core classes will be given credit for successfully completing those classes.

Students majoring in accounting, finance, or management must meet the following GPA requirements at the time of their application for admission into the major:

A minimum 3.0 cumulative GPA

A minimum 2.5 LSU GPA

A minimum 2.5 business GPA

A minimum 2.5 LSU business GPA

Students majoring in economics, general business, international trade & finance, information systems and decision sciences, or marketing must meet the following GPA requirements at the time of their application for admission in to the major:

A minimum 2.0 cumulative GPA

A minimum 2.0 cumulative LSU GPA

A minimum 2.0 business GPA

A minimum 2.0 LSU business GPA

Maintenance Requirements

Continued enrollment in the E.J. Ourso College of Business is dependent upon satisfying the following requirements:

Maintain a cumulative GPA of 2.0 on all university course work.

Maintain a minimum LSU cumulative GPA of 2.0 on all LSU system course work.

Maintain a minimum 2.0 business GPA.

Maintain a minimum 2.0 LSU business GPA.

Maintain satisfactory academic progress towards the completion of the degree.

College Probation

A student will be placed on college probation and will be required to meet with an academic advisor in the dean's office for the following reasons:

The student's cumulative GPA falls below a 2.0 at the end of any academic semester.

The student's LSU GPA falls below a 2.0 at the end of any academic semester.

The student's business GPA falls below a 2.0 at the end of any academic semester.

The student's LSU business GPA falls below a 2.0 at the end of any academic semester.

The student fails to make satisfactory academic progress towards the completion of the degree.

A minimum 12-hour load is expected in the probationary semester. Students on *college probation* will have a college hold placed on their registration which will require them to schedule an appointment with a college academic advisor to register for classes for the next semester. The registration flag will be automatically removed after the student is taken off college probation. Students will be dropped from the college if they are not removed from college probation after one probationary semester.

Removal from the College

Students will be **dropped** from the E. J. Ourso College of Business for the following reasons:

Students placed on college probation and who fail to improve their GPA to the minimum maintenance standard after one probationary semester. Minimum maintenance standards are a 2.0 cumulative GPA, a 2.0 LSU GPA, a 2.0 business GPA, and a 2.0 LSU business GPA.

Students placed on college probation for failure to make satisfactory academic progress and who fail to make satisfactory academic progress during the probationary semester.

Readmission to the College

Students, who have been dropped from the E.J. Ourso College of Business for any reason, may reapply for admission to the college. Students who were not registered at LSU for the preceding regular semester must also file a formal application for readmission. All students applying for readmission will be subject to the admission requirements at the time of the readmission. Readmission to the E.J. Ourso College of Business is not automatic. Students seeking readmission are encouraged to schedule an appointment with a college academic advisor.

Degree Requirements of the College

The degree of Bachelor of Science will be conferred on E.J. Ourso College of Business students who complete one of the approved curricula with a 2.0 or better grade point average on all work taken and a 2.0 or better GPA on all business courses. The requirements above apply both to the total course work taken and to LSU course work.

A 2.0 or better grade point average is required in all accounting course work in order to graduate with a major in accounting. This requirement applies both to the total accounting course work taken and to LSU accounting coursework.

Twenty-four of the last 30 hours taken toward the degree must be earned in residence as a registrant in the E.J. Ourso College of Business at LSU. The university requires that all candidates for the bachelor's degree must fulfill a minimum residence requirement of at least 25 percent of the total number of hours required for the degree at this university.

The AACSB *Standards for Accreditation* state that "the school should require that at least 50 percent of the business credit hours required for the business degree be earned at the degree-awarding institution."

The student must complete a minimum of 120 semester hours in accordance with the following regulations.

Academic Work: 120 Semester Hours

All 3000/4000 level business courses, except ACCT 3001, ISDS 3115, MGT 3200, and MKT 3401 are restricted to students who have completed 60 hours of college-level course work. Many 3000/4000-level business courses have prerequisite requirements. Students are responsible for ensuring they have completed the necessary course prerequisites as stated in the most recent catalog prior to registration for a course.

All business majors must complete six hours of Oral and Written Communication courses. See "Departments and Curricula" for more details.

General Education Requirements for a Degree in Business

English Composition (6 hours)—ENGL 1001 with a grade of "C" or better; and ENGL 2000 with a grade of "C" or better

Analytical Reasoning (6 hours)— MATH 1021 and MATH 1431 with a grade of "C" or better; MATH 1023 may be substituted for MATH 1021. MATH 1550 or MATH 1551 may be substituted for MATH 1431. Students should refer to their chosen curriculum to determine the specific mathematics requirements. No student may receive more than nine semester hours of mathematics courses numbered below 1550.

Natural Sciences (9 hours)—Students must take three General Education Natural Science courses, two of which must be in a two semester sequence from the approved list of General Education Natural Science courses. A minimum of six hours must be in a physical or a life science course sequence and the remaining hours must be in an area other than that previously selected (i.e.,

both physical and life sciences must be taken). See those courses listed as General Education Natural Science courses in the catalog.

Arts (3 hours)—See those courses listed as General Education Arts courses in the catalog.

Humanities (9 hours)—See those courses listed as General Education Humanities courses in the catalog.

Social Sciences (6 hours)—ECON 2000 with a grade of "C" or better and ECON 2010.

Electives

Students may choose any degree credit courses offered by the university consistent with their specific degree requirements. However, no more than six hours may be selected from kinesiology activity courses, band, chorus, or music skills courses. Up to six semester hours in ROTC may be used as electives in all business curricula.

Transfer of Credit from Other Institutions

In the E.J. Ourso College of Business, transfer credits accepted by the Office of Enrollment Management: Undergraduate Admissions shall be valid for degree credit only to the extent to which they represent courses acceptable in the curricula of the college. The extent to which credit earned in other colleges and universities is accepted toward fulfilling degree requirements is determined by the office of the dean.

Transfer credit in which grades of "F" or "U" have been earned is not accepted toward fulfilling the degree requirements. For business courses, only transfer credit of a "C" or higher may be applied towards the degree. Students enrolled in this college who wish to obtain credits from other colleges or universities (including other campuses of the LSU System) and who plan to use such credits toward degree requirements should obtain prior approval in writing on a course-specific basis from the dean's office.

Independent and Distance Learning Credit

Students must have the permission of the dean of the college prior to scheduling Independent and Distance Learning (IDL) coursework.

Students who are taking classroom courses at the university may not take IDL courses. Students not enrolled in classroom courses during a given semester may be approved for IDL courses through the dean of the E.J. Ourso College of Business (Business Education Complex, Room 1053) and may enroll at the Office of Independent & Distance Learning (1225 Pleasant Hall; 578-3171). Enrollment in IDL courses must be completed by the final date for adding courses for any semester, including summer term.

The deadline for completion of all IDL course work is the last day of final examinations for the semester during which the student is enrolled. IDL coursework is restricted to non-business and non-departmental electives and up to six hours of General Education Arts and/or Humanities courses. No more than 12 semester hours of IDL credit may be applied toward the degree requirements of the college. A student must complete all IDL coursework before registering to receive a degree and no degree may be awarded during a semester in which a student is enrolled in an IDL course.

Graduation Requirements

Each student must see an advisor or counselor for a final degree checkout when there are approximately 30 hours remaining to complete the degree requirements. Students who complete degree requirements during spring intersession should plan to graduate in August and must inform the dean's office of this intention. Such students should see a counselor and register in the summer for "degree only." Students who complete degree requirements during winter intersession should plan to graduate in May and must inform the dean's office of this intention. Such students should see a counselor and register in the spring semester for "degree only." Students who complete degree requirements during summer intersession should plan to graduate in December and must inform the dean's office of this intention. Such students should see a counselor and register in the fall semester for "degree only."

Students who have completed courses at another college or university must have an official transcript covering this work on file in the Office of the University Registrar before registering for the degree.

Requirements for a Second Bachelor's Degree

To receive a second bachelor's degree from this college, students must:

reapply for and gain admission to the college;

complete two semesters in residence in the college;

meet all stated requirements for a BS degree in the college;

earn 30 additional hours of course work at the 3000-level or above, except when

the second degree program requires a 2000-level or below course, or

the course is in a language other than the student's native language.

Minor Field Requirements

General Business majors are required to complete an official university minor. Students majoring in other business areas have the option to pursue a minor. Minors may be selected from any of the minors approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs with the exception of the Business Administration Minor. Students in the E.J. Ourso College of Business must obtain permission from the Office of the Dean to pursue a minor.

Minor in Business Administration

The E.J. Ourso College of Business also offers a *minor in business administration*. To graduate with a *minor in business administration*, students must complete 18 hours consisting of the following courses: ACCT 2000 or ACCT 2001; ECON 2030; FIN 3715; ISDS 1100; MGT 3200; MKT 3401. Students must have a 2.0 GPA in the courses used to satisfy the minor. At least nine semester hours must be taken on this campus and, of the nine hours, three must be at the 3000- or 4000-level. This minor is **NOT** available to students in the E.J. Ourso College of Business.

Placement Service

The university maintains a professionally staffed Career Services office located in B-4 Coates Hall. Interviews are conducted throughout the year. The mission of Career Services is to assist students and alumni in choosing careers, obtaining career-related work experiences while in school, developing job search skills, and securing employment or admission to graduate or professional school.

Beta Gamma Sigma

Membership in *Beta Gamma Sigma* is one of the highest forms of recognition at the national level that a student can receive in an undergraduate or master's program in business or management. To be eligible for membership, a student must rank in the upper 10 percent of the junior class (second semester), upper 10 percent of the senior class, upper 20 percent of the graduating master's class, or must have completed all requirements to receive a doctorate. Transfer students must complete one full year as a full-time student at LSU to qualify for membership. Members are elected to membership and publicly recognized during the Spring Awards Ceremony.

Beta Gamma Sigma has three purposes: to encourage and reward scholarship, to promote advancement of education in business, and to foster integrity in the conduct of business operations.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

General Minor

Business Administration Minor

To graduate with a *minor in business administration*, students must complete 18 hours consisting of the following courses: ACCT 2000 or ACCT 2001; ECON 2030; FIN 3715; ISDS 1100; MGT 3200; MKT 3401. Students must have a 2.0 GPA in the courses used to satisfy the minor. At least nine semester hours must be taken on this campus and, of the nine hours, three must be at the 3000 or 4000 level. This minor is **NOT** available to students in the E. J. Ourso College of Business.

Elective (3)⁶

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - GENERAL EDUCATION NATURAL SCIENCE REQUIREMENT: If two course sequence is taken in the physical science, the additional three hour course must be taken from the life sciences, and vice versa.

² - Oral and Written Communication Requirement 1: Choose from CMST 2060, CMST 2061 or CMST 2064. A Communication Intensive (C-I) course may be substituted for the Oral and Written Communication Requirement with permission from an academic advisor.

³ - Business students cannot receive credit for ACCT 2000, ECON 2030, FIN 3715 or ISDS 1100.

⁴ - Oral and Written Communication Requirement 2: Choose from CMST 2060, CMST 2061 or CMST 4113. A Communication Intensive (C-I) course may be substituted for the Oral and Written Communication Requirement with permission from an academic advisor.

⁵ - Choose nine hours of 3000-4000 level finance electives from FIN, ACCT, or ECON courses, consistent with career objectives. At least one course must be in FIN.

SUGGESTIONS: For investments: FIN 3910, FIN 4828, FIN 4830, FIN 4850, or FIN 3845. For real estate: FIN 3352 or FIN 3353. For internal auditing: ACCT 3233 (ACCT elective + ACCT 4234 (approved elective). For information systems: ACCT 3122 (ACCT elective), ISDS 3100 + ISDS 3110/ISDS 4120 (approved electives).

⁶ - BUSINESS ELECTIVES: to be selected from the 3000 or 4000 level offerings of the following departments: ACCT, BADM, BLAW, ECON, FIN, GBUS, MGT, MKT, and ISDS.

ELECTIVES: See "Electives" under "Degree Requirements of the College."

NOTE: FIN 3716 is the prerequisite to most upper-level finance courses and should be scheduled in the junior year.

Minor

Personal Investing Minor

To graduate with a *minor in personal investing*, students must complete 15 hours consisting of the following courses: FIN 1060; FIN 2060; FIN 3715 or FIN 3716; three hours chosen from: FIN 3351, FIN 3352, FIN 3353 or a departmentally approved real estate elective; three hours chosen from FIN 3440, FIN 3460 or a departmentally approved insurance elective; three hours chosen from FIN 3632, FIN 3636, FIN 3718 or a departmentally approved institutions elective; and FIN 4060 (1 hr. capstone). Students must have a 2.0 GPA in the courses used to satisfy the minor. At least nine semester hours must be taken on this campus. This minor is **NOT** available to finance majors.

² - Oral and Written Communication Requirement 1: Choose from CMST 2060, CMST 2061 or CMST 2064.

Oral and Written Communication Requirement 2: Choose from CMST 2060, CMST 2061 or CMST 4113.

A Communication Intensive (C-I) course may be substituted for the Oral and Written Communication Requirement with permission from an academic advisor.

³ - Business students cannot receive credit for ACCT 2000, ECON 2030, FIN 3715 or ISDS 1100.

⁴ - APPROVED MANAGEMENT ELECTIVES: A list of approved electives is available from the Rucks Department of Management and is posted on the Rucks Department of Management website.

⁵ - BUSINESS ELECTIVES: to be selected from the 3000 or 4000 level offerings of the following departments: ACCT, BADM, BLAW, ECON, FIN, GBUS, MGT, MKT and ISDS.

ELECTIVES: See "Electives" under "Degree Requirements of the College."

Human Resource Management

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ISDS 1102 and ENGL 1001; 2.5 Cumulative GPA.

SEMESTER 2: "C" or better in ECON 2000 and MATH 1431; 2.5 Business and 2.75 Cumulative GPA.

SEMESTER 3: "C" or better in ACCT 2001; ECON 2010; 2.5 Business and 2.75 Cumulative GPA .

SEMESTER 4: ISDS 2000; ACCT 2101; 2.5 Business and 3.0 Cumulative GPA; Admission to the College.

SEMESTER 5: "C" or better in ENGL 2000; ISDS 2001; 2.5 Business and Cumulative GPA.

Semester 1

CRITICAL: "C" or better in ISDS 1102 and ENGL 1001; 2.5 Cumulative GPA.

Minor

Entrepreneurship Minor

To graduate with a *minor in entrepreneurship*, students must complete 18 hours consisting of the following courses: MGT 2000; MGT 3111; MGT 4113 and nine additional hours to be chosen from: MGT 4120, MGT 4114, or departmentally approved electives. Students must have a 2.0 GPA in the courses used to satisfy the minor. At least nine semester hours must be taken on this campus and, of the nine hours, at least three must be at the 3000 or 4000 level. The entrepreneurship minor is **NOT** available to students majoring in Management with an Entrepreneurship concentration.

The Public Administration Institute provides an interdepartmental administrative framework for the study of public administration, public management, and public policy at LSU. Academic programs, research activities, and public service endeavors are included in the mission of this institute.

The academic program is the Master of Public Administration. Research activities include organizing major studies of importance to state and local governments. Public service activities include serving on state commissions, providing executive sessions for top state management, and working with state agencies on major issues of importance to the state.

The Public Administration Institute coordinates a dual MPA/JD degree program with the LSU Law Center. See "The Graduate School" section for more information.

Departments and Curricula

Departmental of Environmental Sciences

Department of Oceanography & Coastal Sciences

The *School of the Coast & Environment (SC&E)* includes two academic departments - Department of Environmental Sciences and Department of Oceanography & Coastal Sciences. The school administers undergraduate and graduate degrees and facilitates the development of innovative research programs leading to a better understanding of coastal and environmental systems worldwide.

The *B.S.* degree program in *Coastal Environmental Science* is the only academic program focusing on coastal environmental sciences in the Southern Gulf states. This degree program provides undergraduates with a solid math and science based curriculum that prepares students for graduate programs in a broad choice of advanced fields of study, professional programs in medicine, veterinary medicine, dentistry, or law, and careers in environmental sciences, environmental planning and management, oceanography, coastal and marine sciences, and wetland studies. During the junior and senior years, students may choose one of four areas of specialty for their upper division courses and have the opportunity to perform an independent

research project in an environmental or coastal science related field. Diversity in the upper division curriculum enables students to focus on courses and areas of study that will help them pursue their desired future careers, whether that is in additional biological and medical studies, environmental toxicology, environmental chemistry, coastal restoration and management, or environmental law. This undergraduate degree program is hosted jointly by the Department of Environmental Sciences and the Department of Oceanography & Coastal Sciences.

The School of the Coast & Environment and the LSU Law School share faculty and programs in environmental law, energy, and the environment.

For specific information concerning undergraduate degree requirements for the *BS in Coastal Environmental Science*, refer to the curriculum within the departmental sections above. Detailed information about graduate degree programs in Environmental Sciences or Oceanography & Coastal Sciences may be found in "The Graduate School" section.

Admission Requirements

Students who are considering a BS in Coastal Environmental Science should pay special attention to the mathematics and science courses they select and should consult a representative of the program prior to their initial registration. Students will be admitted to the program when they have earned 24 or more semester hours of credit in courses numbered 1000 or higher; maintained a GPA of at least 2.00 on both LSU and cumulative averages; and have passed all courses in mathematics and science with a grade of "C" or better, or received special approval from the dean of the school.

Students transferring from another institution must meet university transfer admission requirements. Transfer students must also meet the current admission requirements of the school and receive approval from the dean of the school.

Students who, after initial enrollment in this school, wish to obtain credit for courses taken at other accredited institutions, and who plan to use this course credit toward their degree requirements, must obtain approval from the dean.

Degree Requirements

It is the student's responsibility to qualify for the bachelor's degree by meeting the following requirements:

Meet the university's general education course requirements.

Achieve a "C" or better in all science and mathematics requirements.

Achieve a 2.00 GPA, as required by the university, for all work taken at LSU and on all work attempted at U. S. institutions.

Successfully complete a minimum of 30 hours of residence in the Coastal Environmental Science program. These hours are included in the university requirement that a minimum of 25 percent of hours applied toward the degree be earned at LSU.

Six hours of ROTC may be allowed for degree credit as long as they are taken at 3000-level or above.

Minor Field Requirements (Optional)

The Department of Oceanography and Coastal Sciences offers a minor in *oceanography and coastal sciences*. Students majoring in Coastal Environmental Science may *not* choose oceanography and coastal sciences as a minor.

The Department of Environmental Sciences offers an undergraduate minor in *environmental sciences*. This minor provides students with a background in fields of science immediately relevant to problems facing modern society. Students majoring in diverse fields of study will gain an understanding of the broad field of environmental sciences.

It should be noted that students may be eligible for undergraduate minors in both *chemistry* and *biological sciences* depending upon the courses selected. See the "College of Science" curriculum notes for specific requirements regarding minors in these programs.

College Probation

A student in the School of the Coast & Environment who fails to earn a 2.00 semester GPA in a regular semester will be placed on college probation. In addition, students who fail to meet the school academic requirements noted in the section on degree requirements, or who enter the school with deficiencies, may be placed on college probation. At the discretion of the dean, a student who is on college probation and fails to meet the academic requirements, including earning a 2.00 or better semester GPA, may be declared ineligible to continue in the School at the end of a regular semester. A student on college probation who does earn a 2.00 or better semester GPA, who remediates course deficiencies, and who makes satisfactory progress in the degree program will be removed from college probation at the end of a regular semester or summer term.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

The *Department of Environmental Sciences* is a multidisciplinary research and academic unit whose mission is to provide the academic talents and knowledge needed to solve environmental problems that are important to Louisiana, the Gulf of Mexico region, and comparable areas throughout the nation and the world.

The department is committed to undergraduate and graduate education and offers a variety of courses relating to the environment. Faculty from other academic units participate in teaching some of the department's courses. Likewise, departmental faculty serve as adjunct faculty in several departments that offer bachelor, master, and doctoral programs.

At the graduate level, the Department offers the MS and PhD in environmental sciences and a PhD minor in environmental sciences. In order to provide students with a holistic training to meet today's environmental challenges, the graduate curriculum is organized according to three priority areas: (a) Biophysical Systems (coupled biological and physical systems); (b) Environmental Planning and Management (coupled human and natural systems); and (c) Environmental Assessment and Analysis (coupled people and technology). The MS program consists of thesis and professional options.

In addition, the department jointly offers, with the Department of Oceanography & Coastal Sciences, a minor in wetlands science and management at the graduate level. Collaborative graduate programs with Southern University and LSU-Shreveport are also available.

Research activities within the department include environmental assessment and resource sustainability, environmental microbial ecology, molecular phylogenetics, water pollution and water quality, phytoplankton ecology, bioremediation, environmental management, environmental toxicology, genetic toxicology, environmental regulations, policy development, hazardous waste management, development of mobile analytical instrumentation, the environmental impact of toxic chemicals, remote sensing, geographic information science, environmental health, and environmental decision-making.

For additional information, see the section "The Graduate School" in this catalog and the Department of Environmental Sciences website.

An undergraduate major in coastal environmental science (a Bachelor of Science degree) is offered through the department. The degree is jointly hosted with the Department of Oceanography & Coastal Sciences.

Major

Coastal Environmental Science, B.S. CES.

Areas of Concentration

Applied Coastal Environmental Science

CRITICAL REQUIREMENTS

SEMESTER 1: Credit in MATH 1022/MATH 1023; 2.0 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in CHEM 1201; "C" or better in ENGL 1001; 2.0 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in BIOL 1201; 2.0 Cumulative and LSU GPA.

EMS 4020 Quantitative Risk Assessment (3)

Additional Information

Additional courses numbered 3000 and higher outside of the coastal environmental science program may be substituted as approved CES electives with prior written approval from the CES program undergraduate advisor. Many departments at LSU offer courses with an environmental emphasis or closely related topic. Please check with your advisor and the *General Catalog* for options.

Undergraduate research (ENVS 3999 or OCS 3999) may also be taken as an approved coastal environmental science elective in the applied environmental science area of concentration. Undergraduate research requires an agreement between the student and a faculty member in the School of the Coast & Environment. Students may get credit in one of the areas of emphasis above for undergraduate research based on the faculty member's area of expertise. Contact the undergraduate program advisor for information about possible mentors.

It should be noted that students successfully completing requirements in BIOL 2153, BIOL 4087, and CHEM 4150 (or ENVS 4101) might be eligible for undergraduate minors in both chemistry and biological sciences. See the College of Science curriculum notes for specific requirements regarding minors.

Students majoring in coastal environmental sciences are not eligible to minor in either environmental sciences or in oceanography and coastal sciences.

Minor

Environmental Sciences Minor

The minor in environmental sciences provides students with a background in fields of science immediately relevant to problems facing modern society. Students majoring in diverse fields of study will gain an understanding of the broad field of environmental sciences.

To graduate with a *minor in environmental sciences*, students must complete 15 hours of coursework as follows:

Required core courses (12 hrs): ENVS 1126 (or ENVS 1127), and one course from each priority area A, B, and C.

Biophysical: ENVS 4035 (or ENVS 4036), ENVS 4101, ENVS 4477 & ENVS 4600.

Planning & Management: ENVS 4261, ENVS 4262, ENVS 4264, & ENVS 4266.

Assessment & Analysis: ENVS 3102, ENVS 4145, ENVS 4149 & ENVS 4900.

Students must also select one additional ENVS course (three hrs.) from the above listing, or ENVS 3999, or any 2000-level or higher courses approved by the department.

It should be noted that students may be eligible for undergraduate minors in both *chemistry* and *biological sciences* depending upon the courses selected. See the College of Science curriculum notes for specific requirements regarding minors in these programs.

For information regarding the GRADUATE PROGRAM, click [here](#).

The *Department of Oceanography & Coastal Sciences* offers Bachelor of Science, Master of Science, and Doctor of Philosophy degrees and supports the expansion of marine-related instruction in other academic departments. Research and instruction in the department is focused on fundamental understanding and practical application of knowledge of the physical, chemical, biological, geological, and meteorological processes that affect those environments usually identified as marine, coastal, or estuarine.

The extensive marshes and estuaries of Louisiana (40 percent of the coastal wetlands in the United States) and the adjacent continental shelf, impacted by natural and anthropogenic activity, serve as a vast natural laboratory for much of the field research conducted by faculty and graduate students. Research activity is carried out not only in Louisiana but also at such regional, national, and international sites as Florida Bay, the Everglades, the Orinoco River delta, and estuaries and coastal waters of Central America, Denmark, France, and China.

Admission to the graduate program in oceanography and coastal sciences requires admission to the Graduate School and a bachelor's or graduate degree in science or engineering from an accredited institution. Because of the nature of the fields of oceanography and coastal sciences, successful applicants to the program must first be accepted by a faculty member who will serve as their major advisor. Students interested in the department's program are, therefore, encouraged to contact faculty members who work in the student's field of interest. A description of all courses offered by the department is included in this catalog. In addition all students are required to have successfully completed differential and integral calculus. If an applicant has not completed these requirements by the time of enrollment in the Department of Oceanography and Coastal Sciences, they will be required to do so during their first year at LSU.

Additional Information

Additional courses numbered 3000 and higher outside of the coastal environmental science program may be substituted as approved CES electives with prior written approval from the CES program undergraduate advisor. Many departments at LSU offer courses with an environmental emphasis or closely related topic. Please check with your advisor and the *General Catalog* for options.

Undergraduate research (ENVS 3999 or OCS 3999) may also be taken as an approved coastal environmental science elective in the applied environmental science area of concentration. Undergraduate research requires an agreement between the student and a faculty member in the School of the Coast & Environment. Students may get credit in one of the areas of emphasis above for undergraduate research based on the faculty member's area of expertise. Contact the undergraduate program advisor for information about possible mentors.

It should be noted that students successfully completing requirements in BIOL 2153, BIOL 4087, and CHEM 4150 (or ENVS 4101) might be eligible for undergraduate minors in both chemistry and biological sciences. See the College of Science curriculum notes for specific requirements regarding minors.

Students majoring in coastal environmental sciences are not eligible to minor in either environmental sciences or in oceanography and coastal sciences.

Minor

Oceanography & Coastal Sciences Minor

The Department of Oceanography and Coastal Sciences offers a minor in *oceanography and coastal sciences*. Requirements for the minor are completion of OCS 2007 and OCS 2008 with a grade of "C" or better (8 hours) and completion of at least 10 additional credit hours of approved electives with a grade of "C" or better, at least six hours of which must be at the 3000 level or higher.

Students majoring in coastal environmental science may *not* choose oceanography and coastal sciences as a minor.

Departments, Schools, and Curricula

All curricula meet the university general education requirements with explicit course requirements and approved electives.

All technical electives must have approval of the chair of the engineering department in which the student registers. Under no circumstances may electives be chosen from remedial courses or courses that are preliminary to the first courses in engineering. Examples of such courses are MATH 1021, MATH 1022, etc. Students are advised to check with their departments on the selection of these electives.

Department of Biological & Agricultural Engineering	Gordon A. and Mary Cain Department of Chemical Engineering	Department of Civil & Environmental Engineering	Department of Construction Management
School of Electrical Engineering & Computer Science	Department of Mechanical & Industrial Engineering	Craft and Hawkins Department of Petroleum Engineering	

Engineering is defined by the American Society for Engineering Education as "...the profession in which a knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to utilize the materials and forces of nature economically for the benefit of mankind." Consistent with this definition, the College of Engineering prepares individuals for professional careers in engineering research, development, design, operation, or management industry, business, education, and government. This preparation is accomplished through education in a chosen engineering discipline consisting of general education fundamentals and design, mathematics, physical and life sciences, English composition, the arts, humanities, and social sciences.

The college also offers degrees in computer science and in construction management. The computer science degree program is a rigorous plan of study that provides the strong theoretical and applied background necessary for solving diverse problems related to software development. The construction management program establishes a unique plan of study into the business side of construction by combining engineering, design, business, finance, law, and technical courses with emphasis in the different industry types – industrial, commercial, highway, and residential construction.

The College of Engineering includes seven degree granting departments, the Center for Geoinformatics, the Center for Rotating Machinery, the Hazardous Substance Research Center (South and Southwest), the Louisiana Transportation Research Center, the Louisiana Water Resources Research Institute, Energy Frontier Research Center, Gulf Coast Research Center for Evacuation and Transportation Resiliency, and the Turbine Innovation and Energy Research Center. The faculty is actively engaged in design, research, and problem solving in well-equipped facilities for research and teaching.

Degree Programs

The following undergraduate programs are offered by the College of Engineering:

Biological Engineering, BSBE

Chemical Engineering, BSCHE

Civil Engineering, BSCE

Environmental Engineering, BSEVE

Construction Management, BSCM

Industrial Engineering, BSIE

Electrical Engineering, BSEE

Computer Engineering, BSEE

Computer Science, BS

Mechanical Engineering, BSME

Petroleum Engineering, BSPE

Proficiency Requirements

Mathematical proficiency is essential to engineers and to engineering education. Accordingly, students who plan to study engineering should schedule all appropriate mathematics courses available to them in high school. Placement tests are given to all incoming freshmen, and those who do not qualify to begin university mathematics at the level prescribed in the freshman engineering program cannot expect to complete requirements for a degree in the nominal length of time. Credit for mathematics courses preliminary to analytical geometry and calculus cannot be applied toward the engineering degrees in the College of Engineering.

Proficiency in college-level mathematics and physics is essential to successful completion of upper-division engineering courses. Engineering students must earn a minimum grade of "C" in MATH 1550, MATH 1552, and PHYS 2110 before they enroll in any engineering course numbered above 2999. However, CE 3700, IE 3201, IE 4462, and PETE 3025 may be taken.

English proficiency is defined as a grade of "C" or better in all required English courses in the student's curriculum (ENGL 1001 and ENGL 2000).

More stringent requirements may be imposed by individual departments. Refer to the curricular requirements of each department.

Admission Requirements

Admission to the university does not constitute acceptance into the College of Engineering or into a particular curriculum within this college. Where enrollment may exceed the facilities of a department, it may be necessary to limit the size of the classes in that curriculum. In such cases, the department establishes criteria for admission with approval of the university administration.

Students may enter the college from University College or by transfer from another division of LSU or from another approved college or university.

Students in the *LSU Center for Freshman Year* who meet the following criteria will be admitted to the college:

24 or more semester hours of earned credit in courses numbered 1000 or above;

LSU and cumulative GPA of 2.00 or better;

credit in MATH 1550 with a grade of "C" or better.

Petroleum Engineering majors must meet all College of Engineering admissions requirements and have a minimum 2.8 GPA in all courses that apply to the petroleum engineering degree.

Other students seeking admission from another division of LSU or by transfer from another college or university must also meet the above requirements. Students with more than 60 hours attempted will be considered for admission on the basis of the dean's evaluation of the entire academic record. Students transferring from another institution must also meet university transfer admission requirements as detailed in this catalog in the "Undergraduate Admissions" chapter.

Transfer of Credit from Other Institutions

In this college, transfer credits accepted by the Office of Enrollment Management shall be valid for degree credit only to the extent to which they satisfy courses in the curricula of the college. Transfer credits in junior and senior engineering courses will be accepted only if taken in programs accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Credit in courses in which grades of "D" have been earned is not accepted for transfer toward the degree requirements, if the course is taken outside the LSU System. Students enrolled in this college who wish to obtain credits from other colleges or universities (including other campuses of the LSU System) and who plan to use such credits toward degree requirements should obtain *prior approval* in writing on a specific-course basis from the dean's office.

Readmission

A student seeking readmission to this college must submit an application for admission. The dean, with recommendation of the department in which the student seeks admission, will determine whether readmission is granted and may prescribe the conditions for reinstatement.

Degree Requirements

It is the student's responsibility to qualify for the bachelor's degree by meeting these requirements:

Completing one of the established curricula—any substitutions from the curricula as published must have written approval of the department chair and the dean's office.

Achieving a 2.00 average, as required by the university, for all work taken at LSU and on all work attempted at U.S. institutions.

Achieving a 2.00 average on all courses attempted in the major department at LSU and on all work attempted in the major field at U.S. institutions (with the exception of certain courses offered by the major departments for non-majors only). Civil engineering students must achieve a 2.00 average in all civil engineering (CE) and environmental engineering (EVEG) courses and on all work completed in the major field at U. S. institutions. Environmental engineering students must achieve a 2.00 average in all chemical engineering (CHE), civil engineering (CE), and environmental engineering (EVEG) courses and on all work completed in the major field at U.S. institutions. Industrial Engineering students must achieve a 2.0 average in all industrial engineering (IE) courses and construction management (CM) courses.

Successfully completing a minimum of 30 hours of residence in the College of Engineering. These 30 hours are included in the university requirement that a minimum of 25 percent of the hours applied toward a degree be earned while in residence at the university. (These residence hours must include 15 hours of required major department courses or approved technical electives at the 3000- or 4000-level. Students must complete nine hours of these courses at the 4000-level in the major. The individual courses used to satisfy the residency requirement must be approved by the department chair.)

Initiating the checkout procedure with the departmental advisor in the semester prior to the one in which the degree is to be awarded. The checkout is completed only when approved by the dean's office and the Office of the University Registrar.

General Education Requirements

All engineering, computer science, and construction management majors must complete one arts course, three humanities courses, two social sciences courses, and one life science course from the approved general education list from their catalog of record and according to the major curriculum requirements. Specific major requirements are noted in the "College Survival Handbook" available in the Student Services Office or online (www.eng.lsu.edu, see "Current Students").

Requirements for Second Bachelor's Degree

Students who hold one baccalaureate degree may wish to obtain a baccalaureate degree in engineering as a second degree. To do so, they must complete a minimum of 30 semester hours while enrolled in the department granting the second degree. In addition to the requirements of the first discipline, the student must satisfy all requirements for the second discipline, as shown in the curriculum.

They must attain a minimum 2.00 GPA average on all work scheduled while enrolled in the College of Engineering and on all work subsequent to receipt of the first degree. A student whose first degree was obtained elsewhere must also satisfy all the admission requirements of the college, as previously listed.

College Policy for "D" Grades and Repetition of Courses

Only those courses in which grades of "D" or "F" were earned may be repeated. Courses in which a grade of "F" were earned may be repeated only as allowed by the university as detailed in the "Regulations" chapter of this catalog. A student who earns a "D" or "F" in a course in which a minimum grade of "C" is required must register for the course again in the next regular semester in which the student is enrolled and the course is offered.

Graduate Programs

The college offers the Master of Science and the Doctor of Philosophy degrees through the Graduate School. The Master of Science program is mostly research oriented and emphasizes fundamental theory. It is offered in engineering science, coastal and ecological engineering, construction management, systems sciences, and biological and agricultural, chemical, civil, electrical, industrial, mechanical, and petroleum engineering. The Doctor of Philosophy degree is awarded in the fields of chemical engineering, civil engineering, computer science, electrical engineering, mechanical engineering, petroleum engineering, and engineering science. For additional information, consult "The Graduate School" section.

Independent and Distance Learning Credits

Independent and Distance Learning (IDL) courses to be used for degree credit must be approved by the office of the dean. Students must see a counselor in the Dean's Office to enroll and establish a Dean's Deadline for completion of the course. Consistent with university regulations, students may earn no more than one-fourth of the number of hours required for the bachelor's degree through IDL courses. In addition, no more than six hours of credit earned through IDL study may be applied to a student's general education requirement.

Students not registered in campus courses may enroll in IDL courses for degree credit; however, students who have been dropped from the university may not enroll in IDL courses for degree credit.

Students registered in the university may enroll in a maximum of 19 semester hours (21 would have to be approved by the Dean's Office) of combined IDL and campus course work during a regular semester and a maximum of 12 hours during the summer. Only in exceptional cases will students be allowed to enroll in IDL course work during the semester they plan to graduate.

Minor Field Requirements (Optional)

A student may earn a minor in a second field. The specific requirements are determined by the department offering the minor. Students who plan to minor in a second field must see a counselor in the dean's office to initiate the proper procedures. A student must earn a minimum 2.00 cumulative GPA in the minor field. The College of Engineering also offers *minors in Digital Media AVATAR Technology* and *Technical Sales*.

Minor in Digital Media AVATAR Technology

To earn a *Digital Media AVATAR Technology minor* a student must complete 21 credit hours of course work. These must include: CSC 1253, CSC 1350 or IE 2060; one course from ART 1001, ART 1011, ARTH 2470, MUS 1751, MUS 1799, ENGL 2009; nine credit hours of approved engineering and/or science electives; three credit hours of approved arts electives; and the three credit hour Tech AVATAR capstone course, EE 4859.

Minor in Technical Sales

Students in the College of Engineering wishing to earn a *minor in technical sales* must complete ACCT 2000, BLAW 3201 or CM 4211, ECON 2030, IE 3201 or FIN 3715 or PETE 3025, MGT 3200, MKT 3401, PHYS 1202, PHYS 2102 or PHYS 2112 or PHYS 2113 or PHYS 2002, and CMST 1061, CMST 2010, CMST 2060 or CMST 2061.

Students in other colleges must have approval from the College of Engineering dean's office to declare this minor.

Students who return to campus after having completed their undergraduate degrees and who complete the surveying or technical sales minors will be issued a certificate by the college.

For a list of all other minors within the College of Engineering, please see the individual departmental links above.

The Engineering Council

The Engineering Council is a college-wide student organization whose members are the elected representatives of the various professional and honorary student organizations. In addition to the general goal of bridging organizational gaps between the different departments, the Engineering Council sponsors several student activities including an engineering newsletter and the annual Engineers' Week.

Special Programs

Career Services offers a *cooperative education program* in all curricula offered by the college. In some cases, course scheduling should be carefully coordinated with the department to ensure course availability. Students alternate periods of classroom attendance and employment, resulting in one year of work experience upon graduation. The Co-op Office will assist the student in obtaining employment in the student's area of interest. Although it may delay graduation, the program is an excellent opportunity to explore career choices and integrate classroom theory with industry practices. While employed, the student must also register, for a nominal fee, to be considered formally affiliated with the university. For additional information concerning this cooperative program, please see "Career Services Center" in the section "Student Life."

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

General Minor

Digital Media AVATAR Technology Minor

To earn a *Digital Media AVATAR Technology minor* a student must complete 21 credit hours of course work. These must include: CSC 1253, CSC 1350 or IE 2060; one course from ART 1001, ART 1011, ARTH 2470, MUS 1751, MUS 1799, ENGL 2009; nine credit hours of approved engineering and/or science electives; three credit hours of approved arts electives; and the three credit hour Tech AVATAR capstone course, EE 4859.

Technical Sales Minor

Students in the College of Engineering wishing to earn a *minor in technical sales* must complete ACCT 2000, BLAW 3201 or CM 4211, ECON 2030, IE 3201 or FIN 3715 or PETE 3025, MGT 3200, MKT 3401, PHYS 1202, PHYS 2112 or PHYS 2113 or PHYS 2002, and CMST 1061, CMST 2010, CMST 2060 or CMST 2061.

Students in other colleges must have approval from the College of Engineering dean's office to declare this minor.

Students who return to campus after having completed their undergraduate degrees and who complete the surveying or technical sales minors will be issued a certificate by the college.

Department of Biological & Agricultural Engineering

OFFICE 149 E. B. Doran Building

Biological Engineering

Biological engineering integrates applied biology into the fundamental principles of engineering for the purpose of designing processes and systems that influence, control, or utilize biological materials and organisms for the benefit of society. The discipline applies the principles of analysis, synthesis, and design to physical problems and processing systems associated with plants, animals, and humans, and their environments.

The overall educational goal of the Biological Engineering Program is to educate biological engineering students to be technically and professionally competent and to meet the requirements for professional registration.

The specific educational objective is to produce engineering graduates with the attributes to use basic principles to synthesize and analyze biological and physical systems, and more specifically demonstrate that they have:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate, and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global and societal context;
- a recognition of the need for, and an ability to engage in life-long learning;
- a knowledge of contemporary issues;
- an ability to use techniques, skills, and modern engineering tools necessary for the engineering practice.

The Biological Engineering (BE) curriculum includes the study of sciences (mathematics, physics, chemistry, and biology), humanities (arts, economics, and social sciences), applied biology (organic chemistry, microbiology, and physiology), engineering sciences (statics, dynamics, strength of materials, fluid mechanics, electrical principles, and thermodynamics), and engineering design. Students can select technical and engineering electives that enable them to pursue specific career interests. Elective courses can also be used to complete the requirements for minor programs in electrical engineering, environmental engineering, mechanical engineering, occupational health and safety, surveying, or technical sales.

An undergraduate education in biological engineering is excellent preparation for graduate and professional studies in various fields of engineering (including biomedical engineering) and human or veterinary medicine. The curriculum teaches students the practical skills needed for professional engineering and the scientific understanding required to adapt to new situations.

Career opportunities in biological engineering include design, development, and implementation of technologies to recycle municipal waste and agricultural byproducts into viable sources of energy; systems to clean contaminated water and soil; equipment and procedures to prevent repetitive motion injuries; processing operations to ensure high quality foods; and machinery or sensors to be applied within human, animal, plant, and ecological systems. Graduates have the opportunity for local, national, or international work. Recent graduates are employed in large engineering firms, small consulting companies, and governmental agencies, or are pursuing graduate degrees.

A low student-to-faculty ratio in the department allows students to receive personal attention. Students also complete a senior design project that requires one-on-one direction from a faculty member. Numerous social activities with faculty, staff, and graduate students foster professional camaraderie that extends far beyond the classroom. Students may also gain professional insight and potential employment contacts through participation in a variety of national engineering and technical organizations.

The curriculum in biological engineering provides students with the skills needed to solve today's problems, and the knowledge required to master the rapid changes in technology and address the problems of tomorrow. This curriculum, offered through the College of Engineering, is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Graduates are prepared to take the *Fundamentals of Engineering* (FE) exam during their senior year, which is a first step for obtaining a Professional Engineering license.

General Education course - Arts (3)

General Education course - Humanities (6)

Technical Elective or ROTC (3)

Total Semester Hours: 14

128 Total Sem. Hrs.

Biological Engineering design electives: select three from the list maintained by the department.

Minor

Biological Engineering Minor

Any student not majoring in biological engineering may obtain a *minor in biological engineering* by completing each of these courses with a grade of "C" or better: BE 3340, BE 4303, BE 4341, BE 4380; BIOL 1201, BIOL 1208, BIOL 1202, BIOL 1209, and BIOL 2051.

Sugar Engineering Minor

To earn a *minor in sugar engineering*, students in the College of Engineering must complete BE 4342, BE 4989*, BIOL 2083 or CHE 4260, EE 3950, ME 4433, and an approved design project. A grade of "C" or better in each course is required.

**BE 4989 can only be taken when the topic is related to Sugar Engineering.*

Chemical engineers apply scientific principles to the solution of problems involving chemical and physical change. They design, install, and operate complete processes for the efficient production of materials and tailor the properties of materials for specific applications. Chemical engineers today play a direct professional role in such diverse areas as chemical processing; petroleum refining; pollution control and abatement; materials processing; biochemical engineering; instrumentation; computer automation, control, and modeling; biomedical engineering; oceanography; energy; food processing; systems engineering; and manufacturing.

Louisiana and the Gulf Coast region lead the nation in growth of the chemical, petroleum, and materials industries. In these industries, about 40 percent of the professional staffs are chemical engineers. Besides providing technical leadership for these industries, chemical engineers are a major source of management personnel. Chemical engineering also offers many opportunities for independent enterprise.

Chemical engineers must combine many different abilities in their work. These include an aptitude for chemistry, computer science, physics, mathematics, and economics; the capability of presenting decisions to management in a lucid and concise manner; and the ability to bring scientifically oriented talents to bear on practical problems.

The undergraduate curriculum is concerned primarily with fundamentals, and basic courses in mathematics, chemistry, and chemical engineering are required. Through a series of elective courses, students may select a formal concentration in one of three areas: biomolecular, environmental, or materials studies. Alternatively, students can use these electives to plan a program that emphasizes a subfield of their choice. The curriculum requires liberal amounts of arts, humanities, and social sciences electives to satisfy the university's general education and external accreditation requirements. These serve to prepare students for the responsibilities of citizenship, aside from a technical career. The undergraduate curriculum is oriented toward the use of computers, which have become an integral part of the engineering profession.

Chemical engineers are among the highest-salaried graduates in engineering across the nation. In the foreseeable future, it is predicted that the supply of chemical engineers available to industry will not match the demand; consequently, the salary and job opportunities should continue to be favorable.

The chemical engineering curriculum has been continuously accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Residence Requirement • Students must complete at least 18 residence hours of required chemical engineering courses, including CHE 4172, and exclusive of approved chemical engineering electives.

Academic Warning • Any chemical engineering student whose cumulative grade point average on all chemical engineering courses is less than a 2.00 shall be placed on academic warning status. Such students will receive a letter from the department chair informing them of their GPA, and reminding them that a 2.00 or better GPA in all chemical engineering courses is required for the BSChE degree.

Academic Probation • Any chemical engineering student whose cumulative GPA on all chemical engineering courses attempted is seven or more quality points below a 2.00 shall be placed on departmental scholastic probation. Students will remain on departmental scholastic probation until they have achieved a GPA of 2.00 or better on all chemical engineering courses attempted. Such students will receive a letter from the department chair informing them of their probationary status, reminding them that a 2.00 GPA in all chemical engineering courses is required for the BSChE degree, and cautioning them that a further loss of quality points may result in their being dropped from the department.

Academic Drop • Any chemical engineering student whose cumulative GPA on all chemical engineering courses attempted is 10 or more quality points below a 2.00 shall be dropped from the department. Students dropped for the first time shall be ineligible to enroll in chemical engineering courses for one full semester (fall or spring) following their drop. Students dropped for a

second time shall be ineligible to enroll in chemical engineering courses for one calendar year. In either instance, readmission to the department may be delayed or denied at the discretion of the department chair.

3/2 Program in Chemistry and Chemical Engineering

The Department of Chemistry at Southern University and the Gordon A. and Mary Cain Department of Chemical Engineering at LSU offer a dual degree in chemistry and chemical engineering. The student, after successful completion of the required courses in both curricula, will be awarded a Bachelor of Science degree in Chemistry from Southern University and a Bachelor of Science in Chemical Engineering degree from LSU. The first three years of coursework are taken principally at Southern University and the last two years principally at LSU.

Major

For information regarding the GRADUATE PROGRAM, [click here](#).

The Department of Civil & Environmental Engineering offers two curricula that are designed to provide a broad, but integrated education in the scientific, mathematical, engineering, sociohumanistic, and ethical principles that are the basis for a professional career. The curricula also provide sound preparation for continued professional development through informal studies, continuing education programs, or graduate study in a specialized engineering or related field. The philosophy of the faculty is to offer students a quality education, preparing them to enter any field of civil or environmental engineering. The department assists students in achieving the technological, communication, and interpersonal competencies, as well as a sensitivity to and understanding of socioeconomic issues, necessary for the professional practice of engineering.

For those students wishing to concentrate in environmental engineering, two opportunities are available. Students pursuing the civil engineering degree may select 20 hours of electives during the senior year with emphasis on technical, socio-economical, and regulatory issues in environment engineering. Alternatively, students may pursue the more specialized environmental engineering curriculum leading to the BS in Environmental Engineering.

In collaboration with external Civil and Environmental Engineering Program Advisory Committees, the faculty established the following program educational objectives for the undergraduate degree programs:

consistent with the mission of the university, provide quality undergraduate programs in civil and environmental engineering which focus on the efficient, economic, environmentally sensitive, and socially responsible design, maintenance, and improvement of the state and national infrastructure;

attract, retain, develop, and support excellent faculty, students, and staff that have the capability and motivation to achieve the program educational and outcomes objectives of the programs;

provide modern instructional facilities to support the development of experimental, computational, and design skills; ensure the continual improvement of the programs through an active assessment and evaluation process that encompasses the constituencies of the program;

provide adequate resources and administrative support to ensure that the program educational and outcomes objectives of the programs can be met; and

support student chapter programs, as well as promote student participation in professional organizations and service activities.

The department is committed to the continual improvement of its BS degree programs in civil engineering and environmental engineering. Specific outcome objectives have been established for the degree programs and will utilize the following measures for assessing the achievement of these objectives:

technical and professional capabilities of students in open-ended project design courses

student, alumni, and employer surveys

faculty assessment of ethical behavior of students

student participation in professional organizations

student performance on the *Fundamentals of Engineering* (FE) examination

subsequent professional registration of graduates

success of graduates in post-graduate degree programs

The data from these assessment measures will be evaluated and used as the basis for improvement of all elements of the degree programs.

Bachelor of Science Degree in Civil Engineering

Civil engineering is a profession that advances the well-being of people, while improving and protecting the environment. A civil engineer gains knowledge of mathematics and physical sciences through study, experience, and practice. This knowledge is applied with judgment under economic constraints to provide facilities for living, industry, transportation, and a myriad of other activities. Civil engineering graduates can practice in the fields of structural, transportation, hydraulic, water resources, geotechnical, construction, environmental, and public works engineering. They are employed by private industry as well as governmental agencies and many ultimately establish their own consulting engineering businesses.

The philosophy of the department is to provide the students a broad background in key areas of civil engineering, and the opportunity for specialization through electives. Specifically, students take several courses each in the fields of structural, geotechnical, transportation, surveying, water resources, and environmental engineering. Eighteen hours of electives in the senior year provide the means for a student to specialize in one or two of these areas, if desired.

The graduates of the civil engineering program shall:

be prepared to take a leading role in the provision, upkeep, and improvement of the state and national infrastructure in an efficient, economic, environmentally sensitive, and socially responsible manner;

have an understanding of professional practice issues, understand their roles in a local and global societal context, and have the interpersonal and communication skills needed to be effective engineers;

be prepared and motivated to become licensed professional engineers and to continue their education through professional development and post graduate programs;

be proficient in analysis and structural, transportation, geotechnical, and water resources engineering; and

be proficient in laboratory and field measurements and the ability to design, conduct, and critically evaluate the results of experiments in the areas of hydraulics, construction materials, and geotechnical engineering.

The successful civil engineer is a registered professional engineer who affiliates with various professional and technical societies. The department recommends that its students join and participate in the Student Chapter of the American Society of Civil Engineers and encourages each senior to take the *Fundamentals of Engineering* (FE) examination that is a partial requirement for registration as a professional engineer.

The civil engineering program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; telephone: (410) 347-7700.

Bachelor of Science Degree in Environmental Engineering

Environmental engineering is a separate and distinct baccalaureate degree program within the Department of Civil & Environmental Engineering. As a discipline, environmental engineering is defined as "...the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of life." The degree program is broad based and encompasses resource management; conception, planning, design, construction and operation of engineered systems for the protection of human health; the protection and management of the environment; air, water (surface subsurface, and groundwater), and land interactions and transformations; the behavior of natural systems, including their response to the activities of man; professional responsibility; and multi-disciplinary efforts across private and public sectors to assure environmental protection. For achieving additional depth in specific areas of environmental engineering, elective courses are available in a range of topics including in-situ waste site remediation, computer modeling, use of natural systems for wastewater treatment, and special topics and design/research project courses.

The basic mission of the program is to provide the fundamental intellectual knowledge, when supplemented by professional experience that will provide the technical and interpersonal skills required to conceive, plan, design, and implement the systems needed to provide and ensure environmental protection for human health and the sustainability of our natural ecosystem.

The graduates of the environmental engineering program shall:

possess the technical and professional skills needed to ensure that they are adequately prepared to enter and progress professionally in the practice of environmental engineering or progress academically in advanced areas of study;

be proficient in the fundamentals of mathematics and statistics, computational methods, natural and physical sciences, and chemical, civil, and environmental engineering sciences necessary to communicate and collaborate effectively with a broad spectrum of environmental professionals;

have an introductory level of knowledge of environmental issues associated with air, land, and water systems and associated environmental health impacts;

be proficient to conduct laboratory experiments and analyze and interpret data in the areas of soil properties and behavior, water quality and unit operations—physical, chemical, and biological;

have the ability to perform engineering analysis and design of water, air, and land treatment/protection systems that minimize risk to the environment and public health;

have an understanding of concepts of professional practice and the roles and responsibilities of public institutions and private organizations pertaining to environmental engineering and the interpersonal and communication skills needed to be effective engineers and citizens; and

become licensed professional engineers and continue their education through professional development and post graduate programs.

Students are encouraged to participate in the activities of the student chapters of the Louisiana Water Environment Association, the American Society of Civil Engineers, and Engineers Without Borders. Other professional organizations that may be of interest to students include the National Society of Black Engineers, the Society of Women Engineers, and the Environmental Conservation Organization (ECO).

The department encourages each senior to take the *Fundamentals of Engineering* (FE) examination that is a partial requirement for registration as a professional engineer.

The environmental engineering program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700.

Minor

Environmental Engineering Minor

To earn a *minor in environmental engineering*, students in the College of Engineering must complete EVEG 3200 and EVEG 3110 and five courses chosen from a list of approved courses available in the dean's office.

Structural Engineering Minor

To earn a *minor in structural engineering*, a student must complete CE 3415, CE 4400, CE 4410, CE 4430 or CE 4460, CE 4435, and four additional courses chosen from an approved list of technical electives available in the dean's office. A grade of "C" or better in each course is required.

Surveying Minor

To earn a *minor in surveying*, a student must complete CE 3500, CE 4500, CE 4520, CE 4530, and CE 4550. The State of Louisiana Revised Statutes 37:693.B(3b) and (4f) specify the educational requirements necessary for licensing as a Professional Land Surveyor. Additional courses will be required by the board for the land surveyor license. A list of required and elective courses may be obtained from the Louisiana Professional Engineers and Land Surveyors registration board (LAPELS).

Transportation Engineering Minor

To earn a *minor in transportation engineering*, a student must complete, with a grade of "C" or better in each course: CE 3600, CE 4600, CE 4650, CE 4670, EXST 2201, and three additional courses chosen from an approved list of technical electives available in the dean's office.

Department of Construction Management

Bachelor of Science Degree in Construction Management

Construction management is the business side of construction. Modern construction has been rapidly evolving, incorporating sophisticated new construction technologies and new information-driven management practices to drive productivity improvements. These changes have in turn driven a high demand for graduates who can effectively use these technologies and business practices.

The department recognizes that its construction management graduates are professional constructors, distinct from engineers and architects. The curriculum is a designed blend of the technical, legal, business, management, and engineering aspects of the construction industry. The Construction Management program at LSU develops professional leaders who possess skills to successfully manage the execution of any construction project in the private or public sector. Students can seek an emphasis in industrial, commercial, highway, or residential fields.

Graduating seniors are to take the American Institute of Constructors (AIC) Associate Constructor (AC) Level I Exam and the departmental Senior Exit Exam. The faculty facilitates these exams within the required CM 4202 course. The exams are administered as a preparation for certification as a Professional Constructor.

The construction management curriculum is accredited by the American Council for Construction Education (ACCE). Upon completion of the degree program, construction management students will be able to:

create oral presentations appropriate to the construction discipline

create written communications appropriate to the construction discipline

apply appropriate knowledge of mathematics, science, and business fundamentals

apply construction management skills as an effective member of a multi-disciplinary team

analyze professional decisions based on ethical principles

analyze methods, materials, and equipment used to construct projects

understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process

analyze construction documents for planning and management of construction processes

understand the basic principles of structural behavior

understand the basic principles of mechanical, electrical, and plumbing systems

understand the basic principles of sustainable construction

apply basic surveying techniques for construction layout and control

create construction project cost estimates

create construction project schedules

understand construction accounting and cost control

understand construction risk management

understand the legal implications of contract, common, and regulatory law to manage a construction project

create a construction project safety plan

understand construction project control processes

understand construction quality assurance and control

apply appropriate state-of-the-art electronic-based technology to manage the construction process

Major

Construction Management, B.S.C.M.

Construction Management

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022 or MATH 1023.

SEMESTER 3: General Education Arts/Humanities/Social Sciences course.

SEMESTER 4: "C" or better in MATH 1550.

SEMESTER 5: "C" or better in PHYS 2001.

Admission into the College of Engineering is required for construction management majors prior to taking any construction management course numbered above CM 2101.

A grade of "C" or better is required in all CM courses and prerequisite courses; ENGL 1001 and ENGL 2000; MATH 1550; PHYS 2001 and PHYS 2002.

Registration in any CM course above CM 2101 is restricted to students admitted to a senior college with a declared CM major or minor.

Semester 1

CRITICAL: MATH 1021.

CM 1011 Introduction to Construction Management (3)

ENGL 1001 English Composition (3)

MATH 1550 Analytic Geometry and Calculus I (5)

- General Education course - Arts (3)

- General Education course - Social Sciences (3)

Total Semester Hours: 15

122 Total Sem. Hrs.

¹ - Industry Emphasis Area Courses: Consult the department advisor for a list of courses.

Minor

Construction Management Minor

To graduate with a *minor in construction management*, non-majors must complete CM 1102, CM 2101, CM 2102, CM 3111, CM 4101; and one of the following: CM 2103 or CM 2501 or CM 2215 or CM 4211. Registration in any CM course above CM 2101 is restricted to students admitted to a senior college with a declared CM major or minor. A grade of "C" or better is required in each course.

School of Electrical Engineering & Computer Science

Division of Electrical and Computer Engineering

OFFICE 3101 Patrick F. Taylor Hall

TELEPHONE 225-578-5241

FAX 225-578-5200

WEBSITE www.ece.lsu.edu

Electrical and computer engineering are primarily concerned with the generation, transmission, control, and distribution of electric energy, signals, and information. The division offers undergraduate and graduate programs and conducts research to serve the needs of the state and the nation.

Today's high technology life comprising of ubiquitous smart phones, tablet PCs, automated controls, reliable power, and internet connectivity is made possible by electrical and computer engineering disciplines. The division offers courses in the major areas of communications, computers, control systems, physical electronics, and power systems.

Program Educational Objectives

- Graduates will have demonstrable ability to engage in life-long learning as evidenced through advanced education/degrees, professional development, and other career specific opportunities.
- Graduates employed in the industry will have demonstrable ability to advance and be successful in their profession through their technical skills, effective teamwork abilities, leadership, and communication skills.

Student Outcomes

In order to meet the program objectives, a graduate of the program will have accomplishments consistent with the criteria for accrediting engineering programs specified by the Engineering Accreditation Commission of ABET, www.abet.org.

Electrical and computer engineering students receive a thorough foundation in mathematics, physics, and introductory engineering during the first two years. This includes a freshman course in the introduction of electrical and computer engineering. Emphasis during the junior and senior years is on advanced engineering concepts and design. Engineering design is introduced starting in the freshman year so that by the time students reach senior status they are prepared to take required capstone design and other courses dealing primarily with design. The senior courses utilize the previously gained knowledge in solving real-life

problems. This prepares students for excellent career opportunities in areas such as computer engineering, energy conversion, power systems, communications, network design, control systems, electronics, and signal processing, as well as many interdisciplinary areas such as robotics and digital media. With the background in fundamental theory and laboratory practice provided in the curricula, graduates are prepared to contribute and progress in their chosen technological fields.

The division offers two programs of study—electrical engineering and computer engineering, both leading to the degree of Bachelor of Science in Electrical Engineering. The electrical engineering curriculum provides a broad background in electrical engineering through the required course sequence. Elective courses permit students to develop a program in one of the three areas of technical concentration, as outlined below. The approved technical electives permit students to obtain more depth in the chosen area, explore other areas of electrical engineering, or explore other fields of engineering and science. The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The computer engineering curriculum is available for students desiring more comprehensive knowledge of the principles that underlie the organization, design, and application of computer systems. The computer engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

A student must take *all* of the required courses in either the electrical engineering or the computer engineering curriculum, as stated below, in order to obtain a degree.

Students interested in continuing their education through master's and doctoral programs are advised to seek academic counseling early and to make judicious use of their undergraduate electives.

Division of Computer Science and Engineering

OFFICE 3127 Patrick F. Taylor Hall

FAX 225-578-1465

WEBSITE www.csc.lsu.edu

The mission of the program is to instill in the student theoretical and applied practical skills needed to solve challenging problems using a computer. Graduates of the program use such concepts as abstraction and complexity analysis to solve innovative problems or to orchestrate evolutionary change as applied to the development of software. The program provides a strong foundation such that students can build on their skill sets as the field rapidly evolves.

Program Educational Objectives

- to apply and continuously acquire knowledge, both theoretical and applied, related to core areas of computer science
- to solve diverse and unique problems in software design and development processes
- to work productively as computer professionals (in traditional careers, graduate school, or academia) by:
 - demonstrating effective use of oral and written communication
 - working competently as a member of a team unit
 - adhering to ethical standards in the profession

In order to meet the program objectives, a graduate of the program will have accomplishments consistent with the general criteria for student outcomes specified by the Computing Accreditation Commission of ABET, www.abet.org.

The undergraduate computer science curriculum is structured around basic courses in computer science and mathematics and is accredited by the Computing Accreditation Commission of ABET, www.abet.org. The curriculum is designed to allow a flexible plan of study via the mandatory selection of one of four concentrations: *cloud computing and networking, data science and*

analytics, software engineering, and computer science and a second discipline. A concentration should be declared at the beginning of the sophomore year. If the second discipline concentration is selected, an approval form must be completed and approved by the department and the dean's office.

Computer science students are cautioned to verify course descriptions in the catalog noting where duplication of course credits may be prohibited. Additionally, computer science students will not receive degree credit for the following courses: CSC 1240; ELRC 4006; EXST 2201; ISDS 2000, ISDS 2001, ISDS 2010, ISDS 2011, ISDS 3070, ISDS 3075; PSYC 4111; and SOCL 2201.

Major

Computer Engineering, B.S.E.E.

Computer Engineering

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022 or MATH 1023.

SEMESTER 3: CHEM 1201.

SEMESTER 4: "C" or better in MATH 1550.

SEMESTER 5: "C" or better in PHYS 2110.

A prerequisite to any electrical engineering course may be met only by obtaining a "C" or better in each course cited as a prerequisite. This rule does not apply to EE 2950 or EE 3950.

Semester 1

CRITICAL: MATH 1021.

- EE 1810 Introduction to Engineering: Electrical and Computer Engineering (2)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- General Education course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1022 or MATH 1023.

- EE 2740 Digital Logic (3)

- CSC 1253 Computer Science I with C++ (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- MATH 1552 Analytic Geometry and Calculus II (4)
- General Education course - Natural Sciences (3)

Total Semester Hours: 17

Semester 3

CRITICAL: CHEM 1201.

- EE 2120 Circuits I (3)
- EE 2731 Digital Logic Laboratory (2)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- CSC 1254 Computer Science II with C++ (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in MATH 1550.

- EE 2130 Circuits II (3)
- EE 2230 Electronics I (3)
- EE 2231 Electronics Laboratory I (2)
- EE 2810 Tools in Electrical and Computer Engineering (2)
- MATH 2057 Multidimensional Calculus (3)
- ENGL 2000 English Composition (3)

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in PHYS 2110.

- EE 3150 Probability for Electrical and Computer Engineering (3)

- PHIL 2018 Professional Ethics (3) or
- PHIL 2020 Ethics (3)

- EE 3710 Communications in Computing (3)
- EE 3752 Microprocessor Systems (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Breadth Elective (3)¹

Total Semester Hours: 18

Semester 6

- CSC 3102 Advanced Data Structures and Algorithm Analysis (3)
- EE 3755 Computer Organization (3)
- EE 4740 Discrete Structures for Computer Engineering (3)
- General Education courses - Arts/Humanities/Social Sciences (6)

Total Semester Hours: 15

Semester 7

- CSC 4103 Operating Systems (3)
- EE 4810 Senior Design I (3)
- EE 4755 Digital Design Using Hardware Description Languages (3)

- EE Design Elective (3)
- Approved Technical Elective (3)

Total Semester Hours: 15

Semester 8

- EE 4720 Computer Architecture (3)
- EE 4820 Senior Design II (3)
- EE Design Elective (3)
- Approved Technical Elective (3)
- General Education course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 15

127 Total Sem. Hrs.

¹ – Approved Breadth Elective: Select one course from the list: EE 3160, EE 3220, EE 3320, EE 3410, EE 3530, EE 3610.

Computer Science, B.S.

Areas of Concentration

Cloud Computing and Networking

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in ENGL 1001; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 1001/BIOL 1201; 2.0 Cumulative, LSU and Semester GPA.

A grade of "C" or better is required in all CSC prerequisite courses; CSC 1200, CSC 4101, CSC 4103 and CSC 4330; MATH 1550 and MATH 1552; BIOL 1001 or BIOL 1201 and all science prerequisite courses including laboratory courses.

Semester 1

CRITICAL: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

- CSC 1200 Ethics in Computing (1)
- CSC 1350 Computer Science I for Majors (4)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

- CSC 1351 Computer Science II for Majors (4)
- MATH 1552 Analytic Geometry and Calculus II (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/Honors 2000-level) (3)
- General Education course - Humanities (Communication Studies course) (3)

Total Semester Hours: 17

Semester 3

CRITICAL: “C” or better in ENGL 1001; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CSC 2259 Discrete Structures (3)
- CSC 3102 Advanced Data Structures and Algorithm Analysis (3)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (1)¹
- General Education course - Humanities (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- CSC 2262 Numerical Methods (3)
- CSC 3501 Computer Organization and Design (3)
- CSC 4103 Operating Systems (3)
- ENGL 2000 English Composition (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (1)¹

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in BIOL 1001/BIOL 1201; 2.0 Cumulative, LSU and Semester GPA.

- CSC 4402 Introduction to Database Management Systems (3)
- CSC 2610 Cloud Fundamentals & Web Programming (3)
- IE 3302 Engineering Statistics (3)⁵
- Approved Technical Electives (3)⁴
- Approved Area Elective (3)²

Total Semester Hours: 15

Semester 6

- CSC 3380 Object Oriented Design (3)
- CSC 4501 Computer Networks (3)
- CSC 4610 Cloud Systems and Virtualization (3)

- General Education Course - Social Sciences (3)
- Approved Technical Elective (3)⁴

Total Semester Hours: 15

Semester 7

- CSC 4330 Software Systems Development (3)
- CSC 4101 Programming Languages (3)
- Approved Area Elective (3)²
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 12

Semester 8

- CSC (3000-level or above) Elective (3)³
- Approved Electives (6)
- General Education course - Arts (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

Computer science students are cautioned to verify course descriptions in the catalog noting where duplication of course credits may be prohibited. Additionally, computer science students will not receive degree credit for the following courses: CSC 1240; ELRC 4006; EXST 2201; ISDS 2000, ISDS 2001, ISDS 2010, ISDS 2011, ISDS 3070, ISDS 3075; PSYC 4111; and SOCL 2201.

¹ - For General Education Natural Science, two six-hour sequences in both physical and life sciences must be taken; one sequence must include two additional hours of lab work. One sequence must be from the Biological Sciences (BIOL) and the physical science sequence selected from Astronomy, Chemistry, Geology and Physics.

² – APPROVED AREA ELECTIVES (6 hours required): No more than two elective courses from the same department; CSC 4402; EE 4625, EE 4660; IE 4426; ISDS 4120, ISDS 4123; MATH 3355, MATH 4023, MATH 4025, MATH 4325; other electives subject to approval.

³ – The selection of the CSC (3000-level or above) elective is not restrictive to topics related to Cloud Computing and Networking.

⁴ – APPROVED TECHNICAL ELECTIVES: Three hours of elective credits must be selected from **Group A** and three hours of elective credits selected from Group A or Group B.

GROUP A: 2000-level and above only chosen from CSC, BE, CHE, CE, CM, EE, ENGR, EVEG, IE, ME, PETE, EMS, ENVS, OCS, MATH, ECON, FIN, ASTR, BIOL, CHEM, GEOG, GEOL, PHYS, ISDS 3100, ISDS 3105, ISDS 3120.

GROUP B: ART 2050, ART 2055, ART 2551, ART 4020, ART 4050, ART 4055, ART 4550, ART 4560, ARTH 4466, ARTH 4468, ARTH 4480, ARTH 4482, ARTH 4484, MC 4015, MC 4260, MUS 3745, MUS 4745, MUS 4746, ENGL 2009, ENGL 2231, ENGL 4000, ENGL 4009, ENGL 7109.

⁵ – Students who have completed the prerequisites may substitute MATH 3355 or EE 3150 or EXST 4050 for IE 3302.

Computer Science & Second Discipline

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in ENGL 1001; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 1001/BIOL 1201; 2.0 Cumulative, LSU and Semester GPA.

A grade of "C" or better is required in all CSC prerequisite courses; CSC 1200, CSC 4101, CSC 4103 and CSC 4330; MATH 1550 and MATH 1552; BIOL 1001 or BIOL 1201 and all science prerequisite courses including laboratory courses.

Semester 1

CRITICAL: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

- CSC 1200 Ethics in Computing (1)
- CSC 1350 Computer Science I for Majors (4)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

- CSC 1351 Computer Science II for Majors (4)
- MATH 1552 Analytic Geometry and Calculus II (4)
- General Education course - Natural Sciences (3)¹

- General Education course - Humanities (English/Honors 2000-level) (3)
- General Education course - Humanities (Communication Studies course) (3)

Total Semester Hours: 17

Semester 3

CRITICAL: "C" or better in ENGL 1001; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CSC 2259 Discrete Structures (3)
- CSC 3102 Advanced Data Structures and Algorithm Analysis (3)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (1)¹
- General Education course - Humanities (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- CSC 2262 Numerical Methods (3)
- CSC 3380 Object Oriented Design (3)
- CSC 3501 Computer Organization and Design (3)
- ENGL 2000 English Composition (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (1)¹

Total Semester Hours: 16

Semester 5

CRITICAL: “C” or better in BIOL 1001/BIOL 1201; 2.0 Cumulative, LSU and Semester GPA.

- CSC 4330 Software Systems Development (3)
- IE 3302 Engineering Statistics (3)⁴
- Approved Technical Elective (3)³
- CSC (2000-level or above) Elective (3)
- Approved Area Elective (3)²

Total Semester Hours: 15

Semester 6

- CSC 4103 Operating Systems (3)
- CSC (3000-level or above) Elective (3)
- Approved Area Elective (3)²
- General Education course - Social Sciences (3)
- Approved Technical Elective (3)³

Total Semester Hours: 15

Semester 7

- CSC 4101 Programming Languages (3)
- CSC (4000-level) Elective (3)
- Approved Area Electives (6)²

Total Semester Hours: 12

Semester 8

- CSC (3000-level or above) Elective (3)
- Approved Area Elective (3)²

- General Education course - Arts (3)
- General Education course - Social Sciences (2000-Level) (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

Computer science students are cautioned to verify course descriptions in the catalog noting where duplication of course credits may be prohibited. Additionally, computer science students will not receive degree credit for the following courses: CSC 1240; ELRC 4006; EXST 2201; ISDS 2000, ISDS 2001, ISDS 2010, ISDS 2011, ISDS 3070, ISDS 3075; PSYC 4111; and SOCL 2201.

¹ - For General Education Natural Science, two six-hour sequences in both physical and life sciences must be taken; one sequence must include two additional hours of lab work. One sequence must be from the Biological Sciences (BIOL) and the physical science sequence selected from Astronomy, Chemistry, Geology and Physics.

² - APPROVED AREA ELECTIVES: See Computer Science advisor. In addition to three credit hours each from a CSC 2000-level or above elective, a CSC 3000-level class or above, and a CSC senior elective, an approved second discipline concentration consists of 15 semester hours of electives in one area outside of the Department of Computer Science. All courses must be taken from a single department except when a university minor is obtained. Courses in the second area are to form a coherent sequence; where possible students should take courses required of a major in that department. Ordinarily, there should be at least two courses numbered 3000 or above. Courses chosen from Information Systems and Decision Sciences must be numbered ISDS 3100 or above. The approval form must be submitted no later than the sophomore year with the consent of the departmental advisor and the dean's office.

³ - APPROVED TECHNICAL ELECTIVES: Three hours of elective credits must be selected from **Group A** and three hours of elective credits selected from Group A or Group B.

GROUP A: 2000-level and above only chosen from CSC, BE, CHE, CE, CM, EE, ENGR, EVEG, IE, ME, PETE, EMS, ENVS, OCS, MATH, ECON, FIN, ASTR, BIOL, CHEM, GEOG, GEOL, PHYS, ISDS 3100, ISDS 3105, ISDS 3120.

GROUP B: ART 2050, ART 2055, ART 2551, ART 4020, ART 4050, ART 4055, ART 4550, ART 4560, ARTH 4466, ARTH 4468, ARTH 4480, ARTH 4482, ARTH 4484, MC 4015, MC 4260, MUS 3745, MUS 4745, MUS 4746, ENGL 2009, ENGL 2231, ENGL 4000, ENGL 4009, ENGL 7109.

⁴ - Students who have completed the prerequisites may substitute MATH 3355 or EE 3150 or EXST 4050 for IE 3302.

Data Science and Analytics

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in ENGL 1001; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 1001/BIOL 1201; 2.0 Cumulative, LSU and Semester GPA.

A grade of "C" or better is required in all CSC prerequisite courses; CSC 1200, CSC 4101, CSC 4103 and CSC 4330; MATH 1550 and MATH 1552; BIOL 1001 or BIOL 1201 and all science prerequisite courses including laboratory courses.

Semester 1

CRITICAL: MATH 1021; 2.0 Cumulative, LSU and Semester GPA.

- CSC 1200 Ethics in Computing (1)
- CSC 1350 Computer Science I for Majors (4)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- General Education Course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1022 or MATH 1023; 2.0 Cumulative, LSU and Semester GPA.

Total Semester Hours: 15

Semester 8

- CSC (3000-level or above) Elective (3)³

- Approved Area Electives (6)²
- General Education course - Arts (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

Computer science students are cautioned to verify course descriptions in the catalog noting where duplication of course credits may be prohibited. Additionally, computer science students will not receive degree credit for the following courses: CSC 1240; ELRC 4006; EXST 2201; ISDS 2000, ISDS 2001, ISDS 2010, ISDS 2011, ISDS 3070, ISDS 3075; PSYC 4111; and SOCL 2201.

¹ - For General Education Natural Science, two six-hour sequences in both physical and life sciences must be taken; one sequence must include two additional hours of lab work. One sequence must be from the Biological Sciences (BIOL) and the physical science sequence selected from Astronomy, Chemistry, Geology and Physics.

² – APPROVED AREA ELECTIVES (9 hours required): CSC 4243, CSC 4263, CSC 4304, CSC 4356, CSC 4357, CSC 4370, CSC 4444, CSC 4501, CSC 4890; EE 4760; IE 4461; ISDS (max. of 6 hours) from ISDS 4112, ISDS 4113, ISDS 4120, ISDS 4125, ISDS 4141; other electives subject to approval.

³ – The selection of the CSC (3000 - level or above) elective is not restrictive to topics related to software engineering.

⁴ – APPROVED TECHNICAL ELECTIVES: Three hours of elective credits must be selected from **Group A** and three hours of elective credits selected from Group A or Group B.

GROUP A: 2000-level and above only chosen from CSC, BE, CHE, CE, CM, EE, ENGR, EVEG, IE, ME, PETE, EMS, ENVS, OCS, MATH, ECON, FIN, ASTR, BIOL, CHEM, GEOG, GEOL, PHYS, ISDS 3100, ISDS 3105, ISDS 3120.

GROUP B: ART 2050, ART 2055, ART 2551, ART 4020, ART 4050, ART 4055, ART 4550, ART 4560, ARTH 4466, ARTH 4468, ARTH 4480, ARTH 4482, ARTH 4484, MC 4015, MC 4260, MUS 3745, MUS 4745, MUS 4746, ENGL 2009, ENGL 2231, ENGL 4000, ENGL 4009, ENGL 7109.

⁵– Students who have completed the prerequisites may substitute MATH 3355 or EE 3150 or EXST 4050 for IE 3302.

Electrical Engineering, B.S.E.E.

Electrical Engineering

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022 or MATH 1023.

SEMESTER 3: CHEM 1201.

SEMESTER 4: "C" or better in MATH 1550.

SEMESTER 5: "C" or better in PHYS 2110.

A prerequisite to any electrical engineering course may be met only by obtaining a "C" or better in each course cited as a prerequisite. This rule does not apply to EE 2950 or EE 3950.

Elective courses are available so that expertise may be obtained in one or more of the following three areas:

Electronics • theory, design, and fabrication of solid-state devices and design of electronic circuits and systems.

Energy • energy conversion, power system design and analysis, and control of power systems.

Systems and Signal Processing • automatic control, networks, signal processing, and communication.

Additional information concerning these areas and guidelines for selecting electives are available in the division office.

Semester 1

CRITICAL: MATH 1021.

- EE 1810 Introduction to Engineering: Electrical and Computer Engineering (2)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- General Education course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1022 or MATH 1023.

- EE 2740 Digital Logic (3)
- CSC 1253 Computer Science I with C++ (3)
- MATH 1552 Analytic Geometry and Calculus II (4)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- General Education course - Natural Sciences (3)

Total Semester Hours: 17

Semester 3

CRITICAL: CHEM 1201.

- EE 2120 Circuits I (3)
- EE 2731 Digital Logic Laboratory (2)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- General Education Course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in MATH 1550.

- EE 2130 Circuits II (3)
- EE 2230 Electronics I (3)
- EE 2231 Electronics Laboratory I (2)
- EE 2810 Tools in Electrical and Computer Engineering (2)
- MATH 2057 Multidimensional Calculus (3)
- ENGL 2000 English Composition (3)

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in PHYS 2110.

- EE 3610 Signals and Systems (3)
- EE 3150 Probability for Electrical and Computer Engineering (3)
- EE 3320 Electrical and Magnetic Fields (3)
- Approved Breadth Electives (6)¹

Total Semester Hours: 15

Semester 6

- PHIL 2018 Professional Ethics (3) or
- PHIL 2020 Ethics (3)

- Approved Breadth Electives (12)¹
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 18

Semester 7

- EE 4810 Senior Design I (3)
- Approved Technical Elective (3)
- EE Design Electives (6)
- General Education course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 15

Semester 8

- EE 4820 Senior Design II (3)
- Approved Technical Electives (6)
- EE Design Elective (3)
- General Education course - Arts/Humanities/Social Sciences (3)

Total Semester Hours: 15

127 Total Sem. Hrs.

¹ – Approved Breadth Elective: Students must choose at least 18 hours of breadth electives. At least nine hours must be from courses marked with an asterisk: EE 3160*, EE 3220*, EE 3221, EE 3232, EE 3410*, EE 3530*, EE 3752*, EE 3755.

Minor

Computer Science Minor

An undergraduate *minor in computer science* is available. Required courses are CSC 1253, CSC 1254, CSC 2259, CSC 3102, CSC 3501, and three hours of computer science electives at the 3000 level and above; and CSC 4101 or CSC 4103 (total of 21 hours).

Electrical and Computer Engineering Minor

Any student not majoring in electrical or computer engineering may obtain a *minor in electrical and computer engineering* by completing each of these courses with a grade of “C” or better: EE 2120, EE 2130, EE 2230, EE 2740, EE 3610, EE 3752, and six additional hours of electrical engineering course work *excluding* EE 2950, EE 3060, EE 3061, EE 3070 and EE 3950.

For information regarding the GRADUATE PROGRAM in MECHANICAL ENGINEERING, [click here](#).

Bachelor of Science Degree in Mechanical Engineering

Mechanical engineering emerged as a new field of engineering during the Industrial Revolution when many labor-saving inventions were designed and built in England between 1750 and 1850. The role of the mechanical engineer has expanded dramatically in recent years and nearly 10,000 graduates are now needed yearly.

All large industries employ mechanical engineers. Among those who regularly hire graduates from LSU are automotive, industrial machinery, oceanographic, power, chemical, textile, petroleum, computer, metal manufacturing, electronic, paper and wood product, and aerospace corporations.

In these industries, mechanical engineers perform a large variety of functions; therefore, the education of a mechanical engineer is necessarily broad. Mechanical engineers use the basic sciences (such as chemistry and physics), mathematics, computer programming, oral and written communication skills, and humanities and social sciences. Almost invariably, mechanical engineers rely heavily on a firm understanding of mechanics and thermal sciences to analyze the conversion and transmission of energy in its many forms.

Mechanical engineers use this knowledge in research by attempting to solve new problems, in development by altering a system to fit a new need, and in design to describe in detail a machine, system, or approach to a problem. Testing, manufacturing, operation and maintenance, marketing and sales, and administration also require large numbers of mechanical engineers. Mechanical engineering, a technical professional field, offers challenge and opportunity for those prepared for hard work, both in school and during a lifetime of service.

The Department of Mechanical Engineering is committed to continuing its three-fold mission of:

- Producing graduate and post-graduate engineers who meet the needs of industry, government, and academia.
- Advancing the state of knowledge and technology through innovative fundamental and applied research.
- Serving the community and the profession through programs of education, technology transfer, and consulting.

The mechanical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. To qualify for graduation, mechanical engineering students must demonstrate:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, societal, political, ethical, health and safety, manufacturability, and sustainability;
- an ability to function on multidisciplinary teams;
- an ability to identify, formulate, and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and an ability to engage in lifelong learning;
- a knowledge of contemporary issues;
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- an ability to apply knowledge of materials science and engineering; and
- an ability to execute a significant design that incorporates realistic constraints as a member of a team.

For information regarding the GRADUATE PROGRAM in INDUSTRIAL ENGINEERING, [click here](#).

Bachelor of Science Degree in Industrial Engineering

Industrial engineering involves the synthesis and applications of scientific principles of design, installation, and improvement of integrated systems of people, materials, information, and equipment to provide the most efficient and effective operating and work environment. It combines principles of human behavior with concepts of engineering procedure or analysis.

Industrial engineers engage in ergonomics and human factors engineering, safety engineering, work systems design, methods development and improvement, lean systems analysis, information systems design, industrial automation and robotics, systems integration, manufacturing processes design, facilities and plant layout/design, production planning and control, material handling and supply chain systems, operation research and logistics, computer modeling and simulation, quality assurance, statistical analysis and control, and reliability engineering.

The industrial engineer combines the abilities of an engineer and a manager. These include an aptitude for mathematics, statistics, and economics, as well as for the basic engineering sciences; an interest in working with people and systems that produce goods or services; and the ability to analyze, synthesize, and integrate technical knowledge in practical ways.

The program objectives, within the first few years after graduation, for graduates from the BSIE program at LSU are:

- Create value for organizations by developing and implementing effective solutions that balance intellectual, ethical, and societal considerations in design and improvement of operation and management systems so as to safely and efficiently produce and deliver the organization's products and services. In particular, graduates will provide this value in industries of economic importance to Louisiana and the Gulf Coast region, including construction; process industries; energy; information technology; traditional manufacturing; transportation and distribution; and healthcare.

- Function effectively in their organizations in settings that are diverse, global, and multi-disciplinary; lead diverse teams and working collaboratively; advance to leadership roles within their organizations, and be entrepreneurial within their companies or in creating and leading new companies.
- Lead changes in technology and our global society, by engaging in lifelong learning such as conferences, professional development courses, certifications and licensing, and advanced graduate studies.
- Communicate effectively to diverse audiences with different organizational roles, backgrounds, cultures, education, and interests.
- Be responsible, informed, ethical, and active citizens in their organizations, professions and community, through participation in and leadership of professional and community organizations and activities.

Global Knowledge Requirement: Today's engineers work on global projects in culturally diverse environments. To help prepare for this environment, students in industrial engineering must meet a global knowledge requirement. This can be accomplished in one of two ways:

- Through participation in a study abroad program of six or more weeks in length, during which course credit is earned.
- By taking a general education course that meets the global knowledge requirement (the course also counts towards the general education requirement). Currently approved courses are kept on a list available in the College of Engineering office. For a course to be included on this list, it must include instruction and guidance on at least two of the following:
 - Systematically compare the ideas, values, images, cultural artifacts, economic structures, technological developments, or attitudes of people from different modern societies.
 - Identify the historical context of ideas and cultural practices of global cultures and their dynamic relations to current societal contexts.
 - Explain how a culture changes in response to internal and external pressures.

Major

Industrial Engineering, B.S.I.E.

Industrial Engineering

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022 or MATH 1023

SEMESTER 3: CHEM 1201.

SEMESTER 4: "C" or better in MATH 1550

SEMESTER 5: "C" or better in PHYS 2110.

Industrial Engineering Electives • *Choose from the list maintained in the department.*

Students may optionally take three hours of advanced ROTC course work in place of one IE technical elective.

Semester 1

CRITICAL: MATH 1021.

- CMST 1061 Fundamentals of Communication (3) or
- CMST 2060 Public Speaking (3) or
- ROTC (3)

- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- IE 1002 Industrial Engineering Fundamentals (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 17

Semester 2

CRITICAL: MATH 1022 or MATH 1023

- CM 1020 Engineering Graphics for Mechanical Engineering (2)
- CHEM 1202 General Chemistry (3)
- IE 2060 Introduction to the Use of Computers (3)
- MATH 1552 Analytic Geometry and Calculus II (4)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

Total Semester Hours: 16

Semester 3

CRITICAL: CHEM 1201.

- ECON 2030 Economic Principles (3)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

- BIOL 1001 General Biology (3) or
- BIOL 1201 Biology for Science Majors I (3)

- EE 2950 Comprehensive Electrical Engineering (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 1550

- CE 2450 Statics (3)
- IE 2400 Methods and Systems Engineering (3)
- IE 3302 Engineering Statistics (3)
- ME 2733 Materials of Engineering (3)

Minor

Aerospace Engineering Minor

To earn a *minor in aerospace engineering*, a student must complete ME 3834 or equivalent, CE 3400, three aerospace core courses, and one aerospace related course chosen from an approved list of aerospace technical electives. A grade of "C" or better in each course is required.

International Automotive Engineering Minor

To earn a *minor in international automotive engineering*, a student must complete ME 2334 or equivalent, ME 3133, and four additional courses from an approved list of technical electives of which at least three must be automotive core courses and one may be a related course. At least two of the courses must be taken while studying at Politecnico di Torino in Torino, Italy. A grade of "C" or better in each course is required.

Only mechanical engineering students are expected to complete this minor with the stated 19-22 hours. Students majoring in other disciplines may require more credit hours than stated due to prerequisites.

Materials Science and Engineering Minor

To earn a *minor in materials science and engineering*, a student must complete ME 2733, ME 3701, ME 4723, ME 4743, and three additional courses chosen from an approved list of technical electives. A grade of "C" or better in each course is required.

Mechanical Engineering Minor

To earn a *minor in mechanical engineering*, a student must complete 18 semester hours of credit in mechanical engineering with a grade of "C" or better in each course. At least six hours must be at the 4000 level.

Nuclear Power Engineering Minor

To earn a *minor in nuclear power engineering*, a student must complete ME 3834 or equivalent, ME 4433, three nuclear power core courses, and one nuclear power related course chosen from an approved list of nuclear power technical electives. A grade of "C" or better in each course is required.

Only mechanical engineering majors are expected to complete this minor with the stated 18-19 credit hours. Students majoring in other disciplines may require more credit hours than the stated ones because of the prerequisites.

Craft & Hawkins Department of Petroleum Engineering

OFFICE	2160 Patrick F. Taylor Hall
TELEPHONE	225-578-5215
FAX	225-578-6039
WEBSITE	www.pete.lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

Although the petroleum engineering curriculum is designed primarily for careers in the petroleum industry, it is suitable for careers in related areas such as ground water hydrology, geothermal energy, solution mining, and underground storage or disposal of fluids. Professional courses in drilling and production, well design, reservoir engineering, petrophysics, well logging, and the phase behavior of hydrocarbons systems follow basic course work in mathematics, chemistry, physics, geology, and the engineering sciences. Additionally, the faculty gives specific attention to the economic evaluation of drilling and production operations.

The department is active in obtaining summer employment in the petroleum industry for its students. The department also strongly recommends that its students join and participate, as student members, in the Society of Petroleum Engineers and take the *Fundamentals of Engineering* (FE) examination during their senior year as preparation for licensure as a professional engineer.

The nationally ranked Craft & Hawkins Department of Petroleum Engineering at LSU has alumni throughout the world working for major companies, small independent companies, government agencies, and as independent consultants.

The petroleum engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Undergraduate Admission Requirements

Admission to the Craft & Hawkins Department of Petroleum Engineering requires that a student be admissible to the College of Engineering. In addition to the College of Engineering requirements, students must meet the following GPA requirements at the time of application for admission:

- A minimum cumulative 2.8 GPA on all course work that applies to the petroleum engineering undergraduate curriculum.

Transferring students admitted to LSU may apply to the Craft & Hawkins Department of Petroleum Engineering when they apply to the College of Engineering. Students who are denied admission to the department may reapply for admission in a subsequent semester.

An alternative for students who do not meet the GPA requirement but display an exceptional ability and desire to become a petroleum engineer is available. A committee including the department's undergraduate advisor, the department's chair, and the associate dean of undergraduate studies for the College of Engineering will meet and review appeals prior to the start of each semester. Admittance will depend on available space as well as criteria such as grades in freshman and sophomore petroleum engineering courses, relevant work experience and/or activity in student petroleum engineering organizations.

Major

Petroleum Engineering, B.S.P.E.

Petroleum Engineering

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021.

SEMESTER 2: MATH 1022 or MATH 1023

SEMESTER 3: GEOL 1001.

SEMESTER 4: "C" or better in MATH 1550

SEMESTER 5: "C" or better in *PHYS 2110*.

MATH 1550, MATH 1552, and PHYS 2110, PHYS 2112, PHYS 2113, PETE 2031, and CE 2450 each require a grade of "C" or better before a student may register for any 3000 level petroleum engineering course.

Registration for 3000 and 4000 level petroleum engineering courses is only available to students admitted to the department.

Semester 1

CRITICAL: MATH 1021.

The LSU Honors College is a highly selective four-year enrichment program for intellectually motivated undergraduate students. Honors students enter as freshmen and enroll in at least 32 hours of honors courses over their four-year career, culminating in the production of an Honors thesis or project in their major field of study. From small enrollment seminars in the freshman year to

independent research activities in preparation for the senior honors thesis, the Honors College experience is characterized by close interaction between Honors students and outstanding faculty.

Honors students pursue a rigorous academic program which satisfies all requirements for graduation, including the requirements of their major academic department. Honors courses go beyond the basic requirements to provide the basis for outstanding achievement and appropriate recognition at graduation. In the first two years of study in the Honors College, breadth of academic experience is emphasized. Honors work involves the student in a variety of fields ranging from the humanities to the sciences and students may elect to take specialized seminars in a variety of disciplines. Honors students in the junior and senior years usually become more focused in their majors, developing increasingly independent research interests and culminating in the production of a senior thesis or project under the direction of a faculty member in the student's major department.

Participation in the Honors College supplements, but does not replace, work in a major field. Credits earned in Honors College courses may be used to satisfy general education requirements or specific degree requirements. Honors College and departmental advisors assist in assuring that Honors students meet all requirements of each student's major curriculum.

Admission Requirements

Entering Freshmen

Entering freshmen with the following minimum ACT or SAT scores and a 3.50 academic high school GPA are invited to apply for admission to the college.

- ACT requirements—30 composite and 30 English or 29 composite and 31 English.
- SAT requirements—1330 combined math and critical reading and 660 critical reading.

Continuing or Transfer Students

Continuing students who have completed at least their first semester of college and have attained at least a 3.50 GPA are also invited to inquire about admission to the college.

Readmission

Students who have been dropped from the college may apply for readmission if they meet the following requirements:

- they have attained a minimum cumulative GPA of 3.00; and
- they request registration in an honors course at the time of readmission.

Recognition Requirements

Honors College students earn their graduation degrees from LSU through their senior colleges and earn Honors College recognition by meeting the following requirements (for all recognition awards, see curriculum for description of courses eligible for Honors credit):

Good Standing: All students must be in good standing to participate in the Honors College, register for honors courses, and be eligible for priority registration. Following the initial semester in the Honors College, an honors student is considered to be in good standing if he/she maintains a minimum cumulative GPA of 3.00 and successfully completes a minimum of two honors courses (five to six hours) per academic year in residence.

College Honors: Noted on both the diploma and the LSU transcript, College Honors is the culmination of the Honors College curriculum. Students who earn College Honors at graduation will receive special recognition at LSU commencement. To graduate with College Honors a student must meet all requirements as established by the student's own college including at least 32 hours of Honors classes as follows:

- a minimum of six hours of HNRS course work;

- 12 hours at 3000+ level, following upper division departmental honors programs, where they exist;
- senior thesis or project, following thesis guidelines;
- 3.5 GPA in cumulative, LSU, and honors course work.

Upper Division Honors Distinction: Students achieving this distinction will receive recognition at LSU commencement and on their transcripts. Students working toward upper division honors distinction are expected to indicate their intention, in person, to the Honors College upper division advisor who will furnish them with detailed requirements including the following:

- 12 hours of honors courses at the 3000-level or above, including three to six hours of thesis or project;
- Senior honors thesis or project following thesis guidelines;
- 3.50 GPA in both cumulative and LSU coursework, and for all honors courses used in the student's Upper Division program.

Sophomore Honors Distinction: Recognition includes a notation on the transcript and a certificate awarded after the end of the fourth semester. This designation will be subject to approval by the dean of the student's college upon recommendation of the dean of the Honors College. To achieve this distinction, students must complete the following by the end of their fourth regular semester in college:

- 20 hours of HNRS or departmental honors courses, including a minimum of six hours of HNRS courses;
- A 3.50 GPA in cumulative, LSU, and Honors coursework.

Honors College Curriculum

Honors students are required to take at least five to six hours of honors courses per year to remain in good standing and at least 32 hours of honors courses (including thesis) to graduate with College Honors. The following types of courses qualify for credit as honors courses:

- **Honors College courses:** Designated with the HNRS prefix in the Schedule of Classes and administered by the Honors College. Example: HNRS 2013 The 20th Century (3).
- **Honors Departmental courses:** Designated with a departmental prefix and "Honors" in the course title as listed in the Schedule of Classes. Example: CHEM 1421 HONORS: General Chemistry (3).
- **Honors Options:** The honors option is available to students when separate upper division honors courses are not available. A student will work with a professor to produce a contract outlining the work to be done in addition to the regular work for a given course. The student will enroll in this course and will obtain honors credit by successfully completing the work outlined in the contract. Honors option regulations and forms are available through the Honors College. Honors credit is noted on the transcript with the letter "H." Example: ENGL 3020 British Literature I: The Middle Ages, Renaissance and 18th Century (3) (H).
- **Honors Thesis/Project:** An Honors Thesis of high quality is required for students to graduate with College Honors. Students in all disciplines are encouraged to link their Honors thesis with requirements in their own majors and must consult with their departments concerning its final format. The Honors Thesis should be completed in course work totaling at least six hours. Students may enroll in thesis preparation courses in their own departments, or may use HNRS 4000 Thesis (3) with the agreement of their department.

Honors College Experience

Academic Experience

The goal of the Honors College is to prepare academically motivated students for success following graduation and throughout their future careers. In addition to Honors course work, Honors College students have the opportunity to engage in a wide range

of academically related activities during their undergraduate careers. The Honors College advising staff works to guide students toward the following opportunities and students are encouraged to meet with our advisors on a regular basis.

- *Community Service Opportunities:* Freshmen can work together on a community service activity, learning to work together as a group and learning more about the LSU and Baton Rouge communities.
- *Study Abroad:* All Honors College students are encouraged to participate in foreign study programs, especially during their sophomore or junior years.
- *Research Assistantship/Internships:* In their junior year, Honors College students should identify areas of academic/career interest and begin to work on more specialized research under the supervision of a faculty member or on internships in fields appropriate to their career goals.
- *Postgraduate Fellowships/Scholarships:* In their senior year, Honors College students should identify and apply for prestigious fellowships and scholarships that pertain to their career interests.

Residential Experience

The Laville Honors House is a residential college affiliated with the Honors College. The residence hall is located adjacent to the Honors College classrooms and administrative offices in the French House and is available for all Honors College students (freshmen through seniors). The Laville Honors House provides a living environment that fosters academic excellence and close personal interaction between students and faculty. In addition to regular participation in activities by "Faculty Friends," faculty offices and seminar rooms are also located in the Laville Honors House to enhance student academic performance.

Honors Courses and Curricular Equivalents

In meeting the requirements for their degrees, honors students may substitute a number of honors courses (HNRS and departmental) for non-honors courses required for their degree programs. A list of honors courses follows.

Schools and Curricula

- School of Education
- School of Human Resource Education & Workforce Development
- School of Kinesiology
- School of Library & Information Science
- School of Social Work

LSU's College of Human Sciences and Education offers bachelor's degrees and – through the Graduate School – master's degrees, certificates of education specialist, and doctoral programs. The college consists of six units: the School of Education, the School of Human Resource Education & Workforce Development, the School of Kinesiology, the School of Library & Information Science, and the School of Social Work. The K-12 University Laboratory School comprises the sixth unit in the college. The college's mission is to advance cognitive, social, emotional, communicative, and physical development across the lifespan. Through teaching, research, and service, the college plays a significant leadership role in addressing the complex human issues and policy decisions facing Louisiana and the nation.

Faculty, students, and graduates are actively engaged in the research tradition of the university, thus they are uniquely positioned at the cutting edge in using sophisticated approaches for improving the quality of life for and educating a diverse population in a complex and interdependent world.

The School of Education offers three undergraduate programs in teacher education: Early Childhood Education: PK-3 Teacher Certification, Dual Certification: General and Special Education, and Elementary Grades Education. The School also offers an undergraduate program in secondary education with an area of concentration in art, grades K-12 (**currently suspended**) and collaborates with the College of Humanities and Social Sciences and the College of Science in providing teacher certification concentrations in other areas of secondary education (English, French, history/social studies, mathematics, Spanish, biological sciences, chemistry, and physics). The school takes pride in producing graduates who are inquiring pedagogues, effective professionals, and reflective practitioners. Through the Graduate School, the School of Education offers graduate programs in educational leadership, counseling, curriculum, educational research, gifted education, higher education, instruction, and special education.

The School of Human Resource Education & Workforce Development offers an undergraduate program in human resource education. Master's and doctoral programs are also available.

The School of Kinesiology provides undergraduate and graduate programs for students interested in the art and science of human movement and in the business of sport. Undergraduate areas of concentration are sports studies, fitness studies, human movement science, K-12 health and physical education, sport commerce, and sport leadership. Graduates pursue careers in K-12 educational settings, health and fitness programs, professional programs such as allied health and medicine, and sport agencies and businesses.

The School of Library & Information Science offers the Master of Library and Information Science degree (MLIS). Students may complete the degree online, in face-to-face classes at LSU, or in a combination of both formats. The MLIS degree provides education for careers in all types of libraries (including school, public, academic, digital, medical, and law libraries), archives, and information centers.

The School of Social Work offers the Child & Family Studies undergraduate curriculum, which is unique from most social sciences programs in that it provides extensive classroom experience and two field internships for students who plan to enter the workforce upon receiving their BS degree. The School of Social Work also offers a Master of Social Work degree (MSW) and Doctor of Philosophy (PhD).

The University Laboratory School offers a comprehensive K-12 curriculum for approximately 1,300 students. The school serves as a demonstration center for educational pedagogy methodology and provides for observation, research, and pre-service field experiences for university students and faculty.

The following programs are offered by the College of Human Sciences and Education:

- Bachelor of Science in Early Childhood Education, Grades PK-3 (BS);
- Bachelor of Science in Elementary Grades Education (BS);

- Bachelor of Science in General/Special Education, Grades 1-5 (Dual Certification);
- Bachelor of Science in Secondary Education (BS) with an area of concentration in art (**currently suspended**);
- Bachelor of Science in Human Resource Education (BS) with an area of concentration in human resource and leadership development;
- Bachelor of Science in Athletic Training (BS);
- Bachelor of Science in Kinesiology (BS) with areas of concentration in sports studies, fitness studies, human movement science, and health and physical education teacher certification;
- Bachelor of Science in Sport Administration (BS) with areas of concentration in sport commerce and sport leadership; and
- Bachelor of Science in Child and Family Studies (BS)

The following graduate programs are offered through the Graduate School:

- Master of Arts in Teaching (MAT), called the Holmes Program, with certification in elementary education (grades 1-5) or in secondary education (grades 6-12 English, mathematics, sciences, social studies);
- Master of Education (MEd) with areas of study in educational leadership, guidance (school counseling), curriculum and instruction (elementary education, English, foreign language, mathematics, science, social studies, special education, gifted education);
- Master of Arts in Education (MA) with areas of study in community counseling, curriculum studies, educational research, educational technology, and higher education;
- Master of Science in Kinesiology (MS) with areas of study in exercise physiology, motor behavior, pedagogy and psychological sciences, and sport management;
- Master of Science in Human Resource Education (MS);
- Master of Library & Information Science (MLIS);
- Master of Social Work (MSW);
- Certificate of Education Specialist (EdS) with areas of study in curriculum and instruction, administration, and counseling;
- Doctor of Philosophy in Curriculum and Instruction (PhD);
- Doctor of Philosophy in Educational Leadership and Research (PhD) with areas of study in higher education, K-12 education, and research;
- Doctor of Philosophy in Human Resource Education;
- Doctor of Philosophy in Kinesiology (PhD) with areas of study in exercise physiology, motor behavior, pedagogy and psychological sciences, and sport management; and
- Doctor of Philosophy in Social Work (PhD).

Admission/Advising

Students anticipating careers in teaching and undergraduate students pursuing degrees in human resource education, athletic training, kinesiology, sport administration, or child and family studies should contact the Office of Student Services, College of Human Sciences and Education, 236 Peabody Hall, to declare their interest and to obtain additional information. The variety of

routes to teacher certification and specific general education requirements for all programs necessitate early and continuous advisement by the Office of Student Services.

Students transferring from another institution must meet university transfer admission requirements.

Students interested in graduate programs that do not include initial teacher certification should contact the Graduate School and respective schools.

Basic Undergraduate Degree Requirements

Undergraduate students in the College of Human Sciences and Education are required to:

- Satisfactorily complete an approved program of study that has been determined by the faculty of the college and by the university. In addition, all university programs leading to teacher certification, including concentrations, must be approved by the Louisiana Board of Elementary and Secondary Education.
- Complete the final 25 percent of the program in residence in the College of Human Sciences and Education.
- Sport administration program only: Satisfactorily complete the program with a minimum cumulative and LSU GPA of 2.20 on all work taken.
- Child and Family Studies and Human Resource Education programs only: Satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.20 on all work taken.
- Holmes five-year elementary education program only: Complete the undergraduate component of the program with a minimum 2.75 cumulative and LSU GPA on all work taken.
- Teacher education programs and concentrations only: Pass all required sections of the PRAXIS Series, earn a grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education, and satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.50 on all work taken.
- Kinesiology and Athletic Training programs only: satisfactorily complete these programs with a minimum cumulative and LSU GPA of 2.50 on all work taken.

Enrollment in Two Degree Programs

A student may enroll in two bachelor's degree programs concurrently and thereby earn either two degrees or earn one degree with two majors listed on the transcript, provided all requirements are completed as of the same commencement. Written requests must be submitted to the Office of Student Services for dean's approval.

Refer to the section on "Earning Two Degrees" in the "Regulations" chapter in this catalog.

Scholastic Requirements

Retention

College of Human Sciences and Education faculty monitor the growth of students enrolled in the college's programs. The College of Human Sciences and Education reserves the right to review at any time student suitability to continue in a curriculum. In addition to the university's scholastic requirements, specific retention criteria in the College of Human Sciences and Education include, but are not limited to, the following:

- *English Proficiency*—Students must earn a grade of "C" or better in the following courses or have the equivalent in transfer credit: ENGL 1001 (ENGL 1004) and ENGL 2000 (ENGL 1005).
- *Grade Point Average Maintenance*—A student who fails to earn a 2.00 semester average in any one semester, regardless of cumulative grade point average, will be placed on college probation. To be removed from college probation, a student must earn

a 2.00 or better semester GPA, remediate course deficiencies, and make satisfactory progress in the degree program. A student who fails to earn a 2.00 GPA for two consecutive semesters, regardless of cumulative GPA, will be dropped from the college.

Office of Student Services

The Office of Student Services provides all student-related services for undergraduate students in the college and for master's students seeking initial teacher certification. The office strives to provide a single, student friendly environment designed to meet all student needs: recruitment, application procedures, admissions, advising and counseling services, student records, retention services, scholarships, PRAXIS information, student-related experiences (e.g., student council), degree audits, teacher certification, and alumni follow-up.

Independent and Distance Learning Credit

No more than one-fourth of the number of hours required for the baccalaureate degree may be taken as Independent and Distance Learning (IDL) course work. Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL course work during a regular semester (12 semester hours in the summer term). Written requests to exceed this maximum must be submitted to the Office of Student Services for dean's approval.

Students in residence may take IDL courses only in exceptional cases (e.g., conflicts between single sections of required courses) and with specific approval of the dean of the college through the Office of Student Services. Students in all programs must complete all IDL course work prior to the final semester of their program.

Study Abroad

Students in the College of Human Sciences and Education are encouraged to participate in study abroad programs administered by the Office of Academic Programs Abroad. Course requests must be submitted in advance to the respective department for evaluation of equivalency. In addition, students must meet in advance with a College of Human Sciences and Education counselor to ensure that degree credit will be granted upon return to LSU.

Honors College

Students interested in dual membership in the Honors College and the College of Human Sciences and Education should contact the Honors College for admission information.

Paths to Teacher Certification

LSU is a leader in teacher education reform. Extensive research and practice support varied ways to become certified as a teacher: a bachelor's program, a master's program, and a post-baccalaureate nondegree program (music and agricultural education areas only). Students may choose from a bachelor's program in the college (grades PK-3, grades 1-5, grades K-12 art – **currently suspended**, grades K-12 health and physical education), in the College of Agriculture (grades 6-12 agricultural education), in the College of Humanities & Social Sciences (grades 6-12 English, French, history/social studies, Spanish), in the College of Music & Dramatic Arts (grades K-12 instrumental music, vocal music), or in the College of Science (grades 6-12 biological sciences, chemistry, mathematics, physics). Students may also choose to pursue a five-year master's program offered by the College of Human Sciences and Education for certification in grades 1-5 or a fifth year master's program for certification in grades 6-12 (English, mathematics, science, or social studies). Students interested in special education/elementary grades certification should contact the Office of Student Services. Regardless of the route chosen, students will find that teacher education at LSU links contemporary research and practice, focuses on preparing teachers for a culturally diverse world, provides early and extended experiences in diverse educational settings, incorporates instructional technology, and prepares P-12 teachers who truly understand children, content, and pedagogy. The program's focus is to prepare educators to be effective professionals, inquiring pedagogues, and reflective practitioners.

Bachelor's Programs: Initial Teacher Certification

Undergraduate students eager to complete their education in four years may find the bachelor's programs most attractive. The College of Human Sciences and Education offers undergraduate programs leading to certification in grades 1-5, grades PK-3, and grades K-12 (art–**currently suspended** or health and physical education). The college collaborates with the College of

Humanities & Social Sciences and the College of Science in concentrations leading to certification in grades 6-12. The College of Agriculture offers an undergraduate program in grades 6-12 (agricultural education). The College of Music and Dramatic Arts offers undergraduate programs in grades K-12 (instrumental music and vocal music). Depending upon the area and level of certification desired, students earn bachelor's degrees from the College of Human Sciences and Education, the College of Agriculture, the College of Humanities & Social Sciences, the College of Music & Dramatic Arts, or the College of Science and attain Louisiana Teacher Certification in programs that combine general education, an area of focus, professional education courses, and practical experiences. These programs are designed for students who know early in their college careers that they want to become teachers and who want to enter the profession immediately, following receipt of the bachelor's degree. Programs feature early and extensive connections between university-based and field-based learning and include at least one semester of full-time, professionally supervised student teaching.

Master's Program: Initial Teacher Certification

Students who wish to spend extended time developing the expertise to enter the teaching profession with an enhanced capacity for leadership may choose the master's program which includes a full year of graduate-level professional preparation and full-time professionally supervised student teaching.

Students earn a master's degree and Louisiana Teacher Certification by completing 36 credit hours beyond a bachelor's degree. The program features extended experiences in diverse school settings, the support of peers who work together in small cohort groups, mentoring by graduate faculty, and the development of teacher-researcher skills.

Admission to Teacher Education

Undergraduate Programs

Undergraduate students may enter basic teacher education programs after 24 semester hours of college-level course work with a minimum 2.50 GPA, cumulative and LSU. Formal admission to a specific undergraduate teacher education program/concentration requires a 2.50 GPA, cumulative and LSU, and passing scores on the PRAXIS I: Pre-Professional Skills Tests or minimum ACT composite of 22 or minimum SAT composite of 1030. *Admission to upper division professional education courses (3000-level and above) is restricted to students who have been formally admitted to a teacher education program/concentration.*

Master's Program (Holmes only)

Elementary Holmes Program: Admission into the Elementary Holmes Program is on a selective basis. Students admitted into the Elementary Holmes Program will be selected from those candidates who have a GPA of at least 3.00, present acceptable GRE scores, have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030, have passing scores on all required PRAXIS II tests, and are eligible for admission to the LSU Graduate School. Meeting the minimum admission requirements does not guarantee acceptance into the Elementary Holmes Program. A College of Human Sciences and Education admissions panel will select from among qualified applicants those students to be admitted into the Elementary Holmes Program.

Secondary Fifth Year: Admission requirements for the Holmes master's level secondary certification program include admission to the LSU Graduate School and passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 and PRAXIS II subject area/specialty assessment(s). (See "Holmes Master's Programs Leading to Teacher Certification" for additional requirements.)

Basic Requirements for All Teacher Education Majors and Concentrations

Undergraduate teacher education students are required to meet the following requirements:

Admissions Requirements:

- Minimum grade point average of 2.50, cumulative and LSU

- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum grade point average of 2.50, cumulative and LSU, for entry into and continuation in upper (3000/4000) level education courses, including student teaching
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university and the Louisiana Board of Elementary and Secondary Education
- Minimum GPA of 2.50 on all work completed, cumulative, and LSU*
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

* NOTE: Minimum 2.75 GPA required in the five-year master's program leading to elementary grades 1-5 certification.

PRAXIS

Satisfactory scores on the PRAXIS Series are required for teacher certification by the state of Louisiana. *Students in teacher education curricula or concentrations must pass all required sections of the PRAXIS Series prior to graduation.*

Undergraduate students must have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to be formally admitted to a specific undergraduate teacher education program/concentration . * Undergraduate students should take the required PRAXIS II assessments during the last semester of course work prior to student teaching.

Undergraduate students in the Holmes elementary certification program leading to the master's degree must have passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to be formally admitted to this program. Undergraduate graduation requirements include passing scores on required PRAXIS II assessments. Students must take all required PRAXIS II assessments by the March testing during their senior year for timely receipt of test scores.

Master's level students in the Holmes secondary certification program must have passing scores on both the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 and the appropriate PRAXIS II subject area/specialty test(s) to be formally admitted to the master's year. Students must take the required PRAXIS II: Principles of Learning and Teaching Test(s) by the March testing during the master's year for timely receipt of test scores. Passage is required for program completion/graduation.

*See "Admission to Teacher Education" and "Holmes Master's Programs Leading to Teacher Certification" for additional requirements for admission. Contact the Office of Student Services, College of Human Sciences and Education, for additional information on the PRAXIS Series.

Student Teaching

Application for Student Teaching

Application for student teaching must be made to the Office of Student Services no later than three weeks after classes begin in the semester *prior* to student teaching. Late applicants cannot be guaranteed consideration.

Requirements for Student Teaching

The student teaching semester is scheduled as an all-day, all-week experience with some programs requiring two semesters. LSU requirements for the student teaching experience far surpass the state minimum requirements of 270 clock hours, 180 of which must be actual teaching with a substantial portion thereof on an all-day basis.

All course requirements must be completed prior to student teaching, other than those courses requiring concurrent enrollment with student teaching. No student may schedule course work in addition to that required during the student teaching semester(s) without prior approval by the dean of the College of Human Sciences and Education through the Office of Student Services. Students are advised to schedule no more than 15 hours of employment weekly during student teaching. To be permitted to student teach, students must also meet the following requirements:

- LSU and cumulative GPAs of 2.50 with no grade lower than "C" in professional education courses and in other courses as required for certification, regardless of institution(s) attended.
- Proficiency in written expression.

University Laboratory School

OFFICE	109 Laboratory School
TELEPHONE	225-578-3221
FAX	225-578-3326
WEBSITE	www.uhigh.lsu.edu

The University Laboratory School, an integral part of the College of Human Sciences and Education, provides for observation, research, and pre-service field experiences in grades K through 12. The Laboratory School, therefore, maintains a staff of teachers for the purpose of instructing children, demonstrating teaching procedures to pre-service teachers and observers, developing innovative programs, conducting educational research, acquainting pre-service and in-service teachers with approved and tested teaching procedures and viewpoints, and mentoring pre-service teachers.

The Laboratory School serves as a demonstration center for educational methodology. Faculty members demonstrate reflective practice through classroom research relative to the development of concepts and principles. Graduate and undergraduate students observe and participate in the use of instructional and testing materials. Graduate students and university faculty utilize the school for research studies.

The Lab School offers a comprehensive college preparatory curriculum, including the International Baccalaureate Program, Advanced Placement, and Dual Enrollment classes. Combined, these offerings provide students with an opportunity to complete most/all of their core freshman courses for college prior to leaving high school. A limited number of pupils can be accommodated in the Laboratory School. The admission process is based on seventeen criteria for admission and can be found here. Tuition and activity fees are charged for each pupil in grades K-12. A construction fee is also charged that, although included as part of tuition, is designated for the purpose of construction related expenses.

Student Organizations

The college's Student Council includes student representatives and members-at-large from each department. The college also sponsors other organizations, including an honorary organization, *Kappa Delta Epsilon*; the Kinesiology Club; Alpha Tau Sigma, a professional student organization for athletic training students; the Association of Pre-Physical Therapy Students; the Physician Assistant Collegiate Society; and the Student Organization for Sport Management. Teacher certification students may also participate in student chapters of national organizations in their certification content area (such as National Association for the Education of Young Children, National Council of Teachers of English, National Council of Teachers of Mathematics, etc.). The college also sponsors Chi Sigma Iota, an honorary organization for graduate students in counseling.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

CURRICULA:

- Dual Certification General/Special Education: Grades 1-5
- Early Childhood Education: PK-3 Teacher Certification
- Elementary Grades Education

The School of Education offers undergraduate and graduate programs in curriculum and instruction and in educational leadership, research, and counseling. P-12 education programs prepare educational professionals to become reflective practitioners, effective professionals, and inquiring pedagogues.

Among graduate programs offered are those in educational leadership and research, school and community counseling, K-12 and higher education administration, educational research methodology, and educational technology. The department has as its mission the preparation of professional educational leaders and scholars knowledgeable in contemporary issues in education, creative in their efforts to address challenges in education and the community, and skilled in addressing the needs of an increasingly diverse clientele in various educational and human service arenas.

Holmes Master's Programs Leading to Teacher Certification

Elementary Holmes Program

- Students may enter the elementary education basic program after completing at least 24 hours of degree credit courses with a 2.50 GPA.
- Students who are in the elementary education basic program can apply for admission into the Elementary Homes Program during the spring of the junior year. Students should contact the Office of Student Services for the application process and timeline.
- Admission into the Elementary Holmes Program will be on a selective basis. Students will be selected from those candidates who meet the following requirements:
 - Completion of all undergraduate coursework with a GPA of at least 3.00 and all graduate courses with a GPA of at least 3.00;
 - Completion of all undergraduate professional education coursework and other courses as required for certification with no grade lower than a "C";
 - Acceptable GRE scores;
 - Passing scores on the Praxis I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030;
 - Passing scores on all required PRAXIS II tests; and

- Admission to the LSU Graduate School

Meeting the minimum admission requirements does not guarantee acceptance into the Elementary Holmes Program. A School of Education admissions panel will select from among qualified applicants those students to be admitted into the Elementary Holmes Program.

Secondary Grades Fifth Year Program

- Graduate year, subject-specific cohorts will be formed in the School of Education for graduate study in secondary education programs leading to initial teacher certification. Secondary teaching areas include English, mathematics, social studies, and the sciences.
- Undergraduate students interested in the fifth-year teacher education program should contact the College of Human Sciences and Education Office of Student Services upon admission to the university.
- Applicants may include candidates with degrees, as well as seniors finishing their programs in the various academic areas.

Admission requirements include:

- Acceptable scores on GRE;
- Completion of all undergraduate and graduate coursework with a GPA of at least 3.00;
- Passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 and on the appropriate PRAXIS II subject area/specialty test(s);
- Substantive current coursework in the content area as determined by program faculty;
- Completed materials for application to the fifth-year, subject-specific cohorts submitted to the Office of Student Services on or before **March 15**; and
- Admission to the LSU Graduate School

Meeting minimum requirements, including an undergraduate degree in an appropriate field and admission to the LSU Graduate School, does not guarantee admission to the fifth-year teacher education program. A School of Education admissions panel will select from among qualified applicants those students to be admitted into the subject-specific, fifth-year cohorts.

Minor

Special Education: Mild/Moderate Disabilities Grades 1-5 Minor

To graduate with a *minor in special education: mild/moderate disabilities grades 1-5*, students must be admitted to an initial elementary education teacher certification program. Students pursuing the minor must complete EDCI 3701, EDCI 3702, EDCI 3703, EDCI 4705, EDCI 4710, and ELRC 2507. Students desiring to obtain teaching certification in special education: mild/moderate disabilities grades 1-5 must also complete a student teaching requirement that integrates elementary and special education. The pursuit of certification in special education necessitates early and continuous advising by the Office of Student Services.

CURRICULUM:

- Human Resource Education

Students following this path will develop a 46 hour technical core in consultation with a faculty advisor.

The curriculum in human resource education is offered with an area of concentration in human resource leadership and development. This program of courses is available to prepare students for training and development careers in business, industry, and government. Students graduating from this program typically pursue careers in training and development, human resource development, training administration and consulting, classroom instruction, management development, career development, and technical training. This program emphasizes the application of education methodologies in the workplace and the unique needs of business, industry, and government.

This path includes study in principles of adult education, principles of training and development, instructional design methodologies, training delivery, administration of training programs, educational psychology, and workplace learning. Emphasis is placed on developing training professionals who have a variety of methodologies and skills to be able to respond to the diverse needs of the modern workplace. Students are also expected to develop a content specialization outside the training core as part of their program of study. The path includes sufficient flexibility for students to tailor the program to fit their career objectives as exhibited by the development of a 46-hour technical core in consultation with a faculty advisor.

Students interested in this area should contact the school prior to admission.

Master's and doctoral programs also are available. For additional information, see "The Graduate School" section or contact the School of Human Resource Education & Workforce Development.

The School of Human Resource Education & Workforce Development is accredited by the National Council for Accreditation of Teacher Education and is a member of the University Council for Workforce and Human Resource Education, a national consortium of leading research universities.

Admission into the School of Human Resource Education & Workforce Development for the Bachelor of Science in Human Resource Education

Students are eligible for admission to the school in accordance with admission and retention requirements prescribed by the College of Human Sciences and Education.

Students wishing to enter the School of Human Resource Education & Workforce Development Bachelor of Science degree program in Human Resource Education must satisfy the following minimum requirements:

- 24 earned semester hours with a 2.2 cumulative and LSU GPA;
- English proficiency – advanced placement in credit for, or grade of "C" or better in ENGL 1001 (ENGL 1004);
- General Education Math proficiency – advanced placement in credit for, or grade of "C" or better in MATH 1021 or higher

Major

Human Resource Education, B.S.

Students completing this curriculum are prepared for a wide range of employment options training and development in business and industry; and human resource development.

Area of Concentration

Human Resource & Leadership Development

CRITICAL REQUIREMENTS

SEMESTER 1: ENGL 1001; 2.0 Cumulative and LSU GPA.
SEMESTER 2: MATH 1021; 2.0 Cumulative and LSU GPA.
SEMESTER 3: MATH 1431; 2.1 Cumulative and LSU GPA.
SEMESTER 4: ENGL 2000; 2.2 Cumulative and LSU GPA.
SEMESTER 5: HRE 3071.

- Approved Elective (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical science, the additional three hour course must be taken from the life sciences, and vice versa.

² - For the 46 hours of technical courses required, students must complete the following courses: MGT 4620; HRE 3171 or AEA 3101; HRE 3571; SOCL 2001; HRE 4805; three hours from CMST 2010, CMST 2060, CMST 2061, CMST 2064; 12-hour block of approved human resource and development courses; choose either a second 12-hour block of approved specialization courses

or 12 hours from a list of electives approved by the faculty; and six hours of electives.

Minor

Leadership Development Minor

Students from all curricula will find themselves thrust into leadership roles within their profession and chosen organizations. This minor enables students from any major to develop the skills and competencies for leadership in any setting, including organizations and communities.

To graduate with a *minor in leadership development*, students must complete HRE 2723, HRE 3723, HRE 4723, HRE 4804, and six hours of electives from a list of courses approved by the departmental faculty in the School of Human Resource Education & Workforce Development.

An Honors version of the minor sequence is available and consists of HRE 2724, HRE 3724, HRE 4724, HNRS 3100 and six hours of electives from a list of courses approved by the department faculty in the School of Human Resource Education & Workforce Development.

CURRICULA:

- Athletic Training
- Kinesiology
- Sport Administration

The School of Kinesiology (KIN) provides undergraduate and graduate programs for students interested in the art and science of human movement and in the business of sport. Undergraduate curricula are offered in athletic training, kinesiology, and sport administration. Concentrations in the kinesiology curriculum include sports studies, fitness studies, human movement science, and K-12 health and physical education. Concentrations in the sport administration curriculum include sport commerce and sport leadership. Graduates pursue careers in K-12 educational settings, health and fitness programs, sport agencies and businesses, and professional programs such as allied health and medicine.

The School offers three bachelor's degrees: the Bachelor of Science in Athletic Training, the Bachelor of Science in Kinesiology, and the Bachelor of Science in Sport Administration. Requirements for each follow.

Admission into the School of Kinesiology for the Bachelor of Science in Athletic Training

Students wishing to enter the School of Kinesiology must satisfy the following minimum requirements:

- 24 earned semester hours with a 2.50 cumulative and LSU GPA;
- English proficiency—advanced placement in, credit for, or a grade of "C" or better in ENGL 1001 (ENGL 1004);

- Math proficiency—advanced placement in, credit for, or a grade of "C" or better in MATH 1021 and MATH 1022; and
- Biology proficiency—advanced placement in, credit for, or a grade of "C" or better in BIOL 1201, BIOL 1208, BIOL 1202, and BIOL 1209.

Students intending to obtain a Bachelor of Science in Athletic Training must be selected for admission after meeting the minimum departmental and degree criteria. Because of a limited number of clinical education sites, meeting all criteria for admission does not guarantee acceptance into the professional (clinical) phase of the degree program.

Admission Requirements in Athletic Training include the following:

- Completion of the Pre-Professional Orientation Meeting prior to obtaining the 100 hours of observational clinical experiences with the LSU Athletic Training staff. Dates and times for each meeting are available on the School of Kinesiology website or by contacting the Director;
- Evaluation of performance during observational experience;
- Grade of "B" or better in KIN 2503;
- Interview with program faculty;
- Ability to comply with the Bachelor of Science in Athletic Training's technical standards, with or without accommodation, which establishes the essential qualities considered necessary to achieve the knowledge, skills, and competencies of an entry-level athletic trainer. A copy of the technical standards can be found on the School of Kinesiology website;
- Completion of a physical examination through the LSU Student Health Center (forms obtained in the Pre-Professional Orientation Meeting);
- Favorable completion of an application packet provided by the Athletic Training Program Director after completing the Pre-Professional Meeting. The deadline to submit the application packet is 12:00 pm on the second Thursday in April. It must be addressed to the Athletic Training Program Director.

Completion of Degree

A degree in Athletic Training is conferred when the following conditions have been met:

- Completion of 125 hours with cumulative and LSU averages of 2.5 on all work taken, with no grade less than "B" in specialized academic courses;
- Successfully demonstrated competence/mastery of knowledge and skills as mandated by the Commission on Accreditation of Athletic Training Education (CAATE);
- Successfully meet all academic and clinical requirements set forth by the program in Athletic Training;
- Completion of the final 25 percent of the program in residence in the College of Human Sciences and Education on the LSU campus;
- Completion of the appropriate approved curriculum;
- Proficiency in written and verbal expression.

Special Program Requirements and Academic Probation/Dismissal

All students admitted to the Professional Phase of the Bachelor of Science in Athletic Training program must adhere to the program retention policies as stated in the Athletic Training Student Handbook. The following policies apply to all students admitted to the Professional Phase:

- A student who drops below a cumulative 2.50 GPA after being accepted to the Professional Phase of the program will be placed on academic probation during the following semester. The student may apply for re-entry after raising the cumulative GPA to 2.50 or better. Approval for re-entry is not guaranteed;
- A student who receives a grade lower than a "B" in any Bachelor of Science in Athletic Training course will be required to retake the course. Students may repeat a course once to achieve a "B" grade, but they will not be permitted to continue in those courses that require the deficient course as a prerequisite;
- A student who fails to maintain the required GPA, violates policies on established clinical site requirements, or violates codes of moral/ethical conduct may be dismissed from the Professional Phase of the program. (See current policies in the Athletic Training Student Handbook).

Any student requesting readmission to the Professional Phase must follow the appeal process as outlined in the current Athletic Training Student Handbook.

Students graduating with the Bachelor of Science in Athletic Training are eligible to sit for the Board of Certification (BOC) athletic training certification examination in order to become a Certified Athletic Trainer (ATC).

Admission into the School of Kinesiology for the Bachelor of Science in Kinesiology

Students wishing to enter the School of Kinesiology Bachelor of Science degree program must satisfy the following minimum requirements:

- 24 earned semester hours with a 2.50 cumulative and LSU GPA;
- *English proficiency*—advanced placement in, credit for, or a grade of "C" or better in ENGL 1001 (ENGL 1004);
- *Math proficiency*—advanced placement in, credit for, or a grade of "C" or better in MATH 1021 and MATH 1022; and
- *Biology proficiency*—advanced placement in, credit for, or a grade of "C" or better in BIOL 1201 and BIOL 1202.

Students intending to concentrate in *Health and Physical Education Certification* must meet the above minimum criteria and have acceptable scores on the PRAXIS I or minimum ACT composite of 22 or minimum SAT composite of 1030 to be formally admitted to the Health and Physical Education Certification Program. *Admission of students to upper division professional education courses (3000 level and above) is restricted to students who have been formally admitted to the College of Human Sciences and Education.*

Completion of Degree

A degree in kinesiology is conferred when the following conditions have been met:

- Completion of a minimum of curriculum with cumulative and LSU averages of 2.50 on all work taken, with no grade less than "C" in specialized academic courses and concentration courses
- Completion of the final 25 percent of the program in residence in the College of Human Sciences and Education
- Completion of the appropriate approved curriculum
- Proficiency in written expression

Admission into the School of Kinesiology for the Bachelor of Science in Sport Administration

Students wishing to enter the School of Kinesiology Bachelor of Science degree program in Sport Administration must satisfy the following minimum requirements:

- 24 earned semester hours with a 2.2 cumulative and LSU GPA;

- English proficiency - advanced placement in, credit for, or a grade of "C" or better in ENGL 1001 (ENGL 1004);
- General Education Math proficiency - advanced placement in, credit for, or a grade of "C" or better in six hours of Analytical Reasoning including at least one math course; and
- General Education Natural Science proficiency - advanced placement in, credit for, or a grade of "C" or better in three hours of General Education Natural Science.

Completion of Degree

A degree in sport administration is conferred when the following conditions have been met:

- Completion of curriculum with cumulative and LSU averages of 2.2 on all work taken, with no grade less than "C" in specialized academic courses and concentration courses
- Completion of the final 25 percent of the program in residence in the College of Human Sciences and Education
- Completion of the appropriate approved curriculum
- Proficiency in written expression

Major

Athletic Training, B.S.

Athletic Training

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; MATH 1021; 2.3 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MATH 1022; 2.5 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in BIOL 1201; 2.5 Cumulative and LSU GPA.

SEMESTER 4: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

SEMESTER 5: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; MATH 1021; 2.3 Cumulative and LSU GPA.

- ENGL 1001 English Composition (3)
- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- MATH 1021 College Algebra (3)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)

Total Semester Hours: 16

Semester 2

CRITICAL: “C” or better in MATH 1022; 2.5 Cumulative and LSU GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- MATH 1022 Plane Trigonometry (3)
- KIN 1804 Aerobic and Strength Activities (2)
- KIN 2501 History and Philosophy of Kinesiology (3)
- KIN 2503 Basic Athletic Training (2)
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 17

Semester 3

CRITICAL: “C” or better in BIOL 1201; 2.5 Cumulative and LSU GPA.

- KIN 1600 Individual Wellness and Public Health (3)
- KIN 2500 Human Anatomy (3)
- KIN 2505 Orthopedic Injury Evaluation Techniques I (3)
- KIN 3501 Advanced Athletic Training (3)
- KIN 3505 Practicum in Athletic Training (1)
- General Education course - Humanities (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

- ENGL 2000 English Composition (3)
- KIN 2504 Principles of Conditioning (3)
- KIN 2506 Orthopedic Injury Evaluation Techniques II (3)
- KIN 3500 Human Anatomy Laboratory (1)
- KIN 3505 Practicum in Athletic Training (1)
- KIN 3513 Introduction to Motor Learning (3)
- BIOL 2160 Human Physiology (3)

Total Semester Hours: 17

Semester 5

CRITICAL: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

- HUEC 1110 Introduction to Nutritional Sciences (3)
- PHYS 2001 General Physics I (3)
- KIN 3505 Practicum in Athletic Training (1)
- KIN 3608 Communicable and Noncommunicable Diseases (3)
- KIN 3512 Therapeutic Modalities (3)
- KIN 2601 First Aid (1)

- KIN 1802 Individual/Lifetime Activities (2) or
- KIN 1803 Team Activities (2)

Total Semester Hours: 16

Semester 6

- EXST 2201 Introduction to Statistical Analysis (4)

- KIN 3502 Tests and Measurements in Kinesiology (3)
- KIN 3505 Practicum in Athletic Training (1)
- KIN 3509 Therapeutic Exercise and Rehabilitation in Athletic Training (3)
- KIN 3515 The Physiological Basis of Activity (3)
- CMST 2060 Public Speaking (3)

Total Semester Hours: 17

Semester 7

- KIN 3505 Practicum in Athletic Training (1)
- KIN 3508 Organization and Administration in Athletic Training (3)
- KIN 3514 Biomechanical Basis of Kinesiology (3)
- EXST 2000 Introduction to Microcomputers (3) or
- CSC 1100 Computers in Society (3) or
- ISDS 1100 Introduction to Management Information Systems (3)
- General Education course - Humanities (3)

Total Semester Hours: 13

Semester 8

- KIN 3505 Practicum in Athletic Training (1)
- KIN 4512 Lifespan Motor Development (3)
- KIN 4520 Psychosocial Aspects of Physical Activity (3)
- KIN 4605 Habituating and Addictive Drugs in Our Culture (3)
- Approved Elective (3)¹

Total Semester Hours: 13

125 Total Sem. Hrs.

Semester 1 - Meet with Athletic Training faculty member to discuss program requirements; attend Pre-Professional Orientation Meeting.

Semester 2 - Attend Pre-Professional Orientation; complete Pre-Professional application requirements.

Semester 3 - Acceptance to Professional Phase of Athletic Training is required to enroll in the following courses: KIN 2505, KIN 3501, KIN 3505.

¹ - APPROVED ELECTIVES: CHEM 1001, KIN 2540, KIN 2600, KIN 2603, KIN 3534, KIN 3535, KIN 3605, KIN 3660 or KIN 4602.

*KIN 3505 is taken every semester after the freshman year.

Kinesiology, B.S.

Courses offered are of two types: (1) basic activity courses such as tennis, golf, etc. open to all students of the university; and (2) professional courses in kinesiology. All basic activity courses are offered on a pass/fail grade basis. Students in basic activity courses must furnish and wear clothing suitable to the activity.

Areas of Concentration

Fitness Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; MATH 1021; 2.2 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MATH 1022; 2.3 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in BIOL 1201; 2.4 Cumulative and LSU GPA.

SEMESTER 4: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

SEMESTER 5: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; MATH 1021; 2.2 Cumulative and LSU GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)

- ENGL 1001 English Composition (3) or
- ENGL 1004 English Composition (3)

- MATH 1021 College Algebra (3)

- General Education course - Arts (3)
- General Education course - Social Sciences (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1022; 2.3 Cumulative and LSU GPA.

- BIOL 1202 Biology for Science Majors II (3)
- KIN 2501 History and Philosophy of Kinesiology (3)
- MATH 1022 Plane Trigonometry (3)
- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in BIOL 1201; 2.4 Cumulative and LSU GPA.

- CMST 2060 Public Speaking (3)
- KIN 2500 Human Anatomy (3)
- KIN 2504 Principles of Conditioning (3)
- General Education course - Humanities (3)
- Approved Elective (3)¹

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

- BIOL 2160 Human Physiology (3)
- KIN 3502 Tests and Measurements in Kinesiology (3)
- ENGL 2000 English Composition (3)
- KIN 1804 Aerobic and Strength Activities (2)
- Approved Electives (6)¹

Total Semester Hours: 17

Semester 5

CRITICAL: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

- KIN 3513 Introduction to Motor Learning (3)
- KIN 3515 The Physiological Basis of Activity (3)
- PHYS 2001 General Physics I (3)
- KIN 3525 Laboratory Techniques in Exercise Physiology (1)
- KIN 1801 Movement Fundamentals for Physical Activity (2) or
- KIN 1802 Individual/Lifetime Activities (2) or
- KIN 1803 Team Activities (2)
- Concentration Elective (3)²

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - Select from the following five areas:

Occupational Therapy (17 hours)-CHEM 1201, CSC 1100 or ISDS 1100, KIN 2509, KIN 2601, KIN 3500 or KIN 3519; PSYC 2070 or PSYC 4070, PSYC 3082;

Electives (13 hours).

Physician Assistant (16 hours)-CHEM 1201, CHEM 1202, CHEM 1212, KIN 2509, KIN 3500 or KIN 3519; BIOL 2051;

Electives (14 hours).

Pre-Physical Therapy Graduate Study (23-24 hours)-CSC 1100 or ISDS 1100; CHEM 1201, CHEM 1202, CHEM 1212; PSYC 2070, PSYC 3082; BIOL 2051 or BIOL 3090 or BIOL 4104; ENGL 2001 or ENGL 2002 or ENGL 3003;

Electives (7-6 hours).

Premedicine (16 hours)-CHEM 1201, CHEM 1202, CHEM 1212, CHEM 2261, CHEM 2262, CHEM 2364;

Electives (14 hours).

Prekinesiology Graduate Study (15 hours)- fifteen hours of approved electives (list available from the school);

² - Human Movement Concentration PA & PT options must choose PSYC 2000 for three of six hours of General Education Social Sciences.

Human Movement Concentration OT option must choose PSYC 2000 and SOCL 2001 as General Education Social Sciences.

Sports Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; MATH 1021; 2.2 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MATH 1022; 2.3 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in BIOL 1201; 2.4 Cumulative and LSU GPA.

SEMESTER 4: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

SEMESTER 5: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; MATH 1021; 2.2 Cumulative and LSU GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)

- ENGL 1001 English Composition (3) or
- ENGL 1004 English Composition (3)

- MATH 1021 College Algebra (3)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1022; 2.3 Cumulative and LSU GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1022 Plane Trigonometry (3)
- KIN 2501 History and Philosophy of Kinesiology (3)
- General Education course - Social Sciences (2000-level) (3)
- General Education course - Humanities (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in BIOL 1201; 2.4 Cumulative and LSU GPA.

- CMST 2060 Public Speaking (3)
- KIN 2500 Human Anatomy (3)
- KIN 2504 Principles of Conditioning (3)
- KIN 1803 Team Activities (2)
- General Education course - Humanities (3)

Total Semester Hours: 14

Semester 4

CRITICAL: "C" or better in BIOL 1202 and KIN 2504; 2.5 Cumulative and LSU GPA; Admission to the College.

- BIOL 2160 Human Physiology (3)
- PHYS 2001 General Physics I (3)
- ENGL 2000 English Composition (3)
- KIN 2540 Introducing Physical Education for Individuals with Disabilities (3)
- KIN 1804 Aerobic and Strength Activities (2)

Total Semester Hours: 14

Semester 5

CRITICAL: "C" or better in ENGL 2000 and KIN 2500; 2.5 Cumulative and LSU GPA.

- KIN 3513 Introduction to Motor Learning (3)
- KIN 3502 Tests and Measurements in Kinesiology (3)
- KIN 1802 Individual/Lifetime Activities (2)

- PHIL 2018 Professional Ethics (3) or
- PHIL 2025 Bioethics (3) or
- POLI 2057 Introduction to International Politics (3) or
- PSYC 2000 Introduction to Psychology (3) or
- PSYC 2078 Adolescent Psychology (3) or
- HUEC 1110 Introduction to Nutritional Sciences (3) or
- SOCL 2001 Introductory Sociology (3)

³ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

Minor

Coach Education Minor

To graduate with a *minor in coach education*, students must complete 16 semester hours from the following: KIN 2503, KIN 2512, KIN 2526; select one from KIN 1802, KIN 1803, KIN 1804; select three from KIN 2511, KIN 2516, KIN 2518, KIN 2525 (three hours required).

Health Sciences Minor

To graduate with a *minor in health sciences*, students must complete 18 semester hours from the following: KIN 1600; 6 semester hours selected from KIN 2600, KIN 2603, KIN 2604, KIN 2577; 9 semester hours from KIN 3605, KIN 3608, KIN 3609, KIN 3660, KIN 4601, KIN 4602, KIN 4605, KIN 4606.

Sports Studies Minor

To graduate with a *minor in sports studies*, students must complete 18 semester hours from the following: KIN 2530, three activity courses and 12 semester hours from the following courses: KIN 2502, KIN 2511, KIN 2525, KIN 2526, KIN 3507, KIN 3800, KIN 4513, KIN 4515, KIN 4517, KIN 4800, MKT 3410.

School of Library & Information Science

OFFICE	267 Coates Hall
TELEPHONE	225-578-3158
FAX	225-578-4581
WEBSITE	www.slis.lsu.edu

For more information regarding the GRADUATE PROGRAM, [click here](#).

The School of Library & Information Science offers the Master of Library & Information Science degree (MLIS) which provides education for careers in all types of libraries (including school, public, academic, digital, medical, and law libraries), archives, and information centers. Students may complete the degree online, in face-to-face classes at LSU, or in a combination of both formats. The MLIS degree is accredited by the American Library Association. It is the only accredited MLIS degree in Louisiana.

A broad general education is the best preparation for library and information science. Undergraduates are advised to develop strong subject emphases in the areas of their special interests and abilities, since every field of knowledge is useful in the information professions. The school does not require a foreign language for admission; however, course work in one or more foreign languages is advisable for those who expect to prepare for careers in research or technical libraries. Students who expect to become librarians in elementary or secondary schools should plan their undergraduate programs with state teacher certification requirements in mind.

Students working toward the master's degree are enrolled in the Graduate School; therefore, applicants must meet the general Graduate School requirements in addition to the School of Library & Information Science requirements. Admission will be based on the candidate's scholastic record and aptitude for a career in the information professions.

Students will select one of three specializations focusing on libraries, archives, or information management. Within the libraries specialization, the School of Library & Information Science prepares students for a wide variety of careers within academic libraries, business libraries, digital libraries, law libraries, medical libraries, public libraries, school libraries, and technical and youth services within those types of libraries. The archives specialization prepares students for careers in institutional, private, and government archives. Information managers may find careers in libraries and archives as well as in government agencies and corporations.

All students take a common core of courses including:

- LIS 7004 Principles of Management for Librarians and Information Specialists (3)
- LIS 7008 Information Technologies (3)
- LIS 7011 Information Needs Analysis (3)
- LIS 7013 Evaluation of Information Systems (3)
- LIS 7901 Issues in Archives, Library, and Information Science (1)

Additional courses are required within each specialization and, with the advice of their major professors, students in each specialization also select additional elective courses to complete their degree requirements.

All MLIS students, regardless of specialization, must meet the following degree requirements:

- satisfactory completion of a minimum of 40 semester hours (see the "The Graduate School" for rules on transfer credit);
- successful performance on a written comprehensive final examination;
- completion of the degree program in five years. (Credit for individual courses taken more than five years before the completion of the program may be validated with the permission of the instructor of the course and the dean, and with approval of the dean of the Graduate School. Requirements for so doing are set in SLIS PS14.)

CURRICULUM:

- Child & Family Studies

The LSU School of Social Work was founded in 1937 in the era of the "New Deal" programs, reflecting a growing need for professional social workers. The school has a reputation for excellence in professional education and a long tradition of service to the professional community. The focus of the school is to educate competent, professional social workers and early childhood specialists, to use research to enhance the effectiveness of social work practice, and to practice in the fields of child and family studies and early childhood administration and leadership. The school has a commitment to culturally competent practice, an equally strong commitment to the social work profession's core values of social and economic justice, respect for the dignity and worth of each individual, and the centrality of human relationships to well-being. The research infrastructure of the school includes active programs in the areas of juvenile justice, poverty, mental health, addictions, gerontology, community development, and child welfare. The school is a charter member of the Council on Social Work Education and its master's program has maintained continuous accreditation with this body since its inception.

CURRICULUM IN CHILD & FAMILY STUDIES

The undergraduate curriculum in Child & Family Studies provides students with the background needed to subsequently pursue exciting and challenging careers in working with families and/or children. Employers include cooperative extension; non-profit and private agencies; faith-based organizations; consumer and business agencies and organizations; and federal, state, and local government. Many students pursue a graduate degree in Child & Family Studies or in closely related fields such as social work, counseling, and marriage and family therapy.

A practicum experience during the junior year allows students to gain field experience at an agency of their choosing. Field experience is expanded during the senior year to include a more intensive semester-long field internship at another student-selected agency, thereby offering students entry into the field of interest to them and providing them with post-graduation employment possibilities. Graduates with a concentration in Child & Family Studies are eligible to apply to the National Council on Family Relations for the provisional Certified Family Life Educator (CFLE) credential.

Admission into the School of Social Work for the Bachelor of Science in Child & Family Studies

Students wishing to enter the School of Social Work Bachelor of Science degree program in Child & Family Studies must satisfy the following minimum requirements:

- 24 earned semester hours with a 2.20 cumulative and LSU GPA;

- English proficiency – advanced placement in credit for, or grade of "C" or better in ENGL 1001 (ENGL 1004);
- General Education proficiency – advanced placement in credit for, or grade of "C" or better in MATH 1021 or higher.

- Department of Sociology

The College of Humanities & Social Sciences' primary purpose is to afford the student a liberal education, which by its nature is broad rather than narrow, devoted to intellectual development and discipline rather than to the acquisition of technical skills. It should give the student some knowledge of the achievements of the human mind, with special reference to the western civilization of which both the ancient world and contemporary America are parts; the historical and cultural backgrounds essential to a true understanding of our world; and above all, orderly thinking processes and a scale of values by which the distinction can be made between permanent and trivial, substantial and pretentious, good and bad. To that end, some familiarity with historical and political studies, the sciences, and the arts is necessary.

As a human being and as a citizen, the student will find this education of lasting significance. As a member of a profession, each student will find desirable backgrounds for scholarship and teaching in all fields of knowledge and for law and medicine, which stress, increasingly, the value of broad intellectual training.

The curricula within the college require a number of courses which are deemed essential—individually and as a group—to the intellectual competence at which the liberal education aims; in addition to these, the student has electives which may be used to further general knowledge or to specialize in certain fields.

To accomplish its primary purpose, the college offers Bachelor of Arts, Bachelor of Science, and Bachelor of Interdisciplinary Studies degrees. By completing a major in the college, the student will obtain a much broader background than is generally possible under the standard curriculum. The advantages of broad training for everyday life are obvious. Moreover, the added breadth of knowledge will be helpful in case the student continues beyond the bachelor's degree level.

Degree Programs

The following undergraduate degrees in the College of Humanities & Social Sciences are Bachelor of Arts degrees:

Anthropology	Communication Disorders	Communication Studies
Economics	English	French

Geography	History	International Studies
Liberal Arts	Philosophy	Political Science
Sociology	Spanish	

The following undergraduate degrees in the College of Humanities & Social Sciences are Bachelor of Science degrees:

Geography	Psychology
-----------	------------

The College of Humanities & Social Sciences also offers a Bachelor of Interdisciplinary Studies degree.

Admission Requirements

Students will be admissible to the College of Humanities & Social Sciences if they have earned at least 24 semester hours; have a grade point average of at least 2.00 ("A" = 4) in all work taken within the LSU System and in all work taken overall; completed ENGL 1001 with a "C" or better; and completed three hours of the general education analytical reasoning requirement. Students majoring in psychology, communication disorders, or any of the secondary education areas of concentration must have a GPA of at least 2.50 in all work taken within the LSU System and in all work taken overall. Students majoring in any of the secondary education areas of concentration must have a passing score on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030 to declare their respective concentration.

Transfer students from other divisions of the university and other accredited colleges and universities must meet the eligibility requirements stated above. Students transferring from another institution must also meet university transfer admission requirements. Transfer credits acceptable for admission shall be valid for degree credit in the college only to the extent to which they represent courses acceptable in the curricula of the college.

General Education Requirements

General education requirements of the university are included in the curricula of the various departments in the college. For specific information concerning these requirements, see the "General Education Requirements" section of this catalog.

Degree Requirements of the College

General Requirements

In order to qualify for a bachelor's degree in this college, a candidate must satisfy these requirements:

- Meet departmental/program requirements for the major and all university requirements as detailed in the "General Education Requirements" section of this catalog, except that the general education humanities requirement cannot be fulfilled with a foreign language. (Students who break residence, either voluntarily or by compulsion, for at least two consecutive semesters may not elect a catalog earlier than the one in force at the time of their re-entry.)
- A minimum GPA of 2.00 on all work taken in the LSU System and on all work taken overall. A 2.50 LSU system and cumulative grade point average is required for students graduating in any of the secondary education concentrations.
- A minimum GPA in the major field of 2.00 on all work taken in the LSU System and on all work taken overall.
- A minimum grade of "C" in all academic content (major) and education courses for students in secondary education concentrations (English, French, history, or Spanish).
- A minimum of 30 semester hours in courses numbered 3000 or above. A minimum of 45 hours in courses numbered 3000 or above for the interdisciplinary studies major (15 of which must be at the 4000 level).
- Degree credit will not be allowed for more than nine semester hours of 1000 level mathematics courses below 1550.

- A minimum of 15 semester hours in residence in the major field, including at least nine semester hours in courses numbered 3000 or above.
- A minimum of 30 semester hours in residence in the college. The last year of work (last 30 semester hours) will be taken in residence in this college on the LSU campus.
- *Foreign Language*—A minimum of 14-16 credits (four semesters) in a foreign language for the BA or BS degrees. Students should take a placement test and register at the appropriate level. Students who have a native fluency in a language other than English may satisfy the foreign language requirement in one of three ways: (a) by completing the prescribed number of hours in the curriculum for the BA or BS degree in a language *other than* English or their native language; (b) by taking a minimum of 12 hours in courses numbered 3000 or above in their native language; or (c) by taking nine semester hours of English and/or communication studies above the minimum general education or major requirements. (Only three hours may be earned in ENGL 2001 or ENGL 2002 to meet this requirement. Professional and specialized courses in communication studies may not be counted toward this requirement.) Students who have a native fluency in a language other than English should consult credit restrictions in that language under the appropriate foreign language departmental entry in this section of the catalog.
- *Grade Point Average Maintenance*—A student who fails to earn a 2.00 semester average in any one semester, regardless of cumulative GPA, will be placed on college probation. To be removed from college probation, a student must earn a 2.00 or better semester GPA, correct course deficiencies, and make satisfactory progress in the degree program. A student who fails to earn a 2.00 GPA for two consecutive semesters, regardless of cumulative GPA, will be dropped from the college.
- *Scholastic Requirements*—Full-time students are expected to make reasonable and satisfactory progress in a degree program.

The college reserves the right to review at any time a student's suitability to continue in a degree program.

Enrollment in Two Degree Programs

Double Majors—Students may pursue double majors in this college. By completing all residence and academic requirements for the two programs, a student may earn one bachelor's degree with two majors.

Dual Degrees within the College of Humanities & Social Sciences—Students may pursue dual degrees in this college. Both majors must be offered by departments/programs within the college. By completing residence and academic requirements, and earning 30 hours over the degree requirements, a student may earn two separate bachelor's degrees.

Dual Enrollment in the College of Humanities & Social Sciences and a Second Academic College—By completing residence and academic requirements for two degree programs and earning 30 hours more than the degree requiring the fewer number of hours, a student can earn two bachelor's degrees. The student must be accepted for admission to both colleges. In addition, the student must declare a home college where registration will be initiated and permanent files maintained. It is the student's responsibility, however, to maintain contact with the second college to ensure that satisfactory progress is being made toward that degree.

Requirements for a Second Bachelor's Degree

To qualify for a second bachelor's degree in this college, students must meet the admission requirements of the college and the department/program. Once admitted, students must complete (with at least a 2.00 GPA) a minimum of 30 semester hours, including any degree requirements not previously met. The 30 hours must be completed in residence in the College of Humanities & Social Sciences.

Graduation with College Honors

To graduate "with College Honors" in the College of Humanities & Social Sciences, a student must meet the following requirements:

- achieve "Sophomore Honors Distinction"

- take at least 12 semester hours of honors seminars or departmental honors courses beyond the minimum required for "Sophomore Honors Distinction"
- register in a curriculum offered in the College of Humanities & Social Sciences
- complete a curriculum of courses approved by the department concerned and by the dean and the faculty of the Honors College. This curriculum should be developed using the general curricular principles of the college, the purposes of which are to afford students a liberal education and to include (besides the major field) historical and political studies, the life and physical sciences, the humanities, and the arts
- demonstrate competence in a major field by doing independent research, writing a senior thesis, and taking an oral examination. The thesis counselor and one additional member of the student's committee must be from the student's major department.
- after the freshman year, maintain at least a 3.33 GPA ("A" = 4.00)

Pass-Fail Option

Students in the College of Humanities & Social Sciences may register for courses on a pass-fail basis under the following conditions:

- Only *free elective* courses may be taken on a pass-fail basis. Required courses and restricted electives may not be taken on a pass-fail basis. A student may not take courses offered by the Honors College on a pass-fail basis.
- A student must have permission (by signature on a petition form) from the dean of this college, the instructor of the course, and the dean of the college in which the course is offered.
- Pass-fail registration must be completed before the final day for adding courses.
- Eligible students may take one course per semester on a pass-fail basis.

Courses offered by the College of Humanities & Social Sciences that are required in a student's curriculum will not be approved on a pass-fail basis.

Independent and Distance Learning Credit

A maximum of 30 semester hours of Independent and Distance Learning (IDL) credit are acceptable toward meeting degree requirements. Students who wish to have IDL credits accepted by this college must make their registration in IDL courses a matter of record in the office of the dean of the college at the time of such registration.

Students registered in the college may enroll in a maximum of 19 semester hours of combined resident and IDL coursework during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL coursework during a summer term. *Students may not be enrolled in IDL coursework within their last semester. All IDL coursework must be completed by the last weekday of final examinations in the semester prior to the one in which the student intends to graduate. Depending on the IDL course, a special time limit may be imposed by the dean's office.*

Electives

A student in the College of Humanities & Social Sciences may elect for degree credit any course offered by the following programs, departments, or schools:

Aerospace Studies	African & African American Studies	Art	Art History
-------------------	------------------------------------	-----	-------------

Biological Sciences	Chemistry	Communication Sciences & Disorders	Communication Studies
Comparative Literature	Curriculum & Instruction	Disaster Science & Management	Economics
Educational Leadership, Research, & Counseling	English	Entomology	Environmental Studies
Experimental Statistics	Film and Media Arts	Foreign Languages & Literatures	French Studies
Geography & Anthropology	Geology & Geophysics	History	Honors
International Studies	Linguistics	Mathematics	Military Science
Music	Oceanography & Coastal Sciences	Philosophy & Religious Studies	Physics & Astronomy
Political Science	Psychology	Sociology	Theatre
Women's & Gender Studies			

Students may select elective courses in departments not listed above. Students must meet all prerequisites for these courses. Twenty-four semester hours of elective credit in such courses may be counted toward degree requirements from this college. A student may receive a maximum of 12 semester hours of degree credit in ROTC. No more than eight hours of kinesiology activity courses may count toward degree requirements from this college.

Placement Services

Students in this college may use the services of the university's Career Services Center. These services include counseling, job-seeking skills workshops, job search handbooks, résumé service, career days, and on-campus recruiting and interviews.

Study Abroad

Students in the College of Humanities & Social Sciences are encouraged to participate in the study abroad programs administered by the Office of Academic Programs Abroad and the International Student Exchange Program. Students who participate in these programs must receive departmental evaluations of the courses to be taken prior to going abroad. In addition, students must make an appointment with a counselor to ensure that degree credit will be granted upon return to LSU.

National Student Exchange

LSU cooperates with a number of other universities throughout the United States in an exchange program. Students may spend one year (usually the junior year) at another university at little or no more cost than they pay at LSU. Additional information can be obtained from the Office of Academic Programs Abroad.

Preparation for the Study of Law

Because of the rich complexity of this discipline, students with very different academic backgrounds can undertake and excel in the study of law. *There is no single curriculum or course of study which is prerequisite to or guarantees success in law school.* Curricula in the College of Humanities & Social Sciences provide excellent preparation for students who intend to study law.

The degree requirements of the college ensure the development of the following skills, which are essential components of pre-law training: (1) the ability to express oneself competently in writing; (2) the ability to understand the human institutions and

values with which the law deals; and (3) the ability to think creatively. Students who intend to pursue a legal career are therefore encouraged to choose a curriculum in the College of Humanities & Social Sciences.

Minor Field Requirements (Optional)

Although students are not required to pursue a minor field (except in the interdisciplinary studies major), they may choose to do so under the following guidelines:

- Earn a minimum of 15-18 semester hours in the minor field, of which at least six semester hours must be in courses taken on this campus at the 3000 and/or 4000 level; see individual departments in the "Departments and Curricula" section of this chapter for more specific requirements.
- Earn a minimum GPA *in the minor field* of 2.00 on all work taken in the LSU System *and* on all work taken overall.
- Courses used to satisfy minor requirements may not be taken on a pass/fail basis.

Minor fields may be selected from any major field currently offered by the college in which appropriate requirements for a minor have been established or any field of an interdisciplinary nature for which a minor has been approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs.

Minors may also be taken in fields outside the college if:

- the total number of semester hours does not exceed 24 (total number of non-Humanities & Social Sciences electives that may be counted toward graduation);
- the work conforms to guidelines established by the department, school, and college concerned;
- the work meets the general minor field requirements of the College of Humanities & Social Sciences, as stated above.

Teacher Preparation Program for Grades 6-12

The Departments of English, Foreign Languages & Literatures, French Studies, and History offer undergraduate degree programs with an area of concentration in secondary education (middle school and high school). Students in the program may receive a bachelor's degree in English, French, history, or Spanish and qualify for teacher certification. The curricula have been developed cooperatively with faculty in the College of Human Sciences and Education and include courses taught jointly by faculty in the College of Humanities & Social Sciences and the College of Human Sciences and Education. Students completing these degree programs and meeting any additional requirements of the Louisiana State Department of Education will be eligible for certification in the state of Louisiana as teachers in grades six through 12.

The following requirements pertain to students enrolled in the secondary education concentration:

Admissions Requirements:

- Minimum cumulative and LSU grade point average of 2.50
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum cumulative and LSU grade point average of 2.50 for entry into and continuation in upper (3000/4000) level education courses, including student teaching

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university, and the Louisiana Board of Elementary and Secondary Education

- Minimum cumulative and LSU GPA of 2.50 on all work completed
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

A second option for students interested in teaching in the above areas at the middle/high school level is to pursue a traditional bachelor's degree in the content area and then complete a master's degree through the LSU College of Human Sciences and Education. The master's degree program (Holmes Program) begins in June and requires 12 consecutive months of course work and classroom experience leading to both the master's degree and teaching certification. Information about the program and potential scholarship assistance is available through the College of Human Sciences and Education, Office of Student Services.

Honors Courses

Besides courses offered through the Honors College, other honors courses are offered through various departments, including:

- ANTH 4999
- BIOL 1503
- CHEM 1421
- CHEM 1422
- CHEM 1431
- CHEM 2463
- ENGL 3000
- ENGL 3821
- ENGL 3822
- ENGL 3823
- ENGL 3824
- ENGL 3825
- GEOG 4999
- GEOL 1002
- GEOL 1004
- HIST 1002
- HIST 1004
- MATH 1551
- MATH 1553
- MATH 2058
- PHIL 2034
- PHIL 2036
- PHIL 2053
- POLI 1002
- POLI 2052
- POLI 3000
- POLI 3809
- POLI 3896
- POLI 3897
- PSYC 2001
- REL 1007
- REL 2006
- REL 2030
- REL 2031
- SOCL 2002
- SOCL 3905
- SPAN 2104

HSS Student Council/Clubs

The college's Student Council is composed of student representatives from the college's departments, as well as members at large. The purpose of the council is to enhance the academic environment in the college. In addition, many departments sponsor clubs with programs of interest to majors.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

For information on the department's course offerings, see the "***COURSE SEARCH***" chapter in this catalog.

Minor

Aerospace Studies Minor

To graduate with a *minor in aerospace studies*, students must complete at least 18 hours of coursework: 12 hours from ASST 3001, ASST 3002, ASST 4001, and ASST 4002; and six hours of the following electives: ENGL 2012, and either MATH 1021, MATH 1022, MATH 1023, or MATH 1550.

- Other elective courses acceptable for the minor in aerospace studies in lieu of ENGL 2012 include HIST 4055, HIST 4066, or HIST 4140.
- Students may earn up to an additional four hours beyond the minimum 18 hours by completing ASST 1001, ASST 1002, ASST 2001, or ASST 2002 for a maximum of 22 hours.
- Students must obtain approval from the professor of aerospace studies prior to substituting HIST for ENGL, or any other course substitutions.

For information regarding the GRADUATE PROGRAM, click [here](#).

The undergraduate curriculum is designed to provide majors with a liberal arts education and to prepare them for entry into graduate programs in communication disorders. In the master's program, students are provided with clinical experiences and academic course work necessary for national clinical certification in speech-language pathology. The doctoral program is geared toward the development of scholarship and research skills to prepare students for traditional academic positions, both in the basic sciences of speech, language, and hearing and in clinical aspects of communication disorders.

LSU Speech and Hearing Clinic • As part of its training program, which is accredited in speech-language pathology, the department maintains a clinic for the diagnosis and treatment of communication disorders including articulation, dysfluency, cleft palate, voice disorders, aphasia, cerebral palsy, children's language disorders, and hearing disorders. Clinical services are available to any individual, university student, or community member having speech, hearing, or language problems. Services are free to LSU students.

Graduate students concentrating in speech-language pathology obtain practicum experience in the university clinic and in community clinics with which the university training program is affiliated, such as the Baton Rouge Speech and Hearing Foundation, Baton Rouge General Medical Center, Ochsner Clinic, Our Lady of the Lake Regional Medical Center, Earl K. Long Medical Center, Veteran's Administration hospitals, public schools, and other sites.

Those requesting clinical services should contact the Speech and Hearing Clinic in Hatcher Hall (225-578-9054).

Major

Communication Disorders, B.A.

Communication Disorders

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: First course in Foreign Language Sequence.

SEMESTER 3: COMD 2050; Second course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: COMD 2081.

SEMESTER 5: COMD 4150, COMD 4250; "C" or better in COMD 4380; ENGL 2000.

Admission to a curriculum in the Department of Communication Sciences and Disorders requires that a student be admissible to the College of Humanities & Social Sciences and have a GPA of 2.50 or above on all work taken within the LSU System and on all work taken overall. Majors in Communication Disorders are required to take the following courses: BIOL 2160, EXST 2201, COMD 2050, COMD 2081, COMD 4150, COMD 4153, COMD 4190, COMD 4250, COMD 4380, COMD 4381, COMD 4382, and COMD 4590. For any of the following courses used to satisfy this requirement, a grade of "C" or higher is required: COMD 4380, COMD 4381, COMD 4382, and COMD 4590. Prospective students who have not attained a 2.50 average may petition the Department's Committee of Undergraduate Advisors for a waiver of the 2.50 requirement based on special circumstances.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives and the general education life and physical sciences, literature, mathematics, and social sciences requirements.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Arts (3)
- MATH 1021 College Algebra (3)

Total Semester Hours: 16

Semester 2

CRITICAL: First course in Foreign Language Sequence.

- General Education course - Humanities (3)

- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Social Sciences (3)
- Approved Elective (0-2)

Total Semester Hours: 13-15

Semester 3

CRITICAL: COMD 2050; Second course in Foreign Language Sequence; Admission to the College.

- BIOL 2160 Human Physiology (3)
- COMD 2050 Introduction to Language (3)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)

Total Semester Hours: 16-15

Semester 4

CRITICAL: COMD 2081.

- COMD 2081 Introduction to Communication Disorders (3)
- ENGL 2000 English Composition (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- General Education course - Humanities (3)
- Fourth Course in Foreign Language Sequence (4-3)

Total Semester Hours: 17-16

Semester 5

CRITICAL: COMD 4150, COMD 4250; "C" or better in COMD 4380; ENGL 2000.

- COMD 4150 Phonetics (3)
- COMD 4250 Anatomy and Physiology of Speech and Hearing (3)
- COMD 4380 Speech and Language Development (4)
- Approved Elective (3)

Total Semester Hours: 13

Semester 6

- COMD 4153 Acoustics of Speech and Hearing (4)
- COMD 4190 Introduction to Audiology (3)
- COMD 4381 Basic Articulation Disorders (3)
- COMD 4382 Basic Language Disorders of Children (3)
- Approved Elective (3)

Total Semester Hours: 16

Semester 7

- COMD 4590 Auditory Rehabilitation in Children (3)
- Approved Electives (11)

Total Semester Hours: 14

Semester 8

- Approved Electives (15)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

Department of Communication Studies

OFFICE	136 Coates Hall
TELEPHONE	225-578-4172
FAX	225-578-4828
WEBSITE	www.lsu.edu/cmst

For information regarding the GRADUATE PROGRAM, [click here](#).

Communication Studies explores how people sustain and change, experience, and make sense of the world through symbolic action. Students develop conceptual skills to analyze written, oral, and visual messages. Students gain practical experience in areas such as public speaking, group decision-making, performance, and film. Such skills are elemental to careers in business, government, law, social services, and the arts.

The program consists of three areas: rhetoric, performance studies, and communication theory. In rhetoric, students examine public discourse and persuasion. Course topics include rhetorical criticism, political communication, and visual rhetoric. In performance studies, students investigate everyday life performance, experimental forms, and the performance of literature and other texts, including film and video. In communication theory, students focus on personal and organizational settings, studying such topics as family, health, and nonverbal communicative processes.

Students are encouraged to participate in extracurricular activities, including public performances in the HopKins Black Box and the Mixon Lyceum, our forensics and debate team.

Major

Communication Studies, B.A.

Communication Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: CMST 1150; First course in Foreign Language Sequence.

SEMESTER 3: CMST 2060; Second course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: CMST 2010/CMST 2064 or CMST 2040; General Education Analytical Reasoning.

SEMESTER 5: CMST 2010/CMST 2064 or CMST 2040

Majors in Communication Studies must complete a minimum of 36 semester hours of approved electives in the department. At least 12 of these hours must be numbered 3000 or above. Students should contact the undergraduate advisor to decide on a program of approved electives; see the CMST website for suggestions on topical foci. Twelve hours of core courses are required: CMST 1150; CMST 2060; CMST 2010 or CMST 2064; and CMST 2040.

Consult "Degree Requirements of the College" for specific instructions regarding electives and foreign language requirements. Consult the "General Education" section of the catalog for the university's general education requirements.

The department requires that the two course sequence in natural science be accompanied by two hours of corresponding labs.

The departmental computer literacy requirement is satisfied by taking LIS 1001.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- CMST 1150 Introduction to Communication Studies (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (0-1)¹

Total Semester Hours: 13-14

Semester 2

CRITICAL: CMST 1150; First course in Foreign Language Sequence.

- CMST 2060 Public Speaking (3)
- LIS 1001 Library Research Methods and Materials (1)
- Second Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from Mathematics) (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Natural Sciences Lab (2-1)¹

Total Semester Hours: 16-15

Semester 3

CRITICAL: CMST 2060; Second course in Foreign Language Sequence; Admission to the College.

- CMST 2010 Interpersonal Communication (3) or
- CMST 2064 Small Group Communication (3)

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- Approved Electives (3-5)

Total Semester Hours: 13-14

Semester 4

CRITICAL: CMST 2010/CMST 2064 or CMST 2040; General Education Analytical Reasoning.

- CMST 2040 Introduction to Performing Literature (3)
- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (3)
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: CMST 2010/CMST 2064 or CMST 2040

- Approved CMST Electives (6)
- General Education course - Humanities (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- Approved CMST Electives (6)
- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (5)

Total Semester Hours: 17

Semester 7

- Approved CMST Electives (6)
- General Education course - Arts (3)
- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- Approved CMST Electives (6)
- General Education course - Humanities (3)
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - For General Education Natural Sciences, both physical & life sciences must be taken: six hours in a physical/life sciences SEQUENCE and two hours lab credit associated with the sequence chosen; three hours in an area (phys/life) not previously selected.

Minor

Communication Studies Minor

A *minor in communication studies* requires CMST 1150 or CMST 1061 and at least 12 additional hours in departmental courses, of which at least six hours must be at the 3000 level or above.

Comparative Literature (Interdepartmental Program)

OFFICE	422 Hodges Hall
TELEPHONE	225-578-6670
FAX	225-578-6628
WEBSITE	www.lsu.edu/complit
E-MAIL	complitlsu@lsu.edu

For more information regarding the GRADUATE PROGRAM, [click here](#).

The program offers the PhD in comparative literature. Required courses include:

- *History of Literary Criticism: From Antiquity to the Enlightenment*—CPLT 7010
- *Modern Literary Criticism and Theory*—CPLT 7020
- *Topics in Theory of Criticism*—CPLT 7120
- *Topics in Comparative Literature*—CPLT 7130
- *Topics in the Interdisciplinary Study of Literature*—CPLT 7140

The program also offers a graduate *minor in comparative literature*, which requires 12 hours of CPLT courses and satisfaction of the language requirement.

Economics (Intercollegiate Program)

For information regarding the GRADUATE PROGRAM, [click here](#).

The Bachelor of Arts in Economics is a 120-hour program offered to students in the College of Humanities & Social Sciences. A minor in economics is also available in the College of Humanities & Social Sciences. Students *majoring in economics* in the College of Humanities & Social Sciences are required to take ECON 2000, ECON 2010, ECON 2035, ECON 4710 and ECON 4720. Other economics courses (at least 30 semester hours) must be chosen with the advice and approval of the College of Humanities & Social Sciences advisor in the Department of Economics.

The learning objectives for students include:

- Identify the role of supply and demand in a market economy.
- Identify the necessary conditions for market economies to function well.
- Discuss market system advantages and pricing.
- Understanding of the economic role of government policy and the Federal Reserve.
- Define and analyze economic problems using algebraic and statistical methods.
- Identify the benefits and costs of a global economy.

Major

Economics, B.A.

Economics, B.A.

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: ECON 2000; MATH 1021.

SEMESTER 3: ECON 2010; Admission to the College.

SEMESTER 4: ECON 2035; MATH 1431.

SEMESTER 5: ECON 4710; ENGL 2000.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives and the general education life and physical sciences, literature, mathematics, and social sciences requirements.

If graduate study in economics is anticipated, it is strongly recommended that the calculus sequence, MATH 1550, MATH 1552, and MATH 2085, be taken.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- ECON 2000 Principles of Microeconomics (3)
- MATH 1021 College Algebra (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Life/Physical Sciences Course (3)¹
- Life/Physical Sciences Lab (0-1)¹

Total Semester Hours: 16-17

Semester 2

CRITICAL: ECON 2000; MATH 1021.

- ECON 2010 Principles of Macroeconomics (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Life/Physical Sciences (3)¹
- Life/Physical Sciences Lab (2-1)¹
- Approved History Elective (3)

Total Semester Hours: 15-14

Semester 3

CRITICAL: ECON 2010; Admission to the College.

- ECON 2035 Money, Banking and Macroeconomic Activity (3)
- MATH 1431 Calculus with Business and Economic Applications (3)
- Approved History Elective (3)
- Third Course in Foreign Language Sequence (4-3)
- Approved Literature Course (3)
- Approved Elective (0-2)

Total Semester Hours: 16-17

Semester 4

CRITICAL: ECON 2035; MATH 1431.

- ENGL 2000 English Composition (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Life/Physical Sciences (one semester lecture in alternate science) (3)¹
- Approved Literature Course (3)

Total Semester Hours: 17-16

Semester 5

CRITICAL: ECON 4710; ENGL 2000.

- ECON 4710 Aggregate Economic Analysis (3)
- Approved Economics Elective (3)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- ECON 4720 Intermediate Microeconomic Theory (3)
- General Education course - Humanities (other than English or foreign language) (3)
- Approved Social Sciences Course (not from HIST or ECON) (3)²
- Approved Electives (5)

Total Semester Hours: 14

Semester 7

- General Education course - Humanities (3)
- Approved Social Sciences course (not HIST or ECON) (3)²
- Approved Economics Elective (3)
- Approved Electives (4)

Total Semester Hours: 13

Semester 8

- Approved Economics Electives (6)
- Approved Social Sciences course (not from HIST or ECON) (3)²
- Approved Electives (5)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - For General Education Natural Sciences, both physical and life sciences must be taken: six hours in a physical/life sciences sequence and two hours lab credit associated with the sequence chosen; three hours in an area (physical/life) not previously selected.

² - Select nine hours of Social Sciences electives in two fields from the following: AAAS****, ANTH****, COMD****, GEOG****, INTL****, POLI****, PSYC**** and SOCL****.

Not from: COMD 2050, GEOG 2050, or GEOG 2051.

Area of Concentration

Empirical Economic Analysis

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: ECON 2000; MATH 1021.

SEMESTER 3: ECON 2010; Admission to the College.

SEMESTER 4: ECON 2035; MATH 1431; EXST 2201.

SEMESTER 5: ENGL 2000.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives and the general education life and physical sciences, literature, mathematics, and social sciences requirements.

If graduate study in economics is anticipated, it is strongly recommended that the calculus sequence, MATH 1550, MATH 1552, and MATH 2085, be taken.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- ECON 2000 Principles of Microeconomics (3)
- MATH 1021 College Algebra (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Life/Physical Sciences (3)¹
- Life/Physical Sciences Lab (0-1)¹

Total Semester Hours: 16-17

Semester 2

CRITICAL: ECON 2000; MATH 1021.

- ECON 2010 Principles of Macroeconomics (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Life/Physical Sciences (3)¹
- Life/Physical Sciences Lab (2-1)¹

- Approved History Elective (3)

Total Semester Hours: 15-14

Semester 3

CRITICAL: ECON 2010; Admission to the College.

- ECON 2035 Money, Banking and Macroeconomic Activity (3)
- MATH 1431 Calculus with Business and Economic Applications (3)
- Approved History Elective (3)
- Third Course in Foreign Language Sequence (4-3)
- Approved Literature Course (3)
- Approved Elective (0-2)

Total Semester Hours: 16-17

Semester 4

CRITICAL: ECON 2035; MATH 1431; EXST 2201.

- ENGL 2000 English Composition (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Life/Physical Sciences (one semester lecture in alternate science) (3)¹
- Approved Literature Course (3)

Total Semester Hours: 17-16

Semester 5

CRITICAL: ENGL 2000.

- ECON 4630 Introduction to Econometrics (3)
- ECON 4710 Aggregate Economic Analysis (3)
- General Education course - Social Sciences (3)
- Approved Electives (6)

Total Semester Hours: 15

Semester 6

- ECON 4631 Econometric Methods (3)
- General Education Course - Arts (3)
- General Education Course - Humanities (other than English or foreign language) (3)
- Approved Social Sciences Course (Not from HIST or ECON) (3)²
- Approved Elective (2)

Total Semester Hours: 14

Semester 7

- ECON 4720 Intermediate Microeconomic Theory (3)
- General Education course - Humanities (3)
- Approved Social Sciences course (not from HIST or ECON) (3)²
- Approved Electives (4)

Total Semester Hours: 13

Semester 8

- ECON 4633 Time Series Data Analysis (3)
- Approved Economics Elective (3)
- Approved Social Sciences Course (Not from HIST or ECON) (3)²

- Approved Electives (5)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - For General Education Natural Sciences, both physical and life sciences must be taken: six hours in a physical/life sciences sequence and two hours lab credit associated with the sequence chosen; three hours in an area (physical/life) not previously selected.

² - Select nine hours of Social Sciences electives in two fields from the following: AAAS****, ANTH****, COMD****, GEOG****, INTL****, POLI****, PSYC**** and SOCL****.

Not from: COMD 2050, GEOG 2050, or GEOG 2051.

Minor

Economics Minor

To graduate with a *minor in economics*, students in the College of Humanities & Social Sciences must complete ECON 2030 (or ECON 2000 and ECON 2010), ECON 2035, ECON 4720, ECON 4710, and six additional hours in economics.

Department of English

OFFICE	260 Allen Hall
TELEPHONE	225-578-4086
FAX	225-578-4129
WEBSITE	www.english.lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

Undergraduates expecting to do graduate work should plan to take the Graduate Record Examination during the fall semester preceding their graduation. Graduate students should consult the section titled "Department of English" in "The Graduate School" section.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives and foreign language requirements.

Consult "General Education" section of the catalog for the general education requirements.

Students who are not exempt will be required to pass one, two or three English composition courses. Placement level depends on ACT/SAT/AP scores or prior college credit. Required courses must be taken progressively. The completion of ENGL 2000 or its equivalent (ENGL 1005 for international students or approved transfer credit) is required of all students.

The satisfactory completion of ENGL 1001 or equivalent credit is prerequisite for all English courses numbered 2000 and higher.

Major

English, B.A.

Areas of Concentration

Students majoring in English must complete, with at least a 2.00 average, a total of 36 semester hours in the subject, 15 of which must be in courses numbered 3000 or above.

A special curriculum leading to the BA degree with departmental honors in English is also offered. Details are available from the departmental office.

Consult “*Degree Requirements of the College*” in this section of the catalog for specific instructions regarding electives and foreign language requirements.

Consult “General Education” section of the catalog for the general education requirements.

Creative Writing

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Course from INTRO TO LITERARY STUDY.

SEMESTER 3: Course from INTRO TO LITERARY STUDY; Admission to the College.

SEMESTER 4: ENGL 2000; Course from INTRO WRITING.

SEMESTER 5: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from Mathematics) (3)
- General Education course - Natural Sciences Sequence (3)¹
- General Education course - Humanities (other than English or Foreign Language) (3)

Total Semester Hours: 16

Semester 2

CRITICAL: Course from INTRO TO LITERARY STUDY.

- Intro to Literary Study (3)²
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences Sequence (3)¹

- Approved Electives (3-5)

Total Semester Hours: 13-15

Semester 3

CRITICAL: Course from INTRO TO LITERARY STUDY; Admission to the College.

- Intro to Literary Study (3)²
- Intro Writing (3)³
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13-12

Semester 4

CRITICAL: ENGL 2000; Course from INTRO WRITING.

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Arts (3)
- Approved Electives (6)

Total Semester Hours: 16-15

Semester 5

CRITICAL: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

- Intro Writing (3)³
- British/American Literature Survey (3)⁴
- General Education course - Analytical Reasoning (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- British/American Literature Survey (6)⁴
- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (8)

Total Semester Hours: 17

Semester 7

- Area of Concentration Course (3)⁵
- Area of Concentration Course (3)⁶
- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- ENGL 4102 Capstone Seminar in Writing Poetry (3) or
- ENGL 4105 Capstone Seminar in Writing Fiction (3) or
- ENGL 4109 Capstone Seminar in Screenwriting (3)⁷

- Area of Concentration Course (3)⁶
- Upper Division English Elective (3)
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If a two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Choose six hours from the following: ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123/ENGL 2823, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2220, or ENGL 2270.

³ - Choose six hours from the following: ENGL 2005, ENGL 2007, ENGL 2008, or ENGL 2009.

⁴ - Choose nine hours from the following: ENGL 3020, ENGL 3022, ENGL 3070, or ENGL 3072.

⁵ - Choose three hours from the following: ENGL 4137, ENGL 4147 or ENGL 4148.

⁶ - Choose six hours from the following: ENGL 4000, ENGL 4001, ENGL 4005, ENGL 4006, ENGL 4007, ENGL 4008, or ENGL 4009.

⁷ - ENGL 4102 prerequisite is ENGL 4007; ENGL 4105 prerequisite is ENGL 4005; ENGL 4109 prerequisite is ENGL 4009.

Literature

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Course from INTRO TO LITERARY STUDY.

SEMESTER 3: Course from INTRO TO LITERARY STUDY; Admission to the College.

SEMESTER 4: ENGL 2000; Course from BRITISH/AMERICAN LITERATURE SURVEY.

SEMESTER 5: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from Mathematics) (3)
- General Education course - Natural Sciences Sequence (3)¹
- General Education course - Humanities (other than English or foreign language) (3)

Total Semester Hours: 16

Semester 2

CRITICAL: Course from INTRO TO LITERARY STUDY.

- Intro to Literary Study (3)²
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences Sequence (3)¹
- Approved Electives (3-5)

Total Semester Hours: 13-15

Semester 3

CRITICAL: Course from INTRO TO LITERARY STUDY; Admission to the College.

- Intro to Literary Study (3)²
- British/American Literature Survey (3)³
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13-12

Semester 4

CRITICAL: ENGL 2000; Course from BRITISH/AMERICAN LITERATURE SURVEY.

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Arts (3)
- Approved Electives (6)

Total Semester Hours: 16-15

Semester 5

CRITICAL: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

- ENGL 3024 Criticism (3) or
- ENGL 3084 Modern Criticism (3)

- British/American Literature Survey (3)³
- General Education course - Analytical Reasoning (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- Area of Concentration Course (3)⁴
- British/American Literature Survey (3)³
- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (8)

Total Semester Hours: 17

Semester 7

- Area of Concentration Course (3)⁴
- Upper-Division English Elective (3)⁵
- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- ENGL 4104 Capstone Seminar in Literature (3)
- Upper Division English Electives (6)⁵
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Choose six hours from the following: ENGL 2024/ENGL 2824, ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123/ENGL 2823, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2220, ENGL 2270, or ENGL 2300.

³ - Choose nine hours from the following: ENGL 3020, ENGL 3022, ENGL 3070, or ENGL 3072.

⁴ - Choose three hours from the following: ENGL 2593, ENGL 2673, ENGL 2674, ENGL 3080, ENGL 3593, ENGL 3674, ENGL 4593, ENGL 4674, or ENGL 4680 **and** choose three hours from the following: ENGL 4137, ENGL 4147, or ENGL 4148.

⁵ - Nine hours of Upper-Division English electives, three of which must be at the 4000-level.

Rhetoric, Writing, and Culture

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Course from INTRO TO LITERARY STUDY.

SEMESTER 3: ENGL 2300; Admission to the College.

SEMESTER 4: ENGL 2000; Course from LOWER-LEVEL RW&C CORE.

SEMESTER 5: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from Mathematics) (3)
- General Education course - Natural Sciences Sequence (3)¹
- General Education course - Humanities (other than English or foreign language) (3)

Total Semester Hours: 16

Semester 2

CRITICAL: Course from INTRO TO LITERARY STUDY.

- ENGL 2300 Interpreting Discourse (3)
- Intro to Literary Study (3)²
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences Sequence (3)¹
- Approved Elective (0-2)

Total Semester Hours: 13-15

Semester 3

CRITICAL: ENGL 2300; Admission to the College.

- Approved Elective (3)
- Lower Level Rhetoric, Writing & Culture Core (3)³
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13-12

Semester 4

CRITICAL: ENGL 2000; Course from LOWER-LEVEL RW&C CORE.

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Arts (3)
- Approved Electives (6)

Total Semester Hours: 16-15

Semester 5

CRITICAL: First Course in Foreign Language Sequence; Course from BRITISH/AMERICAN LITERATURE SURVEY.

- Upper Level Rhetoric, Writing & Culture Core (3)⁴
- British/American Literature Survey (3)³
- General Education course - Analytical Reasoning (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- Area of Concentration Course (3)⁵

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Choose three hours from the following: ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123/ENGL 2823, ENGL 2148, ENGL 2201, ENGL 2202, ENGL 2220, or ENGL 2270.

³ - Choose six hours from the following:

Lower Level RW&C Core: three hours from ENGL 2012, ENGL 2024/ENGL 2824, ENGL 2423, or ENGL 2710;

British/American Literature Survey Courses: three hours from ENGL 3020, ENGL 3022, ENGL 3070, or ENGL 3072.

⁴ - Choose six hours from the following: three hours from ENGL 3024, ENGL 3084, ENGL 3384; three hours from ENGL 3300, ENGL 3301, ENGL 3310, ENGL 3401, ENGL 3716, ENGL 3720, or ENGL 4710.

⁵ - Choose six hours from the following: ENGL 4300, ENGL 4301, ENGL 4302, ENGL 4310, ENGL 4475, ENGL 4493, ENGL 4711/ENGL 4712, or ENGL 4713/ENGL 4715.

Secondary Education - English

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in course from ENGLISH MAJOR; 2.5 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in course from ENGLISH MAJOR; 2.5 Cumulative and LSU GPA; Admission to the College.

SEMESTER 4: "C" or better in EDCI 2001; First Course in Foreign Language Sequence; ENGL 2000; 2.5 Cumulative and LSU GPA.

SEMESTER 5: "C" or better in EDCI 3001 and ENGL 3201; Second Course in Foreign Language sequence; 2.5 Cumulative and LSU GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

- ENGL 1001 English Composition (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from Mathematics) (3)
- General Education course - Natural Sciences Sequence (3)¹
- Approved Elective (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in course from ENGLISH MAJOR; 2.5 Cumulative and LSU GPA.

- English Major (3)²
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences Sequence (3)¹
- General Education course - Humanities (other than English or foreign language) (3)
- Approved Elective (0-2)

Total Semester Hours: 13-15

Semester 3

CRITICAL: "C" or better in course from ENGLISH MAJOR; 2.5 Cumulative and LSU GPA; Admission to the College.

- ENGL 2710 Descriptive Grammar of English (3) or

- ENGL 2012 Practical Grammar and Usage (3)

- English Major (3)²
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- General Education course - Arts (3)

Total Semester Hours: 16-15

Semester 4

CRITICAL: "C" or better in EDCI 2001; First Course in Foreign Language Sequence; ENGL 2000; 2.5 Cumulative and LSU GPA.

- EDCI 2001 Education, Schooling and Society (3)
- ENGL 2000 English Composition (3)

- ENGL 3015 Composition Tutoring (3) or
- ENGL 3301 Writing: Practice, Pedagogy and History (3)

- British/American Literature Survey (3)³
- Fourth Course in Foreign Language Sequence (4-3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: "C" or better in EDCI 3001 and ENGL 3201; Second Course in Foreign Language sequence; 2.5 Cumulative and LSU GPA.

- EDCI 3001 Student Development and Diversity (3)
- ENGL 3201 Language Development and Diversity (1)

- EDCI 3223 Adolescent Literature (3)
- British/American Literature Survey (3)³
- Area of Concentration Course (3)⁴
- General Education course - Analytical Reasoning (3)

Total Semester Hours: 16

Semester 6

- EDCI 3136 Reading in the Content Areas (3)
- ENGL 3202 Dynamics of Learning in the English Classroom (1)

- LING 4710 Introduction to Linguistics (3) or
- LING 4711 History of the English Language (3)

- British/American Literature Survey (3)³
- English Course (4000-level) (3)
- General Education course - Social Sciences (3)

Total Semester Hours: 16

Semester 7

- EDCI 4003 Curriculum and Pedagogy in Secondary Disciplines (3)
- ENGL 4203 Curricula, Pedagogy and Assessment in the English Classroom (1)
- English Course (4000-level) (3)
- Approved Electives (5)

Total Semester Hours: 12

Semester 8

- EDCI 4004 Critical Issues in Secondary School Content Area Teaching (3)
- EDCI 4005 Student Teaching in Grades 6-12 Humanities (9)
- ENGL 4204 Capstone Seminar in English Education (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Choose six hours from the following: ENGL 2024/ENGL 2824, ENGL 2025, ENGL 2027, ENGL 2029, ENGL 2123/ENGL 2823, ENGL 2148 ENGL 2300, ENGL 2593, ENGL 2673, or ENGL 2674.

³ - Choose nine hours from the following: ENGL 3020, ENGL 3022, ENGL 3070, or ENGL 3072.

⁴ - Choose three hours from the following: ENGL 3024, ENGL 3084, or ENGL 3384.

Minor

English Minor

Students *minoring in English* must complete 18 semester hours of English courses in addition to freshman English. Minimum requirements are six hours of 2000 level English courses, excluding ENGL 2000; six hours from ENGL 3020, ENGL 3022, ENGL 3070, ENGL 3072, ENGL 3300, ENGL 3301, ENGL 3310, ENGL 3024; and six additional hours of English courses numbered 3000 or above.

Persons whose native language is German may not take for credit courses GERM 1101, GERM 1102, GERM 2101, and GERM 2102, or GERM 2155 in that language.

Beginning and intermediate Spanish are taken in the following sequence: SPAN 1101, SPAN 1102, SPAN 2101, and SPAN 2102. Students who have taken high school Spanish will be placed according to the number of years they studied Spanish. Students who have fluency in Spanish may not take courses numbered below 3000.

Major

Spanish, B.A.

Spanish

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; SPAN 1101.

SEMESTER 2: SPAN 1102.

SEMESTER 3: SPAN 2101; Admission to the College.

SEMESTER 4: SPAN 2102.

SEMESTER 5: SPAN 2155, SPAN 2156, SPAN 3010.

Students majoring in Spanish must receive credit for a minimum of 33 hours in Spanish numbered above SPAN 2102, including SPAN 2155, SPAN 2156, SPAN 3010, SPAN 3020, SPAN 4005 and any four of the following nine: SPAN 3015, SPAN 3043, SPAN 3044, SPAN 3070, SPAN 3071, SPAN 3072, SPAN 3073, SPAN 3074, or SPAN 3980 and at least six hours of 4000 level courses.

Native speakers majoring in Spanish must substitute any 3000 or 4000 level Spanish elective for SPAN 2155 and SPAN 2156. Students who have fluency in Spanish may not take courses numbered below 3000.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives. Consult "General Education" section of the catalog for the general education requirements.

Semester 1

CRITICAL: "C" or better in ENGL 1001; SPAN 1101.

- ENGL 1001 English Composition (3)
- SPAN 1101 Elementary Spanish (4) ³
- General Education course - Analytical Reasoning (from Mathematics) (3)

- SPAN 4004 Critical Issues in Teaching Spanish as a Second Language: Capstone Course (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - SPANISH ELECTIVES: Choose four from the following: SPAN 3015, SPAN 3043, SPAN 3044, SPAN 3070, SPAN 3071, SPAN 3072, SPAN 3073, SPAN 3074, SPAN 3980.

³ - OPTION: SPAN 1152 may be taken in place of SPAN 1101 and SPAN 1102. If selecting this option, it is recommended that SPAN 1152 be taken in the first semester.

Minor

Arabic Studies Minor

To obtain a *minor in Arabic studies*, a student must complete ARAB 2101, ARAB 2102, ARAB 3101, and ARAB 3102 and six hours of approved electives (20 hours total). A list of approved electives is available from the Department of Foreign Languages & Literatures.

Asian Studies Minor

To graduate with a *minor in Asian studies*, students must complete at least 18 hours, including at least two courses from any two of the following three groups. Of these courses, at least six hours must be taken at LSU at the 3000 or 4000 level.

- *Humanities*—ARTH 2411, ARTH 4441, ARTH 4442, ARTH 4443, ARTH 4444; REL 2027, REL 3786, REL 4600, REL 4800; CHIN 2070; HIST 4191/REL 4191; CLST 3090; ENGL 3080, ENGL 4680; INTL 4002/ANTH 4002/GEOG 4002/REL 4001.
- *Social Sciences*—GEOG 1003, HIST 2096, HIST 4050, HIST 4078, HIST 4091, HIST 4092, HIST 4093, HIST 4094, HIST 4097; POLI 4067, POLI 4079.
- *Languages*—CHIN 1101, CHIN 1102, CHIN 2001, CHIN 2002, CHIN 3101, CHIN 3102; CHIN 3801/JAPN 3801.

Other courses acceptable for general credit in Asian Studies, subject to the approval of the Asian Studies faculty, include INTL 4100; ECON 4520; HIST 3117, HIST 4195; REL 3300, REL 4010; HNRS 2012, HNRS 2013.

For additional information, contact the program's director at asianstudies@lsu.edu or visit www.lsu.edu/asianstudies.

Chinese Culture and Commerce Minor

To graduate with a *minor in Chinese Culture and Commerce*, students must complete 18 hours, six hours from each of three groups listed below, at least six hours from 3000 or 4000 level. *Group I (Arts: Language and Literature, Film, and Popular Culture, Art)*— CHIN 1101, CHIN 1102, CHIN 2001, CHIN 2002, CHIN 3101, CHIN 3102, CHIN 3801, ARTH 2411, ARTH 4441; *Group II (Commerce and Social Sciences: Geography and Anthropology, Political Science, Business)*— POLI 4067, POLI 4079, ISDS 4160, GEOG 4037, MGT 3111 (when topic is China), MGT 4420 (when topic is China), GBUS 4040; ECON 4530; *Group III (History, Religion, Special Topics)*—HIST 2096, HIST 4091, HIST 4092, REL 2027, REL 4191, CHIN 2070.

Chinese Minor

To graduate with an undergraduate *minor in Chinese*, students must complete 20 semester hours above CHIN 1102, including CHIN 2001, CHIN 2002, CHIN 3101, CHIN 3102, and six hours of approved electives. A list of approved electives is available in the Department of Foreign Languages and Literatures.

Classical Civilization Minor

To obtain a *minor in Classical Civilization*, a student must have a minimum of 16 hours of approved courses, of which no more than six hours may be taken outside the department. At least six hours must be at the 3000 level or above. Any course in Latin or Greek language may count toward the minor, as may any Classical Studies course except CLST 2092. At least nine hours must come from Classical Studies courses. A list of courses outside the department which may count toward the minor is available in the departmental office.

German Minor

A *minor in German* consists of a total of 22 hours, six of which must be numbered 3000 or above.

Greek Minor

To obtain a *minor in Greek*, a student must have a minimum of 16 hours of instruction in GREK at the 2000 level and above. At least six hours must be taken at the 3000 level or above.

Italian Minor

A *minor in Italian* will consist of ITAL 1001, ITAL 1002, ITAL 2101, ITAL 2102, and nine hours of course work above ITAL 2102, six hours of which must be at the 3000/4000 level.

Jewish Studies Minor

To graduate with a *minor in Jewish Studies*, students in the College of Humanities & Social Sciences must complete 15 hours of electives, including a minimum of six hours at the 3000 level or above. Electives must be chosen from at least two of the following areas:

- *Religious Studies*—REL 1001, REL 1002, REL 1004, REL 1007, REL 2003, REL 2004, REL 2029, REL 2120, REL 3004, REL 3100, REL 3101, REL 3104, REL 3124, REL 4125, and depending on the topic, REL 4236
- *Hebrew*—HEBR 1001, HEBR 1002, HEBR 2003, HEBR 2004
- *Literature*—ENGL 3124, and depending on the topic, ENGL 3220, ENGL 4055, ENGL 4086, ENGL 4122, ENGL 4231, ENGL 4236, ENGL 4593
- *History*—HIST 4026, HIST 4125
- *Anthropology*—ANTH 3004

For courses that are listed “depending on the topic,” students are required to petition to have these courses count and present appropriate documentation indicating the work was completed. In addition, special topics courses and courses with sections advertised as Jewish studies may be accepted for the minor upon approval of the director.

For additional information, contact Associate Professor Daniel A. Novak, 212B Allen Hall, 225-578-2877, dnovak@lsu.edu.

Latin Minor

To obtain a *minor in Latin*, a student must have a minimum of 16 hours of instruction in LATN at the 2000 level and above. At least six hours must be taken at the 3000 level or above.

Spanish Minor

Requirements for a *minor in Spanish* are completion of 18 semester hours above SPAN 2102, including SPAN 2155, SPAN 2156, SPAN 3010, and nine hours of courses at the 3000/4000 level. Native speakers minoring in Spanish must substitute any 3000 or 4000 level Spanish elective for SPAN 2155 and SPAN 2156.

WEBSITE	www.ga.lsu.edu
E-MAIL	gachair@lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

CURRICULA:

- Anthropology
- Geography, B.A.
- Geography, B.S.

Geography

Students majoring in geography may earn either the Bachelor of Arts or Bachelor of Science degree. Students interested in physical geography normally enter the Bachelor of Science program, and those interested in human geography enter the Bachelor of Arts program.

All requirements specified by the College of Humanities & Social Sciences for these respective degrees must be fulfilled. Candidates for the bachelor's degree with a major in geography must complete a curriculum of 33 semester hours for the Bachelor of Arts and 36 semester hours for the Bachelor of Science. Both consist of 15 hours of core courses (GEOG 1001, GEOG 1003, GEOG 2050, GEOG 2051, and GEOG 2055). For the Bachelor of Arts, nine hours of mapping sciences and nine hours in human geography (six hours systematic and three hours regional) are required, or for the Bachelor of Science, nine to 12 hours of mapping sciences and nine to 12 hours of physical geography are required.

Students may elect to modify the curriculum to fit specific needs, but this must be done in consultation with the departmental advisor. Special emphases are offered in mapping sciences, cultural and historical geography, economic and urban geography, Latin America, Asia, coastal and fluvial geomorphology, and climatology.

Students majoring in geography must pay a field service fee of \$20 per semester for undergraduates and \$25 per semester for graduates. Students not majoring in geography or anthropology who schedule courses requiring field service will be assessed a pro rata part of the transportation costs, as determined by the department chair.

GEOG 4999 is an honors course.

Anthropology

A Bachelor of Arts is offered in anthropology. Because it is a broad study of peoples, students majoring in anthropology are urged to take courses in the sciences, the social sciences, and the humanities.

Departmental course requirements are few. Students must complete ANTH 1001 and ANTH 1003 and at least three courses from the following: ANTH 2015, ANTH 2051, ANTH 3060, ANTH 4040. A minimum of 24 semester hours in anthropology is required. Courses in archaeology, cultural anthropology, folklore, physical anthropology, and anthropological linguistics are available.

Through consultation with their departmental counselor, students design a specific program to fit their needs.

Because anthropology is a field science, students participate in numerous field trips. To help defray expenses, a field service fee of \$20 per semester is charged to undergraduate majors and \$25 per semester for graduate majors. Non-majors participating in field trip courses will be assessed a fee on a pro rata basis.

Major

Anthropology, B.A.

Anthropology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: ANTH 1001/ANTH 1003.

SEMESTER 3: ANTH 1001/ANTH 1003; First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: ANTH Elective course; Second Course in Foreign Language Sequence.

SEMESTER 5: ANTH Elective course; ENGL 2000.

Students majoring in anthropology should request the pamphlet entitled "Undergraduate Program in Anthropology" from the departmental office or from their faculty advisor.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)

- ANTH 1001 Introduction to Physical Anthropology and Prehistory (3) or

- ANTH 1003 Introduction to Cultural and Social Anthropology (3)

- First Course in Foreign Language Sequence (4)

- General Education course - Natural Sciences (3)¹

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)
- MATH 1021 College Algebra (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 2

CRITICAL: GEOG 1001/GEOG 1003; MATH 1021.

- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (other than English or foreign language) (3)

Total Semester Hours: 13

Semester 3

CRITICAL: GEOG 1001/GEOG 1003; First Course in Foreign Language Sequence; Admission to the College.

- GEOG 2050 Physical Geography: The Atmosphere (3) or
- GEOG 2051 Physical Geography: Land and Water Surfaces, Plant and Animal Realms (3)

- CSC 1250 Introduction to Programming (3) or
- CSC 1253 Computer Science I with C++ (3)

- MATH 1022 Plane Trigonometry (3)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16-15

Semester 4

CRITICAL: GEOG 2050/GEOG 2051/GEOG 2055; Second Course in Foreign Language Sequence.

- GEOG 2050 Physical Geography: The Atmosphere (3) or
- GEOG 2051 Physical Geography: Land and Water Surfaces, Plant and Animal Realms (3)

- ENGL 2000 English Composition (3)
- GEOG 2055 Map Reading (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- Fourth Course in Foreign Language Sequence (4-3)

Total Semester Hours: 18-17

Semester 5

CRITICAL: GEOG 2050/GEOG 2051/GEOG 2055; ENGL 2000.

- EXST 2201 Introduction to Statistical Analysis (4)
- GEOG Electives: Group A (6)²
- General Education course - Arts (3)
- General Education course - Humanities (other than foreign language) (3)

Total Semester Hours: 16

Semester 6

- GEOG Elective(s): Group A (3-6)²
- Science Elective (3000-level or above and other than GEOG) (3)
- Approved Electives (6-8)

Total Semester Hours: 12-17

Semester 7

- GEOG Elective(s): Group B (6-3)²
- General Education course - Social Sciences (other than GEOG) (3)
- Approved Electives (8)

Total Semester Hours: 17-14

Semester 8

- GEOG Electives: Group B (6)²
- General Education course - Humanities (other than foreign language) (3)
- General Education course - Social Sciences (other than GEOG and at the 2000-level) (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - If emphasizing MAPPING SCIENCES: select 12 hours from Group A; 9 hours from Group B. If emphasizing PHYSICAL GEOGRAPHY: select 9 hours from Group A, 12 hours from Group B.

-- Group A: GEOG 2039, GEOG 4020, GEOG 4041, GEOG 4044, GEOG 4045, GEOG 4047, GEOG 4048.

-- Group B: GEOG 4013, GEOG 4014, GEOG 4015, GEOG 4016, GEOG 4018, GEOG 4022, GEOG 4024, GEOG 4029, GEOG 4070, GEOG 4083.

Minor

Anthropology Minor

Requirements for a *minor in anthropology* are ANTH 1001, ANTH 1003, and nine hours to be taken from the following three groups with no more than six hours total from any one group: *Group 1 (method and laboratory)*– ANTH 2016, ANTH 3401, ANTH 4010, ANTH 4020, ANTH 4021, ANTH 4083, ANTH 4090; *Group 2 area*–ANTH 2050, ANTH 3004, ANTH 4003, ANTH 4004, ANTH 4017, ANTH 4023, ANTH 4050, ANTH 4051, ANTH 4053, ANTH 4470, ANTH 4475; and *Group 3 (topical)*–ANTH 2015, ANTH 2051, ANTH 2423, ANTH 3060, ANTH 4013, ANTH 4018, ANTH 4031, ANTH 4040, ANTH 4060, ANTH 4074, ANTH 4082, ANTH 4085, ANTH 4086, ANTH 4440. In addition, ANTH 4909, ANTH 4998, and ANTH 4999 may be included in the nine hours. Placement of these courses in the above groups depends on the topic and must be determined by the department on a case-by-case basis.

Geographic Information Systems Minor

The *minor in Geographic Information Systems (GIS)* provides students with training in critical GIS skills in acquiring, managing, analyzing, and presenting spatial data and prepares them for an ever expanding GIS job market in the public, not-for-profit, or private sectors.

To graduate with a minor in GIS, students must complete 15 hours of course work. Prerequisites may extend the hours beyond 15.

Required core courses (9 hours): GEOG 4045, GEOG 4047, GEOG 4048; Selecting from (6 hours): GEOG 2039, GEOG 2055, GEOG 4020, GEOG 4042, GEOG 4044, GEOG 4046; ENV5 4145, ENV5 4149 or any courses approved by the program director.

Geography Minor

Requirements for a *minor in geography* are one course selected from GEOG 1001 or GEOG 1003; GEOG 2050 and GEOG 2051; one course selected from GEOG 2039, GEOG 4020, GEOG 4041, and GEOG 4045; and two additional 4000 level geography courses.

For information regarding the GRADUATE PROGRAM, [click here](#).

A special curriculum leading to the BA degree with departmental honors in history is also offered. Details are available from the departmental office.

The department offers programs of study leading to the MA and PhD degrees.

Major

History, B.A.

History

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: HIST 1001/HIST 1005 or HIST 1003/HIST 1007.

SEMESTER 3: HIST 1001/HIST 1005 or HIST 1003/HIST 1007; First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: HIST 2055/HIST 2057; Second Course in Foreign Language Sequence.

SEMESTER 5: HIST 2055/HIST 2057; ENGL 2000.

Students majoring in history must complete 33 semester hours, including HIST 1001 or HIST 1005, HIST 1003 or HIST 1007, HIST 2055, HIST 2057, and at least 15 semester hours in history courses 3000 or above. No more than 12 of the 15 may be taken in any one of the following general subject areas: U.S. History, European History, and non-Western Developing Nations History (Latin America, East Asia, South Asia, Africa, and the Middle East). The remaining six hours of history courses must be taken at the 2000 level or above. Students majoring in history must also complete six semester hours of approved literature courses unless they are following the concentration in Secondary Education. Fundamental courses in economics, geography, political science, psychology, and sociology are also recommended.

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding approved electives and foreign language requirements.

Consult "General Education" section of the catalog for the general education requirements.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1005 World History to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- HIST 1007 World History Since 1500 (3)

- First Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 2

CRITICAL: HIST 1001/HIST 1005 or HIST 1003/HIST 1007.

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1005 World History to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- HIST 1007 World History Since 1500 (3)

- Second Course in Foreign Language Sequence (4)
- General Education course - Arts (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 3

CRITICAL: HIST 1001/HIST 1005 or HIST 1003/HIST 1007; First Course in Foreign Language Sequence; Admission to the College.

- HIST 2055 The United States to 1865 (3) or
- HIST 2057 The United States from 1865 to the Present (3)

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)¹
- Approved Literature course (3)

Total Semester Hours: 16-15

Semester 4

CRITICAL: HIST 2055/HIST 2057; Second Course in Foreign Language Sequence.

- HIST 2055 The United States to 1865 (3) or

- HIST 2057 The United States from 1865 to the Present (3)

- ENGL 2000 English Composition (3)
- Approved Literature course (3)
- Fourth Course in Foreign Language Sequence (4-3)
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: HIST 2055/HIST 2057; ENGL 2000.

- Approved History Electives (6)
- General Education course - Social Sciences (3)
- Approved Electives (6-7)

Total Semester Hours: 15-16

Semester 6

- Approved History Elective (3)
- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (6-7)

Total Semester Hours: 15-16

Semester 7

- EDCI 4005 Student Teaching in Grades 6-12 Humanities (9)
- HIST 4404 Seminar in History and the Social Sciences (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Area requirements I: complete nine hours in one of the following: 1) ECON 2000, ECON 2010, ECON 2035, and ECON 4400 or ECON 4720; or 2) three hours from GEOG 1001, GEOG 1003, ANTH 1003; three hours from GEOG 2050, GEOG 2051; three hours from GEOG 4031, GEOG 4052, ANTH 4023, ANTH 4053, GEOG 4073, GEOG 4077; or 3) POLI 2051, POLI 2056; and three hours in a POLI course, at the 3000-level or above.

³ - Area requirements II: Complete nine hours in one of the fields not chosen for Area Requirements I: 1) ECON 2000, ECON 2010, ECON 2035; or 2) three hours from GEOG 1001, GEOG 1003, ANTH 1003; three hours from GEOG 2050, GEOG 2051; three hours from GEOG 4031, GEOG 4052, ANTH 4023, ANTH 4053, GEOG 4073, GEOG 4077 ; or 3) POLI 2051, POLI 2056, and three hours in a POLI course, at the 3000-level or above.

⁴ - Area requirements III: Complete three hours in the field not chosen for Area Requirements I and II: (1) ECON 2000, ECON 2010, ECON 2030; or (2) GEOG 1001, GEOG 1003, GEOG 2050, GEOG 2051; or (3) POLI 2051, POLI 2056 or POLI 2057.

Minor

History Minor

A *minor in history* requires a total of at least 18 hours, including any two-semester six-hour course sequence at the 1000 or 2000 level; three courses at the 3000 or 4000 level; and one additional three hour course in history.

Interdisciplinary Studies (Interdepartmental Program)

OFFICE	155 Hodges Hall
TELEPHONE	225-578-3141
FAX	225-578-6447

The Bachelor of Interdisciplinary Studies degree program is for the student whose professional goals and educational objectives are optimally satisfied by a focused curriculum of interdisciplinary studies.

The five areas of concentration in the Bachelor of Interdisciplinary Studies (health sciences, studies in organizations, leadership and society, writing and performing arts, and individualized studies) link three undergraduate minors to create a thematic interdisciplinary major. All requirements for each undergraduate minor must be satisfied.

Major

Interdisciplinary Studies, B.I.S.

Interdisciplinary Studies

General Requirements

- No more than 24 hours in any one subject may be used toward this degree, unless minor area requirements dictate otherwise.
- No more than 30 hours of Independent and Distance Learning credit may be used toward this degree.
- No more than eight hours of kinesiology activity courses may be used toward this degree.
- No more than 12 hours of ROTC credit may be used toward this degree.
- At least 45 hours of credit at or above the 3000 level must be completed; of the 45 hours, at least 15 must be at the 4000 level.
- At least a 2.00 GPA on all work taken in the LSU System.
- At least a 2.00 GPA on all work taken.
- At least a 2.00 GPA in all minors.
- Enrollment in internships, independent study, and research courses must have prior dean's approval.
- Students are required to complete course work from at least three different departments in both the humanities and social sciences areas.

Specific Requirements

- Complete all requirements for one of the areas of concentration: *health sciences, studies in organizations, leadership and society, writing and performing arts, or individualized studies.*
- Complete all general education requirements.

- Complete elective courses to reach 120 hours.
- A student must earn three hours in one of the following: computer science, EXST 2000, ISDS 1100, LIS 2001, or a foreign language.
- Complete UNST 3900, a capstone course for seniors majoring in Interdisciplinary Studies currently enrolled in the College of Humanities & Social Sciences.

Areas of Concentration

Health Sciences

CRITICAL REQUIREMENTS

SEMESTER 1: BIOL 1201; CHEM 1201.

SEMESTER 2: BIOL 1202; CHEM 1202.

SEMESTER 3: BIOL 2051; Admission to the College.

SEMESTER 4: BIOL 2153; CHEM 2261.

SEMESTER 5: CHEM 2262/CHEM 2462; ENGL 2000; PSYC 2000.

Undergraduate minors in biological sciences, psychology, and sports studies.

This concentration provides useful background for students interested in physical and mental health care careers.

Semester 1

CRITICAL: BIOL 1201; CHEM 1201.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 2

CRITICAL: BIOL 1202; CHEM 1202.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- CHEM 1202 General Chemistry (3)
- KIN 2530 Sport in Society (3)
- PSYC 2000 Introduction to Psychology (3)

Choose **one** from the following:

- EXST 2000 Introduction to Microcomputers (3)
- ISDS 1100 Introduction to Management Information Systems (3)
- LIS 2001 Introduction to Information Technologies (3)
- Foreign Language course (3)
- Computer Science Course (3)

Total Semester Hours: 16

Semester 3

CRITICAL: BIOL 2051; Admission to the College.

- BIOL 2051 General Microbiology (4)
- KIN Approved Course (3)⁴
- General Education course - Analytical Reasoning (3)
- General Education course - Humanities (3)²
- KIN Activity Course (1)⁵

Total Semester Hours: 14

Semester 4

CRITICAL: BIOL 2153; CHEM 2261.

- BIOL 2153 Principles of Genetics (4)
- CHEM 2261 Organic Chemistry (3)
- ENGL 2000 English Composition (3)
- KIN Activity Course (1)⁵
- PSYC Core (3)

Total Semester Hours: 14

Semester 5

CRITICAL: CHEM 2262/CHEM 2462; ENGL 2000; PSYC 2000.

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)
- KIN Approved Course (3)⁴
- General Education course - Humanities (3)²
- General Education course - Social Sciences (3)³
- Approved Elective (3)¹

Total Semester Hours: 15

Semester 6

- BIOL 3040 Evolution (3)⁶
- PSYC Core (3)
- General Education course - Humanities (3)²
- KIN Activity Course (1)⁵
- Approved Elective (1)¹
- KIN Approved Course (3)⁴

Total Semester Hours: 14

Semester 7

- BIOL 4087 Basic Biochemistry (4)
- UNST 3900 Interdisciplinarity (3)
- PSYC Approved Elective (3)
- KIN Approved Course (3)⁴
- Approved Electives (3)¹

Total Semester Hours: 16

Semester 8

- BIOL Approved Elective (3000/4000 level) (3)
- PSYC Approved Elective (3)
- Approved Social Sciences Elective (3)³
- Approved Electives (6)¹

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - At least 45 hours of credit at or above the 3000-level must be completed; of the 45 hours, at least 15 must be at the 4000-level.

² - General Education Humanities must cover at least one non-ENGL department from list.

³ - General Education/Approved Social Sciences must cover at least two non-PSYC departments from list.

⁴ - Select 12 hours from the following: KIN 2502, KIN 2511, KIN 2525, KIN 2526, KIN 3507, KIN 3800, KIN 4513, KIN 4515, KIN 4517, KIN 4800, MKT 3410.

⁵ - Select three activity courses from the following KIN 11**, KIN 12**, KIN 13**.

⁶ - EXST 2201 is recommended prior to enrolling in BIOL 3040.

Individualized Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Gen. Ed. Analytical Reasoning (from mathematics).

SEMESTER 3: Gen. Ed. Social Sciences; Admission to the College.

SEMESTER 4: Gen. Ed. Humanities.

SEMESTER 5: ENGL 2000.

Three undergraduate minors, as approved by the Director of the Interdisciplinary Studies Program. This concentration allows students to craft a cohesive set of three minors aimed at preparing them for their individual career goals.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Arts (3)
- General Education course - Natural Sciences (3)¹
- Approved Elective (3)²

Total Semester Hours: 15

Semester 2

CRITICAL: Gen. Ed. Analytical Reasoning (from mathematics).

Choose **one** from the following:

- Computer Science Course (3)
- EXST 2000 Introduction to Microcomputers (3)
- ISDS 1100 Introduction to Management Information Systems (3)
- LIS 2001 Introduction to Information Technologies (3)
- Foreign Language course (3)

- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Social Sciences (3)³
- Minor #1 Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: Gen. Ed. Social Sciences; Admission to the College.

- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)⁴
- General Education course - Social Sciences (2000-level) (3)³
- Minor #1 Elective (3)
- Minor #2 Elective (3)

Total Semester Hours: 15

Semester 4

CRITICAL: Gen. Ed. Humanities.

- ENGL 2000 English Composition (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)⁴
- Approved Social Sciences Elective (3)³
- Minor #3 Elective (3)

Total Semester Hours: 15

Semester 5

CRITICAL: ENGL 2000.

- General Education course - Humanities (3)⁴
- Approved Social Sciences Elective (3)³
- Minor #1 Elective (3000-level or above) (3)
- Minor #2 Elective (3)
- Minor #3 Elective (3)

Total Semester Hours: 15

Semester 6

- Approved Social Sciences Elective (3)³
- Minor #1 Elective (3000-level or above) (3)
- Minor #2 Elective (3000-level or above) (3)
- Minor #3 Elective (3000-level or above) (3)
- Approved Elective (3)²

Total Semester Hours: 15

Semester 7

- UNST 3900 Interdisciplinarity (3)
- Approved Social Sciences Elective (3)³
- Minor #1 Elective (3)
- Minor #2 Elective (3000-level or above) (3)
- Minor #3 Elective (3000-level or above) (3)

Total Semester Hours: 15

Semester 8

- Minor #2 Elective (3)
- Minor #3 Elective (3)
- Approved Electives (9)²

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - At least 45 hours of credit at or above the 3000-level must be completed; of the 45 hours, at least 15 must be at the 4000-level.

³ - General Education/Approved Social Sciences must cover at least three different departments from list.

⁴ - General Education Humanities must cover at least one non-ENGL, non-General Education Arts department from list.

Leadership and Society

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

SEMESTER 2: HIST (lower level sequence) or HIST Elective.

SEMESTER 3: POLI 2051; Admission to the College.

SEMESTER 4: HIST (lower level sequence).

SEMESTER 5: ENGL 2000; HRE 2723/HRE 2724.

Undergraduate minors in history, leadership development, and political science.

This concentration provides background relevant for careers in governmental, legal, and social organizations.

Semester 1

CRITICAL: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- HIST (lower level sequence) or HIST Elective (3)¹
- General Education course - Arts (3)
- General Education course - Natural Sciences (3)²

Total Semester Hours: 15

Semester 2

CRITICAL: HIST (lower level sequence) or HIST Elective.

- POLI 2051 American Government (3)
- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)²

Choose **one** from the following:

- Computer Science Course (3)
- EXST 2000 Introduction to Microcomputers (3)

120 Total Sem. Hrs.

¹ - 1000/2000-level HIST course option.

² - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

³ - General Education/Approved Social Sciences must cover a non-POLI, non-HIST department from list.

⁴ - At least 45 hours of credit at or above the 3000-level must be completed; of the 45 hours, at least 15 must be at the 4000-level.

Studies in Organizations

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

SEMESTER 2: CMST 1150/CMST 1061; SOCL 2001.

SEMESTER 3: ACCT 2000; CMST Elective; Admission to the College.

SEMESTER 4: ECON 2030; SOCL Elective.

SEMESTER 5: ENGL 2000; FIN 3715.

Undergraduate minors in business administration, communication studies, and sociology.

This concentration is relevant for students interested in careers in government and industry where strong communication and organizational skills are valued.

Semester 1

CRITICAL: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

- ENGL 1001 English Composition (3)

- CMST 1150 Introduction to Communication Studies (3) or
- CMST 1061 Fundamentals of Communication (3)

- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Arts (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 2

CRITICAL: CMST 1150/CMST 1061; SOCL 2001.

- ACCT 2000 Survey of Accounting (3)
- ISDS 1100 Introduction to Management Information Systems (3)
- SOCL 2001 Introductory Sociology (3)
- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 3

CRITICAL: ACCT 2000; CMST Elective; Admission to the College.

- ECON 2030 Economic Principles (3)
- CMST Elective (3)
- General Education course - Natural Sciences (3)¹
- Approved Electives (6)²

Total Semester Hours: 15

Semester 4

CRITICAL: ECON 2030; SOCL Elective.

- ENGL 2000 English Composition (3)
- SOCL Elective (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)³
- Approved Elective (3)²

Total Semester Hours: 15

Semester 5

CRITICAL: ENGL 2000; FIN 3715.

- FIN 3715 Business Finance (3)
- MGT 3200 Principles of Management (3)
- CMST Elective (3)
- SOCL Elective (3)
- General Education course - Humanities (3)³

Total Semester Hours: 15

Semester 6

- MKT 3401 Principles of Marketing (3)
- SOCL Elective (3000-level or above) (3)
- CMST Elective (3000-level or above) (3)
- Approved Social Sciences (3)⁴

- Approved Elective (3)²

Total Semester Hours: 15

Semester 7

- General Education course - Humanities (3)³
- Approved Electives (9)²

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - At least 45 hours of credit at or above the 3000-level must be completed; of the 45 hours, at least 15 must be at the 4000-level.

³ - General Education Humanities must cover at least one non-ENGL department from list.

⁴ - General Education/Approved Social Sciences must cover at least one non-ECON, non-SOCL department from list.

Writing and Performing Arts

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

SEMESTER 2: FMA 2001/THTR 1025.

SEMESTER 3: THTR 2022; THTR 2026; Admission to the College.

SEMESTER 4: ENGL course 2000-level; THTR 2028.

SEMESTER 5: ENGL 2000; FMA Elective.

Undergraduate minors in English, film and media arts, and theatre.

This concentration is useful for students who are planning careers in the arts and entertainment industry, including screenwriting and performance.

Semester 1

CRITICAL: "C" or better in ENGL 1001; Gen. Ed. Analytical Reasoning (from mathematics).

- ENGL 1001 English Composition (3)
- FMA 2001 Introduction to Film and Media Arts (3) or
- THTR 1025 Acting I: Introduction to Acting (3)

- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)¹
- Approved Elective (3)²

Total Semester Hours: 15

Semester 2

CRITICAL: FMA 2001/THTR 1025.

- FMA 2001 Introduction to Film and Media Arts (3) or
- THTR 1025 Acting I: Introduction to Acting (3)

Choose **one** from the following:

- Computer Science Course (3)
- EXST 2000 Introduction to Microcomputers (3)
- ISDS 1100 Introduction to Management Information Systems (3)
- LIS 2001 Introduction to Information Technologies (3)
- Foreign Language course (3)

- General Education course - Analytical Reasoning (3)

- General Education course - Natural Sciences (3)¹
- General Education course - Social Sciences (3)³

Total Semester Hours: 15

Semester 3

CRITICAL: THTR 2022; THTR 2026; Admission to the College.

- THTR 2022 Introduction to Theatrical Design (3)
- THTR 2026 Theatre Practicum I (1)
- Approved Social Sciences Elective (3)³
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)⁴
- English course (2000-level) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: ENGL course 2000-level; THTR 2028.

- THTR 2028 Introduction to Dramatic Literature (3)
- ENGL 2000 English Composition (3)
- FMA Elective (3)⁵
- General Education course - Humanities (3)⁴
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: ENGL 2000; FMA Elective.

- ENGL Option (3)⁶
- FMA Elective (3000-level or above) (3)⁵
- THTR Elective (3000-level or above) (3)
- ENGL Elective (2000-level or above) (3)
- Approved Elective (2)²

Total Semester Hours: 14

Semester 6

- ENGL Option (3)⁶
- FMA Elective (3000-level or above) (3)⁵
- THTR Elective (3000-level or above) (3)
- General Education course - Social Sciences (2000-level) (3)³
- Approved Social Sciences Elective (3)³

Total Semester Hours: 15

Semester 7

- ENGL Elective (3000-level or above) (3)
- FMA Elective (3000-level or above) (3)⁵
- THTR Elective (3000-level or above) (3)
- Approved Social Sciences Elective (3)³

Total Semester Hours: 15

Semester 8

- FMA Elective (3)⁵
- General Education course - Humanities (3)⁴
- Approved Elective (3)²
- Approved Social Sciences Elective (3)³

- ENGL Elective (3000-level or above) (3)

Total Semester Hours: 15

120 Total Sem. Hrs.

- ¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.
- ² - At least 45 hours of credit at or above the 3000-level must be completed; of the 45 hours, at least 15 must be at the 4000-level.
- ³ - General Education/Approved Social Sciences must cover at least three departments from list.
- ⁴ - General Education Humanities must cover at least one non-ENGL department from list.
- ⁵ - FMA Electives (15 hours): At least nine hours at or above the 3000-level. No more than nine hours from any one department allowed.
- ⁶ - Select six hours from the following: ENGL 3020, ENGL 3022, ENGL 3070, ENGL 3072, ENGL 3300, ENGL 3301, ENGL 3310, ENGL 3024.

International Studies (Interdepartmental Program)

OFFICE	153 Howe-Russell
TELEPHONE	225-578-7242
WEBSITE	http://www.lsu.edu/international

The International Studies (I.S.) Program offers an interdisciplinary major intended to prepare students for careers in the global arena. An undergraduate minor in international studies is also available. See the section "Minor Field Requirements" in this chapter.

The degree is designed to equip graduates with critical skills, flexible thinking, and a cosmopolitan view of world issues, to enable them to work comfortably across linguistic, cultural, and disciplinary borders. To achieve this, the curriculum cuts across traditional departmental divisions, combining insights from different disciplines around a common regional or global concentration. Students are helped to undertake internships, encouraged to study abroad, and recommended to combine the I.S. major with a minor in a second field such as business, mass communication, political science, or engineering. International Studies majors are strongly encouraged to enroll in a study abroad program which can be arranged through the LSU Office of Academic Programs Abroad.

Considerable freedom is allowed in shaping the degree requirements to suit individual geographical and topical interests. However, the precise selection and sequencing of coursework should be planned well in advance, as soon as the major is declared, in consultation with the associate director.

The curriculum comprises the following five elements, which students must complete in the required sequence. For additional requirements for general education courses and approved electives, see "Degree Requirements for the College":

- *Core Curriculum (15 hours)*— During the freshman and sophomore years, prospective majors must complete the preparatory, multidisciplinary core curriculum by taking one course from each of the following five disciplines: ANTH 1003 or ANTH 2051, ECON 2030 or ECON 2031, GEOG 1001 or GEOG 1003, HIST 1007, POLI 2053 or POLI 2057. These are the prerequisites for the gateway course.
- *Gateway Course (3 hours)*— All majors must complete the junior-level, interdisciplinary gateway course, INTL 3001. This is a prerequisite for the senior-level capstone seminar.

- *Area of Concentration (21 hours)*– Courses for the area of concentration should ideally be taken during the junior and senior years, and most of the requirements must be completed before admission to the senior capstone seminar. Students may choose from ten concentrations, which have either a regional or global focus. (See details below)
- *Foreign Language (hours vary)*– Students must demonstrate competency (defined below for each region) in a language relevant to their regional area of concentration.
- *Senior Capstone Course (3 hours)*– The senior capstone seminar (INTL 4003) is intended primarily for graduating I.S. majors in their final semester. Prerequisites are INTL 3001 and nine hours of additional upper-level courses in area of concentration, all of which must be completed before admission to the seminar.

Major

International Studies, B.A.

Regional Areas of Concentration

All students majoring in international studies must complete 15 hours in a primary area of concentration, and six hours in a secondary area of concentration. At least nine hours in the primary concentration must be taken at the 3000 level or above. At least three hours in the secondary concentration must be taken at the 3000 level or above.

Areas of concentration in International Studies are classified as either regional or global. The regional areas of concentration are Africa, Middle East, Asia, Europe, Latin America, or *Russian and Central Asia- SUSPENDED*. The global areas of concentration are Global Studies, Global Diplomacy, Environment and Development, or Global Cultures. Students must select one regional and one global area of concentration. Thus if a regional area of concentration is chosen as the primary area of concentration, then the secondary area of concentration must be a global area, and vice versa. Courses in the primary concentration must be taken in at least two different departments.

Students must meet language competency standards in a language appropriate to their regional area of concentration. (See below.)

Note: The following course listings are not exhaustive. Special topics classes are not included, but, if relevant, may be counted towards a concentration by arrangement with the Associate Director. As many of the listed courses are offered either infrequently or in alternate years, students are advised that they should check availability with departments and plan their course work schedule well in advance.

Consult “Degree Requirements of the College” in this section of the catalog for specific instructions regarding approved electives and foreign language requirements.

Consult “General Education” section of the catalog for the general education requirements.

Students must complete 15 hours for a primary area of concentration or six hours for the secondary area of concentration in one of the following regional areas.

For additional information, contact Dr. Leonard Ray, 153A Howe-Russell Hall, 225-578-7242.

Africa

CRITICAL REQUIREMENTS

SEMESTER 1: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

Europe

CRITICAL REQUIREMENTS

SEMESTER 1: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 2: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 3: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in French, German, Italian, or Spanish Foreign Language Sequence; Admission to the College.

SEMESTER 4: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI

2053/POLI 2057; Second Course in French, German, Italian, or Spanish Foreign Language Sequence.
SEMESTER 5: ENGL 2000;INTL 3001; Third course in French, German, Italian, or Spanish Foreign Language Sequence.

Semester 1

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

- ENGL 1001 English Composition (3)

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- First Course in Foreign Language Sequence (4)¹
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)²

Total Semester Hours: 16

Semester 2

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

INTL Core Courses (6)

- Select **two** courses from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Second Course in Foreign Language Sequence (4)¹
- General Education course - Natural Sciences (3)²

Total Semester Hours: 13

Semester 3

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in French, German, Italian, or Spanish Foreign Language Sequence; Admission to the College.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)

- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Third Course in Foreign Language Sequence (3)¹
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)²
- Approved Electives (5)

Total Semester Hours: 17

Semester 4

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; Second Course in French, German, Italian, or Spanish Foreign Language Sequence.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- ENGL 2000 English Composition (3)
- INTL 3001 Gateway to International Studies (3)
- Fourth Course in Foreign Language Sequence (3)¹
- General Education course - Analytical Reasoning (3)

Total Semester Hours: 15

Semester 5

CRITICAL: ENGL 2000;INTL 3001; Third course in French, German, Italian, or Spanish Foreign Language Sequence.

- Fifth Course in Foreign Language Sequence (3)¹
- General Education course - Arts (3)
- International Studies Primary Area of Concentration Course (3)³
- Approved Electives (6)

Total Semester Hours: 15

Semester 6

² - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

³ - Select fifteen hours from the following (must be taken in at least two different departments; at least nine hours must be at or above the 3000-level):

AAAS 4323/ENGL 4323, ANTH 4003, ANTH 4023; ARTH 4467; GEOG 4031; HIST 2085, HIST 4081, HIST 4083; INTL 3995; POLI 4065; SPAN 3043, SPAN 3044, SPAN 3074, SPAN 4144, SPAN 4145, SPAN 4146, SPAN 4147, SPAN 4201.

⁴ - Select six hours from one of the following secondary areas of concentration (at least 3 hours must be at or above the 3000-level):

Environment and Development

ANTH 4086; DSM 2000, DSM 3910; ECON 4520, ECON 4550, ECON 4070, ECON 4320, ECON 4325; EMS 1011, EMS 3040; ENVS 1126, ENVS 4261; GEOG 4014, GEOG 4045, GEOG 4070, GEOG 4078, GEOG 4086; LA 2201, LA 2401, LA 3201; OCS 4465, OCS 4550; POLI 4062, POLI 4064; RNR 1001, RNR 2039, RNR 4023, RNR 4107, SOCL 4551.

Global Cultures

AAAS 2000, AAAS 2410, AAAS 3024, AAAS 4124; ANTH 2050, ANTH 3060, ANTH 4031/REL 4031, ANTH 4470; ARTH 4466; CPLT 2202/ENGL 2202; ENGL 2673, ENGL 3080, ENGL 4680; FREN 3076, FREN 3090, FREN 4070; GEOG 4079; HIST 4049; INTL 4100, REL 2029, REL 3092, REL 4124; SOCL 4551; SPAN 4100; THTR 3122, THTR 4220, WGS 2900.

Global Diplomacy

DSM 2020, ECON 4520, ECON 4550, ECON 4560; HIST 2023, HIST 4028, HIST 4049, HIST 4064, HIST 4066, HIST 4130, HIST 4140; POLI 4041, POLI 4042, POLI 4043, POLI 4044, POLI 4046, POLI 4047, POLI 4048, POLI 4062, POLI 4063, POLI 4064, POLI 4074.

Global Studies

ANTH 4031; ECON 4070, ECON 4520, ECON 4550; ENGL 3080; ENVS 4010; FIN 3718; HIST 2023; INTL 2000, INTL 3002, INTL 3099, INTL 4100; POLI 4040, POLI 4050, POLI 4041, POLI 4042, POLI 4046, POLI 4060, POLI 4062, POLI 4064; REL 2029, REL 3300, REL 4031, REL 4032; REL 3092/INTL 3092; SOCL 4551, SOCL 4701; WGS 2900.

Middle East

CRITICAL REQUIREMENTS

SEMESTER 1: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 2: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 3: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in Arabic Foreign Language Sequence; Admission to the College.

SEMESTER 4: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; Second Course in Arabic Foreign Language Sequence.

SEMESTER 5: ENGL 2000;INTL 3001; Third Course in Arabic Foreign Language Sequence.

Semester 1

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

- ENGL 1001 English Composition (3)

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- First Course in Foreign Language Sequence (4)¹
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)²

Total Semester Hours: 16

Semester 2

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

INTL Core Courses (6)

- Select **two** courses from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Second Course in Foreign Language Sequence (4)¹
- General Education course - Natural Sciences (3)²

Total Semester Hours: 13

Semester 3

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in Arabic Foreign Language Sequence; Admission to the College.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)

- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Third Course in Foreign Language Sequence (4)¹
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)²
- Approved Elective (3)

Total Semester Hours: 16

Semester 4

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; Second Course in Arabic Foreign Language Sequence.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)

- POLI 2057 Introduction to International Politics (3)

- ENGL 2000 English Composition (3)

- INTL 3001 Gateway to International Studies (3)

- Fourth Course in Foreign Language Sequence (4)¹

- General Education course - Analytical Reasoning (3)

Total Semester Hours: 16

Semester 5

CRITICAL: ENGL 2000;INTL 3001; Third Course in Arabic Foreign Language Sequence.

- Fifth Course in Foreign Language Sequence (3)¹

- General Education course - Arts (3)

- International Studies Primary Area of Concentration Course (3)³

- Approved Electives (6)

Total Semester Hours: 15

Semester 6

- International Studies Primary Area of Concentration Courses (6)³

- Sixth Course in Foreign Language Sequence (3)¹

- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- International Studies Primary Area of Concentration Courses (6)³

- General Education course - Humanities (3)

- Approved Electives (5)

Total Semester Hours: 14

Semester 8

- INTL 4003 International Studies Senior Seminar (3)
- International Studies Secondary Area of Concentration Courses (6)⁴
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - ARAB 1101, ARAB 1102, ARAB 2101, ARAB 2102, ARAB 3101, ARAB 3102.

² - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

³ - Select fifteen hours from the following (must be taken in at least two different departments; at least nine hours must be at or above the 3000-level):

ARAB 2001; ARTH 2401; REL 4096/HIST 4096; INTL 3992, INTL 4033, INTL 4051/GEOG 4051; POLI 4059, POLI 4061; REL 2029, REL 3100, REL 3786/INTL 3786; REL 3092/INTL 3092; SOCL 4551.

⁴ - Select six hours from one of the following secondary areas of concentration (at least 3 hours must be at or above the 3000-level):

Environment and Development

ANTH 4086; DSM 2000, DSM 3910; ECON 4520, ECON 4550, ECON 4070, ECON 4320, ECON 4325; EMS 1011, EMS 3040; ENVS 1126, ENVS 4261; GEOG 4014, GEOG 4045, GEOG 4070, GEOG 4078, GEOG 4086; LA 2201, LA 2401, LA 3201; OCS 4465, OCS 4550; POLI 4062, POLI 4064; RNR 1001, RNR 2039, RNR 4023, RNR 4107, SOCL 4551.

Global Cultures

AAAS 2000, AAAS 2410, AAAS 3024, AAAS 4124; ANTH 2050, ANTH 3060, ANTH 4031/REL 4031, ANTH 4470; ARTH 4466; CPLT 2202/ENGL 2202; ENGL 2673, ENGL 3080, ENGL 4680; FREN 3076, FREN 3090, FREN 4070; GEOG 4079; HIST 4049; INTL 4100, REL 2029, REL 3092, REL 4124; SOCL 4551; SPAN 4100; THTR 3122, THTR 4220, WGS 2900.

Global Diplomacy

DSM 2020, ECON 4520, ECON 4550, ECON 4560; HIST 2023, HIST 4028, HIST 4049, HIST 4064, HIST 4066, HIST 4130, HIST 4140; POLI 4041, POLI 4042, POLI 4043, POLI 4044, POLI 4046, POLI 4047, POLI 4048, POLI 4062, POLI 4063, POLI 4064, POLI 4074.

Global Studies

ANTH 4031; ECON 4070, ECON 4520, ECON 4550; ENGL 3080; ENVS 4010; FIN 3718; HIST 2023; INTL 2000, INTL 3002, INTL 3099, INTL 4100; POLI 4040, POLI 4050, POLI 4041, POLI 4042, POLI 4046, POLI 4060, POLI 4062, POLI 4064; REL 2029, REL 3300, REL 4031, REL 4032; REL 3092/INTL 3092; SOCL 4551, SOCL 4701; WGS 2900.

Global Areas of Concentration

Students must complete 15 hours for a primary concentration or six hours (from different departments) for a secondary concentration in one of these global areas.

There are four global areas of concentration to choose from: environment and development, global cultures, global diplomacy, and global studies.

Environment and Development, Global Cultures, Global Diplomacy, and Global Studies

CRITICAL REQUIREMENTS

SEMESTER 1: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 2: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057

SEMESTER 3: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; Second Course in Foreign Language Sequence.

SEMESTER 5: ENGL 2000;INTL 3001; Third Course in Foreign Language Sequence.

Semester 1

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

- ENGL 1001 English Composition (3)

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- First Course in Foreign Language Sequence (4)¹
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)²

Total Semester Hours: 16

Semester 2

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057.

INTL Core Courses (6)

- Select **two** courses from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Second Course in Foreign Language Sequence (4)¹
- General Education course - Natural Sciences (3)²

Total Semester Hours: 13

Semester 3

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; First Course in Foreign Language Sequence; Admission to the College.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)

- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- Third Course in Foreign Language Sequence (4-3)¹
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)²
- Approved Electives (3-5)

Total Semester Hours: 16-17

Semester 4

CRITICAL: ANTH 1003/ANTH 2051 or ECON 2030/ECON 2031 or GEOG 1001/GEOG 1003 or HIST 1007 or POLI 2053/POLI 2057; Second Course in Foreign Language Sequence.

INTL Core Course (3)

- Select **one** course from the following:
- ANTH 1003 Introduction to Cultural and Social Anthropology (3)
- ANTH 2051 Introduction to World Ethnography (3)
- ECON 2030 Economic Principles (3)
- ECON 2031 HONORS: Economic Principles (3)
- GEOG 1001 Human Geography: Americas and Europe (3)
- GEOG 1003 Human Geography: Africa and Asia (3)
- HIST 1007 World History Since 1500 (3)
- POLI 2053 Introduction to Comparative Politics (3)
- POLI 2057 Introduction to International Politics (3)

- ENGL 2000 English Composition (3)
- INTL 3001 Gateway to International Studies (3)
- Fourth Course in Foreign Language Sequence (4-3)¹
- General Education course - Analytical Reasoning (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: ENGL 2000;INTL 3001; Third Course in Foreign Language Sequence.

- Fifth Course in Foreign Language Sequence (3)¹
- General Education course - Arts (3)
- International Studies Primary Area of Concentration Course (3)³
- Approved Electives (6)

Total Semester Hours: 15

Semester 6

- International Studies Primary Area of Concentration Courses (6)³
- Sixth Course in Foreign Language Sequence (3)¹
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- International Studies Primary Area of Concentration Courses (6)³
- General Education course - Humanities (3)
- Approved Electives (5)

Total Semester Hours: 14

Semester 8

- INTL 4003 International Studies Senior Seminar (3)
- International Studies Secondary Area of Concentration Courses (6)⁴
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - Note: Students must demonstrate competency in a language relevant to their regional area of concentration.(Competency means: equivalent of six courses for Arabic, Spanish, French, Italian, Chinese and German.) Students who have studied a language not offered at LSU may petition the Associate Director of International Studies to have their language courses counted towards this requirement.

Complete one of the following sequences: SPAN 1101 , SPAN 1102 or SPAN 1152, SPAN 2101, SPAN 2102, SPAN 2155, and one from SPAN 2156, SPAN 3010, SPAN 3043, SPAN 3044, SPAN 3070, SPAN 3072, SPAN 3073, SPAN 3074, SPAN 3980, SPAN 4063, SPAN 4064, SPAN 4100, SPAN 4145, SPAN 4146, SPAN 4147, SPAN 4201, SPAN 4400.

FREN 1001, FREN 1002, FREN 2101, FREN 2102, FREN 2155, and FREN 3060.

GERM 1101, GERM 1102, GERM 2101, GERM 2102, GERM 2155, and GERM 3060 or GERM 3061 or GERM 3082 or GERM 3083 or GERM 3084 or GERM 4030 or GERM 4031 or GERM 4043 or GERM 4044 or GERM 4045.

ITAL 1001, ITAL 1002, ITAL 2101, ITAL 2102, ITAL 2155, and ITAL 3058 or ITAL 3071 or ITAL 3072 or ITAL 4051 or ITAL 4100.

CHIN 1101, CHIN 1102, CHIN 2001, CHIN 2002, CHIN 3101, CHIN 3102.

ARAB 1101, ARAB 1102, ARAB 2101, ARAB 2102, ARAB 3101, ARAB 3102.

² - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

³ - Select fifteen hours from the following (must be taken in at least two different departments; at least nine hours must be at or above the 3000-level) for the appropriate area of concentration:

Environment and Development

ANTH 4086; DSM 2000, DSM 3910; ECON 4520, ECON 4550, ECON 4070, ECON 4320, ECON 4325; EMS 1011, EMS 3040; ENVS 1126, ENVS 4261; GEOG 4014, GEOG 4045, GEOG 4070, GEOG 4078, GEOG 4086; LA 2201, LA 2401, LA 3201; OCS 4465, OCS 4550; POLI 4062, POLI 4064; RNR 1001, RNR 2039, RNR 4023, RNR 4107, SOCL 4551.

Global Cultures

AAAS 2000, AAAS 2410, AAAS 3024, AAAS 4124; ANTH 2050, ANTH 3060, ANTH 4031/REL 4031, ANTH 4470; ARTH 4466; CPLT 2202/ENGL 2202; ENGL 2673, ENGL 3080, ENGL 4680; FREN 3076, FREN 3090, FREN 4070; GEOG 4079; HIST 4049; INTL 4100, REL 2029, REL 3092, REL 4124; SOCL 4551; SPAN 4100; THTR 3122, THTR 4220, WGS 2900.

Global Diplomacy

DSM 2020, ECON 4520, ECON 4550, ECON 4560; HIST 2023, HIST 4028, HIST 4049, HIST 4064, HIST 4066, HIST 4130, HIST 4140; POLI 4041, POLI 4042, POLI 4043, POLI 4044, POLI 4046, POLI 4047, POLI 4048, POLI 4062, POLI 4063, POLI 4064, POLI 4074.

Global Studies

ANTH 4031; ECON 4070, ECON 4520, ECON 4550; ENGL 3080; ENVS 4010; FIN 3718; HIST 2023; INTL 2000, INTL 3002, INTL 3099, INTL 4100; POLI 4040, POLI 4050, POLI 4041, POLI 4042, POLI 4046, POLI 4060, POLI 4062, POLI 4064; REL 2029, REL 3300, REL 4031, REL 4032; REL 3092/INTL 3092; SOCL 4551, SOCL 4701; WGS 2900.

⁴ - Select six hours from one of the following secondary areas of concentration (at least 3 hours must be at or above the 3000-level):

Africa- AAAS 2050, AAAS 3120, AAAS 3122; ANTH 4051, ANTH 4470; FREN 4070; ENGL 4322; HIST 4084, HIST 4085, INTL 3991, POLI 4064, POLI 4078; SOCL 4551; THTR 4220/ENGL 4220; language component Arabic or French.

Minor

International Studies Minor

The *minor in international studies* in the College of Humanities & Social Sciences is designed to provide students with a perspective on issues of global consequence, and permit them to focus on a particular region of the world. All students seeking a *minor in international studies* must complete the following three requirements:

1) interdisciplinary core; 2) global or regional concentration; and 3) relevant foreign language.

To graduate with a *minor in international studies*, students must complete 21 hours of course work and demonstrate second-year competency in a foreign language as follows:

1) Interdisciplinary core (9 Sem. Hrs.)

Nine hours chosen from:

- ANTH 1003 Introduction to Cultural and Social Anthropology (3) or
- ANTH 2051 Introduction to World Ethnography (3)

- ECON 2030 Economic Principles (3)

- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)

- HIST 1007 World History Since 1500 (3)

- POLI 2053 Introduction to Comparative Politics (3) or

- POLI 2057 Introduction to International Politics (3)

- REL 2027 Asian Religions (3) or

- REL 2029 Judaism, Christianity and Islam (3)

2) Regional or Global Concentrations (12 Sem. Hrs.):

12 hours chosen from one of the following Global and Regional concentrations.

Global Studies

12 hours chosen from at least two different departments:

- ECON 4070 Economic Growth (3)
- ECON 4520 International Trade (3)
- ECON 4550 International Finance (3)
- ENGL 3080 Post-colonial Literature (3)
- ENVS 4010 Applied Ecology (2)
- FIN 3718 Multinational Managerial Finance (3)
- HIST 2023 The World Since 1960 (3)
- INTL 2000 Contemporary Global Issues (3)
- INTL 3002 Independent Study in International Studies (3)
- INTL 3099 Undergraduate Internship in International Studies (3)
- INTL 4100 Migration, Diasporas and Identity (3)
- POLI 4040 Special Topics in International Relations (3)
- POLI 4050 Globalization and Politics (3)
- POLI 4041 International Law (3)
- POLI 4042 International Organization (3)
- POLI 4046 International Political Economy (3)
- POLI 4060 Special Topics in Comparative Politics (3)
- POLI 4062 Comparative Political Economy (3)
- POLI 4064 Comparative Politics of Developing Areas (3)
- REL 2029 Judaism, Christianity and Islam (3)
- REL 3300 Women and Religion (3)

- REL 4031 Comparative Religions (3) or
- ANTH 4031 Comparative Religions (3)

- REL 4032 Religion, Gender and Society (3)

- REL 3092 Fundamentalisms and Religious Nationalism (3) or
- INTL 3092 Fundamentalisms and Religious Nationalism (3)

- SOCL 4551 Global Society (3)
- SOCL 4701 Population (3)
- WGS 2900 Gender, Race and Nation (3)

Global Diplomacy

12 hours chosen from at least two different departments:

- DSM 2020 Terrorism and Counter-Terrorism (3)
- ECON 4520 International Trade (3)
- ECON 4550 International Finance (3)
- ECON 4560 Central Banking and Monetary Policy (3)
- HIST 2023 The World Since 1960 (3)
- HIST 4028 The First World War (3)
- HIST 4049 The British Empire and Commonwealth (3)
- HIST 4064 Diplomatic History of the United States, 1914 to the Present (3)
- HIST 4066 Military History of the United States (3)
- HIST 4130 World War II (3)
- HIST 4140 The Vietnam War (3)
- POLI 4041 International Law (3)
- POLI 4042 International Organization (3)
- POLI 4043 American Foreign Policy (3)
- POLI 4044 The Contemporary International System (3)

- POLI 4046 International Political Economy (3)
- POLI 4047 Political Psychology in International Relations (3)
- POLI 4048 International Conflict and Cooperation (3)
- POLI 4062 Comparative Political Economy (3)
- POLI 4063 Comparative Political Institutions (3)
- POLI 4064 Comparative Politics of Developing Areas (3)
- POLI 4074 Politics of the European Union (3)

Environment and Development

12 hours chosen from at least two different departments:

- ANTH 4086 Human-Environment Interactions (3)
- DSM 2000 Hazards, Disasters and the Environment (3)
- DSM 3910 Hazards Seminar (1)
- ECON 4520 International Trade (3)
- ECON 4550 International Finance (3)
- ECON 4070 Economic Growth (3)
- ECON 4320 Environmental Economics (3)
- ECON 4325 Applied Resource Economics (3)
- EMS 1011 Environment and Technology: Perspective on Environmental Problems (3)
- EMS 3040 Applied Environmental Management (4)
- ENVS 1126 Introduction to Environmental Sciences (3)
- ENVS 4261 Energy and the Environment (3)
- GEOG 4014 Climatology (3)
- GEOG 4045 Environmental Remote Sensing (3)
- GEOG 4070 Environmental Conservation (3)
- GEOG 4078 Environment and Development (3)
- GEOG 4086 Human-Environment Interactions (3)
- LA 2201 Landscape History I (3)
- LA 2401 Landscape Ecology (3)
- LA 3201 Landscape History II (3)

- OCS 4465 Coastal Zone Management (3)
- OCS 4550 Biological Oceanography (3)
- POLI 4062 Comparative Political Economy (3)
- POLI 4064 Comparative Politics of Developing Areas (3)
- RNR 1001 Natural Resource Conservation (3)
- RNR 2039 Introduction to Renewable Natural Resource Policy (3)
- RNR 4023 Marine Fisheries Resources (3)
- RNR 4107 Human Dimensions in Natural Resources (3)
- SOCL 4551 Global Society (3)

Global Cultures

12 hours chosen from at least two different departments:

- AAAS 2000 Introduction to African & African American Studies (3)
- AAAS 2410 Black Popular Culture (3)
- AAAS 3024 African Diaspora Intellectual Thought (3)
- AAAS 4124 Studies in African Diaspora Religions (3)
- ANTH 2050 World Archaeology (3)
- ANTH 3060 Introduction to Anthropological Linguistics (3)

- ANTH 4031 Comparative Religions (3) or
- REL 4031 Comparative Religions (3)

- ANTH 4470 Folklore of the African Diaspora (3)
- ARTH 4466 Contemporary Art (3)

- CPLT 2202 Introduction to Modern World Literature (3) or
- ENGL 2202 Introduction to Modern World Literature (3)

- ENGL 2673 Literature and Ethnicity (3)

Liberal Arts (Intercollegiate Program)

OFFICE 119 Hodges Hall

TELEPHONE 225-578-3141

FAX 225-578-6447

For information regarding the GRADUATE PROGRAM, [click here](#).

The Bachelor of Arts in Liberal Arts enables students in the College of Humanities & Social Sciences to earn a bachelor of arts degree with a concentration in which no formal major is offered. The program is designed to give students the opportunity to become broadly educated in the liberal arts, while satisfying the requirements for specialized areas of concentration. *Currently, concentrations are offered in African and African American studies, art history, classical civilization, disaster science and management, film and media arts, and women's and gender studies.*

Areas of Concentration

African & African American Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: First Course in Foreign Language Sequence.

SEMESTER 3: AAAS 2000; Admission to the College.

SEMESTER 4: Area of Concentration Course; Second Course in Foreign Language Sequence.

SEMESTER 5: Area of Concentration Course.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 2

CRITICAL: First Course in Foreign Language Sequence.

- AAAS 2000 Introduction to African & African American Studies (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

- General Education course - Arts (3)
- Approved Elective (0-2)

Total Semester Hours: 13-15

Semester 3

CRITICAL: AAAS 2000; Admission to the College.

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (3)
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)¹
- Area of Concentration Course (3)²

Total Semester Hours: 16-15

Semester 4

CRITICAL: Area of Concentration Course; Second Course in Foreign Language Sequence.

- AAAS 3024 African Diaspora Intellectual Thought (3) or
- AAAS 3044 Black Rhetorical Traditions (3)

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- Area of Concentration Course (3)²
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: Area of Concentration Course.

- General Education course - Humanities (3)
- General Education course - Social Sciences (3)
- Area of Concentration Course (3)²
- Approved Electives (7)

Total Semester Hours: 16

Semester 6

- General Education course - Humanities (3)
- Area of Concentration Courses (6)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- AAAS 4020 Senior Seminar (3)
- Area of Concentration Courses (6)²
- Approved Electives (7)

Total Semester Hours: 16

Semester 8

- Area of Concentration Course (3)²
- Approved Electives (12)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - In addition to the nine hours of core required courses (AAAS 2000, AAAS 3024/AAAS 3044 (CxC), AAAS 4020), students must complete 24 hours from at least two divisions and three different departments. A minimum of six hours must focus on a geographical region outside the U.S. (non-US), Three hours must be either Service-Learning (S-L) or Communication Across the Curriculum (CxC). Only 12 hours from courses numbered below the 3000 level may count toward the degree.

Note: This course listing is not exhaustive. Courses from participating departments that are special topics and/or courses with service-learning or CxC sections relevant to AAAS may be counted toward the concentration requirements with prior approval from the program advisor. For additional information, contact Professor Joyce M. Jackson, 135 Howe-Russell Complex, 225-578-5246, email aaas@lsu.edu, or visit the AAAS website at www.lsu.edu/aaas.

Divisions (24 hrs.)

Division I – History and Culture:

- AAAS 2410 Black Popular Culture (3)
- AAAS 3024 African Diaspora Intellectual Thought (3)
- AAAS 3120 Topics in History of Africa and the African Diaspora (3) (non-U.S.)
- AAAS 3122 Topics in Pre-Colonial Africa (3) (non-US)
- AAAS 3901 Directed Readings and Research in African and African-American Studies (1-3)

- AAAS 3902 Special Topics in African & African American Studies (1-3)
- ANTH 4050 Black Music in America (3)
- ANTH 4051 Africa (3) (non-US)
- ANTH 4053 African-American Cultures (3)
- ANTH 4470 Folklore of the African Diaspora (3)
- HIST 2061 African American History (3)
- HIST 4055 Civil War (3)
- HIST 4072 The New South (3)
- HIST 4081 The Caribbean: 1492-1830 (3) (non-US)

Division II – Politics and Society:

- AAAS 2050 Contemporary Africa (3) (non-US)
- AAAS 2511 Race Relations (3)
- AAAS 3024 African Diaspora Intellectual Thought (3)
- AAAS 3425 Black Women in America (3)
- AAAS 3901 Directed Readings and Research in African and African-American Studies (1-3)
- AAAS 3902 Special Topics in African & African American Studies (1-3)
- POLI 4039 Southern Politics (3)
- POLI 4078 African Government and Politics (3) (non-US)
- WGS 2900 Gender, Race and Nation (3)

Division III – Literature, Language, and the Arts:

- AAAS 2410 Black Popular Culture (3)
- AAAS 3044 Black Rhetorical Traditions (3) (CxC)
- AAAS 3341 African American English (3)
- AAAS 3901 Directed Readings and Research in African and African-American Studies (1-3)
- AAAS 3902 Special Topics in African & African American Studies (1-3)
- AAAS 4322 Studies in African Literature (3) (non-US)
- AAAS 4323 Studies in Caribbean Literature (3) (non-US)
- ENGL 2674 Introduction to African-American Literature (3)
- ENGL 3674 Survey of African-American Literature (3)

- ENGL 4173 Studies in Southern Literature (3)
- ENGL 4220 Drama of Africa and African Diaspora (3)
- ENGL 4674 Studies in African-American Literature (3)
- FREN 4070 Literature of Africa and the Caribbean (3) (non-US)
- MUS 2000 History of Jazz (3)

Art History

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: First Course in Foreign Language Sequence.

SEMESTER 3: ARTH 1440/ARTH 1441; Admission to the College.

SEMESTER 4: ARTH 1440/ARTH 1441; Second Course in Foreign Language Sequence.

SEMESTER 5: Two Area of Concentration Courses.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 2

CRITICAL: First Course in Foreign Language Sequence.

- ARTH 1440 Historical Survey of the Arts (3) or
- ARTH 1441 Historical Survey of the Arts (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Electives (4-6)

Total Semester Hours: 14-16

Semester 3

CRITICAL: ARTH 1440/ARTH 1441; Admission to the College.

- ARTH 1440 Historical Survey of the Arts (3) or
- ARTH 1441 Historical Survey of the Arts (3)

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (3)
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16-15

Semester 4

CRITICAL: ARTH 1440/ARTH 1441; Second Course in Foreign Language Sequence.

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- Area of Concentration Courses (6)²
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: Two Area of Concentration Courses.

- General Education course - Humanities (3)
- General Education course - Social Sciences (3)
- Area of Concentration Courses (6)²
- Approved Electives (4)

Total Semester Hours: 16

Semester 6

- ARTH 2411 Survey of Asian Art (3)
- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)

- Area of Concentration Course (3)²

- Approved Elective (3)

Total Semester Hours: 15

Semester 7

- Area of Concentration Courses (6)²

- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- ARTH 4499 Undergraduate Seminar (3)

- Approved Electives (12)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If a two-course sequence is taken in the physical sciences, then the three-hour course must be from the life sciences and vice versa.

² - Students must complete 21 hours of art history electives from the following courses; at least one course required in three of the four subject areas and no more than two courses are allowable at the 2000 level. ARCH 2007 or ARCH 2008 may be substituted for one 2000 level course:

Art History courses that do not fall into any of the categories below may still be counted toward the 21 hour elective requirement; ARTH 4420 and ARTH 4490 may be used to fulfill appropriate subject area requirements. ARTH 4449 may be used to fulfill either the *Ancient Art and Medieval Art* or *Non-Western Art* requirement, but not both.

Ancient Art and Medieval Art:

- ARTH 2401 Art of the Ancient Near East and Egypt (3)
- ARTH 2402 Classical Art and Archaeology (3)
- ARTH 4404 The Art of Rome (3)
- ARTH 4405 Early Christian and Byzantine Art (3)
- ARTH 4406 Romanesque Art (3)
- ARTH 4409 Early Greek Art (3)
- ARTH 4410 Later Greek Art (3)
- ARTH 4412 Gothic Art (3)
- ARTH 4449 Islamic Art and Architecture (3)

Renaissance through 18th Century Art:

- ARTH 2469 Italian Renaissance Art (3)
- ARTH 4413 Early Netherlandish and German Painting (3)
- ARTH 4423 Early Renaissance Painting in Italy (3)
- ARTH 4424 High Renaissance and Mannerist Painting in Italy (3)
- ARTH 4425 Renaissance Sculpture in Italy (3)
- ARTH 4427 Northern Baroque Painting (3)
- ARTH 4429 Southern Baroque Art (3)
- ARTH 4433 18th Century European Art (3)

19th through 21st Century Art:

- ARTH 2470 Survey of Modern to Contemporary Art (3)
- ARTH 4422 History of Modern Design (3)
- ARTH 4450 19th Century European Painting (3)
- ARTH 4451 Early 20th Century European Art (3)
- ARTH 4464 American Art to 1900 (3)
- ARTH 4465 American Art: 1900-1960 (3)
- ARTH 4466 Contemporary Art (3)
- ARTH 4468 Issues in Contemporary Art (3)
- ARTH 4469 Art of the American South: 1560-1861 (3)
- ARTH 4470 History of Photography (3)
- ARTH 4480 Video Art and Theory (3)
- ARTH 4482 Digital Art History (3)
- ARTH 4484 New Media Art Theory (3)

Non-Western Art:

- ARTH 4440 African Art (3)
- ARTH 4441 Chinese Painting (3)
- ARTH 4442 Japanese Art (3)
- ARTH 4443 Indian Art (3)
- ARTH 4444 Southeast Asian Art (3)
- ARTH 4449 Islamic Art and Architecture (3)

- ARTH 4467 Latin American Art (3)

Classical Civilization

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; LATN 1001 or GREK 1001.

SEMESTER 2: LATN 2051 or GREK 2051; Gen. Ed. Course - Analytical Reasoning.

SEMESTER 3: LATN 2053 or GREK 2103; Admission to the College.

SEMESTER 4: LATN (One additional course above LATN 2053) or GREK (one additional course above GREK 2103).

SEMESTER 5: Area of Concentration Course.

Semester 1

CRITICAL: "C" or better in ENGL 1001; LATN 1001 or GREK 1001.

- ENGL 1001 English Composition (3)

- LATN 1001 Elementary Latin (4) or
- GREK 1001 Elementary Greek (4)

- General Education course - Analytical Reasoning (3)
- Approved Elective (2)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 2

CRITICAL: LATN 2051 or GREK 2051; Gen. Ed. Course - Analytical Reasoning.

- LATN 2051 Intermediate Latin (4) or
- GREK 2051 Intermediate Greek (4)

- General Education course - Natural Sciences (3)¹
- Approved Electives (8)

Total Semester Hours: 15

Semester 3

CRITICAL: LATN 2053 or GREK 2103; Admission to the College.

- LATN 2053 Intermediate Latin (3) or
- GREK 2103 Intermediate Greek Prose (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Natural Sciences (3)¹
- Approved Electives (6)

Total Semester Hours: 15

Semester 4

CRITICAL: LATN (one additional course above 2053) or GREK (one additional course above 2103).

- ENGL 2000 English Composition (3)
- LATN (one additional course above 2053) or GREK (one additional course above 2103) (3)
- General Education course - Humanities (3)
- Approved Electives (6)

Total Semester Hours: 15

Semester 5

CRITICAL: Area of Concentration Course.

- General Education course - Humanities (3)
- General Education course - Social Sciences (3)
- Area of Concentration Courses (6)²
- Approved Electives (3)

Total Semester Hours: 15

Semester 6

- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)
- Area of Concentration Course (3)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- CLST 4999 Senior Seminar (3)
- General Education course - Arts (3)
- Area of Concentration Course (3)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- Area of Concentration Course (3)²
- Approved Electives (12)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If a two-course sequence is taken in the physical sciences, then the three-hour course must be from the life sciences and vice versa.

² - Students must complete 15 hours of concentration electives from departmental electives in Greek, Latin, Classical Studies (except CLST 2092), or ARTH 1440, ARTH 2402, ARTH 4404, ARTH 4405 , ARTH 4409, ARTH 4410; ENGL 4712/LING 4712; HNRS 2041; HIST 4001 , HIST 4003, HIST 4004; PHIL 2033, PHIL 2034, PHIL 4920, PHIL 4922, PHIL 4924; POLI 4081; REL 4928. At least six of the concentration electives must be at or above the 3000 level.

Disaster Science & Management

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: First Course in Foreign Language Sequence.

SEMESTER 3: Second Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: Area of concentration course.

SEMESTER 5: Area of concentration course; ENGL 2000.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 2

CRITICAL: First Course in Foreign Language Sequence.

- General Education course - Social Sciences (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Electives (4-6)

Total Semester Hours: 14-16

Semester 3

CRITICAL: Second Course in Foreign Language Sequence; Admission to the College.

- DSM 2000 Hazards, Disasters and the Environment (3)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (3)
- General Education course - Humanities (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16-15

Semester 4

CRITICAL: Area of concentration course.

- DSM 2010 Fundamentals of Emergency Management (3)
- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Humanities (3)
- Area of Concentration Course (3)²

Total Semester Hours: 16-15

Semester 5

CRITICAL: Area of concentration course; ENGL 2000.

- DSM 3910 Hazards Seminar (1)
- Area of Concentration Course (3)²

- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (5)

Total Semester Hours: 12

Semester 6

- General Education course - Humanities (3)
- Area of Concentration Courses (6)²
- Approved Electives (7)

Total Semester Hours: 16

Semester 7

- General Education course - Arts (3)
- Area of Concentration Courses (6)²
- Approved Electives (9)

Total Semester Hours: 18

Semester 8

- DSM 4000 Disaster Science and Management Senior Seminar (3)
- Area of Concentration Courses (6)²
- Approved Electives (6)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If a two-course sequence is taken in the physical sciences, then the three-hour course must be from the life sciences and vice versa.

² - In addition to the ten hours of required courses listed above (DSM 2000, DSM 2010, DSM 3910, DSM 4000), 24 hours of approved electives must be chosen from the following categories. At least three credit hours must be taken from each category, except Research, which is optional. A maximum of six credit hours is allowed in any one of the below categories.

Engineering and Infrastructure (3-6 hrs.)

- ARCH 4062 Urban Design and Planning (3)
- CE 3500 Plane Surveying and Measurements (3)
- CE 3600 Principles of Highway and Traffic Engineering (3)
- CE 4200 Hydrology (3)
- CE 4745 Natural Hazards and the Built Environment (3)

- CE 4320 Coastal Engineering (3)
- CE 4260 Design of Hydrologic Systems (3)
- CE 4445 Hurricane Engineering (3)
- CE 4530 Control Surveying with GPS (3)
- CE 4560 Engineering Applications of Remote Sensing (3)
- GEOG 4047 Geographic Information Systems (3)
- GEOG 4048 Methods of Spatial Analysis (3)
- GEOG 4013 Meteorology (3)
- GEOG 4014 Climatology (3)
- GEOG 4029 Coastal Resources and Management (3)

Business and Political Dimensions (3-6 hrs.)

- ECON 4130 Urban and Regional Economics (3)
- ECON 4320 Environmental Economics (3)
- ECON 4325 Applied Resource Economics (3)
- FIN 3440 Risk and Insurance (3)
- FIN 3460 Risk Management (3)
- GEOG 4077 Economic Geography (3)
- MGT 3200 Principles of Management (3)
- MGT 3320 Human Resource Management (3)
- MGT 4420 Multinational Management (3)
- POLI 2057 Introduction to International Politics (3)
- POLI 2070 Public Policy Making: An Introduction (3)
- POLI 3909 Contemporary Political Issues (3)
- POLI 4040 Special Topics in International Relations (3)
- POLI 4041 International Law (3)
- POLI 4048 International Conflict and Cooperation (3)
- POLI 4059 International Politics of the Middle East (3)
- POLI 4061 Comparative Politics of the Middle East (3)
- POLI 4064 Comparative Politics of Developing Areas (3)

- POLI 4067 The Politics of Asia (3)

Social and Cultural Dimensions (3-6 hrs.)

- ANTH 4082 Social and Cultural Anthropology (3)
- ANTH 4086 Human-Environment Interactions (3)
- DSM 3200 Technology and Emergency Management (3)
- DSM 4600 Crisis Management (3)
- GEOG 4073 Urban Geography (3)
- GEOG 4086 Human-Environment Interactions (3)
- INTL 2000 Contemporary Global Issues (3)
- INTL 3001 Gateway to International Studies (3)
- INTL 3092 Fundamentalisms and Religious Nationalism (3)
- INTL 3786 Religion of Islam (3)
- KIN 4602 Community Safety Education (3)
- REL 3092 Fundamentalisms and Religious Nationalism (3)
- REL 3786 The Religion of Islam (3)
- SOCL 2501 Current Social Problems (3)
- SOCL 3501 Sociology of Deviance (3)
- SOCL 3510 Criminal Violence (3)
- SOCL 4091 Topics in Sociology (3)
- SOCL 4321 The Community (3)
- SOCL 4551 Global Society (3)
- SOCL 4701 Population (3)

Health and Psychology (3-6 hrs.)

- DSM 4600 Crisis Management (3)
- DSM 4996 Directed Readings in Disaster Science and Management (1-3)
- FDSC 3000 Food Safety (3)
- CFS 4064 Family Stress Management (3)
- KIN 2604 Issues in Mental Health (3)
- KIN 3608 Communicable and Noncommunicable Diseases (3)

- KIN 3660 The Holistic Health Approach to Stress (3)
- PSYC 2040 Social Psychology (3)
- PSYC 3083 Psychological Counseling (3)
- SW 3003 Skills in Working with People (3)
- SW 4500 Crisis Intervention (3)

Environment and Ecology (3-6 hrs.)

- ENVS 4010 Applied Ecology (2)
- ENVS 4101 Environmental Chemistry (3)
- ENVS 4261 Energy and the Environment (3)
- ENVS 4262 Environmental Hazards Analysis (3)
- ENVS 4264 Regulation of Environmental Hazards (3)
- ENVS 4477 Environmental Toxicology: Introduction and Applications (3)
- CHEM 4150 Environmental Chemistry (3)
- GEOG 4013 Meteorology (3)
- GEOG 4014 Climatology (3)
- GEOG 4015 Physical Climatology (3)
- GEOG 4016 Methods of Climatological Analysis (3)
- GEOG 4018 Geographical Hydrology (3)
- GEOG 4045 Environmental Remote Sensing (3)
- GEOG 4070 Environmental Conservation (3)
- GEOG 4078 Environment and Development (3)
- GEOG 4221 The Tropical Atmosphere (3)
- GEOG 4997 Special Topics in Geography (3)
- OCS 4021 Weather Analysis and Satellite Meteorology (3)
- OCS 4024 Coastal Morphodynamics (3)
- OCS 4170 Physical Oceanography (3)
- OCS 4465 Coastal Zone Management (3)

Research (1-6 hrs.)

- DSM 3900 Disaster Science and Management Internship (3)

- DSM 4996 Directed Readings in Disaster Science and Management (1-3)

Note:

Additional electives not listed above may be approved by a DSM director.

Film and Media Arts

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Gen. Ed. Course - Analytical Reasoning.

SEMESTER 3: Gen. Ed. Course - Natural Sciences; Admission to the College.

SEMESTER 4: First Course in Foreign Language Sequence.

SEMESTER 5: ENGL 2000.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Elective (2-3)

Total Semester Hours: 15-16

Semester 2

CRITICAL: Gen. Ed. Course - Analytical Reasoning.

- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Electives (7-8)

Total Semester Hours: 14-15

Semester 3

CRITICAL: Gen. Ed. Course - Natural Sciences; Admission to the College.

- FMA 2001 Introduction to Film and Media Arts (3)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Analytical Reasoning (from mathematics) (3)

- General Education course - Humanities (3)
- Area of Concentration Course (3)²

Total Semester Hours: 16-15

Semester 4

CRITICAL: First Course in Foreign Language Sequence.

- ENGL 2000 English Composition (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- Area of Concentration Course (3)²
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: ENGL 2000.

- FMA 3001 Special Topics in Film and Media Arts (3)
- General Education course - Humanities (3)
- General Education course - Social Sciences (3)
- Area of Concentration Course (3)²
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- General Education course - Humanities (3)
- General Education course - Social Sciences (2000-level) (3)
- Area of Concentration Courses (6)²
- Approved Elective (3)

Total Semester Hours: 15

Semester 7

- FMA 4001 Advanced Topics in Film and Media Arts (3)

- General Education course - Arts (3)
- Area of Concentration Course (3)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- Area of Concentration Courses (6)²
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - If a two-course sequence is taken in the physical sciences, then the three-hour course must be from the life sciences and vice versa.

² - In addition to the nine hours of required core courses (FMA 2001, FMA 3001, FMA 4001), 24 hours of electives must be completed, with at least two courses (six hours) required from each of the two subject areas: (1) History and (2) Theory/Practice. Only 12 hours of courses numbered below the 3000 level will count toward the degree.

Note: This course listing is not exhaustive. Courses from participating departments that are relevant to FMA may be counted toward the concentration requirements with prior approval from the program director. For additional information, contact Professor James V. Catano, 124 Himes Hall, 225-578-3140, fma@lsu.edu or visit the FMA website at www.lsu.edu/fma.

History:

- CHIN 2070 Chinese Cinema (3)
- CLST 2070 Ancient World in the Cinema (3)
- CMST 3012 History of Film (4)
- CMST 3013 Topics in Film Genres (4)
- ENGL 2231 Reading Film (3)
- ENGL 3133 Introduction to Nonfiction Film and Video (3)
- ENGL 4231 Studies in Literature and Film (3)
- FMA 3502 Special Topics in Italian Cinema (3)
- FMA 3503 Special Topics in Asian Cinema (3)
- FREN 4031 The French Film (3)
- GERM 4046 German Film (3)
- HIST 4077 American Popular Culture (3)
- ITAL 3502 Special Topics in Italian Cinema (3)

- SPAN 4201 Cinema in Spanish (3)

Theory/Practice:

- FMA 3001 Special Topics in Film and Media Arts (3)
- FMA 3010 Art of Cinematography (3)
- FMA 3011 Art of Editing (3)
- FMA 4001 Advanced Topics in Film and Media Arts (3)
- ARTH 4480 Video Art and Theory (3)
- CMST 2012 Introduction to Film (4)
- CMST 3107 Rhetoric of the Contemporary Media (3)
- CMST 4107 Communication as Culture (3)
- CMST 4312 Topics in Critical Media Theory and Practice (3)
- ENGL 2009 Introduction to Writing Screenplays (3)
- ENGL 4009 Advanced Screenwriting Workshop (3)

- PHIL 3002 Philosophy and Film (3)

Women's & Gender Studies

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Gen. Ed. Course - Analytical Reasoning.

SEMESTER 3: Gen. Ed. Course - Natural Sciences; Admission to the College.

SEMESTER 4: Gen. Ed. Course - Humanities.

SEMESTER 5: ENGL 2000.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Elective (3-4)

Total Semester Hours: 16-17

Semester 2

CRITICAL: Gen. Ed. Course - Analytical Reasoning.

- WGS 2500 Introduction to Women's & Gender Studies (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Electives (3-4)

Total Semester Hours: 13-14

Semester 3

CRITICAL: Gen. Ed. Course - Natural Sciences; Admission to the College.

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- General Education course - Arts (3)
- WGS Approved Humanities and Social Sciences Elective (3)
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 4

CRITICAL: Gen. Ed. Course - Humanities.

- ENGL 2000 English Composition (3)
- WGS 2900 Gender, Race and Nation (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course- Analytical Reasoning (from mathematics) (3)
- General Education course - Humanities (3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: ENGL 2000.

- WGS 3150 Survey of Feminist Theory (3)
- WGS Approved Humanities and Social Sciences Elective (3)
- Approved Cross Cultural Course (3)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 6

- WGS 4500 Special Topics in Women's & Gender Studies (3)
- General Education course - Social Sciences (3)
- WGS Approved Humanities and Social Sciences Elective (3)
- Literature Course from the General Education Humanities List (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 7

- WGS 4500 Special Topics in Women's & Gender Studies (3)
- WGS Approved Humanities and Social Sciences Elective (3)
- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- WGS Approved Humanities and Social Sciences Electives (6)
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Courses that meet the cross-cultural course requirement must be on the approved list that can be found on the WGS website or be approved by an undergraduate advisor.

Students must complete 36 semester hours of course work including three required courses (WGS 2500, WGS 2900, WGS 3150), two Women's & Gender Studies special topics courses (WGS 4500), an approved cross-cultural elective, and 18 additional hours of WGS-approved humanities and social sciences electives, of which nine hours must be at the 3000 level or above. Three of the required General Education Humanities hours must be completed with a WGS-approved literature course from the General Education Humanities list.

Minor

African & African American Studies Minor

To graduate with a *minor in African & African American studies*, students must complete AAAS 2000, AAAS 4020, and 12 hours of electives. Of the 12 hours, six must be at the 3000 level or above and at least three hours must focus on a geographical region other than the US. The electives must be chosen from at least two divisions and three departments:

- *Division I - History and Culture*: AAAS 2410, AAAS 3024, AAAS 3120 (Non-US), AAAS 3122 (Non-US), AAAS 3901, AAAS 3902; ANTH 4050, ANTH 4051 (Non-US), ANTH 4053, ANTH 4470; HIST 2061, HIST 4055, HIST 4072, HIST 4081 (Non-US)
- *Division II - Politics and Society*: AAAS 2050 (Non-US), AAAS 2511, AAAS 3024, AAAS 3425, AAAS 3901, AAAS 3902; POLI 4039, POLI 4078 (Non-US); WGS 2900
- *Division III - Literature, Language, and the Arts*: AAAS 2410, AAAS 3044, AAAS 3341, AAAS 3901, AAAS 3902, AAAS 4322 (Non-US), AAAS 4323 (Non-US); ENGL 2674, ENGL 3674, ENGL 4173, ENGL 4220, ENGL 4674; FREN 4070 (Non-US); MUS 2000

Note: This course listing is not exhaustive. Special topics courses relevant to AAAS offered by participating departments may be counted towards the minor requirements with prior approval from the program advisor. For additional information, contact the program director, African and African American Studies, 135 Howe-Russell Complex, 225-578-5246, e-mail aaas@lsu.edu, or visit the AAAS website at www.lsu.edu/aaas.

Art History Minor

To graduate with a *minor in art history*, students must complete ARTH 1440, ARTH 1441, and 12 additional hours in art history at the 4000 level or above.

Disaster Science & Management Minor

The *minor in disaster science & management* is an interdisciplinary program which provides students interested in graduate school and/or careers in the public, not-for-profit, or private sectors with a broad understanding of the nature and impact of disasters on the natural, built, and human environments; and a basis for establishing strategies to effectively plan for disasters, mitigate the adverse effects of disasters, respond to disasters, and recover from disasters.

A *minor in disaster science & management* is available by selecting the following courses: DSM 2000, DSM 2010, and DSM 3910.

Twelve credit hours must be taken from the following: ANTH 4082, ANTH 4086, ARCH 4062, CE 3500, CE 3600, CE 4200, CE 4745, CE 4320, CE 4260, CE 4445, CE 4530, CE 4560, CFS 4064, CHEM 4150, DSM 3200, DSM 3900, DSM 4600, DSM 4996, ECON 4130, ECON 4320, ECON 4325, FDSC 3000, FIN 3440, FIN 3460, ENVS 4010, ENVS 4101, ENVS 4262, ENVS 4264, ENVS 4477, GEOG 4013, GEOG 4014, GEOG 4015, GEOG 4016, GEOG 4018, GEOG 4029, GEOG 4045, GEOG 4047, GEOG 4048, GEOG 4070, GEOG 4078, GEOG 4086, GEOG 4221, GEOG 4997, MGT 3200, MGT 3320, MGT 4420, INTL 2000, INTL 3001, INTL 3092, INTL 3786, KIN 2604, KIN 3608, KIN 3660, KIN 4602, OCS 4021, OCS 4024, OCS 4170, OCS 4465, POLI 2057, POLI 2070, POLI 4040, POLI 4041, POLI 4048, POLI 4059, POLI 4061, POLI 4064, POLI 4067, PSYC 3083, REL 3092, REL 3786, SOCL 2501, SOCL 3501, SOCL 3510, SOCL 4321, SOCL 4551, SOCL 4701, SOCL 4091, SW 3003, SW 4500.

Additional electives not listed above may be approved by a DSM Director. Students may wish to review course offerings at the University of New Orleans in Urban and Regional Planning, Sociology, Political Science, and Public Administration as potential electives in the DSM Minor. Approval by a DSM director and the student's college must be obtained prior to enrolling at UNO for one of these classes.

Film and Media Arts Minor

To graduate with a *minor in film and media arts*, students must complete FMA 2001 and an additional 15 hours of electives from the following list. At least nine hours must be at the 3000 level or above, and no more than nine hours may be taken in any single department.

- FMA 3001, FMA 3010, FMA 3011, FMA 3502, FMA 3503, FMA 4001; ARTH 4480; CHIN 2070; CLST 2070; CMST 2012, CMST 3012, CMST 3107, CMST 4107, CMST 4312; ENGL 2009, ENGL 2231, ENGL 3133, ENGL 4009, ENGL 4133, ENGL 4231; FREN 4031; GERM 4046; HIST 4077; ITAL 3502; MC 2700; PHIL 3002; SPAN 4201.
- In addition, special topics courses and courses with sections relevant to film and media arts may be accepted for the minor.

For further information, contact Professor James V. Catano, 124 Himes Hall, 225-578-3140, fma@lsu.edu or visit the FMA website at www.lsu.edu/fma.

Women's & Gender Studies Minor

To graduate with a *minor in Women's & Gender Studies*, students must complete WGS 2500, WGS 4500, and 12 hours of electives, at least nine of which must be in courses at the 3000 level or above. Electives must be chosen from at least two of the following areas:

- *Literature*—ENGL 2593, ENGL 3593, ENGL 4593 (depending upon topic); FREN 4090, SPAN 4100
- *Culture and Society*—ENGL 4493; CLST 2080; HIST 4079; REL 3300; SOCL 4521; CMST 3115; WGS 3600, WGS 4028
- *Theory*—ENGL 4593 (depending upon topic); PHIL 4015; WGS 3150.

In addition, WGS 4900, special topics courses, and courses with sections advertised as Women's & Gender Studies may be accepted for the minor with the approval of the Director. For additional information, contact Dr. Kathleen Bratton, Women's & Gender Studies, 118 Himes Hall, 225-578-4807 or visit their website at www.lsu.edu/wgs.

Linguistics (Interdepartmental Program)

OFFICE	155 Hodges Hall
TELEPHONE	225-578-3047
FAX	225-578-4129
E-MAIL	lolive1@lsu.edu
WEBSITE	www.lsu.edu/linguistics

The Interdepartmental Program in Linguistics offers an undergraduate minor. Student training is not handled by a single department, but instead is supported by faculty from seven different departments. Faculty participating in the program have a strong interest in achieving a better understanding of the nature of human language and how it is acquired and used, in order to address, and ultimately solve, the complex language problems of modern societies. They also have a strong interest in language issues that can be studied with the rich linguistic data that Louisiana has to offer.

Minor

Linguistics Minor

The undergraduate *minor in linguistics* consists of 18 semester hours, with not more than nine semester hours taken from any one department. At least nine hours must be at the 3000 level or above. Course requirements are as follows:

- *one* introductory linguistics course from these areas: COMD 2050/LING 2050, ANTH 3060/LING 3060, ENGL 4710/LING 4710;

- **one* from the following four core areas: COMD 4150/LING 4150 (phonetics), ENGL 4713 /LING 4713 (syntax), ENGL 4714/LING 4714 (phonology), ENGL 4715/LING 4715 (semantics);

- *electives* selected from at least two of the three concentration areas below:

Language and Society: Language use across socio-cultural contexts and the relationship between language and culture. AAAS 3341/LING 3341, ANTH 4060/LING 4060, ANTH 4082**, ANTH 4997**, ENGL 3310/LING 3310, ENGL 3716/LING 3716, ENGL 4310/LING 4310, ENGL 4711/LING 4711, ENGL 4712/LING 4712, FREN 3080/LING 3080, FREN 3260/LING 3260, FREN 3280/LING 3280, FREN 4001/LING 4001, LING 4750

Language and Cognition: *Language abilities across individuals and the relationship between language and thought.* COMD 4153/LING 4153, COMD 4380/LING 4380, LING 4750, PHIL 2010/LING 2010, PHIL 4010/LING 4010, PHIL 4011/LING 4011, PHIL 4914/LING 4914. PSYC 4033**

Language and Applied Linguistics: *Applications of linguistics to the teaching of first/second languages and interpretation/translation studies.* ENGL 2710/LING 2710, ENGL 3720/LING 3720, FREN 4014/LING 4014, FREN 4015/LING 4015, SPAN 4005/LING 4005, SPAN 4602/LING 4602, SPAN 4603/LING 4603

* An additional course from the core areas counts towards **Language and Cognition**.

** These elective courses may be counted if written justification is provided by the instructor and approved by the Director of Linguistics.

For further information, contact Lisi Oliver, director of linguistics at lolive1@lsu.edu.

Department of Military Science

FAX	225-578-3560
WEBSITE	www.lsu.edu/milscience

For information on this department's program, see the "Reserve Officers Training Corps" section of this catalog.

Army ROTC Scholarships • Four-year scholarships are offered for entering freshmen. Two- and three-year on-campus scholarships are also available. Scholarship programs that cover university fees, books, laboratory fees, and related academic expenses along with a monthly subsistence allowance are available for selected students. See the "Reserve Officers Training Corps" chapter and the chapter concerning "Financial Aid and Scholarships" in this catalog for additional information.

Minor

Professional Leadership Minor

To graduate with a *minor in professional leadership*, students must complete MILS 3011, MILS 3012, MILS 3013, MILS 4011, MILS 4012, and military history approved by the professor of military science.

Philosophy

Philosophy is a traditional part of a university education. This department offers a wide range of courses dealing with fundamental philosophical questions and with the history of philosophy. An undergraduate major or minor in philosophy complements the study of linguistics and computer science, and provides background for further study in law, history, literature, medicine, the business disciplines, and other fields.

Some philosophy courses deal with issues that arise in other fields of study and in certain professions and vocations. Such courses include professional ethics, bioethics, philosophy of art, philosophy of science, and philosophy and film. Logic is especially recommended for students in business, mass communication, and prelaw. Ethics courses are especially recommended for students in business, education, engineering, mass communication, pre-law, pre-medicine, nursing, and other health related fields.

Several honors tutorials and seminars are offered for qualified students (PHIL 2034, PHIL 2036), and a special curriculum leading to the BA with departmental honors in philosophy is offered. Details are available from the departmental office.

Students with a philosophy major who do not elect a concentration in religious studies are required to complete 27 hours of philosophy courses, including PHIL 2010; PHIL 2020 (or PHIL 3052); PHIL 2033 (or PHIL 2053), and PHIL 2035, plus 15 hours of electives. At least 15 of the 27 hours must be in courses numbered 3000 and above, and at least six of the 15 must be at the 4000 level. Degree credit will not be allowed for more than six hours of courses numbered below 2000.

Concentration in Religious Studies

Students majoring in philosophy may elect a concentration in religious studies.

The concentration in religious studies is non-confessional and focuses on the study of religion as an academic discipline. It is designed to examine general questions regarding the nature of religion through the study of religious literature and religious practice, and to foster a better understanding and appreciation of religion as a universal component of the human experience. Courses in religious studies bring together perspectives and approaches from a variety of disciplines—including history, philosophy, literature, and anthropology—and students are encouraged to double major or to minor in these or other related fields.

Students concentrating in religious studies must complete a minimum of 27 semester hours of religious studies courses. These include a two-semester survey of world religions (REL 2027 or REL 2031, and REL 2029 or REL 2030); a course in theories of religion (REL 4301); and 18 hours of religious studies electives. At least 15 of the 27 hours must be at the 3000 level or above, and of these at least six hours must be at the 4000 level (*including REL 4301*).

Some religious studies courses are cross-listed with other departments. These courses should be taken under the Religious Studies rubric (REL) if they are to count toward the 27 hours needed for the major or toward the 15 hours needed for the minor.

Major

Philosophy, B.A.

Philosophy

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: Gen. Ed. Analytical Reasoning (from Math Department).

SEMESTER 3: First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: One PHIL course.

SEMESTER 5: One PHIL course; ENGL 2000.

Consult "General Education" section of the catalog for the general education requirements.

**Distribution requirements for foreign languages will depend upon student placement scores and the specific language chosen. Consult the Degree Requirements of the College for more information. Some adjustment in elective hours may be necessary.*

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Approved Electives (3-5)

Total Semester Hours: 16-18

Semester 2

CRITICAL: Gen. Ed. Analytical Reasoning (from Math Department).

- Philosophy Elective (3)²
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (6)¹

Total Semester Hours: 13

Semester 3

CRITICAL: First Course in Foreign Language Sequence; Admission to the College.

- PHIL 2010 Symbolic Logic I (3)

- PHIL 2033 History of Ancient and Medieval Philosophy (3) or
- PHIL 2053 HONORS: History of Ancient and Medieval Philosophy (3)

- Third Course in Foreign Language Sequence (4-3)
- General Education course - Humanities (3)
- Approved Elective (3)

Total Semester Hours: 16-15

Semester 4

CRITICAL: One PHIL course.

- ENGL 2000 English Composition (3)
- PHIL 2020 Ethics (3) or
- PHIL 3052 Moral Philosophy (3)
- PHIL 2035 History of Modern Philosophy (3)
- Approved Elective (3)
- Fourth Course in Foreign Language Sequence (4-3)

Total Semester Hours: 16-15

Semester 5

CRITICAL: One PHIL course; ENGL 2000.

- Approved Electives (9)
- Philosophy Elective (3)²
- General Education course - Social Sciences (3)

Total Semester Hours: 15

Semester 6

- Philosophy Elective (3)²
- General Education course - Arts (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- Philosophy Elective (3)²
- Approved Electives (12)

Total Semester Hours: 15

Semester 8

- Philosophy Elective (3)²
- Approved Electives (11)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be from the life sciences, and vice versa.

² - PHILOSOPHY ELECTIVES: A minimum of 15 semester hours must be in courses numbered 3000-level and above, with at least six of the 15 at the 4000-level. Degree credit will not be allowed for more than six hours of courses numbered below 2000.

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be from the life sciences, and vice versa.

² - At least 15 of the 27 hours of REL electives/major coursework must be at the 3000-level or above and at least six of the 15 hours must be at the 4000-level (including REL 4301).

Minor

Philosophy Minor

A *minor in philosophy* requires 15 hours of philosophy courses, at least six of which must be at the 3000/4000 level.

Religious Studies Minor

A *minor in religious studies* requires 15 hours of religious studies courses, including REL 2027, REL 2029, and nine hours of religious studies electives, of which at least six hours must be at the 3000 level or above.

Department of Political Science

OFFICE	240 Stubbs Hall
TELEPHONE	225-578-2141
FAX	225-578-2540

For information regarding the GRADUATE PROGRAM, click [here](#).

Students *majoring* in political science must complete a minimum of 33 semester hours in political science courses, of which a minimum of 18 hours must be in courses numbered 3000 and above. Political science courses are divided into four fields: (1) American government and politics; (2) comparative government and politics; (3) international politics and law; and (4) political theory.

Political science coursework must be distributed among these fields as follows: 12 hours in one field; six hours in each of two additional fields; and nine hours (or more) of electives distributed in any fields. A list of political science courses grouped by fields is available from the departmental office.

POLI 1001, POLI 3901, POLI 3909, and POLI 4001 may not be counted toward fulfilling field distribution requirements but may be counted as political science electives.

Although some courses are cross-listed in more than one field, no course can be accepted for credit in more than one field. POLI 2051 is required for all undergraduate majors.

Students interested in careers in law and government should consult with the department undergraduate or prelaw counselor.

Honors work is provided through POLI 1002, POLI 2052, POLI 3000, POLI 3809, POLI 3896, and POLI 3897. A special curriculum leading to the BA with departmental honors in political science is offered. Details are available from the departmental office.

Political science majors must meet the general education humanities requirement by taking six hours of history and three hours of literature from the list of general education humanities courses.

¹ - For General Education Natural Sciences, both physical & life sciences must be taken: six hours in a physical/life sciences sequence and two hours lab credit associated with the sequence chosen; six hours in an area (phys/life) not previously selected.

² - Two General Education Humanities courses must be from history and one from among the literature courses on the General Education Humanities list.

³ - Students majoring in psychology must take an extra three credit hours of natural sciences lecture and two credit hours of natural sciences laboratory *beyond* the minimum general education natural sciences requirements.

- *Basics* (required of all majors): PSYC 2000 or PSYC 2001; PSYC 2005 PSYC 2017; PSYC 4008; and PSYC 2016
- *Core Areas* (students must complete a course from four areas):
- *Advanced Methods*: PSYC 3020 or PSYC 4111
- *Biological Basis*: PSYC 4031 or PSYC 4034 or PSYC 4035 or PSYC 4037
- *Learning and Cognition*: PSYC 4030 or PSYC 4032 or PSYC 4033
- *Developmental Processes*: PSYC 4070 or PSYC 4072 or PSYC 4176
- *Applied/Social*: PSYC 3050 or PSYC 3083 or PSYC 3140 or or PSYC 4080
- *Additional Electives*: PSYC 2040, PSYC 3030, PSYC 3081, PSYC 3082, PSYC 4039, PSYC 4040, PSYC 4042.
- *Excluded Electives*: PSYC 2060, PSYC 2070, PSYC 2076, PSYC 2078, PSYC 2999, PSYC 4999. These courses will not count toward the 33 hours required in the major but are permissible electives above the 33-hour minimum. Students choosing the honors option will enroll in three to six hours of PSYC 4999, in addition to the 33 hours required in the major.

Minor

Psychology Minor

A student must complete the following 15 hours to graduate with a *minor in psychology*: PSYC 2000 –three hours; two courses from core areas listed below–six hours; two courses from core areas or additional electives listed below–six hours.

- *Core Areas*:
- *Advanced Methods*: PSYC 3020 or PSYC 4111
- *Biological Basis*: PSYC 4031 or PSYC 4034 or PSYC 4035 or PSYC 4037.
- *Learning and Cognition*: PSYC 4030 or PSYC 4032 or PSYC 4033
- *Developmental Processes*: PSYC 4070 or PSYC 4072 or PSYC 4176
- *Applied/Social*: PSYC 3050 or PSYC 3140 or PSYC 3083 or PSYC 4080
- *Additional Electives*: PSYC 2040, PSYC 3030, PSYC 3081, PSYC 3082, PSYC 4039, PSYC 4040

- *Excluded Electives:* PSYC 2060, PSYC 2070, PSYC 2076, PSYC 2078, PSYC 2999, PSYC 4999.

Department of Sociology

OFFICE	126 Stubbs Hall
TELEPHONE	225-578-1645
FAX	225-578-5102
WEBSITE	www.soc.lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

Functions of the department are to conduct teaching and research in the College of Humanities & Social Sciences and the Graduate School, to provide an undergraduate degree program in sociology including a concentration in criminology, and to conduct research in rural sociology for the Louisiana Agricultural Experiment Station.

The department is research-oriented and committed to the further development of sociology as a science as well as to the application of sociological principles in societal programs. With respect to its teaching responsibilities, the department contributes to pre-professional preparation of undergraduates and develops professional sociologists at the graduate level.

A special program leading to the BA degree with departmental honors in sociology is also offered. Detailed information is available from the departmental office.

Major

Sociology, B.A.

Sociology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: MATH 1021.

SEMESTER 3: "C" or better in SOCL 2001(SOCL 2002); First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: "C" or better in SOCL 2201; Second Course in Foreign Language Sequence.

SEMESTER 5: ENGL 2000; "C" or better in SOCL 2211.

A grade of "C" or higher must be earned in SOCL 2001, SOCL 2201, SOCL 2211, and SOCL 3101. Sociology majors are strongly advised to schedule all College of Humanities & Social Sciences and departmental lower-level requirements in their first two years.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)

- MATH 1021 College Algebra (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1021

- SOCL 2001 Introductory Sociology (3) or
- SOCL 2002 HONORS: Introductory Sociology (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 3

CRITICAL: “C” or better in SOCL 2001(SOCL 2002); First Course in Foreign Language Sequence; Admission to the College.

- SOCL 2201 Introduction to Statistical Analysis (4)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)
- Approved Elective (3)

Total Semester Hours: 17-16

Semester 4

CRITICAL: “C” or better in SOCL 2201; Second Course in Foreign Language Sequence.

- ENGL 2000 English Composition (3)
- SOCL 2211 Methods of Sociological Research (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Humanities (3)
- Approved Elective (2)

Total Semester Hours: 15-14

Semester 5

CRITICAL: ENGL 2000; “C” or better in SOCL 2211.

- SOCL 3101 Sociological Theory (3)
- Approved SOCL Elective (3000-level or above) (3)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- Approved SOCL Elective (3000-level or above) (3)
- Approved Electives (12)

Total Semester Hours: 15

Semester 7

- Approved SOCL Electives (3000-level or above) (6)

- Approved Electives (8-9)

Total Semester Hours: 14-15

Semester 8

- Approved SOCL Elective (3000-level or above) (3)
- Approved SOCL Elective (3)
- Approved Electives (9-10)

Total Semester Hours: 15-16

120 Total Sem. Hrs.

¹ - If two course natural sciences sequence is taken in the physical sciences, the additional three hour natural sciences course must be from the life sciences, and vice versa.

Area of Concentration

Criminology

Criminology is the study of the nature and causes of crime, patterns of crime, and the social control of criminal behavior.

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001.

SEMESTER 2: MATH 1021.

SEMESTER 3: "C" or better in SOCL 2001(SOCL 2002); First Course in Foreign Language Sequence; Admission to the College.

SEMESTER 4: "C" or better in SOCL 2201; Second Course in Foreign Language Sequence.

SEMESTER 5: ENGL 2000; "C" or better in SOCL 2211.

A grade of "C" or higher must be earned in SOCL 2001, SOCL 2201, SOCL 2211, and SOCL 3101. Sociology majors are strongly advised to schedule all College of Humanities & Social Sciences and departmental lower-level requirements in their first two years.

Semester 1

CRITICAL: "C" or better in ENGL 1001.

- ENGL 1001 English Composition (3)
- MATH 1021 College Algebra (3)

- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)

Total Semester Hours: 16

Semester 2

CRITICAL: MATH 1021.

- SOCL 2001 Introductory Sociology (3) or
- SOCL 2002 HONORS: Introductory Sociology (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Analytical Reasoning (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 13

Semester 3

CRITICAL: “C” or better in SOCL 2001(SOCL 2002); First Course in Foreign Language Sequence; Admission to the College.

- SOCL 2201 Introduction to Statistical Analysis (4)
- Third Course in Foreign Language Sequence (4-3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (3)
- Approved Elective (3)

Total Semester Hours: 17-16

Semester 4

CRITICAL: “C” or better in SOCL 2201; Second Course in Foreign Language Sequence.

- ENGL 2000 English Composition (3)
- SOCL 2211 Methods of Sociological Research (3)
- Fourth Course in Foreign Language Sequence (4-3)
- General Education course - Humanities (3)
- Approved Elective (2)

Total Semester Hours: 15-14

Semester 5

CRITICAL: ENGL 2000; “C” or better in SOCL 2211.

- SOCL 3101 Sociological Theory (3)
- SOCL 3371 Sociology of the Criminal Justice System (3)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- POLI 4020 American Constitutional Law (3) or
- POLI 4021 The American Constitution and Civil Liberties (3) or
- POLI 4023 Judicial Politics (3)

- SOCL 3501 Sociology of Deviance (3)
- Approved Electives (9)

Total Semester Hours: 15

Semester 7

- SOCL 4461 Criminology (3)
- SOCL 4471 Sociology of Law (3)
- Approved Electives (8-9)

Total Semester Hours: 14-15

Semester 8

- Approved SOCL Elective (3000-level or above) (3)
- Approved SOCL Elective (3)
- Approved Electives (9-10)

Total Semester Hours: 15-16

120 Total Sem. Hrs.

¹ - If two course natural sciences sequence is taken in the physical sciences, the additional three hour natural sciences course must be from the life sciences, and vice versa.

Minor

Sociology Minor

In order to graduate with a *minor in sociology*, students are required to complete SOCL 2001 and at least 12 additional hours in sociology, six semester hours of which must be in courses at the 3000 level or above.

School and Curricula

- Manship School of Mass Communication

For information regarding the GRADUATE PROGRAM, click [here](#).

Mission of the Manship School

The mission of the Manship School of Mass Communication is to produce highly competent communicators with broad knowledge and training in the liberal arts and the media. The school promotes effective communication, critical thinking, and ethical responsibility. Overall, and especially in the graduate program, the school is committed to leading the study and practice of media and public affairs. Believing that media should reflect society and provide leadership to society, the school seeks diversity in its outlook, student body, and staff.

The Manship School of Mass Communication offers an undergraduate degree in Mass Communication (BAMC). For specific information concerning the undergraduate degree requirements for the *Bachelor of Arts in Mass Communication*, refer to the curriculum below.

Admission Requirements

Admission to the Manship School is competitive. At a minimum, applicants must have completed at least 30 hours of college-level course work, including MC 2010, *Media Writing*, with a course grade of "B" or better. Applicants presenting the highest qualifications will be accepted into the Manship School each semester of the academic year. Students with a 3.00 LSU GPA and a 3.00 cumulative GPA will be given priority for admission on a space available basis. Grade point average will remain the primary factor for admission, but secondary factors taken into account include the need to balance enrollment among the school's areas of concentration, demographic diversity, demonstrated professional potential through work on high school or college media, or other life experiences that suggest a strong likelihood of success as a communication professional.

Application Process • Students should apply by the Friday of the final week of classes of the semester in which they will have completed the 30 hours of course work and earned a "B" or better in MC 2010; however, they may apply at any time after they have met the minimum criteria. Applications for admission to the Manship School must be submitted directly to the school's main office. The school's Application Review Committee will attempt to notify applicants of admission decisions prior to the first day of class each semester. Students who are denied admission may reapply for admission in a subsequent semester.

Transfer Students • Transfer students from another institution must meet university transfer admission requirements. Transfer students must complete a minimum of 12 hours of course work on the LSU campus with at least a 3.00 LSU GPA and a 3.00 cumulative GPA to be eligible for admission to the Manship School. All other admission guidelines and procedures described above also apply to transfer students.

Laptop Computer Requirement

Students declaring a major or minor in Mass Communication are required to have their own laptop computer with wireless Internet access upon entering the first Mass Communication class. Information regarding the type specifications and software may be obtained on the Manship website, www.manship.lsu.edu, or from 211 Journalism Building.

Transfer of Credit from Other Institutions

In the Manship School, transfer credits accepted by the Office of Enrollment Management: Undergraduate Admissions shall be valid for degree credit only to the extent to which they satisfy courses in the curriculum of the school. Credit in mass communication courses in which grades of "D" have been earned is not accepted for transfer toward the degree requirements, if the course is taken outside the LSU System. Students enrolled in this school who wish to obtain credits from other colleges or

universities (including other campuses of the LSU System), and who plan to use such credits toward degree requirements, should obtain *prior approval* in writing on a specific-course basis from the associate dean for undergraduate studies of the Manship School.

Readmission

Students who were not registered at LSU for the preceding regular semester must file a formal application for readmission. Readmission to the Manship School is not automatic.

Degree Requirements of the School

To qualify for a bachelor's degree in this school, a candidate must satisfy these requirements:

- A minimum GPA of 2.00 ("A" = 4) on all work taken in the LSU System and on all work taken.
- A minimum GPA in the major field (mass communication) of 2.00 ("A" = 4) on all work taken in the LSU System and on all work taken.
- At least a "C" in any mass communication course. (In addition, for any mass communication course, a "C" or better is required in prerequisite mass communication courses.)
- A minimum of 120 semester hours of degree credit.
- A minimum of 30 semester hours in courses numbered 3000 or above.
- Degree credit will not be allowed for more than nine semester hours of 1000 level mathematics courses below 1550.
- A minimum of 30 semester hours in residence in the Manship School. The last year of work (30 semester hours) will be taken in residence in this school on the LSU campus.
- *A minor in a department other than mass communication.* The minor will be defined by the minor department.
- English proficiency— a "C" or better in ENGL 2000 or the equivalent.
- Foreign language— a level of proficiency in one foreign language as required in the mass communication curriculum. Students should take a placement test and register at the appropriate level.

Students who have a native fluency in a language other than English may satisfy the foreign language requirement in one of three ways: (a) by completing the prescribed number of hours in the curriculum for the BA degree in a language *other than* English or their native language; (b) by taking a minimum of six hours in courses numbered 3000 or above in their native language; or (c) by taking nine semester hours of English and/or communications studies above the minimum requirements, as stated in the curriculum for the BA degree. (Only three hours may be earned in ENGL 2001 or ENGL 2002 to meet this requirement. Professional and specialized courses in speech may not be counted toward this requirement.)

Students who have a native fluency in a language other than English should consult credit restrictions in that language under the appropriate foreign language department entry in this section of the catalog.

Areas of Concentration

The Bachelor of Arts in Mass Communication (BAMC) degree is conferred on students who complete a concentration in one of the following four areas: digital advertising, journalism, political communication, or public relations. All areas are fully accredited by the Accrediting Council on Education in Journalism and Mass Communication.

The *digital advertising* concentration develops skills in marketing, research, media, and creative planning and execution. Graduates typically become involved in account development and management; media analysis, research, and sales; copywriting; advertising design; and sales promotion.

The *journalism* concentration develops skills in researching, interpreting, organizing, and reporting issues of vital importance to a democratic society across multiple platforms. Students are digitally cross-trained in the theory and practice of journalism for the web, newspapers, magazines, television, and social media. Graduates usually become reporters, editors, and producers.

The *political communication* concentration develops skills in interpreting and communicating information to mass media practitioners and other individuals involved in the political process. Students normally aspire to careers in public or governmental communication, political reporting, and political campaigns.

The *public relations* concentration develops skills and prepares future practitioners in planning and executing the building of relationships and coalitions to advance an enterprise. Graduates typically move to positions in media, governmental, investor, community, and employee relations; special events management; issues management; and public relations counseling.

General Education Requirements

General education requirements of the university are included in the curriculum for mass communication. For specific information concerning these requirements, see the "General Education Requirements " section of this catalog.

Electives

Students may choose any degree credit courses offered by the university consistent with their degree requirements. However, no more than 12 semester hours of ROTC or eight hours of kinesiology may be counted for degree credit.

Pass-Fail Option

Students may not elect the pass-fail grading option for courses within their major. Only the internship (MC 3998) and independent study (MC 4999) courses are graded on a pass-fail basis.

Independent and Distance Learning Credit

A maximum of 32 semester hours of credit in Independent and Distance Learning (IDL) credit is acceptable toward meeting degree requirements. Students who wish to have IDL credits accepted by the Manship School must make their registration in IDL courses a matter of record in the office of the dean in the school at the time of such registration.

Students registered in the school may enroll in a maximum of 19 semester hours of combined resident and IDL course work during a regular semester. They may enroll in a maximum of 12 semester hours of combined resident and IDL work during a summer term. *Students may not be enrolled in IDL course work the semester they intend to graduate. Depending on the IDL course, a special time limit may be imposed by the dean's office.*

Minor Field Requirements

Students in other majors may apply to declare a *minor in mass communication* after completion of 30 semester hours of course work and successful completion of MC 2010. Those who have completed 30 semester hours with at least a 3.00 GPA and MC 2010 with at least a grade of "B" will automatically be allowed to minor in mass communication. Students who do not meet *both* of these standards will be allowed in the minor on a space available basis.

Students minoring in mass communication must complete 18 semester hours in the Manship School of Mass Communication. Mass communication minors must earn at least a grade of "C" in any mass communication course taken as part of the minor. For any mass communication course, a grade of "C" or better is required in prerequisite mass communication courses.

Practical Media Experience

Mass communication students gain considerable practical experience to supplement classroom instruction. In some courses, students work on news and advertising assignments for *The Reveille*, for the campus radio station, KLSU, and for the campus television station, Tiger TV. Students in advanced reporting courses acquire experience with the Baton Rouge *Advocate* and other local media.

Placement Services

Students in the Manship School may use the services of the university's Career Services. These services include counseling, job-seeking skills workshops, job search handbooks, résumé service, career days, and on-campus recruiting and interviews.

Study Abroad

Students in the Manship School are encouraged to participate in the study abroad programs administered by the Office of Academic Programs Abroad and the International Student Exchange Program. Students who participate in these programs must receive school evaluation of the courses to be taken. In addition, students must make an appointment with a counselor to ensure that degree credit will be granted upon return to LSU.

National Student Exchange

LSU cooperates with a number of other universities throughout the U.S. in an exchange program. Students may spend one year (usually the junior year) at another university at little or no more cost than they pay at LSU. Additional information can be obtained from the Office of Academic Programs Abroad.

Manship School Student Government Association

The Manship School Student Government Association serves as a liaison between the Manship School's undergraduate student body and the school's dean. The association is also the official representative to the LSU Student Government.

The Honors Program

An honors program is available to Manship students. Requirements may be obtained from the Honors College, 205 French House. To best serve mass communication honors students, the Manship School offers honors courses, allowing students to take many of their honors hours within the Manship School. Non-honors students may take honors courses in the Manship School when space is available. The following courses are regularly scheduled Mass Communication honors courses: MC 2001, MC 2011, MC 2016, MC 3003, MC 3019, MC 3081, MC 4091, MC 4096.

School of Mass Communication

Major

Mass Communication, B.A.M.C.

Areas of Concentration

Students majoring in mass communication must complete at least 39 hours in mass communication courses, including 21 hours of core courses—MC 2000, MC 2010, MC 2015, MC 2035, MC 3080, and MC 4090—and all of the requirements under one of the areas of concentration listed below: digital advertising, journalism, political communication, or public relations.

** Students choosing French, German, or Spanish as their foreign language will take four to eight hours, depending on placement.*

***MC 2000 is a required course and is counted as a general education social science course.*

Digital Advertising

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

SEMESTER 3: "B" or better in MC 2010; "C" or better in MC 2035; 3.0 Cumulative and LSU GPA.

SEMESTER 4: "C" or better in ENGL 2000 and MC 2015; Admission to the School.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

- ENGL 1001 English Composition (3)
- MATH 1021 College Algebra (3) or
- MATH 1029 Introduction to Contemporary Mathematics (3)
- MC 2000 Introduction to the Mass Media (3)
- General Education course - Arts (3)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)
- MC 2010 Media Writing (3)
- MC 2035 Digital Brands (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 3

CRITICAL: "B" or better in MC 2010; "C" or better in MC 2035; 3.0 Cumulative and LSU GPA.

- ACCT 2000 Survey of Accounting (3) or
- ACCT 2001 Introductory Financial Accounting (3)

- MC 2015 Visual Communication (3)
- MC 2040 The Advertising Industry in Society (3)

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)

- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in ENGL 2000 and MC 2015; Admission to the School.

- EXST 2201 Introduction to Statistical Analysis (4)
- ENGL 2000 English Composition (3)
- HIST 2055 The United States to 1865 (3)
- MC 3080 Mass Media Law (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 5

- ECON 2030 Economic Principles (3)²
- HIST 2057 The United States from 1865 to the Present (3)
- MC 3035 Quantitative Audience Analysis (3)
- MC 3036 Qualitative Audience Analysis (3)
- Approved Social Sciences or Humanities course (3)

Total Semester Hours: 15

Semester 6

- MC 3031 Digital Advertising Creative Strategies (3)

- Free Elective (3)

Total Semester Hours: 15

Semester 7

- MC 4090 Media Ethics and Social Responsibility (3)
- General Education course - Arts (3)

Journalism Elective (choose one from the following):

- MC 4280 Television News Producing (3)
- MC 4260 Long-Format Video Production (3)
- MC 4250 Public Affairs Reporting (3)
- MC 3002 Feature Writing (3)

- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- MC 4500 Advanced Journalism (3) ⁴
- MC Elective (3)
- Approved Electives (7)

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be from the life sciences, and vice versa.

² - Six hour General Education Social Science requirement is met if student chooses GEOG 1001/GEOG 1003 or ECON 2000/ECON 2010 sequence; otherwise, must complete one additional General Education Social Science course.

³ - ECONOMICS option: ECON 2000 and ECON 2010(6 hours) may be taken instead of ECON 2030 (3 hours).

⁴ - In order to take MC 4500 (Adv Journalism) in Sem. 8, you MUST TAKE MC 3005 and MC 3103/MC 3104 as prerequisites.

Political Communication

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

SEMESTER 3: "B" or better in MC 2010; "C" or better in MC 2035; 3.0 Cumulative and LSU GPA.
SEMESTER 4: "C" or better in ENGL 2000 and MC 2015; Admission to the School.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

- ENGL 1001 English Composition (3)

- MATH 1021 College Algebra (3) or
- MATH 1029 Introduction to Contemporary Mathematics (3)

- MC 2000 Introduction to the Mass Media (3)
- General Education course - Arts (3)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)

- MC 2010 Media Writing (3)
- MC 2035 Digital Brands (3)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 3

CRITICAL: "B" or better in MC 2010; "C" or better in MC 2035; 3.0 Cumulative and LSU GPA.

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- GEOG 1001 Human Geography: Americas and Europe (3) or
- GEOG 1003 Human Geography: Africa and Asia (3)

- MC 2015 Visual Communication (3)
- General Education course - Analytical Reasoning (3)
- Approved Social Sciences or Humanities course (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in ENGL 2000 and MC 2015; Admission to the School.

- ECON 2030 Economic Principles (3)³
- ENGL 2000 English Composition (3)
- HIST 2055 The United States to 1865 (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- MC 3504 Introduction to Political Communication (3)

Total Semester Hours: 16

Semester 5

- MC 3510 Political Communication Research (3)
- HIST 2057 The United States from 1865 to the Present (3)

- POLI 2051 American Government (3) or
- POLI 2053 Introduction to Comparative Politics (3) or
- POLI 2057 Introduction to International Politics (3) or
- 4000-level POLI course (3)

- General Education course - Natural Sciences (3)¹
- MC Elective (3)

Total Semester Hours: 15

Semester 6

- MC 3080 Mass Media Law (3)
- Approved Social Sciences of Humanities courses (6)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- MC 3505 Media and Policy Processes (3)
- MC 3520 Political Communication Writing (3)
- MC 4090 Media Ethics and Social Responsibility (3)
- Approved Social Sciences or Humanities courses (6)

Total Semester Hours: 15

Semester 8

- MC 4520 Advanced Seminar in Political Communication (3)
- MC Elective (3)
- Approved Electives (6)

Total Semester Hours: 12

120 Total Sem. Hrs.

To ensure your ability to graduate in 8 semesters, you are encouraged to see a Manship School counselor each semester to review your schedule.

¹ - If two course sequence is taken in the physical science, the additional three hour course must be from the life sciences, and vice versa.

² - Six hour General Education SOCIAL SCIENCE requirement is MET if student chooses GEOG 1001/GEOG 1003 or ECON 2000/ECON 2010 sequence; otherwise, must complete one additional General Education Social Science course.

³ - ECONOMICS option: ECON 2000 and ECON 2010 (6 hours) may be taken instead of ECON 2030 (3 hours).

Public Relations

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

SEMESTER 3: "B" or better in MC 2010; "C" or better in MC 2035; 3.0 Cumulative and LSU GPA.

SEMESTER 4: "C" or better in ENGL 2000 and MC 2015; Admission to the School.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.5 Cumulative and LSU GPA.

- ENGL 1001 English Composition (3)
- MC 2000 Introduction to the Mass Media (3)
- General Education course - Analytical Reasoning (from mathematics) (3)
- General Education course - Arts (3)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MC 2000; 2.8 Cumulative and LSU GPA.

- HIST 1001 Western Civilization to 1500 (3) or
- HIST 1003 Western Civilization Since 1500 (3) or
- GEOG 1001 Human Geography: Americas and Europe (3) or

Minor

Mass Communication Minor

General Minor • Students desiring to pursue a *general minor in mass communication* must complete the following five core courses: MC 2000, MC 2010, MC 2035, MC 3080, MC 4090. Students will also choose one additional course from the following: MC 3010, MC 3333, MC 3504, or MC 4095.

Political Communication Minor

To graduate with a minor in *political communication*, students must complete 18 semester hours from the following: MC 2010, MC 3504, MC 3505 and MC 4520; three hours from one additional political communication course; and three hours of a POLI 4000 level course.

Visual Communication for Students in Design Minor

The Manship School offers an undergraduate minor in visual communication limited to students in the College of Art and Design. Students may choose one of two options: *journalism* or *advertising*. To graduate with a *minor in visual communication*, students must complete 18 hours in mass communication: MC 2010, MC 2035, MC 4090, and 9 hours from one of the following sequence of courses: *journalism*: MC 2005, MC 3005, and either MC 3103 or MC 3104; or *advertising*: MC 2040, MC 3031, and MC 4045.

Departments, Schools, and Curricula

- School of Music
- Department of Theatre

The College of Music & Dramatic Arts is comprised of the Department of Theatre and the School of Music. The Department of Theatre offers theatrical productions under the joint auspices of LSU Theatre and Swine Palace, the latter being a professional equity theatre. Divisions in the School of Music are: Academic Studies, Bands, Ensembles and Conducting, Instrumental, Keyboard, Music Education, and Voice/Opera. Areas of concentration in the Department of Theatre are: Performance, Physical Theatre, Design/Technology, Film and Television, Theatre Studies, and Arts Administration. Both the Department of Theatre and the School of Music offer comprehensive degree programs from the baccalaureate through the doctorate.

The primary goals of the college are:

- to offer advanced training in the performing arts to students who are committed to developing their innate talents;
- to make the performing arts a cultural asset in their lives and the lives of others;
- to prepare graduates for leadership roles and careers in the performing arts.

The School of Music and the Department of Theatre at LSU have long been recognized regionally and nationally for the quality of their performance and research programs. Their faculties have distinguished themselves as specialists in their fields and many currently lead their respective discipline's professional associations. Student groups have appeared as invited featured performers at the Kennedy Center in Washington, D.C., Notre Dame Cathedral (France), Berlin Cathedral (Germany), and at national and regional conferences and conventions.

The college provides numerous public performances and opportunities for artistic learning and cultural enrichment throughout the year for students and the community at large.

The following undergraduate programs are offered by the College of Music & Dramatic Arts:

- Music (BA)
- Music (BM)
- Music Education (BME)
- Theatre (BA)

Admission Requirements

Within the framework of university regulations, students may be admitted to the college according to the following policies:

- **Entering Freshmen** who meet the university admissions standards and have a declared major within the College of Music & Dramatic Arts will be admitted to the college during Freshmen Orientation. Prospective music majors must successfully audition before they may be admitted to the college or register for music major courses.
- Students may be admitted from University College to the college provided that they have credit for the freshman-year courses for the curriculum they plan to follow and with an audition for the appropriate faculty (required for music majors only).
- *Transfer students* from University College or other divisions of LSU, or from other colleges and universities who have passed the required audition for admission (music majors only) may be admitted to the college. Students transferring from another institution must meet university transfer admission requirements. Students must have earned a cumulative grade point average of 2.00 or better to be admitted unconditionally to the Bachelor of Music Education degree program.

All transfer students in music must take an advisory examination in theory. This includes ear-training, keyboard work, harmonization, and analysis. The results of the examination will be used to aid in planning a practical schedule of courses consistent with the student's training and ability. The examinations are given at stated times during registration in each semester or summer term. Students in music degree programs also must audition. See the "School of Music" information in this chapter.

Independent and Distance Learning Course Credit

Up to one-fourth of the number of hours required for the baccalaureate degree may be taken in Independent and Distance Learning (IDL) courses. Acceptance of such work is contingent upon its applicability to the student's curriculum; therefore, students should obtain approval from the dean of the College of Music & Dramatic Arts before registering for IDL courses. IDL study in music theory and work in applied music completed through other universities or colleges must be verified by examination and auditions.

Requirements for a Second Bachelor's Degree

A person holding a baccalaureate degree who wishes to obtain a second baccalaureate degree through this college must satisfactorily complete all requirements in the curriculum selected. In addition, general university requirements for a second bachelor's degree must be met.

Graduate Programs

The Graduate School offers the following degrees in the field of music: Master of Music, Doctor of Musical Arts, and Doctor of Philosophy. The following graduate degree programs are available in theatre: Master of Fine Arts (acting; technology/design) and the Doctor of Philosophy. The requirements for these degrees are given in "The Graduate School" section.

Minor Field Requirements (Optional)

Students in the College of Music & Dramatic Arts may earn a *minor in a field outside of their current major* under the following conditions:

- Students must earn at least 15 semester hours in the minor field, of which at least six semester hours must be taken on this campus and at the 3000 and/or the 4000 level.
- Each course used in the minor must be passed with a grade of "C" or better.
- Courses used for the minor may not be taken on a pass-fail basis.

Minor fields may be chosen from any major field currently offered in which the specific requirements for a minor have been established and approved by the Faculty Senate Courses and Curricula Committee and the Office of Academic Affairs.

The department offering the minor may impose additional requirements.

Undergraduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Undergraduates in addition to their academic course of study.

CURRICULA:

- Music Education, B.M.E.
- Music, B.A.
- Music, B.M.

The School of Music offers several curricula and special courses of vocational as well as avocational nature. These curricula are outlined below. The vocational programs prepare students to be performers, composers, scholars, or teachers and culminate with the undergraduate degree, Bachelor of Music. The Bachelor of Music Education degree is designed to train students to teach vocal and instrumental music in the public schools where state certification is required. Persons wishing a broader variety of subjects in addition to a basic foundation in music may follow the curriculum leading to the Bachelor of Arts in Music.

Avocational programs are offered through courses in music appreciation, music history, music fundamentals, and jazz history. Participation in the various performing organizations is also available, based upon audition. Private lessons are offered to students who qualify through audition, based on the availability of teacher time.

The curriculum in music education meets requirements of the Louisiana State Department of Education for accrediting various types of music instructors in the Louisiana public schools and is approved by the National Council for Accreditation of Teacher Education and the National Association of Schools of Music. The School of Music is an accredited institutional member of the National Association of Schools of Music.

Secondary and primary applied courses, MUS 2130-MUS 2154 and MUS 3130-MUS 3154, are offered for 2 or 3 credits. Students who elect two credits will receive 30 minutes of individual instruction per week; students who elect three credits will receive 60 minutes of individual instruction per week. Graduate applied courses are offered for 2-6 credits. All students registering for MUS 2130-MUS 2154 and MUS 3130-MUS 3154 may be required to participate concurrently in one of the following major performing organizations: MUS 4232, MUS 4233, MUS 4234, MUS 4235, MUS 4236, MUS 4250, MUS 4251, MUS 4252, MUS 4253, MUS 4254 or MUS 4261.

All applied music and ensemble courses may be repeated for credit every semester.

Secondary applied music courses are designed for students who are not qualified to either major or minor in the specific instrument designated by the course number. Primary Applied Music Courses are for students whose declared major or minor is the specific instrument designated by the course number.

Auditions

For Admission • An audition in the major performance medium (piano, voice, etc.) is required of all students wishing to pursue curricula in the School of Music. The audition can be on campus or by tape recording. Contact the School of Music for details.

For Applied Music Courses • All applied music courses are open to both majors and nonmajors by audition only. New students or reentry students who have been out of school for more than one year and plan to continue in a performance curriculum should contact the School of Music to arrange an audition during the semester prior to the one in which the student wishes to be enrolled. All students must complete an audition before registering for applied music courses. Auditions may be arranged during registration at the beginning of each semester, but it is recommended that this audition occur no later than the semester prior to entry.

For Ensemble Courses • All music ensemble courses are also open to both majors and nonmajors by audition only, with the exception of MUS 4230, MUS 4232, and MUS 4233 which require no audition. Students should contact the director of the ensemble in which they wish to participate to arrange an audition during the registration period the semester prior to the one in which the student wishes to participate. Auditions may also be arranged during late registration at the beginning of each semester. These courses are open to all students, including freshmen and sophomores.

General Requirements

All students enrolled for private lessons in performance, regardless of their college or school (with the exception of graduate keyboard and graduate voice students) may, at the discretion of the director of the School of Music, in consultation with the conductor of the organization concerned and the applied teacher, be required to participate in one of the major performing organizations for laboratory experience.

Participation in major ensembles appropriate to the major instrument is required of all music majors. (See list of ensembles under Music Courses). MUS 4253 may count as a major ensemble as follows:

(1) BA in Music with a primary emphasis in Jazz, all four required ensemble hours; (2) BA in Music with primary emphasis other than Jazz, two of the four required ensemble hours; (3) BM with all concentrations, two of the eight required ensemble hours; and (4) BME with instrumental concentration, two of the seven required ensemble hours.

Students are not charged for private lessons or for use of school-owned instruments, equipment, or practice rooms, although a maintenance/repair fee may be charged. A fee of \$50 per year is charged for the use of a locker; a nonrefundable fee of \$75 is charged when a recital is scheduled.

An honors curriculum is available within the Bachelor of Music curriculum. Students should contact the Honors College and the School of Music for details.

At the completion of the fourth semester of study, all majors in music and music education will be required to take a performance examination, which will determine continued study as a major at the junior level. Composition majors will be required to submit written examples of their work to the appropriate undergraduate committee. Consult the guidelines, standards, and procedures developed by each individual area.

Bachelor of Music Degree Requirements

- Completion of a minimum of 120 semester hours with a GPA of 2.00 or better on all work attempted
- A grade of "C" or better in all required music courses
- Participation in major ensembles (see "General Requirements")

Bachelor of Music Education

In view of its responsibility to the teaching profession, the *School of Music reserves the right to review at any time a student's suitability to continue in the teacher education program in music education*. Faculty members are encouraged to monitor the growth of prospective teachers enrolled in the program.

After completion of 24 semester hours with at least a 2.25 GPA, students will be eligible for the first level of admission into the music education program within the School of Music, the Basic Education Program. This means that the student has formally declared a major, but is not yet eligible for admission to the second level, the Teacher Education Program. Students must qualify for the second level before they have earned 75 semester hours.

To qualify for and remain in the Teacher Education Program at the conclusion of the sophomore year, students must fulfill requirements of the sophomore upper-level examinations in music education. Each student must:

- have a minimum cumulative and LSU grade point average of 2.50 for entry into and continuation in upper (3000/4000) level education courses, including student teaching;
- have passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030;
- pass the applied music upper-level examinations for music education majors;
- pass a piano proficiency examination and piano majors must satisfy vocal proficiency requirements;
- have favorable evaluations of ensemble work by the appropriate ensemble directors; and
- have a favorable recommendation by the music education faculty on the basis of an interview with that faculty.

Students will not be allowed to take EDCI 3136, MUED 3170, MUED 3171, MUED 3630, or PSYC 2078 until they have been accepted into the teacher education program in music education by successfully completing the fourth semester performance examination.

All students are expected to earn a grade of "C" or better in one of the following or have the equivalent transfer credit: ENGL 2000 or ENGL 1005 (international students). Students who fail to do so must repeat the course.

Students enrolled in the music education program who are on scholastic probation will be dropped from the program for failure to earn a minimum 2.00 GPA during any semester. Students enrolled in the music education program who fail to earn a minimum 2.00 GPA for two consecutive semesters will be dropped from the program.

Student Teaching

Application for Student Teaching

Application for student teaching must be made to the music education faculty no later than one week following the last day for adding courses in the semester *prior* to student teaching.

Requirements for Student Teaching

Student teaching is offered each fall and spring semester, scheduled as an all-day, Monday through Friday experience. Student teachers must also plan for 3:30-4:30 p.m. meetings on Monday. The student teaching experience must include a minimum of 270 clock hours, 180 of which must be actual teaching. A substantial portion of the 180 clock hours in actual teaching must be on an all-day basis.

No student may schedule more than 15 semester hours of work during the semester in which student teaching is done. Any student who is within 14 hours of graduation and is not qualified for supervised student teaching will be dropped from the program.

To be permitted to do student teaching, the student must meet the following requirements:

- Attainment of senior standing in the School of Music, with a cumulative average of 2.50 on all work attempted and on all work at LSU, with no grade lower than "C" in all music courses and professional education courses, including PSYC 2078, regardless of the institution(s) attended
- Completion of *all* courses
- Proficiency in written expression
- Take the required PRAXIS II assessments during the last semester of course work prior to student teaching

Degree Requirements

Degrees in the music education programs in this college are conferred when the following conditions have been met:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the School of Music, the university, and the Louisiana Board of Elementary and Secondary Education;
- Minimum cumulative and LSU GPA of 2.50 on all work completed;
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in coursework as specified by the Louisiana Board of Elementary and Secondary Education;
- Completion of the final 30 semester hours of work done in residence on the LSU campus as a registrant in the School of Music; and
- Proficiency in written expression.

Independent and Distance Learning Credits

Up to one-fourth of the number of hours required for the baccalaureate degree may be taken through Continuing Education by Independent and Distance Learning (IDL) study, registration as an extension student, or both. Students may not schedule IDL or extramural work during the last 30 hours of their programs. Time limits for IDL study will be imposed to ensure that these courses cause as little conflict as possible with regular classes.

LSU Teacher Education Council

The Teacher Education Council provides governance for all teacher education programs offered within the university. It is responsible for setting and achieving teacher education goals, establishing policies, fixing responsibilities for program decision-making, identifying and utilizing resources, and facilitating continuing development and improvement of basic and advanced teacher education programs.

Bachelor of Arts Degree Requirements

Offered by the College of Music and Dramatic Arts since 1998-99, the Bachelor of Arts in Music degree is a viable alternative for those students who prefer a more flexible and less intensive music curriculum than is possible under the Bachelor of Music

Education or Bachelor of Music curricula. The BA in Music degree could prepare students for careers in arts administration, the music business industry, for further study at the graduate level in music history or music theory, or other areas. A minor in an area other than music is required for the degree. A grade of "C" or better is required in all music courses.

Major

Music Education, B.M.E.

Areas of Concentration

All students in the BME program shall participate in band (MUS 4250, MUS 4251, MUS 4252, MUS 4253, MUS 4254), orchestra (MUS 4261), or chorus (MUS 4232, MUS 4233, MUS 4234, or MUS 4236) for seven semesters. Students with an instrumental emphasis may count MUS 4253 Jazz Band for a maximum of two of the seven required ensemble hours. Large ensemble assignments are made at the discretion of the counselor and the ensemble conductors. Any request for adjustment of the rules pertaining to performance in large ensembles must be submitted to a reviewing committee.

Students wishing to be certified in more than one area (band and orchestra, band and vocal, etc.) should see their faculty advisors for certification requirements and proficiencies. Such programs normally require a minimum of five years to complete.

Piano proficiency at the level of MUS 1133 or equivalent is required.

Instrumental

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better MUS 1740, primary applied music course; 2.25 Cumulative GPA.

SEMESTER 2: "C" or better in MUS 1741, primary applied music course; 2.25 Cumulative GPA.

SEMESTER 3: "C" or better in MUS 2731/MUS 2733, primary applied music course; 2.5 Cumulative GPA.

SEMESTER 4: "C" or better in MUS 2732/MUS 2734, primary applied music course; 2.5 Cumulative GPA.

SEMESTER 5: "C" or better in MUS 3731/MUS 3733, primary applied music course; 2.5 Cumulative GPA.

Semester 1

CRITICAL: "C" or better MUS 1740, primary applied music course; 2.25 Cumulative GPA.

- MUED 1700 Orientation to Music Education (1)
- MUS 1740 Introduction to Music History I (2)

- MUS 1130 Group Piano I (1 each) or
- Elective (1)

- PSYC 2000 Introduction to Psychology (3)

- MUS 2731 Music Theory I (4) or
- MUS 2733 HONORS: Music Theory I (4)

- MATH 1021 College Algebra (3) or
- MATH 1029 Introduction to Contemporary Mathematics (3)

- Primary Applied Music Course (2)
- Major Ensemble Course (1)¹

Total Semester Hours: 17

Semester 2

CRITICAL: "C" or better in MUS 1741, primary applied music course; 2.25 Cumulative GPA.

- MUED 1700 Orientation to Music Education (1)
- MUS 1741 Introduction to Music History II (2)
- MUS 1800 Technology in Music Education (2)

- MUS 1131 Group Piano II (1 each) or
- Elective (1)

- MUS 2732 Music Theory II (4) or
- MUS 2734 HONORS: Music Theory II (4)

- Primary Applied Music Course (2)
- Major Ensemble Course (1)¹
- General Education course - Analytical Reasoning (3)

Total Semester Hours: 16

Semester 3

CRITICAL: "C" or better in MUS 2731/MUS 2733, primary applied music course; 2.5 Cumulative GPA.

- MUED 1000 Foundations of Music Education (3)
- MUS 1700 Recital Hour (0)
- MUS 2300 Instrumental and Vocal Techniques (1-2)

¹- Registration in an appropriate music ensemble may be a corequisite for registering for applied music courses. The requirement for 12 hours of applied music courses may be satisfied by taking six semesters of applied music for two hours of credit or four semesters of applied music for three hours of credit.

²- Choose from the following: MUS 4232, MUS 4233, MUS 4234, MUS 4235, MUS 4236, MUS 4250, MUS 4251, MUS 4252, MUS 4254 or MUS 4261. BA in Music with a primary emphasis in Jazz may select MUS 4253 Jazz Ensemble for all four required ensemble hours; BA in Music with primary emphasis other than Jazz may select MUS 4253 for maximum of two of the four required ensemble hours.

³- Foreign Language sequence should be selected from the General Education Humanities requirements, and both courses must be in the same language.

⁴- If students declare a minor with fewer than 18 hours credit, then the additional hours must be taken as electives.

⁵- To be selected from the following: MUS 4710, MUS 4712, MUS 4718, MUS 4720, MUS 4721, MUS 4723, MUS 4749, MUS 4759.

- MUS 4352 Song Literature II (2)
- MUS 4797 Senior Recital (1)
- Primary Applied Music Course (2)
- Major Ensemble Course (1)²
- General Education course - Social Sciences (3)
- General Education course - Humanities (3)
- Elective (1)⁴

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - If credit has been earned in ENGL 1001 and/or MATH 1021/MATH 1029, General Education Course(s) should be taken in lieu of ENGL 1001 and/or MATH 1021/MATH 1029.

² - Choose from the following: MUS 4232, MUS 4233, MUS 4234, MUS 4235, MUS 4236.

³ - French, German or Italian.

⁴ - May not choose from MUS 1010, 1100-level, MUS 1751, or MUS 1799.

Minor

Music Minor

To graduate with a *minor in music*, students must complete:

- an audition in their applied area to be accepted as a music minor.
- MUS 1740, MUS 1741.
- MUS 2731 and MUS 2732 or MUS 2053 and MUS 2054.
- 12 hours of the appropriate major applied music course (brass, composition, woodwinds, percussion, strings, harp, piano performance, organ, and voice).
- At least six semester hours must be taken on this campus and at the 3000 and/or 4000 level, excluding ensembles.
- Each course used in the minor must be passed with a grade of “C” or better.
- Courses used for the minor may not be taken on a pass/fail basis.

Department of Theatre

WEBSITE	www.theatre.lsu.edu

For information regarding the GRADUATE PROGRAM, [click here](#).

On the eve of our 84th season, the LSU Department of Theatre continues to achieve national and international prominence in professional training, scholarship, and production. With Swine Palace, the department has distinguished itself as one of the few programs in the country that supports a full-time, year-round Equity company. While pursuing their degrees, students have the opportunity to work alongside world-class artists in every facet of production. Many students are Actors' Equity Association (AEA) eligible by the time they graduate. Our NAST-accredited BA degree programs (concentrations in arts administration, design-technology, film/tv, performance, physical theatre, and theatre studies) provide rigorous comprehensive training within the framework of a liberal arts education. In addition to working with Swine Place, our students support Louisiana's burgeoning film industry.

Major

Theatre, B.A.

Areas of Concentration

Additional departmental requirements include seven semester hours of an approved foreign language sequence with at least one course at an intermediate level. The foreign language courses must be all in one language.

Arts Administration

CRITICAL REQUIREMENTS

SEMESTER 1: MATH 1021; 2.0 Cumulative GPA.

SEMESTER 2: THTR 1025; 2.0 Cumulative GPA.

SEMESTER 3: THTR 2130; 2.0 Cumulative GPA.

SEMESTER 4: MATH 1431; 2.0 Cumulative GPA.

SEMESTER 5: Complete Foreign Language Sequence; 2.0 Cumulative GPA.

Semester 1

CRITICAL: MATH 1021; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 1001 Practical Elements of Stagecraft (3)
- THTR 1025 Acting I: Introduction to Acting (3)
- THTR 2026 Theatre Practicum I (1)
- THTR 2130 Script Analysis (3)
- MATH 1021 College Algebra (3)
- Foreign Language Sequence Course (4)

Total Semester Hours: 17

Semester 2

CRITICAL: THTR 1025; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 2022 Introduction to Theatrical Design (3)
- THTR 2026 Theatre Practicum I (1)
- THTR 2021 Directing I (3)
- ENGL 1001 English Composition (3)
- Electives or entry level foreign language course if needed (4)

Total Semester Hours: 14

Semester 3

CRITICAL: THTR 2130; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- ACCT 2000 Survey of Accounting (3)
- MATH 1431 Calculus with Business and Economic Applications (3)
- THTR Technology Elective (3)²
- General Education course - Natural Sciences (3)¹
- Foreign Language Sequence Course (through 2001, 2101, or 2053) (3)

Total Semester Hours: 15

Semester 4

CRITICAL: MATH 1431; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 2026 Theatre Practicum I (1)
- ENGL 2000 English Composition (3)
- ECON 2030 Economic Principles (3)
- THTR 3320 Introduction to Arts Management (3)
- THTR Design or Technology Course (3)³
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 16

Semester 5

CRITICAL: Complete Foreign Language Sequence; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 3120 Theatre History and Literature I: Ancient Greece through Renaissance (3)
- MKT 3401 Principles of Marketing (3)
- THTR 3340 Arts Marketing (3)
- THTR 4300 Special Topics in Arts Administration (3)
- Approved Electives (3)⁴

Total Semester Hours: 15

Semester 6

- THTR 1000 Theatre Forum (0)
- THTR 3121 Theatre History and Literature II: Renaissance through Nineteenth Century (3)
- THTR 3122 Theatre History and Literature III: 1875 to the Present (3)
- THTR 4136 Theatre Practicum II (1)
- THTR 4300 Special Topics in Arts Administration (3)
- THTR 4320 Advanced Arts Management (3)

Total Semester Hours: 13

Semester 7

- THTR 1000 Theatre Forum (0)
- THTR 4136 Theatre Practicum II (1)
- THTR 4350 Fundraising for the Arts (3)
- THTR 4900 Senior Capstone Seminar in Theatre (3)
- THTR Literature Course (3)⁵
- Approved Electives (5)⁴

Total Semester Hours: 15

Semester 8

- THTR 1000 Theatre Forum (0)
- General Education course - Arts (3)
- General Education course - Social Sciences (3)
- Approved Electives (6)⁴
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical sciences, the additional three hour course must be taken from the life sciences, and vice versa.

² - Select from: THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, OR THTR 3531.

³ - Select from: THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, THTR 3531, THTR 4123, THTR 4124, THTR 4530, or THTR 4531.

⁴ - Not THTR 1020, THTR 1021, THTR 2028, or THTR 2128.

⁵ - Select from: THTR 4021, THTR 4130, THTR 4131, THTR 4220, or THTR 4436.

Design/Technology

CRITICAL REQUIREMENTS

SEMESTER 1: THTR 1025; 2.0 Cumulative GPA.

SEMESTER 2: MATH 1021/MATH 1029; THTR 1001; 2.0 Cumulative GPA.

SEMESTER 3: ENGL 1001; 2.0 Cumulative GPA.

SEMESTER 5: Complete Foreign Language Sequence; 2.0 Cumulative GPA

Semester 1

CRITICAL: THTR 1025; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 1001 Practical Elements of Stagecraft (3)
- THTR 1025 Acting I: Introduction to Acting (3)
- THTR 2026 Theatre Practicum I (1)

- MATH 1021 College Algebra (3) or
- MATH 1029 Introduction to Contemporary Mathematics (3)

- General Education course - Social Sciences (3)
- Foreign Language Sequence Course (4)

Total Semester Hours: 17

Semester 2

CRITICAL: MATH 1021/MATH 1029; THTR 1001; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 2022 Introduction to Theatrical Design (3)
- THTR 2026 Theatre Practicum I (1)
- THTR 2130 Script Analysis (3)
- ENGL 1001 English Composition (3)
- THTR Elective (1)¹
- Electives or entry level foreign language course if needed (4)

Total Semester Hours: 15

Semester 3

CRITICAL: ENGL 1001; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 1029 Stage Movement I (3) ⁵
- THTR Elective (1)¹
- THTR Technology Elective (3)⁶
- General Education course - Natural Sciences (3)⁸
- General Education course - Analytical Reasoning (3)
- Foreign Language Sequence Course (through 2001 or 2101 or 2053) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: THTR 2130; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- ENGL 2000 English Composition (3)
- THTR 2026 Theatre Practicum I (1)
- THTR 2021 Directing I (3)
- THTR 3029 Stage Movement II (3) ⁵
- THTR Design or Tech Course (3)⁷
- THTR Elective (1)¹
- General Education course - Natural Sciences (3)⁸

Total Semester Hours: 17

Semester 5

CRITICAL: Complete Foreign Language Sequence; 2.0 Cumulative GPA

- THTR 1000 Theatre Forum (0)
- THTR 3120 Theatre History and Literature I: Ancient Greece through Renaissance (3)
- THTR 3032 Viewpoints and Ensemble (3)
- General Education course - Natural Sciences (3)⁸
- THTR Elective (1)¹
- Approved Elective (3)³

Total Semester Hours: 13

Semester 6

- THTR 1000 Theatre Forum (0)
- THTR 3803 Improvisation (3)
- THTR 3121 Theatre History and Literature II: Renaissance through Nineteenth Century (3)
- THTR 3122 Theatre History and Literature III: 1875 to the Present (3)
- THTR 4136 Theatre Practicum II (1)
- THTR Elective (1)¹
- PHYS THTR Elective Course (3)²

Total Semester Hours: 14

Semester 7

- THTR 1000 Theatre Forum (0)
- THTR 4900 Senior Capstone Seminar in Theatre (3)
- General Education course - Social Sciences (3)
- THTR Elective (1)¹
- PHYS THTR Elective Course (3)²
- THTR Literature Course (3)⁴

- Approved Elective (2)³

Total Semester Hours: 15

Semester 8

- THTR 1000 Theatre Forum (0)
- THTR 4136 Theatre Practicum II (1)
- General Education course - Arts (3)
- PHYS THTR Elective Course (3)²
- Approved Electives (6)³

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - Select from: THTR 1127, THTR 1131, THTR 1153, THTR 1227, THTR 1231, THTR 1253, THTR 2031, or THTR 4031.

² - Select from: THTR 2025, THTR 2032, THTR 3800, THTR 4029, THTR 4032, THTR 4033, or THTR 3802.

³ - Not THTR 1020, THTR 1021, THTR 2028, or THTR 2128.

⁴ - THTR LITERATURE COURSE: Select from: THTR 4021, THTR 4130, THTR 4131, THTR 4220, or THTR 4436.

⁵ - THTR 1029 (offered in fall semester); THTR 3029 (offered in spring semesters).

⁶ - THTR TECHNOLOGY ELECTIVE: Select from THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, OR THTR 3531.

⁷ - THTR DESIGN OR TECH COURSE: Select from THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, THTR 3531, THTR 4123, THTR 4124, THTR 4530, or THTR 4531

⁸ - If two-course sequence is taken in the physical science, the additional three-hour course must be taken from the life sciences, and vice versa.

Theatre Studies

CRITICAL REQUIREMENTS

SEMESTER 1: THTR 1025; 2.0 Cumulative GPA.

SEMESTER 2: MATH 1021/MATH 1029; THTR 1001; 2.0 Cumulative GPA.

SEMESTER 3: ENGL 1001; 2.0 Cumulative GPA.

SEMESTER 4: THTR 2130; 2.0 Cumulative GPA.

SEMESTER 5: Complete Foreign Language Sequence; 2.0 Cumulative GPA

Semester 1

CRITICAL: THTR 1025; 2.0 Cumulative GPA.

- THTR 1000 Theatre Forum (0)
- THTR 1001 Practical Elements of Stagecraft (3)

- General Education course - Arts (3)
- General Education course - Social Sciences (3)
- Approved Electives (7)⁷

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - If two course sequence is taken in the physical science, the additional three hour course must be taken from the life sciences, and vice versa.

² - Select from: THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, OR THTR 3531.

³ - Select from: THTR 2008 or THTR 4008, THTR 4021, THTR 4130, THTR 4131, THTR 4220, or THTR 4436. (Cannot repeat a course already used to fulfill the B.A. Theatre literature requirement).

⁴ - Select from: THTR 2020, THTR 2023, THTR 2830, THTR 3123, THTR 3126, THTR 3134, THTR 3435, THTR 3530, THTR 3531, THTR 4123, THTR 4124, THTR 4530, or THTR 4531

⁵ - Approved Theatre Course: Choose any combination of theatre courses. Not THTR 1020, THTR 1021, THTR 2028, or THTR 2128.

⁶ - THTR LITERATURE COURSE: Select from: THTR 4021, THTR 4130, THTR 4131, THTR 4220, or THTR 4436.

⁷ - APPROVED ELECTIVES: Not THTR 1020, THTR 1021, THTR 2028, or THTR 2128.

Minor

Arts Administration Minor

In order to graduate with a minor in *arts administration*, students must complete: THTR 3320, THTR 3340, THTR 4320, THTR 4350 and THTR 4300 (taken twice).

Dance Minor

To graduate with a *minor in dance*, students must complete at least 18 hours of dance courses as follows:

- core (9 hours): THTR 1800, THTR 3802 or THTR 3803, THTR 4801;
- technique (6 hours): THTR 1127, THTR 1131, THTR 1153, THTR 1227, THTR 1231, THTR 1253 (*courses may be taken twice for credit, two technique courses must be at intermediate level*); and
- electives (3 hours): THTR 1029, THTR 1804, THTR 4804.

Physical Theatre Minor

In order to graduate with a *minor in physical theatre*, students must complete at least 18 hours of theatre classes as follows:

- core (6 hours): THTR 1029, THTR 3029, THTR 3032, THTR 3803
- technique (6 hours): THTR 1127, THTR 1131, THTR 1153, THTR 1227, THTR 1231, THTR 1253, THTR 2031, THTR 4031
- electives (6 hours): THTR 2025, THTR 2032, THTR 3800, THTR 3802, THTR 4029, THTR 4032, THTR 4033

Theatre Minor

In order to graduate with a *minor in theatre*, students must complete at least 19 hours of theatre courses as follows:

- Theatre core—THTR 1025, THTR 2022, THTR 2026, THTR 2130; and

- Theatre electives—at least nine additional hours of theatre at an advanced (3000/4000) level.

Departments and Curricula

- Department of Biological Sciences
- Department of Chemistry
- Department of Geology
- Department of Mathematics
- Department of Physics & Astronomy

The College of Science offers preparation for careers in biochemistry, biological sciences, chemistry, geology and geophysics, mathematics, microbiology, and physics and astronomy. Students are also provided with strong academic backgrounds for professional study in medicine, dentistry, pharmacy, and many other careers that require in-depth study of science and mathematics.

The departments within the college, the various curricula, and the degrees that may be earned are shown in the chapter, "Academic Programs." These curricula provide broad general education as well as knowledge of the structure of science. Students in the college may also choose curricula that provide pre-medical or pre-dental preparation, including curricula in biochemistry, biological sciences, chemistry with a pre-professional concentration, and physics with a medical physics concentration. Classroom and laboratory study may be supplemented by contact with active research programs.

The departments of the college offer work leading to the bachelor's, master's, and doctoral degrees.

Degree Programs

All undergraduate degrees in the College of Science are Bachelor of Science degrees. The following programs are offered by the College of Science:

- Biochemistry
- Biological Sciences
- Geology
- Mathematics
- Physics

- Microbiology
- Chemistry

For specific information concerning undergraduate degree programs, refer to the curricula offered by the departments on the following pages. Detailed information about graduate degree programs may be obtained from "The Graduate School" section.

Admission Requirements

Students who contemplate entering this college should give special attention to the mathematics and science courses they select and should consult a representative of the department they plan to enter prior to completing their initial registration.

Students will be admitted to the college when they:

- have earned 24 or more semester hours of credit in courses numbered 1000 or above;
- have maintained a grade point average of at least 2.00 on both LSU and cumulative averages;
- have passed all courses in mathematics and science with grades of "C" or better or received special approval of the dean of the college;
- have passed ENGL 1001 or the equivalent with a grade of "C" or better;
- have earned credit in either MATH 1022, MATH 1023, MATH 1550 or MATH 1551 with a grade of "C" or better.
- entry into any of the three majors (biochemistry, biological sciences, and microbiology) in the Department of Biological Sciences requires earned credit in BIOL 1201 and BIOL 1202; CHEM 1201; and MATH 1550.
- entry into any of the four secondary education concentrations (biological sciences, chemistry, mathematics, or physics) requires a 2.50 LSU and cumulative GPA and passing scores on the PRAXIS I assessments or minimum ACT composite of 22 or minimum SAT composite of 1030.

Students transferring from another institution must meet university transfer admission requirements. Transfer students must also meet the current admission requirements of the senior college and receive approval of the dean of the college.

Students who, after initial enrollment in this college, wish to obtain credits from colleges or universities other than LSU and who plan to offer such credits toward their degree requirements must obtain prior approval from the dean on a specific-course basis.

Degree Requirements of the College

The college offers the bachelor's degree in curricula designed to give students a thorough education in a particular scientific discipline. In addition, a core of material representing a broad exposure to the human cultural heritage is an integral part of the curricula in the college. That core consists of the following course work:

English • Nine semester hours including ENGL 1001, ENGL 2000, and three hours chosen from 2000-level or above English or Honors courses from the general education humanities list. Some curricula require an additional three hours in English.

Mathematics • A minimum of five semester hours of calculus (MATH 1550). Most curricula require additional credits in mathematics. Degree credit will not be allowed for mathematics courses numbered below 1550.

Foreign Language • Students may satisfy the college foreign language requirement by passing four semester hours in foreign language. Some curricula require eight semester hours in a single foreign language.

International students whose native language is not English and who did not attend an English-speaking high school may satisfy the foreign language requirement as follows:

- As shown above (in a language other than the student's native language); or

- By passing six to nine hours (depending on curricula) in his or her native language in courses that may be taken for credit by native speakers of the language; or
- By taking six to nine hours (depending on curricula) of English and/or speech (CMST) above the minimum requirements in the curriculum for the BS degree. The courses must be pre-approved by the dean and must be taken at LSU. At least three hours must be at the 2000-level or above.

Sciences • Eleven hours including a two-semester sequence of study in a biological science or a physical science and a one-semester course in the alternative field not chosen for the one-year requirement. The one-year sequence must include two hours of laboratory credit. Courses selected to meet this requirement must be chosen from courses offered by departments in the College of Science.

Social Sciences and Humanities • These hours are in addition to the English and foreign language requirements described above. Nine to twelve hours of the required social sciences/humanities courses must be chosen from the list of general education courses in the following way: three hours in the arts, three hours in the humanities (depending on the curriculum), and six hours in the social sciences.

Academic Policy • Following is a listing of the more important academic policies of the college offered to guide students toward degrees.

- All students must complete a program of study established by the department concerned and approved by the faculty and the dean of the college.
- No curriculum in the college requires less than 120 semester hours; some curricula require more. Students in all degree programs of the college must earn at least 24 of the last 30 semester hours offered toward their degrees as registrants in the College of Science at LSU. The university requires that all candidates for the bachelor's degree must fulfill a minimum residence requirement of at least 25 percent of the total number of hours required for the degree at this university.
- Students in all degree programs of the college must earn in residence on the LSU campus (Baton Rouge) at least 18 of the hours offered toward their degrees in courses offered by departments in the College of Science. In all degree programs, at least nine of these 18 hours must be in courses numbered above 3000 and offered by the department administering the major program. Students majoring in the Department of Biological Sciences must have nine semester hours in courses numbered above 3000 in their major. Research courses cannot be used in the residence requirement of nine hours numbered above 3000. A maximum of three semester hours in research courses may be used in the 18-hour residence requirement. Courses used to satisfy all residence requirements must be passed with a grade of "C" or better.
- Independent and Distance Learning courses, Online Distance Learning courses, and courses in which credit was earned through credit examination may not be used to satisfy the college residence requirement.
- The following courses must be passed with a grade of "C" or better: (1) all required science, computer science, and mathematics courses; (2) all restricted, second discipline, and advanced sciences electives; and (3) ENGL 1001 and ENGL 2000. If a student makes a "D" or "F" in a course requiring a "C," the course must be taken and not dropped the next semester the student is in residence and the course is offered.
- Non-participation courses in kinesiology may be taken for elective credit. A maximum of three semester hours will be allowed in kinesiology participation (activity) courses. Twelve semester hours of ROTC may be allowed for degree credit, with no more than six of the twelve semester hours in courses numbered below 3000. However, the sum of basic (1000/2000 level) ROTC course credits and kinesiology activity course credits allowed toward the degree may not exceed six semester hours.
- Students are expected to make reasonable and satisfactory progress in a degree program. Consequently, sequential scheduling of courses in the major field is necessary, and required courses in English and mathematics must be scheduled each semester until they are satisfactorily passed. If necessary, a required course may be dropped *once*, but normally, *not* a second time.
- Application for the bachelor's degree must be made in writing and approved by the dean of the college during the semester *prior* to the semester in which the degree is to be awarded.

- In order to meet graduation requirements, students must have a 2.00 on both the LSU and cumulative grade point averages. A 2.50 LSU and cumulative grade point average is required for students graduating in any of the secondary education concentrations.

Earning Two Degrees or one Degree with Two Majors

With the dean's approval, a student may be enrolled in two bachelor's degree programs concurrently and thereby either earn two degrees, or earn one degree with two majors listed on the transcript, provided all requirements are completed as of the same commencement.

A student may earn one degree, with two majors listed on the transcript, by completing the residence and academic requirements for each major and the degree program to which it belongs. The student may earn two degrees by, in addition, earning 30 hours more than required for the degree that requires the fewer number of hours.

If the two programs are in different colleges, then the student must be accepted for admission to both colleges and must adhere to the regulations of both colleges. The student must declare a home college, where registration will be initiated and permanent files maintained, and must maintain contact with the second college to ensure that satisfactory progress is being made toward the requirements of its degree program.

College Probation

A student in the College of Science who fails to earn a 2.00 semester average in a regular semester or a summer term will be placed on college probation. In addition, students who fail to meet the college academic requirements noted in the section on degree requirements, or who enter the college with deficiencies may be placed on college probation. At the discretion of the dean, a student who is on college probation and fails to meet the academic requirements, including earning a 2.00 or better semester average, may be declared ineligible to continue in the college. A student on college probation who does earn a 2.00 or better semester GPA, who remediates course deficiencies, and who makes satisfactory progress in the degree program will be removed from college probation.

Pre-Medical and Pre-Dental Counseling

Counselors are available to help students with applications to medical and dental schools. This application process begins one and one-half years prior to professional school entry. Information regarding the pre-medical/pre-dental program at LSU and the professional school application process is available [here](#).

The College of Science sponsors a Pre-medical/Pre-dental Review Committee that provides letters of evaluation for LSU students applying to professional schools. Students wishing to use the services of the LSU Pre-medical/Pre-dental Review Committee must: (1) have a minimum 3.0 cumulative and science GPA, (2) have been enrolled on the LSU main campus as a full time student for the two semesters preceding the committee review, (3) attend mandatory informational meetings, and (4) meet all registration deadlines.

Further information about the committee procedures and requirements may be obtained in the dean's office, 351 Hatcher Hall.

Pass-Fail Option

Students in the College of Science may register for courses in the college on a pass-fail basis under the following conditions:

- Only students with a 2.50 average or better may participate.
- Only *free elective* courses may be taken on a pass-fail basis. Required courses, restricted electives, and courses germane to the major and the career for which the student is preparing may not be taken on a pass-fail basis. Registration for a course on a pass-fail basis will not be permitted until the required work in the same area has been satisfactorily completed. A student *may not* take courses offered by the Honors College on a pass-fail basis.
- Eligible students may take one course per semester up to a total of 12 hours toward the degree on a pass-fail basis.

- A student must have permission (by signatures on a petition form) from the dean of this college, the instructor of the course, and the student's department chair.
- Pass-fail registration must be completed before the final day for adding courses.

Students from other colleges who wish to register for courses in this college on a pass-fail basis will present a petition form to the dean of the college. If the petition is approved, the student will then present the form to the instructor concerned for the appropriate action.

Courses offered by the College of Science that are required in a student's curriculum or are normally considered important in preparation for the student's career will not be approved on a pass-fail basis.

Distance Learning Credit and Intersession Credit

LSU Continuing Education offers both Independent and Distance Learning (IDL) and Online Distance Learning (ODL) courses. Credit earned through this LSU division may be accepted toward meeting degree requirements only with approval of the dean of the college and may not exceed a total of 12 hours.

Students in residence may take IDL or ODL credit only in exceptional cases (e.g., conflicts between single sections of required courses) and with specific approval of the dean of the college.

Students may not be enrolled in IDL or ODL credit the semester they intend to graduate.

Students in the College of Science may not register for more than three semester hours of credit during Intersession without approval of the dean.

Minor Field Requirements (Optional)

A student in the College of Science may earn a minor in a second field under the following conditions:

- The minor must include at least 15 semester hours of course work, of which at least six semester hours must be taken on this campus and at least three of the six hours must be at the 3000- or 4000-level.
- Each course used in the minor must be passed with a grade of "C" or better.
- Courses used for the minor may not be taken on a pass/fail basis.
- All minors must be approved by the dean.

The department offering the minor may impose additional requirements; the specific requirements of the department must be stated in the catalog.

Students in other colleges who wish to obtain a minor in one of the departments of the College of Science must meet the same requirements listed above.

Teacher Preparation Program for Grades 6-12

The departments of Biological Sciences, Chemistry, Mathematics, and Physics & Astronomy offer undergraduate degree programs with an area of concentration in secondary education (middle school and high school). Students in the program may receive a BS in biological sciences, chemistry, mathematics, or physics and qualify for teacher certification. The curricula have been developed cooperatively with faculty in the College of Human Sciences and Education and include courses taught jointly by faculty in the College of Science and the College of Human Sciences and Education. Students completing these degree programs and meeting any additional requirements of the Louisiana Department of Education will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

The following requirements pertain to students enrolled in the secondary education concentration:

Admissions Requirements:

- Minimum cumulative and LSU grade point average of 2.50
- Passing scores on all parts of the Praxis I Series or minimum ACT composite score of 22 or minimum SAT composite score of 1030

Retention Requirements:

- Minimum cumulative and LSU grade point average of 2.50 for entry into and continuation in upper-level (3000/4000-level) education courses, including student teaching

Degree Requirements:

- Satisfactory completion of an approved program of study as determined by all of the following: faculty of the college in which the major/concentration resides, the university, and the Louisiana Board of Elementary and Secondary Education
- Minimum cumulative and LSU GPA of 2.50 on all work completed
- Passing scores on all required parts of the Praxis II Series
- Grade of "C" or higher in course work as specified by the Louisiana Board of Elementary and Secondary Education

Application for Student Teaching:

Application for student teaching must be made to the College of Human Sciences and Education Office of Student Services no later than three weeks after classes begin in the semester prior to student teaching. Late applications cannot be guaranteed consideration.

A second option for students interested in middle/high school science teaching is to pursue a traditional bachelor's degree in science and then complete a master's degree in the LSU College of Human Sciences and Education. The master's degree program (Holmes Program) begins in June and requires 12 consecutive months of course work and classroom experience leading to both the master's degree and teaching certification. Information about the program and potential scholarship assistance is available through the College of Human Sciences and Education, Office of Student Services.

Department of Biological Sciences

OFFICE	202 Life Sciences Building

FAX	225-578-2597
WEBSITE	www.biology.lsu.edu

For information regarding the GRADUATE PROGRAM, [click here](#).

The Department of Biological Sciences offers a comprehensive background in biology for teacher preparation, graduate studies, and for professional programs in medicine, dentistry, pharmacy, and veterinary medicine. The department offers Bachelor of Science degrees in biochemistry, biological sciences, and microbiology. All degrees require a core of departmental courses that include BIOL 1201, BIOL 1202, BIOL 1208, BIOL 1209, BIOL 2051, BIOL 2153, BIOL 3040, and either BIOL 4087 or BIOL 4093 and BIOL 4094. In addition, all students are required to take 17-22 hours of electives from courses numbered 3000 and above in biological sciences that include two courses with laboratories and at least one course from three of four departmental

groupings (described in the recommended path). Students seeking the Bachelor of Science degree in biological sciences may fulfill the requirement for 17 hours of electives with courses from all areas of the department while students seeking the biochemistry and microbiology degrees take courses specific to those degrees. All students in the department may earn a maximum of six hours of BIOL 3999. A maximum of three hours of BIOL 3999 may be taken as advanced biochemistry, biological sciences, or microbiology electives. BIOL 3999 may not be used as a laboratory course. Students may earn more than one degree or one degree with multiple majors in the department but biological science courses numbered 3000 and above (excluding BIOL 3040 and BIOL 4087 or BIOL 4093 and BIOL 4094) may only be applied to one degree or major within the Department of Biological Sciences. This policy also applies to transfer students who enter with a degree earned in one of the Department of Biological Sciences majors. Majors in the department are ineligible for the departmental minor.

Admission into the Department of Biological Sciences

In addition to admission to the College of Science, entry into any of the three majors (biochemistry, biological sciences, and microbiology) in the Department of Biological Sciences requires earned credit in BIOL 1201 and BIOL 1202; CHEM 1201; and MATH 1550.

Major

Biochemistry, B.S.

Biochemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261 and MATH 1552; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: “C” or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)

- MATH 1552 Analytic Geometry and Calculus II (4) or
- MATH 1554 Calculus II for Life Sciences (4)

- General Education course - Arts (3)

Total Semester Hours: 16

Semester 3

CRITICAL: “C” or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2051 General Microbiology (4) or
- BIOL 2153 Principles of Genetics (4)

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2261 Organic Chemistry (3)
- PHYS 2001 General Physics I (3)
- PHYS 2108 Introductory Physics Laboratory (1)

Total Semester Hours: 14

Semester 4

CRITICAL: “C” or better in CHEM 2261 and MATH 1552; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2153 Principles of Genetics (4) or
- BIOL 2051 General Microbiology (4)

- ENGL 2000 English Composition (3)
- CHEM 2262 Organic Chemistry (3)
- CHEM 2364 Organic Chemistry Laboratory (2)
- PHYS 2002 General Physics II (3)
- PHYS 2109 General Physics Laboratory (1)

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 4093 General Biochemistry I (3)²
- BIOL 3040 Evolution (3)
- Approved Biochemistry Elective (3)³
- First Course in Foreign Language Sequence (4)¹
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 16

Semester 6

- BIOL 4094 General Biochemistry II (3)²
- BIOL 4001 Physical Chemistry (3)
- Second Course in Foreign Language Sequence (4)¹
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 13

Semester 7

- BIOL 4385 Biochemistry Laboratory (3)
- Approved Biochemistry Electives (6)³
- General Education course - Social Sciences (3)
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 15

Semester 8

- Approved Biochemistry Elective (3)³
- Approved Electives (12)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - OPTION: Complete foreign language requirement (shown in semesters 5 and 6) in semesters 2 and 3 if continuing in the language studied in high school.

² - Class is offered in FALL or SPRING only. Check schedule book.

³ - Approved biochemistry electives must come from the following list, must include at least one laboratory course, and must include at least one course from Group 1 and at least two courses from Group 2. Courses from any of the groups can be used for the remainder of the 12-hour requirements:

Group 1:

- BIOL 4596 Biophysics of Macromolecules (3)
- CHEM 4150 Environmental Chemistry (3)
- ENVS 4101 Environmental Chemistry (3)
- CHEM 4160 Industrial Organic Chemistry (3)
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4561 Intermediate Physical-Organic Chemistry (3)
- CHEM 4562 Intermediate Organic Chemistry (3)

- CHEM 4563 Problems in Organic Structure Elucidation (3)
- CHEM 4564 Advanced Organic and Inorganic Laboratory (3)
- CHEM 4570 Advanced General Inorganic Chemistry (3)

Group 2:

- BIOL 3060 Introductory Plant Physiology (4)
- PLHL 3060 Introductory Plant Physiology (4)
- BIOL 3090 Cell Biology (3)
- BIOL 3156 Developmental Zoology (4)
- BIOL 4097 Biochemistry of Aging (3)
- BIOL 4110 Introductory Microbial Physiology (3)
- BIOL 4132 Eukaryotic Molecular Genetics (3)
- BIOL 4158 Endocrinology (3)
- BIOL 4160 Vertebrate Physiology (3)
- BIOL 4165 Environmental Adaptations (3)
- BIOL 4177 Neurobiology (3)
- BIOL 4246 Microbial Genetics (3)
- BIOL 4400 Molecular Genetics Laboratory (3)
- BIOL 4450 Cell Biology of the Nucleus (3)
- BIOL 4753 Human Molecular Genetics (3)

Group 3:

BIOL 3999 can also be taken as a biochemistry elective but does not count as a laboratory course.

- BIOL 4002 Insect Biology (3)
- ENTM 4002 Insect Biology (3)
- BIOL 4015 Conservation Biology (4)
- ENTM 4015 Conservation Biology (4)
- BIOL 4084 Geomicrobiology (3)
- GEOL 4084 Geomicrobiology (3)

- BIOL 4090 Marine and Environmental Microbiology (3)
- OCS 4090 Marine and Environmental Microbiology (3)
- BIOL 4115 Microbial Ecology (3)
- BIOL 4253 Principles of Ecology (3)
- BIOL 4256 Microbial Ecology and Nutrient Cycling in Soils (4)
- AGRO 4056 Microbial Ecology and Nutrient Cycling in Soils (4)
- EMS 4056 Microbial Ecology and Nutrient Cycling in Soils (4)
- BIOL 4262 Marine Communities (3)
- BIOL 4299 Genetics of the Evolutionary Process (4)
- BIOL 4308 Plants in Coastal Environments (3)
- OCS 4308 Plants in Coastal Environments (3)
- BIOL 4600 Topics in Marine Zoology (2-6)
- RNR 4600 Topics in Marine Zoology (2-6)
- BIOL 4020 Taxonomy and Ecology of Wetland Plants (4)
- RNR 4020 Taxonomy and Ecology of Wetland Plants (4)
- BIOL 4041 Plant Taxonomy (4)
- BIOL 4054 Introductory Mycology (4)
- PLHL 4054 Introductory Mycology (4)
- BIOL 4105 Parasitology (3)
- BIOL 4125 Prokaryotic Diversity (3)
- BIOL 4126 Methods in Microbial Diversity (4)
- BIOL 4141 Mammalogy (4)
- BIOL 4142 Ornithology (4)
- BIOL 4145 Ichthyology (4)
- RNR 4145 Ichthyology (4)
- BIOL 4146 Herpetology (4)
- BIOL 4154 Invertebrate Zoology (4)
- BIOL 4162 Food Microbiology (4)
- FDSC 4162 Food Microbiology (4)

- BIOL 4163 Industrial Microbiology (4)
- FDSC 4163 Industrial Microbiology (4)

Biological Sciences, B.S.

Biological Sciences

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)

- MATH 1552 Analytic Geometry and Calculus II (4) or
- MATH 1554 Calculus II for Life Sciences (4) or
- EXST 2201 Introduction to Statistical Analysis (4)

- General Education course - Arts (3)

Total Semester Hours: 16

Semester 3

CRITICAL: “C” or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2051 General Microbiology (4) or
- BIOL 2153 Principles of Genetics (4)
- CHEM 2261 Organic Chemistry (3)
- First Course in Foreign Language Sequence (4)¹
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 14

Semester 4

CRITICAL: “C” or better in CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2153 Principles of Genetics (4) or
- BIOL 2051 General Microbiology (4)
- ENGL 2000 English Composition (3)
- CHEM 2262 Organic Chemistry (3)
- CHEM 2364 Organic Chemistry Laboratory (2)
- Second Course in Foreign Language Sequence (4)¹

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 4087 Basic Biochemistry (4) or
- BIOL 4093 General Biochemistry I (3) and
- BIOL 4094 General Biochemistry II (3)

- PHYS 2001 General Physics I (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- BIOL 3040 Evolution (3)
- Approved Elective (3-1)

Total Semester Hours: 14

Semester 6

- PHYS 2002 General Physics II (3)
- PHYS 2109 General Physics Laboratory (1)
- General Education course - Social Sciences (3)
- Approved Biological Sciences Electives (6)²
- Approved Elective (3)

Total Semester Hours: 16

Semester 7

- General Education course - Social Sciences (2000-level) (3)
- Approved Biological Sciences Electives (6)²
- Approved Electives (5)

Total Semester Hours: 14

Semester 8

- General Education course - Humanities (English/Honors 2000-level) (3)
- Approved Biological Sciences Electives (5)²
- Approved Electives (7)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - OPTION: Begin foreign language requirement (shown in semesters 3 and 4) in Semester 2 if continuing in the language studied in high school.

- Approved biological sciences electives (17 hours required) are BIOL courses numbered 3000 and higher and must include two courses with laboratories (excluding independent research BIOL 3999). Further, biological sciences electives must include at least one course from three of the following areas:

1) molecular and cellular biology:

- BIOL 3090 Cell Biology (3)
- BIOL 3116 Microbiology Laboratory (3)
- BIOL 4001 Physical Chemistry (3)
- BIOL 4097 Biochemistry of Aging (3)
- BIOL 4104 Histology (4)
- BIOL 4123 Immunology (3)
- BIOL 4124 Microbial Pathogens (3)
- BIOL 4132 Eukaryotic Molecular Genetics (3)
- BIOL 4165 Environmental Adaptations (3)
- BIOL 4177 Neurobiology (3)
- BIOL 4190 Introductory Virology (3)
- BIOL 4215 Molecular Biology of Bacterial Disease (3)
- BIOL 4246 Microbial Genetics (3)
- BIOL 4385 Biochemistry Laboratory (3)

- BIOL 4400 Molecular Genetics Laboratory (3)
- BIOL 4450 Cell Biology of the Nucleus (3)
- BIOL 4596 Biophysics of Macromolecules (3)
- BIOL 4753 Human Molecular Genetics (3)

2) physiology, anatomy, and development:

- BIOL 3060 Introductory Plant Physiology (4) or
- PLHL 3060 Introductory Plant Physiology (4)

- BIOL 3152 Comparative Anatomy of the Vertebrates (4)
- BIOL 3156 Developmental Zoology (4)
- BIOL 4110 Introductory Microbial Physiology (3)
- BIOL 4155 Environmental Physiology (3)
- BIOL 4158 Endocrinology (3)
- BIOL 4160 Vertebrate Physiology (3)
- BIOL 4165 Environmental Adaptations (3)
- BIOL 4170 Comparative Animal Physiology (3)
- BIOL 4200 Microbial Morphogenesis (3)

- BIOL 4444 Seed Physiology (3) or
- PLHL 4444 Seed Physiology (3)

3) ecology and evolution:

- BIOL 4015 Conservation Biology (4) or
- ENTM 4015 Conservation Biology (4)

- BIOL 4084 Geomicrobiology (3) or
- GEOL 4084 Geomicrobiology (3)

- BIOL 4090 Marine and Environmental Microbiology (3) or
 - OCS 4090 Marine and Environmental Microbiology (3)

 - BIOL 4115 Microbial Ecology (3)
 - BIOL 4253 Principles of Ecology (3)

 - BIOL 4256 Microbial Ecology and Nutrient Cycling in Soils (4) or
 - AGRO 4056 Microbial Ecology and Nutrient Cycling in Soils (4) or
 - EMS 4056 Microbial Ecology and Nutrient Cycling in Soils (4)

 - BIOL 4262 Marine Communities (3)
 - BIOL 4299 Genetics of the Evolutionary Process (4)

 - BIOL 4308 Plants in Coastal Environments (3) or
 - OCS 4308 Plants in Coastal Environments (3)

 - BIOL 4600 Topics in Marine Zoology (2-6) or
 - RNR 4600 Topics in Marine Zoology (2-6)
- 4) organismal diversity:
- BIOL 4002 Insect Biology (3) or
 - ENTM 4002 Insect Biology (3)

 - BIOL 4020 Taxonomy and Ecology of Wetland Plants (4) or
 - RNR 4020 Taxonomy and Ecology of Wetland Plants (4)

 - BIOL 4041 Plant Taxonomy (4)

 - BIOL 4054 Introductory Mycology (4) or

- PLHL 4054 Introductory Mycology (4)

- BIOL 4084 Geomicrobiology (3) or
- GEOL 4084 Geomicrobiology (3)

- BIOL 4105 Parasitology (3)
- BIOL 4125 Prokaryotic Diversity (3)
- BIOL 4126 Methods in Microbial Diversity (4)
- BIOL 4141 Mammalogy (4)
- BIOL 4142 Ornithology (4)

- BIOL 4145 Ichthyology (4) or
- RNR 4145 Ichthyology (4)

- BIOL 4146 Herpetology (4)
- BIOL 4154 Invertebrate Zoology (4)

- BIOL 4162 Food Microbiology (4) or
- FDSC 4162 Food Microbiology (4)

- BIOL 4163 Industrial Microbiology (4) or
- FDSC 4163 Industrial Microbiology (4)

- BIOL 4600 Topics in Marine Zoology (2-6) or
- RNR 4600 Topics in Marine Zoology (2-6)

Areas of Concentration

Marine Biology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- OCS 1005 Introduction to Oceanography (3)

- MATH 1552 Analytic Geometry and Calculus II (4) or
- MATH 1554 Calculus II for Life Sciences (4) or
- EXST 2201 Introduction to Statistical Analysis (4)

Total Semester Hours: 16

Semester 3

CRITICAL: “C” or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2051 General Microbiology (4) or
- BIOL 2153 Principles of Genetics (4)

- CHEM 2261 Organic Chemistry (3)
- First Course in Foreign Language Sequence (4)¹
- General Education courses - Humanities (English/Honors at the 2000-level) (3)

Total Semester Hours: 14

Semester 4

CRITICAL: “C” or better in CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2153 Principles of Genetics (4) or
- BIOL 2051 General Microbiology (4)

- ENGL 2000 English Composition (3)
- CHEM 2262 Organic Chemistry (3)
- CHEM 2364 Organic Chemistry Laboratory (2)
- Second Course in Foreign Language Sequence (4)¹

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in BIOL 2051 or BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 4087 Basic Biochemistry (4) or
- BIOL 4093 General Biochemistry I (3) and
- BIOL 4094 General Biochemistry II (3)

- PHYS 2001 General Physics I (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- BIOL 3040 Evolution (3)
- Approved Elective (5-3)

Total Semester Hours: 16

Semester 6

- PHYS 2002 General Physics II (3)
- PHYS 2109 General Physics Laboratory (1)
- General Education course - Social Sciences (3)
- Approved Biological Sciences Electives (6)³
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 7

- BIOL 4262 Marine Communities (3)

- BIOL 4090 Marine and Environmental Microbiology (3) or
- BIOL 4145 Ichthyology (4) or
- BIOL 4154 Invertebrate Zoology (4)

- Approved Area of Concentration Elective (3)²
- Approved Elective (3-4)
- General Education Course - Social Sciences (2000-level) (3)

Total Semester Hours: 16

Semester 8

- General Education course - Humanities (English/Honors 2000-level) (3)
- Approved Area of Concentration Electives (3-2)²
- Approved Electives (5-6)

Total Semester Hours: 11

120 Total Sem. Hrs.

¹ - Option: Complete foreign language requirement (shown in Semester 3 and 4) in Semesters 1 and 2 if continuing in the language studied in high school.

² - Choose five to six hours from the following: BIOL 3999, BIOL 4020, BIOL 4090, BIOL 4145, BIOL 4154, BIOL 4155, BIOL 4253, BIOL 4254, BIOL 4263, BIOL 4308, BIOL 4600.

³ - See list and requirements for biological sciences electives here.

Secondary Education - Biological Sciences

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in BIOL 1201 and MATH 1550; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

SEMESTER 3: "C" or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

SEMESTER 5: "C" or better in BIOL 2051 or BIOL 2153; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

This concentration is part of the Geaux Teach–Math and Sciences Program. Students will obtain a degree in biological sciences and, upon completing this concentration, and meeting any additional requirements of the Louisiana Department of Education, will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)

- BIOL 1208 Biology Laboratory for Science Majors I (1)
- CHEM 1201 General Chemistry I (3)
- BASC 2010 Inquiry Approaches to Math and Science Teaching (1)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 16

Semester 2

CRITICAL: “C” or better in BIOL 1201 and MATH 1550; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- BASC 2011 Inquiry-Based Math and Science Lesson Design (1)
- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- MATH 1552 Analytic Geometry and Calculus II (4) or
- MATH 1554 Calculus II for Life Sciences (4) or
- EXST 2201 Introduction to Statistical Analysis (4)
- General Education course - Arts (3)

Total Semester Hours: 17

Semester 3

CRITICAL: “C” or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- BIOL 2051 General Microbiology (4) or

- BIOL 2153 Principles of Genetics (4)
- CHEM 2261 Organic Chemistry (3)
- EDCI 2500 Knowing and Learning in Mathematics and Science (3)
- First Course in Foreign Language Sequence (4)¹
- General Education course - Humanities (English/Honors at the 2000-level) (3)

Total Semester Hours: 17

Semester 4

CRITICAL: “C” or better in CHEM 2261; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- BIOL 2153 Principles of Genetics (4) or
- BIOL 2051 General Microbiology (4)
- EDCI 3550 Classroom Interactions (3)
- CHEM 2262 Organic Chemistry (3)
- CHEM 2364 Organic Chemistry Laboratory (2)
- Second Course in Foreign Language Sequence (4)¹

Total Semester Hours: 16

Semester 5

CRITICAL: “C” or better in BIOL 2051 or BIOL 2153; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- PHIL 2786 Logic, Science and Society (3)
- PHYS 2001 General Physics I (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- ENGL 2000 English Composition (3)

- BIOL 3040 Evolution (3)
- Approved Biological Sciences Electives (4)²

Total Semester Hours: 17

Semester 6

- BIOL 4087 Basic Biochemistry (4) or
- BIOL 4093 General Biochemistry I (3) and
- BIOL 4094 General Biochemistry II (3)

- BIOL 4003 Science Teaching in Secondary School III: Instructional Strategies in the Sciences (1)
- BIOL 4005 Science Research Methods (3)
- PHYS 2002 General Physics II (3)
- PHYS 2109 General Physics Laboratory (1)
- Approved Biological Sciences Elective (3-1)²

Total Semester Hours: 15

Semester 7

- EDCI 4500 Instructional Models for Mathematics and Science (3)
- Approved Biological Sciences Electives (7)²
- General Education course - Social Sciences (3)
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 16

Semester 8

- EDCI 3136 Reading in the Content Areas (3)
- EDCI 4006 Student Teaching in Grades 6-12 Mathematics and Sciences (9)

Total Semester Hours: 12

126 Total Sem. Hrs.

¹ - Option: Begin foreign language requirement (shown in Semesters 3 and 4) in Semester 1 and 2 if continuing in the language studied in high school.

² - See list and requirements for Biological Science electives here.

NOTE:

Students must see an advisor in their sophomore year.

EDCI 2500 will count as one of the general education social science courses. Students should plan their course work so that last semester of the senior year can accommodate the 12 hours that are required to be taken concurrently (EDCI 4006 and EDCI 3136).

This concentration requires a total of 126 hours for the degree.

Microbiology, B.S.

Microbiology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in BIOL 2051; CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: “C” or better in BIOL 1201 and MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)

- MATH 1552 Analytic Geometry and Calculus II (4) or
- MATH 1554 Calculus II for Life Sciences (4) or
- EXST 2201 Introduction to Statistical Analysis (4)

- General Education course - Arts (3)

Total Semester Hours: 16

Semester 3

CRITICAL: “C” or better in BIOL 1202 and CHEM 1202; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2051 General Microbiology (4) or
- BIOL 2153 Principles of Genetics (4)

- CHEM 2261 Organic Chemistry (3)
- General Education course - Humanities (English/Honors 2000-level) (3)
- First Course in Foreign Language Sequence (4)¹

Total Semester Hours: 14

Semester 4

CRITICAL: “C” or better in BIOL 2051; CHEM 2261; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2153 Principles of Genetics (4) or
- BIOL 2051 General Microbiology (4)

- CHEM 2262 Organic Chemistry (3)
- ENGL 2000 English Composition (3)
- Second Course in Foreign Language Sequence (4)¹
- Approved Elective (2)

Total Semester Hours: 16

Semester 5

CRITICAL: “C” or better in BIOL 2153; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 3116 Microbiology Laboratory (3)
- CHEM 2364 Organic Chemistry Laboratory (2)
- PHYS 2001 General Physics I (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- General Education course - Social Sciences (3)
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 15

Semester 6

- BIOL 4110 Introductory Microbial Physiology (3)
- BIOL 3040 Evolution (3)

- PHYS 2002 General Physics II (3)
- PHYS 2109 General Physics Laboratory (1)
- Approved Microbiology Elective (3)³
- Approved Elective (3)

Total Semester Hours: 16

Semester 7

- BIOL 4087 Basic Biochemistry (4)²
- BIOL 4246 Microbial Genetics (3)
- Approved Microbiology Electives (4)³
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 14

Semester 8

- BIOL 4115 Microbial Ecology (3) or
- BIOL 4125 Prokaryotic Diversity (3)
- Approved Microbiology Elective (3)³
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - OPTION: Begin foreign language requirement (shown in Semesters 3 and 4) in Semester 2 if continuing in the language studied in high school.

² - Option: BIOL 4087 or BIOL 4093 and BIOL 4094. If student takes BIOL 4093 and BIOL 4094, two hours will apply toward the approved free electives.

³ - APPROVED MICROBIOLOGY ELECTIVES must come from the following list and include two laboratory courses:

- BIOL 3090 Cell Biology (3)

- BIOL 3999 Undergraduate Research in Biological Sciences (1-3)

- BIOL 4054 Introductory Mycology (4) or

- PLHL 4054 Introductory Mycology (4)

- BIOL 4084 Geomicrobiology (3) or

- GEOL 4084 Geomicrobiology (3)

- BIOL 4090 Marine and Environmental Microbiology (3) or

- OCS 4090 Marine and Environmental Microbiology (3)

- BIOL 4105 Parasitology (3)

- BIOL 4106 Parasitology Laboratory (1)

- BIOL 4115 Microbial Ecology (3)

- BIOL 4123 Immunology (3)

- BIOL 4124 Microbial Pathogens (3)

- BIOL 4125 Prokaryotic Diversity (3)

- BIOL 4126 Methods in Microbial Diversity (4)

- BIOL 4132 Eukaryotic Molecular Genetics (3)

- BIOL 4162 Food Microbiology (4) or

- FDSC 4162 Food Microbiology (4)

- BIOL 4163 Industrial Microbiology (4) or

- FDSC 4163 Industrial Microbiology (4)

- BIOL 4190 Introductory Virology (3)

- BIOL 4200 Microbial Morphogenesis (3)

- BIOL 4215 Molecular Biology of Bacterial Disease (3)

- BIOL 4400 Molecular Genetics Laboratory (3)

Minor

Biological Sciences Minor

An undergraduate *minor in biological sciences* is available to students majoring in curricula outside the Department of Biological Sciences. Required courses are BIOL 1201, BIOL 1202, BIOL 1208, BIOL 1209, BIOL 2051, BIOL 2153, BIOL 3040, BIOL 4087, and at least three more hours of biological sciences in a course at the 3000 level (excluding BIOL 3999, BIOL 4003, BIOL 4005) or above (total of 26 hours).

For information regarding the GRADUATE PROGRAM, [click here](#).

Students obtain a thorough working knowledge of the fundamentals of chemistry, supplemented by study in physics, mathematics, and other sciences. The curriculum is further enriched by the requirement of a broad basic background in the social sciences and humanities. The department offers special lecture and laboratory courses for its majors.

Chemistry majors must select one of nine areas of concentration, preferably in their sophomore year. The different concentrations can be grouped according to whether or not they prepare the student for an *active career in chemistry* or for *another profession*, such as medicine, dentistry, or veterinary medicine.

Active Careers in Chemistry • These concentrations are recommended for students who seek a professional career in chemistry or plan to pursue graduate studies in chemistry or a closely related field. The areas of concentration listed in this section are certified by the American Chemical Society. Students successfully completing those concentrations will receive a certificate upon graduation. The *biological chemistry* concentration strengthens the student's knowledge of the chemistry and structure of living systems. The *chemical physics* concentration emphasizes understanding chemical systems based on fundamental physical, mathematical, and theoretical principles. The *chemistry* concentration provides a broad background in chemistry. It is recommended to students who desire a career in chemistry but do not yet know which branch of chemistry best suits them. The *environmental chemistry* concentration is recommended for preparation as a chemical professional or for entrance to graduate study in chemistry, but with an environmental emphasis. The *materials* concentration makes the connection between chemistry and a wide range of practical materials used to fabricate electronic, optical, and other devices. The polymer concentration is designed for students with career objectives in the science of synthetic or biological macromolecules, including plastics.

The *secondary education* concentration leads to certification as a chemistry teacher in grades seven through 12.

Chemistry for Other Professions • The *pre-professional* concentration is designed primarily for students who will apply for graduate education in another profession, such as medicine, dentistry, or veterinary medicine. The *chemistry and a second discipline* concentration allows students to develop their interests and abilities in other disciplines outside of chemistry, whether or not graduate education is contemplated. Students may choose second disciplines such as computer science, geology, engineering, business administration, history, foreign languages, political science, and others.

Major

Chemistry, B.S.

Areas of Concentration

Biological Chemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- MATH 1552 Analytic Geometry and Calculus II (4)
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 3

CRITICAL: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)
- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)
- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)
- Approved Elective (3)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 3491 Physical Chemistry I (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)
- BIOL 2051 General Microbiology (4) or
- BIOL 2153 Principles of Genetics (4)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 14

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- CHEM 4564 Advanced Organic and Inorganic Laboratory (3)
- General Education course- Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 15-16

Semester 7

- BIOL 4093 General Biochemistry I (3)
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- BIOL 3999 Undergraduate Research in Biological Sciences (1-3) or
- CHEM 3900 Chemical Problems (1-3)²
- General Education course - Humanities (ENGL/HNRS 2000-level) (3)

Total Semester Hours: 13

Semester 8

- BIOL 4094 General Biochemistry II (3)
- BIOL 4385 Biochemistry Laboratory (3)
- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- Approved Electives (4-3)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 15-14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - CHEM 3900 in an approved biological chemistry project or BIOL 3999 including a comprehensive written report filed with the Department of Chemistry's Undergraduate Office.

***The biological chemistry, pre-professional, and secondary education concentrations also require BIOL 1208 and BIOL 1209 laboratories.*

Chemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Recommended for preparation as a chemical professional or for entrance to graduate study in chemistry. Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)
- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: “C” or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

- Computer Science Programming Course (3)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2083 The Elements of Biochemistry (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)
- CHEM 3491 Physical Chemistry I (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- Approved Electives (4-3)

Total Semester Hours: 13

Semester 7

- CHEM 3900 Chemical Problems (1-3) ²
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- General Education course - Social Sciences (3)¹
- Chemistry Elective (3)³

Total Semester Hours: 13

Semester 8

- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- CHEM 4564 Advanced Organic and Inorganic Laboratory (3)
- CHEM 4571 Organometallic Chemistry (3)
- Chemistry Elective (3)³
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Two semester hours of CHEM 3900 in an approved chemistry project.

³ - CHEMISTRY ELECTIVES: CHEM 3900 (additional hours), CHEM 4010, CHEM 4011, CHEM 4150, CHEM 4160, CHEM 4556, CHEM 4557, CHEM 4558, CHEM 4559, CHEM 4561, CHEM 4562, CHEM 4563, CHEM 4571, CHEM 4581, CHEM

4594, CHEM 4597.

Chemical Physics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

- MATH 2065 Elementary Differential Equations (3) or
- MATH 2085 Linear Algebra (3) or
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)

Total Semester Hours: 15-16

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 3491 Physical Chemistry I (3)
- Computer Science Programming Course (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/Honors 2000-level) (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

Total Semester Hours: 16

Semester 6

- CHEM 3492 Physical Chemistry II (3)

- CHEM 3493 Physical Chemistry Laboratory (3)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- Physics Elective (3)⁴

Total Semester Hours: 12-13

Semester 7

- CHEM 3900 Chemical Problems (1-3)²
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- Physics Elective (3)⁴
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14

Semester 8

- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- BIOL 2083 The Elements of Biochemistry (3)
- Chemistry Elective (3)³
- Approved Electives (3-1)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14-12

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Three semester hours of CHEM 3900 in an approved physical chemistry project.

³ - Chemistry Electives: CHEM 4581, CHEM 4594, CHEM 4596, CHEM 4597.

⁴ - Physics Electives: PHYS 2221, PHYS 2231, PHYS 2411, PHYS 4123, PHYS 4125, PHYS 4141, PHYS 4142, PHYS 4261.

Chemistry & Second Discipline

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or

- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

- Second Discipline Course (3)²

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 3491 Physical Chemistry I (3)
- Second Discipline Course (3)²
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/honors 2000-level) (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

Total Semester Hours: 16

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- Approved Elective (4-3)

Total Semester Hours: 13

Semester 7

- CHEM 3900 Chemical Problems (1-3) ³
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- Second Discipline Course (3)²
- General Education course - Social Sciences (3)¹

Total Semester Hours: 13

Semester 8

- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- Second Discipline Courses (6)²
- Approved Electives (3)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Second discipline courses: Courses should form a coherent sequence in one department with at least three courses numbered 3000 or above. If courses are from more than one department, student must obtain a minor in that discipline. Selection of the concentration courses should be completed and approved by the department and dean's office by the end of the sophomore year.

³ - Two semester hours of CHEM 3900 in an approved chemistry project.

Environmental Chemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: “C” or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: “C” or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

- Computer Science Programming Course (3)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 2083 The Elements of Biochemistry (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)
- CHEM 3491 Physical Chemistry I (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- CHEM 4150 Environmental Chemistry (3)
- General Education course - Humanities or Second Course in Foreign Language Sequence (3-4)

Total Semester Hours: 12-13

Semester 7

- CHEM 3900 Chemical Problems (1-3)³
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- General Education course - Social Sciences (3)¹

- Environmental Elective (3)²

Total Semester Hours: 13

Semester 8

- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- Environmental Elective (3)²
- Approved Electives (7-6)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 15-14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Environmental Electives: EVEG 3145; ENVS 4500, ENVS 4477; GEOL 4043, GEOL 4081; OCS 4165.

³ - Two semester hours in CHEM 3900 in an approved environmental chemistry project.

Materials

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: “C” or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: “C” or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)

- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)
- ME 2733 Materials of Engineering (3)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 3491 Physical Chemistry I (3)
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/honors 2000-level) (3)
- Computer Science Programming Course (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

Total Semester Hours: 16

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- ME 3701 Materials of Engineering Laboratory (1)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- Approved Elective (3-2)

Total Semester Hours: 13

Semester 7

- CHEM 3900 Chemical Problems (1-3) ²
- CHEM 4010 Macromolecular Systems I (3)
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 13

Semester 8

- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)

- CHEM 4564 Advanced Organic and Inorganic Laboratory (3)
- ME 4723 Advanced Materials Analysis (3)
- BIOL 2083 The Elements of Biochemistry (3)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Two semester hours of CHEM 3900 in an approved materials chemistry research project.

Polymers

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Students completing this concentration will receive American Chemical Society certification.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)
- General Education course - Arts (3)

Total Semester Hours: 17

Semester 2

CRITICAL: “C” or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or
- CHEM 1422 HONORS: General Chemistry (3)

- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 3

CRITICAL: “C” or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- Approved Electives (3)
- General Education course - Social Sciences (3)¹

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - One General Education Social Science course must be at least 2000-level.

² - Two semester hours of CHEM 3900 in an approved materials chemistry research project.

Pre-Professional Chemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- MATH 1552 Analytic Geometry and Calculus II (4)

- CHEM 1202 General Chemistry (3) or

- CHEM 1422 HONORS: General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2) or
- CHEM 1431 HONORS: General Chemistry Laboratory (2)
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 3

CRITICAL: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2001 Analytical Chemistry (3)
- CHEM 2002 Analytical Chemistry Laboratory (1)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2110 Particle Mechanics (3)
- PHYS 2108 Introductory Physics Laboratory (1)
- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)
- Approved Elective (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)

- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)

- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

- Approved Elective (3)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 3491 Physical Chemistry I (3)
- Pre-Professional Electives (4)¹
- First Course in Foreign Language Sequence (4)
- General Education course - Humanities (English/honors 2000-level) (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)

Total Semester Hours: 17

Semester 6

- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)
- Pre-Professional Electives (4)¹

Total Semester Hours: 13-14

Semester 7

- BIOL 4093 General Biochemistry I (3)
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- General Education course - Social Sciences (3)²
- Approved Elective (3)

Total Semester Hours: 14

Semester 8

- BIOL 4094 General Biochemistry II (3)
- BIOL 4385 Biochemistry Laboratory (3)
- CHEM 4553 Instrumental Characterization of Organic Compounds Lab (2)
- Approved Electives (2-1)
- General Education course - Social Sciences (3)²

Total Semester Hours: 13-12

120 Total Sem. Hrs.

¹ - Preprofessional Electives: BIOL 2051, BIOL 2153, BIOL 3156, BIOL 3152 or BIOL 4160; two semester hours of CHEM 3900 or BIOL 3999 in an approved project.

² - One General Education Social Science course must be at least 2000-level.

***The biological chemistry, pre-professional, and secondary education concentrations also require BIOL 1208 and BIOL 1209 laboratories.*

Secondary Education - Chemistry

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Semester GPA; 2.0 Cumulative and LSU GPA.

SEMESTER 2: "C" or better in MATH 1550/MATH 1551; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in CHEM 1212/CHEM 1431 and MATH 1552; Admission to the College; 2.0 Semester GPA; 2.5

Cumulative and LSU GPA.

SEMESTER 4: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

SEMESTER 5: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

This concentration is part of the Geaux Teach–Math and Sciences Program. Students will obtain a degree in chemistry and, upon completing this concentration and meeting any additional requirements of the Louisiana Department of Education, will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and CHEM 1201/CHEM 1421; 2.0 Semester GPA; 2.0 Cumulative and LSU GPA.

- BIOL 1201 Biology for Science Majors I (3)
- BIOL 1208 Biology Laboratory for Science Majors I (1)
- ENGL 1001 English Composition (3)
- BASC 2010 Inquiry Approaches to Math and Science Teaching (1)
- MATH 1550 Analytic Geometry and Calculus I (5)

- CHEM 1201 General Chemistry I (3) or
- CHEM 1421 HONORS: General Chemistry (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1550/MATH 1551; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

- BIOL 1202 Biology for Science Majors II (3)
- BIOL 1209 Biology Laboratory for Science Majors II (1)
- MATH 1552 Analytic Geometry and Calculus II (4)

- EDCI 2500 Knowing and Learning in Mathematics and Science (3)

- CHEM 2261 Organic Chemistry (3) or
- CHEM 2461 HONORS: Organic Chemistry I (3)

Total Semester Hours: 17

Semester 4

CRITICAL: "C" or better in CHEM 2261/CHEM 2461 and PHYS 2110; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

- ENGL 2000 English Composition (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3)
- PHYS 2109 General Physics Laboratory (1)

- EDCI 3550 Classroom Interactions (3)
- CHEM 2262 Organic Chemistry (3) or
- CHEM 2462 HONORS: Organic Chemistry II (3)
- CHEM 2364 Organic Chemistry Laboratory (2) or
- CHEM 2463 HONORS: Organic Chemistry Laboratory (2)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in CHEM 2262/CHEM 2462 and PHYS 2113; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

- BIOL 2083 The Elements of Biochemistry (3)
- CHEM 3491 Physical Chemistry I (3)
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3)
- First course in foreign language sequence (4)
- General Education course - Humanities (ENGL/HNRS 2000-level) (3)

Total Semester Hours: 16

Semester 6

- CHEM 4005 Science Research Methods (3)
- PHIL 2786 Logic, Science and Society (3)
- CHEM 3492 Physical Chemistry II (3)
- CHEM 3493 Physical Chemistry Laboratory (3)
- General Education course - Humanities (English) or Second Course in Foreign Language Sequence (3-4)

Total Semester Hours: 15-16

Semester 7

- CHEM 4003 Science Teaching in Secondary School III: Instructional Strategies in Science (1)
- EDCI 4500 Instructional Models for Mathematics and Science (3)
- CHEM 4570 Advanced General Inorganic Chemistry (3)
- General Education course - Social Sciences (3)
- Chemistry Elective (3)¹

Total Semester Hours: 13

Semester 8

- EDCI 3136 Reading in the Content Areas (3)
- EDCI 4006 Student Teaching in Grades 6-12 Mathematics and Sciences (9)

Total Semester Hours: 12

121-122 Total Sem. Hrs.

¹ - Chemistry Electives: CHEM 4010, CHEM 4011, CHEM 4150, CHEM 4160, CHEM 4552, CHEM 4553, CHEM 4556, CHEM 4557, CHEM 4558, CHEM 4559, CHEM 4561, CHEM 4562, CHEM 4563 CHEM 4564, CHEM 4571, CHEM 4581, CHEM 4594, CHEM 4597.

In addition, the student must take EDCI 2500 as one of the General Education social science courses. Students should plan their course work so that the last semester of the senior year can accommodate the 12 hours that are required to be taken concurrently (EDCI 4006 and EDCI 3136). BIOL 1208 and BIOL 1209 labs should be included in the freshman year.

Minor

Chemistry Minor

Requirements are a minimum of 23 semester hours of chemistry: CHEM 1201, CHEM 1202, CHEM 1212 (or CHEM 1421, CHEM 1422, CHEM 1431) and a minimum of 15 semester hours at 2000 level or above. These additional 15 hours must include a two to three semester laboratory course and at least six semester hours at the 3000 level or above. The following courses cannot be taken to meet the requirements of the *minor in Chemistry*: CHEM 2900, CHEM 3900, CHEM 4003, and CHEM 4005. Interested students should contact the Undergraduate Chemistry Office.

Department of Geology & Geophysics

For information regarding the GRADUATE PROGRAM, click [here](#).

The geology curriculum prepares undergraduates for graduate study in geology and geophysics and related fields and for a wide range of professional careers, including teaching, research, resource exploration and development, and environmental management and remediation. The curriculum has three areas of concentration: geology, environmental geology, and geophysics. All three areas are designed to provide students with a sound foundation in geology and to prepare them for entry into a graduate program or directly into a professional career.

Geology students in all areas of concentration follow the same basic curriculum during the first four semesters of study. Emphasis for all students is on fundamental geologic processes operating on and within the earth through time. Students during this time receive a firm foundation in mineralogy, the history of the biosphere, petrology, structural geology and sedimentology, as well as basic courses in biology, chemistry, physics, and mathematics. The geophysics concentration has additional emphasis on mathematics and physics starting in the fifth semester. Laboratory and field studies are integrated into the curriculum at all levels and include a six-week field geology course at the department's permanent field camp in the Colorado Front Range, taken ideally between the sixth and seventh semesters.

The curriculum is designed to leave much of the final two to three semesters of study relatively unstructured so that students, with the guidance and approval of the department, can develop a program of advanced course work most appropriate to their area of concentration and career objectives. Students in any concentration area take, in addition to the first five semesters of courses, 15 hours of geology 4000-level electives. Students selecting the environmental geology area of concentration take physical hydrogeology as one of the 4000-level electives. Students selecting the geophysics area of concentration take additional mathematics and physics courses, as well as plate tectonics, and well-logging in petroleum engineering, and 12 additional hours of geology courses at the 4000-level.

Undergraduate thesis research is encouraged. Geology students may earn a maximum of six hours of GEOL 3909, which can be followed by GEOL 3999 for the semester that the student defends their undergraduate thesis to a committee. Ideally, the first GEOL 3909 course would be taken in the junior year and continue through the senior year. One 4000-level geology course may be substituted for a minimum of three hours of GEOL 3909 and three hours of GEOL 3999, or the HNRS equivalent for undergraduate thesis research (e.g. HNRS 4000).

Graduate and undergraduate majors in geology must pay a \$35 field service fee each semester. Students not majoring in geology who schedule courses requiring field trip fees will be assessed a *pro rata* part of the amount above as determined by the department chair. Part-time students enrolled in seminar courses only and students registered for thesis or dissertation only are exempt from the fee. Additional information concerning fees for field geology courses is available from the Geology field camp director, Department of Geology & Geophysics.

Honors courses offered are GEOL 1002 and GEOL 1004.

Major

Geology, B.S.Geol.

Areas of Concentration

Environmental Geology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in GEOL 2061/GEOL 2081 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in GEOL 3032/GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

Recommended as preparation for a career in environmental geology and related fields or entrance to graduate study.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- GEOL 1001 General Geology: Physical (3)
- GEOL 1601 Physical Geology Laboratory (1)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- GEOL 1003 General Geology: Historical (3)
- GEOL 1602 Historical Geology Laboratory (1)
- MATH 1552 Analytic Geometry and Calculus II (4)
- BIOL 1201 Biology for Science Majors I (3)

Total Semester Hours: 16

Semester 3

CRITICAL: "C" or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)

- PHYS 1201 General Physics for Physics Majors (4) or
- PHYS 2110 Particle Mechanics (3) ³

- PHYS 1208 General Physics Laboratory for Physics Majors (1) or
- PHYS 2108 Introductory Physics Laboratory (1)

- General Education course - Social Sciences (3)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 15-14

Semester 4

CRITICAL: "C" or better in GEOL 2061/GEOL 2081 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- GEOL 2061 History of the Biosphere (4)
- GEOL 2081 Mineralogy (4)

- PHYS 1202 General Physics for Physics Majors (4) or
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3) ³

- PHYS 1209 General Physics Laboratory for Physics Majors (1) or
- PHYS 2109 General Physics Laboratory (1)

Total Semester Hours: 16-15

Semester 5

CRITICAL: “C” or better in GEOL 3032/GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

- GEOL 3032 Introduction to Sedimentology and Depositional Environments (4)
- GEOL 3041 Igneous and Metamorphic Petrology (4)
- General Education course - Humanities (ENGL/HNRS 2000-level) (3)
- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3) or approved elective (3)³

Total Semester Hours: 14

Semester 6

- GEOL 3071 Structural Geology (4)
- General Education course - Social Sciences (2000-level) (3)
- General Education course - Humanities (3)
- Approved Elective (3)²

Total Semester Hours: 13

Semester 7

SUMMER SESSION: Geology Field Camp.

- GEOL 3666 Field Geology (6)

Total Semester Hours: 6

Semester 8

- GEOL 4182 Physical Hydrogeology (3)

- Area of Concentration Courses (6)¹
- Approved Electives (6)²

Total Semester Hours: 15

Semester 9

- Area of Concentration Course (3)¹
- Approved Electives (4-6)²
- General Education course - Arts (3)

Total Semester Hours: 10-12

120 Total Sem. Hrs.

¹ - Area of Concentration Course: Nine hours of geology electives that must be chosen from GEOL 4023, GEOL 4043, GEOL 4062, GEOL 4081, GEOL 4084, GEOL 4085 and GEOL 4164, of which three hours must be chosen from GEOL 4043, GEOL 4062, GEOL 4084, and GEOL 4085.

² - The following courses are useful free electives in environmental geology: GEOL 4165, GEOG 4023, GEOG 4041, GEOG 4042, GEOG 4046, GEOG 4047, GEOG 4048, GEOG 4070, GEOG 4083; CHEM 4150; OCS 3103; ENVS 4xxx; RNR 4025 and RNR 4900.

³ - Students may take either the two-course PHYS sequence (PHYS 1201 and PHYS 1202) or the three-course PHYS sequence (PHYS 2110, PHYS 2112, and PHYS 2113).

Geology

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in GEOL 2061/GEOL 2081 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in GEOL 3032/GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

Recommended as preparation for a career in geology and related fields, or entrance to a graduate study.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- CHEM 1201 General Chemistry I (3)
- GEOL 1001 General Geology: Physical (3)
- GEOL 1601 Physical Geology Laboratory (1)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: “C” or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- GEOL 1003 General Geology: Historical (3)
- GEOL 1602 Historical Geology Laboratory (1)
- MATH 1552 Analytic Geometry and Calculus II (4)
- BIOL 1201 Biology for Science Majors I (3)

Total Semester Hours: 16

Semester 3

CRITICAL: “C” or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- BIOL 1202 Biology for Science Majors II (3)
- PHYS 1201 General Physics for Physics Majors (4) or
- PHYS 2110 Particle Mechanics (3)
- PHYS 1208 General Physics Laboratory for Physics Majors (1) or

- PHYS 2108 Introductory Physics Laboratory (1)

- General Education course - Arts (3)

- First Course in Foreign Language Sequence (4)

Total Semester Hours: 15-14

Semester 4

CRITICAL: "C" or better in GEOL 2061/GEOL 2081 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)

- GEOL 2061 History of the Biosphere (4)

- GEOL 2081 Mineralogy (4)

- PHYS 1202 General Physics for Physics Majors (4) or

- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3) or

- PHYS 2002 General Physics II (3)

- PHYS 1209 General Physics Laboratory for Physics Majors (1) or

- PHYS 2109 General Physics Laboratory (1)

Total Semester Hours: 16-15

Semester 5

CRITICAL: "C" or better in GEOL 3032/GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

- GEOL 3032 Introduction to Sedimentology and Depositional Environments (4)

- GEOL 3041 Igneous and Metamorphic Petrology (4)

- General Education course - Humanities (ENGL/HNRS 2000-level) (3)

- General Education course - Social Sciences (3)

Total Semester Hours: 14

Semester 6

- GEOL 3071 Structural Geology (4)
- General Education course - Social Sciences (2000-level) (3)
- General Education course - Humanities (3)
- Approved Electives (6)

Total Semester Hours: 16

Semester 7

SUMMER SESSION: Geology Field Camp.

- GEOL 3666 Field Geology (6)

Total Semester Hours: 6

Semester 8

- Approved Electives (6)
- GEOL 4000-level Courses (6)

Total Semester Hours: 12

Semester 9

- GEOL 4000-level Courses (6)
- Approved Electives (4-6)

Total Semester Hours: 10-12

120 Total Sem. Hrs.

Geophysics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in GEOL 2081/GEOL 2061 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in GEOL 3032/GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

Recommended as preparation for a career in geophysics and related fields or entrance to graduate study.

Semester 1

CRITICAL: "C" or better in ENGL 1001 and GEOL 1001; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1201 General Chemistry I (3)
- ENGL 1001 English Composition (3)
- GEOL 1001 General Geology: Physical (3)
- GEOL 1601 Physical Geology Laboratory (1)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 2

CRITICAL: "C" or better in CHEM 1201 and GEOL 1003; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- GEOL 1003 General Geology: Historical (3)
- GEOL 1602 Historical Geology Laboratory (1)
- MATH 1552 Analytic Geometry and Calculus II (4)
- BIOL 1201 Biology for Science Majors I (3)

Total Semester Hours: 16

Semester 3

CRITICAL: "C" or better in BIOL 1201 and MATH 1550; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- MATH 2065 Elementary Differential Equations (3) or
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)

- PHYS 1201 General Physics for Physics Majors (4) or
- PHYS 2110 Particle Mechanics (3) ³

- PHYS 1208 General Physics Laboratory for Physics Majors (1) or
- PHYS 2108 Introductory Physics Laboratory (1)

- General Education course - Social Sciences (3)
- First Course in Foreign Language Sequence (4)

Total Semester Hours: 16-14

Semester 4

CRITICAL: "C" or better in GEOL 2081/GEOL 2061 and PHYS 1201/PHYS 2110; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)

- PHYS 1202 General Physics for Physics Majors (4) or
- PHYS 2112 Fluids, Thermodynamics, Waves, and Modern Physics (3) ³

- PHYS 1209 General Physics Laboratory for Physics Majors (1) or
- PHYS 2109 General Physics Laboratory (1)

- GEOL 2061 History of the Biosphere (4)
- GEOL 2081 Mineralogy (4)

Total Semester Hours: 16-15

Semester 5

CRITICAL: "C" or better in GEOL 3032/ GEOL 3041; 2.0 Cumulative, LSU and Semester GPA.

- PHYS 2113 Fields: Gravity, Electricity, and Magnetism (3) or approved elective (3)³
- GEOL 3041 Igneous and Metamorphic Petrology (4)
- GEOL 3032 Introduction to Sedimentology and Depositional Environments (4)
- General Education course - Social Sciences (2000-level) (3)
- General Education course - Humanities (ENGL/HNRS 2000-level) (3)

Total Semester Hours: 17

Semester 6

- GEOL 3071 Structural Geology (4)
- PETE 3036 Well Logging (3)
- General Education course - Arts (3)
- General Education course - Humanities (3)
- Approved Elective (0-3)²

Total Semester Hours: 13-16

Semester 7

SUMMER-Six week field study course.

- GEOL 3666 Field Geology (6)

Total Semester Hours: 6

Semester 8

- GEOL 4066 Plate Tectonics (3)
- GEOL 4000-level Course (3)
- Area of Concentration Course (3)¹
- Approved Elective (3)²

Total Semester Hours: 12

Semester 9

- Area of Concentration Course (3)¹
- Approved Electives (6)²

Total Semester Hours: 9

120 Total Sem. Hrs.

¹ - AREA OF CONCENTRATION COURSES: GEOL 4062, GEOL 4068.

² - A useful free elective is GEOG 4048.

³ - Students may take either the two-course PHYS sequence (PHYS 1201 and PHYS 1202) or the three-course PHYS sequence (PHYS 2110, PHYS 2112, and PHYS 2113).

Minor

Geology Minor

An undergraduate *minor in geology* is available (17 hours). Required courses are: GEOL 1001, GEOL 1003, GEOL 1601, GEOL 1602, and at least three of the additional hours must be taken at the 3000 or 4000 level on this campus (excluding GEOL 3909 and GEOL 3999).

Honors courses offered are GEOL 1002 and GEOL 1004.

Department of Mathematics

OFFICE 301 Lockett Hall

E-MAIL department@math.lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

Students majoring in mathematics may choose from several areas of concentration. Each concentration requires the following lower division mathematics courses (totaling 22 sem. hrs.): MATH 1550 (or MATH 1551), MATH 1552 (or MATH 1553), MATH 2057 (or MATH 2058), MATH 2060 (or EXST 3201), MATH 2085, and two courses from MATH 2020, MATH 2025, MATH 2030. Each concentration requires additional courses (see recommended paths) and a capstone experience. Credit for mathematics courses numbered below 1550 will not be counted toward the required credits for mathematics majors.

Those students who are planning to pursue a graduate degree in mathematics are strongly advised to include MATH 4031, MATH 4032, MATH 4035, MATH 4153, and MATH 4200 in their curriculum even if they do not select the mathematics area of concentration.

Honors courses offered in mathematics are MATH 1551, MATH 1553, and MATH 2058. The honors option is available to students in upper division mathematics courses. (See "Honors Option" in the "Honors College" section in this catalog.) A special curriculum leading to the BS degree in mathematics with departmental honors is offered. Details are available from the departmental office.

No student may receive more than nine semester hours of credit in mathematics courses numbered below 1550, with the exception of students who are pursuing the elementary education degree and following the 12 hour sequence specified in that curriculum. No student who has already received credit for a mathematics course numbered 1550 or above may be registered in a mathematics course numbered below 1550, unless given special permission by the Department of Mathematics.

Major

Mathematics, B.S.

Areas of Concentration

Consult "Degree Requirements of the College" in this section of the catalog for specific instructions regarding electives and the general education literature and social sciences requirements.

Actuarial Science

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5) or
- MATH 1551 HONORS: Analytic Geometry and Calculus I (5)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (0-1)

Total Semester Hours: 15-16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (2-1)
- General Education course - Arts (3)

Total Semester Hours: 16-15

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- MATH 2057 Multidimensional Calculus (3)
- Social Sciences or Humanities course (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/Honors 2000-level) (3)

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- MATH 2085 Linear Algebra (3)
- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)
- General Education course - Social Sciences (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

- MATH 3355 Probability (3)
- ACCT 2001 Introductory Financial Accounting (3)
- ECON 2030 Economic Principles (3)²

- General Education course - Humanities (English/honors 2000-level) (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- FIN 3715 Business Finance (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- MATH 4058 Elementary Stochastic Processes (3)
- Approved Electives (5)

Total Semester Hours: 15

Semester 7

- MATH 4050 Interest Theory (5)
- MATH 4056 Mathematical Statistics (3)

- MATH 4020 Capstone Course (3) or
- MATH 4997 Vertically Integrated Research (3) or
- EXST 4087 Special Topics in Applied Statistics (3)

- Social Sciences or Humanities Course (3)

Total Semester Hours: 14

Semester 8

- EXST 3201 Statistical Analysis II (4)
- MATH 4153 Finite Dimensional Vector Spaces (3)
- Approved Electives (8)

Total Semester Hours: 15

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202
- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

² - ECON 2030 applies as three hours toward the university general education social sciences requirement. However, since it is also a concentration course, it must be passed with a grade of "C" or better.

Applied/Discrete Mathematics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (0-1)

Total Semester Hours: 15-16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (2-1)
- General Education course - Arts (3)

Total Semester Hours: 16-15

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

- MATH 2057 Multidimensional Calculus (3)
- MATH 2060 Technology Lab (1)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- Social Sciences or Humanities Course (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- MATH 2085 Linear Algebra (3)
- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)
- General Education course - Social Sciences (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085; MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

- MATH 4023 Applied Algebra (3)
- General Education course - Humanities (English/honors 2000-level) (3)
- General Education course - Social Sciences (2000-level) (3)
- Area of Concentration Course (3)²
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- MATH 4171 Theory of Graphs (3)
- MATH 4025 Optimization Theory and Applications (3)
- Social Sciences or Humanities Course (3)
- Area of Concentration Course (3)²

- Approved Elective (3)

Total Semester Hours: 15

Semester 7

- MATH 4172 Combinatorics (3)
- Approved Electives (12)

Total Semester Hours: 15

Semester 8

- MATH 4020 Capstone Course (3) or
- MATH 4997 Vertically Integrated Research (3)

- Approved Electives (10)

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202

- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

² - Select courses from: MATH 3355, MATH 4024, MATH 4027, MATH 4064, MATH 4065, MATH 4066, MATH 4153, MATH 4181, MATH 4340.

Computational Mathematics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)

- MATH 1550 Analytic Geometry and Calculus I (5) or
- MATH 1551 HONORS: Analytic Geometry and Calculus I (5)

- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (1)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (1)
- General Education course - Arts (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

- MATH 2057 Multidimensional Calculus (3)
- MATH 2060 Technology Lab (1)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- Social Sciences or Humanities Course (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- MATH 2085 Linear Algebra (3)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- General Education course - Social Sciences (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

- MATH 2065 Elementary Differential Equations (3) ²
- MATH 4064 Numerical Linear Algebra (3)
- General Education course - Humanities (English/honors 2000-level) (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Elective (3)

Total Semester Hours: 15

Semester 6

- MATH 4065 Numerical Analysis (3)
- MATH 4066 Numerical Differential Equations (3)
- Area of Concentration Course (3)³
- Approved Electives (5)

Total Semester Hours: 14

Semester 7

- MATH 4025 Optimization Theory and Applications (3)
- MATH 4031 Advanced Calculus I (3)

- MATH 4035 Advanced Calculus of Several Variables (3) or
- MATH 4032 Advanced Calculus II (3)

- Social Sciences or Humanities Course (3)
- Area of Concentration Course (3)³

Total Semester Hours: 15

Semester 8

- MATH 4020 Capstone Course (3)
- Area of Concentration Course (3)³
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202
- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

² - Students may choose to take MATH 2090 and waive MATH 2065 as well as the core requirement of MATH 2085. The two-hour difference will be added to approved electives.

³ - Select from the following: MATH 4340, MATH 4036, MATH 3355, MATH 4058, CSC 4356 (ME 4573), CSC 4357 (ME 4583), ME 4823, EE 3160, EE 4160, or upper division courses in engineering and science that have a strong computational component with the approval of the mathematics department.

Mathematics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (0-1)

Total Semester Hours: 15-16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (2-1)
- General Education course - Arts (3)

Total Semester Hours: 16-15

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

- MATH 2057 Multidimensional Calculus (3)
- MATH 2060 Technology Lab (1)
- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- Social Sciences or Humanities Course (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- MATH 2085 Linear Algebra (3)
- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)
- General Education course - Social Sciences (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

- MATH 4200 Abstract Algebra I (3)
- General Education course - Humanities (English/honors 2000-level) (3)
- General Education course - Social Sciences (2000-level) (3)
- Area of Concentration Courses (6)²

Total Semester Hours: 15

Semester 6

- MATH 4031 Advanced Calculus I (3)
- Social Sciences or Humanities Course (3)
- Area of Concentration Course (3)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 7

- MATH 4035 Advanced Calculus of Several Variables (3) or
- MATH 4032 Advanced Calculus II (3)

- MATH 4020 Capstone Course (3) or
- MATH 4997 Vertically Integrated Research (3)

- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- Approved Electives (13)

Total Semester Hours: 13

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202

- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

² - Select from: MATH 3355, MATH 4027, MATH 4032, MATH 4035, MATH 4036, MATH 4039, MATH 4064, MATH 4153, MATH 4065, MATH 4158, MATH 4171, MATH 4172, MATH 4181, MATH 4201, MATH 4325, MATH 4340, MATH 4345, MATH 4700, MATH 4997, MATH 4999.

NOTE: At most six credit hours of the 21 hours in the concentration may be from MATH 4020, MATH 4997 or MATH 4999.

Mathematical Statistics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (0-1)

Total Semester Hours: 15-16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (2-1)

- General Education course - Arts (3)

Total Semester Hours: 16-15

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.0 Cumulative, LSU and Semester GPA; Admission to the College.

- MATH 2057 Multidimensional Calculus (3)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- Social Sciences or Humanities Course (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 15

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 2000 English Composition (3)
- MATH 2085 Linear Algebra (3)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)

- General Education course - Social Sciences (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.0 Cumulative, LSU and Semester GPA.

- MATH 3355 Probability (3)
- EXST 2201 Introduction to Statistical Analysis (4)
- General Education course - Humanities (English/honors 2000-level) (3)
- General Education course - Social Sciences (2000-level) (3)
- Approved Elective (3)

Total Semester Hours: 16

Semester 6

- EXST 3201 Statistical Analysis II (4)
- MATH 4031 Advanced Calculus I (3)
- Social Sciences or Humanities Course (3)
- Approved Electives (5)

Total Semester Hours: 15

Semester 7

- MATH 4035 Advanced Calculus of Several Variables (3) or
- MATH 4058 Elementary Stochastic Processes (3) or
- MATH 4153 Finite Dimensional Vector Spaces (3)

- MATH 4056 Mathematical Statistics (3)
- EXST 4012 Introduction to Sampling Techniques (3)
- MATH 4020 Capstone Course (3) or
- MATH 4997 Vertically Integrated Research (3) or
- EXST 4087 Special Topics in Applied Statistics (3)

Total Semester Hours: 12

Semester 8

- MATH 4035 Advanced Calculus of Several Variables (3) or
- MATH 4058 Elementary Stochastic Processes (3) or
- MATH 4153 Finite Dimensional Vector Spaces (3)
- Approved Electives (13)

Total Semester Hours: 16

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202
- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

Secondary Education - Mathematics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

SEMESTER 3: "C" or better in MATH 1552; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA; Admission to the College.

SEMESTER 4: "C" or better in MATH 2057; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

SEMESTER 5: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

This concentration is part of the Geaux Teach–Math and Sciences Program. Students will obtain a degree in mathematics and, upon completing this concentration and meeting any additional requirements of the Louisiana Department of Education, will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

Semester 1

CRITICAL: "C" or better in ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- BASC 2010 Inquiry Approaches to Math and Science Teaching (1)
- First Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (0-1)

Total Semester Hours: 16-17

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- BASC 2011 Inquiry-Based Math and Science Lesson Design (1)
- Second Course in Foreign Language Sequence (4)
- General Education course - Natural Sciences (3)¹
- Natural Sciences Lab (2-1)

Total Semester Hours: 14-13

Semester 3

CRITICAL: "C" or better in MATH 1552; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA; Admission to the College.

- EDCI 2500 Knowing and Learning in Mathematics and Science (3)
- MATH 2057 Multidimensional Calculus (3)
- MATH 2060 Technology Lab (1)
- MATH 2085 Linear Algebra (3)
- General Education course - Natural Sciences (3)¹
- General Education course - Humanities (English/honors 2000-level) (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- ENGL 2000 English Composition (3)
- EDCI 3550 Classroom Interactions (3)

Choose **two** courses from the following: (6)

- MATH 2020 Solving Discrete Problems (3) or
- MATH 2025 Integral Transforms and Their Applications (3) or
- MATH 2030 Discrete Dynamical Systems (3)
- General Education course - Natural Sciences (3)¹

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2085, MATH 2020/MATH 2025/MATH 2030; 2.5 Cumulative and LSU GPA; 2.0 Semester GPA.

- PHIL 2786 Logic, Science and Society (3)

- MATH 3002 Mathematics Classroom Presentations (1)
- MATH 3355 Probability (3)
- General Education course - Humanities (English/honors 2000-level) (3)
- General Education course - Social Sciences (3)
- Approved Elective (3)

Total Semester Hours: 16

Semester 6

- MATH 3003 Functions & Modeling (2)
- MATH 4005 Geometry (3)
- MATH 4031 Advanced Calculus I (3)
- BIOL 4005 Science Research Methods (3) or
- CHEM 4005 Science Research Methods (3) or
- PHYS 4005 Science Research Methods (3)
- Social Sciences or Humanities Course (3)
- Approved Elective (2-1)

Total Semester Hours: 16-15

Semester 7

- EDCI 4500 Instructional Models for Mathematics and Science (3)
- MATH 4019 Calculus Internship Capstone (1)
- MATH 4023 Applied Algebra (3) or
- MATH 4181 Elementary Number Theory (3) or
- MATH 4200 Abstract Algebra I (3)

- General Education course - Arts (3)
- Area of Concentration Course (3)²
- Approved Elective (2-3)

Total Semester Hours: 15-16

Semester 8

- EDCI 4006 Student Teaching in Grades 6-12 Mathematics and Sciences (9)
- EDCI 3136 Reading in the Content Areas (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

¹ - To meet the university's General Education Natural Sciences requirement and the College of Science's natural sciences requirement, a mathematics major must take the following:

- One two-semester sequence in Biological Sciences: BIOL 1001, BIOL 1002 or BIOL 1201, BIOL 1202
- One two-semester sequence in Physical Sciences chosen from the following: ASTR 1101, ASTR 1102; CHEM 1001, CHEM 1002; CHEM 1201, CHEM 1202; GEOL 1001, GEOL 1003; GEOL 1001, GEOL 2020; GEOL 1111, GEOL 1003; GEOL 1111, GEOL 2020; PHYS 1201, PHYS 1202; PHYS 2001, PHYS 2002; PHYS 2110, PHYS 2112; PHYS 2110, PHYS 2113.

Students must also take the two-hour lab requirement corresponding with either the Biological Sciences or Physical Sciences sequence.

² - Select three hours from the following: MATH 4024, MATH 4027, MATH 4032, MATH 4036, MATH 4039, MATH 4056, MATH 4065, MATH 4153, MATH 4158, MATH 4171, MATH 4172, MATH 4201, MATH 4325, MATH 4340, MATH 4345, MATH 4700, MATH 4999

NOTE: EDCI 2500 will count as one of the General Education Social Sciences courses. Students should plan their course work so that the last semester of the senior year can accommodate the 12 hours that are required to be taken concurrently (EDCI 4006 and EDCI 3136).

Minor

Mathematics Minor

The requirements for an undergraduate *minor in mathematics* are as follows: MATH 1550 (or MATH 1551), MATH 1552 (or MATH 1553), MATH 2057 (or MATH 2058), MATH 2085 (or MATH 2070 or MATH 2090), and at least nine semester hours at the 3000 or 4000 level, but excluding MATH 3903 and MATH 4005.

Department of Physics & Astronomy

OFFICE	202 Nicholson Hall
TELEPHONE	225-578-2261
FAX	225-578-5855
WEBSITE	www.phys.lsu.edu

For information regarding the GRADUATE PROGRAM, click [here](#).

The Department of Physics & Astronomy offers master's degrees for medical physics studies. For additional information, see the section, "The Graduate School" in this catalog.

Prerequisites • All prerequisites in physics courses should be rigidly observed.

Corequisites • A student may not continue in a course after dropping a corequisite course prior to the last day of the midsemester examination period.

Of the 7000-level courses, those numbered in the 7200s, as well as PHYS 7343, PHYS 7363, PHYS 7383, PHYS 7398 and PHYS 7411 are offered every year; PHYS 7353 and PHYS 7373 every other year. All other courses are offered sporadically as interest demands and in order to provide a varied curriculum.

Major

Physics, B.S.

Areas of Concentration

Students planning to enter graduate school are encouraged to select a modern foreign language.

Astronomy

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- PHYS 1201 General Physics for Physics Majors (4) ¹

- PHYS 1208 General Physics Laboratory for Physics Majors (1)
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- PHYS 1202 General Physics for Physics Majors (4) ¹
- PHYS 1209 General Physics Laboratory for Physics Majors (1)
- General Education course - Humanities (3)
- General Education Course - Humanities (ENGL/HNRS 2000-Level) (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- ASTR 1101 The Solar System (3)
- ENGL 2000 English Composition (3)
- MATH 2057 Multidimensional Calculus (3)
- PHYS 2203 Introductory Modern Physics (3)
- PHYS 2207 Introductory Modern Physics Laboratory (1)
- CSC 1253 Computer Science I with C++ (3) or equivalent programming course

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- ASTR 1102 Stellar Astronomy (3)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- PHYS 2221 Introduction to Mechanics (3)
- PHYS 3098 Instrumentation Electronics for Scientists (3)

- BIOL 1001 General Biology (3) or
- BIOL 1201 Biology for Science Majors I (3)

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

- ASTR 4221 Introductory Astrophysics (3) ²
- PHYS 2231 Electricity and Magnetism (3)
- PHYS 2411 Computational Science I (3)
- PHYS 4123 Intermediate Mechanics (3)
- General Education Course - Social Sciences (2000-level) (3)

Total Semester Hours: 15

Semester 6

- ASTR 4222 Introductory Astrophysics (3) ²
- PHYS 4132 Electromagnetism and Electromagnetic Waves (3)
- PHYS 4125 Thermodynamics and Statistical Mechanics (3)
- PHYS 4141 Introduction to Quantum Mechanics (3)
- Foreign Language Course (4)

Total Semester Hours: 16

Semester 7

- ASTR 4261 Modern Observational Techniques (3) ²
- General Education Course - Social Sciences (3)
- Approved Electives (6)

Total Semester Hours: 12

Semester 8

- PHYS 4135 Modern Optics (3) ²
- Approved Electives (11)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - Students may take the complete PHYS 2110, PHYS 2112, PHYS 2113 sequence in place of the PHYS 1201, PHYS 1202 sequence. A student who chooses the three semester sequence will require one less credit hour from free electives

² - ASTR 4221 and ASTR 4222 are taught in alternate years with ASTR 4261 and PHYS 4135. Students are to switch the semester that these courses are taken depending on what is offered that year.

Medical Physics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)

- MATH 1550 Analytic Geometry and Calculus I (5)
- PHYS 1208 General Physics Laboratory for Physics Majors (1)
- PHYS 1201 General Physics for Physics Majors (4) ¹
- General Education course - Arts (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- PHYS 1202 General Physics for Physics Majors (4) ¹
- PHYS 1209 General Physics Laboratory for Physics Majors (1)
- General Education Course - Humanities (3)
- General Education Course - Humanities (ENGL/HNRS 2000-Level) (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- MATH 2057 Multidimensional Calculus (3)
- ENGL 2000 English Composition (3)
- CHEM 1201 General Chemistry I (3)
- PHYS 2203 Introductory Modern Physics (3)
- PHYS 2207 Introductory Modern Physics Laboratory (1)
- CSC 1253 Computer Science I with C++ (3) or equivalent programming course

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 1202 General Chemistry (3)
- CHEM 1212 General Chemistry Laboratory (2)
- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- PHYS 2221 Introduction to Mechanics (3)
- MEDP 2051 Radiation Science with Applications (3)

Total Semester Hours: 15

Semester 5

CRITICAL: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

- CHEM 2060 Survey of Organic Chemistry (3)
- BIOL 1201 Biology for Science Majors I (3)
- PHYS 2231 Electricity and Magnetism (3)
- PHYS 2411 Computational Science I (3)
- General Education course - Social Sciences (2000-level) (3)

Total Semester Hours: 15

Semester 6

- BIOL 1202 Biology for Science Majors II (3)

¹ - Students may take the complete PHYS 2110, PHYS 2112, PHYS 2113 sequence in place of the PHYS 1201, PHYS 1202 sequence. A student who chooses the three semester sequence will require one less credit hour from free electives.

Physics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 5: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)
- PHYS 1201 General Physics for Physics Majors (4) ¹
- PHYS 1208 General Physics Laboratory for Physics Majors (1)
- General Education Course - Arts (3)

Total Semester Hours: 16

Semester 2

CRITICAL: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

- MATH 1552 Analytic Geometry and Calculus II (4)
- PHYS 1202 General Physics for Physics Majors (4) ¹
- PHYS 1209 General Physics Laboratory for Physics Majors (1)
- General Education Course - Humanities (ENGL/HNRS 2000-Level) (3)
- General Education course - Humanities (3)

Total Semester Hours: 15

Semester 3

CRITICAL: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

- MATH 2057 Multidimensional Calculus (3)
- ENGL 2000 English Composition (3)
- PHYS 2203 Introductory Modern Physics (3)
- PHYS 2207 Introductory Modern Physics Laboratory (1)
- CSC 1253 Computer Science I with C++ (3) or equivalent programming course

- Approved Electives (3)

Total Semester Hours: 16

Semester 4

CRITICAL: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.

- MATH 2090 Elementary Differential Equations and Linear Algebra (4)
- PHYS 2221 Introduction to Mechanics (3)
- PHYS 3098 Instrumentation Electronics for Scientists (3)
- CHEM 1201 General Chemistry I (3)

- BIOL 1001 General Biology (3) or
- BIOL 1201 Biology for Science Majors I (3)

Total Semester Hours: 16

Semester 5

CRITICAL: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

- PHYS 4123 Intermediate Mechanics (3)
- CHEM 1202 General Chemistry (3)
- PHYS 2231 Electricity and Magnetism (3)
- PHYS 2411 Computational Science I (3)
- General Education Course - Social Sciences (2000-level) (3)

Total Semester Hours: 15

Semester 6

- PHYS 4132 Electromagnetism and Electromagnetic Waves (3)
- PHYS 4125 Thermodynamics and Statistical Mechanics (3)
- PHYS 4141 Introduction to Quantum Mechanics (3)
- Foreign Language Course (4)

Total Semester Hours: 13

Semester 7

- PHYS 4142 Introduction to Quantum Mechanics (3)
- PHYS 4000-Level Course (3)²
- General Education Course - Social Sciences (3)
- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- PHYS 4399 Senior Thesis (3)
- PHYS 4000-Level Course (3)²
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - Students may take the complete PHYS 2110, PHYS 2112, PHYS 2113 sequence in place of the PHYS 1201, PHYS 1202 sequence. A student who chooses the three semester sequence will require one less credit hour from free electives.

² - Area of Concentration Course: two 4000-level PHYS electives. With permission, a 4000-level MATH may be substituted for a 4000-level PHYS course.

Physics & Second Discipline

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 3: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 4: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Cumulative, LSU and Semester GPA.
SEMESTER 5: "C" or better in MATH 2090 and PHYS 2203; 2.0 Cumulative, LSU and Semester GPA.

Semester 1

CRITICAL: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- MATH 1550 Analytic Geometry and Calculus I (5)

Total Semester Hours: 15

Semester 6

- PHYS 4125 Thermodynamics and Statistical Mechanics (3)
- PHYS 4132 Electromagnetism and Electromagnetic Waves (3)
- Foreign Language Course (4)
- Area of Concentration Course (3)²

Total Semester Hours: 13

Semester 7

- General Education course - Social Sciences (3)
- Area of Concentration Courses (6)²
- Approved Electives (6)

Total Semester Hours: 15

Semester 8

- Area of Concentration Courses (6)²
- Approved Electives (8)

Total Semester Hours: 14

120 Total Sem. Hrs.

¹ - Students may take the complete PHYS 2110, PHYS 2112, PHYS 2113 sequence in place of the PHYS 1201, PHYS 1202 sequence. A student who chooses the three semester sequence will require one less credit hour from free electives.

² - At least 24 semester hours from an approved discipline outside of the Department of Physics & Astronomy; any second area may be chosen with consent of the dean and department advisor. The approved area form must be submitted no later than the sophomore year.

Secondary Education - Physics

CRITICAL REQUIREMENTS

SEMESTER 1: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

SEMESTER 2: "C" or better in MATH 1550; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

SEMESTER 3: "C" or better in MATH 1552 and PHYS 1201/PHYS 2110; Admission to the College; 2.0 Semester GPA; 2.5

Cumulative and LSU GPA.

SEMESTER 4: "C" or better in MATH 2057 and PHYS 1202/PHYS 2113; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

SEMESTER 5: "C" or better in MATH 2090 and PHYS 2203; 2.0 Semester GPA; 2.5 Cumulative and LSU GPA.

This concentration is part of the Geaux Teach–Math and Sciences Program. Students will obtain a degree in physics and, upon completing this concentration and meeting any additional requirements of the Louisiana Department of Education, will be eligible for certification in the state of Louisiana as teachers in grades 6-12.

Semester 1

CRITICAL: "C" or better in MATH 1022/MATH 1023 and ENGL 1001; 2.0 Cumulative, LSU and Semester GPA.

- ENGL 1001 English Composition (3)
- BASC 2010 Inquiry Approaches to Math and Science Teaching (1)

- CHEM 1202 General Chemistry (3)

- PHYS 4000-Level Courses (6)²
- Foreign Language Course (4)

Total Semester Hours: 16

Semester 7

- EDCI 4500 Instructional Models for Mathematics and Science (3)
- General Education course - Social Sciences (3)
- Approved Electives (9)

Total Semester Hours: 15

Semester 8

- EDCI 4006 Student Teaching in Grades 6-12 Mathematics and Sciences (9)
- EDCI 3136 Reading in the Content Areas (3)

Total Semester Hours: 12

120 Total Sem. Hrs.

¹ - Students may take the complete PHYS 2110, PHYS 2112, PHYS 2113 sequence in place of the PHYS 1201, PHYS 1202 sequence. A student who chooses the three semester sequence will require one less credit hour from free electives.

² - EDCI 2500 will count as one of the General Education social science courses. Some general education courses are taken in different years than in the standard curriculum. Students should plan their course work so that the last semester of the senior year can accommodate the 12 hours that are required to be taken concurrently (EDCI 4006 and EDCI 3136). PHYS 4125 and PHYS 4132 are not required for this concentration, but may be used as physics 4000 electives.

Minor

Nuclear Science Minor

Undergraduate students on this campus may choose to *minor in nuclear science*. The following conditions must be met:

- Approval from the Department of Physics & Astronomy
- At least 22 credit hours in nuclear science, medical physics and health physics, and physics courses. Required courses are PHYS 2110, PHYS 2112, PHYS 2113, PHYS 2108, PHYS 2109 (or PHYS 1201, PHYS 1202, PHYS 1208, PHYS 1209), plus 12 additional credit hours which must be taken from the following: MEDP 2051, MEDP 4331, MEDP 4351, MEDP 4352; NS 4352, NS 4411, NS 4570; and PHYS 2203, PHYS 2207, PHYS 3098, PHYS 4271.

Physics Minor

An undergraduate *minor in physics* is available. Required courses are: PHYS 1201, PHYS 1202, PHYS 1208, PHYS 1209 (or PHYS 2110, PHYS 2112, PHYS 2113, PHYS 2108, PHYS 2109), and PHYS 2221, plus three additional courses, for a total of 22-23 hours. The three additional courses, at least one of which must be at the 4000 level, must be chosen from the following: PHYS 2203, PHYS 2231, PHYS 2411, PHYS 3098, or any three credit hour PHYS or ASTR course numbered from 4100 to 4299.

The LSU School of Veterinary Medicine admitted its first students to the professional curriculum during the 1973-74 academic year. The original entering class consisted of 36 students, all residents of Louisiana. Class size has increased significantly in recent years.

The school participates in the Southern Regional Education Board's (SREB) program for education in veterinary medicine. Training contracts negotiated through SREB provide a limited number of entering spaces for qualified candidates from Arkansas. A limited number of entering spaces is also allocated for highly qualified nonresident applicants under the school's special admission policy.

The AVMA Council on Education (COE) is the national accrediting agency for veterinary medical education in the United States. The AVMA COE assures that minimum standards in veterinary medical education are met by all AVMA-accredited colleges or schools of veterinary medicine, and that students enrolled in those colleges or schools receive an education that will prepare them for entry-level positions in the profession. The LSU program has met all essential requirements for an acceptable college or school as established by the AVMA COE. Full accreditation was granted in 1977 and reaffirmed in 1984, 1991, 1998, 2005, 2010, and 2012.

The School of Veterinary Medicine offers the professional degree, Doctor of Veterinary Medicine. Interdepartmental Master of Science and Doctor of Philosophy degree programs in veterinary medical sciences are offered through the Graduate School.

The Professional DVM Program in Veterinary Medicine

Admission Requirements

Students contemplating a career in veterinary medicine should acquire a sound foundation in the biological and physical sciences and a general knowledge of the arts and humanities in both high school and college. In addition, they should be motivated by a

liking for animals, a sincere desire to serve the public, a propensity for the biological and medical sciences, and a deep interest in promotion of the health of animal and human populations. They must have a high aptitude for scientific study and must possess an excellent moral and ethical character.

Candidates for the Doctor of Veterinary Medicine degree must complete a minimum of six years of college education. This includes two or more years of pre-veterinary training and four years of professional training. The pre-veterinary requirements may be completed at LSU or any other accredited college or university offering courses of the quality and content of those prescribed in the *LSU General Catalog*. (See the section of this catalog titled "College of Agriculture" for the pre-veterinary medicine curriculum at LSU.)

The minimum requirement of 66 semester hours, including 20 hours of elective courses, may be completed in two years. Successful completion of a pre-veterinary program does not guarantee admission to the school for professional training. Currently, there are more qualified applicants each year than there are spaces available in the entering class. Instruction in the four-year program is available only through the School of Veterinary Medicine at LSU.

Scholastic achievement is measured by performance in the prescribed pre-professional courses. A minimum grade point average of 3.0 ("A" = 4.00) in these courses is required for consideration for admission. A grade of less than "C" in a required course is unacceptable. Physical education activity courses may not be used as electives for meeting pre-professional requirements. Requirements are not waived in lieu of work experience.

Credit earned through advanced standing is acceptable, but is not used in the computation of the grade point average. Evaluation of the applicant's record in the pre-professional program is made in accordance with LSU procedures. Credit is not granted for College Level Examination Program (CLEP) general examinations. Granting of credit for CLEP subject examinations may be considered in those subjects recommended by various departments of the university upon receipt of test scores indicating the student meets the minimum acceptable scores required by those departments.

Admission Procedures

The following information pertains only to the professional DVM program. Students interested in the MS and/or PhD programs should contact the LSU Graduate School for more information.

Admission to the School of Veterinary Medicine is granted only for the fall semester of each school year and only on a full-time basis. A prescribed number of student spaces is planned for each class and formal application material with all supporting credentials is required of each applicant. Students admitted and enrolled in the school must be capable of satisfactorily meeting all requirements of the curriculum in veterinary medicine. Eligible candidates are chosen to be interviewed by members of the Faculty Committee on Admissions and Scholastic Standing and are carefully selected to ensure that they are properly motivated, competent to undertake the rigorous courses of professional study, and capable of meeting the demands of a professional career.

The Faculty Committee on Admissions and Scholastic Standing is responsible for determining the application procedure and for selecting the entering class in the professional curriculum. All pre-professional requirements must be completed by the end of the spring semester before fall matriculation in the LSU School of Veterinary Medicine. Formal applications must be submitted no later than early October. (Please check the LSU SVM Admission website at www.vetmed.lsu.edu/admissions for the specific deadline date.) Applications must be submitted through the Veterinary Medical Colleges Application Service (VMCAS). Along with the VMCAS application materials, a supplemental application must be completed and submitted directly to the School of Veterinary Medicine's Admissions Office, as well as all official undergraduate/graduate transcripts, GRE scores, and letters of recommendation. Please visit the LSU SVM's Admission Office's website at www.vetmed.lsu.edu/admissions for more details on the application process. Students reapplying must submit a completely new application for each application period, including the VMCAS application, all official transcripts, GRE scores, supplemental applications, etc.

Academic and non-academic qualifications are considered in the selection process. Selection for admission is based on the sum of the objective and subjective scores. The exact combination of each component to the total score may vary slightly from year to year and is determined by the admissions committee and the dean.

- An objective score that comprises approximately 65 percent of the final calculation is determined by the GPA in all required courses (approximately 29 percent), the GPA in the last 45-60 hours (approximately 18 percent), and the score on the GRE (approximately 18 percent).

- A subjective score comprises approximately 35 percent of the final calculation and is determined by a review of the applicant's folder (approximately 15 percent), an interview (for Louisiana and Arkansas residents only – approximately 10 percent), and a holistic assessment by the admissions committee.

The objective evaluation is based on scholastic achievement and standardized test scores. Official transcripts of college course grades are examined to determine scholastic achievement. The total objective score is derived from the grade point average on required courses, the grade point average on the most recent 45-60 semester hours of course work, and the results of the GRE. New knowledge, especially in the sciences is accruing at a rapid rate, so if a student has completed the pre-professional requirements several years prior to application, records will be carefully scrutinized. It is advised that all required science courses should be completed within six calendar years immediately prior to application. Within the last six years, organic chemistry, at least one biology (preferably microbiology), and one general physics course must be completed.

In addition to the specific prerequisite courses, also factored into the Required Course GPA are any other animal science, physical science, or biological science courses that are taken and in which an "A" grade is earned. Social science, humanities, business, engineering, kinesiology, and any general education courses are NOT calculated into the required course GPA; however, these courses (with the exception of kinesiology courses) will still be used for the last 45 credit hours as seen below.

The subjective evaluation of applicants is based on non-academic qualifications considered relevant to the determination of the applicant's prospective performance in the veterinary medical curriculum and in the practice of veterinary medicine. Motivation, maturity, attitude, interest, and other characteristics will be evaluated for all qualified candidates, along with work experience, familiarity with animals, and reference information submitted in support of the application. These qualities are evaluated by two separate committees. The first committee reviews the supporting documents (autobiography, letters of recommendation, transcripts, work experience, and familiarity with animals). The second committee evaluates the individual through a personal interview. These appraisals result in an average subjective score which is added to the objective score to produce the total numerical evaluation of the candidate. Through this process, the professional judgment of several faculty members is included in arriving at a final decision of recommended students for the new class. Interviews are not granted to every Louisiana and Arkansas applicant, and only select out-of-state applicants will be invited to interview.

The final decision rests with the dean of the LSU School of Veterinary Medicine. The Faculty Committee on Admissions and Scholastic Standing makes their recommendations to the dean who then finalizes the offers of admission.

Under exceptional circumstances, a limited number of applicants not selected under the above criteria may be admitted. Factors to be considered by the Faculty Committee on Admissions & Scholastic Standing include undergraduate experience, GRE score, advanced academic work, work experience, or participation in special educational programs, as well as those special attributes possessed by the applicant that add to the cultural, educational, and/or geographical diversity of the entering class.

Please visit the School of Veterinary Medicine's Admission Office website at www.vetmed.lsu.edu/admissions for more information on admission requirements, residency, classifications, minimum prerequisites, admissions procedures, statistics, important dates and deadlines, and much more.

Minimum Prerequisites for Admission (66 sem. hrs.)

Pre-veterinary students are encouraged to familiarize themselves with admission requirements for the professional program at the School of Veterinary Medicine. Students should seek knowledgeable pre-veterinary counselors and/or advice from the LSU School of Veterinary Medicine's Admission Office (admissions@vetmed.lsu.edu) when enrolled in pre-professional programs other than at LSU. A minimum of 66 total semester hours is required for consideration for admission into the professional DVM program. This must include the 46 semester credit hours of the courses listed below. More specific details regarding course descriptions can be at the School of Veterinary Medicine Admissions website at www.vetmed.lsu.edu/admissions.

Biological Science, twelve sem. hrs. • Must include at least eight sem. hrs. (two-semester course sequence with laboratory) in introductory zoology or general biology at a level appropriate for premedical students. Must also include at least four sem. hrs. (one-semester course with laboratory) in microbiology at a level appropriate for pre-medical students. LSU courses–BIOL 1201, BIOL 1208, BIOL 1202, BIOL 1209, and BIOL 2051.

General Chemistry, eight sem. hrs. • Must include laboratory and must be at a level for science or engineering majors. LSU courses– CHEM 1201, CHEM 1202, CHEM 1212.

Organic Chemistry, three sem. hrs. • Must cover aliphatic and aromatic compounds with an emphasis on the biological aspects of organic chemistry. LSU course—CHEM 2060

Biochemistry, three sem. hrs. • Must include three sem. hrs. of basic concepts and an introduction to the nature and physiological uses of natural substances. LSU course—BIOL 2083.

Mathematics, five sem. hrs. • Must be at the college algebra/trigonometry level or higher. LSU courses—MATH 1021, MATH 1022. Students who qualify for more advanced math may substitute MATH 1023 (5 sem. hrs.) for MATH 1021 and MATH 1022.

Physics, six sem. hrs. • Must be at a level for science majors and must include mechanics, heat, sound, light, electricity, magnetism, and topics in modern physics. LSU courses—PHYS 2001, PHYS 2002.

English Composition, six sem. hrs. • Must include six sem. hrs. of English composition. LSU courses—ENGL 1001 and/or ENGL 2000.

Speech Communications, three sem. hrs. • Must include three sem. hrs. of a public speaking or interpersonal communication course. LSU courses—CMST 2010, CMST 2060, or CMST 1061.

LSU students in the College of Agriculture should contact his/her undergraduate academic advisor to ensure that the speech communication course taken meets the student's degree curriculum requirements.

In selecting the remaining required courses for admission to the professional program, applicants should consider the following:

- The objective of the DVM program is to offer a well-rounded curriculum in veterinary medical education enabling the graduate to select from a wide range of professional opportunities. The selection of elective courses in the pre-professional curriculum should reflect the interests and objectives of the candidate. Potential applicants should plan their programs with the recognition that these elective courses provide the only formal opportunity in the college years to obtain a broad general education.
- Applicants who have completed advanced preparatory courses in high school are, in all probability, qualified to complete the prerequisites in four semesters. These students are encouraged to take higher level university courses when so permitted. Applicants who are inadequately prepared may find it advantageous to complete the pre-veterinary requirements over a longer period.
- Although the primary objective of the applicant may be to complete the pre- veterinary requirements, those who have not previously obtained a baccalaureate degree are encouraged to plan for alternative career possibilities through a degree-granting program that has similar course requirements. Several LSU curricula include all of the minimum mandatory requirements.

Many other curricula that do not specify all of the requirements allow them as electives. Because not all applicants will gain admission to the School of Veterinary Medicine on the first attempt, they should continue in degree programs while making themselves more competitive in subsequent years. Some students may elect to complete a baccalaureate degree in order to pursue graduate training during the first and second summers of the professional program.

- Since applicants must take the GRE in the fall preceding application or earlier, those students following a four-semester program must complete this test only four weeks after beginning the sophomore year. Appropriate preparation and the selection of a curriculum that contributes to an acceptable score are strongly suggested.

Students who are enrolled at accredited institutions other than LSU must determine that courses taken conform in content and quality to descriptions contained in the latest issue of the *LSU General Catalog*. If there are any questions regarding equivalency of courses, please contact the School of Veterinary Medicine's Student Affairs Office by e-mail (svmadmissions@lsu.edu) or telephone (225-578-9537).

All requirements must be completed by the end of the spring semester of the year in which admission is sought. All application materials must be received by the appropriate deadlines. Application materials received after the given deadlines will not be accepted, and will result in the applicant being removed from consideration. Please visit the School of Veterinary Medicine's admissions website at www.vetmed.lsu.edu/admissions for application deadlines.

Information concerning LSU's pre-veterinary medicine program is contained in this *LSU General Catalog* or may be obtained from the dean of the College of Agriculture.

The Graduate Program in Veterinary Medicine

The School of Veterinary Medicine offers advanced studies in a variety of contemporary biomedical sciences leading to an MS or PhD degree (graduate academic programs) and specialized advanced professional training in one or more clinical specialties of veterinary medicine (graduate professional programs). Specific research training opportunities vary in each of the three departments and are summarized below by department. All aspects of the graduate academic program are in compliance with current regulations and requirements of the LSU Graduate School. The school's three departments have some additional distinct requirements. Graduate professional programs in some clinical sciences, pathology, and laboratory animal medicine may also require completion of a graduate degree.

Graduate Academic Programs

The graduate academic program in veterinary medical sciences offers both the MS and PhD degrees specializing in a variety of research areas, all requiring a thesis or dissertation.

All aspects of the graduate program in veterinary medical sciences (e.g., hours required, composition of graduate advisory committees, general and comprehensive final examinations, etc.) are in compliance with the current "General Graduate School Regulations" and "Requirements for Advanced Degrees."

Areas of Specialization

Graduate degrees (as indicated in parentheses) are offered by the School of Veterinary Medicine in its three departments. These include: the Department of Comparative Biomedical Sciences (MS, PhD), the Department of Pathobiological Sciences (MS, PhD), and the Department of Veterinary Clinical Sciences (MS, PhD).

Courses in the professional curriculum are designated as Veterinary Medicine (VMED) courses, rather than departmental courses, because of the integration of the disciplines. These courses, all at the 5000 level, are described in the School of Veterinary Medicine Bulletin. Prerequisite for enrollment in these courses is formal admission to the professional curriculum in the School of Veterinary Medicine. All courses must be taken in the proper sequence, as each is a prerequisite for the succeeding course. The following courses are utilized by all concentrations in the Veterinary Medical Sciences graduate program: VMED 7004, VMED 8000, VMED 8900, VMED 9000.

The General Education Component of Undergraduate Education

The general education of LSU students spans the four years of undergraduate study. In courses designated as general education, students begin a process of developing the University Learning Competencies that continue through their study in upper-level elective courses and courses in the major field of study.

Recognizing that the fundamental characteristics for effective participation in the marketplace and the community necessarily involve multidisciplinary study, each student designs a unique curriculum based on a major field of study and including 39 hours of general education courses across six areas of focus: English Composition, Analytical Reasoning, Arts, Humanities, Natural Sciences, and Social Sciences. In general education courses, students begin the development of the LSU Learning Outcomes, which are refined and focused in disciplinary courses taken during the junior and senior years, with the intention that all graduates, regardless of major, will develop a set of intellectual abilities, a degree of sophistication, and a civic-minded perspective that correspond to the high level of functionality represented in the outcomes taken as a whole.

University Learning Competencies

- An LSU graduate will demonstrate effective communication of complex knowledge and ideas through written, oral, visual, and technological media.
- An LSU graduate will demonstrate an understanding of historical, cultural, and philosophical complexity which supports sophisticated discourse.
- An LSU graduate will be able to conduct research-based inquiry, including articulation of complex disciplinary and interdisciplinary problems, effective evaluation and analysis of primary and secondary sources, and integration of relevant information into original discourse.
- An LSU graduate will be able to employ scientific and mathematical methods and technology in the resolution of laboratory and real-world problems.
- An LSU graduate will demonstrate an understanding of the factors associated with global interdependence, including economic, political, psychological, cultural, and linguistic forces.
- An LSU graduate will have the knowledge, skills, and disposition which attest to a commitment and ability to recognize and to participate in processes which improve the civic life of communities.

Area Breakdown of the 39 Credit Hours of General Education Coursework:

- English composition (six hours)
- Analytical reasoning (six hours)
- Arts (three hours)
- Humanities (nine hours)
- Natural sciences (nine hours)
- Social sciences (six hours)

Regulations

- Students must complete the 39-hour general education requirement *prior to graduating from LSU*. It is recommended that students complete the requirement during their first four semesters at the university.
- Only those courses on the approved list below may be used to satisfy the general education requirement.
- No more than six hours of credit taken through *distance learning courses* may be applied to a student's general education requirement.

- An entering student may receive *three or six hours of credit in English composition* on the basis of ACT scores and/or performance on approved placement tests.
- An entering student may receive credit for *one or more of the required mathematics courses* on the basis of placement test scores.
- *Advanced placement and advanced standing* credit may be used to satisfy the general education requirement.
- General education courses *will be graded on the "A," "B," "C," "D," "F" system*. No courses taken on a pass/fail basis will count toward the general education requirement.
- *Appeals for an exception to the general education requirements*: A "Request for an Exception to the General Education Requirement" must be submitted to the dean of the student's college using the appropriate form. Scheduling difficulties or allegations of poor advising typically do not constitute a reasonable basis for an appeal. The dean's evaluation as well as the student's request must then be submitted to the Office of Academic Affairs. A final decision will be made after consideration by the Faculty Senate Committee on General Education. Students are strongly encouraged to obtain a decision **prior** to registering for a LSU course intended to substitute for an approved general education course.

Transfer Course Approval

Deans are to determine the applicability of transfer courses to a component of LSU's general education requirements.

If the course is deemed to be applicable, and there is no equivalent LSU course, deans are asked to enter a course substitution on the Student Records and Registration database, indicating that the course is accepted for general education credit. Documentation concerning this decision should be kept on file in the college.

If it is determined that a course is equivalent to an LSU course, colleges should notify the Office of Enrollment Management so the Admissions Transfer Table can be updated.

If the college does not approve a transfer course for general education credit, the student may petition the Office of Academic Affairs for a decision.

Regents' Statewide Articulation

LSU participates in the Board of Regents' Statewide Articulation Consortium. Students who plan to transfer to another Louisiana public institution should consult the Office of Enrollment Management for information about the course transfer agreement.

General Education Courses

In the list of courses in the "***COURSE SEARCH**" section of this catalog, general education courses are designated within the course description.

In the list below, cross-listed courses are identified by information enclosed in parentheses.

- I. English Composition (6 Sem. Hrs.)
- II. Analytical Reasoning (6 Sem. Hrs.)
- III. Arts (3 Sem. Hrs.)
- IV. Humanities (9 Sem. Hrs.)
- V. Natural Sciences (9 Sem. Hrs.)
- VI. Social Sciences (6 Sem. Hrs.)

Departments, Schools, and Curricula

The graduate program descriptions below include, for each major field, a variety of subheadings—program overview, administration, degree programs, the graduate faculty (including research areas), and other information of interest to students and applicants. These pages represent departmental and interdepartmental programs in which formal degrees are offered. Also included are interdepartmental programs that do not offer degrees. In these programs, a student enrolls in one of the participating departments and earns his or her degree in that department, although his or her research is done through the interdepartmental program.

For additional information about any graduate program at LSU, please contact the appropriate department.

Introduction

This chapter contains information for individuals considering graduate study at Louisiana State University, as well as for enrolled students, faculty, and staff.

For prospective students: this chapter provides a guide to LSU's resources for graduate and professional study, the expertise of the graduate faculty, and other pertinent matters, including application procedures and criteria, graduate assistantships and fellowships, and degree requirements.

For enrolled students, faculty, and staff: this chapter serves as a handbook for graduate study at LSU. The rules and regulations of the Graduate School, as well as detailed descriptions of requirements for advanced degrees, are included.

This Graduate School chapter presents a flexible program of the current graduate educational plans, offerings, and requirements that may be altered from time to time to carry out the purposes and objectives of Louisiana State University. The provisions of this chapter do not constitute an offer for a contract that may be accepted by students through registration and enrollment in the university. The university reserves the right to change any provision, offering, or requirement at any time within the student's period of study at LSU.

Graduate Programs

Information on specific degree programs or areas of study is available directly from the department offering the degree. Further information is available online at www.gradschool.lsu.edu. A complete listing of all graduate programs, concentrations and minors is available [here](#).

LSU has developed flexible rules for the composition of advisory committees for master's and doctoral students, allowing students to work with professors from several departments. It is not possible to get a clear picture of the resources of the

university without looking beyond the formal boundaries of the graduate program to which one is applying or in which one is enrolled.

A complete listing of graduate course offerings may be found in the ****COURSE SEARCH**** section.

Since some graduate courses are offered in a two- or three-year rotation, persons interested in knowing the specific courses available in a given academic year should request lists of graduate course offerings directly from the departments in which they are interested.

Admission

Applicants must be admitted to both the Graduate School and to a specific graduate program. All prospective graduate students must complete the online application that can be found at www.lsu.edu/gradapply.

Concepts and Purpose

Doctoral research programs are the essential defining feature of a university. LSU's status as one of the top 70 research universities in the nation and its classification as Research-Extensive by the Carnegie Foundation, depend chiefly on two criteria held to be prime indicators that an institution is a major center for the creation of new knowledge: research funding and doctoral education, both of which ensure the training of future generations of scholars. The synergy between our nationally renowned faculty and our graduate student population helps to keep Louisiana and the nation on the leading edge of discovery.

The Graduate School's primary purposes are:

- Supporting a broad array of graduate degree programs and extensive research opportunities designed to attract, educate, and graduate highly qualified students;
- Supporting faculty who are excellent teacher-scholars, nationally competitive in research and creative activities, and who, with staff and students, contribute to solving economic, cultural, environmental, educational, and social challenges via development of new resources.

The Graduate School administers more than 120 graduate degree programs offered at LSU. LSU's Graduate School was established because the university recognized its obligation to provide an environment for research and inquiry and to make the results of these activities available to the public.

As the state's center of academic research and advanced studies, the Graduate School administers a more extensive and comprehensive program than any other educational institution in Louisiana.

LSU offers doctoral programs in 50 major fields of study. These programs offer opportunities for advanced training and research in all areas of the sciences, social sciences, and humanities. Master's degree programs are offered in 74 major fields. These range from Master of Fine Arts degrees in creative writing, studio art, and theatre, to professional degree programs in social work, business administration, and library and information science.

Additional information about specific graduate and professional programs is published in catalogs and brochures that may be obtained from individual departments or schools at the addresses listed in this chapter. This information may also be accessed online through the LSU homepage: www.lsu.edu.

History and Organization

The first awarded graduate degree on record was a master's degree in civil engineering awarded in 1869. By 1890, 14 master's degrees had been awarded, and by 1909, 32 individuals had received graduate diplomas. In 1909, the Graduate Department was established; the general supervision of graduate work was vested in a Committee on Graduate Courses. During the period from 1909 to 1931, 439 master's degrees were awarded.

In 1931, the Graduate School was established, and the first graduate dean, Charles W. Pipkin, was appointed. The former Committee on Graduate Studies was reorganized into a Graduate Council. Doctoral programs were also established in 1931, and the first doctorate was awarded in 1935. From 1931 through spring 2013, 10,285 Doctor of Philosophy degrees, 589 doctorates

other than Doctor of Philosophy degrees, and 51,642 master's degrees were awarded. The total number of advanced degrees awarded by LSU thus reached 62,516.

The Graduate School is administered by the graduate dean, in consultation with the Graduate Council. This council is composed of the dean of the Graduate School, who serves as ex-officio member, and 16 faculty members appointed for rotating terms of five years each by the graduate dean with the concurrence of the provost. The council considers proposals for new degree programs, recommends graduate faculty membership classifications, and recommends changes in Graduate School policy.

Admission to Graduate Study

Admission to the Graduate School is awarded on the basis of evidence of academic achievement and promise. Applications of students who meet the Graduate School requirements are forwarded to the appropriate academic units for final approval.

Certain programs require higher admission standards than those of the Graduate School. Due to the high demand for many graduate programs, meeting the minimum requirements of the Graduate School does not guarantee admission into a particular program.

General Information

Applicants meeting the following requirements are eligible for regular admission to the Graduate School. Applicants failing to meet all requirements may be granted probationary admission, provided other substantial evidence of capacity to do satisfactory graduate work—including outstanding performance in post baccalaureate and/or graduate work, high Graduate Record Examination (GRE) scores (or Graduate Management Admission Test (GMAT) scores, where appropriate), and other outstanding achievement—is presented.

Applicants with unsatisfactory undergraduate records who have completed a minimum of nine hours of graded graduate coursework with at least a 3.33 graduate grade point average (GPA) ("A" = 4.0) in a graduate program and who have acceptable GRE scores (GMAT, where applicable) will be considered for admission.

Applicants who appear admissible on the basis of unofficial and/or incomplete transcripts of previous work or unofficial test scores, but who are unable to supply the required records prior to registration, may be granted provisional admission. Subsequent enrollment will not be permitted until all provisions are met. Provisional admission does not guarantee subsequent regular admission to the Graduate School.

Admission to a Degree Program

Regular Admission

Regular admission is awarded to applicants who intend to pursue a degree and meet the following requirements:

- A bachelor's degree from an accredited U.S. institution or the equivalent from a foreign institution.
- A grade point average of at least 3.00 ("A" = 4.0) on all undergraduate work (or last half-degree requirement) and a 3.00 GPA or better on any graduate work already completed. International applicants must have at least a 3.00 GPA, or equivalent, on all college-level work attempted.
- Acceptable GRE scores (in some cases, a high GRE may be used to compensate for a low GPA). An acceptable GMAT score is required for graduate programs in the E.J. Ourso College of Business, except for the MS and PhD in economics. The MPA program and the Information Systems & Decision Sciences program will accept either the GRE or the GMAT.
- Certain professional master's programs allow work experience to be substituted for either the GRE or GMAT. Please contact the department to which you intend to apply to determine their requirements for admission to the master's degree.
- Acceptance by the graduate faculty in the applicant's area of study. Applicants who are narrowly trained or who have taken a significant amount of work on a pass-fail basis or in ungraded courses may be required to submit scores on GRE Subject

(Advanced) Tests before their applications can be considered. Consult individual departments for additional admission requirements.

Probationary Admission

Applicants who fail to meet one or more of the requirements for regular admission may be admitted on probation, provided additional evidence of capacity to do satisfactory work is presented. Such evidence might include superior performance in a substantial amount of post baccalaureate work, high GRE scores (GMAT scores, when appropriate), and other achievements.

Students entering on probation will remain on probation until the completion of nine hours of graduate-level, graded courses ("A," "B," and "C" only) with at least a 3.00 average. Part-time students entering on probation and registering for fewer than nine hours may be dropped from the Graduate School if their GPA is less than 3.00 during any semester in which they are registered.

Students admitted on probation may not be appointed to assistantships or fellowships until they attain good academic standing. (See PS-21 for additional information.)

Provisional Admission

Provisional admission may be considered for applicants who appear to be admissible on the basis of the credentials submitted, but who are unable to supply all of the required official records prior to registration. Students admitted provisionally must submit complete and satisfactory records within 60 days (45 days in summer term) after the first day of class for the semester in which graduate study begins. If these credentials are not received by the date specified, or if they prove to be unsatisfactory, students will not be permitted to register for the following semester. Provisional admission does not guarantee subsequent regular admission.

Admission of International Students

Applicants who have completed degree requirements outside the U.S. must present all of the following:

- A complete and accurate chronological outline of all previous college-level education.
- Authorized school or university records—transcripts, marksheets, certificates of degrees—showing all courses taken and all grades received (with certified translations if the records are in a language other than English).
- A bachelor's degree or its equivalent, with a grade point average equivalent to a "B" or better on all previous undergraduate work (or last half-degree requirement) from an accredited college or university.
- Verification of the availability of sufficient funds to meet all costs while studying at LSU as an F-1 student before the I-20 Certificate of Eligibility will be processed. For the current list of estimated expenses for international students, please visit International Services' website [here](#).
- GRE Test scores (GMAT where appropriate).
- A satisfactory score on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the Pearson's Test of English (PTE).

English Proficiency

An applicant whose native language is not English and/or who has been educated outside of the U.S. in a country or province where English is not the only official language must demonstrate proof of English proficiency by submitting either a TOEFL, an IELTS, or PTE score before the application is evaluated for admission.

TOEFL:

On the TOEFL (Test of English as a Foreign Language), the following minimum scores are required for admission:

- 550 (paper-based exam)

- 79 (internet-based exam)

Information regarding TOEFL may be obtained by visiting the official website at www.toefl.org

IELTS:

On the IELTS (International English Language Testing Service), the following minimum score is required for admission:

- 6.5

Information about IELTS may be found at www.ielts.org. IELTS is jointly owned by the British Council, IDP: IELTS Australia, and the University of Cambridge ESOL Examinations. Official TOEFL/IELTS scores are those reported directly to LSU by the respective testing service at the request of the student.

PTE:

On the PTE (Pearson's Test of English), the following minimum score is required for admission:

- 59

Applicants may be exempt from the TOEFL/IELTS/PTE requirement if they have completed one of the following:

- A bachelor's degree earned from an accredited U.S. institution;
- A college-level degree showing the completion of post-secondary education in a country where English is the primary official language.

Official transcripts or scores are required showing completion of one of the above before a student can be exempted from the TOEFL/ IELTS/PTE requirement. The Office of Graduate Student Services reserves the right to require a satisfactory TOEFL/IELTS/PTE score from any applicant. All international students who are admitted will be required to take an English placement test prior to registration.

Application deadlines for international students are the same as for all other applicants; however, because transcripts from foreign universities require special evaluation, prospective international students should begin the application process at least nine to twelve months prior to the semester in which they plan to enroll. Applications received after the deadline dates will be processed for the following semester or summer term. When sufficient scholastic records and acceptable evidence of English proficiency are not received early enough to determine admissibility for the semester for which application is made, consideration for a subsequent semester will be made only upon the applicant's written request.

Upon arrival on campus and before registration, international applicants (except citizens of Canada, Australia, New Zealand, Ireland, the United Kingdom, certain Caribbean islands, and Belize) who have been admitted to the Graduate School must take the LSU Comprehensive English Language Test, consisting of the Michigan Test and a writing sample. Students with teaching duties whose tests indicate a deficiency in English will be required to register for appropriate English composition courses with a reduced load of graduate courses.

All international graduate students awarded graduate teaching assistantships must demonstrate proficiency in English. Any international graduate assistant who has not received a favorable recommendation from this speech course may not teach in any capacity.

An international applicant who has completed an undergraduate degree at an accredited U.S. institution must meet regular admission requirements. Before the applicant can be considered, the Graduate School must receive a satisfactory GRE or GMAT score. An international applicant will not be admitted until this information has been received.

Application Procedures

The application for admission to the Graduate School is accessed at www.lsu.edu/gradapply. Only online applications may be submitted to the Graduate School. Submission of the application fee requires a credit or debit card. The application fee is \$50US for U.S. citizens and permanent residents and \$70US for all other applicants.

A late fee of \$25US is assessed if the application is submitted after the following dates: May 1 for spring intersession, July 15 for summer intersession, May 15 for the fall semester, October 15 for the spring semester, December 1 for winter intersession, and May 15 for the summer term. International applications received after these dates will be processed for the following semester and no late fee will be assessed. Fall applications should be received before the January 1 priority date in order to receive full consideration for assistantships, fellowships, or scholarships for which the applicant has applied.

International applicants are encouraged to determine course availability before applying for summer entry, and they are further encouraged to apply at least nine months in advance of their intended semester of enrollment. Applicants for graduate admission are responsible for the following:

- Online Application:
- The completed online *Application for Admission to Graduate Degree Program* (www.lsu.edu/gradapply).
- The required application fee and any applicable late fee.
- Submitting the following items to the Graduate School:
 - One set of official transcripts of all previous college or university work from each institution attended. An official transcript bears the official seal of the issuing school. Photocopies, facsimiles, or transcripts marked "issued to student" are not official. Transfer credit posted on the records of other institutions is not accepted in lieu of transcripts from the original institution(s). If the college or university will supply an official transcript in a sealed and signed envelope, the student should obtain the transcript in this manner and submit it unopened. If the college or university will not send official transcripts to a student, please request that a transcript be sent to: LSU Office of Graduate Student Services, 114 David Boyd Hall, Baton Rouge, LA 70803. Transcripts from the LSU main campus need not be submitted.
 - A satisfactory score on the verbal and quantitative portion of the Graduate Record Examination (GRE). LSU's code for GRE reporting is R6373-5. Test information may be obtained from the Graduate School at LSU; graduate schools at most colleges and universities; or by writing to Educational Testing Service, P.O. Box 6000, Princeton, New Jersey 08541-6000. Allow at least six weeks for examination results to reach LSU.
 - Applicants to the Master of Fine Arts program in studio art and theatre, Master of Music, and programs in business administration are not required to submit GRE scores. Applicants for the Master of Fine Arts in creative writing are required to submit GRE scores. Applicants to the Master of Fine Arts program in theatre (specialization in Scenic Technology and Design) are required to submit GRE Scores. Applicants to all other Master of Fine Arts programs in theatre are not required to submit GRE scores.
 - The Graduate Management Admission Test (GMAT) is required of applicants for all degrees in the E.J. Ourso College of Business, except for the MS and PhD with a major in economics which require the GRE. The Department of Information Systems & Decision Sciences and the MPA program will accept either the GRE or GMAT score. Application procedures for the GMAT are the same as described above. This examination may be taken at LSU. The LSU code for GMAT score reporting is R6373-5.
 - Certain professional Master's programs allow work experience to be substituted for either the GRE or GMAT. Please contact the department to which you intend to apply to determine their requirements for admission to the master's degree.
- International applicants should also submit:
 - degree statements and an official English translation of each foreign document
 - financial statement

- a satisfactory score on either the TOEFL, IELTS, or PTE
- Three letters of recommendation; these letters may be submitted electronically through the online application.
- Many departments have other specific departmental admission requirements. For specific information, consult the individual departments.

Admission is for the semester requested. Those admitted who do not register must make a written request to be reconsidered for admission for a subsequent semester. Request for a delay of admission will only be considered for two subsequent semesters from the original application semester (intersessions excluded). A new application is required for a delay of more than two semesters from the original semester of application (summer included).

Non-degree Admission

A student who holds a baccalaureate degree but who does not desire to enroll in a degree program in the Graduate School may enroll as a graduate non-matriculating student. Coursework is taken for academic credit, and all rules and regulations for graduate students apply. A student in this category must register for at least one course numbered 4000 or above each semester to maintain graduate status. Courses numbered below 4000 may be taken concurrently with graduate coursework.

Enrollment in courses numbered 6000 and above is limited to a total of six semester hours for graduate students in this classification. However, an unlimited number of courses numbered 5999 and below may be taken.

No more than 12 hours of graduate credit taken as a non-matriculating student may be applied toward the requirement for a master's degree.

No more than 12 hours of combined credit transferred from other schools and earned as an LSU extension or non-matriculating student may be applied toward a master's degree at LSU. (See "Transfer of Credit".)

Students wishing to enroll only in courses numbered below 4000 should apply for undergraduate admission through the Office of Enrollment Management, 1146 Pleasant Hall. Students classified as extension students are ineligible to enroll in on-campus courses. Applications for graduate non-degree admission may be completed by accessing the online application at www.lsu.edu/gradapply. Students applying for graduate non-degree admission must submit one official transcript from the highest degree-granting institution and from each institution where graduate credit was earned or attempted. Transcripts must indicate that the applicant has a 2.50 or better GPA on all undergraduate work completed and a 3.00 or better GPA on all graduate work completed. Transcripts should be mailed directly to the LSU Office of Graduate Student Services, 114 David Boyd Hall, Baton Rouge, LA 70803. In addition, a TOEFL score of at least 550 on the paper-based test or 79 on the Internet-based test, an IELTS score of at least 6.5, or a PTE score of at least 59 must be received before an international student's application is evaluated for admission. Applicants from Canada, Australia, New Zealand, Ireland, certain Caribbean islands, Belize, and the United Kingdom are exempt from the TOEFL, IELTS, or PTE requirement. International students who have received a degree from an accredited institution in the U.S., Canada, Australia, New Zealand, Ireland, certain Caribbean islands, or the United Kingdom are also exempt from taking the TOEFL, IELTS, or PTE. A nonrefundable application fee must be submitted with the application. The application fee is \$50US for U.S. citizens and permanent residents and \$70US for all other applications.

Students not regularly admitted to the university may attend classes as auditors, provided they meet all previously mentioned requirements for admission, have written permission from the individual course instructor(s) and the graduate dean, and have made the necessary arrangements and paid the required fees. Prospective auditors should initiate registration by obtaining an "Audit Only" form from the Office of the University Registrar.

Regularly enrolled graduate students may also audit courses with consent of the individual instructor(s). Auditors will not receive degree credit and will not be permitted to take a credit examination on audited coursework. However, previously audited courses may be taken for credit. Audited courses do not count in total course loads and are not recorded on official transcripts.

Readmission

Readmission to Original Program

Previously enrolled graduate students who fail to enroll for three or more consecutive semesters (summer term included) must reapply to the Graduate School. Applications for re-entry will be subject to reevaluation under current admission criteria; readmission is not guaranteed.

Official transcripts must be submitted if work has been taken at another institution since the student was last enrolled at LSU. The application deadlines for admission also apply for readmission, as do application fees and late fees.

Readmission with a Change of Program

A student wishing to pursue a degree or program other than the one originally sought and who has not enrolled for three or more semesters (including summer terms) must complete application procedures as described above and comply with the requirements for the new program. Acceptance into one program does not guarantee admission into another. The admission decision ultimately rests with the admission committee of the department or interdepartmental program concerned.

Decisions

All official notifications regarding admission to the Graduate School are conveyed to the student through the online application site. Students must log in to their application to view their admission status.

Graduate Fees & Financial Aid

Graduate student expenses, other than those explained below, will vary with the individual. The Board of Supervisors may change fees and costs for dining plans and housing at any time and without advance notice. Students should check the Office of Budget and Planning's Website at www.bgtplan.lsu.edu.

The following discussion of fees, required minimum registration, and related matters covers items that apply only to graduate students and for which graduate students and undergraduates are treated differently. For all other fees (vehicle registration, audit, student insurance, the Student Health Center, and the like), see "Undergraduate Fees and Expenses".

Graduate Fees

Included in university fees for full-time graduate students are subscriptions to the *Daily Reveille* campus newspaper and *Legacy* student magazine; a copy of the *Gumbo* student yearbook; an allocation to Student Government; admission to various athletic events in the spring semester; membership in the LSU Student Union; and reduced golf green fees at the LSU Golf Course.

Student allocations included in university fees are a campus transit fee, a Student Recreational Sports Complex fee, a fee for "The Phone," a KLSU radio fee, and an LSU Tiger TV fee. Additionally, university fees include a nonrefundable registration fee and a Student Health Center fee.

Application Fees

All applications for graduate admission must be paid when completing the online application process. Additional nonrefundable late fees, where applicable, are assessed for all applications received after the published deadlines for a given semester.

The late application fee also applies to applications for readmission submitted after the established deadline dates. International applicants should consult the section "Admission of International Students" for additional information.

Minimum Graduate Student Registration

Graduate students engaged in the writing of theses or dissertations are expected to register for research hours commensurate with the amount of university resources—faculty time, equipment, library facilities, and/or office space—to be used that semester. Out-of-town students are also expected to register for research hours if they are receiving any faculty advice or direction.

In addition, doctoral candidates must maintain continuous registration for a minimum of three semester hours of credit each regular semester (excluding summers) from the completion of the general examination to the end of the semester in which an approved dissertation is submitted to the Graduate School. Students must be registered for a minimum of one to three semester

hours of credit during any semester in which they are taking master's or doctoral examinations, including the qualifying examinations required by some departments.

"Degree Only" Registration

Students, who have completed all degree requirements, including final examinations taken in a previous semester, may register for "degree only" and pay only the graduation fee. "Degree only" registration is only allowed for students whose theses or dissertations are submitted to the Graduate School on or before the last day to add courses for credit. Non-thesis students may also register "degree only," provided all degree requirements are met in a previous semester. Degree Only registration must be completed by close of business on the last date to add classes for the semester of graduation.

Audit Fees

Fees for auditing courses are in accordance with the regular semester and summer term fees. Fees for students enrolling for combined credit and audit work will be assessed in accordance with total hours scheduled.

Residency Status for Tuition Purposes

Eligibility for classification as a Louisiana resident is determined by the Graduate School in accordance with university regulations and is based on evidence provided on the application for admission and related documents. Regulations relate primarily to location of the permanent home and place of employment.

A student classified as a resident is one who has abandoned all prior domiciles and has been domiciled in the state of Louisiana continuously for at least one full year (365 days) immediately preceding the first day of classes of the term for which classification as a resident is sought. Physical presence within the state solely for educational purposes without substantial evidence of the intent to remain in Louisiana will not be sufficient for resident classification, regardless of the length of time within the state. Further detailed information is available in PM 31 and on the Graduate School website.

Graduation Fees

- Master's degree fee—\$35; processing fee, \$20
- Doctoral degree fee—\$55; processing fee, \$35
- Doctor of Veterinary Medicine degree fee, \$40
- Duplicate diploma fee—\$20 (charged if a diploma is ordered and student does not graduate at that commencement)
- Replacement diploma fee—\$30

Special Research Fees

- For specially planned research programs arranged through the Office of International Programs, departmental research fees are applicable and vary with the individual program.
- For students in the School of Social Work, an internship fee of \$100 per course is assessed. The fee(s) must be paid by all students enrolled in SW 7008, SW 7502, and SW 7503.
- For students in the School of Veterinary Medicine, a microscope fee of \$40 per semester is assessed to each student in Years I and II of the professional curriculum. Regularly admitted students are not assessed fees in the summer (regardless of the elective blocks taken in Year III and IV). Regularly admitted students accepted from contract states pay the same fees as Louisiana residents, with respective states paying an additional increment as specified by contract.

Tuition and Required Fees

Tuition and required fees are subject to change. For current figures, please visit the website of the Office of Budget and Planning. For information about room rent, dining plans, refunds, and other special fees, see *"Undergraduate Fees and Expenses"*.

Financial Aid

The university offers financial assistance to graduate students through a variety of programs, including fellowships, assistantships, internships, student jobs, and loans. Since these programs are administered by separate offices, a student interested in applying should contact the appropriate office for more detailed information.

Students should work with their financial aid officer to carefully study the impact of any employment or award on their eligibility for student loans.

Fellowships and Scholarships

The Graduate School offers a number of fellowships and scholarships to exceptional students. Most students can expect to receive some type of aid throughout their graduate careers. In some cases, recipients are required to have completed a minimum amount of graduate work prior to receiving an award. All such assistance is awarded on the basis of the individual's academic achievements. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate Enrichment Funds • Superior graduate students awarded departmental assistantships and fellowships in selected departments may receive a monetary enhancement to their departmental assistantship or fellowship. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate School Dissertation Fellowships • Dissertation fellowships are available to exceptional doctoral students who will begin their final year of study. A maximum one-year (9 month) stipend of \$18,000 is awarded. Resident and nonresident tuition are exempted. The recipient will be responsible for paying the required university fees.

Applicants must be able to demonstrate that there is a high probability for completion of the dissertation during the fellowship year. Dissertation fellowships are available only to full-time students. For information on application procedures that entail departmental nomination each spring for the following fiscal year, please visit the Financial Assistance section of the Graduate School web page. Interested students should contact the graduate advisor of the department in which they plan to study.

Board of Regents Graduate Fellowship Program (PhD and MFA) • The Louisiana Educational Quality Support Fund provides Board of Regents Graduate Fellowships for exceptionally qualified graduate students in selected professional programs. These awards range from \$14,000 to \$30,000+ per year for up to four years. Resident and nonresident tuition are exempted. Recipients are responsible for paying required university fees. Academic departments eligible for these awards vary from year to year. Most major areas award these fellowships annually, including humanities, social sciences, basic sciences, arts, design, education, agriculture, and engineering.

Applications must be submitted to the candidate's department and must include scores on the verbal and quantitative portions of the Graduate Record Examination (or GMAT scores if appropriate), an official transcript of all grade point averages on all college work, a one-page narrative of educational goals, and three letters of recommendation. Interested students should contact the graduate advisor of the department in which they plan to study.

Graduate School Tuition Awards • The graduate dean may award up to 200 tuition exemptions to incoming graduate students from underrepresented groups. These tuition awards provide for an exemption from either the resident fee or both the resident and nonresident fees for up to two years. Recipients are responsible for paying required university fees. Preference will be given to African Americans and students from Latin American countries. Students must be regularly admitted to a graduate program at LSU and be nominated by their department. Interested students should contact the graduate advisor of the department in which they plan to study.

Assistantships

More than 2,000 teaching, research, and service assistantships are awarded annually. All communication regarding graduate assistantships should be directed to the chair of the appropriate department. Applications and supporting credentials are accepted at all times, but priority for graduate assistantships beginning in the fall semester is given to applicants who submit their materials by early January. Students who accept assistantships before April 15 may be free to resign in order to accept another offer up to that date. An acceptance given or left in force after April 15 is a commitment not to accept another appointment without first obtaining formal release from the prior commitment.

A graduate assistantship is intended to be supportive of the student's educational experience by relating to the graduate program in which the student is enrolled. Proposed appointment to duties unrelated to the student's major program must have the concurrence of the student's major department prior to approval by the Graduate School.

Eligibility Requirements • Graduate students with acceptable academic records may be appointed to graduate assistantships. A student admitted on probation may not be appointed to a graduate assistantship until he or she achieves good standing. A graduate student placed on academic probation by the Graduate School for failing to make satisfactory progress may not be appointed or reappointed to a graduate assistantship unless the student's cumulative/semester grade point average is at least 3.00.

Details and additional information regarding eligibility for a graduate assistantship may be found in PS-21—available online, in the appendices of this chapter, from the Graduate School, and in departmental offices.

Stipends • Graduate assistant stipend levels vary widely depending on the department and assigned duties. Assigned duties may include research, teaching, and/or service. Graduate assistantship appointments may also be for one-third or one-quarter time, with an appropriate adjustment in the stipend. Appointments for more than one-half time require special justification. Although most appointments are made on an academic-year basis, assistantships are available in certain departments during the summer months, with an appropriate adjustment in the stipend. Fiscal year appointments are also available.

Federal Financial Aid Programs

Please see the section entitled "Financial Aid and Scholarships" in this General Catalog.

Graduate School Regulations

The following discussion of general Graduate School regulations should be read in conjunction with "Requirements for Advanced Degrees." Regulations common to graduate and undergraduate students (the Code of Conduct, grade appeals, etc.) are covered in "Regulations."

Graduate School requirements are minimal, and in many cases, are exceeded by those of individual departments. Statements of specific departmental requirements for degrees are included in the departmental section of this chapter. Most departments also have brochures describing their programs and requirements in detail.

Graduate Student Classification

In order to be classified as a graduate student and to be considered full-time, students must maintain registration in a minimum of 9 semester hours in the fall or spring semester (with a minimum of six hours of graduate credit coursework), or a minimum of 6 semester hours in a summer term or online module (with a minimum of 3 hours of graduate credit coursework). At least one half of the registered credit for part-time graduate students must be in graduate credit coursework.

Program Change

Graduate students must assume full responsibility for knowledge of Graduate School policies and departmental requirements concerning their individual degree programs. Advances in knowledge and changes in methodology at times require alterations in degree programs. Therefore, graduate students should be aware of the current regulations and requirements of the Graduate School and of their departments at all times. Current regulations and requirements take precedence over any previously promulgated policies.

Between *LSU General Catalog* issues, notices of changes will be available from the Graduate School and from each department.

Graduate Credit

A student may receive graduate credit only for courses taught by members of the graduate faculty or other persons approved in advance by the dean of the Graduate School. Except as noted, a student may receive graduate credit only for work taken while officially enrolled as a graduate student.

Any student dropped from a graduate program because of unsatisfactory performance will not be permitted to take courses for credit toward a graduate degree beyond the semester in which the student is dropped.

Graduate students may not take credit examinations in graduate-level courses.

Graduate Credit in Law

Students registered in the Graduate School may receive graduate credit for certain courses offered by the Hebert Law Center if the courses have been approved in advance by the Hebert Law Center and the dean of the Graduate School. Students should

submit a written petition to the Graduate School for such approval. They must obtain permission from the vice chancellor of the Paul M. Hebert Law Center in order to register for these courses.

Dual Degree Programs

Students interested in these programs are encouraged to visit the individual program sites.

- JD/CL-MBA
- JD/CL-MMC
- JD/CL-MPA
- JD/CL-MS in Finance

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/CL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the websites listed above.

Students successfully completing one of the programs listed above will receive two degrees, a JD/CL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Transfer of Credit

Hours transferred may not exceed one-half of the total semester hours of graduate coursework (thesis hours excepted) required for the student's degree program. For example, a maximum of 12 hours may be transferred in a master's program requiring 24 hours of coursework.

A maximum of 12 semester hours of credit earned as an LSU extension or non-matriculating student may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. This includes a maximum of six hours at the 6000-level and above for LSU extension or non-matriculating credit.

A maximum of 12 hours of transfer credit from other schools may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. Only six hours applied toward a previous master's degree may be applied toward a second master's degree (see "Second Master's Degree").

To petition for acceptance of these credits, the student must be currently enrolled, must have completed at least nine hours of graduate coursework in a degree program at LSU, and must be in good academic standing.

Transfer credit from other accredited schools must have been earned for graduate credit. This course work must be judged appropriate to the student's program by the graduate faculty of the major department, must have been taught by a professor whose credentials are comparable to those of graduate faculty at LSU, and must, in terms of time invested, be comparable to graduate courses at LSU. Transfer work may not be used to fulfill the master's program requirement that at least one-half of the minimum required credit be in courses at or above the 7000-level.

No more than 12 hours of combined credit transferred from other schools and earned as an LSU extension or nonmatriculating student may be applied toward a master's degree at LSU. Credit earned as an LSU extension or nonmatriculating student or transferred from another institution must be for coursework in which the student earned a grade of "A" or "B." Courses in which a grade of "C" was earned will not be accepted for transfer into a master's degree program.

Transfer work must have been completed within five years of the time the student is eligible to petition. Once transfer credit is approved, it is valid as long as the master's degree is completed within the five-year time limit or the transfer work is within five years of degree completion.

Graduate work transferred from other institutions may be applied toward degree requirements, but the grades earned will not be computed in the LSU graduate average nor will transfer work appear on the official transcript. Graduate course work taken at other campuses within the LSU System is not considered transfer credit, and any number of hours may be applied toward a degree if approved by the chair of the student's department on this campus.

Graduate Credit for LSU Seniors

Refer here within the chapter, "Courses of Instruction," in this catalog for additional information on enrollment for undergraduate credit in the 4000- or 7000-level courses.

Correspondence Study

No graduate credit is allowed for work done by correspondence study at this or any other university.

Eligibility of Faculty and Staff for Graduate Degrees

LSU System regulations govern LSU employees' eligibility to work toward graduate degrees. A faculty member above the rank of instructor may not work toward a graduate degree at this university. Other employees who, in the opinion of the Graduate Council, are of equivalent status may not work toward graduate degrees. Non-faculty, professional staff, and/or administrators may pursue master's degrees; only those who do not hold positions where there is a potential conflict of interest will be permitted to pursue doctoral degrees.

If an employee serving as a professional staff member and/or administrator wishes to pursue a doctoral degree, the employee, his or her immediate supervisor, and the chair of the department in which he or she wishes to pursue the degree must submit to the dean of the Graduate School statements outlining the employee's job responsibilities and providing an analysis of the independence of the employee's official duties from the department in which doctoral work is to be taken. The Graduate Council will review these statements and make a recommendation through official channels to the chancellor.

Grades

Graduate Grading System

Grades in the Graduate School have the following meanings:

- Marks carrying advanced degree credit are "A," "B," "C" (up to, but no more than six hours); "S" (satisfactory); and "P" (pass).
- Marks carrying no credit for advanced degrees are "D" (poor), "F" (fail), "I" (incomplete), "W" (withdrawn), "U" (unsatisfactory), and "NC" (no credit).
- Cumulative grade point average is the average based only on graduate work graded "A," "B," "C," "D," and "F" ("A" = 4, "B" = 3, "C" = 2, "D" = 1, "F" = 0).
- Semester grade point average is the average based on graduate and undergraduate work graded "A," "B," "C," "D," and "F."

"I" Grade: An "I" grade indicates that course performance was satisfactory, but because of circumstances beyond the student's control, all requirements were not met. Authorization from the dean of the Graduate School is not required to assign an "I" grade to a graduate student.

An "I" grade should never be given to enable a student to do additional work to bring up a deficient grade. A task should not be assigned to a class that will take longer than a semester to complete, thus causing everyone in the class to get an "I" grade. An "I" grade may not be given for a course taken in the semester in which the student graduates if that course is listed on the application for degree or if changing the "I" grade to an "F" would result in the student's cumulative average being less than 3.00. An "I" grade should never be assigned for thesis/dissertation research. "S" (satisfactory) and "U" (unsatisfactory) grades are given for thesis (8000) and dissertation (9000) research courses up to and including the semester the student graduates.

An "I" grade is valid only until the final day of classes in the next regular semester (fall or spring), whether or not the student is enrolled. "I" grades received in the spring semester or the summer term are valid until the end of classes in the fall semester. "I"

grades received in the fall semester are valid until the final day of classes in the spring semester. There will be no extension of time. Responsibility for changing an "I" grade lies both with the student and the faculty member concerned. The faculty member's failure to submit a "Grade Correction Report" to change the "I" grade by the final day of class for the next regular semester will result in the "I" grade becoming a permanent "F" grade.

Unusual circumstances that preclude a student from completion of course requirements may—at the discretion of the dean of the Graduate School—permit assignment of a permanent "I" grade.

Unusual circumstances might include, but would not be limited to, withdrawal of the student from the university because of prolonged medical problems, or death or resignation of the faculty member concerned, and the absence of another faculty member to supervise the unfinished work. The student must initiate the petition for a permanent "I" grade. This petition must be accompanied by a letter of justification from the faculty member concerned, if possible. The petition must also be endorsed by the chair of the student's department before it is submitted to the dean of the Graduate School.

"W" grade: A "W" grade indicates that a course has been dropped between the dates specified on the academic calendar. In extraordinary cases, the dean of the Graduate School may authorize a resignation and/or course drop after the last date specified.

The policies and procedures of the university governing grade appeals are described in the section concerning university regulations.

Pass-Fail Option

With approval of the student's major professor, department chair, instructor of the course involved, and the dean of the Graduate School, a graduate student may register on a pass-fail basis for courses not included in the major or minor requirements. The deadline for changing from pass-fail grading to letter grading, or vice versa, is the last day for adding courses for credit.

If the student's major department agrees, graduate courses passed with a grade of "P" may be offered for degree credit, but the grade will not be considered in computing the grade point average. For graduate-credit courses, a grade of "P" will be assigned only if the work is of at least "B" quality. A grade of "F" in a pass-fail course will be treated as any other "F." Some departments have designated certain research and seminar courses to be taught on a pass-fail basis. All students enrolled in these courses will be graded in this manner.

Grade Requirements

Good Standing: Graduate students are considered to be in good academic standing, (making satisfactory academic progress), if they maintain a 3.00 cumulative grade point average on all graduate course work taken within the LSU System and a 3.00 semester average on all coursework (undergraduate and graduate), and earn a grade of "S" in research.

Probation and Dismissal: A student whose cumulative LSU average is below 3.00 will be placed on probation, except that a student whose cumulative average is as low as 2.75 may be dropped from the Graduate School without having a probationary period. For these purposes, a summer term is counted the same as a regular semester. A student already on probation whose cumulative average is below 3.00 will be dropped from The Graduate School. A student receiving a "U" grade in research will be placed on probation. A student receiving a second "U" in research may be dropped from the Graduate School. Rules governing students admitted on probation are provided in "Admission to Graduate Study" in this chapter. The grades recorded determine the student's academic status, even if the student changes to a different graduate degree program.

Students who have been dropped from a graduate degree program and are ineligible to continue in the Graduate School may not reapply as non-degree students.

Applicants admitted on probation and students placed on probation may not be appointed to a graduate assistantship. Refer to PS-21 for further details concerning assistantships and students on probation.

Academic Dishonesty: Academic integrity and honesty must be fundamental qualities of any graduate student's program, and a graduate student's conduct must be above reproach. Academic dishonesty undermines the entire academic enterprise. As a result, it cannot and will not be tolerated. It is the responsibility of all students to familiarize themselves with the Code of Student Conduct and other university rules and regulations governing student conduct and activities.

The Office of the Vice Chancellor for Student Life has administrative responsibility for coordinating all university disciplinary procedures and practices.

Graduation: To receive a graduate degree, students must be enrolled for the semester and have at least a 3.00 cumulative average on all graduate course work taken that is applicable to the degree program and on all graduate course work taken while registered in the Graduate School. "S" and "P" grades are not considered in determining whether this minimum level of performance has been achieved. A maximum of six credit hours of course work with a grade of "C" may be counted toward degree requirements.

Graduate Registration

Specific registration dates for each semester or summer term are listed on the academic calendar. Registration procedures are published in the semester schedule of classes at the website of the University Registrar.

Course Loads

Any graduate student who is utilizing university facilities and/or faculty time must register for an appropriate course load. Graduate students engaged in writing or defending theses or dissertations are expected to register for research hours commensurate with the amount of university resources (faculty time, equipment, library facilities, and/or office space) to be utilized that semester. There is a continuous registration requirement for doctoral students who have passed the general examination.

Full-time Study in Graduate School

To be considered full-time, students must maintain registration in a minimum of 9 semester hours in the fall or spring semester (a minimum of six hours for graduate credit), or a minimum of 6 semester hours in the summer term (a minimum of 3 hours for graduate credit). At least one half of the registered credit for part-time graduate students must be in coursework at the graduate level.

Graduate students may, with prior written approval of the dean of the Graduate School, receive credit for work taken concurrently at another university. For example, LSU has a cooperative registration program with Southern University and some cooperative graduate programs with other universities in Louisiana.

Course Loads of Graduate Assistants

Graduate students holding graduate assistantship appointments must meet certain minimum registration requirements. Such students are expected to register for a full load—nine hours in the spring and fall, at least six of which must be at the graduate level, and six hours in the summer, at least three of which must be at the graduate level—each semester until all degree requirements are completed.

Course Loads of Graduate Students Taking Examinations

Students must be registered for a minimum of one to three semester hours of credit during any semester in which they are taking the master's final examination or doctoral general examination, including the qualifying examinations required by some departments. Doctoral students who have completed the general examination should see "Continuous Registration Requirement" under "Requirements for Advanced Degrees" in this chapter.

Course Loads of Full-Time Faculty and Other Academic Employees

A member of the faculty holding the rank of assistant professor or above may register for a maximum of four semester hours of credit each semester or summer term provided written approval has been given by the department chair and the dean of the college or school in which the faculty member is employed.

Full-time instructors and associates may register for a maximum of four semester hours of course work at the 7000-level or six semester hours (four during summer term) at the 4000-level.

Course Loads of Part-Time Faculty and Staff

Persons employed by the university half-time or less may register as full-time graduate students. Persons employed more than half-time by the university should not register as full-time graduate students. The maximum load permitted will depend on the extent of employment. Written permission to register as a full-time student must be obtained from the employee's supervisor and academic advisory committee. Audits are not counted in the permitted load.

Registration of Employed Persons

The sum of the fraction of full-time registration and the fraction of full-time employment of nonacademic LSU employees should not exceed one and one-half. Written permission to exceed this registration/employment sum must be obtained from the employee's supervisor and academic advisory committee.

"Degree Only" Registration

Students, who have completed all degree requirements, including final examinations taken in a previous semester, may register for "degree only" and pay only the graduation fee. "Degree only" registration is only allowed for students whose theses or dissertations are *submitted to and approved by* the Graduate School on or before the last day to add courses for credit. Eligible students must submit an application for degree and inform the Graduate School of their intent to register for "degree only." Non-thesis students may also register "degree only," provided all degree requirements are met in a previous semester.

Registration of Candidates for Degrees

Students expecting to receive their degrees in the current semester must be registered for coursework (if in a non-thesis degree program) or thesis/dissertation research hours (if writing a thesis or dissertation) unless they qualify to be registered "degree only" (see "Degree Only" Registration"). Eligible students must submit an "Application for Degree" by the published deadline.

Adding or Dropping Courses

A course may be added or dropped only in accordance with the dates indicated on the academic calendar. During the drop/add period, the student will initiate the action using the myLSU online registration system. A change from credit to audit is treated as a drop and add action, but it must be approved by the Graduate School by the published deadline. See "Auditing Courses" below for additional information about auditing courses.

Auditing Courses

Regularly enrolled graduate students may audit courses with the consent of individual instructors. Auditors will not receive degree credit for courses audited, nor will they later be permitted to take a credit examination on work audited. However, courses previously audited may be taken for credit later. Audited courses do not count in total course loads and are not recorded on official transcripts.

Changing Degree Programs

A student in one degree program who wishes to change to another degree program, or a student who completes one degree and wishes to pursue another degree, must obtain approval of the current department, new department and The Graduate School. A "Request for Change of Department" form may be obtained from the Graduate School website.

Students wishing to pursue a different degree in the same department must obtain approval from the department. The department must notify the Graduate School in writing of such a change.

Dual Degree

Students wishing to pursue dual degrees must complete and submit the "Request for Dual Degree" form. Information on available dual degree programs is available on the departmental sites.

Resignation from the University

Dropping an entire course load constitutes resignation from the university for that semester. A graduate student who wishes to resign must first secure approval of the dean of the Graduate School. A resignation form must be completed within 10 days of the

date approved by the dean, and in no case later than the date shown on the academic calendar as the final date for resigning from the university. Completion of resignation involves clearance through certain administrative divisions of the university, as shown on the resignation form provided by the Graduate School. A student who abandons courses without resigning will receive a grade of "F" in each course.

Interinstitutional Cooperation

Academic Common Market

Louisiana participates with 13 other southern states in the Academic Common Market, an interstate agreement for sharing uncommon programs. Residents of these states who are accepted for admission into selected out-of-state programs can enroll on an in-state tuition basis.

To enroll as Academic Common Market students, applicants must be accepted for admission into a program to which their state has made arrangements to send its students, and obtain certification of residency from the Common Market Coordinator in their home state. Applications for admission should be made directly to the institution offering the program. Additional information about the Academic Common Market and programs available at in-state tuition rates for residents of Louisiana can be obtained from the Office of the University Registrar.

Cooperative Program with Southern University

See the section "LSU–Southern University Cooperative Programs" in the *LSU General Catalog* for information about this program.

Multi-campus Registration, LSU System

With appropriate approval, LSU graduate students may take courses for resident credit at the LSU Health Sciences Center in New Orleans. Fees paid at LSU will be for the number of hours to be taken at LSU plus the number of hours to be taken at one of the other campuses in the LSU System.

An application for multi-campus registration may be obtained from the LSU Office of the University Registrar. In order to prevent delay in registration, this form should be submitted at least two weeks before the scheduled time of registration. Approval for multi-campus registration must be obtained from the student's major department, the LSU Graduate School, the LSU Office of the University Registrar, the dean of the other campus' college, and registrar of the other campus.

Cooperative Graduate Programs

Several of LSU's graduate degree programs have specific cooperation with other universities in Louisiana. These programs include applied statistics, economics, education, oceanography and coastal sciences, physics, psychology, and systems science. Details and additional information may be obtained from the graduate coordinator in the appropriate area.

Foreign Exchange Programs

In order to provide students with a variety of culturally enriching experiences, the Graduate School has student exchange programs with foreign universities. Additional opportunities for study abroad are available through other campus offices. For more information, contact the Graduate School.

Requirements for Advanced Degrees

Satisfaction of the minimum requirements of the Graduate School, as stipulated in this publication, does not relieve graduate students of the responsibility for satisfying any additional requirements deemed appropriate by the graduate faculty of the degree programs in which they are enrolled.

Requirements for the Master's Degree

Programs in liberal arts and social sciences ordinarily lead to the MA degree. Programs in other fields usually lead to the MS degree or to specialized master's degrees.

Hours Required

The minimum requirement is 30 semester hours of graduate work, 24 hours of which must be in course work and six hours in thesis research. In programs not requiring a thesis, the minimum requirement is normally 36 semester hours. At least one-half of the minimum required credit in the student's master's program must be in courses at or above the 7000-level. Transfer work from other institutions may not be counted toward this requirement. Six hours of thesis credit will be counted as work above the 7000-level. Students pursuing a 36-hour non-thesis option must complete a minimum of 18 hours in courses numbered at or above 7000. A student's efforts will be concentrated in one major field, but a department may require a minor of six or more semester hours of credit in one or more related fields.

A maximum of 12 semester hours of transfer credit from other schools and/or credit taken while classified as an LSU extension or non-matriculating student may, in some cases, be used in a master's degree program if approved by the department chair and the dean of the Graduate School. See "Transfer of Credit" under "Graduate School Regulations" in this chapter.

Application for Degree

Early in each semester or summer term there is a deadline for submitting the "Application for Degree" to the Graduate School. Master's candidates are required to submit the "Application for Degree" form along with the "Master's Application for Degree" forms. On these forms, a student lists all course work taken that applies toward the degree. Submission of the application carries with it the implication that the student intends to graduate that semester. If circumstances prevent graduation, a "Request for Degree Update" form must be submitted to the Graduate School by the designated application for degree deadline for the next semester in which the student plans to graduate.

Time Limit

Programs for master's degrees must be completed within five years from entrance into a degree program. Credit for individual courses taken at LSU more than five years before the termination of a program may be revalidated by the student's graduate committee through an examination. This examination may be oral, written, or both oral and written, depending on the requirements of the department concerned. The documentation of such an examination must be signed by members of the committee and the department's graduate advisor and reported to the Graduate School on the "Master's Course Revalidation form" before the request for the student's final examination will be approved. Students are responsible for verifying if their department has a revalidation policy. No more than 50 percent of the courses in a student's program may be revalidated and counted toward the degree requirements. For regulations regarding time limits and eligibility of transfer work, see "Transfer of Credit" under "Graduate School Regulations".

The Thesis and the Master's Committee

In most departments, the preparation of a thesis is an important element in the program leading to the master's degree. The master's thesis should demonstrate capacity for research, originality of thought, and facility in organizing materials. The thesis must be acceptable in subject matter and exhibit creditable literary workmanship. At least six semester hours of thesis credit are required for the master's degree with the thesis option. For additional information concerning thesis preparation, consult the electronic thesis and dissertation guidelines available at etd.lsu.edu/.

Final acceptance of the master's thesis rests with a committee of three or more members of the graduate faculty nominated by the chair of the major department and appointed by the dean of the Graduate School. See the "Graduate Faculty" section of this chapter for definitions of full, associate, and affiliate members of the graduate faculty.

The major professor, who must be from the major department, is designated as chair or co-chair of this committee. If either an adjunct or a non-tenure-track faculty member is the major professor, a full-time tenured or tenure-track graduate faculty member must co-chair the committee. Other committee members may be from the major department or from other pertinent departments. If there is an external minor, one committee member must represent the minor department. Both thesis and non-thesis committees must include at least one full member of the graduate faculty, and at least one-half of the committee's graduate faculty members must be full-time tenured or tenure-track faculty members at LSU. Any additions to or changes in the makeup of this committee must be approved in advance by the dean of the Graduate School. The dean of the Graduate School may serve as a member of any committee or may appoint additional members.

Non-thesis Programs

Some departments offer optional non-thesis programs for the master's degree. Departmental websites indicate whether this option is available.

Comprehensive Final Examination

Candidates for master's degrees in most programs are required to pass a comprehensive final examination. This examination may be oral, written, or both oral and written, depending on the requirements of the department concerned. In non-thesis programs, greater weight is ordinarily given to this examination, and it will probably be broader in scope than the examination given to a student who completes a thesis.

At least three weeks prior to the time this examination is to be given (and by the current semester deadline if the student is a degree candidate), the student's department should submit to the Graduate School a "Request for Final Exam" form. Normally, a candidate for the master's degree will take the final examination during the semester in which he or she plans to graduate. If a student wishes to take the final examination at an earlier date, the student's committee must furnish the graduate dean with a sound academic reason for doing so. To be eligible to take the final exam, the student must have a 3.00 cumulative average and must be registered for at least one hour of graduate coursework (if in a non-thesis degree program) or thesis research (if writing a thesis). Exams may be taken anytime the university is open for business. In non-thesis programs, all degree requirements must be met no later than the deadline in the regular semester following the final examination.

This committee, nominated by the chair of the student's major department and appointed by the dean of the Graduate School, is ordinarily composed of those faculty members who served as the student's thesis committee. For the non-thesis option, the committee must consist of three or more members of the graduate faculty nominated by the chair of the major department and appointed by the dean of the Graduate School. At least one member of the examining committee must be a full member of the graduate faculty. The major professor serves as chair or co-chair of the examining committee. Representatives of the graduate faculty may be added by the dean.

For students defending a thesis, the examining committee must have copies of the thesis at least two weeks prior to the final examination.

In order for a student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards and the thesis approval sheets submitted to the Graduate School.

Timely Completion of the Degree after Final Exam

Approved theses, including Graduate School corrections, must be submitted to the Graduate School no later than the deadline for submission of approved theses in the regular semester following the final examination. As with thesis candidates, non-thesis students who pass the final exam in one semester must complete degree requirements no later than the next regular semester following the final exam. A final examination may be voided by the dean of the Graduate School for failure to submit the approved thesis in a timely manner as described.

Second Master's Degree

Students who wish to obtain a second master's degree from the university must meet all academic and residence requirements set by the Graduate School and the department concerned. A maximum of six hours from the first degree may be applied toward the second degree. These hours must be listed on the "Application for Degree" for the second master's degree under the "Transfer or Petitioned Credits" section.

Accelerated Master's Degree Program

The accelerated master's program is open to superior undergraduate students who have completed at least 60 semester hours of credit (including AP credit) with a grade point average of at least 3.50 for all work taken at LSU. To be eligible, transfer students must have a 3.50 average on all undergraduate work taken prior to attending LSU and must complete at least one semester at LSU with a 3.50 GPA.

Acceptance into the accelerated program requires approval from the following: (1) chair of the undergraduate department in which the student is enrolled; (2) dean of the college in which the student is enrolled; (3) chair of the department or the coordinator of the interdisciplinary program in which the student proposes to work toward the master's degree; and (4) dean of the Graduate School. The requested approvals will be given as signatures on a form designed specifically for this program. It is the responsibility of the chair or coordinator of the graduate program to appoint the student's graduate faculty advisory committee.

Other admission requirements for graduate study, such as the GRE and the GMAT, will be waived until the student receives the baccalaureate degree and is ready to enter the Graduate School. Until that time, admission into the accelerated program will constitute provisional admission to the graduate program. Students will register as graduate students only after receiving the baccalaureate degree and satisfying departmental and the Graduate School admission requirements.

Continuing eligibility for the accelerated master's program will require maintenance of a 3.50 average in all courses that apply to the undergraduate degree and a 3.00 average for all graduate course work.

Students who wish to obtain a master's degree under this program must meet all academic and residence requirements set by the Graduate School and the department concerned. Requirements for the baccalaureate degree will not be affected.

Students may take a maximum of half of the required hours for the master's degree while enrolled as undergraduates. These hours may be applied toward the master's degree, provided a GPA of 3.00 in graduate coursework is maintained and provided none of these hours apply toward the baccalaureate degree.

A student may wish to apply some graduate coursework toward the undergraduate degree. In such instances, the graduate committee can alter the distribution of course work and independent study required for the master's degree. No course credit can be applied toward more than one degree.

Requirements for the Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) is the highest earned degree offered by universities. It is conferred only for work of distinction in which the student displays decided powers of original scholarship and only in recognition of marked ability and achievement. Nothing in the following summary of minimum standards should be construed to imply that the degree will be granted merely in recognition of faithful performance of prescribed work.

Satisfaction of the minimum requirements of the Graduate School, as stipulated in this section, in no way relieves a doctoral student of responsibility for satisfying any additional requirements deemed appropriate by the graduate faculty of the degree program in which he or she is enrolled. The basic requirements are: (1) students must exhibit unmistakable evidence of mastery of a broad major field. Such evidence is ordinarily provided by passing a general examination; and (2) students must prove ability to complete a significant program of original research by preparing a dissertation embodying creative scholarship and by passing a rigorous final examination. The dissertation must add to the sum of existing knowledge and give evidence of considerable literary skill.

Course Work

While the Doctor of Philosophy degree cannot be earned solely by passing courses, the program of work prescribed by a department ordinarily provides for a substantial amount of course work, equivalent to a minimum of 54 hours including dissertation hours, beyond the requirements for the baccalaureate degree. Some departments require considerably more coursework. At least one-third of credits toward a graduate or a post-baccalaureate professional degree are earned through instruction offered by the institution awarding the degree.

Although coursework requirements are concentrated in the student's major field, a certain amount of work may be required in one or two minor fields. If there is minor course work, the Graduate Council recommends that the minor field requirement include at least one 7000-level course. The course work and the number of hours needed to satisfy the minor field requirement are determined by the graduate faculty in the minor department. The Graduate School recommends that the minimum minor hour requirement be no less than nine hours.

Academic Course Plan

The Graduate School does not require a formal qualifying examination or procedure for doctoral students, although departments may, if they wish, administer such examinations or procedures. A student is eligible to work toward a doctoral degree beginning with the semester in which he or she is formally admitted into a doctoral program.

After meeting with the student, the advisory committee will be required to approve a departmental-level academic course plan listing all curricular requirements for the degree during the first or second semester following the student's formal admission to the doctoral program. If the student already has a master's degree, the departmental-level academic course plan should be formulated during the first semester; if the student is bypassing the master's degree, formulation may be delayed until the second semester. The advisory committee, which should include at least one representative from the minor field (if appropriate), is not necessarily identical to the student's committee for the general examination. The suggested general examination committee will be approved when the request for the general examination is submitted to the Graduate School.

The student's departmental-level academic course plan is subject to Graduate School policy and departmental requirements. Graduate course work taken at another institution with grades of "A," "B," "P," and "S," or the equivalent, is not subject to the policy on transfer of credit for the master's degree, and may be included in the departmental-level academic course plan if accepted by the department and the student's advisory committee.

Advisory Committee

During the entire period of work toward the doctorate, the student's program is directed by a special advisory committee. This advisory committee consists of three members of the graduate faculty. See the "Graduate Faculty" section for definitions of full, associate, and affiliate members of the graduate faculty. After the outlines of the program have assumed more definite form and the direction of research has been clearly established, this special committee is enlarged to three or more members with the addition of the Graduate School Dean's Representative. This enlargement must take place prior to the general examination.

The full advisory committee must comprise at least three members of the graduate faculty, including the major professor, who acts as chair or co-chair and who must be from the major department. If either an adjunct or a non-tenure track faculty member is the major professor, a full-time tenured or tenure-track graduate faculty member must co-chair the committee.

At least one-half of the graduate faculty on doctoral committees must be full-time tenured or tenure-track faculty at LSU. A minimum of two of those faculty members must be from the student's major department and at least one of whom must be a full member of the LSU graduate faculty. The remaining members may be from the major department or may be from outside the department if pertinent to the student's area of concentration, with the proviso that at least one of the remaining members must be a full member of the graduate faculty.

Any declared outside minors require representation, either from among the first three members of the committee or by additional appointments to the committee. The dean of the Graduate School may serve as an *ex officio* member. Members of the special advisory committee are nominated by the chair of the major department and appointed by the dean of The Graduate School, who may make any changes deemed desirable.

The dean of the Graduate School appoints a member or members of the graduate faculty to serve on doctoral general and final examination committees. These individuals represent the dean and the entire graduate faculty. They are full voting members of the committee with all the rights and responsibilities of the other committee members. In the case of final examinations, it is the responsibility of the committee chair to ensure that the dean's representatives receive copies of dissertations as soon as possible, but no later than two weeks before the date of the examination.

General Examination

It is in the best interests of students that those with high probability of continuing successfully toward a doctoral degree be identified as soon as possible. Doctoral students are, therefore, required to pass a rigorous qualifying examination or the general examination within three calendar years (36 months)—or a period deemed equivalent for part-time students—of their classification as doctoral students. An exception may be made to this if a department notifies the Graduate School.

Whether a qualifying or general examination is used to meet the above requirement, the procedure should be sufficiently rigorous so as to provide reasonable confidence that the student who passes it may proceed successfully to a doctoral degree.

A student becomes eligible to take the general examination after demonstrating to the advisory committee adequate academic and professional aptitudes. Exams may be taken anytime the university is open for business. Students on probation will not be allowed to take the general examination. Students must be registered for a minimum of one to three hours of credit during the semester in which they are taking the general exam.

There is no Graduate School requirement that doctoral students pass a pre-general examination before becoming eligible to take the general examination. However, since pre-general examination requirements may be retained by individual departments, students should check with the appropriate departmental office concerning this requirement.

A request for the general examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date. This request must state the time and place proposed and the names of faculty members nominated to serve as the examining committee. Under ordinary circumstances, these will be the members of the enlarged advisory committee and one or more representatives of the graduate faculty will be appointed by the dean of the Graduate School. Any additions to or changes in the makeup of this committee must be approved in advance by the dean of the Graduate School. At this time the final departmental-level academic course plan should be completed and submitted to the Graduate School with the "Request for General Exam."

The general examination is ordinarily the most rigorous test in the entire doctoral program. In order for the student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards submitted to the Graduate School.

The examination may be oral, written, or both oral and written, according to the rules of the major department. However, the minor department (if an outside minor has been declared) retains the right to decide the format of its part of the examination. The examination must be comprehensive enough to demonstrate expert competence over broad segments of the major field and a high degree of familiarity with the content of and current progress in one or more minor fields (if appropriate).

The general examination should be regarded as the culmination of a student's program in course work. In most cases, the remaining time spent obtaining the degree is to be devoted to concentrated work on the dissertation and preparation for the final examination. When a student passes the general examination, examination cards should be completed in duplicate and forwarded by faculty and staff only to the Graduate School.

Continuous Registration Requirement

Doctoral candidates must maintain continuous registration for a minimum of three semester hours of credit each regular semester (excluding summers) from the completion of the general examination to the end of the semester in which an approved dissertation is submitted to the Graduate School.

The dean of the Graduate School may exempt a student from the continuous registration requirement upon departmental certification that the student is in absentia from the university and is not drawing directly upon university resources. Exemptions are intended to accommodate students whose dissertation research requires extended periods of absence for field work in distant archives and laboratories; exemptions are not intended for students who have accepted positions as employees in business, industry, or education.

Dissertation

Students who have passed the general examination normally direct most of their energies toward preparation of the dissertation, which must be a contribution to knowledge in the major field of study. The dissertation must demonstrate a mastery of research techniques, ability to do original and independent research, and skill in formulating conclusions that in some way enlarge upon or modify accepted ideas.

The form of the dissertation must be in accordance with the instructions in the electronic thesis and dissertation guidelines available online at etd.lsu.edu.

LSU Alumni Association Distinguished Dissertation Award

The Distinguished Dissertation Award, consisting of \$2,000 and a certificate, is presented annually to two doctoral students whose research and writing epitomize superior scholarship. One award is designated for a student in the arts, humanities, or social sciences and one for a student in science, engineering, or technology. These awards are made each spring in conjunction with the Distinguished Research Master Award.

Final Examination

A request for the final examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date or by the current semester deadline, if the student is a candidate for a degree (see the academic calendar for all pertinent dates). This request must specify the major and minor fields (if appropriate), dissertation title, time and place proposed for the examination, and nominations for the examining committee. The examining committee, including the dean's representative, must have copies of the dissertation at least two weeks prior to the final examination. Exams may be taken anytime the university is open for business. The student must be registered for dissertation research hours (a minimum of three hours during the fall and spring semester or one hour during summer).

Permission to hold the final examination will be granted by the dean of the Graduate School only after all the foregoing conditions are satisfied and three (3) calendar months have elapsed since the student passed the general examination.

The dean of the Graduate School will approve the final examination committee. In most cases, it will consist of the student's special advisory committee or a similarly constituted group to which one or more additions may have been made as representatives of the dean and the graduate faculty. Any additions to or changes in the makeup of this committee must be approved in advance of the examination.

Although the final examination is traditionally conducted as an oral test primarily concerned with the dissertation and related problems, the committee determines procedure and content, which may extend into subject matter related to major and minor fields (if appropriate), even though well removed from topics suggested by the dissertation.

In order for the student to pass this examination, there may not be more than one dissenting vote. Dissenting votes, along with assenting votes, must be recorded on the examination cards and the approval sheets submitted to the Graduate School.

Timely Completion of the Degree after the Final Exam

Approved dissertations, including Graduate School corrections, must be submitted to the Graduate School no later than the deadline for submission of approved dissertations in the regular semester following the final examination. A final examination may be voided by the dean of the Graduate School for failure to submit the approved dissertation in a timely manner as described.

Application for Degree

Early in each semester or summer term, there is a deadline for submitting the "Application for Degree" to the Graduate School. Doctoral candidates are required to submit the "Application for Degree" form.

Submission of this form carries with it the implication that the student intends to graduate that semester. If circumstances prevent graduation, a "Request for Degree Update" form must be submitted to the Graduate School by the designated deadline for the semester in which the student plans to graduate.

Certification of Completion of Requirements

Upon timely submission of the "Application for Degree," when the student has passed the final examination with no more than one member of the committee dissenting, and upon submitting a dissertation in acceptable form to The Graduate School, the student will be certified to the LSU Board of Supervisors by the dean of the Graduate School as having fulfilled all requirements for the degree of Doctor of Philosophy. This certification takes place at the next commencement, at which time the degree is conferred.

Time Limit

The program for the doctoral degree must be completed within seven years from the time a student is classified as a doctoral student. This time limit may not be exceeded except by special permission of the advisory committee, department chair and college dean. A formal meeting of the advisory committee must be held to approve any time limit extension. No less than three calendar months may elapse between the passing of the general examination and the completion of all requirements for the doctoral degree.

Requirements for the Doctor of Musical Arts Degree

The Doctor of Musical Arts (DMA) is a professional degree in music. The coursework, residence requirements, and examination sequences are similar to those for the PhD degree. Major differences in the two programs are in the dissertation and minor field requirements (if appropriate).

For the special admission and course requirements for this degree, consult the School of Music.

Graduate Faculty

Graduate Faculty Membership Status:

Graduate faculty membership status is indicated by a number plus a letter or just by letter as follows:

- (M) Full member
- (7M) Seven (7) year member
- (6A) Six (6) year associate member
- (3A) Three (3) year associate member
- (3F) Three (3) year affiliate member
- (3P) Three (3) year professional member
- (EM) Emeritus full member status
- (EA) Emeritus associate member status
- (O) Ex-officio

Full descriptions of graduate faculty status can be found [here](#).

Please note that graduate faculty status is subject to change. Current graduate faculty status can be checked [here](#).

University Policy Statements

This section includes links to the full text of two university policy statements that are of special interest to graduate students. PS-21 governs the entire graduate assistantship program; PS-85 deals specifically with the preparation of teaching assistants for instructional duties.

Other applicable Policy Statements, Permanent Memoranda, and additional rules and regulations are listed on the LSU Website. Students should pay particular attention to PM-64 and PS-106.

PS-21 • Graduate Assistantships

Overview

The primary mission of the LSU Graduate School is to promote excellence in graduate education. Part of this responsibility mandates that The Graduate School develop policies governing the appointment and evaluation of graduate assistants (GAs) and monitor their implementation by employing units.

These policies include setting minimum academic qualifications for holding GA appointments, establishing appointment and renewal procedures, setting average workloads, and reviewing stipend levels and ranges.

This policy statement outlines procedures and guidelines affecting the graduate assistantship program. For special policies on the preparation of teaching assistants for instructional duties in classrooms and laboratories, see PS-85, Preparation of Teaching Assistants.

See full text of PS-21 here.

PS-85 • Preparation of Teaching Assistants

Overview

To lay out principles and requirements for the assignment, preparation, supervision, and evaluation of graduate teaching assistants at Louisiana State University.

Excellence in undergraduate and graduate instruction is central to the mission of the university. Preparation in pedagogy in a variety of teaching situations is an integral part of the education of graduate students. Accordingly, the graduate faculty must be committed to designing appropriate programs for the assignment, preparation, supervision, and evaluation of graduate teaching assistants with the aim of enhancing graduate student preparation and undergraduate learning. This policy statement should be read in the context of the general institutional policy on graduate assistantships as set forth in PS-21.

See full text of PS-85 here.

Graduate Career Plan

Students are encouraged to enrich their studies and prepare for their careers by using the Career Plan for Graduate Students in addition to their academic course of study.

Accounting (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click here.

Program Overview

The Master of Science in Accounting program at LSU (MS) is designed to provide students with a greater understanding of accounting and business than is possible in an undergraduate program. The MS student will develop superior technical accounting knowledge, strong analytical skills, strong written and oral communication skills, and highly developed interpersonal skills. The program prepares students for careers as professional accountants in public practice, industry, financial institutions, government, and nonprofit organizations. The MS requires 30 hours of non-thesis course work. The program is primarily designed for those with undergraduate preparation in accounting; however, exceptional candidates from other disciplines may be considered. Upon completion of the program, a student should have completed Louisiana's 150-hour educational requirement for the CPA examination.

The accounting doctoral program is designed to prepare doctoral students for successful careers at peer universities or better and to provide them with the skills needed to publish independent research in high quality research journals in accounting. The Department of Accounting is committed to excellence in teaching. Teaching is an integral part of an academic position in accounting and students acquire teaching experience as a part of the doctoral program.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials which come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study. For doctoral program applicants, a copy of application materials (including a summary sheet) should be sent (through email or standard mail) to the PhD advisor. Three recommendation letters are required and the applicants should mail the sealed recommendation letters directly to the PhD advisor.

Master's program

Applications for admission are received and evaluated by the department. Students can be admitted in the fall, spring, or summer semesters. The deadline for submitting an application for consideration into the MS program is March 15 for summer and fall entry and October 15 for spring entry. Students seeking admission must submit satisfactory credentials from previous study, acceptable GMAT scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Admission will be considered by the faculty application committee only after the respective deadlines. If a student does not meet all requirements, he or she may be admitted provisionally. For example, a student may be admitted provisionally to the master's program if he or she lacks one or two pre-requisites and is working to complete them. Applications submitted after the deadlines will be considered on a rolling basis.

Doctoral program

Applications for admission are received and evaluated by the department. The department's PhD committee will start to evaluate all applications around mid-January. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GMAT scores, three letters of recommendation, a resumé, and a personal statement. On the personal statement, students should provide an assessment of their writing ability and quantitative skills including any training in economics, calculus, statistics and computer programming as well as a personal background and his or her purpose in pursuing a doctorate degree. International students whose native language is not English and who do not have a diploma from a U.S. school when entering into the PhD program must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Master's program

Financial support is available for selected graduate students in the form of assistantships. Currently, these assistantships are \$6,000 for selected Masters of Accounting students. Students interested in applying for graduate assistantships should contact the MS program advisor. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Doctoral program

Financial support is available for selected graduate students in the form of assistantships. These graduate assistantships currently carry a stipend of \$17,000 and full tuition exemption. Students must pay applicable fees.

Masters

Accounting, M.S.

(SACCT)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the MS Graduate Advisor. The degree is non-thesis and requires students to earn 30 hours of credit at the graduate level.

The curricular requirements include:

- at least 15 hours at the 7000 level or above and
- a minimum core requirement of 18 credit hours in the areas of Advanced Theory, Advanced Accounting, Business Law, Statistics, Auditing, and Tax.

Doctorate

Accounting, Ph.D.

(PACCT)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements of the LSU Graduate School for graduate committees are satisfied.

The degree is a thesis degree that requires the student to complete a dissertation. The student must earn 54 hours of credit at the graduate level including a maximum of six hours of credit for the dissertation. The curricular requirements include:

- At least 54 hours at the 7000 level or above, exclusive of any type of independent studies credit except for the dissertation credit earned,
- A minimum core requirement of 15 credit hours in PhD research seminars, and
- At least one complete research paper.

The student must pass a comprehensive written exam within three years of beginning the program. The student must pass an oral dissertation defense administered by the dissertation committee chair.

Agricultural Economics & Agribusiness (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Agricultural Economics & Agribusiness offers a unique opportunity for graduate study. As a part of the land-grant university system, the department has joint research, teaching, and service responsibilities with the LSU Agricultural Center and LSU that enable it to address relevant issues pertaining to agriculture, economics, natural resources, and rural/community development in Louisiana, the nation, and the world. These joint research and extension components are instrumental in financially supporting the department's MS and PhD programs, as well as in providing problem-solving research opportunities for graduate students. Graduate programs are an integral component of the department's basic and applied research programs. The skills and research interests of the faculty provide a wide range of opportunities for graduate research projects. Interdisciplinary and regional research programs further expand the scope of research areas available to graduate students. In addition to the traditional programs in production, management, and marketing, departmental research includes agribusiness management, consumer economics, quantitative methods, environmental and natural resource management, international marketing and trade, and rural/community development.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials which come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department throughout the year, but PhD students are typically admitted in the fall semester. Applicants must adhere to the application deadlines established by The Graduate School. In addition to meeting the general admission requirements of the Graduate School, successful applicants must have an adequate background in economics or business, statistics, and calculus. An adequate background includes at least a basic macroeconomic and an intermediate microeconomic theory course (for a total of six hours), a course in statistics, and a calculus course.

Students pursuing the MS degree may take calculus for business and economics (or equivalent), but PhD students are encouraged to choose the traditional calculus sequence. Preference for students applying for admission to the PhD program is given to students who have completed an MS or MA. Students applying for the PhD who have not completed an MS or MA will be evaluated by the departmental graduate committee regarding initial admission to either the MS or PhD program. Students who lack adequate background may be admitted to the graduate program with the provision that the required background course work be completed. It is not necessary to have an undergraduate degree in agricultural economics or economics to succeed in this department. Students with baccalaureate degrees in animal science, engineering, mathematics, agronomy, business administration, and various areas of liberal arts have been admitted to and successfully completed graduate degree programs in agricultural economics.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores (1000 or greater), and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial support is available on a competitive basis for highly qualified students. Assistantships are available through the Louisiana Agricultural Experiment Station and the College of Agriculture. Assistantships carry a waiver of non-resident tuition. Early application is encouraged, as many sources of funding have February 15 deadlines for completion of application materials. Additional details concerning availability of funds and/or applications for financial support are available from the department's Director of Graduate Studies.

Masters

Agricultural Economics, M.S.

(SAGEC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty from the Department of Agricultural Economics & Agribusiness, such that the LSU Graduate School requirements for graduate committees are satisfied.

The degree is a thesis/non-thesis degree requiring a thesis/special project. For a thesis degree, 33 hours of credit at the graduate level must be earned, including a maximum of six hours of credit for thesis research. For a non-thesis degree, 36 hours of credit at the graduate level must be earned, including a maximum of three hours of credit for special project research. The curricular requirements include:

- At least 15 hours at the 7000 level or above.
- A primary area consisting of a minimum of nine hours of earned credit in a specified field of study.
- A minimum core requirement of 18 credit hours in economics and agricultural economics courses, with the specific requirements dependent on the area of concentration (see the Graduate Student Handbook at www.agecon.lsu.edu for more details).

The student must also pass a comprehensive oral final exam and, if thesis-track, an oral defense of the thesis research.

Doctorate

Agricultural Economics, Ph.D.

(PAGEC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty from the Department of Agricultural Economics & Agribusiness, such that the requirements of the LSU Graduate School for graduate committees are satisfied.

The dissertation-based degree requires 57 hours of credit at the graduate level, including a maximum of 12 hours of credit for the dissertation project. The curricular requirements include:

- At least 45 hours at the 7000 level or above.
- Two primary areas consisting of a minimum of 6 hours of earned credit each (see the Graduate Student Handbook at www.agecon.lsu.edu for more details).
- A minimum core requirement of 21 hours in economics and agricultural economics courses (see the Graduate Student Handbook at www.agecon.lsu.edu for more details).

The student must pass a general written exam and an oral exam (collectively termed the General exams). These exams are designed to test the student's knowledge of the theoretical and empirical applications of economics as covered in the core courses. A comprehensive final oral exam and defense of the dissertation is also required.

Animal Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The School of Animal Sciences offers graduate degrees with areas of specialization in breeding and genetics, growth and metabolic physiology, meat science and technology, dairy production and dairy foods technology (includes quality assurance, dairy microbiology, dairy chemistry, and product development), ruminant and nonruminant nutrition, reproductive physiology, and biotechnology.

Research is performed with beef cattle, dairy cattle, horses, pigs, sheep, goats, poultry, and various laboratory species. Interactions of school faculty with scientists in the School of Veterinary Medicine, Pennington Biomedical Research Institute, and units of the Louisiana Agricultural Experiment Station (LAES) throughout the state provide a vast array of research opportunities for graduate students in the animal sciences.

Administration

Admission

Applications for admission are received and evaluated by the School of Animal Sciences for each semester (fall, spring, summer). Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

When all admission requirements are met, full admission will be considered by the graduate faculty members in the prospective student's area of interest. Final admittance to the program must be supported by a member of the graduate faculty in the school, thus students are encouraged to communicate with faculty directly about the possibility of working in a faculty member's program. If a student does not meet all requirements, he or she may be admitted provisionally (e.g., on probation if the GPA is not 3.0 or better).

Financial Assistance

Financial assistance is available to some students. Support may be available through the school or other units in the form of research or teaching assistantships. Graduate assistantships are available on a competitive basis. Assistantships are awarded through faculty members, so applicants should contact individual faculty members concerning the availability of funding. Students on assistantship receive full tuition waivers but are responsible for university fees. To ensure consideration for financial aid, all application materials should be submitted as early as possible before the actual admitting semester.

Graduate Faculty

(check current listings by department by clicking this link)

Kayanush Aryana (M) • Dairy foods technology

Thomas D. Bidner (M) • Influence of diet, genetics, and postmortem factors on meat composition and quality

Charles A. Boeneke (7M) • Dairy foods technology

Kenneth R. Bondioli (M) • Reproductive physiology/biotechnology; embryo biotechnology, somatic cell nuclear transfer, genetic modification of animals, stem cell biology and epigenetic regulation of gene expression

Richard K. Cooper (3A) • Aquatic Diseases Sidney M. Derouen (3F) • Beef cattle genetics and management

Philip H. Elzer (M) • Infectious Diseases
Matthew Garcia (6A) • Animal genetics
Glen T. Gentry, Jr (6A) • Reproductive physiology – reproductive efficiency, endocrine control of reproduction and nutrition-reproduction interactions
Robert A. Godke (EM) • Reproductive physiology, embryo technology
William Hansel (M) • Reproductive biology and biotechnology
Karl W. Harborth (3F) • Beef cattle nutrition and management
Bruce F. Jenny (M) • Dairy cattle nutrition and management
Thomas R Klei (M) • Parasitology
Jerome F. La Peyre (7M) • Oyster diseases
Theresa A. Lavergne (3P) • Nutrition, poultry management, waste management
Kenneth W. McMillin (M) • Meat properties, processing, and packaging; food safety; goat meat
James E. Miller (M) • Parasitology; Small ruminant health
Vinicius R. Moreira (3F) • Dairy cattle nutrition and management
Christine B. Navarre (M) • Extension Veterinarian, animal health and diseases
William E. Owens (M) • Lactation biology, bovine mastitis, mammary immunology
L. Lee Southern (EM) • Nonruminant nutrition
Donald L. Thompson, Jr (M) • Equine reproductive physiology and endocrinology, endocrine aspects of growth and metabolism
Ronald L. Thune (M) • Molecular microbiologist/infectious diseases
Cathleen C. Williams (6A) • Dairy calf and heifer nutrition, dairy management

Masters

Animal, Dairy & Poultry Sciences, M.S.

(SADPA and SADPD)

The departmental-level academic course plan for each student will be developed in consultation with the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Both thesis and non-thesis options are available. The thesis option requires a thesis research project; a minimum of 30 hours of credit at the graduate level must be earned including a maximum of six hours of credit for the thesis (ANSC 8000).

The curricular requirements include:

- At least 12 hours at the 7000 level or above; no more than six hours of ANSC 7061 Research in Animal Science (1-6) may be applied to the degree.
- At least one hour of seminar (ANSC 7091).
- All course work must be approved by the student's examining committee.

For the non-thesis option, a minimum of 36 hours of course work is required; no more than six hours of ANSC 7061 Research in Animal Science (1-6) may be applied to the degree. All course work must be approved by the student's examining committee.

Thesis option students are required to present a 30-45 minute seminar in defense of their thesis research prior to a comprehensive final oral exam with the student's examining committee. Non-thesis option students must pass a comprehensive final oral exam administered by the student's examining committee.

Doctorate

Animal & Dairy Sciences, Ph.D.

(PADA and PADD)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The PhD degree is a research degree requiring a dissertation project. Course work to be taken for the PhD degree must be approved by the student's advisory committee and the graduate dean. A minimum of 9 hours of dissertation (ANSC 9000) is required; a minimum of 52 credit hours of graduate course work beyond the bachelor's degree must be taken, which can include up to 30 hours of credit transferred from a master's program at another institution.

The curricular requirements include:

- At least two hours of seminar (ANSC 7091 or equivalent)
- No more than 6 hours of ANSC 7061 can be applied to the degree

Students in the PhD program must pass a comprehensive general exam on course work, general knowledge, and critical thinking ability; an oral exam is required, and a written exam may also be administered at the examining committee's discretion. A dissertation is required. Students are required to present a 30-45 minute seminar in defense of their dissertation research prior to a comprehensive final oral exam with the student's examining committee.

Architecture (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The master's degree in architecture is a professional degree program dedicated to the development of professional skills and design excellence as a means of engaging the natural and cultural forces that shape the built environment. The program emphasizes inquiry into the role of design in the study of place, the role of architecture in the structure and perception of the city, and the relationship of these to the conceptual and physical assembly of buildings. Investigation of the remarkable diversity of urban and rural landscapes of Louisiana and the Lower Mississippi Delta Region provides a local context for informed studies that lead to engagement with broader regional and global concerns.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from a Bachelor Degree, *GRE* scores of 310 (1000 under the older scoring system) minimum, a GPA of 3.0 minimum, and three letters of recommendation. A portfolio of creative work is

required for admission to the MARCH II program and recommended for admission to the MARCH I program. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to selected students. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines (at time of application for School of Architecture) established by the LSU Graduate School.

Research Facilities & Units

The school has achieved national and international recognition for research in energy conservation, historic preservation, and community design studies. Research resources include:

- Coastal Sustainability Studio (CSS), an interdisciplinary environment, which serves the research and outreach endeavors of the school, creating opportunities for student enrichment and specialization in coastal adaptation and restoration
- Computer-Aided Design and Geographic Information System (CADGIS) Lab in the College of Art & Design, which has sophisticated computer-based graphics processing systems with mapping, image processing, modeling, and animation software

Graduate Faculty

(check current listings by department by clicking [this link](#))

Catherine Bonier (6A) • The design and evolution of architecture, cities, and landscapes around water, examined in conjunction with the historical development of the ideas that frame our understandings of nature, health, and civic life

Jeffrey A Carney (M) • The overlap of architecture, urbanism, and ecology at the scale between architecture and city planning and their relationship to the Coastal Sustainability Studio

Jason R. Crow PhD, RA, LEED AP (6A) • The history and ontology of matter and equipment from the 8th century BCE to the present; Advanced fabrication techniques; Digital craft

J. Michael Desmond, PhD (7M) • History, theory, and criticism of architecture; architecture and the city; American architecture and cultural mythology

Ursula Emery-McClure, FAAR, AIA, LEED AP BD+C (M) • Process Construction, Materials and Methods, Experimental Tectonics

Jori Ann Erdman, AIA, LEED AP (7M) • The South, Building Culture, Design-Build pedagogy, Modern architecture, alternative materials and community engagement

Robert Holton, IDP Coordinator (6A) • Contextual Fields, Advanced Building Construction, Fabrication, & Material Technologies

Jason Lockhart, AICP (M) • Urban and city planning, neighborhood development, downtown development, and the community participatory process

Meredith J. Sattler (6A) • Digital media and processes; building envelopes

Thomas Sofranko (M) • Abstraction and composition, design education

Alcibiades P. Tsolakis (M) • Art and Design, construction, mediterranean architecture, Islamic art, drawing and sculpture

Gregory J Watson (M) • Fundamental design principles and practices, materials, landscape, and representation

Robert Zwirn, AIA (M) • Architectural design, American architectural history and theory

Masters

Architecture, M.Arch

(MARCH)

The school offers graduate studies to students with degrees in other fields or to students with pre-professional degrees in architecture who wish to pursue a professional career in architecture (professional course of study). All options lead to the Master of Architecture (MArch) degree. This professional degree program is accredited by the National Architectural Accrediting Board (NAAB).

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an 8-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The Master of Architecture (M.Arch) degree is a three ½ year professional degree open to applicants with undergraduate qualifications in any discipline. Those with accredited degrees in architecture or landscape architecture are eligible for entrance into the program's second year, following consultation with the graduate coordinator and review of qualifications and portfolio. The degree is a non-thesis degree requiring a comprehensive design project. 36 hours of credit at the graduate level must be earned including a maximum of six hours of credit for the comprehensive design project. The curricular requirements include:

- At least 36 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A core requirement of 48 credit hours comprised of NAAB required professional architecture courses. Credit is given for students with a pre-professional architecture on a case-by-case basis that is decided by the School of Architecture Graduate Coordinator in consultation with the faculty.

The student must pass a final exam consisting of an oral presentation and defense of the comprehensive design project before their examining committee.

Art & Art History (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Master of Fine Arts (MFA) in Studio Art

Areas of specialization include ceramics, digital art, graphic design, painting and drawing, photography, printmaking, and sculpture. Degree regulations include full-time residency, maximum of five years to complete, minimum of nine credit hours per semester, exhibition of specific thesis project, written thesis report, and oral defense of the work. Students admitted into the MFA program with an undergraduate studio art degree (BFA) must complete a minimum of 60 hours of graduate level credit over the course of three years. Although this is a rare occurrence, a student may petition their graduate review committee and the graduate coordinator for approval to complete the program one semester early, or in two and one half years, as long as 60 credit hours are completed.

Master of Arts (MA) in Art History

The Art History MA Program was founded in 1946 and is the largest public program of its kind in Louisiana. It provides students with a strong grounding in the field and its methodologies and offers courses covering a wide range of cultures and aesthetic viewpoints. LSU's Art History MA program accommodates both students seeking a terminal graduate degree and those who plan to continue on to the PhD degree at another institution. As a terminal degree, it prepares students to teach art history at the college level and assume a variety of curatorial and educational positions within museums, galleries, and cultural organizations. The program offers a broad spectrum of courses and specializations in ancient, medieval, Renaissance, baroque, American, Asian, modern, contemporary and media art, as well as design history and critical theories of art.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Please note: Art History and Studio Art Graduate students must assume full responsibility for the knowledge of rules and regulations of the Graduate School and the School of Art. Deadlines and due dates for various requirements can be found in the *General Catalog* and Academic Calendar.

Admission to the Studio Art MFA Program

To apply to the graduate program in studio art, you must create an account and submit your work for the portfolio review at <https://lsuart.slideroom.com/> in addition to the Graduate School application. Detailed instructions for submission can be found on the school's website: art.lsu.edu. Admission is selective and your application is evaluated on the basis of grade point average, letters of recommendation, and your portfolio. You must hold a BA or BS degree to be considered for the graduate program.

Your submission will include: 1. Portfolio including 20 examples of recent work in still image or video format. Interactive, web-based and installation work, etc should be presented through documentation in still image or video format. Please limit submissions including video to no more than 10 minutes total, including excerpts when necessary to meet this requirement. 2. Description of works, including: titles, dates completed, size, and media and/or url.

Students are encouraged to schedule a personal interview with faculty from art history or a prospective studio area; and enjoy LSU's beautiful campus.

Deadlines

Applications must be received by **February 1** for entrance in the fall semester and by **October 1** for entrance in the spring. Please indicate in the letter of intent whether or not you would like to be considered for a graduate assistantship award. Enrollment in some specializations in studio art is limited; please check the School of Art website to ensure that your area of specialization is accepting applications for the semester in which you wish to enroll.

International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Admission to the MA program in Art History:

Applications for admission are received and evaluated by the department beginning **February 1** for the following fall semester, and **October 1** for the following spring semester. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and two letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to selected students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Masters

Art History, M.A.

(AFAAH) - 30 credit hours

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a thesis. Thirty hours of credit at the graduate level must be earned, including six hours of credit for thesis research at the 8000 level. The curricular requirements include:

- At least nine hours at the 7000 level.

- A primary area consisting of a minimum of nine hours of earned credit in a specified field of study.
- A minimum distribution requirement of twelve hours as follows: at least one course in each of the following areas: (1) ancient and medieval art; (2) Renaissance through 18th-century art; (3) 19th through 21st-century art; and (4) non-western art.
- A reading competency exam in French or German (except in special cases where a student's thesis topic requires expertise in a language other than French or German, another language may be approved).
- Completion of a one-hour Methods Colloquium (ARTH 7410).

The student must pass a comprehensive written exam on material in the student's area of concentration, and an oral defense of the MA Thesis.

Studio Art, M.F.A.

(MFAS) - 60 credit hours

- Minimum credit hours of graduate level courses in area of concentration (27 credit hours)
- Studio Art Electives, at 4000 level and above, 12 credit hours, (which may be taken in any specialization including your area of concentration).
- Art History courses at 4000 level and above 12 credit hours; (students may petition to substitute three hours for an approved academic elective)
- Visiting Artist Seminar (three credit hours)
- ART 8000 six credit hours (thesis research – two semesters, three credit hours each)

Total Hours: 60

No more than 12 hours of graduate credit may be transferred from NASAD accredited institutions within the United States. For restrictions, please see "The Graduate School" regulations under *Transfer of Credit*.

Biological & Agricultural Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Established in 1921, the Department of Biological & Agricultural Engineering is a biologically-oriented engineering discipline working on cutting edge research, teaching, and service in biomedical, bioenvironmental, bioprocess, biomechanical, and related areas. The curriculum offers a unique opportunity to earn an engineering degree with emphasis in biological, physical, and engineering sciences.

Biological and agricultural engineering extends basic, applied, and engineering sciences to the measurement, analytical characterization, and constraining descriptions of organisms and their environments. It is based on the basic sciences of mathematics, physics, chemistry, and biology. These are integrated with the engineering sciences of statics, dynamics, strength of materials, fluid mechanics, thermodynamics, and electricity. Students can pursue more specialized interests through technical electives in biomedical, biomechanical, bioenvironmental, and bioprocess engineering.

Current areas of research include simulation of biological and agricultural systems, by-products utilization and value added processing, biological waste management, environmental resources protection and reclamation, aquacultural systems, bioenergy, food processing and preservation, drainage, irrigation, erosion control systems, climatology, biomechanics, remote sensing applied to precision agriculture, molecular and cellular engineering, and nano-bioengineering.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department (with **March 1** being the normal deadline for fall admissions). Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Research assistantships are available to qualified students on a competitive basis. Doctoral students may also compete for Board of Regent Graduate Fellowships. Applications are available through the department.

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines, normally by March 1 for fall and by October 1 for spring and the deadlines established by the LSU Graduate School.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Richard L. Bengtson (M) • Water pollution, soil erosion, hydrologic modeling

Dorin Boldor (M) • Food process engineering and bioenergy

David Constant (M) • Transport and fate of hazardous substances, environmental engineering, bioremediation

Steven G. Hall (M) • Aquacultural, ecological and coastal bioengineering, environmental bioethics

Daniel Hayes (6A) • Nanomaterial and nanoscale influence

Thomas B. Lawson (EM) • Aquaculture systems, bioenvironmental engineering

Marybeth Lima (M) • Bioprocessing engineering, value-added processing

W. Todd Monroe (M) • Molecular and cellular engineering

Cristina M. Sabliov (M) • Bioprocessing, separation methods, FEA modeling

Chandra S. Theegala (M) • By-product utilization, bioenergy, wastewater treatment, biosensing

Malcolm E. Wright (EM) • Mechanization of biological and agricultural systems

Faculty in other departments:

Giovanna Aita (3F) • Biomass conversion, antimicrobials for food, characterization of antimicrobial resistant bacteria
Subramaniam Sathivel (M) • Food engineering with emphasis on design and development of food processing unit operations; preservation and packaging of foods (coatings, edible films, microencapsulation); thermal, rheological, and functional properties of ingredients and foods; development of nonfood materials from biological wastes including biodiesel
Louis Thibodeaux (M) • Chemodynamics, hazardous waste transport

(See departmental website for latest listing.)

Masters

Biological & Agricultural Engineering, M.S.BAE

Master's in Biological & Agricultural Engineering (MBAE)

This department offers master's study in biological and agricultural engineering, offered with both thesis and non-thesis options as well as the interdisciplinary PhD in engineering science through the College of Engineering. Students pursuing advanced degrees are expected to have completed a previous degree in an accredited biological and agricultural engineering program or similar program. Students who do not have a BS degree in engineering may pursue an MS in the College of Engineering's interdepartmental program.

The thesis option requires 24 semester credit hours of approved coursework, plus six additional hours of thesis research credit, and successful defense of a research thesis. The non-thesis option requires a minimum of 36 semester hours of coursework including a three-credit hour project course. The project course incorporates a written report and oral presentation to the graduate advisory committee. Additional coursework may be necessary for students lacking the proper course prerequisites or as required by the graduate advisory committee and specified on an approved plan of study.

The interdisciplinary PhD in engineering science typically requires two to three years of work beyond the time required to complete the master's degree. See PhD website for further information.

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The curricular requirements include:

- At least half of coursework hours at the 7000 level or above.
- No more than two 7909 Special Topics courses may normally apply unless such a course was offered as a formal classroom course; at least one advanced Math or Statistic course at 4000 or graduate level for three credit hours or more and one credit of BE 7500 are required.

The student must pass a final comprehensive oral exam. At the discretion of the student's advisory committee, a written exam may be required.

Doctorate

Engineering Science, Ph.D.

(PES)

The college accepts qualified students with bachelor's or master's degrees in engineering or a pure or applied science to work toward a PhD in this interdisciplinary program. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee must consist of at least three

members of the graduate faculty. The major professor (advisory committee chair) must be from a department within the College of Engineering and at least one member of the student's committee must come from a department offering the PhD degree in the College of Engineering. The advisory committee must also include representatives from the sub-areas of specialization.

A PhD departmental-level academic course plan, approved by the student's advisory committee, should be submitted to the Associate Dean for Academic Programs in the College of Engineering by the start of the second semester of enrollment. Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science PhD plan of study as part of the application process. This early plan of study will map directly to the Doctoral Degree Audit form required by the LSU Graduate School as candidates near completion of their coursework.

The student will be required to complete a minimum of 54 semester hours of approved course work beyond the bachelor's degree and prepare a dissertation acceptable to his or her advisory committee and The Graduate School. At least half of the course work (27 semester hours) must be taken in courses offered by departments within the College of Engineering. Requirements include 24 hours of course work concentrated in at least two sub-areas of specialization within one or more academic departments. The remaining 30 semester hours of course work must contain no more than 15 hours in any one department.

Biological Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Biological Sciences offers research-oriented Master of Science (MS) and Doctor of Philosophy (PhD) degrees in two areas: Biochemistry and Biological Sciences. A major goal of the faculty in Biological Sciences is to provide training for graduate students who are interested in independent careers in the biological sciences and biochemistry. Biological sciences graduate students prepare for careers that emphasize an interdisciplinary approach to biology and undertake their degrees in one of the three divisions within the department. Biochemistry and Molecular Biology (BMB) offers research opportunities in areas such as the analysis of structure and function of complex carbohydrates, lipids, nucleic acids, and proteins; DNA repair; and study of extremophiles. In Cellular Developmental and Integrative Biology (CDIB), faculty conduct research in sensory and endocrine systems at the molecular, cellular, and systems level; developmental biology and cell differentiation; transcriptional regulation; intra- and inter-cellular signaling; functional and comparative morphology; neurobiology; comparative and environmental physiology. The interests of the Systematics, Ecology and Evolution (SEE) division facilitate advanced study of the ecological and evolutionary processes of a broad range of organisms and habitats across the globe. Our biochemistry graduate degrees prepare students for professional careers in biochemical research and teaching in the areas of cell and molecular biology; virology; plant biochemistry; enzymology; protein/DNA interactions, structural biology and biophysics.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department in early January for fall admission and in early May for spring admission. Applicants must adhere to the application deadlines established by the Graduate School. It should be noted the department deadlines are earlier than those of the Graduate School. It is suggested that applications for fall admission be submitted by **December 31**. The spring admission deadline is **April 30**.

Students seeking admission must be admitted to the Graduate School at LSU and have earned one of the following degrees: BS, BA, or MS in biology, biochemistry, chemistry, or related fields. Candidates holding other degrees (e.g., DVM or MD) may also apply. Three letters of recommendation are required, and a minimum GPA from the undergraduate program of 3.0 on a scale of 4.0 is expected. Prospective students are required to take the GRE general test, and a score of 316 (verbal and quantitative combined) or better is expected. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to all full-time students in the form of research or teaching assistantships or fellowships. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Graduate Faculty

(check current listings by department by clicking this link)

Christopher C. Austin (M) • Herpetology, systematics
Sue G. Bartlett (M) • Chloroplast protein biogenesis, synthesis, and transport
John R. Battista (M) • Mechanisms of mutagenesis in *Deinococcus radiodurans* and *Saccharomyces cerevisiae*
Mark A. Batzer (M) • Comparative genomics and molecular genetics, mobile element biology, computational biology, human genome organization, human population genetics
Meredith Blackwell (M) • Mycology, fungal-insect associations, fungal molecular evolution
Terry M. Bricker (M) • Structural and functional properties of photosystem II
Jeremy M. Brown (6A) • Computational phylogenetics, phylogeography, and molecular evolution
Kenneth M. Brown (M) • Aquatic ecology
Robb Brumfield (M) • Genetic resources and ornithology
Michael Brylinski (6A) • Computational molecular biology
John T. Caprio (M) • Neurobiology, olfaction and taste
Kevin R. Carman (EM)
Prosanta Chakrabarty (6A) • Ichthyology, biogeography, systematics
Brent C. Christner (M) • Microbial ecology, physiology, and diversity; microbiology of the cryosphere
James T. Cronin (M) • Population and community ecology, plant-herbivore interactions, biological pest management
Maheshi Dassanayake (6A) • Genomic and transcriptomic resources, comparative genomics, and stress absorption
Thomas H. Dietz (EM)
Patrick J. DiMario (M) • Interactions of nucleolar proteins involved in RNA and ribosome processing and assembly
Huanggen Ding (M) • Regulatory function and metabolism of iron sulfur proteins
William T. Doerrler (M) • Membrane biogenesis in *Escherichia coli*
David Donze (M) • Chromatin structure and gene expression
Jessica Eberhard (3F) • Behavior, molecular systematics and mitochondrial genome evolution, especially of parrots
Brett Elderd (6A) • Quantitative population, disease, and community ecology
Jake Esselstyn (6A) • Mammalogy, biogeography, and evolution
John W. Fleeger (EM) • Benthic and marine ecology
Fernando Galvez (M) • Integrative fish biology, environmental physiology, aquatic toxicology

Evanna L. Gleason (M) • Cellular and synaptic neurophysiology of the vertebrate retina
Christopher Gregg (3P) • Science education
Anne Grove (M) • Protein-nucleic acid interactions, DNA bendability, RNA polymerase III from yeast
Mark S. Hafner (M) • Molecular systematics, mammalogy
Steven C. Hand (M) • Bioenergetics, environmental control of gene expression, comparative biochemistry
Kyle Harms (M) • Tropical evolutionary ecology of plants and their interactions with other organisms
Craig M. Hart (M) • Chromosome organization, chromatin structure, gene expression
Michael E. Hellberg (M) • Marine invertebrate speciation and molecular evolution
Dominique G. Homberger (M) • Functional morphology of vertebrates, especially birds
Naohiro Kato (M) • Visualization of genomic function dynamics
Morgan W. Kelly (6A) • Marine evolution and ecology
Joomyeong Kim (M) • Mammalian genomic imprinting, genome evolution and function
Gary King (M) • Roles of gas-producing or consuming bacteria
Roger A. Laine (M) • Carbohydrate, glycolipid, and glycoprotein structural analysis
John C. Larkin (M) • Molecular plant developmental biology
Yong-Hwan Lee (M) • Macromolecular x-ray crystallography, environmental regulation of cellular metabolism, protein chemistry
Vincent LiCata (M) • Protein structure and function, energy management in proteins, solvent in protein function and stability
David J. Longstreth (M) • Stress physiology, photosynthesis and carbon balance, adaptations to high salinity
Rui Lu (6A) • RNAi mediated antiviral mechanisms and transmembrane protein signaling
Bing-Hao Luo (M) • Signal transduction, cancer pathology and immunology
John W. Lynn (M) • Fertilization and early development
Karen P. Maruska (6A) • Neural basis of social behavior
Thomas S. Moore (EM)
James V. Moroney (M) • Role of membrane transport and CO₂ fixation in photosynthesis and bioenergetics
Marcia Newcomer (M) • Protein crystallography
Gregg S. Pettis (M) • Mechanism of conjugation in the gram positive bacteria *Streptomyces* and *Mycobacteria*
William J. Platt III (M) • Population and community ecology, fire ecology
James V. Remsen Jr (M) • Ornithology
Frederick H. Sheldon (M) • Molecular systematics of birds
Joseph F. Siebenaller (M) • Comparative biochemistry of marine organisms
Aaron P. Smith (6A) • Environmental control of gene regulation, biotechnology
Jacqueline M. Stephens (M) • Signaling and gene expression in obesity and Type 2 diabetes, adipocyte development
William B. Stickle Jr (M) • Physiological ecology, marine environmental physiology
Ryoichi Teruyama (6A) • Neuroendocrinology
J. Cameron Thrash (6A) • Biogeochemical roles of microorganisms in environmental systems
Lowell E. Urbatsch (M) • Systematics and evolution of vascular plants
Grover L. Waldrop (M) • Mechanistic enzymology and structure/function relationships in proteins
G. Bruce Williamson (M) • Plant community ecology, tropical biology of Amazonia
E. William Wischussen (3A) • Role laboratory experiences and intensive orientations on student learning and success in biological sciences

Other Faculty:

Vishwa Deep Dixit (3F) • Aging, immunology, and the role of immune cells in obesity
Konstantin G. Kousoulas (M) • (Department: Pathobiological Sciences) Virology and biotechnology, molecular biology and pathogenesis of herpes virus and coronaviruses, application of viral vectors for gene therapy, development of DNA-based methods for diagnosis of infectious disease pathogens and genetic diseases
Paul A. Larock (M) • (Department of Oceanography and Coastal Sciences) Estuarine pollution, microbiology, geomicrobiology, and oceanography
Irving Mendelssohn (EM-Department of Oceanography and Coastal Sciences) Wetland and barrier island plant ecology, plant physiological ecology
Heike Muenzberg-Gruening (3F) • Biology of social insects
Randall L. Mynatt (3F) • Regulation of adipocyte development and function

Kevin Matthew Robertson (3F) • Disturbance ecology & plant ecology
Matthew G Slocum (3F) • Disturbance ecology & plant ecology

Masters

Biochemistry, M.S.

Master of Science (MS) in Biological Sciences or Biochemistry (SBIOL) (SBCH)

The academic course plan for each student will be developed in consultation with by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a thesis research project. Twenty-four hours of credit at the graduate level must be earned, including a maximum of six hours of credit for the thesis/special project. The curricular requirements include:

- At least 12 hours at the 7000 level or above, excluding thesis research.
- A primary area consisting of a minimum of six hours of thesis research.
- A minimum core requirement of four credit hours in: BASC 7000 (one hour), BIOL 7921 (one hour) and two hours in various topic-oriented seminars offered by the Department (BIOL 7901, BIOL 7902, or BIOL 7946).

As a component of professional development, all graduate students must teach in the undergraduate program at least one semester during their degree program. The student must establish an academic course plan within the first year. In addition, they must pass a final exam consisting of evaluation of a written thesis and an open-to-the-public thesis defense. The student's committee will administer a final oral exam following the public defense.

Biological Sciences, M.S.

Master of Science (MS) in Biological Sciences or Biochemistry (SBIOL) (SBCH)

The academic course plan for each student will be developed in consultation with by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a thesis research project. Twenty-four hours of credit at the graduate level must be earned, including a maximum of six hours of credit for the thesis/special project. The curricular requirements include:

- At least 12 hours at the 7000 level or above, excluding thesis research.
- A primary area consisting of a minimum of six hours of thesis research.
- A minimum core requirement of four credit hours in: BASC 7000 (one hour), BIOL 7921 (one hour) and two hours in various topic-oriented seminars offered by the Department (BIOL 7901, BIOL 7902, or BIOL 7946).

As a component of professional development, all graduate students must teach in the undergraduate program at least one semester during their degree program. The student must establish an academic course plan within the first year. In addition, they must pass a final exam consisting of evaluation of a written thesis and an open-to-the-public thesis defense. The student's committee will administer a final oral exam following the public defense.

Doctorate

Biochemistry, Ph.D.

(PBCH)

The academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a dissertation degree requiring the publication of a novel research project. Fifteen hours of credit at the graduate level must be earned including a maximum of nine hours of credit for the dissertation. The curricular requirements include:

- At least 15 hours at the 7000 level or above, excluding independent research, dissertation research and directed readings.
- A primary area consisting of a minimum of nine hours of dissertation research hours and nine hours in a specified field of study.
- Biochemistry PhD students are required to take (or transfer credit in) specific courses as follows to fulfill part of the requirement for 15 hours of course work:
 - One course in Proteins: Choose either BIOL 7284 or BIOL 7285.
 - One course in nucleic acids biochemistry and molecular biology: Choose BIOL 7280.
 - One course in lipids and membranes or carbohydrate biochemistry: Choose either BIOL 7288 or BIOL 7290
- A minimum core requirement of seven credit hours in (BASC 7000 and six additional seminar hours distributed as two hours in BIOL 7921 and four hours in various topic-oriented seminars offered by the Department (BIOL 7901, BIOL 7902 or BIOL 7946). BIOL 7921 provides a forum by which students present their research prospectus and provide an update (exit seminar) on research progress. All faculty and students are invited to attend this course. Other seminar courses vary in content and style, and are designed to keep students abreast of recent developments in the biological sciences, expose students to specialized topics and give students experience in giving presentations.

Other specific degree requirements include passing a qualifying exam at the first year and a general exam prior to the end of the third year in the program. The general exam includes a written and oral component. Prior to scheduling the final examination and submission of the written dissertation, the student is required to have a first author publication in press in a peer-reviewed journal. As a component of professional development, all graduate students are required to teach in the undergraduate program at least one semester during their degree program.

Biological Sciences, Ph.D.

(PBIOL)

The academic course plan for each student will be developed in consultation with by the student's graduate advisory committee. As a component of professional development, all graduate students are required to teach in the undergraduate program at least one semester during their degree program.

Interdepartmental Studies in Business Administration (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The E.J. Ourso College of Business offers two interdepartmental graduate programs, the Master of Business Administration (MBA) and the Doctor of Philosophy (PhD) in Business Administration with concentrations in Finance, Management, Marketing, and Information Systems & Decision Sciences. Graduate programs in the college have been continuously accredited by the American Assembly of Collegiate Schools of Business since 1963.

The MBA is a professional degree designed to provide advanced business education and preparation necessary for graduates to assume leadership positions in business enterprises or in other organizations where high-level business management and analysis ability and skills are required. The program has been structured to develop the managerial and analytical skills that have become essential to effective decision-making and problem solving in complex and rapidly changing environments. At the same time, the curriculum is sufficiently flexible to permit students to elect specialized course work that furthers individual career goals and enhances specific areas of professional interest. The program emphasizes practical applications, while recognizing that a foundation of solid theoretical knowledge is necessary for lifelong learning and growth.

The primary mission of the PhD program is to prepare graduates for successful careers in university teaching and research or for positions in government or industry that require similar analytical and research skills. Graduates currently hold academic and administrative appointments at major universities and colleges across the United States and around the world. Specific questions about the PhD programs should be directed to the graduate advisor in the appropriate department.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Graduate Faculty

(check current listings by department by clicking this link)

Instruction for the interdepartmental programs in business administration is provided by the graduate faculty of the E.J. Ourso College of Business's six academic departments: accounting, economics, finance, information systems and decision sciences, management, and marketing. Please see the individual departmental listings for names and research areas of the faculty.

Financial Assistance

Financial assistance is available to many PhD students through the individual home department.

Support is available to MBA students in the form of scholarships and graduate assistantships. All financial support is competitively awarded on the basis of academic merit. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School, and the Flores MBA Program if applying for an MBA.

Masters

Business Administration, MBA

(MBADM)

The Flores Master of Business Administration Program

Five distinct paths lead to the MBA degree: the 17-month Executive (EMBA), the 22-month Professional (PMBA), the 22-month full-time MBA, the 27-month Online MBA (OMBA), and the four-year cooperative JD/MBA program (which awards both a Bachelor of Civil Law (BCL) and a Juris Doctorate (JD)). All Flores MBA programs are cohort based programs with specific course requirements.

The Flores Executive MBA Program (EMBA) is designed for working professionals who are preparing for positions in executive management or ownership and can earn their degree while continuing their current employment. EMBA students generally meet every other Friday and Saturday for 17 months. The program includes a two-week international residency. Tuition and MBA fees cover tuition, books, materials, parking, and international residency.

The Flores Professional MBA Program (PMBA) offers evening classes in a flexible format and accommodates the schedules of professionals with at least three years of full-time work experience who are preparing for management positions. PMBA students meet on campus over a continuous, 22-month period. Tuition and MBA fees cover tuition, books, materials, and parking.

The Flores MBA full-time program offers daytime classes to persons seeking a solid managerial core. The program encourages summer internship between the two years of study. Students study a specially designed core curriculum and take additional electives in one or more areas of specialization.

The JD/MBA dual degree program offers a unique combination of courses that count toward both degrees, resulting in a Bachelor of Civil Law (BCL), a Juris Doctorate (JD), and a Master of Business Administration (MBA). Students attend classes for four years. Admission to the MBA program is selective. Applicants must complete a formal application, submit scores from the Graduate Management Admission Test (GMAT), and submit transcripts from each college or university attended. Applicants must also apply to the Paul M. Hebert Law Center.

The LSU Online Flores MBA Program (OMBA) is designed for working professionals with a minimum of five years of post-baccalaureate, professional work experience who either live out-of-state or their lifestyle does not allow them the opportunity to attend the campus-based professional or executive programs. These students learn on a part-time basis while working. Students take one course per seven-week module and can graduate in 27-months.

Common across all of the Flores MBA Program formats are cohort-based classes with a 33 credit-hour 7000-level core BADM course requirement that is taken in lock-step fashion. The following courses are required for all formats and constitute the thirty-three credit hour MBA core requirement: BADM 7020, BADM 7030, BADM 7050, BADM 7060, BADM 7070, BADM 7090, BADM 7100, BADM 7120, BADM 7140, BADM 7190, and BADM 7200.

In addition, each of the program formats has the following requirements:

- Full-time Format: 52 total credit hours required including the thirty-three credit hour MBA core (see above), four credits of BADM 7010 (1 credit each of four sequential semesters), and fifteen credit hours of approved MBA electives.
- PMBA/EMBA/OMBA Formats: 42 total credit hours required including the thirty-three credit hour MBA core (see above), and nine credits of approved MBA elective credit.
- JD/MBA Format: If accepted into both programs, JD/MBA candidates are required to take the same thirty-three credit hour MBA core (see above) – plus two credits of BADM 7010, six credits of approved MBA electives, and at least four approved transfer credits from the Law School.

Please refer to the following website for additional details about the program: business.lsu.edu/Flores-MBA/Pages/Flores-MBA-Program.aspx

Doctorate

Business Administration, Ph.D.

(PBDM)

Concentrations in Finance (GFIN), Information Systems & Decision Science (ISDS), Management (MGMT), Marketing (GMKT)

Each doctoral program is individually tailored to the student as a function of previous graduate course work and career objectives. Programs are designed to ensure thorough theoretical and methodological training in the student's chosen discipline, but are sufficiently flexible to provide a range of major and minor field options. Doctoral study is fulfilled in a variety of ways, primarily through course work, independent reading, and dissertation research, but also through informal "brown bag" seminars, visiting faculty colloquia, and participation in professional conferences and symposia. Doctoral students are expected to work closely with each other and with the college's graduate faculty and are encouraged to collaborate on research of shared interest.

Although specific course work requirements vary from student to student, all doctoral students must satisfy the following curriculum requirements:

- major field of specialization (finance; information systems and decision sciences; management; or marketing)
- minor field
- supporting field
- breadth of study in business administration and economics
- research methodology requirement

At a minimum, students must complete 60 hours of course work and dissertation credit beyond the baccalaureate degree requirements.

Specializations

Doctor of Philosophy (PhD) in Business Administration with a concentration in Finance (PBADM)(GFIN)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a dissertation degree requiring a dissertation. Fifty-four hours of credit at the graduate level must be earned. The curricular requirements include:

- At least 54 hours at the 7000 level or above
- A primary area consisting of a minimum of 18 hours of earned credit in Finance
- A minor area consisting of a minimum of 12 hours of Economics
- A minimum of nine hours of credit earned for breadth of study. Three hours to be taken in each of the following: Accounting, Management, and Marketing

The student must pass a general exam consisting of a written examination and successful defense of his/her dissertation.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/finance/Pages/PhD-Finance.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/finance/Pages/PhDCurriculum.aspx).

Doctor of Philosophy (PhD) in Business Administration with a concentration in Information Systems and Decision Sciences (PBAIS)

The PhD program (PhD in business administration with a concentration in ISDS) is designed for full-time study and involves 60 credit hours at the graduate level. The program consists of 12 hours of "common body of knowledge" course work covering all other business disciplines; 12 hours of major field core courses; 9 semester hours in a minor area; 12 hours of research methodology; 6 semester hours in a supporting area; and 9 hours of dissertation studies. Individuals with a master's degree in a business field may substitute much of their previous graduate course work for the "common body of knowledge" course work. Students should plan to spend two to three academic years (fall, spring, and summer) completing course work. The specific departmental-level academic course plan must be approved by the student's advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied. Both written and oral comprehensive examinations are required upon completion of the course work. Each PhD candidate is also required to design, implement, and complete an original dissertation

under the supervision of an ISDS faculty member. Completion of the dissertation usually takes 12 to 18 months. Overall, the PhD program normally requires four years to finish.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Information-Systems-Decision-Sciences/Pages/PhD.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/Information-Systems-Decision-Sciences/Pages/PhD-Curriculum.aspx).

Doctor of Philosophy PhD in Business Administration, concentration in Management (PBDM) (GMGT)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a dissertation degree requiring a dissertation. Sixty-three hours of credit at the graduate level must be earned, including a minimum of nine hours of credit for the dissertation and 'breadth of study' requirements which may be fulfilled with prior graduate level course work. The curricular requirements include:

- At least 42 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A primary area consisting of a minimum of 24 hours of earned credit in a specified field of study.
- A minimum core requirement of 15 credit hours in management core courses required of all PhD students: MGT 7301, MGT 7600, MGT 7800, MGT 7811, and MGT 9201.
- Must pass a general/qualifying/final exam consisting of a written exam and a comprehensive oral exam.
- Completion of a written and oral general/qualifying/exam consisting of a written exam and a comprehensive oral exam.
- Successful completion and defense of the dissertation.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Management/Pages/PhD-Management.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/management/Pages/PhD-Curriculum.aspx).

Doctor of Philosophy (PhD) in Business Administration with a concentration in Marketing (PBDM)(GMKT)

The PhD program (PhD in business administration with a concentration in marketing) is a year round program (fall, spring, and summer) for full-time study. The program consists of 21 semester hours of marketing course work, 12 semester hours in a minor area, six semester hours in a support area, and 18 semester hours of "common body of knowledge" course work covering all other business disciplines. Students should plan to spend two to three academic years (fall, spring, and summer) to complete course work and devote summer terms to advance their research with fellow doctoral students and faculty members. Upon completion of major coursework, students must pass a written qualifying exam and an oral exam. Each PhD candidate is also required to design, implement, and complete an original dissertation under the supervision of a marketing faculty member. Overall, the PhD program normally requires four years to complete.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Marketing/Pages/PhD-Marketing.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/marketing/Pages/PhDCurriculum.aspx).

Graduate

Dual Degree: JD/MBA

Students interested are encouraged to visit the individual program site.

- JD/DCL-MBA

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/DCL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the website listed above.

Students successfully completing the program listed above will receive two degrees, a JD/DCL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Students wishing to pursue dual degrees must complete and submit the "Request for Dual Degree" form.

Chemical Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Cain Department of Chemical Engineering has received national recognition for its contributions to chemical engineering, science, and education. During the past five years, an average of six PhD degrees and six MS degrees have been awarded per year. More than 50 LSU chemical engineering graduates teach or have taught in universities across the nation and throughout the world, and many hold prestigious positions in government and industry. Four are members of the National Academy of Engineering. The LSU Department of Chemical Engineering is consistently ranked among the top 30 in the nation in external research funding, according to *Chemical and Engineering News*.

Nearly 60 students are currently enrolled in chemical engineering MS and PhD programs. Major research areas include reaction engineering, environmental engineering and waste treatment, transport phenomena and separations, polymer processing, process control, catalysis, materials processing, biochemical engineering, and thermodynamics.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department beginning February 1. Applicants must adhere to the application deadlines established by the Graduate School. Complete applications received by **February 1** will be given first consideration and applications may not be accepted after **April 15**.

Students seeking admission must submit, through the online application systems, satisfactory credentials from previous study, acceptable GRE scores on the verbal and quantitative portions of the test, a current resumé/CV, and a minimum of three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Meeting the minimum admission requirements established by the Graduate School does not necessarily ensure acceptance into the department's graduate program. The department reviews the record of each applicant to assess promise for success at the graduate level, taking into consideration grade point average, undergraduate preparation, recommendations, GRE scores, TOEFL, IELTS, or PTE scores (for international applicants), and any other information that can contribute to the review. In rare instances, a student who does not meet all requirements may be admitted provisionally. Provisional admission is granted on a case-by-case basis and includes, but is not limited to, the following scenarios:

- A student has not yet taken the GRE but plans to do so prior to the start of classes for the semester he/she plans to enter. In this case, student generally would hold at least a 3.5 cumulative undergraduate GPA and would have very high recommendations and/or other above satisfactory credentials.
- A student has a cumulative undergraduate GPA of at least 2.85 but below a 3.0 and has achieved an exceptionally high score on the GRE, received very high recommendations and other above satisfactory credentials.

Financial Assistance

Financial assistance is available to well-qualified students and is awarded at the discretion of the department graduate admissions committee following the complete evaluation of the student's application record. Support may be available through the student's home department or other units in the form of research or teaching assistantships and/or fellowships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School and the department. Students desiring financial support should apply early, have all requested documents sent to the department, and fully communicate their own status and needs.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Michael G. Benton (M) • Genomics, bioengineering, metabolic engineering, biosensors

Armando B. Corripio (EM)

Kerry Dooley (M) • Heterogeneous catalysis, high-pressure separations

John C. Flake (M) • Semiconductor Processing, Microelectronic Device Fabrication

Gregory Griffin (M) • Electronic materials, surface chemistry, CVD

Douglas P Harrison (EM)

Martin Hjortso (M) • Biochemical reaction engineering, applied math

Francisco R. Hung (M) • Nanoporous materials, confined fluids, liquid crystals

F. Carl Knopf (M) • Supercritical fluid extraction, ultrafast kinetics

Edward McLaughlin (EM)

Adam T. Melvin (6A) • Bioengineering, microfluidic device fabrication, biochemical assay development

K. Nandakumar (M) • Computation fluid dynamics, modeling of multiphase flows

Ralph Pike (EM) • Fluid dynamics, reaction engineering, optimization

Geoffrey L. Price (EM)

Danny D. Reible (EM)

Richard G. Rice (EM)

Jose A. Romagnoli (M) • Process control

William A. Shelton (M) • Chemical dynamics, surface chemistry, electronic and energy materials

James J. Spivey (7M) • Catalysis

Arthur M. Sterling (EM)

Louis Thibodeaux (M) • Chemodynamics, hazardous waste transport

Karsten Thompson (M) • Transport and reaction in porous media

Kalliat Valsaraj (M) • Environmental transport, separations
Mary J. Wornat (M) • Fuels, Pyrolysis, and Combustion
Ye Xu (6A) • Computational heterogeneous catalysis, electrocatalysis, and surface chemistry

Masters

Chemical Engineering, M.S.CHE

(MCHE)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

This department offers both the thesis and non-thesis master's programs. Students are encouraged to elect the thesis option, if possible. This is a thesis degree requiring a thesis/special project. Thirty hours of credit at the graduate level must be earned including a maximum of six hours of credit for the thesis/special project. The curricular requirements include:

- A minimum core requirement of 12 credit hours in the chemical engineering core courses must be earned. The core courses are: CHE 7110 Mathematical Methods in Chemical Engineering (3), CHE 7120 Chemical Engineering Thermodynamics (3), CHE 7130 Fundamentals of Heat and Mass Transport (3), and CHE 7140 Chemical Reactor Design Methods (3).
- At least six hours of thesis credit (CHE 8000) must be earned.

The student must pass a final exam consisting of a comprehensive oral exam.

In the non-thesis option, 36 semester hours of credit at the graduate level must be earned. The curricular requirements include:

- A minimum core requirement of 12 credit hours in the chemical engineering core courses must be earned. The core courses are: CHE 7110 Mathematical Methods in Chemical Engineering (3), CHE 7120 Chemical Engineering Thermodynamics (3), CHE 7130 Fundamentals of Heat and Mass Transport (3), and CHE 7140 Chemical Reactor Design Methods (3).
- The student must pass a written comprehensive examination for the non-thesis option.

Doctorate

Chemical Engineering, Ph.D.

(PCHEN)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The PhD degree requires a dissertation. Thirty (30) hours of credit at the graduate level must be earned. The curricular requirements include:

- at least 18 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned, and must include a minimum core requirement of 12 credit hours in the chemical engineering core courses: CHE 7110 Mathematical Methods in Chemical Engineering (3), CHE 7120 Chemical Engineering Thermodynamics (3), CHE 7130 Fundamentals of Heat and Mass Transport (3), and CHE 7140 Chemical Reactor Design Methods (3).
- The remaining 12 hours of graduate level course work may be a formal minor in another department or may consist of a variety of courses selected from several departments, including chemical engineering.
- Students already holding the master's degree can transfer up to 9 hours of course work, with a maximum of 2 core courses eligible for transfer. Every credit transfer is at the discretion of the Director of Graduate Studies. Six hours of 7000 level

chemical engineering courses must be taken at LSU, in addition to any core courses whose equivalent was not taken for the master's degree.

The student must pass a written qualifying exam within one year of enrollment. Within one year of successfully passing the qualifying exam, a PhD student should take the general exam. The general exam is an oral defense of a written plan for doctoral research. A final exam must also be passed and this is an oral defense of the doctoral dissertation.

Chemistry (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Chemistry includes 27 research faculty, approximately 150 graduate students, and 25 support staff members. Research opportunities are offered in analytical, biological, computational, environmental, inorganic, macromolecular, materials, organic, and physical chemistry. The PhD program promotes independent study and research. Extensive collaboration with local industrial research laboratories enriches the educational experience and enhances postgraduate job opportunities.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803.

Successful applicants must meet the requirements for admission to the Graduate School and must also demonstrate a strong background and interest in chemistry. A detailed description of admission procedures and general regulations may be obtained from the departmental website.

Financial Assistance

Fellowships, teaching assistantships, research assistantships, and enrichments are available to qualified PhD students on a competitive basis. Four-year Board of Regents Graduate Fellowships and Economic Development Assistantships (EDA) are available for superior students; these range from \$25,000 to \$30,000 per year. Teaching assistants instruct undergraduate laboratories and spend about 20 hours per week performing these and other teaching duties. Research assistantships are available to advanced students through grants obtained by individual faculty members. The average graduate assistantship salary is approx. \$22,500 per year.

Facilities

- LSU Libraries provides extensive chemistry resources in print and electronic format. Print resources are integrated with the sciences collection in the main library while most electronic resources are made available to faculty, staff, and students at their

desktops and/or through extensive campus computer labs, wireless networks, and off-campus access. Among the electronic resources offered are SciFinder and *Web of Science*.

- Departmental researchers have access to LSU's unique synchrotron light source at the Center for Advanced Microstructures and Devices (CAMD). Beamlines are dedicated to experiments in the far ultraviolet and x-ray electromagnetic spectral regions.
- Six available solution and solid state NMR spectrometers operated and maintained by two skilled staff PhD scientists, range from 250 MHz to a new cold-probe 700 MHz instrument.
- Four ultrafast laser systems located in the department include a Ti-sapphire amplified femtosecond laser system; a picosecond NdYAG regenerative amplified laser system for Raman and transient infrared spectroscopy; an Ar-ion pumped femtosecond Ti sapphire laser system; and a modelocked NdYAG sync-pumped dye laser system.
- The Structure Analysis Laboratory houses two modern computer-controlled single crystal x-ray diffractometers (Bruker-Nonius Kappa CCD and a new Bruker Kappa Apex II system) operated by a professional service crystallographer. Dedicated computers control all aspects of data collection, data analysis, graphics presentation, and publishing. Cryogenic facilities provide for routine low-temperature structure determination. A computercontrolled powder diffractometer is also available.
- The Polymer Analysis Laboratory provides advanced equipment for characterization of macromolecules, supramolecular assemblies, colloids, complex fluids, and related materials. Included are three custom-built static and dynamic laser light scattering systems; three additional light scattering and on-line viscometry systems, each coupled to a separate gel permeation chromatograph or asymmetric field flow fractionation chromatograph configurable for either aqueous or organic solvents; zeta potential analyzer and particle sizer; differential scanning calorimetry; thermogravimetric analysis; thermodielectric spectroscopy; dynamic mechanical spectroscopy; constant stress rheometer; small angle x-ray scattering; two surface pressure balances; analytical ultracentrifugation and precision densitometry; fluorescence and polarization microscopes; and scanning probe microscopy. Additional equipment is available through Louisiana's Applied Polymer Technology Extension Consortium.
- The Mass Spectrometry Facility offers a broad range of services with six mass spectrometers, including: a Varian Saturn 2200 GC/MS for GC separations and electron ionization (EI) or chemical ionization (CI); a Bruker Omnix MALDI-TOF mass spectrometer for mass analysis of synthetic and biopolymers as well as mid-mass organics; an Applied Biosystems QSTAR XL nano-LC-quadrupole/time-of-flight mass spectrometer for high resolution MALDI, electrospray, and APCI for proteomics work and exact mass measurements; an Agilent high resolution TOF electrospray system; and a new Bruker Ultraflex Extreme optimized for protein sequencing and tissue imaging. The GC/MSs and MALDI-TOF MS are open-access instruments. Two expert PhD mass spectrometrists staff the facility.
- Molecular modeling and graphics capabilities are provided by software packages such as SYBYL, Spartan, and Gaussian 09, which run on workstations and personal/laptop computers. LSU also owns site licenses to ChemDraw, Hyperchem, and the complete Cambridge Structural Database.
- A high-speed Ethernet LAN links all office, laboratory, and departmental computing facilities and is, in turn, connected to the main campus optic fiber. This series of networks provides access to all local mainframe and supercomputer facilities. Wireless network access is available throughout Choppin Hall.
- LSU has outstanding computational facilities ranging up to the 15.3 TFlops Tezpur. The Louisiana Optical Network Initiative (LONI) also offers access to a number of other supercomputer systems distributed across the state. Visit www.hpc.lsu.edu for details about high performance computing at LSU or www.loni.org to learn more about Louisiana's Optical Network Initiative.
- Other maintenance and support facilities include a full-time computer programmer who assists students and faculty with mainframe and personal computer problems; a multimedia/communications studio; a modern electronics shop; and a fully equipped and staffed machine shop.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Leslie G. Butler (M) • Solid state NMR and 3-D tomography studies for materials science
Frank K. Cartledge (EM) • Environmental chemistry and hazardous waste
Bin Chen (M) • Nucleation and biomimetic material design, structure-property relationships in materials
Robert L. Cook (M) • Environmental chemistry using advanced NMR techniques
William E. Crowe (7M) • Organic and organo-metallic chemistry using transition metal catalysts
William H. Daly (EM) • Polymeric materials based on polysaccharides
Barry Dellinger (M) • Environmental aspects of combustion
Randy Duran (M) • Macromolecular chemistry; surface chemistry of amphiphilic materials
Jayne C. Garno (M) • Analytical chemistry, scanning probe microscopy, nanofabrication, biosensing
S. Douglass Gilman (M) • Bioanalytical chemistry, microfluidics
Louis Haber (6A) • Physical chemistry of plasmonic nanoparticles.
Brian J. Hales (EM) • Biophysical
Randall W. Hall (EM)
Rendy Kartika (6A) • Organic chemistry; synthesis and natural products
Neil R. Kestner (EM) • Theoretical chemistry; chemical education
Revati Kumar (6A) • Theoretical chemistry, computational chemistry
Daniel Kuroda (6A) • Physical chemistry, two-dimensional infrared laser spectroscopy
Kenneth A. Lopata (6A) • Physical chemistry, time-domain quantum chemistry simulations
Megan A. Macnaughtan (6A) • Biophysical chemistry of proteins, NMR spectroscopy, bioanalytical chemistry
Luigi G. Marzilli (M) • Bioinorganic chemistry, inorganic medicinal chemistry
Andrew W. Maverick (M) • Nanoporous transition metal complexes, vapor deposition
Robin L. McCarley (M) • Scanning tunneling microscopy, molecular films
Sean P. McGlynn (EM)
Kermit K. Murray (M) • Biological and environmental mass spectrometry
Evgueni E. Nesterov (M) • Functional organic materials and molecular devices, physical-organic chemistry, photochemistry
John A. Pojman (M) • Macromolecular chemistry, kinetics, physical chemistry of polymerization
Erwin D. Poliakoff (EM) • Photoelectron spectroscopy and x-ray spectroscopy of nanoscale materials
William A. Pryor (EM)
Justin R. Ragains (6A) • Organic synthesis applied to biofunctional molecules
James W. Robinson (EM)
Paul S. Russo (EM)
Kevin M. Smith (M) • Total synthesis of complex unsymmetrical porphyrin systems
Steven A. Soper (EM)
David A. Spivak (M) • Organic and bioorganic network polymers, engineered organic solids, biopolymer engineering
George G. Stanley (M) • Bimetallic cooperativity in homogeneous catalysis, hydroformylation, molecular modeling
Carol M. Taylor (M) • Organic synthesis and bioorganic chemistry with a focus on post-translationally modified peptides
M. Graça H. Vicente (M) • Fluorescent porphyrin-based macrocycles for medicine
Isiah M. Warner (M) • Optical spectroscopies, biochemical and environmental analysis
Steve Watkins (EM)
Donghui Zhang (6A) • Design and synthesis of functional materials

Masters

Chemistry, M.S.

Two MS programs are also available. One requires only course work; the other requires a research thesis.

Chemistry (SCHEM) or (PCHEM)

Placement examinations and interviews with faculty committees are used to determine fields of interest and academic preparation. All PhD students must pass six cumulative examinations and a general examination composed of a research proposal and a comprehensive outline of independent research completed and planned.

Doctorate

Chemistry, Ph.D.

Chemistry (SCHEM) or (PCHEM)

Placement examinations and interviews with faculty committees are used to determine fields of interest and academic preparation. All PhD students must pass six cumulative examinations and a general examination composed of a research proposal and a comprehensive outline of independent research completed and planned.

Civil & Environmental Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Civil & Environmental Engineering's graduate program is characterized by its work in the areas of coastal engineering, environmental engineering, and infrastructure engineering. Graduate and research programs are organized within this framework into six focus areas: environmental engineering, geotechnical engineering, structural engineering, mechanics of materials, transportation engineering, and water resources/coastal engineering. All areas have excellent research facilities and equipment to conduct basic and applied research. Projects of local, regional, national and international importance are underway. In the last five years, graduate student enrollment has ranged from 100-120.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants must adhere to the application deadlines established by the Graduate School. Once an application is complete, applications for admission are evaluated by the department. The faculty review deadlines can be found on the graduate section of the department website (cee.lsu.edu). Applications for the summer term are strongly discouraged. International students are strongly encouraged to apply earlier than established deadlines to allow sufficient time for application review and processing of I-20 paperwork.

The LSU Graduate School requires that students submit directly to its office the following items: official transcripts (along with an English translation version for non-English speaking universities) from each and every institution attended, official GRE scores (sent directly from ETS to the LSU Graduate School code 6373) and International students whose native language is not English must also submit an official TOEFL, IELTS, or PTE score.

In addition to the documents and scores required by the LSU Graduate School, the Department of Civil & Environmental Engineering requires applicants to submit the following items: three Letters of Recommendation (no form required), and a Statement of Purpose. Also, applicants are encouraged (but not required) to submit a resumé. A writing sample is not required by our department but may be submitted if the applicant so desires. All of these additional items should be submitted electronically through the Graduate School admission system. Direct mailing of these items is discouraged.

Please note that meeting the minimum admission requirements established by the Graduate School does not necessarily ensure acceptance into the department's graduate program. The departmental faculty reviews each applicant's record to assess potential success at the graduate level, taking into consideration GRE scores, undergraduate and graduate preparation and grade-point averages, letters of recommendation, TOEFL, IELTS, or PTE scores (for international applicants), and any other supplementary information provided by the applicant. When all admission requirements are met, the faculty may recommend regular admission. If an applicant does not meet all requirements, he or she may be admitted provisionally. Applicants must have GRE score of 300 minimum (1100 on the old GRE scoring scale) for regular admission and 294 minimum (1000 on the old GRE scoring scale) for probationary admission to our graduate program. For the TOEFL, applicants must have a score of at least 550 on the paper-based test, a 213 on the computer-based test, or a 79 on the Internet-based test, or an IELTS score of 6.5, or a PTE score of at least 59; a TOEFL or IELTS score equivalent to 575 is required to be eligible for financial assistance.

Financial Assistance

Financial assistance is available to select students. For the Department of Civil & Environmental Engineering Graduate Program, financial assistance is primarily available in the form of graduate research or teaching assistantships. Amounts of stipends for research and teaching assistants vary from year to year and awardees are determined during the admission review process. Thus, it is important that all application materials be submitted in accordance with the LSU Graduate School and department deadlines. Assistantships at LSU are competitive with those of other large state universities. Many assistantships qualify the student for waiver of all in-state and out-of-state fees except for university fees.

Graduate Faculty

(check current listings by department by clicking this link)

Murad Yusuf Abu-Farsakh (3F) • Geosynthetic reinforcement of soils, subgrades, and base materials; Advanced in situ testing to evaluate soil properties; Numerical modeling of geotechnical and pavement engineering problems; Analysis, design, instrumentation, testing and LRFD calibration of deep foundations.

Donald Dean Adrian (EM) • Hydrology, mathematical modeling, wetlands, groundwater resources, environmental engineering

Aly Moussad Aly Sayed (6A) • Experimental/Computational multiscale/multiphysics assessment of wind, rain, and wave impact on structures, performance and resiliency enhancement of new and existing infrastructure for wind, waves, and earthquakes

Michele Barbato (M) • Structural engineering and dynamics, modeling/analysis of structural and geotechnical systems and stochastic process, structural retrofitting using fiber reinforced polymers, earthquake engineering, random vibration theory, computational reliability analysis

Chunsheng Cai (M) • Bridge engineering, prestressed concrete, wind engineering, structural dynamics, structural performance evaluation and rehabilitation

Qin Jim Chen (M) • Coastal engineering, prediction of storm surge and ocean waves, numerical modeling of coastal processes, nearshore circulation and sediment transport, design of coastal structures

William David Constant (M) • Transport and fate of hazardous substances, waste site remediation, contaminated sediments, natural attenuation

Zhi-Qiang Deng (M) • Environmental fluid mechanics, environmental hydrology, river engineering

Mostafa A. Elseifi (M) • Pavement modeling and design, field and laboratory characterization of asphalt mixtures

Vijaya K. Gopu (EM) • Structural engineering and structural mechanics

Maria Teresa Gutierrez-Wing (3F) • Bioplastics, nanomaterials for environmental applications, microalgal cultures (modeling, bioproducts, biofuels), aquaculture, water quality

Sherif S. Ishak (M) • Intelligent transportation systems

Sherif Ishak (M) • Traffic operation and control, traffic safety, intelligent transportation systems, human factors, and simulation

Jong Won Jung (6A) • Energy geotechnical engineering, sustainable use of engineering geo-material, sensor application to geo-engineering, and development of numerical tools

Ronald F. Malone (M) • Recirculating aquaculture, eutrophication, water quality modeling, wastewater treatment

John B. Metcalf (EM)

William M. Moe (M) • Environmental Engineering, biological waste treatment, biofilm processes, sequencing batch reactors, bioremediation, Air pollution control

Louay N. Mohammad (M) • Fundamental characterization of transportation materials, flexible pavement design and analysis, pavement instrumentation, computational and experimental mechanics

Ayman M. Okeil (M) • Bridge engineering, structural reliability, behavior of concrete structures, structural strengthening using composite materials, earthquake engineering

John H. Pardue (M) • Biological remediation, wetlands, environmental chemistry, fate and transport of contaminants, environmental engineering

Roger K. Seals (EM) • Geotechnical engineering, use and recycling of industrial by-product materials

Vijay P. Singh (EM) • Surface and subsurface hydrology, stochastic and mathematical modeling, irrigation hydraulics, entropy

Frank Tsung-Chen Tsai (M) • Groundwater hydrology/hydraulics, contaminant fate and transport in subsurface, inverse problems, aquifer heterogeneity characterization, geostatistics, water resources systems management

Mehmet T. Tumay (EM) • Geotechnical engineering, in situ testing, soil reinforcement and improvement

George Z. Voyiadjis (M) • Multiscale modeling and simulation of material behavior and structures, microstructural characterization of materials, nanomechanics, inelastic behavior of materials, damage mechanics, dynamic failure of materials, computational mechanics, composite materials, thin films and MEMS, refined theory of plate and shells

Clinton S. Willson (M) • Environmental fluid mechanics, Physical and numerical modeling of river hydrodynamics and sediment transport, high-resolution X-ray CT, multiphase flow in porous media

Chester G. Wilmot (M) • Emergency evacuation travel demand estimation, road safety research, travel survey methodology, transferability of travel demand models, prioritization procedures, and air quality research

Paul B. Wolshon (M) • Geometric highway design and traffic safety, traffic engineering and analysis, major event and emergency transportation management and operations

Zhong Wu (3F) • Accelerated pavement testing

Guoping Zhang (M) • Experimental soil mechanics/behavior, residual soils, consolidation behavior of clays and sands, analytical techniques in physics/materials science applied to geotechnical and environmental engineering

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The master's committee will include the student's major advisor and at least two additional members of the graduate faculty, while the PhD committee will include the student's major advisor and two additional members of the graduate faculty with an additional committee member ("dean's representative") appointed by the Graduate School.

Masters

Civil Engineering, M.S.CE

(MCE)

There are two options leading to the master's degree in civil engineering. The thesis-option MS requires a minimum of 25 credit hours of approved coursework, 6 hours of thesis credit (CE 8000) and an acceptable thesis defended in a final examination. The non-thesis option MS requires a minimum of 37 hours of approved coursework (including 3 hours of master's project work, CE 7740, toward an acceptable master's report), and a comprehensive final examination. Either option requires one hour of CE 7750 included in the course credit hours. Additional curricular requirements include:

- Some concentrations within Civil Engineering may have core course requirements that must be earned. These can be found on the department graduate program website.
- At least 50% of the course credit hours must be at the 7000-level.
- At least 50% of the course credit hours must be in Civil Engineering courses.

Coastal and Ecological Engineering, M.S.

(SCECO)

This thesis-option MS requires a minimum of 25 credit hours of approved course work, 6 hours of thesis credit (CE 8000) and an acceptable thesis defended in a final examination. This option also requires one hour of CE 7750 included in the course credit hours. Curricular requirements for this program include:

- A set of core courses. These can be found on the department graduate program website.
- At least 50% of the course credit hours must be at the 7000-level.
- At least 50% of the course credit hours must be in Civil Engineering courses.

Doctorate

Civil Engineering, Ph.D.

(PCE)

The PhD program in civil engineering requires passing a qualifying examination. Students entering the program with a bachelor's degree are required to earn 42 credit hours of approved coursework plus one credit hour of the CE 7750 Seminar (1) course, exclusive of thesis and dissertation credit. Students entering the program with the master's degree are required to earn 18 credit hours of approved coursework plus one credit hour for the CE 7750 Seminar (1) course, exclusive of thesis and dissertation credit. In addition to the coursework requirements, students must pass a qualifying examination within one year of enrollment, the general examination, prepare a dissertation, and pass a final examination on the dissertation. Additional curricular requirements include:

- Some concentrations within Civil Engineering may have core course requirements that must be earned. These can be found on the department graduate program website.
- At least 50% of all of the course credit hours must be at the 7000-level.
- At least 50% of the course credit hours must be in Civil Engineering courses.

Communication Sciences & Disorders (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Communication Sciences & Disorders is nationally recognized for its faculty's research in a number of areas including: fluency, voice, and swallowing disorders in children and adults; language development and impairment in children learning one or more languages, one or more dialects, or through cochlear implantation; and motor speech and cognitive-communicative disorders in adults with acquired neurologic disorders. Within their particular area of expertise, faculty members study the nature and cause of clinical conditions, design and evaluate assessment tools and treatments, and investigate treatment efficacy.

PhD program graduates are in high demand by university faculties across the country and by federal and state health and education agencies seeking well-trained scholars to help guide policy development, service implementation, and program evaluation. Master's graduates are eligible for national certification as speech-language pathologists once they pass the national certification examination. Speech-language pathologists are in demand nationally.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department within a month of completion of all required materials. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines (Departmental deadline: **February 1**) established by the LSU Graduate School.

Masters

Communication Disorders, M.A.

(ACOMD)

The department offers the Master of Arts in communication disorders with or without a thesis. The thesis option requires 33 hours of course work plus six hours of thesis credit. The non-thesis option requires 39 hours of course work and successful completion of a comprehensive examination. Required course work is designed to enable students to satisfy requirements for professional certification in speech-language pathology.

Classes required of all students include: COMD 7280 Neuroanatomical Bases of Speech and Hearing (3) COMD 7381 Language and Learning Disorders (3), COMD 7382 Voice Disorders (3), COMD 7385 Neuropathologies of Speech (3), COMD 7387 Aphasia in Adults (3), COMD 7480 Measurement and Diagnosis of Communication Disorders (3), COMD 7153 Research Design in Communication Science and Disorders (3), COMD 7384 Early Communicative Intervention (3), and COMD 7783 Dysphagia (3). Students must also complete six credit hours of clinical practice. Thesis students include six hours of COMD 8000 Thesis Research (1-12 per sem.). Non-thesis students include a 7000-level seminar and a 7000-level elective approved by the department.

Thesis students defend their theses orally to their thesis committee members. Non-thesis students write a comprehensive examination that is evaluated by a departmental committee.

Doctorate

Communication Disorders, Ph.D.

(PCOMD)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The doctoral program in Communication Disorders (COMD) requires 72 hours of graduate course work beyond the bachelor's degree. The program must have a minimum of nine hours of research tools including two graduate courses in statistics; 12 hours of dissertation work; and 51 hours of graduate course work related to the area(s) of emphasis (i.e., child language, adult language, phonology, fluency, neurogenic disorders, speech science, or others).

The student must pass a general exam including written and oral components demonstrating knowledge of the literature in the area of concentration, research, theory, and minor area (if applicable).

Communication Studies (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Established in 1928, the LSU Department of Communication Studies is one of the oldest communication departments in the nation and the first in the South to develop a doctoral program. Situated in a research-intensive university, the department and its faculty strive to foster the intellectual growth of each student while also attending to their development in the areas of teaching and service. Our goal is to prepare graduate students for success in their chosen profession in an environment that is innovative, stimulating, friendly, and humane.

The program is based in three inter-related areas of research interest: Communication Theory, Performance Studies, and Rhetoric. Within and between areas, a broad range of courses is offered, and each student is encouraged to design a departmental-level academic course plan that fits his or her interests. Course emphases include: aesthetics; argumentation; classical and contemporary rhetorical theory; cognitive information processing; contemporary performance theory and practice; conversation analysis; critical cultural theory and practice; critical media theory and practice; family communication; ethnography; health communication; history of rhetoric; interpersonal communication; narrative theory; nonverbal communication; qualitative and quantitative research methods; performance history and historiography; performance of diverse literary, oral, and other materials; persuasion; performance art; political communication; rhetorical criticism; religious communication; tourism studies; and visual culture and rhetoric.

Administration

Admission

All applicants for graduate study must submit their application and supporting materials through an online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be submitted electronically or mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. All documents submitted by or on behalf of the applicant are stored electronically and departments have access to them.

To apply to the graduate program in Communication Studies, applicants are required to complete the online application form, which includes a Statement of Purpose, and submit official GRE scores and transcripts of all college work. International students whose native language is not English also must submit an acceptable TOEFL, IELTS, or PTE score.

The department also requires three letters of recommendation (on letterhead and signed) and a sample of scholarly writing – e.g., a term paper or a thesis chapter. A vita is welcomed but not required.

Applications for admission are received and evaluated by the department from September through May. Applications for admission and an assistantship are due by **January 31** and awarded in February for the upcoming fall semester. All applicants must adhere to the application procedures and deadlines established by the LSU Graduate School and the CMST department.

The department accepts students into the program and awards assistantships based on the strength of the noted documents. Standards for admission are a cumulative GPA of 3.0+ on a 4.0 scale; a minimum score of 300 on the combined verbal and quantitative sections of the GRE; and as applicable, a TOEFL score of 550 or better. The writing sample should demonstrate and the letters address the applicant's ability to do graduate level work. Additional admission factors also are considered, such as vacancies in the program and the compatibility of the applicant's research interests with those of current faculty. Prospective students who do not meet the requirements may be admitted provisionally on a case-by-case basis.

Financial Assistance

The department awards approximately 25 teaching assistantships to new and continuing MA and PhD students each year. The assistantship requires students to teach or assist in teaching two courses per semester. Outstanding doctoral students may receive supplementary assistance from the LSU Graduate School or be awarded a Board of Regents or other fellowship. To ensure consideration for financial aid, a complete application should be submitted by January 31 prior to the fall semester the applicant wishes to enter.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Graham D. Bodie (M) • Listening and information processing, interpersonal communication, social support
Renee Edwards (M) • Interpersonal communication, research methods, message processing
Stephanie Houston Grey (7M) • Rhetoric and culture, science studies, aesthetics, trauma studies, identity
Rachel Hall (M) • History of visual culture, contemporary cultural theory and criticism
James H. Honeycutt (M) • Interpersonal communication, cognition, relational communication, mental imagery
Andrew King (M) • Rhetorical theory, political rhetoric, history of rhetoric
Bryan McCann (6A) • Rhetorical theory, cultural studies, social movements/communication activism
Loretta Pecchioni (7M) • Health communication, family communication, communication and aging
Tracy Stephenson Shaffer (M) • Performance studies, ethnography, popular culture and film
Patricia A. Suchy (7M) • Performance studies, film studies, Bakhtinian theory

The program offers an MA degree with a thesis or non-thesis option, a MA-PhD fast track program, and a PhD degree. All students develop a departmental-level academic course plan in consultation with and approved by their graduate committee. The committee consists of the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Masters

Communication Studies, M.A.

(ACMST)

For an MA degree without a thesis, a minimum of 36 course credit hours is required. The student must pass a comprehensive final exam that consists of six hours of written exams and a one hour oral exam.

For an MA degree with a thesis, a minimum of 30 course credit hours and six thesis hours (CMST 8000) are required. The student must complete a written thesis and pass a one hour oral exam.

The curricular requirements are:

Required Core

- CMST 7900 Introduction to Graduate Study in Communication Studies (3)
- A 7000 level seminar in Communication Theory (3)
- A 7000 level seminar in Performance Studies (3)
- A 7000 level seminar in Rhetoric (3)

If on assistantship:

- CMST 7901 Seminar in Pedagogy for the Communication Classroom (1)

Additional Courses

- At least 2 more courses in CMST at the 7000 level (6)
- At least 2 more courses in CMST at the 4000 or 7000 level (6)

Non Thesis or Thesis Option

Non Thesis Option

- At least 4 more courses at the 4000 or 7000 level, in or out of CMST (12)

Thesis Option

- At least 2 more courses at the 4000 or 7000 level, in or out of CMST (6)

- CMST 8000 Thesis Research (1-12 per sem.) (6 credits required)

36 (37) Total Credits

MA-Phd Fast Track Degree in Communication Studies

To qualify for the program, the student must complete the non-thesis MA degree in 1½ years, beginning the PhD sequence in the 2nd half of their 2nd year.

For MA curricular requirements please see above.

The PhD curricular requirements are:

Required Core

- CMST 7903 Research Writing in Communication Studies (3)

If on assistantship:

- CMST 7901 Seminar in Pedagogy for the Communication Classroom (1)

Additional Courses in CMST

- At least 2 more courses in emphasis at the 7000 level (6)
- At least 1 more course in another area at 7000 level (3)
- At least 2 more courses at the 4000 or 7000 level (6)

External Study Requirement:

- At least 3 courses outside of CMST (9)

Additional Courses

- At least 3 more courses in or out of CMST, at least 2 @ 7000 level (9)

Dissertation Research

- CMST 9000 Dissertation Research (1-12 per sem.) (9 hours; does not count towards total)

72 (73) Total Credits

= **36 (37) credits**

+ **36 MA credit**

Doctorate

Communication Studies, Ph.D.

(PCMST)

Required Core

- CMST 7900 Introduction to Graduate Study in Communication Studies (3)
- CMST 7903 Research Writing in Communication Studies (3)
- A 7000 level seminar in Communication Theory (3)
- A 7000 level seminar in Performance Studies (3)
- A 7000 level seminar in Rhetoric (3)

If on assistantship:

- CMST 7901 Seminar in Pedagogy for the Communication Classroom (1)

Additional Courses in CMST

- At least 2 more courses in emphasis at the 7000 level (6)
- At least 1 more course in another area at 7000 level (3)
- At least 2 more courses in emphasis at the 4000 or 7000 level (6)

External Study Requirement:

- At least 3 courses outside of dept. (9)

Additional course:

- At least 1 more course in or out of CMST at 7000 level (3)

MA credits

(exclusive of thesis credits) 30 credits maximum

Dissertation Research

- CMST 9000 Dissertation Research (1-12 per sem.) (9 hours; does not count towards total)

72 (73) Total Credits

Comparative Biomedical Sciences (Graduate Program)

Program Overview

The graduate program in comparative biomedical sciences offers an interdisciplinary approach to conducting biomedical research as it applies to humans and animals. The goal of the program is to educate and prepare students for successful careers in

academic, private industry, or government environments. Degrees granted include a PhD or MS degree in veterinary medical sciences with focuses in cell and molecular biology, environmental health sciences, anatomy, physiology, pharmacology, or toxicology. The school also has a DVM/PhD track for students accepted into the veterinary medicine program.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are accepted and evaluated by the department at any time, but applicants are not evaluated for admission or financial assistance until completed application materials have been received, including test scores, official transcripts, and letters of recommendation. Application should be initiated at least six months prior to anticipated entry. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE test scores, and three letters of recommendation. Minimum criteria for admission include ≥ 3.0 GPA out of 4.0 on the US system scale and a combined verbal and quantitative GRE score of ≥ 302 (1100 on the older exam version). International students whose native language is not English must also submit an acceptable TOEFL score (≥ 213 computer version or ≥ 79 Internet version or ≥ 550 paper version) or IELTS score (≥ 6.5), or PTE score of (≥ 59). One of the department graduate faculty members must agree in advance to accept the applicant as a student in his/her laboratory.

Financial Assistance

Financial assistance is available to some students. Financial aid consists of research assistantship stipends or fellowships. The amount of the award depends on prior educational performance and awards are made on a competitive basis; financial aid is rarely awarded to MS students. Special fellowships and tuition exemption may also be available. A student should contact his/her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School and preferably six months prior to anticipated entry.

Research Facilities

Research facilities include laboratories, instrument rooms, walk-in cold rooms, and rooms for radiolabel materials use, animal treatment, cell culture, photography, and storage. The department operates the Inhalation Research Facility, the Analytical Systems Laboratory, the Aquatic Research Facility, the Equine Medication Surveillance Laboratory, and the SVM Microscopy Center. The School of Veterinary Medicine also houses the Gene Probes & Expressions Systems Laboratory, LSU Flow Cytometry Core Facility, Veterinary Computer Resources, Veterinary Medicine Library, Division of Laboratory Animal Medicine, Louisiana Animal Disease Diagnostic Laboratory, a Biomedical Communications Unit, and the facilities of the Veterinary Teaching Hospital & Clinics.

Graduate Faculty

(check current listings by department by clicking this link)

Steven A. Barker (M) • Analytical toxicology and the neurochemistry of hallucinogens
Hermann H. Bragulla (6A) • Development of skin and skin appendages in normal and diseased states
Henrique Cheng (M) • Molecular mechanisms controlling stem cell differentiation and islet cell hormone secretion
Ji-Ming Feng (7M) • Pathogenesis of autoimmune-mediated demyelinating diseases
Marxa Figueiredo (3F) • Development of cancer gene therapy using viral vectors
Joseph Francis (M) • Pulmonary and cardiovascular pathophysiology
David W. Horohov (3F) • Equine immunology
Kevin M. Kleinow (M) • Aquatic animal pharmacology and toxicology, developmental toxicology, zebrafish as genomic models for disease, Deep Horizon
Charles C. Lee (6A) • Neurobiological mechanisms underlying auditory processing and plasticity
Shisheng Li (M) • DNA repair and mutagenesis
J. Michael Mathis (M) • Targeted oncolytic virotherapy for breast cancer and multifunctional targeted delivery and non-invasive imaging of adenoviral vectors
Margaret McNulty (6A) • Bone regeneration and osteoarthritis
Arthur Penn (M) • Inhalation toxicology, cardio/pulmonary responses to air pollutants, gestational exposures and adult disease
George M. Strain (M) • Deafness, clinical neurophysiology and neurology
Gary E. Wise (EM) • Cell and molecular biology of tooth eruption
Shaomian Yao (6A) • Isolation and differentiation of dental stem cells, molecular biology of stem cells, and their roles in osteogenesis and osteoclastogenesis
Masami Yoshimura (M) • Molecular and cellular biological aspects of cyclic AMP signal transduction regulation

Recent Faculty Publications

Masters

Veterinary Medical Sciences-Comparative Biomedical Sciences, M.S.

(SVMCB)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree involves course work in the student's area of specialty and completion of an original research project resulting in an acceptable thesis. Thirty hours of credit beyond the baccalaureate or professional degree at the graduate level (in courses numbered 4000 or above) must be earned. The curricular requirements include:

- At least six hours in thesis research (VMED 8000).
- At least 24 hours at the 7000 level or above in courses other than thesis research (VMED 8000), including
- three hours of CBS 7104 Biomedical Cell and Molecular Biology (3)
- three hours of CBS 7108 Critical Analysis in Molecular Biology/Medicine (3)
- two hours of VMED 7004 Introduction to Research (2)
- at least three hours of experimental statistics at the 7000 level

The student must pass a final comprehensive oral exam. At the discretion of the student's advisory committee, a written exam may be required. Few students are admitted to this degree program.

Doctorate

Veterinary Medical Sciences-Comparative Biomedical Sciences, Ph.D.

Doctor of Philosophy (PhD) in Veterinary Medical Sciences (PVMCB)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied. An MS degree is not a requisite for admission to the PhD program.

The degree involves coursework in the student's area of specialty and completion of an original research project resulting in an acceptable dissertation. The dissertation must demonstrate a contribution to the student's major field of study and a mastery of research techniques. Sixty hours of credit beyond the baccalaureate or professional degree at the graduate level (in courses numbered 4000 or above) must be earned. The curricular requirements include:

At least 24 hours at the 7000 level or above in courses other than dissertation research (VMED 8900/VMED 9000), including:

- three hours of CBS 7104 Biomedical Cell and Molecular Biology (3)
- three hours of CBS 7108 Critical Analysis in Molecular Biology/Medicine (3)
- two hours of VMED 7004 Introduction to Research (2)
- at least three hours of experimental statistics at the 7000 level
- at least six hours in professional curriculum courses selected from:
 - CBS 7109 Advanced Macroscopic Anatomy (1-3)
 - CBS 7112 Advanced Microscopic Anatomy (1-3)
 - CBS 7603 Clinical Toxicology (3)
 - CBS 7628 Biomedical Physiology I (3)
 - CBS 7629 Biomedical Physiology II (3)

All candidates for the PhD degree must present a seminar a total of two times, including the final dissertation defense. Students are strongly encouraged to submit the results of their research for publication in peer-reviewed scientific journals. The student must pass a general exam consisting of written and oral portions and a comprehensive final oral exam.

Comparative Literature (Graduate Program)

Program Overview

Comparative literature at LSU is an interdisciplinary program that encourages students to approach literary studies from multiple perspectives. A core curriculum grounded in the history of literary criticism and theory, and training in at least three languages and national literary traditions prepares students in the PhD program to undertake comparative, interdisciplinary research. With the guidance of faculty, students develop their own degree plans and research agendas meant to combine the study of literature, literary theory, language, philosophy, art, history, and other cultural phenomena including science and social science in exciting, fruitful, and innovative ways.

Administration

Admission

Applicants for admission to the PhD program are required to submit GRE scores to the Graduate School before their applications can be considered. Applicants should submit three letters of recommendation and a writing sample.

Financial Assistance

Graduate assistantships and fellowships are available. Contact the program director for information. Most assistantships require teaching one course each semester.

Graduate Faculty

(check current listings by department by clicking [this link](#))

The graduate faculty for the PhD in Comparative Literature is drawn from departments across the university. Contact the director for specific information.

Doctorate

Comparative Literature, Ph.D.

LSU offers the PhD in comparative literature. The PhD program requires at least 48 hours beyond the bachelor's degree, a general examination, a dissertation, and a final examination in defense of the dissertation.

Computer Science & Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click [here](#).

Program Overview

The Division of Computer Science and Engineering in the School of Electrical Engineering and Computer Science offers the research oriented Master of Science in System Sciences and the Doctor of Philosophy in Computer Science. It provides training to prepare talented students for research careers in universities or industrial laboratories, as well as work as computing practitioners in industry. There is a strong and continuing demand for computer scientists to work at the frontiers of knowledge in both theoretical and applied specialties. The curriculum provides for graduate study in several areas of computer science, including algorithms and theory, computer architecture, artificial intelligence, software engineering, knowledge discovery and data mining, digital media, database management, operating systems, networking, wireless sensor networks, high performance computing, distributed computing, robotics, scientific computation, visualization, and programming languages and compilers.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School. Note that the Computer Science and Engineering Division's application deadlines are earlier: for fall admission, the application deadline is **February 1**, and for spring admission, the application deadline is **October 15**.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation, statement of purpose. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School. Students who have been admitted to the Computer Science and Engineering Division will automatically be considered for financial assistance by the department. No additional application form is required for consideration for financial aid. The Computer Science Department's financial aid application deadlines are thus the same as the department's admission deadlines.

Graduate Faculty

(check current listings by department by clicking this link)

Gabrielle Allen (M) • High performance, grid, and scientific computing
Gerald Baumgartner (M) • Programming languages, compiler optimization, and software engineering tools
Steven R. Brandt (3F) • High performance computing, scientific computing
Konstantin Busch (M) • Distributed algorithms and data structures, communication algorithms, algorithmic game theory
Doris L. Carver (M) • Formal requirements and specification techniques, software development environments, reverse engineering, software reusability
Feng Chen (6A) Operating systems, storage systems (Flash SSDs, Persistent Memory, Cloud Storage), data management in cloud and large-scale distributed storage systems
Jianhua Chen (M) • Artificial intelligence, machine learning, data mining, knowledge representation
Peter Chen (EM)
S. Sitharama Iyengar (EM)
Hartmut Kaiser (3F) • C++, high performance computing, compiler technologies, spatial information systems
Rajgopal Kannan (M) • Sensor networks and communication, game theory, cognitive radio
Bijaya B. Karki (M) • Scientific computing and visualization
Robert L. Kooima (6A) • Real-time 3D computer graphics, interactive display technology, digital imaging and image processing
Donald H. Kraft (EM)
Sukhumay Kundu (M) • Software design and modeling, data mining, networking, graph theory
Supratik Mukhopadhyay (6A) • Software engineering for distributed systems, logic and automated reasoning
Seung-Jong Park (M) • Wireless sensor networks, wireless ad hoc networks, high speed network, network convergence
Rahul Shah (M) • Algorithms, data structures, database systems
Evangelos Triantaphyllou (M) • Data mining and knowledge discovery from databases, multicriteria decision making, discrete optimization, interfaces of operations research and computer science
John M. Tyler (EM)
Brygg Ullmer (M) • Tangible visualization, human computer interface, bioinformatics
Clint Whaley (M) High performance computing, empirical optimization, parallel computing, backend compiler optimization, scientific computing and computer architecture
Jian Zhang (6A) • Machine learning, data mining, algorithms design and their applications to network security

Masters

Systems Science, M.S.S.S.

(MSYSC)

The divisional-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a thesis/non-thesis degree requiring a thesis/special project. The MS program offers a concentration in Computer Science, a concentration in Computational Science, and a non-concentration variant. In any case, 37 hours of credit at the graduate level must be earned including a maximum of 12 hours of credit for the thesis, or a maximum of 6 hours for non-thesis project. The curricular requirements include:

- A core requirement of 9 credit hours with 3 hours in each of the three core areas.
- For non-thesis option: at least 21 hours with at least 12 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- For thesis option: at least 15 additional hours with at least 3 hours at the 7000 level or above, exclusive of any type of independent studies credit except for thesis research credit earned.
- Earned credit in the graduate seminar course, CSC 7800.

The student must submit a written MS thesis/project report and pass the final exam in which the student defends the MS thesis/project in front of the advisory committee.

Doctorate

Computer Science, Ph.D.

(PCSC)

The divisional-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements of the LSU Graduate School for graduate committees are satisfied.

The degree requires a dissertation. 55 hours of credit at the graduate level must be earned including a minimum of 18 hours of credit for the thesis research. The curricular requirements include:

- A core requirement of 15 credit hours in algorithms, theory of computation, programming languages, operating systems, and computer architecture.
- At least 21 additional credit hours with 15 hours at the 7000 level or above, exclusive of any type of independent studies credit.
- Earned credit in the graduate seminar course CSC 7800.
- At least 18 credit hours in thesis research course CSC 9000.

At the discretion of the student's advisory committee, additional courses may be added to the student's curriculum

The student must pass a written general exam administered by the division consisting of four areas. A student has two chances to successfully complete the exam. The student must submit a written research proposal and pass the research proposal defense which is an oral exam. The student must submit a written PhD dissertation, and pass the final exam in which the student defends the dissertation in front of the advisory committee.

Construction Management (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The construction management (CM) graduate program is designed to blend engineering, business, and construction management concepts together to produce a professional graduate who can manage construction processes effectively and efficiently. The CM graduate students will have an in-depth education in state of the art construction specializations including, sustainable construction, hazard management construction, building information modeling, decision-making, and advanced productivity with optional emphasis in the industrial and heavy highway construction sectors. The program will be offered with a thesis option or with a project and report option (non-thesis).

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School.

Applicants for admission to the master's program in construction management or the interdisciplinary doctoral program must meet or exceed all requirements stipulated by the Graduate School, including satisfactory scores on the verbal and quantitative portions of the GRE, an overall grade point average of 2.75 or 3.00 for the last 60 hours of undergraduate work, and a satisfactory TOEFL, IELTS, or PTE score for international students. Although most applicants will have undergraduate degrees in construction management or engineering, applicants from other disciplines may be accepted if they complete a sequence of engineering science prerequisite courses.

Financial Assistance

Some departmental assistantships are available for qualified students, and are awarded each semester, based on departmental needs and student qualifications. Except in unusual cases, no master's candidate will be awarded a departmental assistantship for more than four semesters. A doctoral candidate may be awarded a departmental assistantship for up to six semesters. Faculty who have funded research projects provide additional assistantships for participating graduate students. Faculty members also recommend students for fellowships and stipends when these become available.

Facilities

The Construction Management computer laboratory, used for computer lab instruction and open use by CM students, is equipped with 48 computers. Software includes Microsoft Office Professional, Visio, Microsoft Project, Primavera P6, Timberline, Bid2Win, On-Center Takeoff, AutoCAD, Arena (factory simulation), Lingo (optimization), SAS, Minitab, MATLAB, Maple, Visual Studio.NET (C++, C#, VB, ASP), Java, and many other applications supporting CM course work. The lab is supported by a bank of twelve servers providing support of course work in development of information systems, Web application systems,

eCommerce systems, and client/server support for project management and estimating courses. The CM Annex Computer Lab (48 computers) is used for computer lab instruction and open use by CM students. Software includes Microsoft Office Professional, Visio, Microsoft Project, Primavera P6, Timberline, Bid2Win, On-Center Takeoff, and AutoCAD. As with the CM Computer Lab, a bank of servers provides client/server for project management and estimating courses.

The LSU Sustainable Materials Testing Laboratory (approximately 2000 ft²) is also housed in the Department of Construction Management and managed by Dr. Hassan. This dedicated space is equipped with 4 explosion-proof fume hoods and is equipped with state-of-the-art equipment to for characterizing and testing performance of advanced sustainable materials. The lab includes a number of major research equipment including Thermo Fisher NOx analyzer, Thermo Fisher SO₂/H₂S analyzer, two photoreactor chambers, a UV light meter, ovens, furnaces, autoclaves, four fume hoods, a Shimadzu UV-VIS spectrophotometer 1800, deionized water system with 60 L tank, freezers (-60oC), oil bath, centrifuges, pH meters, temperature and humidity sensors, various flow meters, oil bath, centrifuges. In addition students have access to the Socolofsky Microscopy Center's that houses both electron and light microscopes including a Nikon Microphot-FXA, V12 fluorescence stereomicroscope, JSM-6610, JSM-6610LV high and low vacuum SEM, JEOL 100CX TEM, as well as a darkroom with automatic X-ray film developer.

Graduate Faculty

(check current listings by department by clicking this link)

Charles W. Berryman (M) • Sustainability, material science, soil stabilization, construction education, decision support systems.
Carol Friedland (6A) • Hurricane Damage Assessment, Damage Modeling, Remote Sensing, Structural Engineering, Industrial Construction

Craig M. Harvey (M) • Human Factors Engineering, Construction Safety, Construction Management, and Law

Marwa Hassan (M) • Sustainable Construction, Life Cycle Assessment, Infrastructure Sustainability, Highway Construction, Advanced sustainable materials including nano-materials, and Productivity Analysis of Construction Operations.

Isabelina Nahmens (M) • Construction Quality, Construction Mass Customization, Lean Construction and Lean Healthcare

Emerald Roider (6A) • Construction Scheduling, Sustainable Construction, LEED, Construction Project Management, Construction Labor Issues

Yumin Zhu (M) • Computer Application in Construction Management and Sustainable Construction

Masters

Construction Management, M.S.

The LSU Online version of the Master of Science in Construction Management has been developed by global academic leaders in construction education. It is intended for the military, industry professional or for those interested in a career change who are unable to attend traditional lectures and have access to the Internet. It is a professional practice-orientated advanced degree that offers a unique blend of 36 credit hours of construction management and business management courses. The degree is designed to develop leaders/managers for building projects with mastery in the best practices contained within sustainability, building information modeling, project delivery, and decision making. Those without a construction related baccalaureate degrees are required to complete leveling (foundation) CM courses prior to graduation.

The program requires 36 credit hours of graduate studies. Hours are divided into required categories:

CORE CM Courses – 15 credit hours (5 required courses)

CM 7030 Project Delivery

CM 7110 Advanced Construction Productivity

CM 7150 Decision Making for Construction

CM 7302 Advanced Sustainable Construction

HRE 7901 Scientific Methods in Human Resource Education

CM Electives – 15 credit hours (select 5 courses from a list of CM electives):

CM 7230 Lean Construction

CM 7220 Building Information Modeling for CM

CM 7213 Soils in Construction
CM 7250 Natural Hazard Resistant Construction
CM 7111 Advanced Construction Scheduling
CM 7211 Construction Dispute Resolution

Management/Leadership Electives – 6 credits (select 2 courses from a list of electives)

HRE 7575 Managing Change in Organizational Systems
HRE 4573 Managing the Human Resource Development Function
HRE 7973 Data Collection and Analysis in Organizations
HRE 7571 Performance and Needs Analysis in Human Resources Development
HRE 7723 Leadership in Organizations
HRE 4579 Training in Global Organizations

For more information, [click here](#).

Engineering Sciences, M.S.E.S.

(MES)

The MS in Engineering Science program - offered with both thesis and non-thesis options - provides an opportunity for study in areas not represented by departments within the college. Students can enter the program with a baccalaureate degree in any field of engineering or in a pure or applied science. The departmental-level academic course plan for each student (due at the end of the first semester) will be developed in consultation with and approved by the student's graduate advisory committee. Graduate School regulations require the major professor (committee chair) to be a graduate faculty member from a department within the College of Engineering. The committee must also include at least two additional members of the graduate faculty.

The minimum requirements for the thesis option are 24 semester credit hours course work, six additional hours of thesis research credit, and successful defense of a research thesis. The non-thesis option requires a minimum of 36 semester hours of course work including a three-credit hour project course. The project course incorporates a written report and oral presentation to the graduate advisory committee. Additional course work may be necessary for students lacking the proper course prerequisites or as required by the graduate advisory committee and specified on an approved plan of study.

At least one-half of the course work must be College of Engineering courses and at least one-half of the total course work must be at the 7000 level. The program requires emphasis in at least two areas of study not available within a single department and at least 18 hours of required course work and one academic year in residence must be completed after admission to the program.

A plan of study, approved by the student's advisory committee, must be submitted to the Associate Dean for Academic Programs in the College of Engineering by the end of the first semester of enrollment at LSU.

Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science plan of study as part of the application process.

Doctorate

Engineering Sciences, Ph.D.

(PES)

The college accepts qualified students with bachelor's or master's degrees in engineering or a pure or applied science to work toward a PhD in this interdisciplinary program. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee must consist of at least three members of the graduate faculty. The major professor (advisory committee chair) must be from a department within the College

of Engineering and at least one member of the student's committee must come from a department offering the PhD degree in the College of Engineering. The advisory committee must also include representatives from the sub-areas of specialization.

A PhD departmental-level academic course plan, approved by the student's advisory committee, should be submitted to the Associate Dean for Academic Programs in the College of Engineering by the start of the second semester of enrollment. Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science PhD plan of study as part of the application process. This early plan of study will map directly to the Doctoral Degree Audit form required by the LSU Graduate School as candidates near completion of their coursework.

The student will be required to complete a minimum of 54 semester hours of approved course work beyond the bachelor's degree and prepare a dissertation acceptable to his or her advisory committee and The Graduate School. At least half of the course work (27 semester hours) must be taken in courses offered by departments within the College of Engineering. Requirements include 24 hours of course work concentrated in at least two sub-areas of specialization within one or more academic departments. The remaining 30 semester hours of course work must contain no more than 15 hours in any one department.

Economics (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Economics has 13 full-time faculty members actively engaged in research, nine of whom have been awarded named professorships in recognition of their excellence in research and teaching. In addition, the department houses the *Journal of Macroeconomics* and the *Journal of Labor Research*, which are edited by two department members. The Department of Economics also houses the *Division of Economic Development*, which among other functions publishes the annual *Louisiana Economic Outlook*.

The graduate program in economics provides students with a strong foundation in microeconomic and macroeconomic theory. To complement the general theory sequence, the department offers areas for specialization that include econometrics, advanced macroeconomics, and applied microeconomics. The advanced macroeconomics fields are economic growth and international macroeconomics, and monetary economics. The applied microeconomics field consists of courses selected from health economics, labor economics, public economics, and game theory.

Administration

Admission

Applicants for graduate studies in Economics must meet the requirements for admission to the Graduate School and be accepted by the Department of Economics. Detailed information can be found at the Graduate School website, under the *Prospective Students* link. Note the LSU Graduate School Requirements, in addition to the ones specific to the Department of Economics described in the next paragraph, are only for consideration and do not guarantee admission.

In addition to the Graduate School requirements, students should have completed undergraduate courses in calculus, statistics, and intermediate microeconomics and macroeconomics before entering either the MS or PhD programs. It would be preferable for students interested in pursuing the PhD degree to take at least a year of calculus, a linear algebra course, probability, and statistics.

Non-economic majors with strong academic records are encouraged to apply. It is likely that students who have not had many undergraduate courses in economics or have not had the courses indicated above can make them up in one semester, before taking the core program courses.

The department also requires three letters of recommendation. We do not require writing samples.

Financial Assistance

All PhD students, both domestic and international, including entering graduate students, are eligible to apply for assistantships. A full-time (20 hours/week) graduate student assistant currently receives a stipend of \$16,100 per academic year, and is also provided a full tuition waiver. Students holding assistantships are expected to assist the faculty in their research and teaching for a maximum of 20 hours per week. Teaching assistantships, which involve teaching an entire section, are available to those advanced graduate students who have successfully passed the PhD qualifying exams.

Graduate School Supplemental Awards are available to outstanding graduate students entering the PhD program. These awards range from \$1,000 to \$3,000 per year and are generally renewable for a maximum of four years. A minimum GPA of 3.0 *every semester* is required to retain the award. Summer stipends for teaching or research have been available in the past and will be available in the future, but their number varies each from summer to summer.

Masters

Economics, M.S.

(SECON)

The MS program is designed to provide the training necessary for careers in government and business where original research generally is not the primary concern. Students must complete 36 hours of coursework, of which a minor of 6-9 hours outside of Economics can be chosen with permission of the Graduate Director. Students must take a minimum of 27 hours of 7000-level courses and only 6 hours of 4000-level courses can be taken. Prior to entering the program, students should have completed undergraduate courses in calculus, statistics, and intermediate macroeconomics and microeconomics. A detailed description of the MS program can be found on the Economics Department webpage.

Doctorate

Economics, Ph.D.

(PECON)

The PhD program is designed to train economists capable of adding to the knowledge of economics, doing independent research, and teaching at the college or university level. Students must complete 39 hours of coursework in Economics, all of which must be at the 7000-level. Any coursework for an outside minor is in addition to the 39 hours of Economics coursework. Prior to entering the program, students should have completed at least a year of undergraduate calculus, and undergraduate courses in linear algebra, probability and statistics, and intermediate macroeconomics and microeconomics. A detailed description of the Ph.D. program can be found on the Economics Department webpage.

Education (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click here.

Program Overview

The School of Education offers a range of professional and academic graduate degree programs that focus on preparing students for careers in education, research, policy formation and implementation, as well as program oversight. Job opportunities are found in schools, school districts, universities, public and private agencies, business and industry, and many other areas.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and schools have access to all materials submitted by and/or on behalf of a student applying to graduate study.

To be admitted to the MAT, MA, MEd, EdS, or PhD programs, a student must complete normal Graduate School application procedures by deadlines established by the Graduate School. Applicants will be expected to provide appropriate documentation upon request for admission into the various degree programs. Documents include transcripts, GRE, three letters of recommendation, and TOEFL, IELTS, or PTE scores for international students whose native language is not English. Applicants are accepted all year with the exception of Higher Education which has a deadline of **March 1** and Counseling which has a deadline of **March 15**. Minimum requirements for admission into all degree programs are a score of 153 on the verbal and 144 on the quantitative sections of the GRE, and an undergraduate cumulative GPA of 3.0, or the last 60 hours of course work. Lower GRE scores may be considered contingent on the GPA.

After completed application materials are received from the Graduate School, faculty panels in each degree program review and make admission recommendations to the school director. Upon approval of the school, students are notified of acceptance by the Graduate School.

Financial Assistance

Assistantships are awarded on a competitive basis. Doctoral student stipends for academic-year appointments start at \$9,000. Deadline for submission of applications for financial aid is **February 1**.

Graduate Faculty

(check current listings by department by clicking [this link](#))

This school was cited by the Louisiana Board of Regents' PhD Review Summary as a school that had "attracted a high quality faculty at both the senior and junior level, had a good sense of purpose for their programs, and a good sense of themselves as an academic community."

Masters

Curriculum & Instruction, M.Ed.

(ECIN)

Master of Education (MEd)

The **Master of Education (MEd)** is designed to advance the knowledge base of certified teachers, provide preparation for individuals interested in leadership positions in schools and school districts, and prepare school counselors.

Program areas include: educational leadership; gifted education, special education, guidance with a specialization in school counseling; and curriculum and instruction with specializations in early childhood education, elementary education, English

education, foreign language education, language arts/children's literature, mathematics education, reading/literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Curriculum and Instruction

Curriculum and instruction requires 36 hours of credit at the graduate level. Students may opt to do a thesis project, a non-thesis project, or neither.

The curricular requirements include:

- At least 18 hours at the 7000 level or above.
- At least 21 credit hours within the School of Education.
- A core area of 12 hours including at least 3 hours each in curriculum studies, research, technology, and humanistic and behavioral studies.
- 12 hours in an area of specialization. Specializations may include early childhood education, elementary education, English education, foreign language education, language arts/children's literature, math education, reading/literacy, science education, social studies education, and special education.
- Six to twelve hours of electives selected in consultation with the major advisor.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the student's specialization.

Education, M.A.

(AEDCI, AELRC)

The **Master of Arts** degree is open to students with a bachelor's degree who meet the Graduate School and school entrance requirements. It does not function as a certification program. Minimum course requirements include 36 semester hours; both thesis and non-thesis options are available. Specializations include: community counseling, applied research, measurement and evaluation, higher education, curriculum studies, and educational technology. [Please note: admissions to the educational technology specialization are currently suspended.]

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree has a thesis option for each specialization.

Community counseling requires 48 hours of credit at the graduate level with a thesis option of 42 hours of coursework, and six hours of thesis, or 48 hours of coursework. The curricular requirements include:

- At least 24 hours at the 7000 level or above.
- A primary area consisting of a minimum of 39 hours of earned credit in a specified field of study.
- A research course consisting of three hours.
- An electives component consisting of six hours.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Applied research, measurement, and evaluation requires 37 hours of credit at the graduate level with a thesis option of 31 hours of coursework, and six hours of thesis, or 37 hours of coursework. The curricular requirements include:

- At least 19 hours at the 7000 level or above.
- A primary area consisting of a minimum of 22 hours of earned credit in the core area.
- Three hours from Educational Research and Measurement, or a thesis option for six hours.
- Six hours from an allied field.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Higher education requires 36 hours of credit at the graduate level with a thesis option of 30 hours of coursework, and six hours of thesis, or 36 hours of coursework. The curricular requirements include:

- At least 18 hours at the 7000 level or above.
- A primary area consisting of a minimum of 24 hours of earned credit in the core area.
- Three hours of supervised practice.
- Nine hours of electives from higher education, or a thesis option for six hours and a three-hour elective from higher education.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Educational technology leadership requires 36 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- At least 18 credit hours at the 7000 level or above.
- A primary area consisting of 21 hours of earned credit in the core area.
- Three hours from Humanistic and Behavioral Sciences.
- Three hours in research
- Nine hours of electives in educational technology

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the program area.

Curriculum studies requires 36 hours of credit at the graduate level with a thesis option of 30 hours of coursework, and six hours of thesis, or 36 hours of coursework. The curricular requirements include:

- At least 18 hours at the 7000 level or above
- A primary area consisting of 15-18 hours of earned credit in the core area
- Three-six hours from Humanistic and Behavioral Sciences
- Three hours in research
- Six-nine hours of electives

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Educational Leadership, M.Ed.

(ELDR)

Master of Education (MEd)

The **Master of Education (MEd)** is designed to advance the knowledge base of certified teachers, provide preparation for individuals interested in leadership positions in schools and school districts, and prepare school counselors.

Program areas include: educational leadership; gifted education, special education, guidance with a specialization in school counseling; and curriculum and instruction with specializations in early childhood education, elementary education, English education, foreign language education, language arts/children's literature, mathematics education, reading/literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Educational leadership

Educational leadership is a cohort program with 39 hours of specific course work designed to meet the requirements of the Louisiana Department of Education. The curricular requirements include:

- At least 36 hours at the 7000 level or above.
- A primary area of 39 hours of earned credit in the core area.
- Six hours of supervised internship.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Elementary Education Grades 1-5, M.A.T.

Elementary (MATE) or Secondary (MATS)

The **Master of Arts in Teaching** in education (Holmes Program)—designed for prospective elementary and secondary teachers—integrates courses and experiences necessary for teacher certification as well as for the degree.

Elementary education majors complete both undergraduate and graduate degrees in education at LSU. Those students who select the five-year Holmes teacher education program and enter as juniors take education and liberal arts courses for two years and graduate with a bachelor's degree in education. Completing this undergraduate degree is a prerequisite to entering the teacher education program's fifth year of graduate study. Admission to this fifth year program is contingent on admission to The Graduate School.

Prospective teachers in secondary areas (mathematics, English, social studies, science) first complete an undergraduate program in a college offering a degree in their area of teaching interest. Admission to this teacher education program is contingent on admission to The Graduate School.

The MAT is a cohort program with a specific school-level academic course plan, and is a non-thesis degree requiring a special project. The curricular requirements include:

- At least 24 hours at the 7000 level or above.
- A primary area consisting of 33 hours of earned credit in a specified field of study.
- One three-hour graduate elective selected in consultation with major advisor.

The student must pass a final exam consisting of a presentation and defense of a written special project.

Gifted Education, M.Ed.

(EGFE)

Master of Education (MEd)

The **Master of Education (MEd)** is designed to advance the knowledge base of certified teachers, provide preparation for individuals interested in leadership positions in schools and school districts, and prepare school counselors.

Program areas include: educational leadership; gifted education, special education, guidance with a specialization in school counseling; and curriculum and instruction with specializations in early childhood education, elementary education, English education, foreign language education, language arts/children's literature, mathematics education, reading/literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Gifted Education

Gifted Education requires 36 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- Six hours in research and measurement.
- 21 hours in the concentration.
- Nine hours of course work related to the appropriate teaching field of the student, i.e., elementary or secondary majors.

The student must pass a comprehensive final exam consisting of the PRAXIS exam for Gifted Education.

Guidance, M.Ed.

(EGUID)

Master of Education (MEd)

The **Master of Education (MEd)** is designed to advance the knowledge base of certified teachers, provide preparation for individuals interested in leadership positions in schools and school districts, and prepare school counselors.

Program areas include: educational leadership; gifted education, special education, guidance with a specialization in school counseling; and curriculum and instruction with specializations in early childhood education, elementary education, English education, foreign language education, language arts/children's literature, mathematics education, reading/literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Guidance

Guidance with a specialization in school counseling requires 48 hours of credit at the graduate level with a thesis option of 42 hours of course work, and six hours of thesis, or 48 hours of course work. The curricular requirements include:

- At least 24 hours at the 7000 level or above.

- A primary area consisting of a minimum of 39 hours of earned credit in a specified field of study.
- A research course consisting of three hours.
- An elective component consisting of six hours.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the specialization.

Secondary Education Grades 6-12, M.A.T.

Elementary (MATE) or Secondary (MATS)

The **Master of Arts in Teaching** in education (Holmes Program)—designed for prospective elementary and secondary teachers—integrates courses and experiences necessary for teacher certification as well as for the degree.

Elementary education majors complete both undergraduate and graduate degrees in education at LSU. Those students who select the five-year Holmes teacher education program and enter as juniors take education and liberal arts courses for two years and graduate with a bachelor's degree in education. Completing this undergraduate degree is a prerequisite to entering the teacher education program's fifth year of graduate study. Admission to this fifth year program is contingent on admission to The Graduate School.

Prospective teachers in secondary areas (mathematics, English, social studies, science) first complete an undergraduate program in a college offering a degree in their area of teaching interest. Admission to this teacher education program is contingent on admission to The Graduate School.

The MAT is a cohort program with a specific school-level academic course plan, and is a non-thesis degree requiring a special project. The curricular requirements include:

- At least 24 hours at the 7000 level or above.
- A primary area consisting of 33 hours of earned credit in a specified field of study.
- One three-hour graduate elective selected in consultation with major advisor.

The student must pass a final exam consisting of a presentation and defense of a written special project.

Special Education, M.Ed.

(ESPE)

Master of Education (MEd)

The **Master of Education (MEd)** is designed to advance the knowledge base of certified teachers, provide preparation for individuals interested in leadership positions in schools and school districts, and prepare school counselors.

Program areas include: educational leadership; gifted education, special education, guidance with a specialization in school counseling; and curriculum and instruction with specializations in early childhood education, elementary education, English education, foreign language education, language arts/children's literature, mathematics education, reading/literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Special Education

Special Education requires 36 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- At least 18 hours at the 7000 level or above.
- A core area of 18 hours.
- Three specializations with 18 hours required in each; these specializations are Instructional, Behavioral, and Diagnosis and Evaluation.
- The Diagnosis and Evaluation specialization may require an additional three credit hours of diagnosis and remediation of reading problems; this will be determined by the major advisor based on the previous course work of the student.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the student's specialization.

Doctorate

Curriculum & Instruction, Ph.D.

Educational Leadership and Research (PEDLR) or Curriculum and Instruction (PEDCI)

The **Doctor of Philosophy (PhD)** programs in the School of Education are offered through two degrees. The first degree is in educational leadership and research. Specializations include: educational leadership, higher education administration, educational research methodology, and educational technology. [Please note: Admissions to the PhD with a specialization in educational technology are currently suspended.] The second degree is in curriculum and instruction. Specializations include: language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading /literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires the successful completion of a dissertation as its final requirement. 90 hours of credit at the graduate level must be earned including 9-18 hours of credit for the dissertation.

The curricular requirements for Educational Leadership include:

- A core area of 20 hours which includes 14 hours of research, and six hours in a school core.
- 24 hours in the primary area of P-12 Leadership specialization.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 37 hours in addition to the 53 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for higher education administration include:

- A core area of 19 hours which includes 11 of research, and six hours in a school core.
- 24 hours in the primary area of higher education.
- Nine hours of dissertation research.

- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 38 hours in addition to the 52 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for educational research methodology include:

- A school core area of six hours.
- 14 hours in educational leadership and research program courses.
- 12 hours in the primary area of educational research methodology.
- 12 hours in an allied field.
- Three hours of advanced research practicum.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 34 hours in addition to the 56 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for educational technology include:

- A core of 19 hours, which includes six hours in a school core.
- 18 hours in the primary area of educational technology.
- Three hours in technology applications and issues.
- Three hours in learning theory.
- Three hours in curriculum related issues.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 35 hours in addition to the 56 required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for the PhD in curriculum and instruction include:

- 50 hours in the area of specialization (e.g., language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading /literacy , science education, social studies education, and special education), which includes six hours in a school core.
- A minimum of nine hours in research methods.
- 12-18 hours of dissertation research.

- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a 90-hour curriculum required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

Educational Leadership & Research, Ph.D.

Educational Leadership and Research (PEDLR) or Curriculum and Instruction (PEDCI)

The **Doctor of Philosophy (PhD)** programs in the School of Education are offered through two degrees. The first degree is in educational leadership and research. Specializations include: educational leadership, higher education administration, educational research methodology, and educational technology. [Please note: Admissions to the PhD with a specialization in educational technology are currently suspended.] The second degree is in curriculum and instruction. Specializations include: language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading /literacy, science education, social studies education, and special education.

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires the successful completion of a dissertation as its final requirement. 90 hours of credit at the graduate level must be earned including 9-18 hours of credit for the dissertation.

The curricular requirements for Educational Leadership include:

- A core area of 20 hours which includes 14 hours of research, and six hours in a school core.
- 24 hours in the primary area of P-12 Leadership specialization.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 37 hours in addition to the 53 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for higher education administration include:

- A core area of 19 hours which includes 11 of research, and six hours in a school core.
- 24 hours in the primary area of higher education.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 38 hours in addition to the 52 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for educational research methodology include:

- A school core area of six hours.
- 14 hours in educational leadership and research program courses.

- 12 hours in the primary area of educational research methodology.
- 12 hours in an allied field.
- Three hours of advanced research practicum.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 34 hours in addition to the 56 hours required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for educational technology include:

- A core of 19 hours, which includes six hours in a school core.
- 18 hours in the primary area of educational technology.
- Three hours in technology applications and issues.
- Three hours in learning theory.
- Three hours in curriculum related issues.
- Nine hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a minimum of 35 hours in addition to the 56 required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

The curricular requirements for the PhD in curriculum and instruction include:

- 50 hours in the area of specialization (e.g., language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading /literacy , science education, social studies education, and special education), which includes six hours in a school core.
- A minimum of nine hours in research methods.
- 12-18 hours of dissertation research.
- Admitted students are anticipated to have a master's degree; students who do not have a master's degree must complete a 90-hour curriculum required for the PhD.

The student must pass a General exam consisting of written questions and a comprehensive oral exam; write a dissertation proposal and pass an oral defense of the proposal; and write a dissertation, and pass an oral defense of the dissertation.

Certificate

Curriculum and Instruction Certification, Ed.S.

Curriculum and Instruction (CEDCI) or Education Leadership (CELRC)

The **Certificate of Education Specialist (EdS)** program is intended primarily for teachers, counselors, supervisors, and administrators in elementary and secondary schools. This program provides in-depth opportunities for further professional growth and specialization for persons who have completed the master's degree. A minimum of 60 hours of graduate credit—which may include the master's degree—is required. Specializations include language arts/children's literature, counseling, curriculum studies, early childhood education, educational leadership, educational technology, English education, foreign language education, gifted education, mathematics education, reading/ literacy, science education, social studies education, and special education.

The school-level academic course plan will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a non-thesis degree requiring a minimum of 60 hours of credit at the graduate level.

Educational Leadership requires 63 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- Six hours in Humanistic and Behavioral Studies.
- Six hours in research.
- 42 hours in the area of specialization.
- Nine hours in an allied field.

The student must complete all required course work with a 3.0 GPA or higher. No final exam is required for this specialization.

Educational Technology requires 60 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- Six hours in Humanistic and Behavioral Studies.
- Six hours in research.
- 24 hours in the area of specialization.
- Three hours in technology applications and issues.
- Three hours in learning theory.
- Three hours in curriculum related issues.
- 15 hours of electives.

The student must complete all required course work with a 3.0 GPA or higher. No final exam is required for this specialization. [Please note: Admissions to the Ed.S. in Educational Technology are currently suspended.]

Counseling requires 60 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- 60 hours in the specialization.
- A 300 hour internship.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the student's specialization.

The specializations in language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading/literacy, science education, social studies education, and special education require 60 hours of credit at the graduate level, and do not offer a thesis option. The curricular requirements include:

- Six hours of Humanistic and Behavioral Studies.
- Six hours in research.
- 30 hours in the area of specialization.
- 18 hours of electives.

The student must complete all required course work with a 3.0 GPA or higher, and must successfully complete a required six-hour practicum in the area of specialization. No final exam is required for these specializations.

Education Leadership Certification, Ed.S.

Curriculum and Instruction (CEDCI) or Education Leadership (CELRC)

The **Certificate of Education Specialist (EdS)** program is intended primarily for teachers, counselors, supervisors, and administrators in elementary and secondary schools. This program provides in-depth opportunities for further professional growth and specialization for persons who have completed the master's degree. A minimum of 60 hours of graduate credit—which may include the master's degree—is required. Specializations include language arts/children's literature, counseling, curriculum studies, early childhood education, educational leadership, educational technology, English education, foreign language education, gifted education, mathematics education, reading/ literacy, science education, social studies education, and special education.

The school-level academic course plan will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a non-thesis degree requiring a minimum of 60 hours of credit at the graduate level.

Educational Leadership requires 63 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- Six hours in Humanistic and Behavioral Studies.
- Six hours in research.
- 42 hours in the area of specialization.
- Nine hours in an allied field.

The student must complete all required course work with a 3.0 GPA or higher. No final exam is required for this specialization.

Educational Technology requires 60 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- Six hours in Humanistic and Behavioral Studies.
- Six hours in research.
- 24 hours in the area of specialization.
- Three hours in technology applications and issues.

- Three hours in learning theory.
- Three hours in curriculum related issues.
- 15 hours of electives.

Counseling requires 60 hours of credit at the graduate level, and does not offer a thesis option. The curricular requirements include:

- 60 hours in the specialization.
- A 300 hour internship.

The student must pass a comprehensive final exam consisting of a series of written questions pertaining to the student's specialization.

The specializations in language arts/children's literature, curriculum studies, early childhood education, English education, foreign language education, gifted education, mathematics education, reading/literacy, science education, social studies education, and special education require 60 hours of credit at the graduate level, and do not offer a thesis option. The curricular requirements include:

- Six hours of Humanistic and Behavioral Studies.
- Six hours in research.
- 30 hours in the area of specialization.
- 18 hours of electives.

The student must complete all required course work with a 3.0 GPA or higher, and must successfully complete a required six-hour practicum in the area of specialization. No final exam is required for these specializations.

Electrical & Computer Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Division of Electrical & Computer Engineering in the School of Electrical Engineering & Computer Science offers programs of study leading to the MS and PhD degrees. Areas of study include Automatic Control (system identification, robust, adaptive, fault-tolerant, and networked feedback control); Communications and Signal Processing (digital, computer, and wireless communications, data compression, digital signal processing, and image processing); Computers (computer architectures, computer graphics, parallel and distributed computing, compilers, embedded systems, reconfigurable computing, computer vision, and fault tolerant computing); Electronics (electronic materials and devices, micro- and nano-technologies, nanophotonics, electro-optics and VLSI circuits/systems design); and Power (power electronics, harmonic analysis, electric machines, variable speed drive, power system stability and control, renewable energies, smart grid and energy conversion). An interdisciplinary concentration in Information Technology is also available.

There are approximately 120 students enrolled in Electrical and Computer Engineering MS and PhD programs. The division graduate faculty is comprised of 10 professors, 11 associate professors, and four assistant professors.

Administration

Minor in Electrical Engineering

- Graduate students from outside the division desiring a minor in electrical engineering must take at least nine credits of the division's senior/graduate (4xxx) or graduate (7xxx) level courses. For a PhD student, six or more credits must be from 7xxx level courses; for an MS student, a minimum of three credit hours must be from graduate (EE 7xxxx) level courses. The program must be approved by the Graduate Studies Committee.
- The ECE Division does not require a separate examination for students minoring in electrical engineering.

Facilities

The division has ample computing resources including several multiprocessors used for purposes such as design automation, simulations and GPGPU programming. The Visual and Geometric Computing Lab supports research in computer graphics, geometric modeling, visualization and vision, geometric and medical data fusing, and deformation analysis, among others. The Internet Teaching Lab houses routers and switches and is used for studying concepts in internetworking research.

The Electronic Material and Device Lab (with a Class-100 clean room) is utilized for research in semiconductor material growth, characterization, device fabrication, and measurements. The VLSI Systems Design Lab is used to design smart silicon chips and for device modeling. It is equipped with CAD tools and a high-speed data acquisition system for digital, analog/mixed-signal designs.

The McNeil RF/Communications Lab houses a vector network analyzer, spectrum analyzer, signal generators and communication and signal processing boards. The Digital System Processing Lab houses DSP development boards, code composer, and audio hardware. The Control Lab uses xPC Target for real time seamless interfacing of Matlab/simulink and physical systems and hardware-in-the-loop designs.

The Power Electronics Lab offers hands-on experience with devices such as AC to DC converters, AC Voltage controllers, and circuit designs capable of handling large amounts of power. The Electric machines Lab and Variable Speed Drive (VSD) Lab are equipped with conventional machines, as well as motors for special purposes. It also has power electronic inverters, and DSP boards for real-time simulation and control.

In addition, students can utilize the university resources of high performance computing at the Center for Computation and Technology (CCT) and microfabrication and synchrotron beam-line capabilities at the Center for Advanced Microstructures and Devices (CAMD).

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and divisions have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Meeting the minimum admission requirements established by the Graduate School does not necessarily ensure acceptance into the division's graduate program. The division reviews the record of each applicant to assess promise for success at the graduate level, taking into consideration grade-point average, undergraduate preparation, recommendations, GRE scores, TOEFL, IELTS, or PTE scores (for international applicants), and any other pertinent information. In rare instances, a student who does not meet all requirements may be admitted provisionally. The latter is granted on a case-by-case basis. Division recommendations are usually made within a month of the division receiving the complete application.

More details on applying to the division can be found at www.ece.lsu.edu/grad/Instructions.html.

Financial Assistance

The division attempts to provide financial support for all qualified doctoral students and for outstanding MS students.

Teaching Assistantships (TAs): All new applicants are automatically considered for available teaching assistantships in ECE. Nearly all new teaching assistantships are usually awarded in the fall semester. Awards are competitive with usually more applicants than available TA positions. Only completed applications on file are considered when the award decisions are made. Hence, it is helpful to have your application file completed early. Applicants selected to receive assistantships will be notified by the division.

Research Assistantships (RAs): Research assistantships are selected individually by ECE faculty members. It is not uncommon for a prospective student to contact one or more faculty members whose research interest matches his/her own to determine if they have any open RA position. Information on research interests of faculty members is given on the division web page at www.ece.lsu.edu

The division also offers scholarships and fellowships funded through alumni and donors. More information on these awards can be found on our webpage www.ece.lsu.edu.

Graduate Faculty

(check current listings by division by clicking this link)

Pratul K. Ajmera (M) • Semiconductor materials and devices, device physics, material growth and characterization, device fabrication, MEMS and integrated microsystems

Jin-Woo Choi (M) • MEMS & BioMEMS, biosensors and bioelectronic devices, microfluidic devices and systems, lab-on-a-chip systems, nanomagnetic particle separators for biomedical applications, nanoscale transducers

Leszek S. Czarniecki (M) • Power electronics, nonsinusoidal systems, network analysis and synthesis

Theda Daniels-Race (M) • Characterization of hybrid electronic materials, novel optoelectronic device fabrication, growth of band-gap engineered III-V nanostructures

Martin Feldman (M) • Applied optics, x-ray lithography, micromachining

Guoxiang Gu (M) • Modeling and control of networked feedback systems, statistical signal processing with applications, and cooperative estimation and control

Bahadir Gunturk (M) • Multimedia communications, image/video processing, computer vision, data fusion, biometrics

Yoonyoung Jin (3F) • Fluor-carbon films, MEMS devices, microfabrication, applications to sports engineering

David M. Koppelman (M) • Computer architecture and microarchitecture, specialized processors

Xin Li (6A) • Visual computing, computer graphics, vision, geometric data modeling, processing, analysis and simulation

Xuebin Liang (M) • Wireless communications, information theory, signal and image processing, neural networks, computation and complexity

Michael L McAnelly (3P) • Power system protection, operation and control

Shahab Mehraeen (6A) • power systems stability and control, renewable energies, smart grid, energy conversion

Ernest Mendrela (M) • Brushless DC machines; disc, linear, and rotary-linear motors; MAGLEV vehicles; magnetic separators

Kidong Park (6A) • BioMEMS and microfluidic devices, single cell analysis, cellular biomechanics, resonant MEMS devices, bioanalytic instrumentation

Morteza Naraghi-Pour (M) • Wireless communication, wireless sensor and ad hoc networks, communication theory, telecommunication networks, neural networks, signal processing

Lu Peng (M) • Computer architecture, microarchitecture, system performance analysis, network processor
Suresh Rai (M) • Evolvable computing, network traffic engineering, wavelets, fault tolerant computing, digital logic testing and neural modeling, reliability evaluation of multiprocessor and distributed networks
Jagannathan Ramanujam (M) • Optimizing compilers, high performance computing, embedded systems, low power computing, computer architecture
Ashok Srivastava (M) • Low power VLSI design, nanoelectronics, RF MEMS/NEMS, microsystems
Jerry L. Trahan (M) • Theory of computation, models of parallel computation, reconfigurable meshes, run-time reconfiguration, reliability, algorithm design and analysis
Ramachandran Vaidyanathan (M) • Parallel and distributed computing, algorithms, reconfigurable systems, interconnection networks, optical interconnects
Georgios Veronis (M) • Theory and simulation of photonic materials and devices, nanoscale photonic devices, plasmonics, computational electromagnetics
Shuangqing Wei (M) • Physical layer security, cognitive radio networks, wireless sensor networks and multiuser information theory
R. Clive Woods (M) • Novel microelectronic and superconducting devices, semiconductor avalanching, photo transistors and bipolar transistors, acoustic charge transfer devices, organic semiconductors
Hsiao-Chun Wu (M) • Statistical signal processing for telecommunication, ultrasonics, speech, image and biomedical applications, wireless communications, detection and estimation, theoretical studies of system and filters
Kemin Zhou (M) • Robust and optimal control, system theory, signal processing, fault diagnosis and fault tolerant control, applications of advanced control theory

Masters

Electrical Engineering, M.S.EE

(MEE)

The Master's program is open to qualified students holding BS degrees in electrical and/or computer engineering or in a related discipline. Both a thesis and a non-thesis option are available. Each candidate for a master's degree is required to have good general knowledge in his/her field of specialization and for the thesis option, acquire a reasonable level of competence in research skills. In order to graduate, a student must meet the minimum requirements described below and achieve a 3.0 or higher grade point average (GPA) on a scale of 4.0 on all electrical engineering courses applicable towards his/her graduate degree. The MS student is required to have an examination committee that includes at least two graduate faculty members from the ECE division and have an approved Plan of Study by the end of the second semester or upon completion of 15 or more hours of credit. All course work must be approved by the major professor and the division's Graduate Studies Committee. Up to nine hours of credit from a US institution may be applied towards a master's degree program upon approval. Courses at the senior/graduate (4xxx) level, which are *required* in the Electrical and Computer Engineering BS programs at LSU are generally not acceptable for graduate credit. A complete and current set of requirements appears in the ECE Graduate Handbook that can be accessed at www.ece.lsu.edu/grad/Grad_Handbook.pdf.

Thesis Option

The MS degree with the thesis option requires a thesis and 30 hours of credit at the graduate level, including a maximum of six hours of credit for the thesis. The minimum curricular requirements include the following.

- Six hours of thesis credit (EE 8000).
- 12 hours of credit in the division's graduate (EE 7xxx) level courses, excluding independent study courses.
- 12 hours of suitable electives*+.

These 30 hours of course work are subject to additional requirements including the following:

- The maximum credit permitted at the 4000-level is 12 hours.

- A maximum of 12 hours of coursework can be from EE 4x0x, EE 7x00, EE 709x, and other individual study/seminar/special topics courses.
- EE 709x cannot be used to satisfy the EE 7xxx requirements.
- Courses taken outside the division need approval of the Graduate Studies Committee.

*May include a maximum of three credits of EE 709x.

+ In addition, students with a B.S.E.E. degree may take a maximum of 12 hours outside the division; other students may take a maximum of six hours.

The student must pass a final exam consisting of a thesis defense.

Information Technology (IT) Concentration MS Thesis

- Satisfy the minimum requirements for the MS Thesis option in EE
- 15 of the 30 hours of required credit should come from the IT Concentration approved course list using at least three of the course groupings listed at: www.ece.lsu.edu/grad/IT_area.html, with a minimum of three credits from each of the three selected groups.
- Thesis topic must be related to information technology.

Non-Thesis Option

The MS degree with the non-thesis option requires 36 hours of credit as follows:

- Three hours of project credit (EE 709x)¹
- 15 hours of credit in the division's graduate (EE 7xxx) courses, excluding independent study courses.
- 18 credit hours of suitable electives ^{2,3}

These 36 hours of coursework are subject to additional requirements including the following:

- The maximum credit permitted at the 4000-level is 12 hours.
- No more than 18 hours of coursework can be from EE 4x0x, EE 7x00, EE 709x, and other independent study/seminar/special topics courses.
- EE 709x cannot be used to satisfy the EE 7xxx requirements.
- Courses taken outside the division need approval of the Graduate Studies Committee.

¹ - EE 709x must be taken in the final year of MS graduation.

² - May include three credits of EE 709x.

³ - In addition, students with a B.S.E.E. degree may take at most 12 hours outside the division; other students may take at most six hours.

The student must pass a final exam consisting of a project defense.

Information Technology (IT) Concentration MS Non-Thesis

- Satisfy the minimum requirements for the MS Non-Thesis option in EE.

- 21 of the 36 credit hours required should come from the IT Concentration approved course list using at least three of the course groups listed at: www.ece.lsu.edu/grad/IT_area.html, with a minimum of three credits from each of the three selected groups.
- EE 709x Independent Research can be used to satisfy no more than 3 hours and only if the topic is related to Information Technology and approved by the Graduate Studies Committee.

Doctorate

Electrical Engineering, Ph.D.

(PEE)

The PhD degree is conferred only for work of distinction displaying original scholarship and marked capabilities that lead to significant scholastic achievements. In no case is the degree awarded solely on the basis of study, however intense, extending over any prescribed period of time or in recognition of faithful performance or prescribed work. A division-level academic course plan is developed in consultation with and approval of the student's major advisor and the division's Graduate Studies Committee. The student's major advisor chairs the advisory committee that includes at least three members of the graduate faculty, and satisfies the LSU Graduate School's requirements for doctoral committees.

The PhD degree requires a dissertation which is a work of original scholarship. In addition, 42 hours of credit at the senior/graduate (4xxx) and graduate (7xxx) levels must be earned beyond the bachelor's degree, not including dissertation credits (EE 9000). The minimum curricular requirements include the following:

- 15 credit hours of division's EE 7xxx courses, excluding independent study courses.
- 27 credit hours of approved electives at the graduate (4xxx, 7xxx) levels*.

These 42 hours of course work are subject to additional requirements including the following:

- EE 7xx credits must be obtained at LSU in Major area of the candidate.
- Maximum nine credits of 4000-level courses are allowed.
- Maximum three credits of EE 709x can be included but cannot be used to satisfy EE 7xxx.
- No course with a grade of "C" or below will be accepted.
- At least 21 credits must be in EE 4xxx or EE 7xxx.

*4000-level courses counted towards the LSU B.S. degree are not accepted.

The student must pass a qualifying examination before any dissertation credits can be taken. After completing the required course work, the student must pass a general exam in which the student defends his/her research proposal and a final exam, consisting of the dissertation defense.

Interdisciplinary Program in Engineering Science (Graduate Program)

Program Overview

The Donald W. Clayton Graduate Program in Engineering Science allows students to pursue graduate study and research in interdisciplinary areas that cross two or more disciplines in different departments or in program areas not currently associated with an existing department.

The interdisciplinary program spans the fields of engineering, science, business, and even law. In principle, a departmental-level academic course plan in almost any imaginable concentration area in engineering can be designed. In practice, many students

have developed programs in one of three concentration areas: materials science and engineering, environmental and technological hazards engineering, and information technology and engineering. Another area of specialization, bioengineering, is currently attracting student interest and encompasses the interface between engineering and biological science. Construction management, a growing concentration within Engineering Science, is for students interested in applied research with potential to impact the regional construction industries (residential, commercial, industrial, and heavy highway/civil).

The concentration area in materials science and engineering involves course work in mechanical, electrical, chemical and civil engineering, computer science, chemistry, and physics. The environmental and technological hazards engineering concentration area has components primarily from chemical and civil engineering, and environmental science, and secondarily from industrial, biological, and petroleum engineering, chemistry, business and sometimes law. The information technology and engineering concentration area encompasses the disciplines of industrial, electrical and mechanical engineering, and computer science, information systems and decision science, library information systems, and others. Likewise, bioengineering concentration area involves agricultural, civil, mechanical, chemical, and industrial engineering, chemistry, and the biological sciences. In addressing the needs of Louisiana's growing entertainment industries, the ITE concentration is also supporting a DMAE (digital media, art, and engineering) focus area.

Degrees awarded through this program do not provide a direct route to professional engineering registration and practice. Students with degrees in a pure or applied science, who are considering registration as professional engineers, are advised to consider pursuing a second baccalaureate degree in engineering.

Program Administration

Admission and Financial Assistance

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Admission is open to students without baccalaureate engineering degrees. Students wishing to work toward a degree through the Donald W. Clayton Graduate Program in Engineering Science should contact an appropriate faculty advisor in the college before applying for admission. "Engineering Science" should be indicated as the proposed field of study.

A limited set of research assistantships are available to qualified students in the PhD program on a competitive basis directly through the Donald W. Clayton Program in Engineering Science. MS program students seeking financial assistance should pursue support through their faculty advisors.

Graduate Faculty

(check current listings by department by clicking [this link](#))

The Donald W. Clayton Graduate Program in Engineering Science is interdisciplinary. It encompasses the graduate faculty across all departments within the College of Engineering.

Degree Programs

The interdisciplinary degrees of MS in Engineering Science and PhD in Engineering Science are offered. The MS program requires emphasis in at least two areas of study not available within a single department; the PhD requires at least two sub-areas of specialization within one or more academic departments, in addition to the major concentration area of study.

Masters

Engineering Science, M.S.E.S.

(MES)

The MS in Engineering Science program - offered with both thesis and non-thesis options - provides an opportunity for study in areas not represented by departments within the college. Students can enter the program with a baccalaureate degree in any field of engineering or in a pure or applied science. The departmental-level academic course plan for each student (due at the end of the first semester) will be developed in consultation with and approved by the student's graduate advisory committee. Graduate School regulations require the major professor (committee chair) to be a graduate faculty member from a department within the College of Engineering. The committee must also include at least two additional members of the graduate faculty.

The minimum requirements for the thesis option are 24 semester credit hours course work, six additional hours of thesis research credit, and successful defense of a research thesis. The non-thesis option requires a minimum of 36 semester hours of course work including a three-credit hour project course. The project course incorporates a written report and oral presentation to the graduate advisory committee. Additional course work may be necessary for students lacking the proper course prerequisites or as required by the graduate advisory committee and specified on an approved plan of study.

At least one-half of the course work must be College of Engineering courses and at least one-half of the total course work must be at the 7000 level. The program requires emphasis in at least two areas of study not available within a single department and at least 18 hours of required course work and one academic year in residence must be completed after admission to the program.

A plan of study, approved by the student's advisory committee, must be submitted to the Associate Dean for Academic Programs in the College of Engineering by the end of the first semester of enrollment at LSU.

Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science plan of study as part of the application process.

Doctorate

Engineering Science, Ph.D.

(PES)

The college accepts qualified students with bachelor's or master's degrees in engineering or a pure or applied science to work toward a PhD in this interdisciplinary program. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee must consist of at least three members of the graduate faculty. The major professor (advisory committee chair) must be from a department within the College of Engineering and at least one member of the student's committee must come from a department offering the PhD degree in the College of Engineering. The advisory committee must also include representatives from the sub-areas of specialization.

A PhD departmental-level academic course plan, approved by the student's advisory committee, should be submitted to the Associate Dean for Academic Programs in the College of Engineering by the start of the second semester of enrollment. Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science PhD plan of study as part of the application process. This early plan of study will map directly to the Doctoral Degree Audit form required by the LSU Graduate School as candidates near completion of their coursework.

The student will be required to complete a minimum of 54 semester hours of approved course work beyond the bachelor's degree and prepare a dissertation acceptable to his or her advisory committee and The Graduate School. At least half of the course work (27 semester hours) must be taken in courses offered by departments within the College of Engineering. Requirements include 24 hours of course work concentrated in at least two sub-areas of specialization within one or more academic departments. The remaining 30 semester hours of course work must contain no more than 15 hours in any one department.

English (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of English offers graduate students the opportunity to work with an extraordinarily productive and internationally respected faculty that is particularly strong in interdisciplinary approaches to modern literature and culture. The department continues to build upon its long-standing strengths in critical theory and the literature of the United States. The department is strong in most traditional fields of study, including Medieval and Renaissance, 18th century, and Victorian literature. Special areas of strength include modern fiction, film, cultural studies, women's and gender studies, African-American literature, Southern literature, Louisiana and Caribbean studies, post-colonial literature, rhetoric, and popular culture. The highly ranked MFA program in creative writing combines individualized supervision of student work and literary study. Students in all three programs—MA, MFA, and PhD—complete all their course work in small graduate seminars or workshop classes. Each program is distinguished by its flexibility, allowing the student significant input in determining a departmental-level academic course plan.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Admission is granted for the fall only. The application deadline is **December 15** for MA and PhD applicants, and **January 15** for MFA applicants. All applicants must take the GRE general examination. A combined total of 1200 on the verbal and quantitative elements of this examination is also recommended, typically with a minimum of 600 on the verbal portion (in the old format). Comparable scores would be expected in the new format. It is recommended that MA and PhD students submit scores on the advanced English portion of the GRE. A minimum undergraduate GPA of 3.2 is recommended. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score. A writing sample is required of all applicants: eight to 10 poems, 20 pages of prose, or a substantial portion of a script for those applying to the MFA program; a 20-page sample of sustained critical writing for those applying to the MA or PhD programs.

Financial Assistance

Graduate assistantships (\$16,500 to \$17,000) are available for most students admitted to graduate study in this department. Editorial assistantships are awarded in conjunction with journals edited in the department (the Southern Review and the New Delta Review). In order to be considered for financial aid, completed applications should be submitted no later than December 15 for MA and PhD applicants, and January 15 for MFA applicants.

Christine Barrett (6A) • Renaissance British literature, critical theory, Shakespeare, Spenser and Milton

James G. Bennett (M) • Creative writing, fiction

Jacob Berman (M) • American literature, cultural studies and postcolonial theory

Michael P. Bibler (M) • American studies, Southern studies, sexuality studies, critical theory

Rick L. Blackwood (7M) • Screenwriting

William Boelhower (M) • Atlantic studies, critical theory, American Literature

Lillian Bridwell-Bowles (M) • Feminist rhetoric, rhetorical and literary history, composition studies

Jason D. Buch (6A) • Screenwriting

James V. Catano (M) • Rhetorical and critical theory, gender studies

Lauren Coats (6A) • American literature

Andrei Codrescu (EM) • Creative writing; literary translation; editor, Exquisite Corpse

Kevin L. Cope (M) • 18th century literature

Brannon Costello (7M) • Southern literature, American literature

J. Bainard Cowan (EM) • American and comparative literature, critical theory

Moira Crone (EM) • Creative writing, fiction

Rebecca W. Crump (M) • Victorian literature, bibliography
Frank de Caro (EM) • Folklore
Jennifer Davis (6A) • Fiction Writing, Literary Journals
William W. Demastes (M) • Modern drama
Femi Euba (M) • Playwriting, drama, third world literature
John I. Fisher (EM) • 18th century literature, Swift
Daniel Mark Fogel (EM) • The modern novel, American literature, creative writing
Carl Freedman (M) • 20th-century literature, critical theory, film
Jesse M. Gellrich (M) • Medieval studies, critical theory
Lara Glenum (6A) • Creative writing, international modernism, the historical avant-garde
Zachary L. Godshall (6A) • Screenwriting
Angeletta Gourdine (M) • Diaspora literary and cultural studies, African-American literature, women's studies
Michael Hegarty (M) • Linguistics, natural language syntax and semiotics
Barbara A. Heifferon (7M) • Writing (composition and rhetoric), medical rhetoric
Katherine R. Henninger (7M) • Southern American literature, women writers, photography and literature
Benjamin Kahan (6A) • American literature, queer studies
Rodger Kamenetz (EM) • Creative writing, poetry, nonfiction, Jewish studies
J. Gerald Kennedy (M) • American literature, short fiction, narrative theory
Mari Kornhauser (7M) • Screenwriting
Joseph G. Kronick (M) • American poetry and nonfiction prose, critical theory
Isiah Lavender III (6A) • African and African-American literature, cultural studies, science fiction
Sarah L. Liggett (7M) • Composition research and theory, technical writing
John W. Lowe III (M) • Southern, African-American, Louisiana, and ethnic literature; humor
Phillip J. Maciak (6A) • American studies, cultural studies, film and media studies
David Madden (EM) • Creative writing, fiction, literary and film criticism, the Civil War
Michelle Massé (M) • Feminist and psychoanalytic theory, theory of the novel, 19th century
John R. May (M) • American literature, film, theological literary criticism
Patrick McGee (M) • Film studies, cultural studies, Joyce and Irish studies
Elsie B. Michie (7M) • 19th-century British literature, the novel, women's studies, critical theory, film
Richard C. Moreland (M) • American literature, modernism, critical theory
Laura Mullen (7M) • poetry, theory, experimental fiction and nonfiction
Anna K. Nardo (M) • Renaissance literature, Milton, George Eliot
Daniel Novak (7M) • 19th-century British literature and culture, literature and photography
Lisi Oliver (M) • Medieval law, Old English, languages, linguistics
James Olney (EM) • Modern poetry, autobiography, third world literature
Solimar Otero (7M) • Folklore, Caribbean culture
Irvin Peckham (7M) • Working class studies, genre theory, rhetoric and composition
Peggy W. Prenshaw (EM) • American literature, Southern studies, women's studies
Pallavi Rastogi (7M) • Colonial and postcolonial literature, theory, international cinema
Panthea Reid (EM) • Modern novels
Malcolm Richardson (M) • Technical writing, medieval language and rhetoric
Brooke Rollins (6A) • Rhetoric, critical theory
Christopher Rovee (6A) • 18th- and 19th-century British literature; poetry and poetic theory; literature and the arts
Keith A. Sandiford (7M) • 18th-century British literature and cultural studies, colonial West Indian culture and history
Lawrence Sasek (EM) • 17th-century British literature
Irina Shport (6A) • Linguistics, secondary English education
Dave Smith (EM) • creative writing
Emily Toth (EM) • American popular fiction, biography, women's studies
Carolyn Ware (M) • Louisiana folklore, women's folklore
Susan Weinstein (7M) • English education, social literacies, adolescent writing
Sharon A. Weltman (7M) • Victorian literature and culture, drama, gender studies, musical theater
James Wilcox (M) • Creative writing, fiction
Michelle Zerba (7M) • Classics, comparative literature, literary theory, rhetoric

RECENT FACULTY PUBLICATIONS

A representative sample of faculty publications during recent years includes the following:

Lillian Bridwell-Bowles, *Rhetorical Women*

James Catano, *Ragged Dicks: Masculinity, Steel, and the Rhetoric of the Self-Made man*

Andrei Codrescu, *Wakefield*

Brannon Costello, *Plantation Airs*

William W. Demastes, *Staging Consciousness: Theater and the Materialization of Mind*

Carl Freedman, *The Incomplete Projects: Marxism, Modernity, and the Politics of Culture*

Angeletta Gourdine, *The Difference Place Makes: Gender, Sexuality, and Diaspora Identity*

Michael Hegarty, *Feature-Based Functional Categories*

Katherine T. Henninger, *Ordering the Façade: Photography in Contemporary Southern Women's Writing*

Rodger L. Kamenetz, *The Lowercase Jew*

J. Gerald Kennedy, *A Historical Guide to Edgar Allan Poe*

Michelle Massé, *Over Ten Million Served: Gendered Labor in Language and Literature Workplaces*

Patrick McGee, *Theory and the Common from Marx to Badiou*

Elsie Michie, *The Vulgar Question of Money: Heiresses, Materialism, and the Novel of Manners from Jane Austen to Henry James*

Lauren Mullen, *Murmur*

Anna K. Nardo, *George Eliot's Dialogue with John Milton*

Daniel Novak, *Realism, Photography, and Nineteenth-Century Fiction*

Lisi Oliver, *The Beginnings of English Law*

Solimar Otero, *Afro-Cuban Diasporas in the Atlantic World*

Pallavi Rastogi, *Afrindian Fictions: Diaspora, Race, and National Desire in South Africa*

Malcolm Richardson, *Middle Class Writing in Late Medieval London*

Keith Sandiford, *The Cultural Politics of Sugar: Caribbean Slavery and Narratives of Colonialism*

Susan Weinstein, *Feel These Words: Writing in the Lives of Urban Youth*

Sharon Aronofsky Weltman, *Performing the Victorian: John Ruskin and Identity in Theater, Science, and Education*

James Wilcox, *Hunk City*

Masters

Creative Writing, M.F.A.

(MFACW)

The MFA in creative writing requires 42 hours of course work, six hours of thesis research, a creative thesis, and defense of that thesis.

English, M.A.

(AENGL)

The thesis option MA requires 24 hours of course work, six hours of thesis research credit, and a thesis. The non-thesis option MA requires 30 hours of course work and a passing score on the MA examination.

Doctorate

English, Ph.D.

(PENGL)

The PhD program requires at least 48 hours beyond the bachelor's degree (please see the Department of English website for specific course distribution requirements), a general exam (with a preliminary written component), a dissertation, and a final examination on the dissertation.

Entomology (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Entomology at LSU was established in 1889 with the appointment of I. H. A. Morgan as an entomologist in the Louisiana Agricultural Experiment Station. Everett Oertel's *History of Entomology in Louisiana* traces the history and development of entomology at LSU until 1976. The Department of Entomology was founded in 1964; L. Dale Newsom served as the first department head.

The department is responsible for all research, teaching, and extension related to entomology at LSU. Faculty members hold joint appointments with the university and the LSU Agricultural Center. The department's mission is threefold:

- to conduct basic and applied research leading to the development of new understanding of insect biology and of environmentally sound pest management technology
- to train students for careers with universities, industry, or government
- to provide entomological information and education to the general public

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Inquiries for admission may be made to the department head, graduate advisor, or any faculty member. Successful applicants must meet the Graduate School requirements for admission. A 3.0 GPA and a minimum score of 1000 (combined verbal and quantitative) on the GRE are required for a graduate research assistantship or fellowship. The department also requires three letters of recommendation and a statement of interest in entomology from each applicant.

Financial Assistance

A limited number of departmental assistantships and fellowships are available on a competitive basis. Departmental assistantships are valued at \$17,000 for MS students and \$18,000 for PhD students and include a waiver of nonresident tuition. For more information about financial assistance, contact the department head.

Julien Beuzelin (3F) • Insect ecology and integrated pest management
David J. Boethel (EM) • Soybean pest management
A Lelania Bourgeois (3F) • Bee Biology
Christopher E. Carlton (M) • Insect systematics and biodiversity; Director, Louisiana State Arthropod Museum
Robert Danka (3F) • Bee biology
Jeffrey Davis (M) • Biology and management of insects of soybean
Lane D. Foil (M) • Physiological aspects of arthropod disease transmission and physical injury in livestock
Richard A. Goyer (EM) • Forest entomology
Michael Grodowitz (3F) • Biological control of invasive plants
Abner Hammond (EM) • Chemical ecology
Gregg Henderson (M) • Natural history and control of urban insects, special emphasis on social insect behavior
Linda M. Hooper-Bui (M) • Fire ant biology and control, physiology
Fangneng Huang (7M) • Biology and management of corn and small grains insects
Claudia Husseneder (3F) • Molecular biology of Formosan subterranean termites, microbial gut flora
Yulin Jia (3F) • Insect-plant interactions
Seth J. Johnson (EM) • Population dynamics, parasite and predator ecology, insect migration
David L. Kerns (3F) • Field crops pest management
Billy R. Leonard (M) • IPM of cotton insects
James A. Ottea (M) • Insect biochemistry, toxicology, and genetics
Dorothy Prowell (EM) • Insect-plant interactions, conservation, molecular systematics
T. Eugene Reagan (M) • Sugarcane insect ecology and pest management, imported fire ant ecology
Thomas Rinderer (3F) • Bee biology
Dennis Ring (3F) • Biology and control of termites
Timothy D. Schowalter (M) • Insect ecology, forest entomology
Tara Smith (3F) • Sweet potato pest management
Richard N. Story (EM) • Biology and management of insect pests of horticultural crops
Michael J. Stout (M) • IPM of rice insects, host-plant resistance
Michael O. Way (3F) • IPM of rice and sugarcane insects
William H. White (3F) • IPM of sugarcane insects
Yu Cheng Zhu (3F) • Molecular biology and toxicology

Masters

Entomology, M.S.

Entomology (SENTM) or (PENTM)

The Department of Entomology offers degree programs leading to the MS and PhD areas of study include pest management, biological control, toxicology, pathology, behavior, systematics, migration, population ecology, apiculture, and molecular genetics. There is considerable opportunity for research dealing with insect biology and with pests of row crops, vegetables, ornamentals, households, and structures, as well as insect pests of animal and human health.

Doctorate

Entomology, Ph.D.

Entomology (SENTM) or (PENTM)

The Department of Entomology offers degree programs leading to the MS and PhD areas of study include pest management, biological control, toxicology, pathology, behavior, systematics, migration, population ecology, apiculture, and molecular genetics. There is considerable opportunity for research dealing with insect biology and with pests of row crops, vegetables, ornamentals, households, and structures, as well as insect pests of animal and human health.

Environmental Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Environmental Sciences is a multidisciplinary research and academic unit whose mission is to provide the academic talents and knowledge needed to solve environmental problems that are important to Louisiana, the Gulf of Mexico region, and comparable areas throughout the nation and the world. The department offers a variety of courses relating to the environment. Faculty from other academic units participate in teaching some of the department's courses. Likewise, departmental faculty serve as adjuncts in several departments that offer master and doctoral programs.

Administration

Graduate Minor in Environmental Sciences (GENVS)

A minor in Environmental Sciences is available to graduate students in other graduate degree programs. The minimum required credit hours for the minor are nine hours, with three credit hours from each of the three priority groups. ENVS 7700 (Integrated Environmental Issues) can be counted as either one of the three priority areas. Of those nine hours, at least three hours are at the 7000-level.

Graduate Minor Wetland Science and Management (GWSM)

The Departments of Environmental Sciences and Oceanography and Coastal Sciences have joined together to establish a minor in wetland science and management. This minor, requiring 12 hours of approved courses, provides masters' and doctoral students in both departments with a strong background in wetland science and policy and enhances their understanding of ecosystem processes in wetland ecosystem management.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received from the Office of Graduate Student Services and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School. To guarantee admission for the fall semester, application materials should be submitted prior to **May 15th**. Applications for the spring semester should be complete by **October 15th**.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE and GPA scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score. Admission requirements include:

- Bachelor's degree with GPA of at least 3.00 on a 4.0-point scale
- GRE verbal and quantitative score total of at least 1000
- TOEFL score of at least 213 computer or 550 paper, or 79 Internet, IELTS score of at least 6.5; or PTE score of at least 59 (International students only)

The graduate programs in the Department of Environmental Sciences are designed primarily for students with backgrounds in science or engineering. However, students with exceptional academic records and backgrounds in other fields are encouraged to apply. Preparatory undergraduate course work for the graduate programs includes: three hours of introductory statistics (EXST 2201 or equivalent); three hours of chemistry; three hours of biological sciences for science majors (e.g. BIOL 1201) and six additional hours of natural science courses. Incoming students who need to satisfy any prerequisite requirements are expected to have taken the appropriate course(s) by the end of their second semester of residency.

Ed Overton (EM)
Ralph Portier (M) • environmental toxicology
Margaret Reams (7M) • environmental policy
Barbara Shane (EM)
Vince Wilson (M) • genetic toxicology

Degree Programs

The Department offers MS and PhD degrees in environmental sciences and a PhD minor in environmental sciences. In order to provide students with a holistic training to meet today's environmental challenges, the graduate curriculum is organized according to three priority areas: (a) Biophysical Systems (coupled biological and physical systems); (b) Environmental Planning and Management (coupled human and natural systems); and (c) Environmental Assessment and Analysis (coupled people and technology). The MS program consists of thesis and professional options. Collaborative graduate programs with Southern University and LSU-Shreveport are also available.

Research activities within the department include environmental assessment and resource sustainability, environmental microbial ecology, molecular phylogenetics, water quality, air quality and air transport modeling, bioremediation, environmental management, environmental toxicology, genetic toxicology, environmental regulations, policy development, hazardous waste management, development of mobile analytical instrumentation, the environmental impact of toxic chemicals, remote sensing, geographic information science, environmental health, and environmental decision-making.

Individualized programs of study for each student are developed in consultation with and approved by the student's graduate advisory committee. The committee includes the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Masters

Environmental Sciences, M.S.

(SENVS)

The degree is a thesis/professional (non-thesis) degree requiring 36 hours of graduate credits. For the thesis option, the curricular requirements include:

- 36 credit hours beyond the bachelor degree level; at least half at the 7000 level
- ENVS 7700 Integrated Environmental Issues (3)
- ENVS 7995 Environmental Seminar (1)
- Six hours from each of the three priority areas (18 hours)
- An additional three-hour course from a priority area of choice (three hours)
- Five hours of elective course work, which can be additional course work taken within or outside the department (Note: courses taken outside of the department must have the approval of the student's advisor committee)
- ENVS 8000 Thesis Research (1-12 per sem.) (6 credits required)

The student must complete a thesis and successfully defend the thesis in an oral examination. The thesis must be acceptable in subject matter and exhibit creditable literary workmanship to the satisfaction of the thesis committee and meet with the approval of The Graduate School.

The professional (non-thesis) option provides students with the requisite skills and knowledge to assume professional research and/or managerial positions within public, private, and non-profit organizations facing increasingly complex environmental challenges. The program is designed to emphasize interdisciplinary team research experience and to master skills in data analysis and oral and written communication. The curricular requirements for this option include:

- 36 credit hours beyond the bachelor degree level; at least half at the 7000 level
- ENVS 7700 Integrated Environmental Issues (3)
- ENVS 7995 Environmental Seminar (1)
- Six hours from each of the three priority areas (18 hours)
- Three hours from a priority area of choice (three hours)
- Eight hours of elective course work, which can be additional course work taken within or outside the department (Note: courses taken outside of the department must have the approval of the student's advisor committee)
- Three hours of research based on an internship or a team project (e.g. ENVS 7998, ENVS 7900)

During the last semester professional MS students must successfully complete a written comprehensive exam and deliver an oral presentation of a written research report from the internship or team project, one copy of which must be turned into the academic coordinator prior to graduation.

Doctorate

Environmental Sciences, Ph.D.

(PENVS)

In March 2012, the Louisiana Board Regents authorized the Department of Environmental Sciences to offer the PhD degree in Environmental Sciences. The PhD curriculum in Environmental Sciences is designed so that students will acquire substantial knowledge in a primary area of concentration, develop breadth in the three priority areas, and conduct original research on an important environmental topic culminating in a publishable dissertation.

Students entering with a Bachelor's Degree are required to take a total of 60 credit hours, at least half of which are at or above the 7000 level. Of the 60 hours, nine are for dissertation research (ENVS 9000). The curricular requirements for these students include:

- ENVS 7700 Integrated Environmental Issues (3)
- ENVS 7995 Environmental Seminar (1)
- Six hours from each of the three priority areas (18 hours)
- Three hours from a priority area of choice (three hours)
- The remaining hours will be chosen in consultation with the student's major advisor

Students entering with a master's degree are required to take a total of 30 credit hours, at least half of which are at or above the 7000 level. Of the 30 hours, nine are for dissertation research (ENVS 9000). The curricular requirements for these students include:

- ENVS 7700 Integrated Environmental Issues (3)
- ENVS 7995 Environmental Seminar (1)
- Three hours from each of the three priority areas (nine hours)
- Three hours from a priority area of choice (three hours)
- The remaining hours will be chosen in consultation with the student's major advisor

All PhD students will take a minimum of nine hours of graduate coursework to establish a minor area of study outside the department. The minor area of study will be developed in consultation with the student's advisory committee.

Students who have received an M.S. in Environmental Sciences from LSU will likely have taken the requisite ENVS courses described above. For those students, the student's advisory committee will develop an appropriate program of courses within and outside the department.

Department of Environmental Sciences Graduate Courses

Priority Area

- ENVS 7700 Integrated Environmental Issues (3)
- ENVS 7995 Environmental Seminar (1)

Core Courses

A: Biophysical Systems (Coupled Biological and Physical Systems)

- ENVS 4010 Applied Ecology (2)
- ENVS 4035 Aquatic Pollution (3)
- ENVS 4101 Environmental Chemistry (3)
- ENVS 4045 Air Pollution and Society (3)
- ENVS 4477 Environmental Toxicology: Introduction and Applications (3)
- ENVS 4500 Health Effects of Environmental Pollutants (3)
- ENVS 4600 Global Environmental Change: Past, Present and Future (3)
- ENVS 7110 Toxicology of Aquatic Environments (3)
- ENVS 7112 Concepts in Marine Ecotoxicology (3)
- ENVS 7151 Watershed Hydrology and Floodplain Analysis (3)
- ENVS 7623 Toxicology I (3)
- ENVS 7626 Toxicology IV: Genetic Toxicology (3)

B: Environmental Planning and Management (Coupled Human and Natural Systems)

- ENVS 4261 Energy and the Environment (3)
- ENVS 4262 Environmental Hazards Analysis (3)
- ENVS 4264 Regulation of Environmental Hazards (3)
- ENVS 4266 Ocean Policy (3)
- ENVS 7040 Environmental Planning and Management (3)
- ENVS 7041 Environmental Policy Analysis (3)
- ENVS 7042 Environmental Conflict Resolution (3)
- ENVS 7043 Environmental Law and Regulation (3)
- ENVS 7061 Water Quality Management and Policy (3)
- ENVS 7044 Regulation of Toxic Substances (3)
- ENVS 7046 International Environmental Law (3)
- ENVS 7047 Environmental Economics and Policy (3)
- ENVS 7950 Special Topics in Environmental Sciences (1-6)

C: Environmental Assessment and Analysis (People and Technology)

- ENVS 4145 Remote Sensing Fundamentals for Environmental Scientists (3)
- ENVS 4149 Design of Environmental Management Systems (3)
- ENVS 4900 Watershed Hydrology (3)
- ENVS 7010 Mathematical Modeling in Energy and Environmental Management (3)
- ENVS 7050 Spatial Modeling of Environmental Data (3)

- EXST 7003 Statistical Inference I (4) or
- EXST 7004 Experimental Statistics I (4) or
- EXST 7005 Statistical Techniques I (4)

Experimental Statistics (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click [here](#).

Program Overview

The Department of Experimental Statistics is the principal source of statistical education, research, and service at LSU. This department is unique in its strong orientation toward the application of statistics. Faculty provide expert statistical support for the university community.

Faculty also routinely serve on graduate committees in other departments and collaborate on interdisciplinary research projects in addition to directing graduate students in statistics and conducting independent research programs. The department has approximately 30 master's students who interact closely with the faculty.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Students must satisfy all admission requirements of the Graduate School. Application materials, obtained from the department, must be completed and returned to the Graduate School. Transcripts and three letters of recommendation must also be sent to the Graduate School. Letters should be written by individuals who have knowledge of the student's academic and professional qualifications.

Admission is based on aptitude, interest, and background as documented in application materials. Evidence of a strong aptitude comes from GRE scores and grades in previous college courses. Breadth of background, particularly in the applied sciences, is advantageous. Previous training in probability and statistics is desirable but not required.

To complete the program successfully, students need a working knowledge of multidimensional calculus and linear (matrix) algebra. Qualified students who have not had adequate training in mathematics can be admitted and allowed to schedule appropriate courses to satisfy this requirement. These background courses will not count for degree credit.

Financial Assistance

Graduate assistantships are awarded competitively with the approval of the department head. Nine-month assistantships pay \$10,800 and require 20 hours of work per week. Academic qualifications and ability to carry out assistantship duties are the major considerations in awarding assistantships.

Some assistantships, particularly those funded by contracts, may require special skills or qualifications. The department will normally provide assistantship support for a maximum of two calendar years. International students must pass a test in spoken English prior to receiving a teaching assistantship.

Graduate Course Offering

The department offers a two-semester sequence in statistical methods that is taken by graduate students from departments throughout the university. Specialized courses in mathematical statistics, nonparametric statistics, regression, experimental design, applied least squares, multivariate statistics, categorical data analysis, sampling, reliability and survival analysis, spatial statistics, population statistics, statistical data mining, statistical computing, Bayesian analysis, and statistical genetics are offered.

Additionally, special topics courses are offered. These courses serve the educational needs of departmental graduate students in addition to fulfilling part of the department's service mission by providing statistical training to the campus as a whole.

Facilities

This department, located in the Martin D. Woodin Hall, is centrally located and convenient to all campus facilities. The department's computer facilities include state-of-the-art laboratories equipped with approximately 100 stations, with access to the department's servers, the campus high performance computing systems, and the Internet. These labs are used by students taking both undergraduate and graduate statistical methods courses, as well as by students taking advanced statistics courses. Moreover the labs are used for workshops, computationally intensive statistical research, and statistical data analysis for a wide variety of university research projects for which the department, faculty, staff, and students provide statistical support. In addition, the department has a computer lab reserved for graduate student statistical computing. The lab's servers provide file and printer services as well as streaming video services used in statistical instruction, including distance education.

Graduate Faculty

(check current listings by department by clicking [this link](#))

David C. Blouin (M) • Experimental design, mixed models

Luis A. Escobar (M) • Statistical theory, nonlinear methods, survival analysis, engineering reliability, industrial statistics

James P. Geaghan (M) • Biological modeling, quantitative ecology, fisheries statistics

BeiBei Guo (6A) • Bayesian clinical trial design, statistical genomics

Bin Li (M) • Data mining, statistical learning

Brian D. Marx (M) • Smoothing, signal regression and chemometrics, generalized linear and additive models, illconditioned data, penalized likelihood

Kevin S. McCarter (7M) • Survival analysis, computationally intensive statistical methods, biostatistics, design and analysis of

clinical trials, mathematical statistics, statistical education

Charles J. Monlezun (3A) • Linear models, statistical methodology, mathematical statistics

Faculty Research

Faculty members conduct research in traditional and modern areas of statistics, as well as in applications in diverse areas of agriculture and life, social, environmental, physical, and engineering sciences. Faculty also provide statistical expertise as members of interdisciplinary teams conducting research in such areas as agriculture, forestry, wildlife, fisheries, social sciences, the physical and life sciences, and clinical trials. Faculty publish in applied and theoretical statistics journals and in journals in other fields of application.

Masters

Applied Statistics, M.Ap.St.

(MAPST)

The Department of Experimental Statistics offers the Master of Applied Statistics (MAPST) degree. Students can opt for a non-thesis (38 credits) or a thesis (37 credits) degree. Students who choose the thesis degree must write a thesis involving the extension of current statistical methodology or novel/extensive use of statistical methods in a real application. Students gain valuable experience while working closely with faculty and clients during the statistical consulting practicum courses. Each student must present a departmental seminar and must pass the oral and written comprehensive final examination.

Some students in the department pursue dual master's degrees or work toward the MAPST degree while pursuing a PhD in another department. Students completing the MAPST degree are prepared to serve as applied statisticians or to pursue a PhD in statistics or a related field. Employment opportunities exist for applied statisticians in business, industry, government, and in educational and research organizations.

Master of Applied Statistics Course Work

Core methods and theory courses (14 credits)

- EXST 7003 Statistical Inference I (4) or
- EXST 7004 Experimental Statistics I (4) or
- EXST 7005 Statistical Techniques I (4)

- EXST 7013 Statistical Inference II (4) or
- EXST 7014 Experimental Statistics II (4) or
- EXST 7015 Statistical Techniques II (4)

- EXST 7060 Probability and Statistics (3)
- EXST 7061 Statistical Theory (3)

Professional courses (four credits)

- EXST 7083 Practicum in Statistical Consulting I (2)
- EXST 7084 Practicum in Statistical Consulting II (2)

Non-thesis or Thesis Option

In addition, students must select a thesis or non-thesis option. Each option's additional requirements are given below.

Non-thesis option (18 credits)

- Advanced statistical courses (9);
- Three advanced EXST courses approved by the student's graduate advisory committee;
- minor area of concentration (9)
- Three graduate courses approved by the student's graduate advisory committee

Thesis option (18 credits)

- Advanced statistical courses (12)
- Four advanced courses with at least nine hours in EXST, approved by the student's graduate advisory committee
- EXST 8000 Thesis Research (1-12 per sem.)

Finance (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Finance has a strong commitment to excellence in research and teaching and to offering meaningful, relevant, and intellectually stimulating courses. Graduate education is an important part of the department's instructional effort.

The objective of the MS curriculum is to provide qualified students who have previous coursework in finance the opportunity to deepen their knowledge. The MS program gives students the analytical and communicative skills necessary for effective financial decision-making. The curriculum is flexible, with a student's departmental-level academic course plan reflecting his or her professional objectives. The program is narrower in scope than that of the MBA and is intended as an alternative to the MBA rather than a bridge to the PhD. Another program designed as an alternate course of study is the JD/MS program. A dual degree program with the LSU Law Center, the program is similar to the dual degree JD/MBA program. The objective of this alternate route is providing students with a highly concentrated background in finance and Louisiana state law. It is an intensive study of analytical financial decision-making and interpretation of law code.

The PhD program in business administration with a concentration in finance is research-oriented and designed to prepare qualified students for academic professions. The program includes an intensive study of the theory and empirics of finance through seminars, independent study, and individual work with faculty members. To be successful in the program, a student must develop a sense of scientific curiosity and be committed to the highest level of academic achievement.

Administration

Master of Science (MS) in Finance (SFIN) with Juris Doctorate (JD)

[Click here to view the Master of Science \(MS\) in Finance \(SFIN\) with Juris Doctorate \(JD\).](#)

The JD/MS is a specialized course of study in which a student actively pursues both a Master of Science (MS) in Finance (SFIN) and a Juris Doctorate (JD) with the LSU Law Center. Admission into the program is contingent upon acceptance into both the regular MS program and the LSU Law Center. Curricular requirements for both graduate degrees are the same as their respective individual programs. The nature of the JD/MS program allows students to share several hours of coursework between the two programs.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department on a rolling basis. Applicants must adhere to the application deadlines established by the Graduate School.

Admission is based on prior academic performance, test scores, and other indicators of a high likelihood of success in the program. The MS program is best suited for those with either an undergraduate or graduate degree in business administration. Applicants to the MS program must submit satisfactory credentials from previous study, Graduate Management Admission Test (GMAT) scores, resume, and letters of recommendation. Applicants for the PhD program must submit satisfactory credentials from previous study, GMAT (preferred) or GRE scores, letters of recommendation, and departmental assistantship application. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Most students begin the PhD program in the fall. Students may enter the MS program in either the fall or spring.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Don M. Chance (M) • Derivatives, risk management
Shan He (6A) • Corporate finance, seasoned equity offerings, corporate spin-offs, international finance
Ayla Kayhan (3A) • Corporate finance, capital structure, corporate governance
Frances Lawrence (M) • Consumer Finance, Financial Literacy, Poverty, Rural Health Issues
Ji-Chai Lin (M) • Market microstructure, investments
Joseph Mason (M) • Financial markets and institutions, banking
Haitao Mo (6A) • Asset Pricing
Rajesh Narayanan (M) • Corporate finance
R. Kelley Pace (M) • Real estate applications of spatial statistics, automated appraisal
Gary C. Sanger (M) • Financial theory, investments and regulation
V. Carlos Slawson Jr (M) • Real estate, mortgage pricing, derivative securities
Wei-Ling Song (M) • Financial markets and institutions
Clifford P. Stephens (3F) • Dividend policy, managerial incentives

Masters

Finance, M.S.

(SFIN)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a non-thesis degree requiring a final examination. A thesis option is available. Thirty-six hours of credit at the graduate level must be earned. The curricular requirements include:

- At least 18 hours at the 7000 level or above
- At least 18 hours of graduate-level finance courses
- A minimum core requirement of nine credit hours:
 - FIN 7826 Investment Analysis and Portfolio Theory (3)
 - FIN 7633 Financial Markets (3)
 - FIN 7719 Advanced Financial Management (3)

The student must pass a final exam consisting of a comprehensive oral exam. At the discretion of the student's advisory committee, a written exam may be required.

Doctorate

Business Administration, PhD (Finance Concentration)

Doctor of Philosophy (PhD) in Business Administration with a concentration in Finance (PBADM)(GFIN)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a thesis degree requiring a thesis. Fifty-four hours of credit at the graduate level must be earned. The curricular requirements include:

- At least 54 hours at the 7000 level or above
- A primary area consisting of a minimum of 18 hours of earned credit in Finance
- A minor area consisting of a minimum of 12 hours of Economics
- A minimum of nine hours of credit earned for breadth of study. Three hours to be taken in each of the following: Accounting, Management, and Marketing

The student must pass a general exam consisting of a written examination and successful defense of his/her dissertation.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/finance/Pages/PhD-Finance.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/finance/Pages/PhDCurriculum.aspx).

Graduate

Dual Degree: JD/MS in Finance

Students interested are encouraged to visit the individual program site.

- JD/DCL-MS in Finance

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/DCL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the website listed above.

Students successfully completing the program listed above will receive two degrees, a JD/DCL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Students wishing to pursue dual degrees must complete and submit the "Request for Dual Degree" form.

Food Science (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Food Science offers advanced studies in food chemistry, food quality, product development, byproduct utilization, food safety, foods for health and combating effects of obesity, food microbiology, and food biotechnology. Students may also study specific foods such as seafood, rice, dairy products, sweet potato, peppers, meat, or others. Training and research in the basic sciences of biology, physics, and chemistry, and the natural sciences of biochemistry, microbiology, toxicology, and engineering are incorporated into graduate studies which allow specialization in specific areas of student interest.

The department is well equipped with research laboratories for food chemistry, food microbiology, food analysis, tissue culture/hybridoma, food engineering and processing, and sensory analysis. Pilot food processing facilities have freezing, mixing, forming, mince recovery, batter and breadings, packaging, and other processing equipment. Other LSU units such as the Schools of Animal Sciences; Human Ecology; Plant, Environmental & Soil Sciences; Veterinary Medicine; and Renewable Natural Resources; the Departments of Biological & Agricultural Engineering and Oceanography & Coastal Sciences; Audubon Sugar Institute; and Pennington Biomedical Research Center also provide faculty expertise and laboratories for analysis and pilot processing activities for food.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department for each semester (fall, spring, summer). Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, have a minimum of 150 verbal GRE score and 150 quantitative GRE score, three letters of recommendation that describe the student's ability to pursue graduate studies in food science, and a statement of purpose or interest in the desired specific area of food science. The statement of purpose satisfies the writing sample requirement for admission. International students whose native language is not English must also submit TOEFL, IELTS, or PTE scores that meet the Graduate School minimum requirements.

When all admission requirements are met and documents have been submitted, full admission will be considered by the departmental graduate faculty members. Final admittance to the program must be supported by a member of the departmental graduate faculty who serve as the student's major advisor. If a student does not meet all requirements, he or she may be admitted provisionally (e.g., on probation if the GPA is not 3.0 or higher or if the GRE is not 1000 or higher). Students are admitted for fall, spring, and summer semesters, but admission depends upon the availability of space in the program of each individual professor. The lack of space in a program is sufficient justification to deny admission of an applicant.

Financial Assistance

Financial assistance may be available for students. Support may be available through the department or other units in the form of research or teaching assistantships. Financial assistance is on a competitive basis so early applications are encouraged. Each professor determines the availability of space and financial assistance for the graduate students in his/her program. Students on assistantship receive full tuition waivers, but are responsible for university fees, insurance, and other costs. To ensure consideration for financial aid, all application materials should be submitted as early as possible before the actual admitting semester. The deadlines for admission are in March for fall semester and in October of the previous year for spring and summer semesters.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Giovanna Aita (3F) • Biomass conversion, antimicrobials for food, characterization of antimicrobial resistant bacteria

John Beaulieu (3F) • Sensory properties and shelf-life of fruit, food processing

William T. Cefalu (3P) • Clinical interventions to improve the metabolic state of individuals with insulin resistance and cellular mechanisms for insulin resistance

Donal F. Day (M) • Industrial microbiology, polysaccharide production and industrial enzymology, biofuels

John W. Finley (M) • Low calorie ingredients and functional foods mediating impacts of obesity, low calorie carbohydrates and

lipids causing caloric dilution in foods, bioactive ingredients influencing fat deposition, antiinflammatory food formulations influencing effects of obesity and diabetes

Frank L. Greenway (3F) • Developing obesity treatments including diets, herbal supplements, medical foods, devices, obesity surgery, and obesity drug development

Robert M. Grodner (EM) • Seafood; food irradiation

Marlene Janes (M) • Food microbiology and safety; detection, control, and prevention of foodborne pathogens in food products

Joan King (M) • Food chemistry and safety, ingredient development with sweet potato and rice components especially resistant starch, oxidation products in processed and stored foods, aflatoxin in grains and nuts, off-flavors in catfish, ozone processing

Jack Losso (M) • Food chemistry and biochemistry, protein biotechnology, recovery of bioactive compounds for food and biomedical applications, bioavailability and molecular basis of antiangiogenic dietary bioactive compounds, food fortification

Michael W. Moody (EM) • Seafood processing and technology, food safety, packaging

Witoon Prinyawiwatkul (M) • Sensory analysis and consumer acceptance of foods and beverages, new and value-added food product development, functional/physical-chemical characteristics of food ingredients

Ramu Rao (EM) • Food engineering, utilization of rice and rice products, thermal properties of foods

Subramaniam Sathivel (M) • Food engineering with emphasis on design and development of food processing unit operations; preservation and packaging of foods (coatings, edible films, microencapsulation); thermal, rheological, and functional properties of ingredients and foods; development of nonfood materials from biological wastes including biodiesel

Paul Wilson (EM) • Processing and preservation of horticultural crops

Zhimin Xu (M) • Food microconstituent analysis, extraction and characterization of functional food components, evaluation of health benefits of functional components using chemical and biological models

Masters

Food Science, M.S.

(SFDCS)

The departmental-level academic course plan for each student will be developed in consultation with the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The MS degree is a research degree requiring a thesis. A minimum of 30 hours of credit at the graduate level must be earned including at least six hours of credit for the thesis (FDSC 8000). The curricular requirements include:

- Demonstration of competency in each of the core areas of food science, including food chemistry, food preservation, food composition and analysis, and food microbiology through previous course credits in these areas or through passing of a comprehensive examination given by the instructor in each area
- Two hours of FDSC 7071 Seminar in Food Science (1), four hours of EXST 7004 Experimental Statistics I (4) or another graduate statistical course), minimum of three hours of electives in 7000 level courses, and six hours FDSC 8000 Thesis Research (1-12 per sem.)
- All coursework approved by the student's examining committee

Other degree requirements are submission of an oral and written research proposal to the advisory committee. The advisory committee must be chosen and approved by the department head and graduate coordinator within one year of enrollment in the graduate program. The first graduate seminar for credit should be an oral presentation that gives an introduction and brief literature review on the proposed research area and an outline of the proposed research to be conducted for the MS.

Students must have submitted one manuscript to a scientific journal and presented their research at one national meeting before graduation. Students are expected to attend all departmental seminars (graduate, faculty, and invited speakers) whether enrolled for credit or not.

A comprehensive examination is required for use as a departmental assessment tool, but the score is not used to determine competence by the student. Students must present a public oral seminar on the thesis research before the final exam. A student must pass a comprehensive final oral examination by the student's advisory committee on food science topics and the completed research area.

Doctorate

Food Science, Ph.D.

(PFSC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least three additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The PhD degree is a research degree requiring a dissertation. A minimum of 30 hours of credit at the graduate level for students with an MS degree or 60 hours of credit at the graduate level for students with a BS degree must be earned, with a minimum of nine hours of credit for the dissertation project (FDSC 9000). The curricular requirements include:

- Demonstration of competency in core areas of food science, including food chemistry, food preservation, food composition and analysis, and food microbiology through previous course credits in these areas or through passing of a comprehensive examination given by the instructor in each area
- Three hours of FDSC 7071 Seminar in Food Science (1), nine hours of FDSC 9000 Dissertation Research (1-12 per sem.), and a minimum of 18 hours of electives in 7000 level courses in addition to the 30 hours of course work required for MS students in food science
- All course work including electives approved on the departmental-level academic course plan by the student's advisory committee

Other degree requirements are submission of an oral and written research proposal to the advisory committee. The advisory committee and departmental-level academic course plan that lists the proposed course work must be approved by the department head, graduate coordinator, and The Graduate School by the end of the second semester of enrollment in the PhD program. The first graduate seminar for credit should be an oral presentation that gives an introduction and brief literature review on the proposed research area and an outline of the proposed research to be conducted for the PhD. Students must have one manuscript accepted for publication by a scientific journal, submitted an additional manuscript to a scientific journal, and presented their research at two national meetings before graduation. Students are expected to attend all departmental seminars (graduate, faculty, and invited speakers) whether enrolled for credit or not. Students are required to assist professors in course(s) of interest for at least two semesters. Doctoral students are encouraged to choose a minor degree area and an industry or governmental internship.

Students in the PhD program must pass a rigorous general exam at the culmination of the coursework to demonstrate adequate academic and professional aptitudes to the advisory committee. The exam on course work, general knowledge, and critical thinking ability must be taken within three years of enrollment in the PhD program. A written assessment examination to test coursework knowledge will precede the oral examination by the advisory committee and use the same pool of questions as the MS final written assessment examination. Each advisory committee member may also submit written questions for the candidate to answer. The passing of the comprehensive written examination and oral examination on food science by the student are determined by the advisory committee before the student may proceed to the doctoral degree. The committee may determine that additional coursework is necessary to correct deficiencies exhibited by the student in the examinations. The Graduate School reviews the program of study to ensure all departmental course requirements are met.

After completion of research and writing of the dissertation, students must present a public oral seminar on the dissertation research before the advisory committee administers the final examination. The student must pass a final comprehensive oral examination from the advisory committee on the completed research topic and have met all other degree requirements to receive the doctoral degree.

Foreign Languages & Literatures (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click [here](#).

Program Overview

Graduate study in Spanish has a long and distinguished tradition at LSU. The MA in Hispanic Studies, redesigned in 2004, offers the choice of a specialization in literary, linguistics, or cultural studies. Each specialization is offered with the thesis and non-thesis option and requires six hours of coursework in each of the other two areas. The program is supported by a faculty that represents diverse areas of the Hispanic world and that is particularly strong in interdisciplinary approaches to the study of language, literature, and culture. It also allows students the opportunity to take courses related to the Hispanic world in anthropology, geography, history, and political science.

Students pursuing the thesis option must complete a minimum of 30 credit hours in coursework and 6 credit hours in thesis research: at least 18 credit hours of course work must be at the 7000-level.

Students pursuing the non-thesis (or comprehensive exam) option must complete a minimum of 36 credit hours in coursework: at least 21 credit hours of course work must be at the 7000-level.

Specific course requirements:

SPAN 4400 Introduction to Hispanic Cultural Studies (required for all students)

SPAN 4603 Applied Spanish Linguistics (required for all Teaching Assistants)

SPAN 7990 Special Topics in Hispanic Criticism (required for specialization in literature or cultural studies)

SPAN 7985 Research in Hispanic Linguistics (required for specialization in linguistics)

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants are expected to have a significant undergraduate background in Spanish, an above-average record on all undergraduate coursework, acceptable GRE scores, and strongly supportive recommendations from at least three faculty members familiar with their academic work.

Financial Assistance

Information on graduate teaching assistantships and other forms of financial assistance is available from the graduate advisor.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Graduate Faculty who teach in Hispanic Studies

Elena Castro (7M) • Twentieth and twenty-first century Spanish Peninsular Poetry and Poetics, gender and sexuality, women studies. Twentieth and twenty-first century Spanish Peninsular Literatures, Cultural Studies and Interdisciplinary approaches to Hispanic Literatures. Contemporary Latin American Poetry and Poetics

Alejandro Cortazar (3A) • Mexican literature and culture; 19th century Latin American literature; gender, identity, and nationstate formation in 20th century Latin America

Dorian Dorado (3F) • Second Language Acquisition and Pedagogy, Language Variation & Change, Bilingualism, Language Contact, Loan Words and Calquing

Christian Fernández-Palacios (M) • Colonial Latin American studies, Latin American narratives, literary theory, postcolonial studies, transcontinental studies

Dorota Heneghan (6A) • Nineteenth- and Twentieth-Century Spanish Literature and Culture, Interdisciplinary Approaches to Modern Spanish Culture, Comparative Literature, Women and Gender Studies, Transatlantic Studies, Art History

Jeremy King (M) • Hispanic linguistics, pragmatics, historical Spanish, applied linguistics, second language

Laura Martins (7M) • Southern Cone literature and film, Transatlantic studies, Luis Buñuel's films, art and violence, film theory, literary theory, genre studies, photography

Carmela Mattza (6A) • Visual Arts, History of the Emotions and Literature in Early Modern Iberia. Translation, Reception and Influence of the Classics in Late Medieval and Early Modern Iberia. Presence and influence of Late Medieval Hagiography and Religious Iconography in the Court of the Spanish Hapsburg. Transatlantic Perspectives to the Use of Ekphrasis and Mythography in Cervantes's Works and the Spanish Golden Age Comedia

Andrea Morris (M) • 20th-21st century literature and culture of the Hispanic Caribbean, Afro-Hispanic literature, Cuban film, Migration and Caribbean Diaspora

Rafael Orozco (M) • Spanish in the United States, Latin American Spanish, Sociolinguistics, historical linguistics, bilingualism, Colombian Spanish

Joseph V. Ricapito (EM) • Golden Age literature, comparative literature: the picaresque and Petrarchism in European literature, Renaissance Italo-Hispanic literary relations, Conversos and converso literature

The following is a list of graduate faculty in other departments who teach courses in the Hispanic Studies cultural studies concentration:

Stephen Andes (6A) • (Department of History) Latin America, esp. Mexico; 19th and 20th century Catholic social and political movements; Vatican policy; Modern Christianity; Christian Democratic parties; Religion and Revolution in Latin America; Liberation Theology; Religion and Narco-violence in Mexico.

M. Jill Brody (M) • (Department of Geography and Anthropology) Anthropological linguistics, Mayan linguistics, language and culture, discourse analysis

David Chicoine (6A) • (Department of Geography and Anthropology) Andean archaeology, Coastal Peru, early urbanism, material culture

Paul E. Hoffman (M) • (Department of History) Colonial Latin America, borderlands, Spain

Kent Mathewson (7M) • (Department of Geography and Anthropology) Latin American cultural and historical geography, geography and environmental concerns in Latin America, indigenous peoples and Latin American geography

Heather McKillop (M) • (Department of Geography and Anthropology) Pre-Columbian archaeology, Mesoamerican archaeology, trade methods

Solimar Otero (7M) • (Department of English) gender, sexuality, Afro-Caribbean spirituality, and Yoruba traditional religion in folklore, literature and ethnography

Andrew Sluyter (7M) • (Department of Geography and Anthropology) Landscapes of colonialism, Latin America, development and environmental policy

RECENT FACULTY PUBLICATIONS

A representative sample of faculty publications during recent years includes the following:

- Mark S. Wagner, *Like Joseph in Beauty: Yemeni Vernacular Poetry and Arab-Jewish Symbiosis*
- Richard Warga, "Three Fragments from the Berkeley Collection"
- Gang Zhou, "The Chinese Renaissance: A Transcultural Reading"

Masters

Hispanic Studies, M.A.

(AHISP)

The MA degree requires 36 hours of graduate course work. If a student chooses the thesis option, 30 hours of course work are required.

French Studies (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The LSU French program, comprising the Department of French Studies & the Center for French and Francophone Studies, has gained international recognition of its position at the forefront of the North American study of French and Francophone literatures and cultures. The program is recognized by the Cultural Services Office of the French ambassador to the United States as a *centre d'excellence*, an honor given to only 15 university French programs in the United States. Our faculty, whose interests and expertise cover a broad spectrum of fields in French and global Francophone language, literature, and culture, are recognized as among the nation's most outstanding and productive researchers in the field, according to the most recent National Research Council *Survey of US Doctoral Programs*.

The program's work reflects the historical importance of Francophone languages and cultures for Louisiana, as well as the leadership provided by French studies in the European intellectual tradition. Located in Baton Rouge, the capital of Louisiana, the program finds itself at the crossroads of the Francophone world, tied to Francophone Canada by Cajun history, and to France and to Francophone Africa and the Caribbean by Creole history.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study

Applications for admission are received and evaluated by the department on a continuing basis. Applicants must adhere to the application deadlines established by the Graduate School. Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, three letters of recommendation, and a writing sample. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on

available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Masters

French Studies, M.A.

(AFREN)

The MA goal is to ensure written and oral competence and breadth of coverage in French and Francophone literature and culture.

A. MA distribution requirements

(15 credit hours out of the 36 total credit hours required for the degree). For their 21 elective credit hours, students should follow a curriculum designed to meet their particular needs and to suit their special interests. This curriculum will be developed by the student in consultation with the director of graduate studies and the student's major professor and/or MA examining committee.

Students shall take at least *one* course from each of the following five areas:

1. Francophone Studies

- FREN 7100 Studies in Sub Saharan Francophone Literature and Culture (3)
- FREN 7102 Studies in North African Francophone Literature and Culture (3)
- FREN 7120 Studies in Francophone Asian Literature and Culture (3)
- FREN 7140 Studies in Caribbean Francophone Literature and Culture (3)
- FREN 7170 Studies in Belgian Francophone Literature and Culture (3)
- FREN 7960 Special Topics in French Literature (3) (when topic is Francophone Studies)

- FREN 7970 Seminar in French Literature (3) (when topic is Francophone Studies)
- FREN 4060 French Literature of Quebec (3)
- FREN 4070 Literature of Africa and the Caribbean (3)
- FREN 4080 Special Topics in French/Francophone Cultures and Civilizations (3)
- FREN 4090 French and Francophone Women Writers (3)
- FREN 4100 Special Topics in French Language and Literature (3) (when topic is Francophone Studies)

2. Medieval and Renaissance

- FREN 7013 Montaigne (3)
- FREN 7300 Old Provençal (3)
- FREN 7960 Special Topics in French Literature (3) (when topic is Medieval and/or Renaissance)
- FREN 7970 Seminar in French Literature (3) (when topic is Medieval and/or Renaissance)
- FREN 4000 Old French and Medieval Literature (3)
- FREN 4010 French Literature of the 16th Century (3)

3. 17th and 18th Century

- FREN 7022 Studies in 17th Century French Literature (3)
- FREN 7032 Studies in 18th Century French Literature (3)
- FREN 7960 Special Topics in French Literature (3) (when topic is 17th and/or 18th Century)
- FREN 7970 Seminar in French Literature (3) (when topic is 17th and/or 18th Century)
- FREN 4020 French Literature of the 17th Century (3)
- FREN 4030 French Literature of the 18th Century (3)
- FREN 4100 Special Topics in French Language and Literature (3) (when topic is 17th and/or 18th Century)

4. 19th and 20th Century

- FREN 7042 Studies in 19th Century French Literature (3)
- FREN 7051 The 20th Century Novel (3)
- FREN 7052 Studies in 20th Century French Literature (3)
- FREN 7960 Special Topics in French Literature (3) (when topic is 19th and/or 20th Century)

- FREN 7970 Seminar in French Literature (3) (when topic is 19th and/or 20th Century)
- FREN 4040 French Literature of the 19th Century (3)
- FREN 4050 French Literature of the 20th Century (3)
- FREN 4100 Special Topics in French Language and Literature (3) (when topic is 19th and/or 20th Century)

5. Literary Theory and Criticism

- FREN 7410 Studies in Contemporary French Theory (3)
- CPLT 7020 History and Theory of Criticism (3)
- CPLT 7120 Topics in Theory of Criticism (3)
- CPLT 7140 Topics in the Interdisciplinary Study of Literature (3)

B. MA exams format

An essential component of the MA exam is the reading list, which will be the basis of the written exam (in French). The reading list will comprise four essential primary (literary) texts plus one essential secondary (critical) text for each of the five core areas listed above (for a total of 25 texts). A standard (“default”) list, drawn up by professors who specialize in the core areas, will be provided by the department. Students may choose to use the standard list or, in consultation with their major professor and/or MA examining committee, to substitute works of their choice for any or all of the works on the standard list.

- *Non-thesis option: 36 regular course credit hours are required (no more than half at the 4000-level) required.*

The student will complete two 2500-word written essays in French in response to two questions related to the student’s reading list.

The questions will be determined by the student’s major professor in consultation with the student’s MA Examining Committee.

- The student has four days to research and write each essay (eight days total).
- Oral exam: The student will discuss the two written exams with the examining committee. During the oral part of the exam, the committee may ask questions about any authors or works included on the student’s reading list.

- *Thesis option: 30 regular course credit hours (no more than half at the 4000-level) plus six hours of FREN 8000 Thesis Research (1-12 per sem.) and a 50-75 page (including bibliography) master’s thesis are required The Thesis may be written in French or English.*

Oral exam:

- Oral defense of the thesis with the examining committee
- Discussion of an oral question, selected by the examining committee and given to the student 24 hours prior to the oral exam. During the oral exam, the committee may ask questions about any authors or problems included on the student’s reading list.

Ideally, the non-thesis option exam should be taken in the fourth semester of study, the thesis option exam in the fifth semester of study.

Doctorate

French Studies, Ph.D.

(PFREN)

PHD IN FRENCH LITERATURE

The PhD goal is to write an original contribution to existing scholarship on any given topic in French or Francophone literature. At this stage the students should be oriented towards both breadth and specialization.

PhD Students will be required to complete 27 hours of regular course work (beyond the MA) at the 7000 level. At the discretion of the director of graduate studies, students entering the PhD program who hold an MA from another program may be required to take the MA exam.

- PhD distribution requirements: Students must take one 7000-level course from *each* of five core areas listed above (see section I.A, "MA distribution requirements"). Courses in the five core areas that were taken at the 7000 level for fulfillment of the MA degree in our program *will* count toward the fulfillment of PhD distribution requirements but will *not* count toward fulfillment of the 27 hours of PhD coursework.

Breadth of coverage is a requirement. The departmental-level academic course plan, designed by the student with his or her major professor, must be submitted to the director of graduate studies before being submitted to the Graduate School, so that breadth of coverage is assured.

- PhD General Exam

The PhD General exam will include:

- *Dissertation Proposal*: 30 pages (7500 words) with a bibliography, a chapter outline, and a projected timeline for completion.

- *One written exam essay* (15 pages; 3,750 words or more) on a general problem related to the dissertation proposal or a general theoretical or methodological problem arising from the dissertation topic. The formulation of the exam question will be determined by the student's major professor in consultation with the student's examining committee. The student will be given one week to write the exam essay.

- *Oral defense* of the written exam essay and the dissertation proposal, preceded by the candidate's short presentation of the dissertation project.

Copies of the dissertation proposal and completed written exam essay should be distributed to all examining committee members at least two weeks prior to the scheduled general exam date.

- PhD Final exam (Dissertation Defense)

There will be an oral defense of the completed dissertation. The defense will commence with a brief presentation in which the candidate summarizes his or her achievement and its significance within the candidate's field of study. The dissertation should make an original contribution to scholarship in the field.

The committee should be in possession of a finished copy of the dissertation at least two weeks prior to the scheduled defense date.

MINOR FIELD: If they wish, students may elect, in consultation with the DGS, a minor field. The minor may be defined within a specific department or discipline other than French, such as Spanish, history, art, English, or drama, or it may be an interdepartmental, interdisciplinary field such as women's studies or literary theory. The department(s) or interdisciplinary program will define the requirements of the minor field. If there is a minor, the student's examining committee for the PhD must include a faculty member from the minor field, and the advisory committee should include a member from the minor field as well. The student must take at least one 7000-level course in the minor.

LANGUAGE REQUIREMENT: Students working toward the PhD must, prior to the general exams, demonstrate reading proficiency in one foreign language other than French. Proficiency may be established by satisfactory performance on the ETS (Princeton) reading exam, by completion of appropriate course work in the language(s), or by satisfactory performance on a departmental reading exam.

DOCTORAL COMMITTEES: Doctoral committees must include at least two full members of the French Studies Graduate Faculty. The Dean of the Graduate School will appoint an outside member to serve on all general and final exam committees for the PhD. The outside members represent the Dean and the Graduate Faculty and are full voting members of the committee, with

all rights and responsibilities of other committee members. In the French department, committee chairs are responsible for providing copies of written exams and dissertations at least two weeks in advance of examinations to all committee members, including outside members.

REQUIREMENTS TO MAINTAIN CANDIDATE STATUS: The candidate must enroll in FREN 9000 Dissertation Research (1-12 per sem.) during each semester of enrollment as a degree candidate after completion of the general exam.

TIME LIMITS: The Graduate School limits the period for completion of the PhD to seven (7) years after classification as a doctoral student. Reconsideration of a student for the PhD program after this period has passed will be considered only in exceptional circumstances and must be initiated by written petition to the graduate faculty of the Department of French Studies who will evaluate the petitioner's record and make a decision regarding exceptions to the seven year time limit.

Language & Society PhD track

Required Courses

In addition to the Proseminar, PhD students in LS must take all three of the following courses, or receive transfer credit for analogous courses.

- FREN 4014 Introduction to French Linguistics (3)

Research Courses:

PhD students in LS must take three research courses (nine credits) from the following list, or receive transfer credit for analogous courses. The intent of this research section is to determine a student's skill level in applying research methodologies to his/ her area of concentration.

Quantitative Research

- ELRC 4006 Introduction to Applied Statistics in Educational Research (3)
- SOCL 7201 Fundamental Statistics in Sociology (3)
- PSYC 7117 Methodology and Research Design (3)

Qualitative Research

- ANTH 4090 Ethnographic Methodology (3)
- ELRC 7243 Qualitative Methods in Educational Research (4)
- SOCL 7211 Seminar: Methods of Social Investigation (3)

Optional Courses:

PhD students in LS must take eight optional courses (24 credits) from the two areas of concentration below, or receive transfer credit for analogous courses. FREN 7915, FREN 7962, FREN 7980, and FREN 4100 can only be taken once.

Language

- FREN 4015 Advanced French Phonetics (3)
- FREN 4005 Advanced French Syntax and Stylistics (3)
- FREN 7300 Old Provençal (3)
- FREN 7915 Independent Study (1-3) (three hours maximum for M.A, nine hours maximum PhD)
- FREN 4100 Special Topics in French Language and Literature (3)
- FREN 7962 Special Topics in French Linguistics (3)
- FREN 7980 Seminar in French Linguistics (3)

Society

- FREN 4001 History of the French Language (3)
- FREN 7206 Louisiana French and Bilingualism (3)
- FREN 7915 Independent Study (1-3) (3 max for M.A, 9 max PhD)
- FREN 4100 Special Topics in French Language and Literature (3)
- FREN 7962 Special Topics in French Linguistics (3)
- FREN 7980 Seminar in French Linguistics (3)

Outside Courses:

PhD students in LS must take four courses (12 hours) outside the Department as a minor area, or receive transfer credit for analogous courses.

- ANTH 4060 Language and Culture (3)
- ANTH 7060 Conversation and Discourse (3)
- ANTH 7909 Selected Topics in Anthropology (3)
- COMD 4150 Phonetics (3)
- COMD 4153 Acoustics of Speech and Hearing (4)
- COMD 7750 Special Topics in Linguistics (3)
- COMD 7754 Psycholinguistics: Linguistic Perspectives (3)
- ENGL 4310 Studies in Language (3) (Sec. 1) Pidgins & Creoles

- PSYC 4033 Psychology of Memory and Forgetting (3)
- PSYC 4008 History of Modern Psychology (3)
- SPAN 4005 Structure of the Spanish Language (3)
- SPAN 7984 Spanish in the United States (3)

General Examination:

For PhD students in the LS track, the format of the exams is up to the doctoral exam committee, and tends to vary somewhat with the field of study. The exams might test broad knowledge of a subject. In this case, the committee will submit a written question (or questions) to the student who will answer the question(s) in a time period judged appropriate by the committee (sit-in or take-home questions). The examination might focus more narrowly on material relevant to the student's upcoming dissertation proposal (see next section). The exams must be completed by the end of the fifth semester of enrollment in the PhD program. Normally, this would be the end of the fall semester of the third year. At that time, a full advisory committee is established.

The student, in consultation with her/his permanent major professor (advisor), expands the doctoral committee to include: four members of the LSU Graduate Faculty.

Of these four members of the doctoral committee, two must be from the Department of French Studies and two must be full members of the LSU Graduate Faculty (with one of these last two must be a full member of the Department of French Studies).

A scheduled exam cannot be deferred for more than one semester after the time at which it was originally scheduled.

Evaluation procedures for general examinations in all tracks: An examining committee is made up of the student advisor, plus three other faculty members appointed by the department chair in consultation with student and DGS, and is normally finalized by May 1 of the year preceding the examination. (The Graduate School provides a GS representative for the general examination.) Students are urged to consult with committee members before May 15 to form a plan of study for the summer preceding the examinations. The committee recommends whether or not the student should continue with PhD study (that is, should be advanced to "candidacy"), should be put on probation, or should be dismissed from the program.

Copies of the examination and the committee report are made available to the graduate studies committee, which meets within two weeks of filing of last committee report for the semester (by Dec 15 at the latest).

If the examination committee recommends dismissal from the program, the graduate studies committee must ratify this decision.

If the recommendation is "fail with retake," only one retake of no more than two separate examinations is allowed (no more than one area in the major field is allowed to be retaken). Retakes must be finished by March 15 of the following semester. The examining committee writes a report on the retake and includes it in a separate report on the whole of the examination. The reports are due to the chair within two weeks of the end of the exam (April 1), and a special meeting of the graduate studies committee will also be held to ratify the committee's recommendation on the retake and on the entire examination. The graduate studies committee may at this time allow the student to continue with PhD study or may recommend dismissal.

Language & Society Dissertation Prospectus

At or before the end of the sixth semester of enrollment in the PhD program, the student must submit a substantial (approximately 30 page) proposal of the dissertation. The dissertation proposal should be sufficiently detailed and clear to serve as a blueprint for the study that will follow. The proposal should contain the following elements, although some major professors may require different emphases:

- Purpose and significance of the study
- Formulation of the problems to be addressed
- Framework within which the problems will be addressed

Compact review of the relevant literature
Methodology and Data
Data collection procedures
Data analysis procedures
Preliminary or prospective results if available
Reference section or bibliography

This proposal must be supervised and approved by the major advisor of the dissertation, and approved by members of the student's dissertation committee. As stated above, the proposal may be used in the general examination.

Geography & Anthropology (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Human geography includes cultural geography (cultural ecology, landscape, diffusion); economic geography (capitalist development, peasant response to market forces, agrarian innovation and economic growth, industrial impacts on society and environment); historical geography (ecological and spatial processes, innovation diffusion, settlement expansion, residential segregation, industrial restructuring, regional development); regional geography and urban geography (urban structure and city systems, state and corporate policy, rural-urban migration, class formation, gender and ethnic relations).

Physical geography offers opportunities for study in alluvial, coastal, and quaternary geomorphology (human-induced changes in river systems, quaternary landform evolution, coastal dune dynamics and management, coastal sediment transport, beach/nearshore sediment morphodynamics, coastal land loss); and climatology (synoptic climatology, hydroclimatology, regional impacts of global warming, water balance analyses, the role of climate in flood variability).

Mapping science encompasses traditional and contemporary mapping technologies, including cartography, computer cartography, aerial photography, remote sensing, spatial analysis, and GIS. Spatial interpolation, scale, the modifiable area unit problem, surface and line measurement using fractal algorithms, spatial autocorrelation, comparative assessments of remote sensing imagery, GIS applications in coastal Louisiana, cartographic presentation and spatial data handling, and modeling the spatial distributions of disease, population, and land use are addressed.

Anthropology provides a comprehensive perspective on the human endeavor. Physical anthropology includes training in gross anatomy, osteology, forensics, and fertility.

In archaeology, ongoing excavations in Belize, the Caribbean, Peru, and Louisiana examine the coastal adaptations of Mesoamerican civilizations and ethnicity and culture in the Caribbean. Linguistics students specialize in historical linguistics or discourse analysis with field training in the Mayan languages of Mexico and Central America.

In sociocultural anthropology and folklore, advanced courses in ethnographic methods, ethnomusicology, material culture, and religion are offered in connection with research on the cultures of the American South and Spanish America.

A doctoral concentration in anthropology is also offered through the geography PhD program. Students receive dual training in geography and anthropology, with thematic emphases in either sociocultural anthropology or archaeology.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

The department looks with special favor on students who can bring another discipline to bear on geographical and anthropological problems. Students well prepared in such fields as geology, agronomy, botany, computer science, history, and economics and who are interested in geography or anthropology should inquire. Admission to the department and awarding of financial assistance is based on compatibility of interests, grade point average, letters of recommendation, and GRE scores. International students whose native language is not English must have a TOEFL score of at least 550 on the paper-based test, a 213 on the computer-based test, or a 79 on the Internet-based test, an IELTS score of 6.5, or PTE score of 59. A TOEFL score of 575, equivalent IELTS, or equivalent PTE score is required to be considered for an assistantship. The departmental deadline for application is **January 25**.

Financial Assistance

Doctoral applicants with excellent records are urged to apply for fellowships providing stipends of \$12,500 to \$18,000 per year plus exemption from tuition. Each award is for a maximum of four years. The fellowship application deadline is January 25. Departmental assistantships range from \$11,000 to \$16,000 for the academic year. Students receiving departmental assistantships are exempt from the nonresident fee. Applications for departmental assistantships must be received by January 25.

Research Facilities

The department's Cartographic Information Center—housing more than one-half million maps and aerial photographs—is the nation's largest university map library. The Computer Mapping Sciences Laboratory houses SUN and Intergraph work stations; PCs; digitizers; printers; plotters; and software for GIS, image processing, and statistical analysis, including ARC/INFO, ERDAS/IMAGE, and Intergraph. The Computer-Aided Design & Geographic Information Systems (CADGIS) Laboratory provides high-end CAD and GIS facilities, including Intergraph, ERDAS, and AUTOCAD. The Remote Sensing Laboratory houses an array of color, infrared, and radar imagery and equipment for analysis.

Research in physical geography is supported by the H. J. Walker Geomorphology Laboratory. The department also houses the Southern Regional Climate Center and the Louisiana Office of State Climatology that monitor and analyze climatic records in the state and region. The Forensic Laboratory provides facilities for analysis of skeletal remains and dentition. The Archaeology Laboratory aids analysis of historic and prehistoric artifacts. The Kniffen Cultural Resources Laboratory serves as a repository for the region's material culture and a center for artifact analysis.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Geography

DeWitt Braud (3P) • Spatial analysis and GIS modeling, environmental remote sensing and image processing

Craig E. Colten (M) • Historical, environmental, North America, Louisiana

Kristine L. DeLong (6A) • Climatic and environmental changes in the Quaternary; Atlantic studies; Palaeoenvironmental

reconstruction

Dydia DeLyser (M) • Historical, cultural, landscape and social memory; gender; qualitative methods; social science writing
Patrick Hesp (EM) • Coastal dune dynamics, coastal geomorphology and management
Barry Keim (M) • Climate change and variability, synoptic climatology, hydroclimatology, extreme events, climate data
Richard H. Kesel (M) • Fluvial geomorphology, soils
Michael Leitner (7M) • Spatial analysis and GIS, computer cartography, Europe
Anthony J. Lewis (EM) • remote sensing, physical geography, air photo interpretation
Brian J. Marks (6A) • Political geography, agrarian political economy, political ecology, fisheries and aquaculture
Kent Mathewson (7M) • Cultural, historical, Latin America
Xuelian Meng (6A) • GIS
Steven Namikas (M) • Coastal geomorphology, hazards, physical geography
Robert Rohli (7M) • Climatology, applied meteorology, water resources, quantitative methods
Luigi Romolo (3F) • Synoptic Climatology, Applied Climatology, Hydrology, Hydroclimatology, Land-Atmosphere Interactions
Andrew Sluyter (7M) • Landscapes of colonialism, Latin America, development and environmental policy
Peter Sutherland (3F) • Cultural anthropology, religion, South Asia
Jill C Trepanier (6A) • Climatology
Fauj Wang (7M) • Urban, economic, and transportation geography; public policy GIS; quantitative methods; China; Southeast Asia; U.S.
Lei Wang (6A) • GIS, quantitative methods, terrain and hydrological analysis, remote sensing

Anthropology

Rachel A. Dowty Beech (3F) • organizations and cultures, wetland biology, human ecology, decision-making under stress
M. Jill Brody (M) • Linguistics, sociocultural, Middle America
David Chicoine (6A) • Andean archaeology, early urbanism
Jay D. Edwards (EM) • Sociocultural, vernacular architecture, Louisiana and the South, Caribbean
Joyce M. Jackson (M) • Ethnomusicology, folklore, Africa & diaspora, ritual performance, Louisiana
Ginesse A. Listi (3F) • Forensics, bioarchaeology, paleopathology
Kathe Managan (6A) • Linguistics, sociocultural, theories of creationism
Mary Manhein (3P) • Forensics, bioarchaeology, paleopathology
Robb Mann (3F) • Historical archaeology, ethnohistory, North American fur trade, French colonial
Heather McKillop (M) • Prehistoric archaeology, trade networks, Mesoamerica
Helen Regis (M) • Cultural anthropology, medical, Africa and African diaspora, performance in pop culture, American South
Rebecca Saunders (7M) • Southeastern United States prehistory, pottery analysis, contact period studies
Robert G. Tague (M) • Anatomy, skeletal biology, reproductive biology, biological anthropology

Degree Programs

This department offers a variety of research and instructional programs leading to the MS and PhD in Geography and Anthropology and the MA and PhD in Geography and Anthropology. Graduate students may specialize in one of five programs of inquiry— human geography, physical geography, mapping sciences, anthropology, or anthrogeography—in the regions of Latin America, East and South Asia, and the U.S. comparisons with other regions.

Requirements for the M.S. degree in geography and M.A. in anthropology include a minimum of 30 credit hours, including six credits for a thesis. A master's degree in either of the concentrations is typically attained within two years if students attend as full-time status.

Requirements for the Ph.D. in Geography and Anthropology include a minimum of 60 credit hours beyond the bachelor's degree or 30 hours beyond the master's degree, 10 hours of which are core courses, two or more advanced seminars, and an external minor or nine credit hours in approved cognate fields (including one seminar). Students must write a dissertation constituting an original contribution to the discipline.

Masters

Anthropology, M.A.

(AANTH)

Anthropology offers programs leading to the B.A., M.A., and PhD degrees in four major divisions of the field—archaeology, biological, social-cultural, and linguistic anthropology. Area expertise includes Latin America, the U.S. South and Gulf Coast, the Caribbean, and Africa. A minimum of 31 hours is required for the master's degree. Of those 31, at least 6 hours are thesis hours (ANTH 8000) and 1 hour includes the completion of Introduction to Graduate Study (ANTH 7901). The remaining 24 hours of course work include 9 hours (3 courses) at the 7000-level. Of those 9 hours, at least 6 hours (2 courses) must be earned in seminars. These seminars are generally taken within the department, but seminars can be taken in other departments, in consultation with the student's major professor. The student must take each seminar from a different faculty member.

- ANTH 7901 Introduction to Graduate Study (1)
- ANTH 4085 History of Anthropological Theory (3) (or advanced theory course if equivalent already taken)
- 3 of 4 required 4000-level courses (ANTH 4020, ANTH 4040, ANTH 4060, ANTH 4082)
- 9 hours of 7000-level courses (two of these must be seminars)
- Methods Course (selected in consultation with an advisor)
- 6 hours of thesis research (ANTH 8000)

Geography, M.S.

(SGEOG)

Geography offers programs leading to the B.A., B.S., M.S., M.N.S., and Ph.D. degrees in several major divisions of the field—biogeography, climatology, geomorphology, Quaternary studies, cultural geography, historical geography, economic development, urban geography, mapping sciences, and GIS. Area expertise focuses upon the Mississippi Valley, southern U.S., Latin America, China, central Asia and Afghanistan, the Middle East, and North Africa. In each division, there are numerous programs of research directed by outstanding scholars in the discipline.

A Master of Science (M.S.) degree is offered in geography. Students in all concentrations of geography including cultural, economic, urban, historical geography, physical geography, and GIS/mapping sciences enroll in the M.S. degree program. A proposed and defended thesis is required for completion of the M.S. program.

The master's degree provides the student with a broad knowledge of the history, theory, content, and techniques of geography. Such knowledge may be obtained by enrollment in specific courses or through independent study, either at LSU or at some other institution.

- GEOG 7901 Introduction to Graduate Study (1)
- GEOG 7902 Introduction to Research Methods in Geography (3)
- 15 hours of 4000-level or above courses
- 6 hours (two courses) of 7000-level courses (exclusive of 7901 and 7902)
- 6 hours of thesis research (GEOG 8000)

Doctorate

Geography and Anthropology, Ph.D.

(PGA)

The Doctor of Philosophy (Ph.D.) is the highest degree offered at LSU. It recognizes and demands mastery of one or more subfields of the discipline. Doctoral students go far beyond the level required for lesser degrees, and their work is expected to be of such quality that it could grace the pages of scholarly books and journals. Although doctoral students are expected to exhibit the intellectual breadth required of an academic position, the Ph.D. is primarily a research degree, and doctoral students should expect to spend little time sitting in undergraduate lecture courses in geography, save those needed to remedy deficiencies.

The PhD curriculum involves a total of 30 hours beyond the master's degree (1/2 at 7000-level+) including:

- GEOG 7901 Introduction to Graduate Study (1)
- GEOG 7902 Introduction to Research Methods in Geography (3)
- 6 hours of 7000-level courses (exclusive of 7901 and 7902) including one seminar
- External minor OR 9 hours in approved cognate fields (including one 7000-level course)
- 3 additional hours of 4000 or 7000-level coursework
- 9 hours of dissertation research (GEOG 9000)

External Minor or Cognate Field

Departmental policy requires either an external minor or nine hours in approved cognate courses for the completion of the doctoral degree. The cognate courses or minor must be listed on the student's program of study.

Requirements for a graduate minor are determined by the department issuing the minor (for example History, French Studies, Geology) and not by Geography & Anthropology. Students pursuing an external minor must have one member from the minor department on their committee. Geography PhD students may pursue a minor in Anthropology.

The cognate field requirement is composed of a suite of courses—nine hours in cognate fields outside of Geography — of which at least three credit hours should be in an upper-level seminar (usually 7000-level). The courses need not be within a single discipline. The development of the cognate field may be quite flexible, and the specific suite of courses is developed by the student in consultation with the major professor and advisory committee. The cognate field may include traditional disciplines and emerging interdisciplinary fields, including, for example Oceanography, Geology, History, Atlantic Studies, Disaster Science Management (DSM), Anthropology, Women's and Gender Studies, and Performance Studies.

Note that the concentration in Anthropology satisfies the minor or cognate field requirement.

Geology & Geophysics (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Geology & Geophysics offers a diverse graduate program in the earth sciences. Areas of specialization include biostratigraphy, environmental geology, geochemistry, geomicrobiology, geophysics, hydrogeology, mineralogy, paleontology, petrology, sedimentology, stratigraphy, and tectonics. The department includes approximately 16 faculty members, 20 PhD candidates, 40 master's candidates, and 100 undergraduate majors. Graduate study in geology and geophysics at LSU provides a balanced combination of coursework and independent research. Research projects focus on important geologic problems throughout the U.S. and in countries on every continent. Graduates have been successful in obtaining employment in academia, government, and industry.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department Graduate Student Services committee. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendations. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score. Address all inquiries to the graduate coordinator in the Department of Geology & Geophysics. Applicants are encouraged to contact individual faculty members in their field of interest prior to application.

Admission is competitive based on prior study including prior research, GPA, GRE scores, letters of recommendation, the match between the student's research interest and faculty research interests, and availability of funding and facilities.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

The department offers graduate students several forms of financial aid including, but not limited to, Board of Regents Graduate Fellowships; fellowships from industry, alumni organizations, and geological societies; and teaching and research assistantships. Teaching assistantship stipends for the nine-month academic year are approximately \$15,000 for MS students and \$16,500 for PhD students. Students are responsible for paying applicable fees. To be considered for financial aid, please check the appropriate box on the application form.

Carol Wicks (M) • Karst hydrogeology, geochemistry of natural waters

Masters

Geology, M.S.

(SGEOL)

The departmental-level academic course plan for each student is developed in consultation with, and approved by, the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty (from the department or allied disciplines) such that the LSU Graduate School's requirements for graduate committees are satisfied. A major advisor must be selected by the end of first semester in the degree program. Thesis committee must be selected by end of second semester in the degree program.

The degree is a thesis degree requiring a research project. Thirty hours of credit at the graduate level must be earned including a maximum of six hours of credit for thesis research. The curricular requirements include:

- 24 hours in graded class work in courses numbered 4000 or above;
- At least 13 hours at the 7000 level or above must include at least four semester hours in graduate seminars;
- Completion of a thesis must demonstrate the candidate's capacity for independent research, originality of thought, critical thinking and facility in organizing and interpreting materials; and
- A public defense of the thesis is required once the thesis committee has approved a final draft. Public notice and distribution of draft copies of thesis to committee members and graduate coordinator must be made at least two weeks prior to public defense.

Doctorate

Geology, Ph.D.

(PGEOL)

The departmental-level academic course plan for each student is developed in consultation with, and approved by, the student's graduate advisory committee. The committee will include the student's major advisor and at least three additional members of the graduate faculty in the department or allied areas so that requirements of the LSU Graduate School for graduate committees are

satisfied. Major advisor must be selected by end of first semester in degree program. Dissertation committee must be selected by end of second semester in degree program.

The degree requires a dissertation project. Sixty hours of credit at the graduate level must be earned including a minimum of nine hours of credit for the thesis research project.

A doctoral student must identify a major area with the department from one of the below subdisciplines by the end of the first semester. The other three subdisciplines become potential secondary concentrations.

- Earth Surface Processes, Sedimentation, Hydrogeology
- Geochemistry, Mineralogy, Petrology
- Geophysics, Structural Geology, Tectonics
- Paleontology, Stratigraphy, Earth History

PhD Course Requirements:

- Successful completion of at least 60 semester hours in courses numbered 4000 or above.
- The doctoral student must take a minimum of 25 hours of lecture coursework and seminars beyond the B.S. degree distributed as follows:
 - Major: four courses in the subdiscipline identified as the major (12 hours). At least two of these courses must be at the 7000-level. Up to one of these classes may be taken outside of the department, if approved by the graduate advisor and the student's major professor and dissertation committee.
 - Secondary Area: three courses distributed between two of the other departmental subdisciplines (nine hours). At least one of these courses must be at the 7000-level. Up to two of these courses may be taken outside the department, if approved by the graduate advisor and the student's major professor and dissertation committee.
 - Seminar: two 7000-level seminar courses (four hours).
- The doctoral student must take at least nine hours of GEOL 9000 Dissertation Research (1-12 per sem.).
- The remaining 26 semester hours can be any combination of coursework and 9000-level graduate credits that meet with the approval of the major professor and dissertation committee.
- Up to 24 hours of M.S. or graduate transfer credit in lecture coursework can be counted toward the PhD course requirements. Transfer of credits from other academic institutions must be approved by the graduate advisor and the student's dissertation committee and using the "Program of Study for the Doctoral Degree" form.

Other PhD requirements include:

- Comprehensive Research Proposal Exam: tests the student's ability to conduct original, independent research and is administered by the student's graduate advisory committee during the third semester in degree program. The exam consists of oral defense of a written thesis proposal or equivalent research proposal.
- The general examination is the culmination of a student's program in coursework, consisting of two parts: a written exam followed by an oral exam. The student will be expected to demonstrate expert competence over broad segments of her/his major field and a high degree of familiarity with the content of and current progress in related fields. The examination must be taken during or immediately following the semester in which all coursework is completed. The exam is administered by graduate advisory committee plus two additional graduate faculty members appointed by the graduate advisor and the dean of the Graduate School.

- A public defense of the dissertation is required once the dissertation committee has approved a final draft. Public notice and distribution of draft copies of document to committee members and graduate coordinator must be made at least two weeks prior to public defense.

History (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of History has earned an outstanding reputation for both the quality of its teaching and the high standards of its scholarship. The LSU Libraries contain more than three million volumes, more than five million microforms, and a manuscript collection of more than 12 million items. LSU's Special Collections, housed in Hill Memorial Library, are especially rich in materials relating to the Lower Mississippi Valley, the South, the Civil War, and Reconstruction. The Louisiana State Archives in Baton Rouge also houses important research documents close at hand.

The department is nationally and internationally recognized as a center for the study of the South and the Civil War. But it also has graduate students and faculty working in a host of other areas of American history, including the cultural history of the 20th century. It also has particular strengths in British history, the Middle Ages and Renaissance studies, and modern European history. In addition, it has faculty members who publish in and teach the history of the Ancient world, Latin America, Africa, as well as South and East Asia.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department during the spring semester. Applicants must adhere to the application deadlines established by the Graduate School. The departmental deadline for applications is **January 15**. Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, three letters of recommendation, a statement of purpose, and a writing sample of approximately 10-20 pages. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. All applicants for admission to the MA and PhD programs will be considered for teaching assistantships valued at \$11,150. Students with full time (50%/20 hours per week) assistantships also are exempt from tuition payments, although they must still pay required university fees. In a few cases, for extremely well qualified students, the university will provide a \$3,000 supplement to the amount of the assistantship. The department also has a limited number of \$5,000 enhancements that may be added to an assistant's regular stipend. These are awarded to incoming PhD students on a

competitive basis. The university also provides TAs \$350 per semester to cover the cost of health insurance. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines (February 1 for the history department) established by the LSU Graduate School.

Aaron Sheehan-Dean, *Why Confederates Fought: Family and Nation in Civil War Virginia*

Charles J. Shindo, *1927 and the Rise of Modern America; Dust Bowl Migrants in the American Imagination*

Victor Stater, *Duke Hamilton is Dead! A Story of Aristocratic Life and Death in Stuart Britain; Noble Government: The Stuart Lord Lieutenantcy and the Transformation of English Politics*

Meredith Veldman, *Fantasy, the Bomb, and the Greening of Britain: Romantic Protest, 1945-1980*

Margherita Zanasi, *Saving the Nation: Economic Modernity in Republican China*

Masters

History, M.A.

(AHIST)

LSU offers the MA degree in American, British, European, and Latin American history. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The thesis-option MA requires 30 semester hours of credit, including six hours of thesis credit, and a research thesis. The non-thesis option requires 36 hours of coursework and passing the oral MA comprehensive examination. The non-thesis MA is regarded as a terminal degree.

The curricular requirements include:

- At least 15 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned
- Research seminars: All MA students must take a research seminar sequence (HIST 7908 and HIST 7957 for U.S. history; HIST 7908 and HIST 7909 for all other fields). If a seminar needed to fulfill the requirements for the course of study is not offered in a given semester, the student may fulfill the requirement through independent study in consultation with the major professor.
- Reading seminars: All MA students must take a minimum of four reading seminars. For students in modern European or British history, these seminars will number between (HIST 7917-HIST 7930). Students in American history will take HIST 7904, HIST 7951, HIST 7952, HIST 7956, HIST 7958 and HIST 7959 (of these last two twice for six hours)

A final examination committee is chosen when the student nears the end of his or her program. The student selects those 24 hours of study, including work with the major professor, upon which to be examined. The examining committee includes the major professor, the minor professor if a minor field was elected, and one or two others in the department whose specialties coincide with other history work offered for examination. If a student writes a thesis, a defense of the thesis is included as well. The examination on this material is oral. After the completion of the examination, the committee will make a formal recommendation in writing about the suitability of the student for PhD-level work, unless it is a non-thesis M.A.

Specialization in U.S. History

1st Year (18 hours)

Fall:

- HIST 7908 Introduction to Historical Research (3)
- HIST 7951 Reading Seminar in American History, 1607 to 1815 (3)

- HIST 7958 Research Seminar: Special Topics in American History (3) or
- HIST 7959 Reading Seminar: Special Topics in American History (3)

Spring:

- HIST 7957 Research Seminar in American History (3)
- HIST 7952 Reading Seminar in American History, 1815-1890 (3)

- HIST 7958 Research Seminar: Special Topics in American History (3) or
- HIST 7959 Reading Seminar: Special Topics in American History (3)

2nd Year (12-18 hours)

With thesis - Fall:

- HIST 7904 American Historiography and Criticism (3)
- HIST 7956 Reading Seminar in American History from 1890 to the Present (3)
- HIST 8000 Thesis Research (1-12 per sem.) (3 credits required)

With thesis - Spring:

- HIST 8000 Thesis Research (1-12 per sem.)

Without thesis - Fall:

- HIST 7904 American Historiography and Criticism (3)
- HIST 7956 Reading Seminar in American History from 1890 to the Present (3)

Without thesis - Spring:

- nine hours history electives (six may be in a minor field)

Note:

HIST 8000 may be taken for up to nine hours a semester, however, only six hours will count toward fulfilling the requirements for the MA

Specialization in Latin American History

A program will be devised to meet the student's preferences, to include four reading seminars, one or two research seminars, thesis research if applicable, and additional history electives and/or outside minor fields.

Specialization in European or British History

The specific course selection and sequence will vary to fit the concentration chosen.

With thesis - 1st year (18 hours)

Fall:

- HIST 7908 Introduction to Historical Research (3)
- One elective in History or Minor Field (3)

Choose one:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *
- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

Spring:

- HIST 7909 Research Seminar in European History (3)
- One elective in History or Minor Field (3)

Choose one:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *

- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

With thesis - 2nd year (12-18 hours)

Fall:

- HIST 8000 Thesis Research (1-12 per sem.)

Choose one:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *
- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

Spring:

- HIST 8000 Thesis Research (1-12 per sem.) (3 credits required)
- Electives (6)

Without thesis - First Year (18 hours)

Fall:

- HIST 7908 Introduction to Historical Research (3)
- One Elective in History

Choose one:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *
- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

Spring:

- One Elective in History or Minor Field
- HIST 7909 Research Seminar in European History (3)

Choose one:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *
- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

Without thesis - Second Year (18 hours)

Fall:

- One Elective in History or Minor Field

Choose two:

depending on offerings

- HIST 7917 Reading Seminar in Early Modern Europe (3) *
- HIST 7922 Reading Seminar in European History to 1650 (3) *
- HIST 7923 Reading Seminar in European History from 1500 (3) *
- HIST 7930 Reading Seminar in British History (3) *

Spring:

- Three Electives in History or Minor Field

Note:

Non-thesis students may at the end of their second year still elect to write a thesis and extend their residency and registration accordingly.

* Students concentrating in Europe to 1650 may substitute a history elective for one of the Reading Seminars.

Doctorate

History, Ph.D.

(PHIST)

LSU offers the PhD degree in American, British, European, and Latin American history. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The

committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The basic requirements for the doctorate are specified in this publication. It is the responsibility of each applicant and graduate student to be familiar with these stipulations and fulfill them. A minimum of 54 credit hours of coursework and dissertation research are necessary to complete the program. The plan of coursework depends on the student's earlier preparation in history, and the major requirement is a dissertation "which embodies creative scholarship" and which "must add to the sum of existing knowledge and give evidence of considerable literary skill." Each student must offer three fields of study: one major field and two minor fields.

Major Fields:

Those fields offered by the department are: American history (inclusive), Latin American history, Europe to the Middle Ages, Medieval and Early Modern Europe, European history since 1500, and British history.

Coursework and Examinations:

Coursework: Students entering the program with a MA from another university will take the basic seminars in their major field. In Ancient/Medieval/Early Modern European History, they are HIST 7908, HIST 7909, and at least three seminars numbered between HIST 7917 and HIST 7930. In Modern European and British History, they are HIST 7908, HIST 7909, and at least four seminars numbered between HIST 7917 and HIST 7930. In United States history, they are: HIST 7904, HIST 7908, HIST 7951, HIST 7952, HIST 7956, HIST 7957, plus two Special Topics seminars (HIST 7958 and/or HIST 7959). Students will also have to take courses in their minor fields and may want to take other courses in their major fields. Students who have completed a MA in our department will have already completed these basic seminars.

Departmental-level academic course plan: Within the first year of study at the PhD level, each student will prepare, in consultation with his or her committee, a Doctoral Degree Audit form (available from the Graduate School website) which specifies requirements for course work and other aspects of the student's course of study. When these requirements are completed, the student takes the general examinations.

General Examinations: General examinations will be offered once each semester. Minor field requirements consist of six hours of course work and a possible exam, subject to the discretion of the minor field professor. In certain cases a minor field may consist only of course work and a written exam will not be given. Once the minor field exams (or course work) have been completed, the student must take the major field exams the following semester. The major field exam will consist of two six-hour written exams and an oral examination with the student's committee and a representative from the Graduate School. Once the major field examination has been successfully completed, the student becomes a PhD Candidate. By the end of the semester in which the student passes the general exam, the student must produce for his or her advisor and the DGS a one-page dissertation prospectus and a preliminary curriculum vitae.

Final Examinations: After completing the dissertation, the candidate defends it in an oral examination. The examining committee consists of the student's major professor, other faculty from the Department of History or other departments in the university, and a representative from the Graduate School, in accordance with the guidelines outlined in *The Graduate School* section.

Foreign Language Requirement:

It is required that all PhD students in American and British history must demonstrate reading proficiency in one foreign language, and PhD students in all other concentrations must demonstrate reading proficiency in two foreign languages. Each student must fulfill the foreign language requirement before advancing to the general examinations. Reading proficiency may be demonstrated through a sight translation conducted by a member of the faculty or by successfully completing a reading knowledge course offered by the Departments of Foreign Languages & Literature or French Studies. The requirements for language skills differ by field; students should consult with their major professor for requirements in their areas.

Minor Fields:

Each student must offer two minor fields that fall outside the scope of the major field. Approval of the selection and scope of each field will be made by the student's major professor and minor field professors. Minor fields may be selected from the list of

offered major fields, from Asian History, or an approved aspect or period thereof. Both minor fields cannot fall within the same major field. Requirements for fulfilling the minor field will be determined by the student's minor field professor; typically each minor field requires six hours of course work. The department also offers a minor field in world history the requirements for which are as follows:

- The minor requires both a set amount of coursework and an examination.
- Students can choose between a Single World History Minor (6 hours) and a Double World History Minor (12 hours). The latter will count as two minors.

With twelve hours of required courses, the world history minor counts as two minor fields.

Students may select one minor field outside the department of history, and requirements for an outside field will be determined by the outside department. Each minor field must consist of at least six hours of graduate level course work, although some departments will require more.

Single Minor

- HIST 7970 Reading Seminar in Comparative History (3), when offered in the field of World History and approved by the minor's coordinator.
- Students must take one 4000- or 7000-level course in one of the following areas: Africa, East Asia, Latin America, and South Asia.

Double Minor

- HIST 7970 Reading Seminar in Comparative History (3), when offered in the field of World History and approved by the minor's coordinator.
- Students must take three 4000- or 7000-level courses- for a total of 9 hours- in three of the following areas, outside their major field: Africa, East Asia, Europe, Latin America, South Asia, and the United States. A thematic course that cuts across regions may be substituted for one of these.

Exam

Students in both the single and double minors need to take a general examination. Recognizing the double goal of this minor, the examination might consist of preparing a syllabus for teaching a world history survey or writing two essays on topics determined by the examination committee and reflecting the research interests of the student in question. The exam will be submitted to a 3-person committee from the World History Faculty, who will also conduct an oral exam based on the written assignment.

Graduate

Joint Degree: M.A./M.L.I.S.

Joint Degree Program in History (MA) and the School of Library & Information Science (MLIS)

The department, in conjunction with the School of Library & Information Science, also offers a joint degree program in which a student can earn a Master of Arts degree in history and a Master of Library Science & Information degree simultaneously with the completion of 64 hours. A separate application to the School of Library & Information Science is necessary.

The basic requirements for the joint degree program are the same for the regular non-thesis MA program in the Department of History and the MLIS program in the School of Library & Information Science. The joint degree program, however, has been designed to allow the student to complete the 36 credit hours for the MA and the 40 credit hours of the MLIS by completing a total of only 64 hours.

Elective courses in the School of Library & Information Science eligible for credit for the history MA degree: LIS 7202, LIS 7203, LIS 7408, LIS 7504, LIS 7505, LIS 7509, LIS 7604, LIS 7611, LIS 7700, LIS 7701, LIS 7702, LIS 7703, LIS 7910 on a case-by-case basis, and LIS 7913.

Elective courses in the Department of History eligible for credit for the MLIS degree: Any two three-hour graduate courses at the 7000-level in the Department of History.

Human Ecology (Graduate Program)

Program Overview

The Human Ecology graduate program is currently in transition from a campus-wide reorganization effort that merged Nutrition with Food Science and created the Department of Textiles, Apparel Design, and Merchandising. This reorganization will in no way alter the faculty composition in these areas of research or the faculty's commitment to graduate education.

Human Ecology has six concentrations: human nutrition, molecular nutrition, apparel design, historic/cultural aspects of textiles and apparel, merchandising, and textile science.

MS and PhD programs offer students choices within each concentration. Flexible interdisciplinary programs can be structured to meet each individual student's specific interests. These programs may span human ecology and extend to other departments at LSU. Joint research efforts with many other departments exist.

Human Ecology also collaborates with the Louisiana Agricultural Experiment Station—the research unit of the LSU Agricultural Center—and the Pennington Biomedical Research Center. Additionally, external collaboration with institutions and industry partners such as the USDA Southern Regional Research Center and other external institutions extend educational opportunities for students.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must also be submitted online at www.lsu.edu/gradapply. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department as they are received, but usually for fall admissions these evaluations are completed by late March. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. These letters should be from previous professors, mentors and/or employers and address likelihood for success in a graduate program. International students, whose native language is not English, must also submit an acceptable TOFEL, IELTS, or PTE score.

When all admission requirements are met, full admission will be considered. On very rare occasions, if a student does not meet all requirements, a student may be admitted provisionally.

Interested applicants are encouraged to contact appropriate faculty members in the school to learn more about the program.

Financial Assistance

Limited financial assistance is available. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Human Ecology graduate fellowships and teaching and research assistantships are awarded competitively, based on qualifications and availability. The number and dollar amount of the assistantships vary depending on the available funding. The school nominates students for fellowships.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Family, Child, and Consumer Sciences

Diane C. Burts (EM) • Early childhood education; developmentally appropriate practices

Cassandra Chaney (M) • Married and cohabitating African American romantic relationships (emotional closeness and commitment), religiosity and spirituality among African American communities, faith and African American families

M.E. Betsy Garrison (M) • Families and disasters; family stress, coping, and resilience

Loren Marks (M) • Faith and families, African American families, parenting

Katherine Stamps Mitchell (6A) • Child well-being, families, poverty and inequality, education, public policy

Sarah Pierce (6A) • Adult-child relationships; adult caregiving sensitivity to young children, development systems theory

Human Nutrition & Food

Catherine Champagne (7M) • Women's and children's health, diet for weight loss and chronic disease, Mediterranean diets, physical activity, nutritional assessment of diverse populations (PBRC)

Maren Hegsted (EM) • Potential health benefits of functional foods, nondigestible carbohydrates, food intake and weight regulation

Gang Hu (3F) • Epidemiology of health practices and nutrition related to human diseases such as heart disease and diabetes

Darcy L. Johannsen (6A) • Insulin sensitivity, fat deposition, and energy expenditure

Michael Keenan (7M) • Food intake regulation with health effects of dietary fermentable fibers such as resistant starch including molecular effects; functional foods

Jeffrey N Keller (3F) • Basis for age-related diseases such as Alzheimer's disease using mouse models and clinical research subjects, in studies ranging from basic neurochemistry to the conducting of worldwide pharmaceutical trials

Carol Lammi-Keefe (M) • n-3 fatty acids in pregnancy and development, diabetes, postpartum depression, cardiovascular risk, functional foods

Roy Martin (EM) • Obesity and diabetes, food intake control, nutrient sensing mechanisms in the brain and gut, regulation of gene expression, functional foods

Christopher Morrison (3F) • Animal neuroendocrinology and physiology, neuronal regulation of feeding behavior, body weight homeostasis, reproduction, growth and metabolism (PBRC)

Carol O'Neil (M) • Community nutrition, food insecurity, diet of adolescents and young adults, scholarship of teaching

Georgianna Tuuri (7M) • Dietary practices in the prevention of childhood overweight and promotion of bone health, body composition assessment methodologies, community nutrition, functional foods

Jianping Ye (3F) • Insulin and leptin signaling mechanisms (PBRC)
Jolene Zheng (3F) • Exploring the physiological, molecular, genetic, autonomic and dopaminergic controls of obesity, Parkinson's disease and aging using *C. elegans* and neurostimulation as experimental model systems

Textiles, Apparel Design, & Merchandising

Bonnie D. Belleau (EM) • Design, development, and evaluation of prototype apparel products; fashion theory; consumer, designer, manufacturer, and retailer knowledge of apparel products
Jenna T. Kuttruff (M) • Historic and sociocultural significance of textiles and apparel; analysis, interpretation and conservation of archaeological textile remains
Louis C. Kuttruff (3F) • Historic and cultural significance of textiles and apparel; archaeological textiles
Chuanlan Liu (M) • Consumer behavior, retail market research, retailing management and apparel merchandising and entrepreneurship
Delisia Matthews (6A) • consumer behavior, branding, and fashion consumer groups
Lisa McRoberts (6A) • Apparel design, body shape analysis, consumer preferences and satisfaction, functional design, prototype evaluation and sizing
Ioan Negulescu (M) • Textile science, chemistry of natural fibers and fiber-forming polymers, physical and chemical characterization of textiles

Masters

Human Ecology, M.S.

(SHUEC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The thesis option master's program requires a minimum of 24 credits of approved course work and six hours of thesis credit. The non-thesis option master's program (only available for the textiles, apparel design, historic/cultural aspects of textiles and apparel, and merchandising concentration) requires 30 semester hours of approved course work and six semester hours of project credit. In case of deficiencies in undergraduate preparation, additional courses will be required.

The degree is a thesis/non-thesis degree requiring a thesis/special project. The curricular requirements include:

- at least 12 hours at the 7000 level or above
- a minimum core requirement of at least six credit hours in Research Methods and Statistics

The student must pass a final exam consisting of a comprehensive oral exam, typically a defense of a thesis/special project.

Doctorate

Human Ecology, Ph.D.

(PHUEC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least three additional members of the graduate faculty, including the dean's representative, such that the LSU Graduate School's requirements for graduate committees are satisfied.

The PhD degree is a research degree requiring a dissertation. A minimum of 80 hours of credit at the graduate level must be earned including a formal course work beyond the bachelor's degree and a minimum of 20 hours in the formulation and execution of original research, as demonstrated by production of a dissertation. The curricular requirements include:

- At least 39 hours at the 7000 level or above.
- A primary area consisting of a minimum of 60 *hours* of earned credit in a specified field of study
- A minimum core requirement of at least 15 *credit* hours, primarily in Research Methods and Statistics

The student must pass a general exam consisting of both a written and an oral portion exam. The student must also pass a final exam, dissertation defense.

Human Resource Education & Workforce Development (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The general mission of the School of Human Resource Education & Workforce Development is to prepare professionals who train, educate, and lead people in developing human capital for the workplace at the local, state, national, and international levels. This mission is achieved through a balanced program of teaching, research, and service.

The school has three areas of primary focus: business, government, and industry education; agricultural adult, extension, and international education; and career and technical education. These areas address workplace training and retraining concerns and issues: globalization, human resources, environment and health, occupational safety, the changing workplace, technology, communication skills, workplace literacy and diversity, and career change.

Transitions and delivery systems associated with these areas encompass distance learning, contextual learning (applied academics and variable environments), extension and non-formal settings, workplace settings, and formal classrooms (corporate, school, institution). The expected results of study in one of these areas includes better leaders and professionals (e.g., trainers, instructors, administrators, supervisors, researchers, evaluators, consultants) who can address issues related home-based workers, the linkage of home and marketplace, establishment and management of worksites, training, and changes in one or more settings of paid or unpaid employment for self, employer, and the community.

The school, recognized as one of the top 20 programs in human resource education in the U.S., maintains membership in the distinguished University Council for Workforce and Human Resource Education. The school has the only comprehensive university human resource education program in Louisiana.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: <http://www.lsu.edu/gradapply>. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Students seeking admission to this school must submit satisfactory credentials from previous study, acceptable GRE or GMAT scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Students applying to the M.S. program may have the GRE/GMAT waived if they meet the following criteria:

1. A minimum of a 3.0 GPA in their last 60 hours of undergraduate coursework
2. A minimum of a 3.0 GPA on all previous graduate coursework
3. Three letters of acceptable recommendations
4. Three years of demonstrated successful professional work experience
5. Successful completion of a criterion-based essay as specified by the faculty

Admission to the PhD program normally assumes successful completion of a master's degree. Each student must submit at least three letters of reference and evidence of appropriate professional experience. A student may be required to demonstrate acceptable performance in an entrance qualifying examination conducted by appropriate faculty from the school.

Financial Assistance

Graduate assistantships in the school are awarded on a competitive basis to qualified MS and PhD students. All students on assistantship are responsible for a portion of student health care costs, vehicle registration fee, graduation fees, and other fees.

Students who have graduate assistantships are expected to maintain a 3.0 GPA ("A" = 4.0) must register for at least nine semester hours in the fall and spring and six hours in the summer. Most assistantships require the student to be involved in research being conducted in the school; however, some teaching assistantships are available.

Highly qualified students may also be nominated for competitive assistantships awarded by the College of Agriculture and the Graduate School.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Reid Alan Bates (M) • Human resource development, international development

James C. Bunch (6A) • Technology integration and technology-enhanced instruction by teachers/trainers in K-12, post-secondary, and the workforce, the effects of technology on learner's achievement and motivation, and contextualized teaching and learning

Michael F. Burnett (M) • Research methodology, research design

Melissa W. Cater (3F) • Evaluation of youth programs and youth engagement, purpose and agency within a non-formal youth development program context

Janet E. Fox (3F) • Volunteer Development

John Paul Hatala (3F) • Human resource development, adult learning

Elwood F. Holton III (M) • Human resource development, training and development

Earl C. Johnson (3F) • Philosophy

Joe W. Kotrlik (M) • Curriculum development, program evaluation, career development

James G. McMurry (EA) • Vocational, technical, and industrial education; distance learning

Sunyoung Park (6A) • Organizational culture, learning in the workplace, knowledge sharing, the integration of human resource development, human performance technology, and instructional technology

Petra Robinson (6A) • Issues of race, class, gender, and color; International Adult Learning and Development; Social Justice in Education and the Workplace

Donna H. Redmann (EM) • Philosophy, teacher education, business education – emeritus status approved 4/27/2012

William B. Richardson (O) • Leadership

Tracy Rizzuto (7M) • Industrial/Organizational—Acceptance and training, new technology implementation

Satish E. Verma (EM) • Extension and international education
Sheri Maples Wischusen (3F) • Student Success

Degree Programs

The school offers the MS and PhD degrees. The process leading to the doctoral degree includes completion of all course work, the general examination, completion of the dissertation, and the final examination.

Masters

Human Resource Education, M.S.

(SHRE)

The MS degree is available with the thesis or non-thesis option. Areas of concentration include human resource and leadership development and agricultural, extension, and adult education. The thesis option requires a minimum of 30 semester hours, including six hours of thesis research. The non-thesis option requires a minimum of 36 semester hours of coursework, at least half of which must be in courses numbered 7000 and above. Final examinations are required in both options.

The MS degree with a concentration in human resource and leadership development (HRLD) is offered both on-campus and 100% online. The coursework and the degree received are the same for both programs. The traditional on-campus program follows the regular university semester calendar but classes are all offered in the evenings so working professionals who prefer a face-to-face course can attend. The online program follows the LSU Online calendar with six seven-week modules offered every year. The online program courses are targeted at working adult professionals who are unable to come to campus and prefer the convenience of classes taught 100% asynchronously so there are no set class hours. Students can work the classes into their schedules in the way that best fits their individual lifestyles.

Doctorate

Human Resource Education, Ph.D.

(PHRE)

The PhD degree program represents a rigorous extension of graduate work beyond the master's level. Nothing in the minimum standards should be interpreted as an assurance that a degree will be awarded simply on the basis of completing all work outlined.

Doctoral students may specialize in human resource and leadership development; agricultural, adult extension, and international leadership; and career and workforce education and development. Degree programs are planned to meet each student's unique needs and goals. More than 100 graduate students are currently enrolled in the school; slightly more than half are doctoral students.

Graduates of the programs find employment in a wide range of educational fields, including business and industry training programs, administration of state and local educational programs, higher education, cooperative extension service, and governmental agencies.

The PhD program consists of a minimum of 90 semester hours above the bachelor's degree. Acceptance into the program is subject to the approval of the admissions committee.

Course work is divided into a human resource education core, a research block, and any minors selected by the student. Final course work requirements are determined by the student and his or her graduate advisory committee. The general examination includes both written and oral components.

The dissertation is a significant component of the PhD program. The student and the major professor, in consultation with the student's committee, are responsible for identifying and developing a dissertation topic. This topic is developed into a complete proposal and submitted to the student's full committee for approval. The final oral examination focuses on the dissertation and related areas.

Industrial Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Industrial engineering is a branch of engineering that is concerned with the development, improvement, implementation and evaluation of integrated systems of people, money, knowledge, information, equipment, energy, materials, analysis and synthesis, as well as the mathematical, physical and social sciences together with the principles and methods of engineering design to specify, predict, and evaluate the results to be obtained from such systems or processes. It encompasses specialized knowledge and skills in the physical, social, engineering, and management sciences, such as human and cognitive sciences, computer systems and information technologies, manufacturing processes, operations research, production, and automation. The industrial engineer integrates people into the design and development of systems, thus requiring an understanding of the physical, physiological, psychological, and other characteristics that govern and affect the performance of individuals and groups in working environments.

Industrial engineering (IE) at LSU is a unique academic program in Louisiana, bringing together in one program, opportunities for students to concentrate in ergonomics and occupational health, information technology, and production/manufacturing systems, and to develop skills in traditional industrial engineering activities. The program relies on rigorous mathematical and logical approaches to theoretical and practical problem solving, with extensive use of computers and industrial-class software for optimization of integrated processes and systems. The program has a formal program leading to the Master of Science in Industrial Engineering. Students may also pursue master's and doctoral programs in engineering science, with specialization in industrial engineering.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: LSU Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the Department of Mechanical and Industrial Engineering. Applicants must adhere to the application deadlines established by the Graduate School.

Applicants for admission to the master's program in industrial engineering or the interdisciplinary doctoral program must meet or exceed all requirements stipulated by the Graduate School, including satisfactory scores on the verbal and quantitative portions of the GRE, an overall grade point average of 2.75 or a 3.00 for the last 60 hours of undergraduate work, and a satisfactory TOEFL, IELTS, or PTE score for international students. Although most applicants will have undergraduate degrees in engineering, applicants from other disciplines may be accepted if they complete a sequence of engineering science prerequisite courses. Applicants with baccalaureate degrees in engineering, other than industrial engineering, must complete a sequence of 12 semester hours, including IE Fundamentals, Engineering Statistics, Engineering Economy, and Scientific and Professional Writing. This requirement may be waived if the applicant is judged by the faculty to have taken the equivalents of these courses.

Financial Assistance

Some departmental/programmatic assistantships are available for qualified students and are awarded each semester, based on programmatic needs and student qualifications. Except in unusual cases, no master's candidate will be awarded a departmental/programmatic assistantship for more than four semesters. A doctoral candidate may be awarded a departmental/programmatic assistantship for up to six semesters. Faculty who have funded research projects provide additional assistantships for participating graduate students. Faculty members also recommend students for fellowships and stipends when these become available.

Facilities

The Industrial Engineering (IE) Computer Laboratory, used for computer lab instruction and open use by IE students, is equipped with 48 computers. Software includes Microsoft Office Professional, Visio, Microsoft Project, Primavera P6, AutoCAD, Arena (factory simulation), Lingo (optimization), SAS, Minitab, MATLAB, Maple, Visual Studio.NET (C++, C#, VB, ASP), Java, and many other applications supporting IE coursework. The lab is supported by a bank of twelve servers providing support of course work in development of information systems, Web application systems, eCommerce systems, and client/server support for project management and simulation courses.

The Human Factors Laboratory offers and supports training and research in safety engineering, human factors, ergonomics, and construction by providing laboratory space and computing equipment. Two laboratories supporting human factors and safety, the Work Evaluation Laboratory and a Human Factors Laboratory, provide students with the appropriate tools and environment for research in the areas of biomechanics, work environment design, cognitive ergonomics, and control systems. Some of the available research equipment includes a treadmill, 2-D and 3-D Motion Analysis System (Ariel performance analysis system), force platform, 8 Channel Wireless EMG System, Dual Axis Goniometers, GPM Anthropometer, Computerized Exercise Machine, C-Motion - Motion Analysis Software, Human CAD Software, 3D Static Strength Prediction Program, Deltatrac metabolic monitor), human musculoskeletal models, vibration meter, and the like. The Safety Laboratory allows hands-on demonstrations of industry safety equipment in addition to simulation software for modeling petrochemical control room operations.

The Systems Integration Laboratory is used for research and instruction in the integration, automation, and control of process and discrete-part manufacturing systems with particular emphasis on the application of information technologies to these systems. The Systems Integration Lab has twelve workstations. Equipment includes three Allen Bradley PLC with modules for digital and analog I/O and thermocouple measurement; AC and DC motor controllers; a four-axis motion controller; servo and stepper motors and other actuators; high speed data acquisition and control boards; a remote national instruments data acquisition fieldpoint unit, digital and analog sensors and instrumentation, a visual inspection system, and networking equipment for use in laboratory instruction. Software available includes WonderWare and Lookout SCADA software, Labview Development Suite (virtual instrument development), Visual Studio.NET, Java, SAS, Lingo, ARENA, and Rockwell Software RSLogix Ladder Logic programming, AutoCAD, Matlab, and numerous other application and development packages.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Fereydoun Aghazadeh (M) • Human Factors Engineering, Construction Ergonomics, Work Physiology, Occupational Biomechanics, Safety Engineering

Craig M. Harvey (M) • Human Factors Engineering, Safety Engineering, Human Computer Interaction

Laura Ikuma (6A) • Human Factors Engineering, Safety, Musculoskeletal Disorders, Psychosocial Factors

Gerald Knapp (M) • NLP, text & data analytics, Information Systems and Technology, Systems Integration, Maintenance Management, Reliability Engineering

Richard Koubek (M) • Usability Engineering, Job Design, Human Factors Engineering and Ergonomics.

T. Warren Liao (M) • Soft Computing, Supply Chain Management, Logistics & Distribution, Lean Six Sigma, Advanced Materials and Manufacturing, Data Mining

Lawrence Mann, Jr (EM) • (Professor Emeritus) Maintenance scheduling, planning, computer systems, design for maintenance, inventory control, reliability, industrial and labor relations.

Isabelina Nahmens (M) • Quality Management, Lean, Six Sigma, Project Management, Healthcare Systems Engineering, Construction

Bhaba Sarker (M) • Production and Manufacturing Systems Engineering: Production Planning & Control, Flexible/Cellular Manufacturing Systems, Material Handling, Scheduling, Location Theory, JIT Inventory Systems, Warehouse Logistics and Distribution, Lean Manufacturing, Supply Chain Management, Military Logistics, Renewable Energy Systems, and Applied Operations Research.

Masters

Engineering Sciences, M.S.E.S.

(MES)

The MS in Engineering Science program - offered with both thesis and non-thesis options - provides an opportunity for study in areas not represented by departments within the college. Students can enter the program with a baccalaureate degree in any field of engineering or in a pure or applied science. The departmental-level academic course plan for each student (due at the end of the first semester) will be developed in consultation with and approved by the student's graduate advisory committee. Graduate School regulations require the major professor (committee chair) to be a graduate faculty member from a department within the College of Engineering. The committee must also include at least two additional members of the graduate faculty.

The minimum requirements for the thesis option are 24 semester credit hours course work, six additional hours of thesis research credit, and successful defense of a research thesis. The non-thesis option requires a minimum of 36 semester hours of course work including a three-credit hour project course. The project course incorporates a written report and oral presentation to the graduate advisory committee. Additional course work may be necessary for students lacking the proper course prerequisites or as required by the graduate advisory committee and specified on an approved plan of study.

At least one-half of the course work must be College of Engineering courses and at least one-half of the total course work must be at the 7000 level. The program requires emphasis in at least two areas of study not available within a single department and at least 18 hours of required course work and one academic year in residence must be completed after admission to the program.

A plan of study, approved by the student's advisory committee, must be submitted to the Associate Dean for Academic Programs in the College of Engineering by the end of the first semester of enrollment at LSU.

Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, MUST complete the Engineering Science plan of study as part of the application process.

Industrial Engineering, M.S.I.E.

(MSIE)

The IE program in the of Department of Mechanical & Industrial Engineering offers a Master of Science degree in Industrial Engineering (MSIE). Participants can also earn an interdepartmental Master of Science in Engineering Science (MSES) degree with a focus in a concentration in Information Technology Engineering (ITE) administered by the College of Engineering. The master's program in Industrial Engineering is offered with both thesis and non-thesis (project) options. For the thesis option, students must complete at least 24 hours of coursework and six hours of thesis research. For the project option, students must complete at least 33 hours of coursework and a three credit hour master's project in independent study format. For some students additional courses may be required as prerequisites or to demonstrate English proficiency. Credit hours counting toward program requirements must be in courses allowed for graduate credit as described in the LSU General Catalog. Both thesis and non-thesis degree programs in Industrial Engineering are available with specific focus areas including: Ergonomics and Human Factors, Healthcare, Supply Chain Systems, and Information Technology Engineering.

The program-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Industrial Engineering students can also earn a Doctor of Philosophy through the Engineering Science program with major concentration in Industrial Engineering or its variants. For the interdepartmental doctoral program in engineering science, a student must complete 54 semester hours of graduate-level courses beyond the bachelor's, with half of these hours at or above the 7000-level. Two sub-areas of specialization are required, comprising a total of 24 hours, with at least one 7000-level course in each area. Each student must complete and successfully defend a dissertation research topic and general examination. The doctoral program is administered by the associate dean for Academic Programs in the College of Engineering.

Doctorate

Engineering Science, Ph.D.

(PES)

The college accepts qualified students with bachelor's or master's degrees in engineering or a pure or applied science to work toward a PhD in this interdisciplinary program. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee must consist of at least three members of the graduate faculty. The major professor (advisory committee chair) must be from a department within the College of Engineering and at least one member of the student's committee must come from a department offering the PhD degree in the College of Engineering. The advisory committee must also include representatives from the sub-areas of specialization.

A PhD departmental-level academic course plan, approved by the student's advisory committee, should be submitted to the Associate Dean for Academic Programs in the College of Engineering by the start of the second semester of enrollment. Students applying to transfer into Engineering Science or to enroll as dual degree after one semester at LSU, **MUST** complete the Engineering Science PhD plan of study as part of the application process. This early plan of study will map directly to the Doctoral Degree Audit form required by the LSU Graduate School as candidates near completion of their coursework.

The student will be required to complete a minimum of 54 semester hours of approved course work beyond the bachelor's degree and prepare a dissertation acceptable to his or her advisory committee and The Graduate School. At least half of the course work (27 semester hours) must be taken in courses offered by departments within the College of Engineering. Requirements include 24 hours of course work concentrated in at least two sub-areas of specialization within one or more academic departments. The remaining 30 semester hours of course work must contain no more than 15 hours in any one department.

Information Systems & Decision Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Information Systems & Decision Sciences (ISDS) offers two graduate degree programs: the MS in ISDS and the PhD in Business Administration with a concentration in ISDS. These programs are discussed below.

Administration

Minor in ISDS

Students minoring in ISDS must take 12 hours of 5000-level or higher courses. At least six hours must be ISDS PhD core courses, i.e., ISDS 7950, ISDS 7080, ISDS 7081.

Students with a major outside the E.J. Ourso College of Business may be required to enroll in one or more remedial courses before taking other courses in the department.

Students minoring in ISDS and with a GPA less than 3.5 in ISDS courses shall be required to take a four-hour written exam designed and evaluated by their minor professor.

The evaluation of the written exam shall be reported to the graduate advisor in the student's major department rather than to the student.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Ye-Sho Chen (M) • Global eBusiness, knowledge management, technological entrepreneurship, doing business in China

Young H. Chun (M) • Probabilistic modeling, software quality management, decision analysis, information economics, data mining

Rudy Hirschheim (M) • Information systems management and development, IT sourcing, philosophy of science, serviceoriented architecture

Andrea Houston (M) • Knowledge management and information retrieval, medical informatics and human factors, digital libraries, natural language processing, organizational memory, and team effectiveness

Peter Kelle (M) • Supply chain management, buyer-supplier negotiations, enterprise systems, and inventory management

Helmut Schneider (M) • Total quality management, supply chain management, data mining, and statistical analysis of crash data

Andrew Schwarz (M) • IT acceptance, adoption and use, IT governance, IT-business alignment; implementation and diffusion of technology within organizations, and future technology trends

Joni A. Shreve (3P) • Data mining and predictive modeling with an emphasis on classification analysis

James Van Scotter (M) • eCommerce and communication, IT workforce, research methods and measurement

Kari L. Walters (3P) • Educational technology and designing courses for students with disabilities

Edward Watson (M) • Enterprise systems and eBusiness, adoption and diffusion of IT, organizational impact of IT, decision support, strategic use, and simulation

Sonja Wiley-Patton (M) • Medical informatics, bioinformatics, IT adoption and diffusion, eCommerce, and organizational and social impacts of IT

Masters

Analytics, M.S.

(SISDS)

business.lsu.edu/Information-Systems-Decision-Sciences/Pages/MS-Analytics.aspx

Students enrolled in the Master of Science in Analytics (MS) program (ISDS) learn to blend information management techniques and advanced statistical methods to distill critical business information from massive and often complex data sets. Graduates will use data-driven problem-solving and decision-making methods to improve their organization's internal efficiency and its external competitiveness. Their work will influence key organizational decisions and strategies. The program is designed for students with

undergraduate degrees in business, mathematics, statistics, engineering, or computer science with strong quantitative skills. Typical areas of application include Fraud Detection, Financial Analytics, Marketing, Web Analytics, Supply Chain Management, and Health Care Analytics. Graduates can expect challenging and rewarding jobs with above average salaries and above average opportunity for advancement.

Students will complete 36 hours of intensive coursework over a ten month period. The MS curriculum integrates relevant topics from statistics, operations research, information technology, and communication to provide graduates with concentrated sets of knowledge and proficiencies that are relevant to private companies, non-profits, and government organizations. The program uses a cohort-based learning model that emphasizes teamwork and engages students in multiple roles. The curriculum emphasizes management of very large, real-world data sets, advanced statistical methods, teamwork, and presentation and communication skills including state-of-the-art visualization techniques. Specific curricular requirements are listed below:

- A total of at least 36 hours of credit at the graduate level.
- At least 21 hours of the graduate credit must be at the 7000 level or above.
- Six hours of thesis/project work (two three-hour sections of ISDS 7990 taken consecutively in the fall and spring semesters)
- Completion of a thesis, project, or exam.
- A passing grade on the final examination, which is a defense of the student's thesis or project.

Applications for admission are completed online: www.lsu.edu/gradapply. The following information should accompany applications submitted to the Graduate School: transcript(s) of all previous undergraduate and graduate work attempted or completed; GMAT or GRE scores (quantitative, verbal, and total) and TOEFL, IELTS, or PTE scores (for international students). These items should be sent directly from the university or ETS to the LSU Graduate School Student Services Office (see gradschool.lsu.edu/ for information).

All applicants are required to provide recent scores for the Graduate Management Admissions Test (GMAT) or Graduate Record Exam (GRE). Admission decisions are primarily based on academic records, recommendation letters, and the GMAT/GRE test scores. Students who have graduated from a non-US school should check the LSU Graduate School's Admission Requirements to determine if a TOEFL, IELTS, or PTE exam is required. All applicants must meet the minimum requirement for LSU, which are listed on the Graduate School web pages. When all requirements are met, the Graduate School requests that the Department of ISDS review the application. The final admission decision is made by the department's Master's Degree Admissions Committee. Preference is given to applicants with higher GPAs and higher scores on the GMAT or GRE, and particularly to those with higher scores on the quantitative portion of the GMAT or GRE. All materials should be submitted to the Graduate School. The Department of ISDS admits students to the MS program in ISDS with a concentration in BA and BI only for the summer semester. Classes start on August 1st (or the first week day after August 1st). The application deadlines for the MS in ISDS are the same as the Graduate School's deadlines.

Doctorate

Business Administration, PhD (Information Systems & Decision Sciences)

Doctor of Philosophy (PhD) in Business Administration with a concentration in Information Systems and Decision Sciences (PBAIS)

The PhD program (PhD in business administration with a concentration in ISDS) is designed for full-time study and involves 60 credit hours at the graduate level. The program consists of 12 hours of "common body of knowledge" course work covering all other business disciplines; 12 hours of major field core courses; 9 semester hours in a minor area; 12 hours of research methodology; 6 semester hours in a supporting area; and 9 hours of dissertation studies. Individuals with a master's degree in a business field may substitute much of their previous graduate course work for the "common body of knowledge" course work. Students should plan to spend two to three academic years (fall, spring, and summer) completing course work. The specific departmental-level academic course plan must be approved by the student's advisory committee. The committee will include the

student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied. Both written and oral comprehensive examinations are required upon completion of the course work. Each PhD candidate is also required to design, implement, and complete an original dissertation under the supervision of an ISDS faculty member. Completion of the dissertation usually takes 12 to 18 months. Overall, the PhD program normally requires four years to finish.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Information-Systems-Decision-Sciences/Pages/PhD.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/Information-Systems-Decision-Sciences/Pages/PhD-Curriculum.aspx).

Kinesiology (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The term kinesiology means "study of movement." In the kinesiology graduate program, human movement is studied from different perspectives, forming the basis for graduate specializations in exercise physiology, motor behavior, pedagogy/psychological sciences, and sport management.

- Exercise physiology is focused on the genetic, biochemical, and clinical evaluation of physiological alterations to exercise training and detraining in both human and animal models. This focus is centered on modifications in the muscular, cardio respiratory, and immune systems from an aging, disease, or peak performance perspective.
- Motor behavior research focuses on the learning and performance of coordinated movement, with particular interest in topics such as variables influencing effective and efficient skill learning, gait and balance control, sensorimotor integration for whole body and fine motor coordination, and musculoskeletal system rehabilitation.
- Pedagogy/psychological sciences research investigates factors that influence teaching, learning, and behavior choices in a broad range of physical activity settings, including physical education, health education, and exercise programs.
- Sport Management research focuses on the social construction and organization of sport and sport organizations, centering on management, sociological, and organizational perspectives.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the departments throughout the year. Applicants must adhere to the application deadlines established by the Graduate School. Applications are continuously evaluated and students may be admitted for any semester. To ensure full consideration for financial assistance, applicants are encouraged to submit their materials by **February 1** for admission in the fall semester.

Students seeking admission must submit satisfactory credentials from previous study, including a bachelor's degree in a related field, acceptable GRE scores (GMAT can be used for admission to the sport management specialization), and three letters of recommendation. The target GRE score is 295-300 (combined verbal and quantitative sections), but students may be admitted with lower scores with high undergraduate GPAs and strong letters of recommendation. The school adheres to the minimum GPA requirement of 3.0 on a 4.0 scale set by the LSU Graduate School for regular admission. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score according to the standards set by the LSU Graduate School.

Meeting the minimum entrance requirements does not ensure acceptance into the program. The school accepts qualified students whose interests and goals are consistent with our areas of specialization. Full admission is granted when students meet the minimum standards and a graduate faculty member agrees to serve as their advisor. If a student does not meet all requirements, he or she may be admitted provisionally.

Financial Assistance

A limited number of graduate assistantships and fellowships are available. Most assistantships require both teaching and assisting in research. Application forms are available on the school website.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Damon PS Andrew (M) • Organizational behavior, human resource management, and consumer behavior centered around the antecedents of critical organizational outcomes, such as employee satisfaction, motivation, and commitment

Kwame J. A. Agyemang (6A) • Focuses attention on the organizational and individual level of analyses to understand the generation of high performance and social issues in the workplace. His research is typically grounded in in-depth interviews with his study participants.

Birgitta L. Baker (6A) • Psychological, family, and built environment predictors of physical activity and other health behaviors

Claude Bouchard (M) • Genetics and physical activity (Pennington Biomedical Research Center)

Russell L. Carson III (M) • Psychology of teaching and teachers, especially the determinants and consequences of daily emotional experiences and burnout in teachers of all disciplines

Ralph Ray Castle (3P) • Clinical effectiveness of physical rehabilitation techniques/therapeutic modalities on acute and chronic inflammatory responses

Timothy S. Church (3F) • Exercise and health (Pennington Biomedical Research Center)

Daniel M. Corcos (3F) • Motor learning, motor control, and motor disorders (College of Applied Health Sciences, University of Illinois–Chicago)

Conrad Earnest (3F) • Exercise, nutrition, health, and sport performance (Pennington Biomedical Research Center)

Alex Garn (M) • Achievement motivation in physical education and physical activity contexts, approach and avoidance motivation, physical education teacher development

Jan M. Hondzinski (M) • Motor control and sensorimotor integration used during task performances by adults of varying age with and without neurological deficits

Neil Johannsen (6A) • Research focus is the study of physical activity and exercise training effects on chronic disease and special populations ranging from young lean adults to older adults, overweight/obese people, individuals with type 2 diabetes, and women with a history of breast cancer.

Lisa G. Johnson (3F) • physical environmental influences on physical activity and health and endocrine responses to exercise

Maria Kosma (M) • Psychosocial determinants of physical activity for health and wellness among underserved populations (e.g., people with physical disabilities and older adults)

Dennis Landin (M) • Musculoskeletal system actions and rehabilitation, clinical anatomy

Amelia M. Lee (EM) • The role of self-perceptions of ability in achievement behavior; beliefs, expectations, motivations and attitudes as mediators between teaching and learning; gender differences in achievement-related cognition, affect, and behavior

Richard A. Magill (EM) • How practice-related variables influence motor skill learning, performance and rehabilitation
Arnold G. Nelson (M) • Physiological and biochemical adaptations of skeletal muscle and muscle metabolism to acute and chronic stressors (e.g., exercise, environment, dietary supplements) and how these adaptations can be manipulated to improve work and/or athletic performance
Eric Ravussin (3F) • Diabetes, metabolism, and physical activity (Pennington Biomedical Research Center)
Leanne M Redman (3F) • Clinical and basic science research and involving women's health, weight management, lifestyle intervention, endocrinology and energy metabolism
T. Gilmour Reeve (M) • Psychological factors related to human performance, response selection and programming processes in the execution of skillful human movements
Chad Seifried (M) • Use of historical methods to review the organizational and individual history of decisions/strategies of sport facility construction and management, high school athletic management and coaching and Division I (FBS) postseason decision management and governance
Brian Soebbing (6A) • Understanding the strategic behavior of sports leagues, teams, and athletes using quantitative methods
Melinda A. Solmon (M) • Achievement motivation in physical activity, student goals and perceptions of teachers' actions in physical education
Laura K. Stewart (M) • Exercise and inflammation, botanicals and performance enhancement/prevention of disease
Catherine E. Tudor-Locke (3F) • Walking behavior (Pennington Biomedical Research Center)
Arend W. A. Van Gemmert (6A) • Mechanisms contributing to changes in the control of fine motor task performance due to stress, mental load, aging, neurological disease, and practice
Sara Winges (6A) • Focused on the kinematics, kinetics, and neuromuscular patterns of hand control and examining the role of vision in haptic perception of arm movements and prediction in smooth pursuit during eye tracking tasks.

Recent Faculty Publications

A representative sample of recent faculty publications may be found at the School of Kinesiology website and various faculty pages linked to that location. The School of Kinesiology faculty directory is located at:
uiswcmsweb.prod.lsu.edu/kinesiology/Kinesiology_Faculty_Listing/item49177.html

Masters

Kinesiology, M.S.

(SKIN)

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied. The degree program includes both thesis and non-thesis options. The thesis option requires 24 semester hours of graduate course work and a research-based thesis for six semester hours (30 hours total). The non-thesis option requires 36 semester hours of graduate course work with a maximum of six hours earned as independent study credit. The curricular requirements for both the thesis and non-thesis options include:

- at least 18 hours at the 7000 level or above
- a minimum core requirement of six credit hours in research methods and design.
- A primary area consisting of a minimum of 12 credit hours in a specified field of study:

Specialization

Exercise Physiology

- KIN 7530 Exercise Physiology (3)
- KIN 7535 Neuromuscular Aspects of Exercise (3)
- KIN 7537 Exercise and Environment (3)
- KIN 7550 Advanced Exercise Physiology (3)
- KIN 7536 Cardiovascular and Respiratory Function in Exercise (3)

Motor Behavior

- KIN 4512 Lifespan Motor Development (3)
- KIN 4571 Neuromotor Control of Human Movement (3)
- KIN 7508 Analysis of Human Movement (3)
- KIN 7510 Motor Learning (3)
- KIN 7512 Motor Control (3)
- KIN 7517 Advanced Topics in Motor Control (3)
- KIN 7526 Advanced Topics in Biomechanics (3)
- KIN 7532 Advanced Topics in Motor Learning (3)

Pedagogy and Psychological Sciences

- KIN 7502 Curriculum Construction in Physical Education (3)
- KIN 7513 Seminar in Physical Education Professional Preparation (3)
- KIN 7514 Pedagogy in Physical Education (3)
- KIN 7515 Theories of Achievement Motivation in Physical Activity (3)
- KIN 7528 Sport Psychology (3)
- KIN 7601 Changing Health Behavior (3)
- KIN 7602 Social-Ecological Influences on Physical Activity and Health (3)
- KIN 7603 Stress Management and Emotional Health (3)

Sport Management

- KIN 7511 Administrative Problems in Kinesiology (3)

- KIN 7516 Organizational Behavior and Development in Sport (3)
- KIN 7518 Social Issues in Sport (3)
- KIN 7519 Financial Issues in Sport (3)
- KIN 7524 Sport Law (3)
- KIN 7545 Economic Issues in Sports (3)

Note:

Students in non-thesis programs of study must pass a written comprehensive final examination that will be given by the student's advisory committee and should be approximately three hours in length. For students in the thesis program, the final examination will be an oral examination with all the committee members present. The format and content of this examination will be determined by the advisor and committee members.

Doctorate

Kinesiology, Ph.D.

(PKIN)

The school-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Seventy-five credit hours at the graduate level must be earned including a maximum of 12 credit hours for the dissertation. The curricular requirements include:

- At least 27 credit hours at the 7000 level or above, exclusive of any type of independent study
- A minimum core requirement of 12 credit hours in research design, methodology, and analysis (KIN 7900, EXST 7003, EXST 7013 or equivalents, and one research course specific to the area of specialization).
- A primary area consisting of a minimum of 15 credit hours in a specified field of study

Specialization

15 hours selected from:

Exercise Physiology

- KIN 7503 Dimensions of Aging (3)
- KIN 7530 Exercise Physiology (3)
- KIN 7535 Neuromuscular Aspects of Exercise (3)
- KIN 7537 Exercise and Environment (3)
- KIN 7550 Advanced Exercise Physiology (3)

- KIN 7536 Cardiovascular and Respiratory Function in Exercise (3)

Motor Behavior

- KIN 4512 Lifespan Motor Development (3)
- KIN 4571 Neuromotor Control of Human Movement (3)
- KIN 7508 Analysis of Human Movement (3)
- KIN 7510 Motor Learning (3)
- KIN 7512 Motor Control (3)
- KIN 7517 Advanced Topics in Motor Control (3)
- KIN 7526 Advanced Topics in Biomechanics (3)
- KIN 7532 Advanced Topics in Motor Learning (3)

Pedagogy and Psychological Sciences

- KIN 7502 Curriculum Construction in Physical Education (3)
- KIN 7513 Seminar in Physical Education Professional Preparation (3)
- KIN 7514 Pedagogy in Physical Education (3)
- KIN 7515 Theories of Achievement Motivation in Physical Activity (3)
- KIN 7528 Sport Psychology (3)
- KIN 7601 Changing Health Behavior (3)
- KIN 7602 Social-Ecological Influences on Physical Activity and Health (3)
- KIN 7603 Stress Management and Emotional Health (3)

Sport Management

- KIN 7511 Administrative Problems in Kinesiology (3)
- KIN 7516 Organizational Behavior and Development in Sport (3)
- KIN 7518 Social Issues in Sport (3)
- KIN 7519 Financial Issues in Sport (3)
- KIN 7524 Sport Law (3)
- KIN 7545 Economic Issues in Sports (3)

Note:

Each PhD student must complete a milestone examination within two years of admission to the School of Kinesiology. This examination serves as the student's qualifying exam for continuing in the PhD program. The exam consists of carrying out a research project that must be approved by the student's school-level academic course plan committee. At or near the end of the completion of a PhD student's required course work, the student should schedule the general examination. The general examination consists of two parts: one written, the other oral. The written portion consists of writing a comprehensive review paper in which the student must demonstrate mastery of content knowledge in their chosen specialization, the ability to synthesize and critically evaluate current literature, and the ability to formulate research questions and/or hypotheses. The oral portion is typically a defense of the review paper, although the oral examination need not be limited to topics related to the paper. Upon successful completion of the general examination, the PhD candidate moves forward with the dissertation to demonstrate the ability to design and conduct independent and original research. The final examination will be an oral examination primarily concerned with the dissertation, although the committee may opt to extend the subject matter.

Landscape Architecture (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

With a tradition of more than 60 years of preparing students for careers in landscape architecture through both undergraduate and graduate studies, the Robert Reich School of Landscape Architecture is one of the oldest and strongest programs in the nation. The challenging field of landscape architecture incorporates studies in art and design, natural sciences, and social and cultural disciplines, together with technological advances in resource analysis, computer-aided representation, and modeling to address issues at scales ranging from intimate to global. At the profession's heart are issues relating to environmental sustainability, human stewardship of natural resources, and the quality of life in both urban and rural surroundings.

At both the undergraduate and graduate levels, the curriculum uses natural and man-made conditions in the Lower Mississippi River Valley region as laboratories to study the roles of nature, culture, and humans in shaping the built environment and providing invaluable resources and educational opportunities within the larger context of the southern United States, Central and South America, and the Caribbean. Investigations include how and why landscapes evolve and endeavor to define the designer's role in combining natural systems, environments, physical interventions, and human uses. Course formats include design studios, seminars, lectures, field studies, and independent work.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Students are admitted to the program based on evaluation of the following:

- Academic qualifications
- Test scores (GRE; TOEFL, IELTS, or PTE for international students)
- A portfolio of creative work (required for students with design backgrounds; strongly encouraged for others)
- A one page statement of intent
- A resumé or CV
- Three references that discuss academic history and professional promise

Prospective students are encouraged to visit the school and its facilities, meet students, and discuss the program with faculty. An open house is held in late fall during studio reviews, but those interested in the program may make arrangements for a visit at any other time. Students are admitted only for the fall semester. The school accepts applications through **January 31** for admission the following fall semester. Admissions decisions will be made in March. Prospective students should first complete admissions requirements through LSU's Graduate School; official transcripts and test scores should be sent to the Graduate School. Portfolio materials, resume and any questions about application procedures should be addressed to the graduate coordinator.

Financial Assistance

Graduate fellowships and teaching and research assistantships are awarded on a competitive basis based on the student's application materials. There is no application form for the School's fellowships and assistantships. Graduate students are also eligible for school scholarships and financial assistance after their first year.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Austin Allen (7M) • Disaster Recovery Planning, Community and Cultural Outreach and Engagement, Film Theory

Bradley S. Cantrell (7M) • Digital representation, interactive/reactive landscapes

Max Z. Conrad (M) • Urban design, regional planning, planting design, travel

Lake Douglas (3A) • Garden history; arts administration and public art planning; nonprofit management and public administration; freelance writing

Kristi Dykema (M) • Visual communication, landscape growth theory

Charles F. Fryling Jr (M) • Environmental planning, ecology

Richard L. Hindle (6A) • Technology in the garden and landscape, with emphasis on material processes, patents, and innovation/plant design

Forbes E. Lipschitz (6A) • The role of geospatial analysis and representation in rethinking landscape systems, with a particular interest in North American agriculture territories

Cathy S. Marshall (7M) • Representation of landscape phenomenology

Wes Michaels (7M) • Dynamic landscape modeling, landscape urbanism, digital media

Elizabeth Mossop (M) • Contemporary landscape design, urbanism, infrastructure

Kevin Risk (7M) • Cultural Landscapes, history and site design

Bruce G. Sharky (M) • Professional practice, site grading and design, Latin American design studies

Suzanne L Turner (EM) • History, historic preservation, site design

Masters

Landscape Architecture, M.L.A.

(MLA)

The Master of Landscape Architecture (MLA) degree is a three-year professional degree open to applicants with undergraduate qualifications in any discipline. Those with accredited degrees in architecture or landscape architecture are eligible for entrance into the program's second year, following consultation with the graduate coordinator and review of qualifications and portfolio. Typically, this course of study requires 36 semester hours of graduate-level work. Those entering the three-year program will generally take up to 42 additional hours of preparation and background courses and 18 semester hours of elective courses. A student's past academic and work experiences are carefully evaluated and course sequences are designed to take advantage of these previous experiences. Students must pass a final exam consisting of review of the final semester studio project by three or more professors.

Interdepartmental Program in Liberal Arts (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Master of Arts in the Liberal Arts (MALA) program is an alternative to traditional graduate studies in a single discipline, enabling the student to pursue courses in a wide range of disciplines and tailor a curriculum to his or her own intellectual interests. The program emphasizes study for the sake of personal enrichment and intellectual growth. Although the MALA program may have a vocational dimension, the primary emphasis is on fostering the curiosity, understanding, and research skills that will sustain a lifetime of learning.

Though the MALA program welcomes traditional students who seek to pursue a nontraditional, interdisciplinary course of study, it is especially suited to accommodate college educated adults who wish to return to part-time academic studies, having already established a career.

Administration

Admission

LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

The MALA program accepts new students for fall, spring, and summer semesters. Applications are evaluated on a rolling basis, as they are submitted. Applicants must, however, adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study and acceptable GRE scores. In general, expectations of previous work include an undergraduate GPA of 3.00 or above, and GRE scores (combined verbal and quantitative) of at least 297. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Graduate Faculty

The graduate faculty for the MALA is drawn from departments across the university. Contact the director for specific information.

Masters

Liberal Arts, M.A.L.A.

(MALA)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirement for graduate committees is satisfied.

The Master of Arts in the Liberal Arts offers both a thesis track and a non-thesis track.

Thesis track

Each student must earn at least 24 hours of graduate course credit, earn at least six hours of thesis credit (LIBA 8000) for the thesis project, and defend a master's thesis. The curricular requirements include:

- At least 24 hours of graduate course work, a minimum of 12 of which must be at the 7000 level or above, and must include LIBA 7000 and LIBA 7900. No more than 12 hours of graduate course work may be taken at the 4000-level.
- At least six additional hours of LIBA 8000 (thesis credit)
- A maximum of 12 credits of course work from any one department

Non-Thesis track:

Each student must earn at least 36 hours of graduate course credit and sit for an exit examination. The curricular requirements include:

- At least 36 hours of graduate course work, a minimum of 18 of which must be at the 7000 level or above, and must include LIBA 7000 and LIBA 7900. No more than 18 hours of graduate course work may be taken at the 4000-level.
- A maximum of 18 credits of course work from any one department

Library & Information Science (Graduate Program)

Program Overview

The School of Library & Information Science offers the only Master of Library & Information Science (MLIS) degree in Louisiana. In 1926, LSU began offering summer courses in library science, and in 1931 the Board of Supervisors established The Graduate School of Library Science. The name was changed to the School of Library & Information Science (SLIS) in 1981. LSU's departmental-level academic course plan in library and information science has been continuously accredited by the appropriate accrediting authority throughout its history. The Master of Library & Information Science degree program is currently accredited by the American Library Association.

Many careers are open to those who earn the master's degree in library and information science (MLIS). Librarians, archivists and information scientists are able to organize great amounts of disparate information for retrieval and to activate use of information for problem solving and policy making. In public service positions, librarians and information scientists assist patrons in using material to enrich their lives and work. Our graduates are building print and digital library collections, providing face-to-face and online reference services, offering storytelling programs, studying human-computer interaction, and preserving archival collections. Some MLIS graduates hold positions in major research libraries, community college libraries, school libraries, and public libraries, while others are employed in the Library of Congress and the National Library of Medicine. Others

are information specialists for business and industry, or work in federal government libraries such as the Government Printing Office or overseas in Army libraries, or in state government libraries. Still others manage archival materials in a wide variety of historical repositories, or work in hospitals, law firms, and museums.

The diversity of careers for which the MLIS degree is the requisite credential offers mobility and many opportunities for advancement. Graduates will be well prepared to pursue information careers that support their personal interests and skills. More than 170 graduate students are enrolled in SLIS and more than 50 MLIS degrees have been awarded in each of the last five years.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department throughout the year, and students may be admitted to begin their studies in fall, spring or summer. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, including a grade-point average of at least 3.00 ("A"= 4) for the last two years of undergraduate work taken and 3.00 for all graduate-level work previously taken, based on all work for which a grade is given. Students must also have GRE scores (a combined score of over 1000 on the verbal and quantitative portions will assist those with GPAs below 3.0), three letters of recommendation, and a professional resumé. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Provisional admission may be considered for an applicant who appears to be admissible on the basis of credentials submitted, but who is unable to supply all of the required official records prior to registration. A student admitted provisionally must submit complete and satisfactory records within 60 days (45 days in summer term) after the first day of registration. If these credentials are not received by the date specified or if they prove to be unsatisfactory, the student will not be permitted to register for other courses. Provisional admission does not guarantee subsequent regular admission.

An applicant who fails to meet the necessary admission requirements but who is, nevertheless, judged by the dean and the faculty to show promise for successful graduate work, may be recommended to the Graduate School for probationary admission.

Probationary admission requires that students maintain a 3.0 or better GPA for nine consecutive hours in order to convert to regular admission. Students who fail to maintain this average will not be permitted to register for additional courses. Applicants who have an unsatisfactory undergraduate record who have completed a minimum of nine hours of graduate course work with at least a 3.33 graduate GPA and who have acceptable GRE scores will be considered for admission on probation.

Financial Assistance

Details about scholarships and assistantships for MLIS students, including application forms and deadlines, is available [here](#).

Graduate Faculty

(check current listings by department by clicking [this link](#))

Carol L. Barry (6A) • Information retrieval, relevance, library automation, abstracting and indexing

Robin Kurz (6A) • Public libraries and youth services
Boryung Ju (M) • Human-computer interaction
Shirley B. McDonald (3P) • School Libraries
Michelynn McKnight (M) • Health sciences libraries, information behavior of health care providers and consumers, research methods
Patsy Perritt (EM)
Suzanne Stauffer (M) • Cataloging, history of books and libraries, children's services
Yejun Wu (6A) • Information retrieval systems, text classification, digital libraries

Masters

Library & Information Science, M.L.I.S.

(MLIS)

It is possible to complete the MLIS degree by taking traditional face-to-face classes on the LSU campus, or by taking online courses, or by taking some courses in each format. All courses and degree requirements are the same regardless of the delivery format. Students do not have to specify that they will be online students when they apply.

There are three specializations available in the MLIS program: Archives Specialization, Libraries Specialization, and Information Management Specialization. Regardless of the specialization completed, all students will receive the MLIS degree. The total number of credit hours (40) and total number of required course credits (22) remain the same for all specializations. There is a common core of 13 required course credits for all specializations: LIS 7004 Principles of Management for Librarians and Information Specialists (3); LIS 7008 Information Technologies (3); LIS 7011 Information Needs Analysis (3); LIS 7013 Evaluation of Information Systems (3); and LIS 7901 Issues in Archives, Library, and Information Science (1). Elective courses support individual student plans for careers in Archivist, Cataloger, Corporate Information Specialist, Digital Curator, Government Librarian, Health Sciences Librarian, Information Literacy Librarian, Information Manager/Consultant, Information Systems Analyst, Knowledge Manager/Strategist, Library Administrator, Manuscripts Curator, Preservation Specialist, Reference Librarian, School Library Media Specialist, Special Collections Librarian, Website Designer/Manager and Youth Services Librarian.

The MLIS is a non-thesis degree requiring a written comprehensive examination. Although not required, a thesis may be submitted in partial fulfillment of requirements for the MLIS. Maximum credit allowed for the thesis is nine credit hours.

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Joint Degree Program in History (MA) and the School of Library & Information Science (MLIS)

The department, in conjunction with the School of Library & Information Science, also offers a joint degree program in which a student can earn a Master of Arts degree in history and a Master of Library Science & Information degree simultaneously with the completion of 64 hours. A separate application to the School of Library & Information Science is necessary.

The basic requirements for the joint degree program are the same for the regular non-thesis MA program in the Department of History and the MLIS program in the School of Library & Information Science. The joint degree program, however, has been designed to allow the student to complete the 36 credit hours for the MA and the 40 credit hours of the MLIS by completing a total of only 64 hours.

Elective courses in the School of Library & Information Science eligible for credit for the history MA degree: LIS 7202, LIS 7203, LIS 7408, LIS 7504, LIS 7505, LIS 7509, LIS 7604, LIS 7611, LIS 7700, LIS 7701, LIS 7702, LIS 7703, LIS 7910 on a case-by-case basis, and LIS 7913.

Elective courses in the Department of History eligible for credit for the MLIS degree: Any two three-hour graduate courses at the 7000-level in the Department of History.

Management (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The primary mission of the Department of Management's graduate program is to develop trained professionals who are qualified to instruct in a university environment and capable of conducting scholarly research. All PhD students are required to demonstrate knowledge in the broad domain of management and in an area of concentration within management. The area of concentration may be selected from either organizational behavior/human resource management (OB/HR) or strategic management.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School. The application deadline is **January 15**.

Individuals desiring admission to the PhD program must make formal application to the LSU Graduate School. The following documents should accompany all applications submitted to the Graduate School: transcript(s) of undergraduate study, transcript(s) of all graduate work, GMAT score, TOEFL, IELTS, or PTE score (if an international student) and a statement of purpose. If Graduate School criteria are met, these documents will be reviewed by the Department of Management's PhD Policy and Admissions Committee for an admission recommendation. This recommendation will then be forwarded to the Graduate School. The statement of purpose should include:

- Career objectives and reasons for wanting to pursue a PhD;
- How the applicant's academic or professional background has prepared him or her for PhD studies;

- Reasons for selecting the PhD in Management at LSU;
- To the extent possible, an outline of possible research interests;
- Any other information that may assist in the admission decision.

In general applicants should have successfully completed course work equivalent to either the MBA or MS in Management. Students without graduate level studies in management may be required to complete additional coursework. In general, minimum admission requirements are a GPA of 3.5 in prior graduate work (or undergraduate work for applicants who have not completed graduate level coursework), and a score of 600 or above on the GMAT.

International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with the application deadline.

Robert T. Justis (M) • Strategic management, small business development, entrepreneurship

Jean B. McGuire (M) • Strategic management, international strategic management, corporate governance

Daniel Whitman (6A) • Teams, leadership, and personality

Doctorate

Business Administration, PhD (Management Concentration)

Doctor of Philosophy PhD in Business Administration, concentration in Management (PBDM) (GMGT)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a dissertation degree requiring a dissertation. Sixty-three hours of credit at the graduate level must be earned, including a minimum of nine hours of credit for the dissertation and 'breadth of study' requirements which may be fulfilled with prior graduate level course work. The curricular requirements include:

- At least 42 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A primary area consisting of a minimum of 24 hours of earned credit in a specified field of study.
- A minimum core requirement of 15 credit hours in management core courses required of all PhD students: MGT 7301, MGT 7600, MGT 7800, MGT 7811, and MGT 9201.
- Must pass a general/qualifying/final exam consisting of a written exam and a comprehensive oral exam.

- Completion of a written and oral general/qualifying/exam consisting of a written exam and a comprehensive oral exam.
- Successful completion and defense of the dissertation.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Management/Pages/PhD-Management.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/management/Pages/PhD-Curriculum.aspx).

Marketing (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Philosophy of the Department of Marketing PhD Program

The PhD program in business administration with a concentration in marketing is designed to produce collegial scholars for academic careers in research, teaching, and service at universities. A strong emphasis is placed on research and a collaborative research environment. The department has a state-of-the-art behavioral research lab housed in the Business Education Complex where faculty and students can conduct their research. Doctoral students receive opportunities to participate in research projects beginning during their first semester of the program and continue to work closely with fellow doctoral students and faculty members on various research projects targeted for conference and journal publication while they are in the program.

Strengths of the program include:

- Opportunities to work with faculty on research projects beginning in the first semester of the doctoral program to develop publishable manuscripts.
- A state-of-the-art Department of Marketing Behavioral Research Lab housed in the Business Education Complex and access to the Department of Marketing undergraduate student subject pool for research projects.
- Brown bag "Professoring Seminars" offered every other year by marketing department faculty who share information concerning developing a research program, research stream goal-setting, written comprehensive exams, teaching, dissertations, interviewing, and academia as a career (conferences, promotion, and tenure).
- Travel support to present original research at conferences including the American Marketing Association (Summer and Winter conferences), Association for Consumer Research, Academy of Marketing Science, Society for Marketing Advances, and Society for Consumer Psychology, for instance.
- Placement at major colleges and universities in the US and abroad. Graduates have held positions at universities including the Michigan State University, the University of Virginia, Baylor University, Villanova University, Texas Christian University (TCU), Georgia Southern University, Wayne State University, Appalachian State University and Grand Valley State University, among others.

Program Overview

The four-year program consists of year-round study (fall, spring, and summer) for full-time students. The program consists of 21 semester hours of marketing coursework, 12 semester hours in a minor area, six semester hours in a support area, and 24 semester hours of "common body of knowledge" coursework covering all other business disciplines. Students should plan on spending two to three academic years (fall and spring) to complete coursework and devote summer terms to advance their research with fellow doctoral students and faculty members. Upon completion of major coursework, students must pass a written qualifying exam and an oral exam. Each PhD candidate is also required to design, implement, and complete an original dissertation under the supervision of a marketing faculty member. Overall, the PhD program normally requires four years to complete.

The typical course work completed during the four year program can be located at:
business.lsu.edu/marketing/Pages/PhDCurriculum.aspx

Administration

Admission

The department believes in the importance of strong, cooperative student cohorts; consequently, a new cohort of approximately 3 - 5 students is admitted every other fall semester. Admission is based on a number of factors, including the applicant's record, standard admission test scores, a commitment to an intellectually demanding program of study, letters of recommendation, the applicant's overall standing compared with other students, and the number of vacancies in the program in a given year. A qualified student who holds a bachelor's and/or master's degree from an accredited college or university is eligible to apply for admission to the PhD program, regardless of his or her previous field of study. Minimum standards for consideration include: a grade point average of at least 3.4 in the most recently completed 60 hours of work, a GMAT score of 600, and strong recommendations from individuals who have had the opportunity to observe the applicant's interest, ability, and commitment to a career of scholarship. The department does not accept GRE scores. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score. Admission to the program occurs in only even years; applications are due **December 31st**, reviewed by faculty in January, and selected students are admitted in August.

Financial Assistance

Graduate assistantships and tuition waivers are generally awarded to all students accepted into the program and may be renewed for four consecutive years, assuming satisfactory progress is made toward completion of the degree. Because students are encouraged to collaborate on research projects throughout the PhD program, the department offers financial support for students to present research papers accepted at national conferences. During the first two years, students are assigned to a faculty member for 20 hours of work per week. Assistantship duties may include library work, assistance in grading, data entry and computer analysis of data sets, and working with a faculty member on a specific research project aimed at producing a publishable manuscript. During the third and fourth year, students are assigned to a faculty member for 10 hours of work per week and are typically required to teach one section of an undergraduate marketing course.

Graduate Faculty

(check current listings by department by clicking [this link](#))

William C. Black (M) • Consumer relationships, retail location and patronage, services marketing, quantitative modeling and methods

Alvin C. Burns (M) • Household consumption behavior, consumption socialization of children, marketing research

Judith Anne Garretson Folse (M) • Persuasion (source & message effects), social marketing, gratitude in marketing, consumption emotions and B2C relationship marketing

Thomas J. Karam (3P) • Sports marketing

Andrew Kuo (6A) • Consumer behavior, branding, corporate social responsibility, new media in advertising

Ofer Mintz (6A) • Marketing analytics, marketing strategy, and social media/online marketing

Ronald W. Niedrich (M) • Consumer judgment and decision making, quantitative modeling, research methods
Dan H. Rice (6A) • Marketing strategy
Jianan Wu (M) • eCommerce, marketing models, international marketing

Degree Programs

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Doctorate

Business Administration, PhD (Marketing Concentration)

Doctor of Philosophy (PhD) in Business Administration with a concentration in Marketing (PBDM)(GMKT)

The PhD program (PhD in business administration with a concentration in marketing) is a year round program (fall, spring, and summer) for full-time study. The program consists of 21 semester hours of marketing course work, 12 semester hours in a minor area, six semester hours in a support area, and 18 semester hours of "common body of knowledge" course work covering all other business disciplines. Students should plan to spend two to three academic years (fall, spring, and summer) to complete course work and devote summer terms to advance their research with fellow doctoral students and faculty members. Upon completion of major coursework, students must pass a written qualifying exam and an oral exam. Each PhD candidate is also required to design, implement, and complete an original dissertation under the supervision of a marketing faculty member. Overall, the PhD program normally requires four years to complete.

Please refer to two websites for (1) additional details about the program (business.lsu.edu/Marketing/Pages/PhD-Marketing.aspx) and (2) the typical course work completed during the four year program (business.lsu.edu/marketing/Pages/PhDCurriculum.aspx).

Mass Communication (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Manship School of Mass Communication has a 100-year tradition of communication education and a world-class faculty equipped to carry out advanced training and research. The school counts among its graduates many journalists, corporate executives, agency heads, political consultants, and other leaders in mass communication. Alumni are active in mobilizing public support for the school, providing internships, and assisting students with career advice.

The school's faculty has been recognized for its high level of scholarly productivity. In addition, the school is home to the nation's only doctoral program in media and public affairs in partnership with the Department of Political Science.

Professional mass communication programs offered by the school at the master's level feature an appropriate theoretical and applied research foundation relevant to those who will shape the information age. The emphasis on applied research also means graduate students will have the opportunity to be involved in public service and research through the Reilly Center for Media & Public Affairs and seminars in journalism, advertising, public relations, political communication, broadcasting, and Internet technologies.

Diversity is a major focus of the school. Some graduate students are selected to participate in The Forum on Media Diversity (www.mediadiversityforum.lsu.edu), a comprehensive resource on media diversity research and issues for both the media and scholars.

Administration

Master of Mass Communication & Juris Doctorate/Diploma in Civil Law Dual Degree

The Manship School and the LSU Law Center offer a concurrent degree program through which a student may receive both a Master of Mass Communication degree and a Juris Doctor/Diploma in Civil Law in approximately four years. This dual degree program is designed for those who wish to specialize in First Amendment law or to work as professionals in mass communication in fields related to law. For completion of the Master of Mass Communication degree within the dual degree program, a total of 34 credit hours are required, including 10 hours of core courses, nine hours of elective courses within the Manship School, nine hours of electives within the LSU Law Center, and six hours of thesis research. In addition, students must complete and defend a thesis. (For information about the requirements for the JD/DCL degree, please consult the LSU Law Center.)

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for the PhD program are accepted for the fall semester only; applications for the master's programs are accepted for the fall and spring semesters, although most students begin the program in the fall semester. Applicants must adhere to the application deadlines established by the Graduate School. Applicants for all programs are evaluated only after supporting documents and credentials are received.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, three letters of recommendation, a statement of purpose, a resumé, and writing samples. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Beginning Fall 2013, graduate students in mass communication are required to have their own wireless Internet access laptop computer upon entering either the master's or the doctoral program. Information regarding the type, specifications, and software may be obtained on the Manship website (www.manship.lsu.edu) or from 211 Journalism Building.

Further information concerning admission or program requirements may be obtained from the Manship School's associate dean for graduate studies and research or online at www.manship.lsu.edu.

Financial Assistance

Financial assistance is available to some students. The Manship School offers financial aid in the form of graduate assistantships. The stipend for master's students is \$10,500 for nine months. For doctoral students the stipend is \$24,000. In addition, graduate assistants receive a full tuition exemption and a stipend toward the cost of an LSU-administered health insurance plan. Assistants

who are on contract for the academic year may also receive a tuition exemption for the following summer semester. Students are responsible for paying applicable fees. To ensure consideration for financial aid, all application materials should be submitted by **January 25** for the fall semester for the PhD, and in accordance with deadlines established by the LSU Graduate School. Master's degree program admission is on a rolling basis for start in the fall or spring semester, but not summer.

Facilities

Graduate students in the Manship School have access to a full range of Internet, e-mail, word processing, graphic layout/desktop publishing, SPSS, digital camera, visual communication, nonlinear editing, and other computer- and electronic media-linked peripherals. Staff members are available for instructional and consulting purposes. Graduate students also have opportunities to work with the Reilly Center for Media & Public Affairs and the Manship School Research Facility, which includes the Public Policy Research Lab and the Media Effects Lab.

Student Organizations

The Mass Communication Association of Graduate Students (MAGS) is a social and support group especially for graduate students. All full-time or part-time students in the school are eligible to join. The association's primary purposes are to act as an effective channel of communication between graduate students and faculty; serve as an educational resource; undertake an annual service project; assist with fundraising and promotional events; and engage in networking, career planning, and social activities.

Other school-sponsored organizations open to graduate students include the American Advertising Federation, Association of Black Communicators, Public Relations Student Society of America, Radio/Television News Directors Association, Society of Professional Journalists, and Association of Hispanic Journalists.

Graduate Faculty

Jinx Broussard (M) • Public relations, journalism history, diversity

Jerry Ceppos (7M) • Media ethics, management, newspapers

Erin Coyle (6A) • Media law, ethics

Nicole Dahmen (M) • Visual communication, media ethics, science communication

Louis Day (M) • Media law, ethics

Margaret DeFleur (M) • Mass communication theory, media effects, health communication

Johanna Dunaway (M) • News media and politics, institutional and economic influences on political news content

Craig Freeman (M) • Media law and ethics, freedom of expression and broadcasting

Roland F. Garay (EM) • Journalism history

Kirby Goidel (M) • Media and politics, research

Joshua Grimm (6A) • Journalism, television news, media and gender

John Hamilton (M) • Journalism, media history, foreign reporting

Ralph Izard (EM) • Philosophy of the press, journalism

Yongick Jeong (6A) • Advertising, media effects, international communication

David Kurpius (M) • Electronic journalism, public journalism, media and minorities, new technology

Lisa Lundy (M) • Public awareness and understanding of science, environmental communication, organizational communication

Christopher Mann (6A) • Political communication, experimental methods, political campaigns

Robert Mann (M) • Political communication, political history, American history

Andrea Miller (M) • Television news, information processing, ethics

Jensen Jo ann Moore-Coople (6A) • Public relations, digital media

Hyojung Park (6A) • Public relations, quantitative methodology

Raymond Pingree (6A) • Visual communication, political communication, mass communication theory and research

Lance Porter (M) • New media effects, interactivity, Internet effects on society, advertising and public relations, interactive branding

Amy Reynolds (M) • Media law, first amendment history, media sociology, media and terrorism

Meghan Sanders (M) • Public relations, advertising, mass communication theory and research

Rosanne Scholl (6A) • Political communication, news framing effects, economic communication, public opinion research
Judith Sylvester (M) • Research methods, scholastic journalism, news reporting, media theory
Kasey Farris Windels (6A) • Advertising, digital media

Masters

Mass Communication, MMC

(MMC)

The Master of Mass Communication (MMC) degree requires 34 graduate credit hours, including 13 hours of core courses, nine hours in an appropriate track, six hours of electives, and six hours devoted to thesis research or a professional project. Or, as a final requirement for the degree, students may take a comprehensive examination (and a total of 12 hours of elective courses). While flexibly structured to serve a student's specific needs and interests, the curriculum is organized broadly to emphasize political communication, with a focus on journalism, advertising/public relations, or concentrated political communication study. For entering graduate students with little or no background in mass communication, additional prerequisite requirements may include *Legal Problems of the Mass Media* (MC 7018) or an equivalent media law course and a basic course in statistics.

Doctorate

Mass Communication & Public Affairs, Ph.D.

(PMCPA)

The PhD in mass communication and public affairs is a unique interdisciplinary degree that focuses on media and politics. The curriculum consists of 88 hours of credit, including 40 hours of required courses and a professional or research externship, and 18 hours of dissertation research within the Manship School. In addition, students complete 12 hours of elective courses in mass communication, six hours of additional advanced statistics or methodology courses, and 12 hours in an outside area of concentration. With approval, a student may receive credit for some course work completed as part of the student's master's program. Finally, students must pass a comprehensive examination (with written and oral components) and successfully defend a dissertation.

Graduate

Dual Degree: JD/MMC

Students interested are encouraged to visit the individual program site.

- **JD/DCL-MMC**

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/DCL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the website listed above.

Students successfully completing the program listed above will receive two degrees, a JD/DCL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Students wishing to pursue dual degrees must complete and submit the "Request for Dual Degree" form.

Interdisciplinary Certificate Program in Materials Science and Engineering (Graduate Program)

Program Overview

The objective of this program is to train both traditional and non-traditional students, enhancing their career opportunities in industry, government laboratories, academia, and entrepreneurship by providing them the ability to earn a certificate in materials science and engineering. This program fosters interdisciplinary education and industrial liaisons and supports a nationally competitive materials research program that will attract premier researchers and students to Louisiana and retain them.

Students participating in this certification program come from traditional departments within LSU's Colleges of Science and Engineering as well as non-traditional students from local industry and research laboratories. This program is highly interdisciplinary, involving faculty whose tenure resides in traditional departments in the Colleges of Science and Engineering.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Certificate

Materials Science and Engineering

(CMSE)

Graduate Certificate in Materials Science and Engineering

The requirements for the graduate certificate in materials science and engineering range from 12-15 credit hours and consists of five core studies from eight different departments in two colleges (College of Science and College of Engineering) providing the student exposure to the topics of:

- current topics in materials science and engineering
- thermodynamics of materials
- synthesis of materials
- analysis of materials
- simulations of materials

Mathematics (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Mathematics features vigorous programs of research and graduate education in mathematics. The department has 52 professors holding doctorates from many of the world's leading institutions (see www.math.lsu.edu/people/professors). Faculty members maintain a strong commitment to research. This results in many lively research seminars for faculty and graduate students.

The department offers doctoral study in many areas of pure and applied mathematics. Specialties include algebraic geometry, algebraic topology, knot theory, graph theory, matroid theory, optimization, control theory, partial differential equations, mathematics of materials science, scientific computing and numerical analysis, integral and evolution equations, Lie group representations, harmonic analysis, representation theory, number theory, quadratic forms, probability theory, stochastic analysis, mathematical physics, and topological algebra. Research areas are described at www.math.lsu.edu/grad/resgpps.

The department enrolls about 90 graduate students. Many graduate courses and research seminars are offered each semester. (See the link www.math.lsu.edu/grad/cur.grad.cour to see actual offerings in recent semesters.) Incoming graduate students are invited to participate in an orientation program run by the current graduate students during the two weeks prior to the beginning of classes.

National and international conferences held on campus are organized by the department's faculty research groups. The 122 students who have earned Math PhD's at LSU since 2000 have found excellent employment, as can be seen at www.math.lsu.edu/grad/postdocs.

Graduate assistants and fellows are provided with office space in the department, use of the department's extensive computer system, access to the university's computer systems, library privileges, student memberships in the American Mathematical Society, and opportunities to participate in special educational programs at national mathematical sciences research institutes, such as MSRI Berkeley.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission for the fall semester should be received with all supporting documents by the end of January. Late applicants will be considered so long as openings remain. Complete detailed departmental instructions for application are given at www.math.lsu.edu/dept/grad/applprocd, which includes a timetable for decisions and a list of average criteria met by successful applicants recently. Applicants must adhere to the application deadlines and requirements established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous college and/or graduate study, GRE general test scores, and three letters of recommendation. These letters are very important and should be written by professors who can attest from direct knowledge to the applicant's readiness for graduate study in mathematics. A statement of purpose presenting the

student's mathematical experience, interests and goals must be provided. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

The Department offers a wide variety of financial aid in the form of teaching assistantships, research assistantships, fellowships and traineeships. These are detailed at www.math.lsu.edu/dept/grad/funding There is a required "Statement of Purpose" which must be included as part of the application. It is needed so that the department can ascertain whether the student's experience, preparation and goals are compatible with the department's research interests and programs. To ensure consideration for all available forms of financial aid, all application materials, with full supporting documents, should be submitted through the online application site for the LSU Graduate School, www.lsu.edu/gradapply, and in accordance with deadlines and requirements established by the LSU Graduate School. The department will consider late applications, but offers of financial aid will be made beginning in February. Late applicants can be considered for remaining openings or for declined financial aid offers.

 Peter R. Wolenski (M) • Control theory
 Milen Yakimov (M) • Integrable systems, representation theory, and Poisson geometry
 Hongchao Zhang (6A) • Nonlinear optimization and its applications, numerical analysis, numerical linear algebra

Masters

Mathematics, M.S.

(SMATH)

The departmental-level academic course plan, including course selections, for each student must be approved by the student's advisory committee. The committee will include the student's major advisor and at least two additional members of the department's graduate faculty. The MS degree in mathematics is available as both a non-thesis and a thesis degree. There is also a thesis MS with concentration in applications as well as a thesis MS with a concentration in finance. These four options entail different requirements.

- The non-thesis MS in mathematics requires 36 semester hours, of which at least 24 hours must be in mathematics and at least 18 must be in mathematics courses numbered 7000 or higher. Every non-thesis MS student must pass the department's written comprehensive examination, which is administered twice annually and is described at www.math.lsu.edu/grad/gradexams. Doctoral students in mathematics normally earn a non-thesis MS during the first two years of enrollment in the PhD program, described below.
- The thesis MS in Mathematics without concentration is based on breadth of exposure in mathematics. The graduate course work requirement is 36 semester hours, six of which will be thesis credit. Of the 36 hours, at least 24 must be in mathematics, and at least 18 of those 24 hours must be at the 7000- level or higher. The courses must satisfy requirements listed at www.math.lsu.edu/grad/degrees. The chair of the student's advisory committee will be the thesis advisor. The thesis must be an original and interesting contribution to the field, a worthwhile and useful expository work, or a substantial application of mathematics. An oral thesis defense is required as the final examination for this program.
- The thesis MS in Mathematics with concentration in applications requires 30 semester hours of graduate credit, 24 hours of which must be in graduate level classes, and six in thesis research. At least 15 of the 30 semester hours have to be in courses numbered 7000 or above. The six hours of thesis are counted toward this requirement. Of the required 24 semester hours of course work, a minimum of 12 must be taken in the Department of Mathematics, nine of which must be at the 7000 level. The

remaining 12 hours must be in approved elective courses, and at least six of these hours must be in approved courses related to the thesis. The courses must satisfy requirements listed at www.math.lsu.edu/grad/degrees.

- The Master of Science in mathematics with concentration in finance requires a total of 36 credit hours of which six hours are thesis credit. The curriculum is intended to provide specialized master's-level training for individuals seeking employment in today's sophisticated financial markets requiring substantial knowledge of graduate level mathematics. The curricular requirements are presented in detail at www.math.lsu.edu/grad/msconfin.

Doctorate

Mathematics, Ph.D.

(PMATH)

The requirements for the PhD degree in mathematics include demonstrating a mastery of a broad area of mathematics and writing a dissertation making an original and substantial contribution to mathematics. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's advisory committee each semester. Specific requirements for the PhD degree in mathematics include:

- Passing the PhD-qualifying examination no later than the second year of study, unless a postponement is allowed by the graduate committee. This examination, based on the department's core curriculum, is described in detail at www.math.lsu.edu/grad/gradexams.
- Completion of the breadth requirement. Breadth courses are described in detail at www.math.lsu.edu/grad/gradcurricula.
- Satisfying the departmental language requirement.
- Passing the oral general examination, conducted by the student's advisory committee, by the end of the third year of study, unless a postponement is allowed by the graduate committee.
- Writing a dissertation and passing the final examination, which is primarily a doctoral dissertation defense. This examination is conducted by the student's advisory committee, chaired by the student's major professor.

Mechanical Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The graduate program of Mechanical Engineering (ME) in the Department of Mechanical & Industrial Engineering (MIE) encompasses the areas of mechanical systems, thermal-fluid science, materials science and engineering, and microsystems. The graduate faculty works closely with graduate students in research projects that cover both traditional and nontraditional areas. Graduate students are engaged in experimental, numerical, and modeling studies and can select their course work from mechanical engineering and other departments, in consultation with their advisory committees. Students have access to excellent laboratory facilities and equipment, as well as to extensive computer systems, both in the department and on the LSU campus. Mechanical engineering graduates are prepared for employment in industries, universities, state and federal government, and the private sector.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Evaluation will be completed by the department within two months of receipt. Applicants must adhere to the application deadlines established by the Graduate School. The department's deadline is generally two weeks before the application deadlines established by the Graduate School. Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE and TOEFL, IELTS, or PTE exam scores, and three letters of recommendation. The admission requirements of the department are in addition to those of the Graduate School and are generally more restrictive. Typically, a minimum undergraduate grade point average of 3.0 ("A" = 4.0) and a GRE (verbal + quantitative) score of 300-310 are required. Applications with a Quantitative Reasoning GRE score below the 80th percentile will not be considered unless petitioned by an ME faculty member.

International students whose native language is not English must have a TOEFL score of at least 550 on the paper-based test, a 213 on the computer-based test, or a 79 on the Internet-based test, an IELTS score of 6.5; or PTE score of 59.

As deciding on admissions and assistantships as well as taking care of visa formalities take considerable time, potential students are advised to apply as early as possible, usually six to nine months in advance of the semester in which they wish to enroll.

Financial Assistance

Financial assistance is available to some students. Support may be available through the department in the form of research or teaching assistantships. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School. Research assistants take active part in research activities and projects as directed by relevant faculty members advising the assistants. Research assistantships are negotiated and eventually offered through direct discussions between the student and faculty members.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Sumanta Acharya (M) • Numerical and experimental heat transfer, fluid mechanics, combustion

Stuart R. Bell (M) • Thermal-fluids with application to combustion and heat engines, alternative fuels for engines, fuel cells, modeling of engine and engine processes, innovative engine designs, and fundamental and applied combustion topics

Tryfon Charalampopoulos (M) • Heat transfer, combustion, laser diagnostics

Marcio de Queiroz (M) • Nonlinear control theory and applications; active magnetic and mechanical bearings; biological and biomedical system modeling and control

Ram Devireddy (M) • Bioheat and mass transfer, tissue engineering, biological fluid flow, cryopreservation of cells and tissues

Keith Alan Gonthier (M) • Theoretical and computational fluid dynamics; combustion; continuum mechanics; multi-phase flow; gas dynamics.

Shengmin Guo (M) • Fluid sciences, thermal engineering

 Ingmar Michael Schoegl (6A) • Combustion; thermochemical energy conversion (fuel reforming, gasification); alternative fuel sources (biofuels, biomass); solid-oxide fuel cells
 Glenn Sinclair (M) • Fracture mechanics, tribology and contact problems, numerical methods
 Warren Waggenspack Jr (M) • Computer-aided geometric design (CAGD), computer-aided engineering for biomechanical engineering, machine design, education, microsystems
 Muhammad Wahab (M) • Fatigue and fracture mechanics, stress analysis, computational plasticity, structural integrity
 Wanjun Wang (M) • MEMS, microsensors, microactuators
 Ying Wang (6A) • Energy conversion and storage systems; electrochromic displays; nanostructured materials; functional ceramics; atomic layer deposition and chemical vapor deposition
 Eyassu Woldeesenbet (M) • Nanocomposites, Composite materials, solid mechanics, sandwich composites, self-healing materials, nondestructive evaluation
 Harris Wong (M) • Fluid mechanics, heat transfer, interfacial phenomena, solid films, two-phase flow in porous media, human tear film, spectral and boundary integral methods

Masters

Mechanical Engineering, M.S.ME

(MME)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

Thesis Option

The degree is a thesis degree requiring a written thesis with the approval of the student's major professor and advisory committee. Twenty-four hours of credit at the graduate level must be earned including a maximum of six hours of credit for the thesis. The curricular requirements include:

- At least nine credit hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A minimum of five courses in ME.
- A primary area consisting of a minimum of nine hours of earned credit in a specified field of study in one of the following areas: thermal sciences, mechanical systems, or materials science and engineering.
- A minimum core requirement of three credit hours outside the student's primary area of specialization
- One course (three credit hours) in mathematics.
- One credit hour of the ME Graduate Seminar (ME 7901) every semester, except for circumstances as stated below:

- Please Note: The seminar attendance requirement for part-time students will be for one semester only. The seminar course (ME 7901) attendance requirement is waived for any student, after the date when he/she has successfully defended his/her thesis, or while he/she is participating in an out-of-state internship or out-of-state student exchange program under approval of his/her major professor. If this condition is met for an entire semester, the registration requirement is waived.
- The major professor and advisory committee must approve all course selections.
- In addition, the student is required to present his/her research results at a departmental forum before graduation, usually during the final semester in residence. This is done in the annual departmental Graduate Student Research Conference (GSRC) prior to graduation.

The student must pass a final exam consisting of a thesis and a comprehensive oral exam. At the discretion of the student's advisory committee, a written exam may be required.

Non-Thesis Option

The degree is a non-thesis degree requiring a special project. Thirty-six hours of credit at the graduate level must be earned including a maximum of three hours of credit for the special project under ME 7903. The non-thesis option is considered to result in a terminal degree in a technical field. It is appropriate for practicing and/or employed engineers who wish to acquire advanced background and knowledge in chosen subject areas without having the need to pursue rigorous research. The degree can be earned with a part-time departmental-level academic course plan. It is generally not available to international students under student visa (F1) category.

The curricular requirements include:

- At least 18 credit hours at the 7000 level or above.
- A minimum of six courses must be taken of mechanical engineering core courses with at least one course from each of the three areas of specialization: thermal sciences, mechanical systems, and materials science and engineering.
- One course (three credit hours) in mathematics.
- An additional 12 credit hours as approved by the advisory committee, to achieve depth in one or more areas
- A grade "B" or above in each course in order for the course to qualify toward the degree requirements.
- One credit hour of ME Graduate Seminar (ME 7901) every semester. The seminar attendance requirement for part-time students will be to register and attend for one semester. The seminar course (ME 7901) attendance requirement is waived for any student, after the date when he/she has successfully completed his/her final exam, or while he/she is participating in an out-of-state internship or out-of-state student exchange program under approval of his/her major professor. If this condition is met for an entire semester, the registration requirement is waived.

Additionally, the student must declare his/her intent to join the MS non-thesis option before beginning his/her departmental-level academic course plan. If the student is in the non-thesis option, he/she will not be eligible for any financial aid from the department or college. If the student is currently in the thesis option and has received financial support from the department, he/she will not be permitted to switch to the non-thesis option.

The student must pass a final exam consisting of a special project and a comprehensive oral exam (three credit-hour project under ME 7903, a report approved by the major professor and advisory committee). This report is used in the final exam as a document to portray ability to do in-depth analysis of a Mechanical Engineering topic.

Doctorate

Mechanical Engineering, Ph.D.

(PME)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty plus the dean's representative such that the LSU Graduate School's requirements for graduate committees are satisfied.

The doctoral degree requires a dissertation. If the student is deemed eligible by the ME Graduate Studies Committee to enter the PhD program directly from a BS degree, he/she will be required to take a minimum of 36 hours of coursework (not S/U graded coursework) and 18 hours of dissertation research (ME 9000). If the student has earned a recognizable MS degree with at least 24 hours of graduate level courses applicable to the proposed doctoral program, he/she may be allowed to transfer up to 24 hours of credit upon approval by the major professor and the student's advisory committee, which will count on the requirement of a minimum of 36 hours of coursework. Coursework must be approved by the major professor and the student's advisory committee, as evidenced by the certification of the departmental plan of study form and The Graduate School Doctoral Degree Audit Form.

The curricular requirements include:

- At least nine hours at the 7000 level or above if the student has earned a MS Degree, exclusive of independent studies (ME 7903) credits unless petitioned beforehand and approved by major advisor/GSC/chair, and at least 18 hours at the 7000 level or above if the student has entered the PhD degree directly from a BS degree, exclusive of any type of independent studies credit except for special project credit earned.
- A minimum core requirement of nine credit hours in thermal sciences, mechanical systems, or materials science and engineering. for students with a MS degree.
- A minimum core requirement of 12 credit hours in thermal sciences, mechanical systems, or materials science and engineering, along with 21 credit hours of technical electives (related to the student's research area and approved by the advisory committee), and a minimum of three credit hours in mathematics, if direct to PhD degree from BS degree.
- Completion of the PhD qualifying exams and passing in a minimum of three areas (mathematics + two (2) topics) to continue with PhD program (areas will be selected in conjunction with the major professor) – prepare for and take them by the end of the student's first year (Passing of these exams is a prerequisite for taking the general exam - complete all the qualifying exam requirements within two years (three years for direct PhD students) prior to scheduling the general exam.
- Scheduling the general exam upon completion of essentially all course work (not before the last semester of course work) with a detailed research proposal. PhD candidates are required to take their general exam within 15 months after they completely satisfy the requirements for the qualifying exam.
- Enrollment in the seminar course, ME 7901, every semester is a requirement; however, the seminar course attendance requirement is waived for any student, after the date when he/she has successfully defended his/her dissertation, or while he/she is participating in an out-of-state internship or out-of-state student exchange program under approval of his/her major professor. If this condition is met for an entire semester, the registration requirement is waived.
- Presenting a seminar before graduation, discussing the major results of your research at a regular meeting of the ME graduate student seminar and/or in the Graduate Student Research Conference(s).

The student must pass a general/qualifying/final exam consisting of a dissertation and a comprehensive oral exam. At the discretion of the student's advisory committee, a written exam may be required.

Music (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The School of Music is committed to the education and training of performers, researchers, scholars, educators and creators for careers as creative professionals and leaders. The full range of performance, creative, and research opportunities for student and faculty collaboration elevate opportunities for discovery and growth. That is the global benefit of joining a large and vibrant performing arts community.

The School of Music at LSU has a tradition of placing its graduates in positions as professors at leading institutions' of higher learning, as leaders of organizations in the creative arts, performers in professional ensembles, and as active contributors to the creative economy in new and emerging fields. Acceptance into and enrollment in a graduate program at LSU places students into a cadre of scholars, creators, researchers, and performers that have access to a campus of talented peers. Opportunities are presented to develop transferable skills that enhance access to traditional positions in the creative arts. But perhaps more importantly is the ability to become involved in emerging areas fueled by societal, economic and global shifts. Aligning current curricula with emerging possibilities in communication, technology, pedagogy and entrepreneurship is at the core of student education in the School of Music.

Opportunities are provided for performance with such major ensembles as the LSU Symphony Orchestra, the Wind Ensembles, the Jazz Ensembles, the LSU A Cappella Choir, and LSU Opera. Electronic studios and laboratories enhance composition and research endeavors, and the full resources of Middleton Library as well as the university's Special Collections provide materials for research supporting academic pursuits. Additional special events, such as the annual Festival of Contemporary Music, involve world-renowned artists from around the globe, celebrate creative and performance activities, and bring all into focus.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants for admission to graduate programs in the School of Music must meet all the requirements of the Graduate School. The Graduate Record Examination (GRE) is required for all doctoral programs as well as for the master of music programs in musicology and music theory.

Admission to the graduate program in performance is based on an audition and interview. Applicants for degrees in composition must submit musical scores for review prior to consideration of admission. Applicants in music theory, musicology, and music education must submit examples of research and schedule an interview with faculty prior to consideration of admission. For a detailed description of all admission requirements please see the school website referenced above.

Financial Assistance

All applicants will be considered for a graduate assistantship and other financial assistance if available. Assistantships may involve teaching, research, or service. Notification of assistantship and other financial assistance awards are usually made in

March for the following academic year. Assistantship awards range from \$6,000 to \$10,000. Nomination of applicants who qualify for fellowship consideration will be made by the major professor in the area of concentration and the director of graduate studies.

Jesse Allison (6A) • Electronic Music/Digital Media
Lori Bade (7M) • Voice, Director of Graduate Studies
Sarah Bartolome (6A) • Choral music education
Inessa Bazayev (6A) • Theory
Edgar Berdahl (6A) • Electronic Music/Digital Media
Stephen David Beck (M) • Composition, electronic music and digital media
Michael Borowitz (6A) • Opera
Brett Boutwell (6A) • Musicology
Melissa C. Brunkan (6A) • Voice
James Byo (M) • Instrumental music education, research in music teaching
Griffin M. Campbell (M) • Saxophone
Larry B. Campbell (EM) • Trombone
Constance Carroll (EM) • Piano
Jane Cassidy (M) • Elementary music education, research in music teaching
Deborah S. Chodacki (M) • Clarinet
C. Dinos Constantinides (M) • Composition
Johanna Cox (7M) • Oboe
Willis L. Delony (M) • Jazz studies, piano
John Dickson (M) Director of Choral Studies
Brett Dietz (7M) • Percussion
W. Kenneth Fulton (EM) • Choral performance, choral literature, advanced conducting
Andreas Giger (M) • Musicology
Elias Goldstein (6A) • Viola
Robert Grayson (M) • Voice
Jan Grimes (3P) • Collaborative piano
William F. Grimes (M) • Jazz studies
Jack F. Guerry (EM) • Piano
Michael Gurt (M) • Piano
Terry Patrick-Harris (3P) • Voice
Lin He (M) • Violin
Jan W. Herlinger (EM) • Medieval and Renaissance music and music theory, 20th century music, aesthetics
Blake Phillips Howe (6A) • Film music, Schubert, disability studies
Dennis Jesse (3A) • Voice
Katherine Kemler (M) • Flute
Jerzy S. Kosmala (EM) • Viola
Espen Lilleslatten (7M) • Violin
Dennis Llinas (6A) • Conducting/Wind Ensembles/Athletic Bands O
Dugg McDonough (7M) • Opera
Alison McFarland (M) • Musicology
Wallace C. McKenzie Jr (EM) • Musicology
Steven M. Menard (6A) • Trombone
Sandra E. Moon (6A) • Voice
Richard Norem (EM) • Horn
Patricia O'Neill (EM) • Voice, diction, literature
Seth Orgel (7M) • Horn
Evelyn Orman (M) • Music education technology

Dennis Neil Parker (M) • Cello, string chamber music
Robert Peck (M) • Music Theory
Jeff Perry (7M) • Theory
Pamela Pike (6A) • Piano Pedagogy
Carlos Riazuelo (7M) • Orchestra performance, orchestral literature, advanced conducting
Ronald D. Ross (EM) • Music Theory
Brian Shaw (M) • Trumpet, jazz studies
Loraine Sims (7M) • Voice
Gregory Sioles (M) • Piano
Joseph W. Skillen (7M) • Tuba/euphonium
David H. Smyth (M) • Music Theory
Herndon Spillman (M) • Organ
Yung-Chiao Wei (M) • Double bass
Frank B. Wickes (EM) • Wind ensembles, Tiger Band
Cornelia Yarbrough (EM) • Music Education

Performance Ensembles

Performance opportunities in the School of Music are enhanced by many excellent ensembles, including the following:

- LSU Symphony Orchestra
- LSU Wind Ensembles and Tiger Marching Band
- LSU Opera
- LSU A Cappella Choir, Chamber Choir
- LSU Jazz Ensembles`

Faculty Research

Members of the School of Music are active in numerous areas of research and creative activity, including composition, national and international performance, masterclasses, and scholarly research. By invitation, the performance faculty have presented in concerts, recitals, and at conferences world premieres of new compositions. On a regular basis and in both national and international venues, faculty members perform solo recitals as well as with ensembles ranging from chamber groups, symphony orchestras, and opera companies. The majority of our faculty have produced professional recordings with several having earned the distinction of winning or being Grammy-nominated. This excellence of research, training, and example has influenced many graduate students in the School of Music to also produce their own professional CD or DVD. Music by faculty composers is frequently performed nationally and internationally, and is published and recorded on highly respected recording labels.

Members of our faculty serve as editors or members of editorial boards for major research journals and all serve as adjudicators for competitions. Our music education, music theory, and musicology faculties regularly present their work at regional, national, and international conferences, publish books and articles and oversee editions, journals, and databases which represent the dissemination of cutting edge research in music. These faculties are respected authorities in the areas of instrumental music education, elementary music education, research in music teaching, the composer Giuseppe Verdi, Medieval and Renaissance music, 20th Century music and aesthetics, and contemporary theoretical matters.

Masters

Music, M.M.

(MMUS)

Master's Programs

The School of Music offers the Master of Music (MM), the Doctor of Musical Arts (DMA), and the Doctor of Philosophy (PhD) in music. Specializations at the master's level are: brass performance, choral conducting, collaborative keyboard, composition, jazz studies, music education, music theory, musicology, orchestral conducting, organ performance, percussion performance, piano pedagogy, piano performance, string performance, vocal performance, wind conducting, and woodwind performance.

The Master of Music degree at LSU requires a minimum of 30 credit hours of graduate course work (33 for the master's in music theory). Up to six hours of graduate credit may be transferred from another institution if such credit satisfies required or elective course work at LSU and is approved by the area faculty. The master's degree must be completed within five years. The majority of the required course work will be selected from courses at the 7000 level with minimal number of credit hours selected from 4000 level courses that carry graduate credit.

A thesis is required for the master's degrees in Composition, Music Theory and Musicology and is selected by registering for six credit hours of the thesis course number 8000. The thesis is an option for the master's degree in Music Education and is selected by registering for six credit hours of the thesis course number 8000.

Additional information regarding specifics of each master's degree offered may be found in the *School of Music Graduate Handbook* by accessing the school's website.

Doctorate

Music, D.M.A.

(DMUS)

DMA

DMA specializations are: brass performance, choral conducting, orchestral conducting, organ performance, percussion performance, piano performance, string performance, vocal performance, wind conducting, and woodwind performance.

The Doctor of Musical Arts degree at LSU requires a minimum of 60 credit hours of graduate course work. Up to six hours of graduate credit may be transferred from another institution if such credit satisfies required or elective course work at LSU and is approved by the area faculty. The DMA degree must be completed within seven years. The majority of the required course work will be selected from courses at the 7000 and 9000 levels with minimal number of credit hours selected from 4000 level courses that carry graduate credit.

The options of *Monograph* (MUS 9009) and *Lecture Recital With Written Document* (MUS 9010) are available for all DMA degrees except the choral and wind conducting specializations. The monograph option requires nine credit hours of MUS 9009 and the lecture recital with written document option requires six to nine credit hours of MUS 9010.

Additional information regarding specifics of each Doctor of Musical Arts degree offered may be found in the *School of Music Graduate Handbook* by accessing the school's website.

Music, Ph.D.

(PMUSC)

PhD

PhD specializations are: composition, experimental music & digital media, music education, musicology, and music theory.

The Doctor of Philosophy degree at LSU requires the following minimum number of credit hours of graduate course work for each of the following specializations:

Composition: 48 hours beyond a 30-hour master's degree in music. This degree is offered to students who show promise as outstanding composers.

Experimental Music & Digital Media: 60 hours beyond a 30-hour master's degree in music. This degree is designed to prepare students to be composers, performers or music researchers whose work explores music technology, digital media and experimentation in either professional or academic settings. Graduates will also be prepared to teach electroacoustic music, digital media and music technology at the college-university level.

Music Education: 53 hours beyond a 30-hour master's degree in music. This degree is offered to students who show promise as outstanding researchers and master teachers of music. The degree is awarded to candidates who complete the course of study with distinction, demonstrating outstanding ability in original research, scholarly study, and excellence in teaching.

Music History: 51 hours beyond a 30-hour master's degree in music. This degree is intended to develop in students the knowledge, concepts, and techniques for musicological research and to prepare students for teaching music history at the college/university level.

Music Theory: 51 hours beyond a 30-hour master's degree in music. This degree is intended to develop in students the knowledge, concepts, and techniques for research in music theory and to prepare students for teaching at the college/university level.

The Doctor of Philosophy degree must be completed within seven years. The majority of the required course work will be selected from courses at the 7000 level with minimal number of credit hours selected from 4000 level courses that carry graduate credit. The dissertation is required for all PhD degrees and requires a minimum of nine credit hours of MUS 9000.

Additional information regarding specifics of each Doctor of Philosophy degree offered may be found in the *School of Music Graduate Handbook* by accessing the school's website.

Interdisciplinary Program in Natural Sciences (Graduate Program)

Program Overview

The Master of Natural Sciences (MNS) degree, administered through the Graduate School in conjunction with the College of Science, provides the depth and breadth of study in the sciences that is required of science professionals and school teachers. The MNS program allows a combination of coursework from allied fields. For instance, certified teachers seeking the MNS can tailor their Plan of Study to include courses needed for add-on certifications in additional subject areas, or professionals in STEM intensive areas (e.g., medical technology, pre-med, forensics, environment, and computation in science) may take an array of courses to enhance their job capabilities.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party

sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Graduate Faculty

(check current listings by department by clicking [this link](#))

The graduate faculty for the MNS program includes all graduate faculty in the following cooperating departments and schools:

- Animal Science
- Biological Sciences
- Chemistry
- School of Electrical Engineering and Computer Science
- School of Education
- Entomology
- Environmental Sciences
- Geography & Anthropology
- Geology & Geological Sciences
- Mathematics
- Oceanography & Coastal Sciences
- Plant, Environmental & Soil Sciences
- Physics & Astronomy
- Plant Pathology & Crop Physiology
- Renewable Natural Resources

Masters

Natural Sciences, M.N.S.

(MNS)

Both a non-thesis and thesis option are available. A student in the MNS program must develop, by the end of the second semester or upon completion of 15 or more hours of credit, a Plan of Study together with an advisor in the College of Science that must have approval of the MNS program administrator.

Non-Thesis Option: The non-thesis option must include at least 36 semester hours of graduate courses distributed as follows:

- at least 18 semester hours must be in a primary focus area in a natural science or mathematics in a cooperating department marked with an asterisk* below
- to provide breadth of knowledge, at least 6 hours of electives have to be taken in fields closely related to the focus area, but not necessarily within the focus area or within the cooperating departments and schools

- at most 12 hours can be taken in a secondary area that supports a cohesive plan of study and the professional and academic goals of the student. The courses in the secondary area must be offered by a cooperating department or school (see listing below).

At least 18 of the total 36 semester hours must be in courses numbered 5000 or above and six of these 18 must be in the focus area. Courses below the 4000-level cannot be counted. Courses at the 4000-level can be counted only if they are taken as graduate courses. Although a modest number of hours in independent study or research courses are allowed, a student may not apply thesis research (8000) hours to this degree track. A comprehensive final oral exam administered by the student's committee is required to complete the degree.

Thesis Option: Requirements for the thesis option include 24 semester hours of graduate course work, and six semester hours of thesis credit. Of the 24 hours of graduate course work:

- at least 9 must be at or above the 5000 level
- at least 12 must be in a primary focus area in a natural science or mathematics in a cooperating department marked with an asterisk* below
- at most 12 hours can be taken in a secondary area that supports a cohesive plan of study and the professional and academic goals of the student. The courses in the secondary area must be offered by a cooperating department or school (see listing below).

The thesis must be directly related to the focus area. The final oral exam will include a defense of the thesis.

Participating Departments

Animal Science*
Biological Sciences*
Chemistry*
School of Electrical Engineering and Computer Science
School of Education
Entomology*
Environmental Sciences*
Geography & Anthropology*
Geology & Geological Sciences*
Mathematics*

Plant, Environmental & Soil Sciences*
Plant Pathology & Crop Physiology*
Renewable Natural Resources*

Oceanography & Coastal Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The Department of Oceanography & Coastal Sciences offers both Master of Science (MS) and Doctor of Philosophy (PhD) degrees in the disciplines associated with an understanding of oceanic, coastal, and wetland processes. Faculty in the department

collaborate with scientists throughout the university including those in the departments of Biological Sciences, Geology & Geophysics, Geography & Anthropology, Civil & Environmental Engineering, Mechanical Engineering, Environmental Sciences, and Experimental Statistics. Faculty members also consult with researchers in the Louisiana Universities Marine Consortium (LUMCON), Louisiana Sea Grant, and universities and research centers worldwide. These interactions assure the availability of a variety of major/minor graduate degree options.

The interdisciplinary and multidisciplinary nature of the field is stressed and graduate programs are sufficiently flexible to meet the needs of students. Emphasis is on understanding and practical application of knowledge concerning the physical, chemical, geological, meteorological, ecological, and fisheries aspects of environments identified as ocean, deltaic, estuarine, and wetland. The department has 22 faculty, nine emeritus faculty, 16 adjunct faculty, and more than 60 graduate students whose diverse interests assure a well-rounded graduate experience. Through LUMCON, the department has access to modern, comprehensive field facilities and summer field courses. Logistical support for field work is available from the School of the Coast & Environment's Field Support Services and Coastal Studies Institute shops, which maintain a fleet of small boats and trucks and have fabrication facilities for the production of certain types of field equipment. Detailed information on departmental programs and faculty research interests may be obtained from our website or by contacting the department's graduate advisor.

Administration

Minors

Graduate students majoring in other departments may elect a minor in this department. Students must meet the academic prerequisites for the Oceanography & Coastal Sciences courses they select and complete 12 semester hours, nine of which must be in formal courses not cross-listed with other departments. Six of the 12 hours must be at the 7000-level or above. A DOCS faculty member must serve as the minor professor.

The department and the Department of Environmental Sciences jointly offer a minor in Wetland Science and Management that is open to all graduate students at LSU. This minor requires 12 hours of approved courses, provides masters and doctoral students with a strong background in wetland science and policy and enhances their understanding of ecosystem processes in wetland ecosystem management.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department for fall, spring, and summer terms. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable scores, and three academic letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

All incoming students are required to have successfully completed differential and integral calculus with a letter grade of "C" or better. If an applicant has not completed these requirements by the time of enrollment in the Department of Oceanography & Coastal Sciences, they will be required to do so during the first year at LSU. This requirement can be met by taking MATH 1550 (Analytical Geometry and Calculus I) and MATH 1552 (Analytical Geometry and Calculus II) at LSU. Students specializing in Biological Oceanography may substitute MATH 1554 for MATH 1552 with the approval of their advisor and the chair. A student may register for those courses on a pass-fail basis with approval of the student's major professor, department chair, instructor of the course involved, and the dean of the Graduate School. The instructor will determine actual quality of work required to obtain a grade of "P".

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships which include a full waiver of tuition. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School. Outstanding MS and PhD applications can compete for Board of Regents Fellowships and Departmental Research/Teaching Assistantships. Full applications completed by mid-February will be considered for fellowships.

Graduate Faculty

(check current listings by department by clicking this link)

Donald M. Baltz (EM) • Fish ecology, life history, and habitat selection; marine vertebrates; passive acoustics

Sibel Bargu Ates (M) • Phytoplankton ecology, harmful algal blooms and food web interactions

Mark Benfield (7M) • Shrimp life history and ecology, zooplankton ecology, larval transport and dynamics

Jaye Cable (7M) • Marine geochemistry, coastal hydrology

Kevin Carman (EM)

Robert S. Carney (M) • Biological oceanography, research administration

Russell Chapman (EM) • Algal ultra-structure and molecular evolution and systematics, algal biofuels, and marine biodiversity

Edward Chesney (3F) • Fisheries and aquaculture

James M. Coleman (EM) • Deltaic sedimentation, riverine processes, continental shelf sediments

James H. Cowan (M) • Fisheries ecology, biological and fisheries oceanography, biometrics

Christopher F. D'Elia (7M) • Nutrient dynamics of estuaries and coral reefs; science policy

Eurico D'Sa (7M) • Marine optics, remote sensing, interdisciplinary oceanography

John W. Day Jr (EM) • Estuarine ecology, systems ecology, coastal management

Brian D. Fry (EM)

Robert P. Gambrell (EM) • Environmental chemistry of soils, sediment-water systems

James P. Geaghan (M) • Statistics and biometrics, fisheries sciences, aquatic ecology, computer science

James G. Gosselink (EM) • Wetland vegetation processes, plant ecophysiology, systems ecology

Aixin Hou (M) • Soil microbial ecology/biogeochemistry

Shih-Ang Hsu (EM) • Coastal and marine meteorology, air-sea interaction

Haosheng Huang (M) • Physical oceanography, continental shelf and estuarine dynamics, numerical ocean modeling

Oscar K. Huh (EM) • Coastal and continental shelf oceanography, marine meteorology, satellite and aircraft remote sensing methods in oceanography

Crystal N Johnson (6A) • Molecular microbiology, microbial ecology, host-pathogen interactions, outreach

Dubravko Justic (M) • Ecosystem modeling, biological oceanography, climate change

Nina S. Lam (M) • Geographic information science, remote sensing, spatial analysis, environmental and public health. Regional Interest in China

Megan Lapeyre (3F) • Fish habitats

Paul A. LaRock (M) • Estuarine pollution, microbiology, geomicrobiology, oceanography

Chunyan Li (7M) • Physical oceanography, observations and modeling

Charles Lindau (M) • Environmental chemistry, stable isotopes, wetlands
 Kam-Biu Liu (M) • Coastal paleoecology
 Kanchan Maiti (6A) • Marine geochemistry, Environmental radiochemistry, Upper ocean carbon flux, Marine particle dynamics
 Irving A. Mendelssohn (EM) • Wetland and barrier island plant ecology, plant physiological ecology
 Stephen P. Murray (EM) • Physical oceanography
 Ralph J. Portier (M) • Environmental toxicology; microbiology; bioremediation
 Joseph E. Powers (M) • Fisheries ecosystem and stock assessment modeling
 Nancy N. Rabalais (3F) • Continental shelf ecosystems, benthic ecology
 Victor Hugo Rivera-Monroy (M) • Estuarine and coastal ecosystems, biogeochemistry of wetlands, landscape modeling/ecosystem models, coastal management/aquaculture; mangrove forest rehabilitation/restoration
 Brian J. Roberts (3F) • Aquatic ecosystems
 Harry H. Roberts (EM) • Marine geology, sedimentology
 Kenneth Rose (M) • Mathematical and computer modeling of aquatic populations (fish)
 Lawrence J. Rouse Jr (M) • Coastal and shelf physical oceanography
 Paul Sammaraco (7M) • Larval dispersal and recruitment processes
 Charles Sasser (3F) • Coastal ecology, plant ecology, evolutionary biology
 Richard F. Shaw (M) • Ichthyoplankton ecology and dynamics, transport and recruitment mechanisms
 Malinda M. Sutor (3F) • Plankton ecology and physiology, biooptics, bioacoustics, physical-biological interactions
 R. Eugene Turner (M) • Biological oceanography, conservation, environmental management, estuarine ecology, wetlands
 Robert R. Twilley (M) • Ecosystem ecology, estuarine and coastal macrophyte communities, ecology and management of tropical estuarine ecosystems, mangrove ecosystems; productivity, biogeochemistry, and nutrient regeneration of coastal ecosystems
 Jenneke M. Visser (3F) • Coastal restoration; long-term trends in plant species composition and biomass as related to changes in climate, physical environment, and grazing and Wildlife habitat use and population trends.
 Nan Walker (M) • Satellite oceanography, ocean climatology, physical oceanography
 John R. White (7M) • Biogeochemical cycling of nutrients in estuaries, coastal, and freshwater wetlands
 Charles A. Wilson (EM) • Fishery science, fisheries biology, artificial reef ecology, mariculture
 William J. Wiseman Jr (EM) • Shelf and estuarine dynamics
 Kehui Xu (6A) • Coastal processes, sediment transport, sedimentology, and sequencing stratigraphy

Masters

Oceanography & Coastal Sciences, M.S.

(SOCS)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a thesis degree. Twenty-four hours of course work at the graduate level must be earned including a maximum of six hours of credit for the thesis research project for a grand total of 30 credit hours. The curricular requirements include:

- At least 15 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A primary area consisting of a minimum of 12 hours of earned credit in a specified field of study.
- One credit hour of OCS 4030.
- A minimum core requirement of 12 credit hours in biological, chemical, geological and physical oceanography.
- A 36-hour non-thesis option is also available.

The student must pass a final exam consisting of a comprehensive oral exam and an optional written exam. At the discretion of the student's advisory committee, a written exam may be required.

Doctorate

Oceanography & Coastal Sciences, Ph.D.

(POCS)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least three additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a PhD degree. Forty-eight hours of course work at the graduate level must be earned including a maximum of nine hours of credit for the dissertation research project for a total of 57 credit hours. The curricular requirements include:

- At least 29 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A minor consisting of a minimum of 12 hours of earned credit in a specified field of study.
- A minimum core requirement of 12 credit hours in biological, chemical, geological and physical oceanography.

Other specific degree requirements include one credit hour of OCS 4030.

The student must pass a final exam consisting of a comprehensive oral exam and an optional written exam.

Pathobiological Sciences (Graduate Program)

Program Overview

The graduate academic and research programs of the Department of Pathobiological Sciences (PBS) are designed to develop intellectual abilities and research skills through investigations of infectious diseases of humans and animals. The interdisciplinary faculty—with expertise in molecular biology and biotechnology of infectious diseases, bacteriology, parasitology, immunology, virology, vector borne diseases, epidemiology, and pathology—along with well-equipped laboratories and animal facilities, provide a stimulating environment for graduate training.

Depending upon their interests, students choose courses with an emphasis on immunology and molecular virology, bacterial or viral pathogenesis, parasitology and parasite-induced diseases, or epidemiology and community health. Communication skills are fostered through active research discussion groups, interdisciplinary seminars, oral examinations, presentation of papers at scientific meetings, and publication of research findings. This academic and scientific program develops scientists who are able to contribute to the improved health of humans as well as food-producing, companion, laboratory, and aquatic animals.

The department offers a residency program along with a graduate degree program in both anatomic pathology and clinical pathology. A residency program in laboratory animal medicine is available through the Division of Laboratory Animal Medicine within the School of Veterinary Medicine.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications are accepted at any time but are evaluated only after all supporting documents and credentials have been received. Application should be initiated at least six months prior to anticipated entry. By the time of admission, applicants should have earned a minimum of a baccalaureate degree that includes training in general biology, microbiology, biochemistry, genetics, and inorganic, organic, and analytical chemistry. Statistics is also recommended.

Students must meet the acceptance criteria outlined by the LSU Graduate School and the following PBS requirements (GPAs are rounded to nearest tenth). Applicants must score at least 150 on both the verbal and quantitative portions of the GRE and have an overall GPA of at least 3.2 or at least 154 on both the verbal and quantitative portions of the GRE and a GPA of 3.0. Non-English speaking foreign nationals must have a TOEFL score of at least 550 on the paper-based test, 213 on the computer-based test, or 79 on the Internet-based test, an IELTS score of at least 6.5, or PTE score of at least 59. Application must include a curriculum vitae, statement of interest, transcripts, GRE scores, TOEFL/IELTS/PTE scores (for international students), and three letters of reference.

Financial Assistance

Stipends, fellowships, and assistantships from various sources are available on a competitive basis for both masters and doctoral students. Applicants seeking stipend support should submit their application by **February 1** for matriculation in the fall semester and **September 1** for the following spring semester.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Linda B. Adams (3F) • Immunology of mycobacterial infections

David G. Baker (M) • Laboratory animal medicine, infectious diseases of laboratory animals, cost accounting in animal facilities
Annadora Bruce-Keller (3F) • Pathology

Doo-Youn Cho (EM) • Pathology, application of advanced molecular methodologies to diagnostic pathology for rapid identification of etiologic agents and quality control

Shafiqul Chowdhury (M) • Molecular virology, neurovirology, neuro-pathogenesis and recombinant herpes virus vaccine technology

Richard K. Cooper (3A) • Transposon mediated cellular transfection and targeted mutagenesis

Richard Corstvet (EM)

Fabio Del Piero (M) • Pathology comparative pathology and infectious diseases with emphasis on viral disease and zoonotic agents

James H. Diaz (7M) • Environmental and occupational health sciences

Patricia L. Dorn (3F) • Population genetics of parasite vectors

Philip H. Elzer (M) • Veterinary immunology and veterinary science; bacterial pathogenesis; host-parasite interactions and immunity; animal modeling, vaccine efficacy, gene-deletion mutant characterization, in vitro bactericidal assays, novel therapeutic agents for brucellosis, transmissible spongiform encephalopathy (TSE) models

Stephen D. Gaunt (M) • Veterinary clinical pathology (primary interest in hematologic disorders); current research on canine ehrlichiosis: mechanisms of thrombocytopenia, persistence of organism, and vaccine development

Maria Antonieta Guerrero-Plata (6A) • Viral immunology, focused on innate immunity, dendritic cells and respiratory viruses

John P. Hawke (M) • Aquatic animal health and bacterial pathogenesis, infectious diseases of aquatic animals, emerging infectious diseases of culture marine and freshwater fish and crustaceans

Martin Hugh-Jones (EM)

Samithamby Jeyaseelan (M) • Immunology/Infectious disease, Pulmonary inflammation and host defense against bacterial pathogens

Thomas R. Klei (M) • Parasitology, characterization of the immune response to nematode infections, particularly vaccination and immunopathogenic and regulatory mechanisms involved in human filariasis

Konstantin Gus Kousoulas (M) • Virology and biotechnology, molecular biology and pathogenesis of herpes virus and coronaviruses, application of viral vectors for gene therapy, development of DNA-based methods for diagnosis of infectious disease pathogens and genetic diseases

James L. Krahenbuhl (3F) • Leprosy research and general leprosy expertise

Andrew A. Lackner (3F) • Microbiology and Immunology; Parasitology; Gene Therapy; Pathology; Veterinary Medicine

Ingeborg Langohr (M) • Inflammatory response in neoplastic and infectious diseases through use of both spontaneous and induced animal models

Fang-Ting Liang (M) • Vector biology, Pathogenesis of *Borrelia burgdorferi*

Kevin R. Macaluso (M) • Vector-borne diseases, rickettsial pathogenesis, ecology of tick-and flea-borne rickettsial diseases and how the interactions between arthropods and rickettsiae facilitate pathogen transmission

John B. Malone (M) • Veterinary parasitology, use of geographical information systems (GIS) to detect distribution of parasites and control parasitic and vector-borne diseases

Juan J. Martinez (M) • Adherence of rickettsia to host cells: identification of mammalian receptors for rickettsia adherence.

Preston A. Marx (3F) • AIDS, HIV, SIV, and simian models of AIDS

Leslie McLaughlin (3P) • Veterinary pathology, cellular and endoplasmic reticulum stress and the unfolded protein response, effects of voluntary exercise on the pathogenesis of neurodegenerative diseases; effects of caloric restriction on aging

James E. Miller (M) • Epidemiology, alternative strategies for controlling gastrointestinal nematode parasitism in ruminants, identification of genetic markers for nematode resistance in sheep

Christopher Mores (M) • Arthropod-borne viruses: mechanisms of transmission, migration and perpetuation, ecological risk forecasting

Christine B. Navarre (M) • Nutrition infectious diseases and husbandry of small ruminants

Daniel B. Paulsen (3P) • Veterinary Pathology, Bovine respiratory disease (shipping fever), especially the pathogenesis and immunity of disease caused by *Mannheimia haemolytica*; research using a murine model of asthma and a murine model of neurovirulence in herpes viruses

Karin E Peterson (3F) • Neuropathogenesis of retroviral infections

Alistair J. Ramsay (7M) • Vaccine development and gene therapy

Alma Faye Roy (3F) • Laboratory diagnosis of infectious diseases as related to animal disease agents and public health, with emphasis in molecular diagnostic medicine

Rhett W. Stout (3F) • Laboratory animal medicine, drug development and toxicology, animal model development and refinement

Ronald L. Thune (M) • Aquatic animal health and bacterial pathogenesis, infectious diseases of aquatic animals, vaccine

development in channel catfish and striped bass

Nobuko Wakamatsu Utsuki (3F) • Pathology, pathogenesis of infectious disease pathogens, avian diseases

Diana L. Williams (3F) • Bacterial Pathogenesis

Degree Programs

This department offers the MS and PhD in Veterinary Medical Sciences with an emphasis in Pathobiological Sciences.

Exceptional students may work toward the PhD without first earning an MS. Complete course requirements for the MS and PhD degrees in the Pathobiological Sciences are stated in a document titled "Graduate Program Guidelines" that is provided to each prospective student admitted to the program. This document is available for download on the departmental website and contains significantly more detail. A synopsis of classes, etc. for the MS and PhD degree is listed below.

Masters

Veterinary Medical Sciences- Pathobiological Sciences, M.S.

(SVMPB)

The Graduate Advisory Committee (GAC) for the degree of Master of Science consists of a minimum of three faculty members, one of whom must be a full member of the graduate faculty. The MS study plan involves course work in the student's area of

specialty and completion of an original research project resulting in an acceptable thesis. Minimal course loads are determined by the student with the approval of the GAC and to meet Graduate School requirements, but must meet the following departmental requirements:

- Minimum of 30 hours of credit beyond the baccalaureate or professional degree in courses numbered 4000
- Minimum of six hours must be in VMED 8000
- Minimum of 24 hours must be in courses other than Thesis Research (VMED 8000)
- Minimum of 12 hours must be in courses numbered 7000 and above of VMED 8000 Thesis Research (1-12 per sem.)
- Limit of six hours of Research Techniques (7002) (any department) and eight hours of Special Topics (7003) (any department) may be used toward any graduate degree.
- Students must fulfill the PBS Basic Core Requirements which includes the following courses (see section 6.1) The only exceptions to these requirements are outlined the PBS Graduate Program Guidelines
- VMED 7004 Introduction to Research (2)
- BIOL 4123 Immunology (3)
- BIOL 4450 Cell Biology of the Nucleus (3) (four credits)
- PBS 7312 Epidemiological Study Design (4)
- PBS 7417 Pathogenesis of Infectious and Parasitic Agents (1-4)
- PBS 7004 Current Literature in Pathobiological Sciences (1) (two credits)
- Other requirements including seminars and thesis instructions can be found in the departmental *Graduate Program Guidelines*.
- Final Exam and Thesis Defense: A comprehensive final examination will include an open presentation and defense of the thesis followed by an oral examination by the GAC. In order to pass this examination, there may not be more than one dissenting vote.

Doctorate

Veterinary Medical Sciences-Pathobiological Sciences, Ph.D.

(PVMPB)

The emphasis in the doctoral program is placed on original and creative research. The aim of this program is to enable the student to become a self-educating scholar and researcher. The PhD Graduate Advisory Committee (GAC) consists of at least four graduate faculty members, two of whom must be from PBS. The GAC should be composed of those faculty members best qualified to direct and evaluate the student's study plan and research. Minimal course loads are determined by the student with the approval of the GAC and to meet Graduate School requirements, but must meet the following requirements:

- 54 credits (the equivalent of three years of course work = nine credits/semester x six semesters) in courses numbered 4000 and above. Must include 24 hours of credit earned outside of Research Courses (VMED 8900 and VMED 9000).
- Students must fulfill the PBS Basic Core Requirements which includes the following courses (see section 6.1). The only exceptions to these requirements are outlined in Section 6.1.

- VMED 7004 Introduction to Research (2)
- BIOL 4123 Immunology (3)
- BIOL 4450 Cell Biology of the Nucleus (3) (four credits)
- PBS 7312 Epidemiological Study Design (4)
- PBS 7417 Pathogenesis of Infectious and Parasitic Agents (1-4)
- PBS 7004 Current Literature in Pathobiological Sciences (1) (four credits)
- VMED 8900 Pre-dissertation Research (1-9) for laboratory rotation (three credits)
- If the student declares a minor, the student must fulfill the requirements as defined by the minor department in addition to the PBS requirements.
- Maximum of six hours of 7002 (any department) and eight hours of 7003 (any department) may be used.
- Other requirements including seminars, lab rotations, and dissertation instructions can be found in the departmental *Graduate Program Guidelines*.
- Examinations
- Qualifying Examination: PBS does not require a qualifying examination; however, students may be required to take a qualifying examination at the discretion of the student's graduate research mentor and/or GAC.
- General Examination: Students are required to take a general examination and become eligible to take the general examination after demonstrating adequate academic and professional aptitude to the GAC. The general examination is open to the members of the GAC only. The specific format of the examination will be determined by the GAC; however, the examination must include both written and oral portions. Failure of the general examination requires more than one dissenting vote. Based on the results of the general examination, the GAC can recommend additional course work. In the event that the student fails the general examination, he/she may retake the general examination. Should the student choose to retake the general examination, the examination must be completed within six calendar months. Should two members of the GAC again fail the student; the student will be dismissed from the PBS graduate program.
- Final Exam and Dissertation Defense: At least three weeks prior to the scheduled date of the examination, the request for the student's final examination must be submitted by the graduate student to the GA who will forward the application to The Graduate School. The final examination and dissertation defense examines the procedure, content and student's understanding of the work presented in the dissertation. This examination may extend into subject matter related to or distant from the dissertation.

Petroleum Engineering (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

To maintain a high level of production, the oil and gas industry must rely on increasingly complex drilling, production, and reservoir engineering practices. Since its inception in 1929, the Craft & Hawkins Department of Petroleum Engineering has earned a reputation for producing engineers who are innovative, yet practical. There are ten faculty members whose areas of expertise include reservoir engineering, petrophysics, drilling and production systems, rock-fluids interaction, enhanced/improved oil recovery, and environmental aspects of the industry.

At the request of the Louisiana oil and gas industry, the department has offered graduate-level course work in New Orleans, and more recently, evening classes on the main campus. The petroleum engineering faculty members also teach graduate-level courses for international programs in Indonesia, Ecuador, Bolivia, Croatia, Mexico, and the United Arab Emirates.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission including financial support are received and evaluated by the department on a competitive basis that involves students' academic credentials, research skills, industry experience, as well as department's availability of funding, office/laboratory space, and faculty interest. Applicants must adhere to the application deadlines established by the Graduate School and the department (**fall: April 1, spring: October 1**).

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores above 153 (Verbal) and 152 (Quantitative), and three letters of recommendation. International students whose native language is not English must also submit a TOEFL, IELTS, or PTE score acceptable by the Graduate School.

Financial Assistance

Financial assistance is available to some students through the department or other units in the form of research or teaching assistantships. An applicant may contact the department faculty for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines (**fall: April 1, spring: October 1**) established by the LSU Petroleum Engineering Department and the Graduate School.

Facilities

The department's unique experimental facilities include the following:

- The Petroleum Engineering Research & Technology Transfer Laboratory (PERTT Lab) is an industrial-scale facility with full-scale equipment and instrumentation for conducting research related to borehole technology. Much of this equipment was assembled to support past research and training activities in the area of blowout prevention.
- The Enhanced Oil Recovery (EOR) Laboratory has been the center of the department's experimental research activities in the areas of flow through porous media, fluids phase behavior, and gas injection EOR.
- The Lou Soileau III Rock-Fluids Interactions (RFI) Laboratory houses some unique experimental apparatus and techniques to measure dynamic contact angles and oil/water/gas interfacial tensions at reservoir pressures (up to 20,000 psi) and temperatures (up to 400°F) using live crude oils to evaluate live oil spreading behavior and gas-oil miscibility. This laboratory also houses an optical cell for making dynamic contact angles and IFT measurements at ambient conditions for conducting preliminary

screening tests. It is also equipped with a computerized Wilhelmy Plate apparatus (donated by BP) for studying solid-liquid-vapor and solid-liquid-liquid interactions.

- The Chevron Reservoir Characterization Laboratory is a new state-of-the-art facility for interactive visualization and modeling of reservoir problems, to be used for both research and teaching. The facility includes a highdefinition video wall, smart board and HD projector, nine fixed high-performance workstations, and seating and connectivity for up to 25 students or researchers.

Research Programs

Departmental research covers a wide range of research problems associated with drilling and production of oil and gas. The total research funding awarded to the department during the last two years exceeds \$3.4 million. Primary research projects include the following:

- Well Control and Blowout Prevention—Development of technology for safe handling of high subsurface pressures of gas formations during drilling operations. The program encompasses topics such as dynamic kill and unloading procedures, underground blowouts, motion of gas slugs in inclined or underbalanced wellbores, drilling, dynamic and liquid-liquid lubrication, and the automation of well control.
- Improved/Enhanced Oil Recovery—Research efforts in this area consist of a two-pronged approach to IOR. The first approach relies on the concept of altering rock wettability by using cost-effective chemical treatments; the second approach aims to develop an effective alternative to the currently practiced water-alternating-gas IOR process by making use of the gravity drainage concept in conjunction with horizontal wells. Evaluating and improving the utilization of solvents in IOR processes is another area of study. In addition to developing new concepts, techniques, and processes of improved oil recovery, efforts are also directed at field testing and commercializing promising processes in collaboration with industry.
- Geomechanics – new research program aimed at using rock mechanics and continuum mechanics concepts to study mechanical interaction of wells with formations in drilling (wellbore stability, pore pressure predictions, well integrity), completion (hydraulic fracturing, reservoir compaction, sand production), and formation characterization (naturally fractured reservoirs).
- Environmental Control—oilfield process improvements and/or modifications leading to pollution prevention and productivity enhancement. This approach involves modeling of the oilfield process-born mechanisms of pollution and development of new, cost-effective methods and techniques to meet environmental compliance requirements. The program encompasses on-site disposal, downhole injection of drilling and production waste and sequestration of CO₂, fluids processing, oil/water separation, subsurface zonal isolation, toxicity testing, and on-site and in situ reduction of produced water.
- Reservoir Performance Forecast—integration of fundamental reservoir engineering with numerical reservoir simulation, geostatistics, reservoir geology, geophysics, inversion, optimization, and uncertainty analysis. The program includes industrial and government-sponsored programs in grid computing, simulation study design, and flow simulation of data-rich models.
- Reservoir Rock-Fluids and Fluid-Fluid Interactions—understanding the nature of interfacial forces and devising means to unlock the trapped resources. Since much of the current understanding is from experimental research conducted at ambient conditions, these research efforts concentrate on making fluid-fluid and rock-fluids interaction measurements at realistic reservoir conditions using live fluids.
- Well Completion Fluid Dynamics—understanding and improving fluids transfer at the well-reservoir interface. The program addresses the process of water invasion at wells and the mitigating technology of dual completions with "downhole water sink." Also investigated are phenomena of well integrity loss due to fluids migration outside wells (sustained causing pressure, for example) and the relevant control techniques.
- Digital Rock Physics—computational methods designed to take advantage of new techniques for high-resolution 3D imaging of porous materials. Methods being developed include LBM, FEM, and network modeling. Applications include multiphase flow, high-rate flows, transport in propped fractures, particle transport, and formation damage.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Zaki Bassiouni. (EM) • Well logging, formation evaluation, reservoir management
Adam T. Bourgoyne Jr (EM) • Drilling engineering
Arash Dahi Taleghani (6A) • Geomechanics of well-reservoir systems, hydraulic fracturing, characterization of fractured reservoirs, rock fracture mechanics and poroelasticity
Richard Hughes (3F) • Oil and gas reservoir engineering, CO2 EOR and sequestration, production data analysis, pore-scale processes
Seung Ihl Kam (M) • Multiphase flow in pipes and porous media, foam and surfactant applications, modeling/simulation and flow experiments
Julius P. Langlinais (EM) • Drilling engineering, well control, fluid flow in pipes, well production system analysis.
Mileva Radonjic (6A) • Carbon storage and capture, global warming mitigation, oil-well cement durability, effective long term zonal isolation, corrosion issues, wellbore stability, geomechanics, enhanced oil recovery
Dandina N. Rao (M) • Reservoir engineering, enhanced/improved oil recovery, fluid-fluid and rock-fluids interactions
Stephen O. Sears (3F) • Reservoir characterization, reservoir simulation, rock-fluids properties
John Rogers Smith (M) • Drilling engineering, well design, well control and blowout prevention, wellbore integrity, cementing, and sustained casing pressure, rock mechanics, bit performance
Karsten E. Thompson (M) • Pore-scale and multiscale modeling of transport in porous media, computational methods
Mayank Tyagi (M) • High performance computing, multiphase CFD modeling and analysis of fluid flow and heat transfer in production systems including wellbores (artificial lift techniques) and flowlines; multi-scale/multi-physics modeling of geothermal energy systems, reservoir upscaling algorithms.
Paulo Waltrich (6A) • Multiphase flows in pipes; artificial lift systems; liquid loading in gas wells; production optimization; flow assurance
Christopher White (7M) • Reservoir engineering, characterization, and optimization
Andrzej "Andrew" K. Wojtanowicz (M) • Mechanics and hydraulics of well drilling, completion and production, design and optimization of well construction and operation, environmental control technology in petroleum engineering, water control

Masters

Petroleum Engineering, M.S.PE

(MPETE)

The master's program is open to students holding BS degrees in petroleum engineering, other engineering disciplines, or sciences. For students with a BS degree in other engineering fields or in science, additional course work is required with no graduate credit. The amount is based on the student's previous academic training - as specified in the departmental brochure, *Craft and Hawkins Department of Petroleum Engineering - Graduate Study*.

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is either a thesis or a non-thesis degree that requires a special project. The thesis option requires completion of 24 hours of approved course work, six hours credit for thesis research, and submission of an acceptable thesis. The non-thesis option requires completion of 36 hours of approved graduate course work that may include three credits for the special project. The curricular requirements include:

- For the thesis-option students, at least nine hours at the 7000 level or above, exclusive of thesis research credit;
- For non-thesis option students, at least 18 hours at the 7000 level or above, including credit earned for the special project;
- A minimum core requirement of 18 credit hours in drilling, production, formation evaluation, reservoir engineering, and engineering mathematics – shown in the *Core Curriculum Requirements* document;
- A secondary concentration area consisting of a minimum of six hours of earned credit in a specified field of study may be required by the advisory committee.

The thesis-option student must have their thesis approved by the committee and pass a comprehensive final oral exam. The non-thesis-option student must pass a comprehensive oral exam that may (but does not have to) include approval of the special project. At the discretion of the student's advisory committee, a written exam may be required.

Master's Examination Milestones

This document defines expectations of student achievements at various points in the Master of Science (MS) program in Petroleum Engineering at Louisiana State University.

- **Thesis Option**

The student must demonstrate proficiency in research or applying advanced technology to petroleum engineering. The student's degree plan, determined by the student and the advisory committee, consists of courses that ensure professional competence and enhance research productivity in petroleum engineering.

- **Thesis Proposal** The student must present a project proposal to the advisory committee. The proposal is no later than the third semester after admission to the master program. To pass the proposal examination, the candidate will:

- Define the problem, and state the engineering, science, economic, and/or social motivations for a solution
- Read, understand, and summarize the most important previous work in the area
- Place the proposed plan in a meaningful context with petroleum engineering
- Formulate a credible approach for carrying out the project and identify tools (analytical, numerical, laboratory instrumentation, and equipment) to be used
- Provide a detailed plan for the project, including a timeline
- Submit a written proposal and/or formally present an oral proposal, the format(s) to be chosen by the candidate in consultation with the thesis committee.
- If submitting a written research proposal, the proposal will be sent to the committee at least a week before the examination. The written proposal should be 3-15 pages excluding references and include items discussed in 1.1-1.5. The written proposal is a working plan for the project, agreed upon by the student and the dissertation committee.
- If making a formal oral proposal, the candidate will announce the proposal session to all department faculty and graduate students one week in advance. Upon committee members' request, copies of the slides (subject to revision) must be provided to the committee at least one week in advance. Notes from the proposal, compiled by the candidate and committee, are a working plan for the project research and/or augment the written proposal.
- Demonstrate a commitment to clear communication

- **Final examination**

The final examination focuses on the thesis topic, ensuring that the work is of sufficient scope, difficulty, and creativity to merit a MS. The final examination is (a) generally within two years after admission to the MS program, and (b) no later than three years after admission to the MS program. The candidate will:

- State the problem clearly and convincingly, identifying the elements of the problem and approach that are creative, challenging, and/or original.
- Review relevant literature completely and informatively.
- Complete a project that contributes to petroleum engineering science and/or technology and/or applies advanced engineering or scientific methods to address a challenging problem, and/or is a new application of existing methods.

- Compare, benchmark, verify, calibrate, and/or validate results against alternative and existing solutions, techniques, and datasets.
- Demonstrate mastery of the tools used.
- Prepare a properly formatted thesis and presentation and submit the thesis to the committee at least two weeks before the examination. Copies of slides, subject to revision, should be submitted to the committee one week before the examination.
- Communicate clearly, including answering questions well.
- Announce the examination to all department faculty and graduate students one week in advance.

- **Non-Thesis Option**

The non-thesis degree option increases the student's professional knowledge of and proficiency in applying petroleum engineering technology. The student's degree plan, determined by the student and the advisory committee, comprises courses that ensure professional competence and engineering productivity.

Final Examination

A final examination is required, and ensures that the student has developed the requisite level of knowledge and proficiency. The final examination is comprehensive and is broader in scope than a thesis-based examination. The examination is administered by the student's advisory committee. The timing of the final examination is usually during the student's last semester of course work.

The content of this exam may be based upon one of the following options

- A presentation of an independent project conducted to acquire or apply graduate level knowledge in a specific subject area, e.g. for a PETE 7256 independent study; this is the preferred option.
- A presentation of a project beyond course work using knowledge from courses, summer internship or personal experience.
- An oral exam by the committee including challenging, specific technical questions in each of the four major subject areas of petroleum engineering (well drilling and completion, production, reservoir engineering, and formation evaluation).

If the general exam includes a presentation (Options a and b) the candidate is expected to:

- State the problem clearly and convincingly, identifying the elements of the problem or approach that are significant
- Review relevant literature completely and informatively
- Explain the solution(s) and its (their) significance
- demonstrate mastery of the technical tools used, and an understanding of petroleum engineering concepts related to the topic

Students who choose not to report on a particular project (Option c) shall demonstrate:

- Understanding of engineering principles of well drilling and completion, production, reservoir engineering, and formation evaluation
- Proficiency in two of the four subject areas above
- Knowledge of petroleum engineering processes, equipment, and terminology.

Minimum core requirements***

All students seeking a PhD or MS degree in petroleum engineering must fulfill the following requirements.* This list is a supplement and not a substitute for the LSU catalog requirement and may be updated by semesters**.

Engineering Math

MS: One of the following courses (3)

PhD: Two of the following courses (6)

- MATH 4038 Mathematical Methods in Engineering (3)
- ME 4563 Mathematical Methods in Engineering (3)
- PETE 7201 Fluid Flow in Porous Media (3) or
- EXST 7004 Experimental Statistics I (4) or other advanced mathematics course

Drilling

One of the following courses (3)

- PETE 4045 Drilling Engineering (3)
- PETE 4086 Well Design-Drilling (3)
- PETE 4087 Environmental Control in Petroleum Engineering (3)
- PETE 4090 Unconventional Reservoirs (3)

Formation Evaluation

One of the following courses 3 (0)

- PETE 3036 Well Logging (3) ***
- PETE 4088 Formation Evaluation (3)
- PETE 7214 Petroleum Geomechanics (3)
- PETE 7195 Reservoir Characterization (3)
- PETE 7285 Statistical Reservoir Modeling (3)

Production

One of the following courses (3)

- PETE 4046 Well Design-Production (3)
- PETE 4085 Surface Handling of Produced Fluids (3)
- PETE 7211 Production System Analysis (3)
- PETE 7212 Well Completion Design (3)

Reservoir

Two of the following courses (6)

- PETE 4050 Reservoir Dynamics (3)

- PETE 4051 Reserve Estimation and Reservoir Management (3)
- PETE 4056 Numerical Simulation of Improved Recovery Processes (3)
- PETE 4083 Secondary Recovery of Petroleum (3)
- PETE 4089 Natural Gas Engineering (3)
- PETE 7202 Advanced Well Testing Theory and Analysis (3)
- PETE 7231 Nonthermal Methods of Enhanced Oil Recovery (3)
- PETE 7232 Thermal Methods of Oil Recovery (3)
- PETE 7280 Mathematical Simulation of Petroleum Reservoir Performance (3)

18-21 Total Hours

* Prior equivalent courses may be substituted for coverage but not for credit unless officially transferred.

** "Selected Topics" courses, PETE 7241 and PETE 7242 may be updated in future semesters upon approval of the faculty.

*** Only for students with BS in other engineering areas or science. This course does not contribute graduate credit hours.

Doctorate

Petroleum Engineering, Ph.D.

(PPETE)

The PhD program is open to students holding an MS in petroleum engineering, other engineering disciplines, or enrolled in the petroleum engineering master's program at LSU. In the latter case, the MS enrollment status of the student may be upgraded to the PhD status using the following guidelines:

Eligibility:

- Master's student who has completed a BS in Petroleum Engineering:
- Master's student who has completed MS in another engineering discipline:
- The student has completed 24 hours of course work (including all makeup work) and has a 3.0 cumulative GPA

Process:

- The student must request approval from his/her major advisor, the graduate advisor, and the department chair;
- The student's major advisor will then email all faculty and solicit information regarding the student's academic performance;
- Once all faculty advisor, graduate advisor, and chairman have all agreed, the chairman sends a request for student's status change to the dean of The Graduate School.

Assistantship upgrade:

- After the upgrade is granted, the student must pass the qualifying exam to receive the increase from MS to PhD level of the stipend.

To become a doctoral candidate, a student must pass the qualifying and general examinations, meet a one-year residence requirement, and complete a minimum of 54 semester hours of approved graduate course work beyond the BS degree or 30 semester hours beyond the MS degree. The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements are satisfied. The advisory committee is typically identical to the student's committee for the general examination.

The curricular requirements include:

- At least 30 hours at the 7000 level or above beyond BS degree; without MS degree
- At least 24 hours at the 7000 level or above beyond BS degree; with MS degree
- At least 15 hours at the 7000 level or above beyond MS degree;
- Minimum core requirement of 21 credit hours in drilling, production, formation evaluation, reservoir engineering, and engineering mathematics – shown in the *Core Curriculum Requirements* document.
- A secondary concentration area consisting of a minimum of six hours of earned credit in a specified field of study may be required by the advisory committee.

Within the first year after admission to the doctoral program, the student must pass a qualifying exam administered by the advisory committee. The qualifying exam is a comprehensive oral exam based upon the student's proposal of the dissertation research project. At the discretion of the student's advisory committee, a written exam may be required. After passing the qualifying exam, and upon approval by the advisory committee, the planned departmental-level academic course plan should be submitted for approval to The Graduate School.

The student must pass a general examination within three calendar years after admission to the doctoral program and not later than two semesters prior to graduation. This is a rigorous comprehensive oral exam that also includes assessment of the progress made by the student in the dissertation research to make sure that the student may proceed successfully to a doctoral degree.

PhD Examination Milestones

This document defines expectations of student achievements at various stages in the PhD program.

Minimum core requirements***

All students seeking a PhD or MS degree in petroleum engineering must fulfill the following requirements.* This list is a supplement and not a substitute for the LSU catalog requirement and may be updated by semesters**.

Engineering Math

MS: One of the following courses (3)

PhD: Two of the following courses (6)

- MATH 4038 Mathematical Methods in Engineering (3)
- ME 4563 Mathematical Methods in Engineering (3)
- PETE 7201 Fluid Flow in Porous Media (3) or
- EXST 7004 Experimental Statistics I (4) or other advanced mathematics course

Drilling

One of the following courses (3)

- PETE 4045 Drilling Engineering (3)
- PETE 4086 Well Design-Drilling (3)
- PETE 4087 Environmental Control in Petroleum Engineering (3)
- PETE 4090 Unconventional Reservoirs (3)

Formation Evaluation

One of the following courses 3 (0)

- PETE 3036 Well Logging (3) ***
- PETE 4088 Formation Evaluation (3)
- PETE 7214 Petroleum Geomechanics (3)
- PETE 7195 Reservoir Characterization (3)
- PETE 7285 Statistical Reservoir Modeling (3)

Production

One of the following courses (3)

- PETE 4046 Well Design-Production (3)
- PETE 4085 Surface Handling of Produced Fluids (3)
- PETE 7211 Production System Analysis (3)
- PETE 7212 Well Completion Design (3)

Reservoir

Two of the following courses (6)

- PETE 4050 Reservoir Dynamics (3)
- PETE 4051 Reserve Estimation and Reservoir Management (3)
- PETE 4056 Numerical Simulation of Improved Recovery Processes (3)
- PETE 4083 Secondary Recovery of Petroleum (3)
- PETE 4089 Natural Gas Engineering (3)
- PETE 7202 Advanced Well Testing Theory and Analysis (3)
- PETE 7231 Nonthermal Methods of Enhanced Oil Recovery (3)
- PETE 7232 Thermal Methods of Oil Recovery (3)
- PETE 7280 Mathematical Simulation of Petroleum Reservoir Performance (3)

18-21 Total Hours

* Prior equivalent courses may be substituted for coverage but not for credit unless officially transferred.

** "Selected Topics" courses, PETE 7241 and PETE 7242 may be updated in future semesters upon approval of the faculty.

*** Only for students with BS in other engineering areas or science. This course does not contribute graduate credit hours.

Philosophy (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

LSU is one of a few universities in the U.S. that offers the MA, but not the PhD, in philosophy. The department has built its program to fit this unique niche. No single philosophical orientation is dominant; rather, faculty and graduate courses represent various traditions. Whether students go on to a PhD program or pursue only the terminal MA, they receive a broadly based philosophical education. Philosophy graduates have had good success in subsequent graduate education, whether in philosophy, law, or religion. The philosophy master's program has particular appeal for students who:

- Desire to pursue a PhD in philosophy but whose undergraduate background in philosophy is limited.

- Majored or minored in philosophy but are uncertain about pursuing a PhD, often because of an undergraduate record that needs bolstering if the student is to enter a first-rate doctoral program.
- Desire to receive an MA in philosophy in combination with an advanced degree in some other field of study.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Application deadlines are **May 15** for the fall semester and **October 15** for the spring semester. Decisions on recipients of financial aid for the fall semester are made as early as April 1. Completed applications for financial assistance in the form of a graduate assistantship are due by January 25. The official application must be supported by three letters of reference and, preferably, by a writing sample, all of which may be loaded with the application for admission.

Financial Assistance

The department has five full-time graduate assistantships that are awarded to applicants on a competitive basis. These awards are valued at \$8,069 per year and include an exemption of tuition. Graduate assistants are required to work 20 hours a week in grading and assisting freshman- and sophomore-level philosophy courses.

Graduate Faculty in Philosophy

(check current listings by department by clicking [this link](#))

Jon Cogburn (M) • Philosophy of mind, philosophy of language, philosophy of logic, cognitive science

Francois Raffoul (M) • Contemporary French philosophy

Oliver J. Rocha (6A) • Ethics and political philosophy

Jeffrey W. Roland (M) • Philosophy of mathematics, epistemology, logic

Husain F. Sarkar (M) • Philosophy of science, Descartes, Kierkegaard, metaphysics

Gregory J. Schufreider (M) • Modern European philosophy, Anselm, philosophy of art

Mary J. Sirridge (7M) • Philosophy of art, ancient and medieval philosophy, philosophy of language

Recent Faculty Publications

A representative sample of recent faculty publications includes the following:

Jon Cogburn, "The Logic of Logical Revision: Formalizing Dummett's Argument," *The Australasian Journal of Philosophy*, 83.1 (2005): 15-32. J. Cogburn and M. Silcox, "The Emergence of Emergence: Computability and Ontology." *American Philosophical Quarterly*, 48.1 (2011): 63-74.

Francois Raffoul, Heidegger and the Subject. "Being and the Other: Ethics and Ontology in Heidegger and Levinas," in *Addressing Levinas*.

Jeffrey Roland, "Kitcher and the Obsessive Unifier," *Philosophy and Phenomenological Research* 77 (2008), 493-506. "Kitcher, Mathematics, and Naturalism," *Australasian Journal of Philosophy* 86 (2008), 481-497. "Maddy and Mathematics: Naturalism or Not," *The British Journal for the Philosophy of Science* 58 (2007), 423-450.

Husain A. Sarkar, *The Toils of Understanding*. "Empirical Equivalence and Underdetermination." "Anti-Realism Against Methodology." "Descartes' Cogito: Saved from the Great Shipwreck."

Gregory J. Schufreider, *Confessions of a Rational Mystic: Anselm's Early Writings*. "Heidegger's Hole"

Mary J. Sarridge, "Language and Linguistic Knowledge in Medieval Grammatical Theory." "Literature and Life Experience." "Seeing and Saying in Augustine's De Trinitate."

Masters

Philosophy, M.A.

(APHIL)

LSU offers the MA in philosophy, with thesis and non-thesis options. Requirements for the thesis option include 30 semester hours of graduate credit, with no more than six hours of thesis credit; a reading knowledge of the language required for adequate research on the thesis topic; a thesis; and an oral examination on the thesis.

Requirements for the non-thesis option include 36 semester hours, of which as many as 12 hours may be taken outside the Department of Philosophy & Religious Studies; reading knowledge of a foreign language or some department-approved alternative to foreign language competency; and an oral exam based on work that has been accomplished in the program.

The department does not offer a graduate degree in religious studies; students interested in such might wish to explore the options offered through the Master of Arts in Liberal Arts program.

Physics & Astronomy (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click [here](#).

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Students must submit all documents required by the Graduate School including GRE scores (a score on the GRE subject test in physics is recommended); one official transcript of all college and university course work, with a minimum GPA of 3.0 required for all undergraduate and graduate work ("A" = 4.0); and three letters of recommendation.

The application deadline for fellowships and assistantships is **January 15** for the fall semester or summer term and **October 15** for the spring semester. For students starting in the fall term, the department reviews applications as late as May 15 though the likelihood of acceptance is higher for applications submitted before January 15.

All graduate student applicants should check the Physics & Astronomy Department website for further information: www.phys.lsu.edu.

Financial Aid

The department provides about 100 teaching and research assistantships. Combined stipend and fellowship support for PhD students entering in fall 2012 was between \$21,000 and \$28,000 in addition to full tuition waiver, depending upon the type of award and qualifications. Students are responsible for additional fees. The university also offers Huel D. Perkins Doctoral Fellowships, Board of Regents Graduate Fellowships, Economic Development Assistantships, and NASA Space Grant Fellowships with yearly stipends up to \$28,000 plus tuition waivers.

In general, all applicants are assumed to be applying for financial assistance in the form of a graduate teaching assistantship. Essentially all incoming students are awarded either an assistantship or a fellowship. Research assistantships are usually available to students after their first year. However, entering students are encouraged to contact individual faculty members about first-year research assistantships or summer employment prior to the beginning of the fall semester.

Research Facilities

Research resources include a 3He-4He dilution refrigerator-high magnetic field (18 Tesla) facility for materials science studies; a 1.5 GeV electron synchrotron (CAMD) for materials science, surface physics, and x-ray lithography applications; and laser optics and crystal growing laboratories. The National Science Foundation's Laser Interferometer Gravitational Wave Observatory (LIGO) is near Baton Rouge, and the department's gravity wave group is involved in LIGO experiments. Experimental groups are involved in nuclear physics measurements at Oak Ridge, TRIUMF and the Michigan State FRIB laboratory; the LENS, SNO, and T2K neutrino experiments; condensed matter experiments on 2-D and 3-D systems; cosmic ray studies at the Auger Observatory in Argentina and at balloon launching sites from Canada to the Antarctic; observations at Kitt Peak, Cerro Tololo, Las Campanas and other ground-based telescopes, and with the Hubble Space Telescope, Swift, FUSE, Chandra, Spitzer, and Fermi satellite missions. Medical research is conducted at the Mary Bird Perkins Cancer Center (MBPCC).

LSU has fully staffed machine and electronic shops. LSU is connected to other national and international computing centers via the Internet and Internet2. High performance computing work in the department, including development of algorithms and computing methods, solutions of general relativity equations, particle physics detector simulations and analysis of neutrino data, simulations of stellar structure and galaxy dynamics, electronic structure calculations, analysis of satellite gamma ray data, and nuclear physics computations, is performed on the facilities of the LSU Center for Computation & Technology (CCT), which includes a 50 Teraflop machine (LONI) a 15 teraflop machine (Tezpur), and other facilities for scientific visualization and computing.

Sheldon Johnson (3P) (MBPCC) • Radiation Oncology
Maurice L. King, Jr (3P) (MBPCC) • Medical Physics
Renee A. Levine (3P) (MBPCC) • Radiation Oncology
Kenneth K. Lo (3P) (MBPCC) • Radiation Oncology
Martha Schaefer (3F) (LSU Department of Geology & Geophysics) • Planetary Geology
Oleg N. Vassiliev (3P) (MBPCC) • Medical Physics
Charles G. Wood (3P) (MBPCC) • Radiation Oncology

Degree Programs

This department offers studies leading to Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

Masters

Medical Physics and Health Physics, M.S.

(SMPHP)

The MS degree in medical physics and health physics offers two areas of concentration: medical physics or health physics. The concentration in medical physics requires 36 credit hours of course and clinical work in addition to a minimum of six hours of thesis research. The concentration in health physics requires 33 hours of course work, plus a minimum of six hours in thesis research. Although not counted towards degree requirements, a course in human anatomy is necessary for eligibility to sit for the American Board of Radiology certification exam in radiological physics.

Physics, M.S.

(SPHYS)

Students are not normally admitted just for study leading to the M.S. degree in physics. Students in the Ph.D. program can obtain the M.S. degree in the course of their study, either as an additional degree, or leave with the M.S. prior to finishing the Ph.D.

There are two paths to completing the M.S. Degree in physics. The *thesis option* requires 30 hours of coursework, of which at most 6 hours can come from thesis research (PHYS 8000 or PHYS 9000), and the successful completion and defense of a master's thesis. The *nonthesis option* requires a total of 36 hours of coursework, not including research classes (PHYS 8000 or PHYS 9000), and a comprehensive examination on that coursework.

Both options require that students pass eight required courses comprising 22 hours of credit: PHYS 7221, PHYS 7225, PHYS 7231, PHYS 7232, PHYS 7241, PHYS 7242, PHYS 7398, and PHYS 7857. They must also pass the departmental qualifying exam by the end of their second year. The qualifying exam for the M.S. or Ph.D. is offered twice each year. It is comprehensive and composed of questions at the advanced undergraduate level.

Master of Natural Science in Physics

A program leading to a Masters of Natural Science (MNS) program is also offered, providing breadth in science subjects as well as the depth in physics that is required for science teachers in junior and senior high school. For the MNS, 24 hours of graduate courses, and 6 hours of thesis research are required.

Doctorate

Physics, Ph.D.

(PPHYS)

Formal requirements for the Ph.D. degree include eight required courses (PHYS 7221, PHYS 7225, PHYS 7231, PHYS 7232, PHYS 7241, PHYS 7242, PHYS 7398, and PHYS 7857), 9 hours of advanced graduate courses beyond the required 22 core hours, a passing score on the departmental qualifying exam and the general exam, publication of research results, and a final examination.

The qualifying exam for the M.S. or Ph.D. is offered twice each year. It is comprehensive and composed of questions at the advanced undergraduate level. This exam must be completed by the end of the second year of study. The general exam consists of the successful defense of a thesis topic and an examination of the student's knowledge of the subject area of the thesis. The final examination is an oral defense of the thesis.

A dual PhD degree program in physics also exists between LSU and Nanjing University in Nanjing and the Institute of Physics in Beijing, China. Further details can be found on the department website www.phys.lsu.edu.

Ph.D. in Physics with a concentration in Medical Physics (PMPHP)

The PhD degree concentration in medical physics requires 24 credit hours of core coursework, 4 credit hours of clinical work, 9 credit hours of advanced medical physics electives, and 6 credit hours of non-medical physics advanced electives. Research credit hours comprise the remainder of the minimum required total of 54 credit hours for the degree. Additional requirements are a passing score on the medical physics qualifying exam and the general exam, publication of research results, and a final examination. The qualifying exam, offered once per year, is comprehensive and based on the core medical physics coursework taken in the first year of study. The general exam consists of the successful defense of a thesis topic and an examination of the student's knowledge of the subject area of the thesis. The final examination is an oral defense of the thesis. Although not counted towards degree requirements, a course in human anatomy is necessary for eligibility to sit for the American Board of Radiology certification exam in radiological physics.

Plant, Environmental & Soil Sciences (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The School of Plant, Environmental & Soil Sciences offers graduate programs leading to the Master of Science (MS) and the Doctor of Philosophy (PhD) degrees. There are three general optional areas of concentration within the degree programs: Agronomy, Horticulture, and Soil Science. Students interested in a particular concentration should contact a graduate advisor for specific requirements.

Students with an agronomic focus concentrate their graduate studies in weed science, crop breeding and genetics/biotechnology, or applied plant physiology. Students studying horticulture may specialize in any branch of horticulture, including breeding and genetics, propagation, physiology, mineral nutrition, weed control, plant growth and development, postharvest physiology, and food processing. Students pursuing soil science study a wide variety of subdisciplines including soil classification, soil physics, soil chemistry, soil fertility, soil microbiology, environmental soil science, and land use/management.

Agronomy, which includes the soil and water environments associated with crop production, is the primary source of food for our world's population. Agroeconomic activities are very important at the state, national, and global levels. Many opportunities await agronomists with MS and PhD degrees. Positions are available in the private sector as well as in government and universities. The graduate faculty of the school is engaged in both applied and basic research. Most agronomy and environmental management faculty members have joint appointments between LSU and the LSU Agricultural Center. These scientists conduct research and impart education and training to sustain productivity of food, feed, and fiber while maintaining environmental quality with efficient use of natural resources.

Horticulture at LSU has a great tradition. Some of the most important U.S. varieties of sweet potatoes, strawberries, and peaches have been developed at LSU during the past 50 years. Plant breeding remains a significant focus, but there is a new emphasis in woody ornamentals and floriculture. Traditional cultural practices of the past are now modified by a trend toward sustainable agricultural methods with less impact on the environment. In the last decade, physiological research in fruit, vegetable, floriculture, and ornamental production systems has increased. Turfgrass science and management have also become important areas of horticulture research. The horticulture faculty is unique in its strong emphasis on postharvest physiology.

Soils represent one of our greatest natural resources; a source for growing food, fiber, and building materials. Students in soil science are provided hands-on experience with advanced technologies such as inductively coupled plasma atomic emission spectroscopy, x-ray fluorescence spectrometry, GreenSeeker proximal nitrogen sensor, global positioning system, carbon/nitrogen combustion analyzer, and gas chromatograph. Studies in pollution management and spatial/temporal variation in soil properties are modeled with advanced software such as ArcGIS. Students completing degrees in soil science have many career options available to them including: government sector (USDA-NRCS, Bureau of Land Management, Forest Service, Louisiana Department of Environmental Quality), private sector (consulting, industrial services, wetland delineation, soil survey), and academia.

Environmental management uses scientific information to manage natural resources in ways that will ensure environmental sustainability. Both teaching and research in the School of Plant, Environmental & Soil Sciences are directly related to sustainability and provide graduate students with a background in such environmental management areas as wetlands conservation, water pollution prevention, waste management, pest-management practices, and environmental remediation.

Students who receive advanced degrees in Plant, Environmental & Soil Sciences go on to rich and rewarding careers and leave with the challenge of contributing to the world in which they live. Graduates of our school report that their education has well prepared them for their future careers.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School, www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants for admission to the MS and PhD programs are required to submit a completed application plus transcripts of all previous college work and scores on the verbal and quantitative portions of the GRE. Applications should be submitted at least three months prior to the beginning of a new term. In addition, international applicants must submit scores on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Peterson's Test of English (PTE). Applicants for admission to the graduate programs in the School of Plant, Environmental & Soil Sciences must first be admitted by the LSU Graduate School. Generally, in addition to an undergraduate GPA of ≥ 3.0 on a 4.0 scale, GRE (verbal+quantitative) and TOEFL scores of ~ 300 and 79 (internet-based test), respectively, are required.

Financial Assistance

In the School of Plant, Environmental & Soil Sciences, both teaching and research assistantships are available to some students. Stipends are competitive with other programs around the country. Depending upon the source of funding, tuition exemptions may apply. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School. Students holding teaching assistantships may assist in the teaching of a course or teach one to two laboratory sections. Graduate assistants are required to work up to 20 hours per week. Students are assigned to supervisors who may or may not be their major professor.

Masters

School of Plant, Environmental & Soil Sciences, M.S.

(SPESS)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major professor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

A thesis is required for the degree. A minimum of 24 hours of credit at the graduate level must be earned including a maximum of six hours of credit for the thesis for a total of 30 hours credit. The curricular requirements include:

- At least 12 hours credit must be 7000 or above (not including thesis credits)
- At least one hour credit from seminar classes AGRO 7001 and one exit seminar (non-credit) are required

The student must pass a comprehensive oral examination (thesis defense). Students are strongly encouraged to publish manuscript(s) from their MS research in appropriate peer-reviewed, scholarly journals.

The non-thesis option MS degree, approved only under special circumstances, requires a minimum of 36 hours credit at the graduate level of well-defined course work. A non-thesis option MS is considered to be a terminal degree and the curricular requirements include:

- 18 hours of which must be 7000 or above
- Completion of a short project with a written comprehensive report
- Two semesters of seminar (two hours credit)

One semester service assisting in a laboratory course is recommended for non-thesis students. The student must pass a comprehensive oral examination.

Doctorate

School of Plant, Environmental & Soil Sciences, Ph.D.

(PPESS)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major professor and at least two additional members of the graduate faculty, plus a Graduate School Dean's Representative, such that the LSU Graduate School's requirements for graduate committees are satisfied.

A dissertation is a requirement for the proposed degree. A minimum of 51 hours of credit at the graduate level must be earned including a maximum of nine hours of credit for the dissertation for a total of 60 hours credit. The curricular requirements include:

- At least 24 hours credit must be 7000 or above (not including dissertation credits)
- At least two hours credit from seminar class AGRO 7001 (one proposal seminar and one exit seminar are required). One seminar class may be substituted with a seminar presented in the minor department if a minor is being undertaken.

Approximately half way through the student's doctoral program, he/she will be required to pass qualifying exams en route to becoming a candidate for the PhD. The qualifying exams may include written and/or oral examinations at the discretion of the graduate committee and in accordance with Graduate School guidelines. On becoming a candidate for the PhD, students must

pass a comprehensive oral examination in defense of their dissertation. Students are strongly encouraged to publish manuscript(s) from their doctoral research in appropriate peer-reviewed, scholarly journals.

Plant Pathology & Crop Physiology: Plant Health (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Plant pathology is the study of plant diseases from the molecular level of host-pathogen interactions to the development and testing of field level disease management protocols. The need for professionals in this area has never been greater because of the burgeoning world population and the worldwide movement of destructive plant pathogens. In addition, there is a constant demand for new agricultural technology related to food security because of the emphasis on environmental stewardship and the ever-increasing need to produce more food and fiber on a finite land area.

Crop physiology is the study of molecular, biochemical and physiological processes that are required for plant growth and development beginning with seeds and progressing to the physiology of yield formation. In addition, this field includes the mechanisms by which plants adapt to environmental stresses such as salinity, drought and high temperatures. Both fields are involved with discovery of new knowledge and its application to the solution of food and fiber production.

The Department of Plant Pathology & Crop Physiology at LSU is recognized nationally and internationally for applied and basic research on diseases caused by bacteria, fungi, nematodes, and viruses of economically important agronomic and horticultural crops as well as coastal plants. Conditions in Louisiana allow cultivation of and research on semitropical crop species such as cotton, rice, soybeans, sugarcane, and sweet potatoes. Graduate students have the opportunity to work with Louisiana Agricultural Experiment Station personnel who conduct investigations in areas of plant pathology and crop physiology. The department's MS and PhD graduates are prepared for appointments at universities, in government and private research labs, or in international agricultural development. Other employment opportunities exist in the agricultural chemical industry, with government regulatory agencies, or with private research foundations. Prospective students should consult the website and correspond with faculty members whose programs most closely match their professional interests.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission to the LSU Graduate School must be received by **May 15** for the summer and fall semesters and **October 15** for the spring semester. Transcripts of academic work completed at LSU are not necessary. The results of the GRE (verbal and quantitative) should be sent directly to the LSU Graduate School by Educational Testing Services. These test scores are required before any application can be considered. A minimum score of 550 on the paper-based exam, 213 on the computer-

based exam, and/or 79 on the Internet-based test, a score of at least 6.5 on the IELTS, or a score of at least 59 on the PTE is required of all international students. Also required for admission are three letters of recommendation by individuals who know the applicant's academic and professional qualifications. Course prerequisites for entrance into the MS or PhD program vary by area of specialization. Further information on graduate studies in the department may be obtained by emailing plantpath@lsu.edu.

Financial Assistance

Financial assistance support may be available through the department or other units in the form of research or teaching assistantships. A student should contact the faculty member of interest of the department head for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Graduate Faculty

Robert Brown (3F) • Mycotoxicology
Zhiyuan Chen (3F) • Molecular biology, plant physiology
Christopher A. Clark (M) • Plant pathology, sweet potato pathology
Thomas E. Cleveland (3F) • Biochemistry and molecular biology of host-pathogen interactions
Marc A. Cohn (M) • Seed systems biology
Patrick D. Colyer (3F) • Plant pathology
Kenneth E. Damann (M) • Mycotoxicology, biological control, host-pathogen interactions
Lawrence E. Datnoff (7M) • Plant pathology, silicon nutrition and plant disease resistance
Michael P. Grisham (3F) • Sugarcane pathology
Donald E. Groth (3F) • Plant pathology, host resistance in rice and wheat
Jong H. Ham (6A) • Phytobacteriology
Gordon E. Holcomb (EM)
Clayton Hollier (3F) • Plant pathology, disease management, crop loss assessment
Jeffrey W. Hoy (M) • Plant pathology, sugarcane pathology, epidemiology
Melanie L. Ivey (6A) • Plant pathology, horticultural crops
Steven D. Linscombe (3F) • Disease resistance in rice
Edward C. McGawley (M) • Nematology, plant pathology
Norimoto Murai (M) • Biotechnology, plant molecular biology, physiology
Charles Overstreet (3F) • Nematology, plant pathology
Guy Boyd Padgett (3F) • Plant pathology, disease management in row crops, epidemiology
Raymond W. Schneider (M) • Plant pathology, fungal genetics, soybean pathology
Rodrigo A. Valverde (M) • Plant virology

Masters

Plant Health, M.S.

Plant Health (SPLHL) or (PPLHL)

LSU offers the MS and PhD in plant health, with opportunities for specialization in plant pathology or crop physiology. The MS program in plant pathology requires 30 credit hours of course work and research credit, while the crop physiology option requires 31 credit hours. A non-thesis option in plant pathology requires 36 credit hours of course work. The PhD program in plant pathology requires a minimum of 59 credit hours of course work and research credits, while the program in crop physiology requires 55 credit hours. The PhD program in each area of specialization also requires a qualifying examination, general examination, and final defense of the dissertation.

Doctorate

Plant Health, Ph.D.

Plant Health (SPLHL) or (PPLHL)

LSU offers the MS and PhD in plant health, with opportunities for specialization in plant pathology or crop physiology. The MS program in plant pathology requires 30 credit hours of course work and research credit, while the crop physiology option requires 31 credit hours. A non-thesis option in plant pathology requires 36 credit hours of course work. The PhD program in plant pathology requires a minimum of 59 credit hours of course work and research credits, while the program in crop physiology requires 55 credit hours. The PhD program in each area of specialization also requires a qualifying examination, general examination, and final defense of the dissertation.

Political Science (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Established in 1908, LSU's Department of Political Science has a distinguished tradition. The faculty have included internationally recognized scholars, a president of the American Political Science Association, three presidents of the Southern Political Science Association, several Fulbright Scholars, editors of such academic journals as *Journal of Politics and American Politics Quarterly*, a program director of the National Science Foundation, and two members of the National Council on the Humanities. Many of these scholars are still on our faculty, and they and others serve on the editorial boards of leading political science journals. The faculty in the department have exhibited a high level of scholarly productivity. Recent professional surveys have placed the LSU Department of Political Science among the top 20 most productive departments nationwide in terms of faculty publication in the discipline's leading journals over the recent decades.

The Department's graduate program is comprehensive; hence, specialization is possible in many aspects of political science, including American politics, comparative politics, international relations, and political theory. Specific programs of study, including minor fields, can be developed to meet the needs and interests of the individual student. Because graduate study involves both individual research and course work, emphasis is placed on close consultation between faculty and students. The department's graduate students have published their research in leading scholarly journals and presented their research at major political science conferences, both in collaboration with faculty and individually.

Administration

Political Science as a Minor

MA Requirements

A minor in political science consists of six hours of coursework with an average of 3.0 or better. Coursework should be limited to one field of political science.

PhD Requirements

A minor in political science consists of twelve hours of coursework, with an average grade of 3.0 or better. Coursework will normally be limited to a single field of political science. Permission may be granted to offer courses in more than one field if, in the opinion of the minor professor, it would serve the student's particular needs.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department throughout the year, with a **February 15** deadline for applicants seeking funding to begin study the following fall. Applicants must adhere to the application deadlines established by the Graduate School. Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation from faculty who are familiar with their academic work. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score. Students who have a less extensive background in Political Science (e.g., fewer than 18 undergraduate credit hours in Political Science) may be offered provisional admission and asked to complete several undergraduate courses, perhaps concurrently with introductory graduate courses, before full admission.

Financial Assistance

The department offers a number of graduate assistantships and fellowships. Department assistantships presently provide \$10,750 per year and a waiver of tuition; students are responsible for paying required university fees. No separate application is necessary to be considered for a departmental assistantship. To ensure consideration for financial aid, all application materials should be submitted by February 15 and in accordance with deadlines established by the LSU Graduate School.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Kathleen Bratton (M) • American politics, gender politics, state politics, legislative politics
Joseph Clare (M) • International politics, American foreign policy
William Clark (7M) • Comparative politics, comparative political institutions, specialization in Russian politics and government
Belinda Davis (M) • American politics, public policy, state politics
Johanna L. Dunaway (M) • American politics; media politics, political communication
Cecil Eubanks (M) • Contemporary political thought, existentialism, politics and literature, political theology
James Garand (M) • American national political institutions, electoral politics, public opinion, public policy, domestic political economy, research methods and statistics
Robert Kirby Goidel (M) • American politics, political participation, elections and campaign finance, public opinion, media and politics
Stacia L. Haynie (M) • American judicial politics, public law, comparative judicial behavior
Robert Hogan (M) • American politics, campaigns and elections, state politics, legislative politics
Dustin E. Howes (M) • Political theory, ancient, modern and contemporary political thought
Christopher Kenny (M) • American politics, campaigns and elections, mass political behavior, process of social influence, methodology
Wonik Kim (7M) • Comparative politics, comparative political economy, comparative social welfare policy
Christopher B. Mann (6A) • American politics, political communication, experimental research methods
Payam Mohseni (6A) • Comparative politics, Middle East politics
Kevin V. Mulcahy (M) • American national politics, presidential politics, public policy, specialization in cultural policy making
T. Wayne Parent (M) • American politics, Southern politics, electoral politics, political attitudes
Leonard Paul Ray (M) • Comparative politics, electoral politics, party politics
G. Ellis Sandoz (M) • Political philosophy, emphasis on American, European and Russian political thought
Rosanne M. Scholl (6A) • American, public opinion, political communications
David Sobek (7M) • International relations, international conflict, terrorism, civil war
James R. Stoner, Jr (M) • Political theory, English common law, American constitutionalism
Jas M. Sullivan (M) • American politics, race and ethnicity
Daniel C. Tirone (6A) • International relations, international political economy

Masters

Political Science, M.A.

(APOLI)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a master's thesis, unless a student earning a master's on the way to a PhD is approved for a thesis by-pass. 34-37 hours of credit at the graduate level must be earned for the MA, including a maximum of nine hours of credit for the thesis. The curricular requirements include:

- A principal field consisting of a minimum of nine hours of earned credit in a specified field of study.
- A secondary field consisting of a minimum of six hours of earned credit in a different field of study.
- Two required seminars (POLI 7961 and POLI 7962).
- A one-credit professional development seminar (POLI 7000).
- Six hours of electives or a Minor Field in another department.
- A master's thesis, with an oral defense.

Doctorate

Political Science, Ph.D.

(PPOLI)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a doctoral dissertation. At least 64 hours of credit at the graduate level must be earned including a minimum of nine hours of credit for the dissertation. The curricular requirements include:

- A principal field consisting of a minimum of 15 hours of earned credit in a specified field of study.
- A secondary field consisting of a minimum of 12 hours of earned credit in a different field of study.
- A third field, or a Minor field in another department (3-12 hours).
- Three required seminars (POLI 7961, POLI 7962, and POLI 7963) [students whose principal field is political theory may substitute a research skills course, for example an additional language, for POLI 7963].
- Proficiency in one foreign language [students whose principal field is American politics may substitute an advanced research skills course, for example POLI 7964, for a foreign language].
- A one-credit professional development seminar (POLI 7000).
- Approved electives (6-15 hours).
- A general examination, written and oral, in the principal and secondary field, after the completion of all the previous requirements.

- A dissertation, with an oral defense (PhD final examination).

Psychology (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, click [here](#).

Program Overview

The department offers training in the following primary specialty areas: Biological Psychology, Clinical Psychology, Cognitive and Developmental Psychology, and School Psychology. The program is a doctoral program—it is not appropriate for students seeking to complete their education with a master's degree. We do not offer degrees in Counseling Psychology or Social Work. Appropriate departments for these programs at LSU are the College of Education and the School of Social Work, respectively.

The Department of Psychology at LSU is committed to the view that psychology is both a science and a profession. Both faculty and students in psychology endorse the model of the psychologist as a scientist-practitioner. The program's major emphasis is on research training and experience, and the teaching of psychology. All graduate students, regardless of intended area of specialization, receive broad training to develop research capability for scholarly contributions to the discipline of psychology throughout their careers. If you are interested only in the professional application of psychology, without regard for research, you will not be comfortable in the graduate training program in this department. Graduate students in this department are expected to develop a lifelong commitment to science and to the highest social-ethical ideals of the profession of psychology.

The graduate program in psychology follows the mentor model. For this reason, it is recommended that prospective students review our faculty web pages along with this document (www.lsu.edu/psychology). Each faculty member has additional information regarding his/her interests and publications listed there. This is an effective way to determine if your goals and interests match those of our faculty and our program, as well as to find examples of the research conducted here at LSU.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received in early December and evaluated by the department within the following two months. Applicants must adhere to the application deadlines established by the Graduate School and the Department of Psychology.

Students seeking admission must submit satisfactory credentials from previous study, acceptable verbal and quantitative GRE scores, and three letters of recommendation. Minimum undergraduate course experience should include an introductory psychology course, a basic statistics course (preferably from a behavioral/social science program), and a research methodology course (preferably from a behavioral/social science program). International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

In-depth information about the department, its faculty, and specialty areas for prospective students is available at www.lsu.edu/psychology/prospectivestudents.html.

Financial Assistance

Financial assistance is available to some students. A student should contact his or her home department for more information on available assistantship positions. The department makes every effort to obtain financial support for graduate students to the extent that funds are available. Sources of funds include departmental teaching and research assistantships (approximately \$10,500 per academic year). The department also arranges support from outside agencies, such as mental health centers and community or industry research programs. To ensure consideration for financial aid, all application materials should be submitted in accordance with the psychology department's December 1 deadline, and in accordance with those established by the LSU Graduate School.

Facilities

- Audubon Hall contains numerous rooms and lab facilities.
- The department's Psychological Services Center (PSC), an on-campus facility located in Johnston Hall, is operated by the department to offer graduate training and research in adult clinical, medical clinical, child clinical, and school psychology. The PSC Adult Clinic and Child Clinic provide diagnostic and therapeutic services for adults and children in the Baton Rouge community, excluding students enrolled at LSU. Children of LSU students are seen, however, and LSU Student Health Center referrals are taken there.
- Other sources of clinical populations are local clinics and schools, Baton Rouge Speech and Hearing Foundation, and Pinecrest Developmental Center. Clinical doctoral students work with autistic, mentally retarded, and visually impaired children, as well as preschoolers described as non-categorical (children who have some handicap, but are too young for well-delineated symptoms) for both practicum and research purposes.
- Additional research is conducted at the Pennington Biomedical Research Center.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Claire D. Advokat (EM) • Biological—Psychopharmacology, drugs used to treat mental illness and neurological disorders, ethics of clinical research, drugs of abuse

Alan A. Baumeister (M) • Biological—History of biological psychiatry, neuropharmacology

Melissa R. Beck (M) • Cognitive and Developmental—Visual memory and attention; the roles of encoding, retrieval, M decision making and metacognition in the perception of a continuous and stable visual world

Phillip J. Brantley (M) • Clinical—behavioral medicine, emphasis on the effects of stress and learning on illness

Julia Buckner (6A) • Clinical—Adult anxiety disorders with an emphasis on the transactional relations between anxiety and substance abuse; use of motivation enhancement to encourage seeking of and adherence to empirically-supported treatments for anxiety disorders and addiction

Katie E. Cherry (M) • Cognitive and Developmental—Cognitive aging, especially memory processes in healthy older adults; memory interventions for cognitively impaired older adults; interdisciplinary studies of healthy aging in the oldest old

Alex S. Cohen (M) • Clinical—Severe adult psychopathology, emotion and neurocognition-based abnormalities in schizophrenia, computerized measurement of symptoms, social dysfunction and mental illness

Amy Copeland (M) • Clinical—Role of motivational variables (e.g., outcome expectancies and affect) in the etiology and cessation of stimulant use; smoking cessation; HIV risk and substance abuse

Thompson Davis III (7M) • Clinical—Assessment and treatment of anxiety disorders in children, adolescents, and young adults, in particular, the phenomenology, etiology, assessment, and treatment of specific phobias (i.e., intense, persistent fears of specific animals, situations, environments, and the like)

Emily M. Elliott (7M) • Cognitive and Developmental—Memory and the development of memory in children; attention, and in particular, the interaction of attention and immediate memory

James H. Geer (EM)

Paula J. Geiselman (7M) • Biological—Behavioral, nutritional, and physiological control of appetite and body weight

Drew Gouvier (EM) • Clinical—Clinical neuropsychology; base rates, post concussion syndrome, malingering detection, and social implications of disabilities

Frank M. Gresham (M) • School—Use of problem solving methods to remediate academic and social behavioral difficulties of children and adolescents; use of a response to intervention approach in the assessment of learning disabilities and emotional and behavioral disorders; social skills assessment and training for children and adolescents

Mike F. Hawkins (6A) • Biological—Central nervous system regulation of stress responding and ingestive behavior

Jason Hicks (M) • Cognitive and Developmental—Human learning and memory; source memory; prospective memory; recognition memory; control and decision processes in memory retrieval

Glenn N. Jones (3F) • Clinical—Behavioral medicine; psychology in medical settings; clinical interviewing and rapid screening for psychopathology; cognitive behavioral assessment and treatment of adult disorders; psychopathology and substance abuse among HIV+ patients.

Mary Lou Kelley (M) • Clinical—Behavioral assessment and treatment of children and adolescents; attention deficit hyperactivity disorder; behavioral pediatrics

Irv Lane (EM)

Sean Lane (7M) • Cognitive and Developmental—Memory and cognitive processes; memory for eyewitness situations; source memory; metacognition in learning and decision-making; cognition in complex real-world events

Anna C. Long (6A) • School—Treatment integrity of evidence-based practices in schools; teacher effectiveness

Robert C. Mathews (M) • Cognitive and Developmental—Applying cognitive theory to real-world problems (e.g., developing training to enhance learning and decision-making); interactions between conscious problem solving processes and nonconscious, or implicit, processes

Johnny Matson (M) • Clinical—Mental retardation and related developmental disabilities; social skills training; childhood depression; differential diagnosis; behavioral assessment and treatment

Janet McDonald (M) • Cognitive and Developmental—Language acquisition; age of acquisition and grammatical mastery; bilingualism; language comprehension

George Noell (M) • School—Behavioral consultation, treatment integrity

Megan Papesh (6A) • Cognitive and Developmental—Episodic memory; the role of eye movements in learning and retrieval; face perception and recognition; pupillometry and human cognitive neuroscience

Tyler Renshaw (6A) • School—Positive psychology; mindfulness; aggression and bullying; school climate; population-based service delivery

Tracy Rizzuto (7M) • Industrial/Organizational—Acceptance and training, new technology implementation

William F. Waters (EM)

Donald A. Williamson (M) • Clinical—Psychopathology and treatment of eating disorders

Joseph C. Witt (EM)

Degree Programs

LSU's doctoral program in psychology only admits students interested in working toward a doctoral degree. The MA may be earned along the way, as explained below, but is not a terminal master's degree program. Students desiring only a master's degree should not apply. Training is offered in the following specialty areas: biological, clinical, cognitive and developmental, and school psychology.

Masters

Psychology, M.A.

(APSYC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree is a thesis degree, requiring a thesis project. At least 36 hours of credit at the graduate level must be earned, including six hours of credit for the thesis project (PSYC 8000). The curricular requirements include:

- At least 15 hours at the 7000 level or above.
- A primary area consisting of a minimum of six hours of earned credit in a specified field of study, which may include seminar or practicum credit.
- A minimum core requirement of the courses PSYC 4008, PSYC 7030, PSYC 7034, and PSYC 7040; two courses from among PSYC 4111, PSYC 7020, PSYC 7111, and PSYC 7117; and six credits of PSYC 8000.

The student must pass a final exam consisting of a written thesis document and a comprehensive oral exam (i.e., the thesis defense).

Doctorate

Psychology, Ph.D.

(PPSYC)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee, and varies depending on the area of specialization. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements of the LSU Graduate School for graduate committees are satisfied.

The degree is a thesis degree requiring a dissertation project. Forty-eight hours of credit at the graduate level must be earned including a maximum of 12 hours of credit for the dissertation project. The curricular requirements include:

- At least 24 hours at the 7000 level or above, exclusive of any type of independent studies credit except for special project credit earned.
- A primary area consisting of a minimum of 15 hours of earned credit in a specified field of study.

The student must pass a general exam consisting of a written exam and a comprehensive oral exam, at the discretion of the student's advisory committee. The nature of the written and oral portions of the general exam is listed below in the area-specific curricula section for each area.

Core Courses Policy

For all students in the PhD program, satisfactory completion of the core courses is required to be qualified for advanced doctoral study. Satisfactory completion constitutes passing the required courses with a grade of "A" or "B" by the end of your second year in the program. Each course is generally offered once a year. If you feel you have a particularly strong background in one or more of the core areas, you may take the final exam in any course; you will have satisfied the core requirement if you earn a grade of "A" or "B." You must secure a letter from the course instructor giving your exam grade for inclusion in your file, as evidence of satisfying this requirement.

Core Courses: Biological Basis of Behavior (PSYC 7034), Cognitive Basis of Behavior (PSYC 7030), Social Basis of Behavior (PSYC 7040), and History of Modern Psychology (PSYC 4008); and two of four courses: Intermediate Statistics (PSYC 4111), Advanced Statistics (PSYC 7111), Measurement of Behavior (PSYC 7020) or Methodology and Research (PSYC 7117). If you do not complete the courses with satisfactory grades within the first two years, you will be dismissed from the program. Any new student failing more than one core course on the first attempt will be dismissed from the program.

Area-specific curricula

Below are further requirements for the different program areas: Biological, Clinical, Cognitive/Developmental, and School. These area requirements include those listed above, but address others that are area specific. Additional details about each area-specific curriculum may be found at www.lsu.edu/psychology/graduate.

Biological Psychology

Biological Core Courses (must take five of the courses below in Groups A through F; at least three must be from Groups A and B)

Group A

- PSYC 4031 Sensory and Perceptual Processes (3)
- PSYC 4035 Drugs, the Brain and Behavior (3)
- PSYC 4037 Neuropharmacology (3)
- PSYC 4039 Madness and Medicine (3)
- PSYC 7938 Seminar in Experimental Psychology (3) or
- PSYC 7939 Seminar in Experimental Psychology (3)

Group B

- BIOL 4158 Endocrinology (3)
- BIOL 4160 Vertebrate Physiology (3)
- BIOL 4177 Neurobiology (3)
- BIOL 4299 Genetics of the Evolutionary Process (4)
- BIOL 4800 Selected Topics in Biological Sciences (2-4)
- BIOL 7290 Complex Carbohydrates (3)
- CBS 7614 Central Nervous System (3)

Group C

- KIN 4605 Habituating and Addictive Drugs in Our Culture (3)
- KIN 4512 Lifespan Motor Development (3)
- KIN 4520 Psychosocial Aspects of Physical Activity (3)

Group D

- KIN 7503 Dimensions of Aging (3)

- KIN 7508 Analysis of Human Movement (3)
- KIN 7510 Motor Learning (3)
- KIN 7512 Motor Control (3)
- KIN 7530 Exercise Physiology (3)
- KIN 7535 Neuromuscular Aspects of Exercise (3)
- KIN 7601 Changing Health Behavior (3)

Group E

- COMD 4250 Anatomy and Physiology of Speech and Hearing (3)
- COMD 7280 Neuroanatomical Bases of Speech and Hearing (3)
- COMD 7385 Neuropathologies of Speech (3)
- COMD 7387 Aphasia in Adults (3)

Group F

- HUEC 4111 Nutrition and Disease I (4)
- HUEC 4114 Nutrition and Disease II (4)
- HUEC 7004 Molecular and Clinical Nutrition I (2)
- HUEC 7005 Molecular and Clinical Nutrition II (2)

Other required course work

- PSYC 8000 Thesis Research (1-12 per sem.) (6 credits maximum) *
- PSYC 9000 Dissertation Research (1-12 per sem.) (12 credits maximum) *
- PSYC 4999 Independent Reading and Research in Psychology (1-6) (6 credits maximum) *
- PSYC 8939 Independent Research: Experimental Psychology (1-6) (15 credits maximum) *

Note:

*Additional hours may be taken, but the number listed is the maximum allowed to apply toward degree.

In the Biological Psychology area, the General examination consists of a written and oral examination. The written portion consists of an essay exam based on questions supplied by the student's advisory committee. The oral exam focuses primarily on the written portion of the exam, and is undertaken only after passing the written component.

Clinical Psychology

Clinical Core Courses

- PSYC 7020 Measurement of Behavior (3) †

- PSYC 4111 Intermediate Statistics (3) + or
- PSYC 7111 Advanced Statistics (3) +

- PSYC 7125 Psychological Assessment I (3)
- PSYC 7925 Psychological Assessment II (3)
- PSYC 7171 Developmental Disorders and Psychopathology of Children (3)
- PSYC 7982 Advanced Psychopathology (3)
- PSYC 7927 Psychotherapy and Behavior Change (3)
- PSYC 7929 Cultural Diversity Issues in Counseling and Therapy (3)
- PSYC 7999 Professional Considerations in Psychology (3)

Must take one of the following

- PSYC 7972 Child Behavior Therapy (3)
- PSYC 7185 Behavior Therapy (3)

Other required course work

- PSYC 7688 Practicum in Clinical Psychology (1-3) (6 credits maximum) *
- PSYC 7689 Practicum in Clinical Psychology (1-3) (6 credits maximum) *
- PSYC 8000 Thesis Research (1-12 per sem.) (6 credits maximum) *
- PSYC 9000 Dissertation Research (1-12 per sem.) (12 credits maximum) *
- PSYC 7997 Clinical Psychology Internship (3 or 6) (15 credits required)

Optional courses

- PSYC 7117 Methodology and Research Design (3)

- PSYC 7990 Teaching of Psychology (3)
- PSYC 7690 Teaching of Psychology Practicum (1-3) (3 credits maximum) *

Note:

*Additional hours may be taken, but the number listed is the maximum allowed to apply toward degree.

+All clinical students must take and pass PSYC 4111 or PSYC 7111. The student must take PSYC 4111 unless granted permission by the instructor of PSYC 4111 to take PSYC 7111. This decision will be based on a determination that a course equivalent to PSYC 4111 has been taken previously.

†PSYC 7020 doubles as a qualifying core course and a clinical core course.

In the Clinical Psychology area, the general examination consists of a written case report and an oral presentation/examination based on the case report. Details concerning the nature of the report can be found [here](#).

Cognitive and Developmental Psychology

Cognitive Core Courses

- PSYC 7117 Methodology and Research Design (3) †
- PSYC 4111 Intermediate Statistics (3) †

Seminar hours (must take 21 hours of the following)

- PSYC 7938 Seminar in Experimental Psychology (3)
- PSYC 7939 Seminar in Experimental Psychology (3)
- PSYC 7754 Psycholinguistics: Linguistic Perspectives (3)
- PSYC 7990 Teaching of Psychology (3) +
- PSYC 7690 Teaching of Psychology Practicum (1-3) (3 credits maximum) + *

Other required courses

- PSYC 4111 Intermediate Statistics (3) †
- PSYC 7117 Methodology and Research Design (3) †
- PSYC 8000 Thesis Research (1-12 per sem.) (6 credits maximum) *
- PSYC 9000 Dissertation Research (1-12 per sem.) (12 credits maximum) *
- PSYC 8939 Independent Research: Experimental Psychology (1-6) (15 credits maximum) *

Optional courses

- PSYC 4999 Independent Reading and Research in Psychology (1-6) (6 credits maximum) *
- PSYC 7020 Measurement of Behavior (3)
- PSYC 7111 Advanced Statistics (3)

Note:

*Additional hours may be taken, but the number listed is the maximum allowed to apply toward degree.

+PSYC 7990 and PSYC 7690 may be taken to substitute for one required seminar.

†PSYC 4111 and PSYC 7117 double as qualifying core courses and cognitive/developmental core courses.

The general examination for students in the Cognitive/Developmental area consists of two written components and an oral examination. The first written component consists of a written research proposal, in the form of a grant proposal. The second written component consists of exam-based questions generated by the faculty on a student's advisory committee. The oral examination consists of a defense of the written components.

School Psychology

School Core Courses (must be completed before internship)

- PSYC 7117 Methodology and Research Design (3) †
- PSYC 4111 Intermediate Statistics (3) †
- PSYC 7111 Advanced Statistics (3) †
- PSYC 7125 Psychological Assessment I (3)
- PSYC 7165 Psychoeducational Assessment (3)
- PSYC 7929 Cultural Diversity Issues in Counseling and Therapy (3)
- PSYC 7060 Ethical, Legal and Professional Issues in School Psychology (3)
- PSYC 7660 School Psychological Consultation (3)
- PSYC 7973 School-Based Psychological Interventions (3)
- PSYC 7171 Developmental Disorders and Psychopathology of Children (3)
- PSYC 7968 Current Problems in School Psychology (3)
- PSYC 7972 Child Behavior Therapy (3)
- PSYC 7946 Theories and Concepts of Behavior Analysis (3)

- PSYC 7948 Research Methodology and Application in Behavior Analysis (3)
- PSYC 7949 Behavioral Perspectives on Child and Adolescent Development (3)
- PSYC 7688 Practicum in Clinical Psychology (1-3) (3 credits required)
- PSYC 7668 Practicum in School Psychology (1-6) (9 credits maximum) *
- PSYC 7669 Practicum in School Psychology (1-6) (9 credits maximum) *
- PSYC 8000 Thesis Research (1-12 per sem.) (6 credits maximum) *

Other required courses

- PSYC 7969 Internship in School Psychology (1-6) (12 credits maximum) *
- PSYC 9000 Dissertation Research (1-12 per sem.) (12 credits maximum) *

Note:

*Additional hours may be taken, but the number listed is the maximum allowed to apply toward degree.

†PSYC 4111, PSYC 7020, PSYC 7111, and PSYC 7117 double as qualifying core courses and School Psychology core courses.

The general examination for School Psychology students is comprised of a series of written examinations and an oral defense. The written exams are designed to assess students' competency in six areas of school psychology. These areas include: (1) Law and Ethics, (2) School-Based Interventions, (3) School Psychological Consultation, (4) Applied Behavior Analysis, (5) Assessment, and (6) research methodology. The written exams are conducted over a period of two days. An oral exam is also administered following completion of the written exams. In the oral defense students are questioned regarding their answers on the written exam or on questions related to the fields of School Psychology.

Public Administration Institute (Graduate Program)

Program Overview

The MPA program is a 42-hour professional program in public administration. The program consists of 33 hours of core courses and nine hours of courses in an area of specialization.

Administration

Dual Degree Program in JD/MPA

[Click to view the Dual Degree Program in JD/MPA](#)

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Admissions, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department on an ongoing basis. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, information on any work experience, listing of outside activities and volunteer efforts, and three letters of recommendation. The PAI examines all aspects of an applicant's credentials in making decisions to admit an applicant to the MPA program. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Students who have already taken another standardized test such as the GMAT or the LSAT may ask the PAI to accept that score in lieu of the GRE.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School.

Graduate Faculty

Roy Heidelberg (6A)
Jared Llorens (M)
Astrid E. Merget (M)
Boris Morozov (6A)
James A. Richardson (M)
Richard White (M)

Masters

Public Administration, M.P.A.

The student will take 33 hours of core courses and nine hours of courses in an area of specialization. The core courses are PADM 5010, PADM 5600, PADM 7710, PADM 7850 or PADM 7851, PADM 7900, PADM 7910, PADM 7911, PADM 7912, PADM 7914, PADM 7917, and ECON 4110. These courses have been selected by the faculty of the Public Administration Institute. The three courses in the area of specialization will be selected by the student in consultation with the director of the MPA program. The MPA is a non-thesis program. It does require an internship (for students who are pre-service) or a practicum (for students who are in-service). Students are responsible for getting their own internships though the institute will provide information about potential internships. An exit examination is given the semester in which the student is graduating. Finally, all MPA students are required to maintain a MPA portfolio that includes a resume, objectives, and, information for all courses taken. The MPA portfolio must be presented to the faculty at the exit examination.

Graduate

Dual Degree: JD/MPA

Students interested are encouraged to visit the individual program site.

- JD/DCL-MPA

LSU and the Paul M. Hebert Law Center offer several dual degree programs, allowing a student to earn both the JD/DCL and a master's degree.

Students enrolling in the dual degree programs must be admitted separately to the LSU Graduate School and the Law Center. Students should consult with the admissions office of each institution prior to enrollment.

Each program has specific requirements, which can be found by visiting the website listed above.

Students successfully completing the program listed above will receive two degrees, a JD/DCL awarded by LSU's Hebert Law Center and a master's degree awarded by LSU.

Renewable Natural Resources (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

LSU has a long tradition in natural resource education and research, beginning with its first forestry class in 1911 and continuing to the present School of Renewable Natural Resources. The importance of renewable resources to Louisiana is evident in the \$4 billion annual economic impact to the state from natural resource commodities (e.g., timber harvesting, wood products, recreational hunting, hunting leases, recreational and commercial fishing). However, the benefits of sustaining viable natural resources go far beyond their economic value and include a diversity of ecosystem services, including storm amelioration, water quality improvement, wildlife habitat, hydrologic processing, and maintenance of terrestrial and aquatic biodiversity. Today, programs in the school are focused on both basic and applied research and teaching in the fields of aquaculture, fisheries, forestry, forest products, watershed function, wetlands, and wildlife. The school has established close working relationships with private landowners, private industry, commodity groups, nonprofit conservation groups, and federal and state agencies, both in the U.S. and abroad. Combined with the research expertise of the school's faculty, the abundance and diversity of renewable natural resources in Louisiana provide a rich environment for graduate study.

Administration

Admission

All supporting materials and applications for graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials supplied by third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Louisiana State University, Baton Rouge, LA 70803. All documents will be scanned and stored electronically, and faculty in the School of Renewable Natural Resources will have access to all material submitted by and/or on behalf of a student applying for graduate study. International students whose native language is not English must also submit an acceptable TOEFL (minimum 213 on computer-based, 550 on paper-based, or 79 on Internet-based exams), IELTS (minimum 6.5) score, or PTE (minimum 59) score. The following documents should accompany all applications submitted to the Graduate School: transcript(s) of undergraduate study, transcript(s) of all graduate work, GRE scores (verbal and quantitative), three letters of recommendation, and a statement of purpose. The statement of purpose should include:

- Educational and work experience in the chosen area of concentration.

- Educational goals and career plans.
- Reasons for pursuing graduate studies in the school.
- A brief outline of research interests and potential thesis topics.
- Any other information that would assist faculty members with their admission recommendation.

If Graduate School admissions criteria are met, all documents will be forwarded to the graduate advisor in the school and evaluated by the appropriate faculty group for an admission recommendation. Applicants should adhere to the **February 1** deadline established by the Graduate School for the following fall semester.

Financial Assistance

Graduate research and teaching assistantships are awarded to incoming graduate students on a competitive basis and typically range from \$16,000 to \$20,000 per year. Outstanding applicants in forestry-related areas of research are eligible to compete for Gilbert Foundation Assistantships, which range from \$22,000 to \$25,000 per year and include a full tuition exemption. Rockefeller Scholarships, with awards of \$1,000 per year, are available to Louisiana students and to out-of-state students after one year of residence in the state. Wildlife students conducting waterfowl research are eligible to compete for the Bosch Memorial Assistantship. All graduate students can apply for small travel grants from The Graduate School to attend scientific meetings, and wildlife and fisheries students are also eligible for Glasgow Travel Grants administered by the school. To be considered for fellowships and state-funded assistantships, applications must be received by August 15 for the following spring semester and February 1 for the following fall semester.

Graduate Faculty

(check current listings by department by clicking [this link](#))

Fisheries and Aquaculture

Julie A. Anderson (6A) • Marine fisheries research and extension
 James W. Avault (EM) • Aquaculture
 C. Fred Bryan (EM) • Atchafalaya and Mississippi River ecology, estuarine nursery function
 Allyse Ferrara (3F) • Fisheries management and ecology
 Christopher C. Green (M) • Physiology and nutrition of aquatic organisms
 Michael D. Kaller (3F) • Stream fisheries, macroinvertebrate ecology, statistical analyses
 William E. Kelso (M) • Fisheries management, fish-habitat interactions, fish ecology
 Megan LaPeyre (3F) • Wetland fisheries, plant ecology, wetland ecology, coastal marsh management
 Charles G. Lutz (3A) • Aquaculture and fisheries extension
 William Ray McClain (3F) • Crawfish aquaculture
 Bryan P. Piazza (3F) • Fisheries ecology, aquatic system management
 Robert C. Reigh (M) • Fish and crustacean nutrition, feed development, feeding methods
 Brian J. Roberts (3F) • Stream ecology and metabolism
 Robert P. Romaine (M) • Water quality management, crustacean aquaculture, crawfish production
 Lawrence P. Rozas (3F) • Estuarine function and the dynamics of estuarine organisms
 D. Allen Rutherford (7M) • Lotic fish assemblages, ecology of larval and juvenile fish
 John E. Supan (3F) • Molluscan shellfish culture, management, depuration, and sanitation
 Rowland Glenn Thomas (3P) • Marine and freshwater fisheries management
 Terrance Tiersch (M) • Molecular genetics, hybridization, polyploidy, cryopreservation
 Huiping Yang (3F) • Genetics and gamete cryopreservation

Forestry

Michael A. Blazier (3F) • Forest management, timber production, fertilization
 Quang V. Cao (M) • Mensuration, forest biometrics
 Jim L. Chambers (M) • Forest ecology and tree physiology

S. Joseph Chang (M) • Forest economics, wood products utilization and marketing
Terry Clason (EM) • Intensive pine silviculture
Thomas J. Dean (M) • Quantitative silviculture, production ecology, stand dynamics
Hallie Dozier (3F) • Population demography of invasive plant species, ecology of plant invasions
Thomas Eberhardt (3F) • Wood chemistry, wood quality, forest health, new applications and technologies
Cornelis de Hoop (M) • Environmental safety and business in forest products
Chung-Yun Hse (3F) • Wood composites and adhesives
Richard F. Keim (7M) • Ecology, management, and restoration of bottomland hardwood ecosystems
Kenneth W. Krauss (3F) • Coastal forest ecology and management
Zhijun Liu (7M) • Tree physiology, cultivation of medicinal plants, micropropagation
Hui Pan (3F) • Forest products, recycling
Yadong Qi (3F) • Urban forestry, forest biology
Todd F. Shupe (3F) • Wood and wood composites, treated wood recycling, fiber utilization
Richard P. Vlosky (3F) • Wood products marketing, technology applications to improve wood products
Qinglin Wu (3F) • Wood drying moisture relationships, and hygroscopic shrinkage and swelling
Yi-Jun Xu (M) • Hydrologic and biogeochemical processes and modeling

Wildlife

Alan D. Afton (3F) • Avian behavioral ecology and bioenergetics, waterfowl ecology and management
Robert Chabreck (EM) • Ecology of marsh vegetation, dynamics of marsh-dwelling wildlife
Robert B. Hamilton (EM) • Avian ecology
Sammy L. King (3F) • Wetland ecology, wildlife and habitat management
James M. LaCour (3F) • Wildlife diseases and epizootics
John Andrew Nyman (M) • Wetland wildlife management and ecology, coastal marsh management
Philip C. Stouffer (M) • Conservation biology, avian ecology, neotropical migratory birds
Sabrina S. Taylor (6A) • Conservation genetics, management of rare species
Michael J. Chamberlain (3F) • Wildlife management, mammal ecology
Alfred D. French (3F) • Cotton fiber moisture, carbohydrate chemistry
Erik I. Johnson (3F) • Avian ecology, tropical bird habitat conservation
Thomas E. Moorman (3F) • Waterfowl ecology and management
Cheng Piao (3F) • Wood science, forest products

Masters

Renewable Natural Resources, M.S.

(SRNR)

The school offers the MS degree in Renewable Natural Resources with areas of concentration in Fisheries and Aquaculture, Forest Products, Forestry and Forest Resources, Watershed Science, and Wildlife. Students in each of the areas of concentration work with their advisory committee to develop an approved departmental-level academic course plan that will become part of their academic file. The committee must include the student's major advisor and at least two additional members of the graduate faculty to satisfy requirements of the Graduate School.

The MS degree programs in the school require each student to complete 24 hours of course work (12 hours of which must be at the 7000 level or above), six hours of thesis research credits, and successful defense of a thesis research project. No more than six total hours of RNR 7029 Advanced Topics in Renewable Natural Resources (1-4) or RNR 8900 Research Problems in Natural Resources (1-3) may be included in the departmental-level academic course plan, with no more than four hours taken in any one semester. Regulations regarding the inclusion of credits earned from courses at other institutions in the departmental-level academic course plan can be found elsewhere in "The Graduate School" section.

Each student accepted into the school will have an initial qualifying exam during the first semester administered by at least three school faculty members. This exam will identify areas of knowledge that can be improved through course work, and these

courses will be included on the student's departmental-level academic course plan. Each MS student will be required to take the following nine hours of courses as part of their required 24-hour departmental-level academic course plan:

- RNR 7001 Research Methodology (3)
- RNR 7070 Graduate Seminar in Fisheries (1)
- RNR 7071 Graduate Seminar in Forestry (1) or
- RNR 7072 Graduate Seminar in Wildlife (1) (two semesters required)
- EXST 7003 Statistical Inference I (4) or
- EXST 7004 Experimental Statistics I (4) or
- EXST 7005 Statistical Techniques I (4)

In addition to these nine hours, MS students in the school will be required to take courses specified in each area of concentration (AOC) as part of their 24-hour departmental-level academic course plan. Specific course requirements for the MS AOCs in the SRNR include:

Master of Science in Renewable Natural Resources (SRNR), Fisheries and Aquaculture AOC (FAQM)

The Fisheries and Aquaculture AOC requires a minimum of nine hours of course work in addition to the general nine-hour requirement for all MS students in the school. The following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, are required, and may be included in the 9 hours required for this AOC:

- RNR 4022 Principles of Aquaculture (4)
- RNR 4025 Limnology (3)
- RNR 4037 Biology of Fishes (3)
- RNR 4040 Fisheries Management (3)
- RNR 4145 Ichthyology (4)

Note:

Depending on prior course work and experience, additional courses may be required to satisfy the 24-hour course requirement for the MS degree. Additional courses determined by the advisory committee will be included in the approved departmental-level academic course plan. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Fisheries and Aquaculture AOC are available on the SRNR website.

Master of Science in Renewable Natural Resources (SRNR), Forest Products AOC (FPDM)

The Forest Products AOC requires a minimum of 9 hours of course work in addition to the general nine-hour requirement for all MS students in the school. The following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, are required, and may be included in the nine hours required for this AOC:

- RNR 7029 Advanced Topics in Renewable Natural Resources (1-4)
- RNR 4038 Forest Resource Economics (3)

- ENVS 7041 Environmental Policy Analysis (3)
- ENVS 7047 Environmental Economics and Policy (3)
- GEOG 4078 Environment and Development (3)
- ME 4723 Advanced Materials Analysis (3)
- ME 7953 Advanced Topics in Mechanical Engineering (3)
- HUEC 7047 Modern Fiber Science and Technology (3)

Master of Science in Renewable Natural Resources (SRNR), Forestry and Forest Resources AOC (FRSM)

The Forestry and Forest Resources AOC will require a minimum of 9 hours of course work in addition to the general nine-hour requirement for all MS students in the school. Additional courses determined by the advisory committee will be included in the approved departmental-level academic course plan. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Forestry and Forest Resources AOC are available on the SRNR website (www.rnr.lsu.edu).

Master of Science in Renewable Natural Resources (SRNR), Watershed Science AOC (WSCM)

The Watershed Science AOC will require a minimum of nine hours of course work in addition to the general nine-hour requirement for all MS students in the school, including RNR 4900 Watershed Hydrology (3), or demonstration to the student's graduate committee of proficiency in watershed hydrology from previous course work and experience. The remaining hours will be determined by each student's committee and will be dependent on the needs of the student and the committee-approved thesis project. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Watershed Science AOC are available on the SRNR website.

Master of Science in Renewable Natural Resources (SRNR), Wildlife AOC (WLDM)

The Wildlife AOC will require a minimum of nine hours of course work in addition to the general 9-hour requirement for all MS students in the school. The following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, are required, and may be included in the nine hours required for this AOC:

- RNR 7013 Wildlife Population Dynamics (3)
- RNR 7016 Current Topics and Techniques in Conservation Science (3)

Note:

Depending on prior course work and experience, additional courses will be required to satisfy the 24-hour course requirement for the MS degree. Additional courses required for each student's departmental-level academic course plan will be determined by the graduate committee. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Wildlife AOC are available on the SRNR website.

Doctorate

Renewable Natural Resources, Ph.D.

(PRNR)

The school offers the PhD degree in Renewable Natural Resources with areas of concentrations in Fisheries and Aquaculture, Forest Products, Forestry and Forest Resources, Watershed Science, and Wildlife. This degree program requires a minimum of

48 hours of coursework beyond the BS degree, nine hours of dissertation research (RNR 9000), a qualifying exam taken during the first semester, a general exam (written, oral, or both) taken upon completion of coursework specified in the program, and defense of a completed dissertation. A departmental-level academic course plan must be approved by the student's committee during the first year in residence. The committee must include four members of the graduate faculty, plus a representative appointed by the dean of the Graduate School. Regulations on committee membership and the inclusion of credits earned from courses at other institutions in the departmental-level academic course plan can be found in "The Graduate School" section.

As part of the 57-hour post-baccalaureate departmental-level academic course plan (48 hours of coursework, nine hours of dissertation research), each student will be required to take the following 13 hours of courses:

- RNR 7001 Research Methodology (3) (may be waived by the graduate committee)

- RNR 7070 Graduate Seminar in Fisheries (1)
- RNR 7071 Graduate Seminar in Forestry (1) or
- RNR 7072 Graduate Seminar in Wildlife (1) (two semesters required)

- EXST 7003 Statistical Inference I (4) or
- EXST 7004 Experimental Statistics I (4) or
- EXST 7005 Statistical Techniques I (4)

- EXST 7013 Statistical Inference II (4) or
- EXST 7014 Experimental Statistics II (4) or
- EXST 7015 Statistical Techniques II (4)

No more than six total hours of RNR 7029 Advanced Topics in Renewable Natural Resources (1-4) or RNR 8900 Research Problems in Natural Resources (1-3) may be included in the departmental-level academic course plan, with no more than four hours taken in any one semester. Specific curricular requirements for the five AOCs include:

Doctor of Philosophy in Renewable Natural Resources (PRNR), Fisheries and Aquaculture AOC (FAQP)

The Fisheries and Aquaculture AOC will require a minimum of 15 hours of course work in addition to the general course requirements for all PhD students in the school. The following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, are required, and may be included in the 15 hours required for this AOC:

- RNR 4022 Principles of Aquaculture (4)

- RNR 4037 Biology of Fishes (3)

- RNR 4025 Limnology (3)

- RNR 4040 Fisheries Management (3)

- RNR 4145 Ichthyology (4)

- RNR 7020 Ecology of Fishes (3)

- RNR 7036 Advanced Topics in Natural Resources Biometrics and Management (3)

Note:

Depending on prior course work and experience, additional courses determined in consultation with the advisory committee will be required to satisfy the 48-hour course requirement for the PhD degree. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Fisheries and Aquaculture AOC are available on the SRNR website.

Doctor of Philosophy in Renewable Natural Resources (PRNR), Forest Products AOC (FDPP)

The Forest Products AOC will require a minimum of 15 hours of course work in addition to the general course requirements for all PhD students in the school. Depending on the research area, the following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, may be included in the 15 hours required for this AOC.

Course work for a doctoral student conducting research in marketing and business development:

- RNR 4038 Forest Resource Economics (3)
- RNR 7029 Advanced Topics in Renewable Natural Resources (1-4)
- MKT 4440 Marketing on the Internet (3)
- MKT 4443 International Marketing (3)
- MKT 7477 Seminar in Advanced Marketing Problems (3)
- ECON 7630 Econometric Methods (3)

Course work for a doctoral student conducting research in wood chemistry:

- CHEM 4563 Problems in Organic Structure Elucidation (3)
- BIOL 4001 Physical Chemistry (3)
- CHEM 4010 Macromolecular Systems I (3)
- CHEM 4011 Macromolecular Systems II (3)
- CHEM 4552 Instrumental Characterization of Organic Compounds (2)

Note:

Depending on prior course work and experience, additional courses determined in collaboration with the graduate committee will be required to satisfy the 48-hour course requirement for the PhD degree. Examples of potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Forest Products AOC are available on the SRNR website.

Doctor of Philosophy in Renewable Natural Resources (PRNR), Forestry and Forest Resources AOC (FRSP)

The Forestry and Forest Resources AOC will require a minimum of 15 hours of course work in addition to the general nine-hour requirement for all PhD students in the school. The required courses will be tailored to the student's area of research by the graduate committee. It is anticipated that these 15 hours will come from the following courses in the school:

- RNR 4033 Silviculture and Management of Hardwoods (4)
- RNR 4038 Forest Resource Economics (3)
- RNR 4032 Forest Fire Protection and Use (2)
- RNR 4036 Forest Management (4)
- RNR 4107 Human Dimensions in Natural Resources (3)
- RNR 4900 Watershed Hydrology (3)
- RNR 7036 Advanced Topics in Natural Resources Biometrics and Management (3)
- RNR 7061 Water Quality Management and Policy (3)

Note:

Examples of potential courses that could also contribute to the educational goals of the student and satisfy course requirements in the Forestry and Forest Resources AOC are available on the SRNR website.

Doctor of Philosophy in Renewable Natural Resources (PRNR), Watershed Science AOC (WSCP)

The Watershed Science AOC will require a minimum of 15 hours of course work in addition to the general course requirements for all PhD students in the school. In particular, RNR 4900 Watershed Hydrology (3), or demonstration to the student's graduate committee of proficiency in watershed hydrology from previous course work and experience, is part of the required 15 hours. The remaining 12 hours will be determined by each student's committee depending on the needs of the student and the committee-approved dissertation project. Depending on prior course work and experience, additional courses will be required to satisfy the 48-hour course requirement for the PhD degree. Potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Watershed Science AOC are available on the SRNR website.

Doctor of Philosophy in Renewable Natural Resources (PRNR), Wildlife AOC (WLDP)

The Wildlife AOC will require a minimum of 15 hours of course work in addition to the general course requirements for all PhD students in the school. The following courses, or demonstration to the student's graduate committee of proficiency in one or more of these courses from previous course work and experience, are required, and may be included in the 15 hours required for the Wildlife AOC:

- RNR 7013 Wildlife Population Dynamics (3)
- RNR 7016 Current Topics and Techniques in Conservation Science (3)

Note:

Depending on prior course work and experience, additional courses will be required to satisfy the 48-hour course requirement for the PhD degree. Additional courses required for each student's departmental-level academic course plan will be determined by the graduate committee. Potential courses that could contribute to the educational goals of the student and satisfy course requirements in the Wildlife AOC are available on the SRNR website.

Social Work (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

The LSU School of Social Work was founded in 1937 in the era of the "New Deal" programs, reflecting a growing need for professional social workers. The school has a reputation for excellence in professional education and a long tradition of service to the professional community. The focus of the school is to educate competent, professional social workers and early childhood specialists and to use research to enhance the effectiveness of social work practice and practice in the fields of child and family studies and early childhood administration and leadership. The school has a commitment to culturally competent practice, an equally strong commitment to the social work profession's core values of social and economic justice, respect for the dignity and worth of each individual, and the centrality of human relationships to well-being. The research infrastructure of the school includes active programs in the areas of juvenile justice, poverty, mental health, addictions, gerontology, community development, and child welfare. The school is a charter member of the Council on Social Work Education and its master's program has maintained continuous accreditation with this body since its inception.

Leading

- A nationally ranked master's program
- The only social work PhD program in Louisiana
- Hartford Geriatric Social Work Faculty Scholar. The first faculty member from LSU to be selected as well as the first from the state of Louisiana
- Graduate selected as a Presidential Management Fellow by the U.S. Office of Personnel Management
- 2011 LMSW passing rate for first time test takers was 78% with the state average being 57% and a national average of 83%. 2011 LCSW passing rate was 81% with a 71% state average and a 78% national average.

Transforming

- Participating in the BRAVE Project (Baton Rouge Area Violence Elimination) along with law enforcement officials, residents, and social service providers to improve crime by targeting violent offenders as well as drug offenders in the city's 70805 ZIP code
- Establishing the Louisiana Poverty Initiative for research on the causes and outcomes of poverty, which focuses on academic research and individual and community actions to create pathways out of poverty for children and families
- Improving Louisiana's child welfare professionals through the Louisiana Child Welfare Comprehensive Workforce Project to improve safety, permanency, and well-being outcomes for children and youth by building the capacity of Louisiana's child welfare professionals and by improving the systems to recruit, train, supervise, manage, and retain them
- Meeting the critical need for more professionals skilled in the area of addictions by partnering with the Capital Area Human Services District on the Addictive Disorders Training Initiative

Empowering

Over 50 percent of all credentialed social workers in Louisiana have graduated from LSU and 77 percent of our graduates remain working in the state

- Students provide an estimated 100,000 hours of service to community agencies annually. There are more than 300 approved community agencies throughout every part of Louisiana serving as field placement sites
- Gerontology & Children/Youth Services Certificate programs address the educational needs of students who want to be engaged in planning, administration, and/or provision of services for older adults and children/youth

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department. Applicants must adhere to the application deadlines established by the Graduate School and the School of Social Work. Students seeking admission must submit satisfactory credentials from previous study, acceptable GRE scores, and three letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

The MSW Program has an application deadline date of **March 1** for Advanced Standing and Online Advanced Standing and **March 31** for Full-time, Part-time, and Online Part-time Programs. The School admits students for the fall semester of each year. Admission decisions are based on the applicant's academic record, GRE scores, letters of recommendation, letter of intent, work and volunteer experience, resumé as well as a personal interview. A genuine interest in people and emotional stability are also important qualifications for admission to the school. No academic credit is granted for work or life experiences.

The following are requirements that must be completed prior to admission to the MSW program:

- A baccalaureate degree from an accredited college or university.
- Demonstration of a liberal arts undergraduate preparation through completion of at least 12 credit hours in the social and behavioral sciences (psychology, sociology, anthropology, human geography, economics, political science, curriculum & instruction, etc.), and at least nine hours in the humanities (literature, languages, history, women's studies, art or music history, philosophy, cultural and comparative studies, communication studies, etc.).
- An undergraduate human biology course that covers humans as well as other animals.
- "C" or better in an introductory statistics course in any undergraduate department.
- A 3.00 cumulative GPA on undergraduate coursework and acceptable scores on the Graduate Record Exam (GRE).
- Evidence that the applicant possesses the personal qualities and aptitudes essential for the social work profession.
- A genuine interest in people and emotional stability are also important qualifications for admission to the school.
- Information concerning these qualities will be obtained from the student's application materials and from present or former employers, teachers, and other persons acquainted with the applicant, from pre-admission interviews on campus and an on-site writing sample.
- Other materials as required in the application process (items 1, 2 and 3 must be completed online):

- A completed application for graduate study.
- The MSW letter of intent.
- Three letters of reference.
- One official copy of all transcripts in sealed envelopes (all transcripts required, whether or not credit was earned or is desired).

The PhD Program has a priority deadline date of **February 1** and admits students for the fall semester of each year. Applications received after March 1 will be considered on a space-available basis. Admission decisions are based on applicant's academic record, GRE scores, personal qualifications, and proposed departmental-level academic course plan.

The following are requirements that must be completed prior to admission to the PhD program:

- A bachelor's degree from an accredited college or university with typical liberal arts, social sciences, introductory statistics, and human biology courses;
- An acceptable grade point average in undergraduate course work (as evaluated by the School of Social Work and The Graduate School);
- A master's degree in social work from a CSWE accredited program or a closely related discipline. Preference will be given to applicants with the MSW.
- A GPA in graduate studies of at least 3.00.
- Acceptable scores on the Graduate Record Exam (GRE) of at least 1000 or higher (old test) approximately 150 on both the quantitative and verbal sections (new test)
- Completion of a graduate introductory statistics course with a grade of "B" or better;
- Completion of a graduate introductory research course with a grade of "B" or better.
- Other materials as required in the application instructions (items 1, 2 and 3 must be completed online):
- The completed PhD application for admission.
- A completed plan of doctoral study, a 4-6 page (2000-2500 word) typed statement that addresses the following:
 - Describe your career goals in social work and how a PhD in social work will further those goals. Please state whether you plan to enroll on a part-time or full-time basis. If you plan to enroll full time, please clarify whether you hope to receive funding from the School and whether you plan to work part- or full-time while enrolled. Describe any relevant financial supports in place to assist you.
 - What are your areas of interest and your ideas for research? If you have plans for dissertation research, please describe them. Identify any faculty members that share your area of interest(s). Faculty information can be obtained at www.socialwork.lsu.edu.
 - What are your professional/scholarly areas for improvement, as you perceive them? Please describe your professional/scholarly strengths and abilities that you think will serve you well as a doctoral student.
 - Please supply the admissions committee with three samples of your professional/scholarly writing that best illustrate your capacity for analytic and critical thinking. Briefly describe in your **Plan of Doctoral Study** why your selection of writings is representative of these latter abilities.
- Three letters of reference

- One official copy of all transcripts in sealed envelopes (all transcripts are required, whether or not credit was earned or is desired)
- One sample of professional/scholarly writing

For more information on admission to the MSW or PhD program, please visit our website at www.socialwork.lsu.edu.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with admission deadlines for the appropriate program.

Graduate Faculty

(check current listings by department by clicking this link)

Priscilla D. Allen (M) • Gerontology, nursing homes, long-term ombudsman programs, policy issues

Annahita Ball (6A) • Research Interests: School social work; school-family-community partnerships; racial and ethnic disparities in education; school-based and -linked mental health services

Juan Barthelemy (3P) • Adolescent aggression and school violence, antiracism, recruitment and retention of minority graduate school students

Cassandra Chaney (M) • African-American Family Dynamics; Narratives among Dating, Cohabiting, and Married African-American Couples; Religiosity/Spirituality and African-American Families; Black male-female relationship dynamics in popular forms of media (television, movies, song lyrics); Qualitative Methods

Wesley Church (M) • Juvenile delinquency, mental health delivery in the juvenile justice system, stigmatized incarcerated populations, family systems, and family dynamics

Charles Grenier (EM) • Medical, mental health, research methodology

Cecile C. Guin (3F) • Death penalty mitigation, truancy issues, grant writing, juvenile justice

Catherine Lemieux (M) • Substance abuse assessment and intervention, evaluation of correction-based substance abuse programs, role of social support in recovery, development and testing of innovative teaching strategies that emulate core social work competencies, service-learning

Younghee Lim (M) • Evaluation of anti-poverty policies and programs, welfare reforms and well-being of families and children, poverty issues

Michelle Livermore (M) • Poverty and related policies, social development, community social capital, civic engagement, employment of women living in poverty

Elaine Maccio (M) • Gay and lesbian issues, gender and women's issues, diversity and multiculturalism, substance use/abuse and addictions

Loren Marks (M) • Religion and family, African-American families, qualitative methods

Brij Mohan (EM) • Mental health, social theory, philosophy of science, human diversity, oppression, international and comparative social welfare

Pamela Monroe (M) • Family policy, poverty, welfare reform, women's labor force participation, economic revitalization/work force development

Timothy F. Page (M) • Child and family treatment, attachment theory, vulnerable children, narrative methodologies with young children, clinical practice

Sarah Pierce (6A) • Experiences in the parent-child relationship and in the teacher-child relationship; Developmental Systems Theory

Katherine Stamps-Mitchell (6A) • Primary Areas of Research Interest: Sociology of Families and Children, Life Course, Social Demography, Stratification, Fertility, Education, Public Policy

Scott Wilks (M) • Coping and resilience among dementia caregivers, custodial grandparent issues, gerontological social work

Mi Youn Yang (6A) • Poverty, child abuse and neglect, child well-being

Masters

Social Work, M.S.W.

Master of Social Work (MSW)

The MSW curriculum consists of 60 hours of graduate study, including field internship that can be completed in two calendar years of full-time study. The School offers full-time, part-time, online education, or advanced standing program options. Students with a Bachelor of Social Work may be eligible for the advanced standing program, which consists of 33 hours of graduate study including three required hours taken in the summer term. The first year of the program is structured to provide the knowledge, skills, and values required for all social work practice. This includes environment, and field instruction. The advanced year provides instruction in advanced direct practice, advanced social policy, program evaluation, 12 hours of electives, and advanced field internship. The field education office places students in an internship in the Baton Rouge area or an agency near the student's home that will provide a good educational experience in a supervised setting.

Field Education

Professional social work education has a strong tradition of interweaving theory and practice through a field internship program. In addition to classroom studies, students in the MSW program at LSU normally spend about 240 hours each semester in a social service agency. All placements are arranged by the field office within the school. The school has a large number of field placements in a wide variety of settings, including family and children's services, hospitals, counseling centers, mental health agencies, community centers, legislative offices, and advocacy groups. The internship program allows students to develop their practice skills and to apply theory and knowledge in real-life settings.

DEGREE REQUIREMENTS:

The degree requires successful completion of a **thesis or non-thesis** option. **Sixty hours** of credit at the graduate level must be earned including a minimum of six hours of credit for the thesis. Candidates for the MSW degree will be required to pass a final examination during the semester in which they intend to graduate. This examination will consist of either a defense of a **thesis** or completion of the non-thesis option. The **non-thesis option** is an integrative and reflective capstone experience composed of three major components, all of which must be satisfactorily completed by students:

- Comprehensive Exam
- Portfolio of Representative Work
- Integrative Seminar

The curricular requirements include:

- Successfully complete *at least 60 hours* at the graduate level with the exception of advanced standing students, who must complete at least 33 hours at the graduate level;
- A minimum core requirement of *48 credit* hours and 12 hours of elective credit;
- Maintain an overall grade point average of 3.00, with no grade less than "C" in any course offered for the degree. No more than six hours of credit received with a grade of "C" can be counted toward the MSW degree; and
- Successfully complete the exit requirement: a thesis or a non-thesis option.

Doctorate

Social Work, Ph.D

(PSW)

The PhD in social work is aimed at providing an advanced interdisciplinary degree that will equip graduates for important roles in policy analysis and development, research, and teaching. The period of study for the doctoral degree in social work is typically three to five years, but is not to exceed seven years.

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires students to:

- Successfully complete 54 semester hours of study, including nine hours of dissertation, which must be completed within seven years from being classified as a doctoral student.
- Maintain an overall grade point average of 3.00, with no grade less than "C" in any course offered for the degree.
- Demonstrate mastery of a broad major field (i.e. social work) as evidenced by passing the general examination.
- Satisfactorily complete the exit requirement: the dissertation and the dissertation defense.

The curricular requirements include:

- Successfully complete at least 54 hours of graduate level work maintaining an overall grade point average of 3.00, with no grade less than "C" in any course offered for the degree. No more than six hours of credit received with a grade of "C" can be counted toward the PhD degree.
- a minimum core requirement of *15 credit* hours in social work foundation courses, 12 credit hours in research and statistics, 12 hours of interdisciplinary course work and at least 15 hours of dissertation credit
- The student must pass a general exam consisting of a written exam and oral exam.

Concentration in Child & Family Studies

The Ph.D in Child and Family Studies (CFS) concentration is a minimum of 15 hours of designated CFS research and elective courses, in lieu of 12 hours of research cognate and interdisciplinary electives currently required of the Ph.D in Social Work degree. The CFS concentration courses include: Advanced Studies in Family Science, Advanced Studies in Child Development, Theories of Child Development, Theories in Family Science, Research Methodology in Child and Family Studies. Successful completion of the CFS concentration requires fulfillment of all requirements of doctoral students in Social Work.

Sociology (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

Established in 1928 as a separate academic unit, the Department of Sociology is one of the oldest such programs in the South. The first MA degree was awarded in 1931 and the first doctorate in 1937. The department now has granted over 210 MA degrees and over 160 PhD degrees. Our department has maintained a very high national reputation in research productivity, as faculty from leading departments around the country have joined the LSU faculty. Recently, the department has been well known for its main research areas, specifically in social inequality, social capital, and criminology.

One of the most important goals of the Department of Sociology is to offer a quality departmental-level academic course plan that meets the needs and interests of each student. One testament to the quality of the program is the fact that most of our graduates with PhD degrees have been appointed to teach and conduct research at various universities, both at national and

regional levels. The ratio of faculty to students consistently remains at a level that facilitates close consultation between the two. The result is a friendly and positive environment for graduate study.

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by the department primarily for fall admission. Applicants must adhere to the application deadlines established by the Graduate School. The application deadline for students who seek funding is **January 31**. Although applicants for fall admission without financial support are considered after January, it is highly recommended that applications be submitted early because we may stop accepting any applicants after a certain date.

Students seeking admission must submit satisfactory credentials from previous study, acceptable *GRE* scores, and three or more letters of recommendation. International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to most students. Support may be available through the department or other units in the form of research or teaching assistantships. A student should contact the department for more information on available assistantship positions. Department graduate assistantships provide an annual stipend of a minimum of \$11,000 with free tuition. A number of enhancements and fellowships are available to students and are awarded on a competitive basis. To ensure consideration for financial aid, all application materials should be submitted by **January 31**.

Joachim Singelmann (EM)
Timothy A. Slack (7M) • Rural sociology, poverty, demography
Samuel Stroope (6A) • Health, research methods, culture/religion
Frederick D. Weil (7M) • Political sociology, democracy, social change

Masters

Sociology, M.A.

(ASOCL)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

We have thesis and non-thesis degrees requiring a thesis and empirical research paper, respectively. Thirty-six (36) hours of credit at the graduate level must be earned including a maximum of six hours of credit for the thesis or empirical paper to count toward graduation. The curricular requirements include:

- At least 6 credits from 7000-level sociology topical seminars (SOCL 7351, SOCL 7391, SOCL 7491, SOCL 7591, SOCL 7691),
- A minimum core requirement of 12 credit hours in sociological theory, methods, and statistics,
- other 7000-level courses.

The student must pass a final exam consisting of a thesis or empirical research paper and an oral defense.

Doctorate

Sociology, Ph.D.

(PSOCL)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members such that the LSU Graduate School's requirements for graduate committees are satisfied.

The degree requires a doctoral dissertation. Fifty-four (54) hours of credit at the graduate level must be earned including a maximum of nine hours of credit for the dissertation to count toward graduation. The curricular requirements include:

- At least 12 credits from 7000-level sociology topical seminars (SOCL 7351, SOCL 7391, SOCL 7491, SOCL 7591, SOCL 7691),
- A minimum core requirement of 21 credit hours in sociological theory, methods, and statistics,
- other 7000-level courses.

The student must pass a general examination following completion of required course work consisting of written and oral assessments. The student then defends a dissertation prospectus and must pass a final examination upon completion of his/her PhD dissertation. The final examination is a culmination of graduate study and consists of an oral defense of the dissertation.

Theatre (Graduate Program)

For information regarding the UNDERGRADUATE PROGRAM, [click here](#).

Program Overview

On the eve of our 84th season, the LSU Department of Theatre continues to achieve national and international prominence in scholarship and performance. The MFA degree— with a specialization in acting—is a two-year, year-round professional actor training program featuring the integration of both traditional and innovative physical, vocal, and process approaches for 21st century performers. The MFA acting program begins in the summer term and runs for two consecutive years. The MFA degree— with specializations in scenic technology and design; costume technology and design; and properties technology— is a three-year program preparing the theatre artisan for a professional role encompassing a wider range of production and/or teaching responsibilities. The training for exceptional candidates is augmented through undergraduate teaching opportunities and production positions with Swine Palace, the department's affiliate professional theatre. Our PhD program—with concentrations in theatre history, dramatic literature, and theory and criticism—develops the knowledge, critical skills, and methodological approaches that will allow students to conduct research as professional scholars and become excellent teachers in the field. The Department of Theatre fosters creativity and originality in its stage productions and scholarship, and offers a learning environment unique to the region.

With Swine Palace, the department has distinguished itself as one of the few programs in the country that supports a full-time, year-round equity theatre company.

While pursuing their degrees, students have the opportunity to work alongside world-class artists in every facet of production. Many students are Actors' Equity Association (AEA) eligible by the time they graduate.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applications for admission are received and evaluated by program heads in the Department of Theatre year-around. Applicants must adhere to the application deadlines established by the Graduate School.

Students seeking admission must submit transcripts of all previous university work, three letters of recommendation, a résumé, and a statement of goals. Individual programs have additional requirements as follows:

- PhD - current GRE scores; a writing sample, preferably a research paper written for a graduate course
- MFA with specialization in acting—an audition.
- MFA with specialization in costume technology and design, or properties technology—a portfolio and a personal interview.
- MFA with specialization in scenic technology and design—current GRE scores; a portfolio and a personal interview.
- International students whose native language is not English must also submit an acceptable TOEFL, IELTS, or PTE score.

Financial Assistance

Financial assistance is available to some students. Support may be available through the student's home department or other units in the form of research or teaching assistantships. A student should contact his or her home department for more information on available assistantship positions. To ensure consideration for financial aid, all application materials should be submitted in accordance with deadlines established by the LSU Graduate School. Departmental deadlines for funding are January 15 for the PhD program and March 1 for the MFA program.

Masters

Theatre, M.F.A.

(MFATH)

(Specializations in Acting; Costume Technology and Design; Properties Technology; Scenic Technology and Design).

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The curricular requirements include:

MFA (specialization in Acting)

- Two consecutive years of residency including summer sessions.

- 71 credit hours exclusive of thesis credit.
- Minimum of six credit hours in THTR 8000 Thesis Research (1-12 per sem.).
- Thesis project focused on the preparation, rehearsal and performance of a significant role.

MFA (specializations in Costume Technology and Design; Properties Technology; Scenic Technology and Design)

- Three consecutive years of residency.
- 67 credit hours exclusive of thesis credit.
- Minimum of six credit hours in THTR 8000 Thesis Research (1-12 per sem.).
- Thesis project focused on a topic pertaining to the field or on a primary position on a Mainstage production.

Doctorate

Theatre, Ph.D.

(PTHTR)

(Specializations in Theatre History, Dramatic Literature, Theory, and Criticism)

The departmental-level academic course plan for each student will be developed in consultation with and approved by the student's graduate advisory committee. The committee will include the student's major advisor and at least two additional members of the graduate faculty such that the LSU Graduate School's requirements for graduate committees are satisfied.

The curricular requirements include:

- Minimum of 81 credit hours past the BA (excluding a minimum of nine dissertation hours); MA or MFA can count for up to 30 hours.
- Nine to 12 credit hours in minor.
- Three credit hours outside of major and minor (7000) level.
- Three credit hours in non-Western theatre, art or culture.
- Three credit hours in THTR 7900 Introduction to Graduate Study in Theatre (3).
- Six credit hours in theory sequence (THTR 7924 and THTR 7925).
- 15 hours in literature and history (THTR 7901, THTR 7902, THTR 7903, THTR 7904, THTR 7912, THTR 7913, THTR 7914 (TBA), THTR 7923 (TBA)).
- Three credit hours in THTR 7920 Seminar in Drama of the African Diaspora (3).
- Three credit hours in a Women's and Gender Studies course.
- Three credit hours in a College of Human Sciences and Education course in pedagogy.
- Three credit hours of electives.
- Nine credit hours for dissertation (THTR 9000).
- Satisfy reading capability of foreign language.

- Successfully defend prospectus.

First Year Qualifying Examination

This examination will occur in the spring of the student's first year. The exam will involve three components: 1) teaching an undergraduate theatre class; topic given two weeks ahead of class date 2) undertaking revision of a seminar paper written in the fall semester 3) defending first-year performance before a faculty committee.

General exams:

Successful completion of general exams will involve two components:

- Sit-down exams (two four-hour exams)
- First exam - primarily short answer (general breadth—content questions from the areas of Theater History and Practice, Dramatic Literature and Theory and Criticism).
- Second exam - broader essays, three out of four (integrative—address important issues in Theater Studies through an integrated approach utilizing historical, critical, and literary analysis).
- Professional competencies/portfolio
- Statement of teaching philosophy
- Book and/or performance review
- Bibliography for specialty area
- Essay revised for journal submission
- Updated professional C.V.

Final defense

A successful oral defense of dissertation before committee members and submission of the dissertation to The Graduate School is required.

Veterinary Clinical Sciences (Graduate Program)

Program Overview

Located in the School of Veterinary Medicine, the graduate academic and research program of the Department of Veterinary Clinical Sciences offers a dynamic environment to prepare nationally competitive veterinary clinicians in research methodology for placement in advanced clinical, academic, and industrial research positions. Programs are designed to enhance skills in clinical research of direct application to animal and human disease. This area of emphasis is supported by departmental clinical expertise in anesthesiology, cardiology, dermatology, internal medicine, companion animal soft tissue surgery, basic and applied orthopedic surgery, equine medicine and surgery, food animal medicine and surgery, diagnostic imaging, oncology, ophthalmology, pharmacology, zoo and exotic animal medicine, and theriogenology. The program draws on expertise in anatomy, bioengineering, biomechanics, biotechnology of infectious diseases, cell and molecular biology, bacteriology, environmental health science, epidemiology, immunology, parasitology, pathology, physiology, pharmacology, toxicology, and virology through the School of Veterinary Medicine umbrella program in graduate studies and in collaborative studies with other units on campus. Interdisciplinary and multidisciplinary research is emphasized, and because of the wide array of immediate expertise, graduate programs are flexible to meet students' needs.

Administration

Admission

Applications and supporting materials for all graduate study must be submitted through the online application site for the LSU Graduate School: www.lsu.edu/gradapply. Official transcripts, official test scores, and other materials that come from third-party sources must be mailed to: Graduate Student Services, 114 West David Boyd Hall, Baton Rouge, LA 70803. These paper documents are stored electronically and departments have access to all materials submitted by and/or on behalf of a student applying to graduate study.

Applicants must have a DVM (or equivalent) degree or a bachelor's degree. Applicants for combined residency/MS programs must apply through the veterinary intern/residency matching program at www.virmp.org. Candidates for the combined residency/MS programs must have a DVM or equivalent degree; must have completed a rotating internship or equivalent training; and must submit a letter of intent, transcript of grades from veterinary school, and three letters of reference in accordance with the guidelines listed on the website. To qualify for the combined residency/MS program, applicants must satisfy all criteria for residency training and Graduate School admission.

Applications for the PhD are accepted at any time but are evaluated only after all supporting documents and credentials (official transcripts, official GRE scores, Graduate School application for admission, application fee) have been received. Application should be initiated at least six months prior to anticipated entry. One of the graduate faculty members of the department must have accepted you as a student in his/her laboratory before admission will be considered.

Unconditional admission to the Graduate School for MS and PhD programs requires that applicants score at least 300 on the GRE (verbal plus quantitative scores) and have an overall grade point average in veterinary or undergraduate school of at least 3.00 on an "A" = 4.0 scale. Foreign nationals from countries where English is not the first language must have a TOEFL score of at least 550 on the paper-based test or 79 on the Internet-based test, have an IELTS score of at least 6.5, or have a PTE score of at least 59 and meet standards of proficiency in English as required by the Graduate School.

Financial Assistance

The stipends for combined residency/MS programs are listed on the Veterinary Internship/Residency Matching Program website: www.virmp.org. Stipends, fellowships, and assistantships from various sources are available on a competitive basis for doctoral students.

Facilities

The department supports a well-equipped veterinary referral hospital with specialty services in anesthesia; bird, zoo and exotic animal medicine; companion animal medicine; cardiology; companion animal soft tissue and orthopedic surgery; dermatology; equine medicine; equine surgery; food animal medicine; oncology; ophthalmology; diagnostic imaging; and theriogenology. The department has laboratories equipped for physiological research, cell biology, membrane physiology, PCR technology, gene expression, kinesiology, biomechanical testing, stem cell biology, and assisted reproduction. In addition, support from a full-capability gene research laboratory; cell and organ culture facilities; fluorescent activated cell sorting and analysis; cytokine, lymphokine and monoclonal antibody techniques; and a microscopy center with confocal and electron microscopy provide for diverse research endeavors. The department forms the base of the interdepartmental Equine Health Studies Program and is supported by well-equipped animal facilities.

Masters

Veterinary Medical Sciences- Veterinary Clinical Sciences, M.S.

(SVMCS)

The School of Veterinary Medicine offers the M.S. and Ph.D. in veterinary medical sciences with emphasis in clinical sciences. The graduate program of study and research are directed and evaluated by the student's graduate committee. This committee is composed of at least three members of the graduate faculty. Master's graduate students must complete a minimum of 30 credit hours of graduate courses, a final examination, and a thesis.

Course requirements:

- A minimum of 12 hours of graduate work must be at the 7000-level or higher.
- A minimum of 10 hours of course credit must be from VCS courses.
- A minimum of 6 hours of research/thesis credit must be completed (only 6 hours counted towards degree).
- A maximum of 4 hours of seminar (VCS 7001) may be applied toward the M.S. degree.
- A maximum 8 hours of special topics (VCS 7003) may be applied toward the M.S. degree.
- A minimum of 8 hours of non-VCS courses.

The preparation of a thesis is an important element in the program leading to the master's degree. The master's thesis should demonstrate capacity for research, originality of thought, and facility in organizing materials. Final acceptance of the master's thesis rests with a student's graduate committee.

The thesis must be successfully defended in a final defense and examination. A request for the final examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date and by the current semester deadline, if the student is a candidate for a degree (see the academic calendar for all pertinent dates). The examining committee, must have copies of the thesis at least two weeks prior to the final examination. Typically, the final examination is an oral examination following the thesis defense. The thesis defense takes the form of a seminar, open to attendance by any interested parties. Following the seminar, the graduate student and the examination committee will convene and discuss the thesis, asking questions of the graduate student.

Doctorate

Veterinary Medical Sciences- Veterinary Clinical Sciences, Ph.D.

(PVMSC)

The School of Veterinary Medicine offers the M.S. and Ph.D. in veterinary medical sciences with emphasis in clinical sciences. The graduate program of study and research will be directed and evaluated by the student's graduate committee. This committee will be composed of at least 3 members of the graduate faculty. Doctoral graduate students must complete a minimum of 60 credit hours of graduate courses, a comprehensive examination, final examination, and a dissertation.

The coursework requirement for the Ph.D. degree is 60 hours at the course level of 4000 or higher. The coursework, in conjunction with research training, will provide the student with the skills needed for continuing research independent of the major professor. The VCS coursework requirements are as follows:

- at least 14 credits of VCS courses.
- at least two statistic courses (minimum of 6 credits)
- at least three credits of VCS 7001 (max. of 4) (Seminar).
- at least three credits of VCS 7210 (max. of 4) (Journal Review).
- a maximum of 6 hours VCS 7003 (Special Topics).
- VMED 7004 (2 credits) (Intro to Research)
- a minimum of 12 hours of research (VMED 8900, VMED 9000) with a maximum of 24 hours.

Candidates for the PhD degree are required to pass a comprehensive examination. This examination occurs within 3 years of onset of program and after completion of the majority of the student's coursework. This examination may be oral, written or both, depending on the preference of the student's graduate committee.

The preparation of a dissertation is an important element in the program leading to the doctoral degree. The dissertation should demonstrate capacity for research, originality of thought, and facility in organizing materials. Final acceptance of the dissertation rests with a student's graduate committee.

The dissertation must be successfully defended in a final defense and examination. A request for the final examination must be submitted to the Graduate School by the student's department chair at least three weeks prior to the proposed examination date and by the current semester deadline, if the student is a candidate for a degree (see the academic calendar for all pertinent dates). The examining committee, must have copies of the dissertation at least two weeks prior to the final examination. Typically, the final examination is an oral examination following the dissertation defense. The defense takes the form of a seminar, open to attendance by any interested parties. Following the seminar, the graduate student and the examination committee will convene and discuss the dissertation, asking questions of the graduate student.
